Crosley Broadcasting Corp., Cincinnati (WLW-T, Cincinnati; WLW-D, Dayton; WLW-C, Columbus)—Opposes following: (1) For Cincinnati, proposal of Indiana Technical College, Ft. Wayne, Ind., to assign Channel 5 to Ft. Wayne. (2) For Dayton, proposal of Allen B. DuMont Laboratories, New York, to operate WLW-D on 5, assign 5 to Cleveland, 6 to Columbus. (3) For Columbus, proposals of: (a) Southern Illinois U, Carbondale, Ill.; WIBC Inc., Indianapolis; L. B. Wilson Inc., Cincinnati, to assign 4 to Indianapolis and Columbus; (b) Allen B. DuMont Laboratories, New York, to assign 3 in lieu of 4 to Columbus, 3 to Indianapolis; (c) Matta Broadcasting Co., Braddock, Pa., to assign 4 to Braddock; (d) Allegheny Broadcasting Corp., Pittsburgh Radio Supply House Inc., Westinghouse Radio Stations Inc., WWSW Inc., Pittsburgh, to assign 4 to Pittsburgh. (4) For Indianapolis, proposals of: (a) Columbia Broadcasting System, New York, to delete 13 from Indianapolis or assign 13 to both Indianapolis and Chicago; (b) Ohio State U, Columbus, to assign 13 to Columbus from Indianapolis. (5) For Toledo, proposals of: (a) Wayne University and Detroit Board of Education to assign 11 to Detroit from Toledo; (b) Allen B. DuMont Laboratories, New York, to delete 11 from Toledo. (Hogan & Hartson.)

OHIO—Continued

Radio Cincinnati Inc., Cincinnati (WKRC & WKRC-TV)—Opposes proposals of: (1) Allen B. DuMont Laboratories Inc., New York, to retain Channel 7 and 11 in Cincinnati. (2) L. B. Wilson Inc., Cincinnati, to assign 9 and 13 to Cincinnati, 7 to Dayton. (3) Ohio State U, Columbus, to assign 13 to Cincinnati. (4) Southeastern Ohio Broadcasting System Inc., Zanesville, O., and Shenandoah Valley Broadcasting Corp., Harrisonburg, Va., to assign 11 to Cincinnati. (Cohn & Marks.)

Cleveland Broadcasting Co. Inc. (WERE), United Broadcasting Co. (WHK), WGAR Broadcasting Co. (WGAR), WJW Inc. (WJW), Cleveland—Oppose proposals of: (1) Trebit Corp., Flint, Mich., to assign Channel 10 to Flint. (2) WCAE Inc., Pittsburgh, Pa., to assign 16 to Washington, Pa. and 65 to Bellefontaine, O. (3) WBVP Inc., Beaver Falls, Pa., to assign 16 to Beaver Falls. (4) Pittsburgh Radio Supply House, Pittsburgh, to assign 16 to Wheeling, W. Va. (5) Allen B. DuMont Laboratories Inc., New York, for failing to provide competitive situation between vhf and uhf in Cleveland, and providing only 6 channels instead of 8 proposed by Cleveland applicants. (Caldwell-Rollo-Russell.)

Scripps-Howard Radio Inc., Cleveland (TV station WEWS)—Opposes proposals of: (1) Bay City Broadcasting Co., Bay City, Mich., to assign Channel 5 to Bay City. (2) L. B. Wilson, Inc., Cincinnati, O., to assign 5 to Clarksburg, W. Va. (3) Music Broadcasting Co., Grand Rapids, Mich., to assign 5 to Lansing. (Dempsey & Koplovitz.)

Crosley Broadcasting Corp., Columbus (WLW-C)—See Crosley Broadcasting Corp., Cincinnati, O.

Dispatch Printing Co., Columbus (WBNS & WBNS-TV)—Opposes proposals of: (1) William H. Block Co., Indianapolis, and L. B. Wilson Inc., Cincinnati, to assign Channel 10 to Indianapolis. (2) Twin Valley Broadcasters Inc., Coldwater, Mich., to assign 10 to Coldwater. (Dow, Lohnes & Albertson.)

Picture Waves Inc., Columbus (WTVN)—Opposes proposals of: (1) Booth Radio & Television Stations Inc. and WJR, The Goodwill Station, Detroit, to assign Channel 6 to Detroit. (2) Allen B. DuMont Laboratories Inc., New York, to assign 6 to Detroit, 5 to Dayton. (Fly, Shuebruk & Blume.)

Crosley Broadcasting Corp., Dayton (WLW-D)—See Crosley Broadcasting Corp., Cincinnati, O.

Miami Valley Broadcasting Corp., Dayton (WHIO & WHIO-TV)—Opposes proposal of Allen B. DuMont Laboratories, New York, to assign Channel 13 to Dayton and Toledo, Ohio, and Terre Haute, Ind. (Dow, Lohnes & Albertson.)

WSTV Inc., Steubenville (WSTV)—Opposes proposals of: (1) Allegheny Broadcasting Corp., Pittsburgh Radio Supply House Inc., WCAE Inc., Westinghouse Radio Stations Inc., Pittsburgh, to assign Channel 9 to Pittsburgh. (2) Washington Broadcasting Co., Washington, Pa., to assign 9 to Washington. (3) Fort Industry Co., Wheeling, W. Va., favoring FCC proposals for Wheeling. (4) Allen B. DuMont Laboratories Inc., New York, for failure to propose vhf channel to Steubenville. (Caldwell-Rollo-Russell.)

Community Broadcasting Co., Toledo (WTOL)—Opposes proposals of: (1) Allen B. DuMont Laboratories Inc., to delete Channel 13 from Toledo. (2) Wayne U and Detroit Board of Education to move 11 from Toledo to Detroit. (Pierson & Ball.)

Crosley Broadcasting Corp., Toledo—See Crosley Broadcasting Corp., Cincinnati, O.

Fort Industry Co., Toledo (WSPD & WSPD-TV)—Opposes proposal of Allen B. DuMont Laboratories, New York, to substitute Channel 11 for 13 in Toledo. (Dow, Lohnes & Albertson.)

Maumee Valley Broadcasting Co., Toledo—Opposes proposals of Wayne U and Detroit Board of Education, Detroit, to assign Channel 11 to Detroit and 12 to Saginaw. (Roberts & McInnis.)

Toledo Blade Co., Toledo—Opposes proposal of Wayne U and Detroit Board of Education to move Channel 11 from Toledo to Detroit. (Segal, Smith & Hennessey.)

OKLAHOMA

Oklahoma A & M College, Stillwater—Request channel be allocated to Stillwater for educational purposes. (Philip S. Donnell, v.p.)

Cameron Television Inc., Tulsa (KOTV)—Opposes proposals of KFBI Inc. and Taylor Radio & Television Corp., Wichita, Kan., to substitute Channel 11 for 6 in Tulsa. (Hogan & Hartson.)

All Oklahoma Broadcasting Co., Tulsa—Opposes proposals of: (1) WKY Radiophone Co., Oklahoma City, to assign Channels 4, 7 & 13 to Oklahoma City, 2, 6 & 9 to Tulsa, 11 to Muskogee. (2) Southwestern Publishing Co., Fort Smith, Ark., to assign Channel 8 to Fort Smith. (Fly, Shuebruk & Blume.)

OREGON

Central Willamette Broadcasting Co., Albany (KWIL)—Petitions for waiver of rules to permit filing of new proposal to provide 4 additional vhf channels to Washington and Oregon. (Fisher, Wayland, Duvall & Southmayd.)

PENNSYLVANIA

WBVP Inc., Beaver Falls (WBVP)—Opposes proposals of: (1) Cleveland Broadcasting Co., United Broadcasting Co., WGAR Broadcasting Co. and WJW Inc., Cleveland, O., to assign Channel 16 to Pittsburgh. (2) WCAE Inc., Pittsburgh, Pa., to assign 16 to Washington, Pa. (3) Pittsburgh Radio Supply House, Pittsburgh, to assign 16 to Wheeling, W. Va. (Segal, Smith & Hennessey.)

Tri-County Broadcasting Co., DuBois (WCED)—Opposes proposal of Cleveland Broadcasting Co., United Broadcasting Co., WGAR Broadcasting Co., WJW Inc., Cleveland, O., to substitute Channel 60 for 31 in Dubois. (Fisher, Wayland, Duvall & Southmayd.)

Ditspatch Inc., Erie (TV station WICU)—Opposes proposal of Presque Isle Broadcasting Co., that Channel 12 in Erie be reserved for educational use and WICU be shifted to uhf channel. (Fly, Shuebruk & Blume.)

Peoples Broadcasting Co., Lancaster (WLAN)—Opposes assignment of Channel 7 or 8 to Wilmington, Del., proposed by Pennsylvania Broadcasting Co., Chamber of Commerce, City of Philadelphia, Daily News Television Co., Philadelphia. (Stephen Tuhy Jr.)

WGAL Inc., Lancaster (WGAL & WGAL-TV)—Opposes proposal of Peoples Broadcasting Co., Lancaster, Pa., for competitive hearing with WGAL-TV for Channel 8; serves notice it will appear at hearing to support FCC proposals as they affect WGAL-TV and to oppose proposals of Easton Publishing Co., Easton, Pa., and Trent Broadcast Corp., Trenton, N. J., both of whom challenged legality of fixed allocation plan. (George O. Sutton.)

Lebanon Broadcasting Co., Lebanon (WLBR)—Opposes proposals of Eastern Radio Corp., Reading, to assign Channel 15 to Reading, 55 to Lebanon. (Miller & Schroeder.)

Board of Public Education, Philadelphia—Opposes proposals of Philadelphia Chamber of Commerce, City of Philadelphia, Daily News Television Co., and Pennsylvania Broadcasting Co. to assign Channel 12 to Philadelphia for commercial use. (Edward B. Soken.)

WCAE Inc., Pittsburgh (WCAE)—Opposes proposals of: (1) Tri-City Broadcasting, McKeesport, Pa., to assign Channel 7 to McKeesport. (2) Cleveland Broadcasting Co., United Broadcasting Co., WGAR Broadcasting Co., WJW Inc., Cleveland, O., to assign 16 to Pittsburgh. (3) Columbia Broadcasting System Inc., New York, to assign 64 to Indianapolis. (4) Washington Broadcasting Co., Washington, Pa., to assign 9 to Washington. (5) WBVP Inc., Beaver Falls, Pa., to assign 16 to Beaver Falls. (6) WSTV Inc., Steubenville, O., to assign 9 to Steubenville. (7) L. B. Wilson Inc., Cincinnati, to assign 63 to Steubenville. (Dempsey & Koplovitz.)

WWSW Inc., Pittsburgh (WWSW)—Opposes proposals of: (1) Matta Broadcasting Co., Braddock, Pa., to assign Channel 4 to Braddock. (2) Tri-City Broadcasting Co., McKeesport, Pa., to assign 13 to McKeesport. (Segal, Smith & Hennessey.)

RHODE ISLAND

Outlet Co., Providence (WJAR & WJAR-TV)—Opposes proposals, requiring its shift to Channel 12, by Columbia Broadcasting System, New York; Hampden-Hampshire Corp., Holyoke, Mass.; Travelers Broadcasting Service Corp., Hartford, Conn.; Matheson Radio Co., Boston, Mass.; WTAG Inc., Worcester, Mass., and Allen B. DuMont Laboratories Inc., New York. (Dow, Lohnes & Albertson.)

SOUTH CAROLINA

Broadcasting Co. of the South, Columbia (WIS)—Opposes proposals of: (1) Southeastern Broadcasting Co. and Middle Georgia Broadcasting Co., Macon, Ga., to assign Channel 7 to Macon. (2) Spartan Radiocasting Co., Spartanburg, S. C., to delete 7 from Columbia. (3) Allen B. DuMont Laboratories Inc., New York, to assign only 5 & 9 to Columbia. (Dow, Lohnes & Albertson.)

City of Columbia—Opposes proposals of: (1) Spartan Radiocasting Co., Spartanburg, S. C., to move Channel 7 to Spartanburg. (2) Southeastern Broadcasting Co. and Middle Georgia Broadcasting Co., Macon, Ga., to assign 7 to Macon. (3) Allen B. DuMont Laboratories Inc., New York, to assign 5 & 9 to Columbia in lieu of 7 & 10.

Marseco Broadcasting Co., Columbia (WMSC)—Opposes proposals of: (1) Southeastern Broadcasting Co. and Middle George Broadcasting Co., Macon, Ga., to assign Channel 7 to Macon. (2) Spartan Radiocasting Co., Spartanburg, S. C., to assign 7 to Spartanburg from Columbia. (Hogan & Hartson.)

Palmetto Broadcasting Corp., Columbia (WNOK)—Opposes proposals of: (1) Spartan Radiocasting Co., Spartanburg, S. C., to delete Channel 7 from Columbia. (2) Southeastern Broadcasting Co. and Middle Georgia Broadcasting Co., Macon, Ga., to assign 7 to Macon. (3) Allen B. DuMont Laboratories Inc., New York, to assign 5 & 9 to Columbia in lieu of 7 & 10. (John F. Clagett.)

Greenville City Schools, Greenville—Opposes proposal of Bob Jones U, Greenville, S. C.

TENNESSEE

Tri-State Telecasting Corp., Chattanooga—Opposes proposal of Allen B. DuMont Laboratories, New York, to remove vhf channel from Chattanooga. (Loucks, Zias, Young & Jansky.)

WDOD Broadcasting Corp., Chattanooga (WDOD)—Opposes proposal of Allen B. DuMont Laboratories Inc., New York, to reduce number of vhf channels in Chattanooga. (Dow, Lohnes & Albertson.)

WJHL Inc., Johnson City (WJHL)—Opposes proposals of: (1) Radio Athens Inc., Athens, Ga., to assign Channel 11 to Athens. (2) Allen B. DuMont Laboratories Inc., New York, to assign 5 to Johnson City in lieu of 11. (Haley, McKenna & Wilkinson.)

Capitol Broadcasting Co., Nashville (WKDA)—Opposes proposal of WHUB Inc., Cookeville, Tenn., to assign Channel 5 to Cookeville. (Segal, Smith & Hennessey.)

WSM Inc., Nashville (WSM & WSM-TV)—Opposes proposal of Allen B. DuMont Laboratories Inc., New York, N. Y., because co-channel and adjacent-channel separation is less than FCC's proposals. (Caldwell-Rollo-Russell.)

TEXAS

Lufkin Amusement Co., Beaumont—Opposes proposals of: (1) KTRH Broadactsing Co. and Shamrock Broadcasting Co., Houston, to assign Channel 12 in lieu of 4 to Beaumont-Port Arthur, 4 in lieu of 11 to Galveston, 5 to Houston. (2) Allen B. DuMont Laboratories Inc., New York, to assign Channel 13 in lieu of 6 to Beaumont-Port Arthur, 4 to Monroe, La. (3) South Texas Television Co., Houston, to assign 12 in lieu of 4 to Beaumont-Port Arthur, 4 in lieu of 11 to Galveston, 5 to Houston. (Barnes & Neilson.)

Oil Belt Television Co., Breckenridge—Opposes proposal of Trinity Broadcasting Co., Oak Cliff, Tex., to assign Channel 7 to Dallas. (P. W. Seward.)

Brownsville Broadcasting Co., Brownsville (KBOR)—Opposes proposals of Harbenito Broadcasting Co., Harlingen, Tex., McAllen Television Co., McAllen, Tex., and Taylor Radio & Television Corp., Weslaco, Tex., to delete Channel 4 or 5 or both from Brownsville. (Fisher, Wayland, Duvall & Southmayd.)

Corpus Christi Broadcasting Co. Inc., Corpus Christi (KSIX)—Opposes proposals of FCC to delete Channels 3 & 8 from Corpus Christi. (Fisher, Wood & Burney, Corpus Christi.)

Houston Post Co., Houston (KPRC & KPRC-TV)—Opposes proposals for mileage separation on Channels 2 thru 6 and 7 thru 13 made by Loyola U, New Orleans; KTRH Broadcasting Co., Shamrock Broadcasting Co. and South Texas Television Co., Houston; WMPS Inc. and WREC Broadcasting Service, Memphis; Harbenito Broadcasting Co. Inc., Harlingen, Tex.; Lamar Life Insurance Co., Jackson, Miss.; Taylor Radio & Television Corp., Weslaco, Tex.; Red River Valley Publishing Co., Sherman, Tex., and Allen B. DuMont Laboratories Inc., New York. (Frank W. Wozencraft.)

South Texas Television Co., Houston—Opposes proposal of Allen B. DuMont Laboratories, New York, for adding only one channel to Houston. (Segal, Smith & Hennessey.)

East Texas Television Co., Longview—Opposes proposals of Radio Station KFRO, Longview, to assign Channel 12 to Longview, 10 in lieu of 12 to Shreveport, La., 5 in lieu of 10 to El Dorado, Ark. and 32 and 38 to Gilmer or Tatum from Longview. (Johnson, Bohannon, Prescott & Abney.)

Julius M. Gordon & Associates Inc., Lufkin—Opposes proposals of: (1) East Texas Television Co., Longview, Tex., to substitute Channel 10 for 9 in Lufkin, move 9 to Longview. (2) Trinity Broadcasting Corp., Oak Cliff, Tex., to substitute 5 for 9 in Lufkin. (Barnes & Neilson.)

McAllen Television Co., McAllen—Opposes proposals of Taylor Radio & Television Corp., Weslaco, Tex., to assign Channel 2 to Weslaco and to Saltillo, Mex. from Monterey, Mex., and assign 4 & 5 to Weslaco-Harlingen from Brownsville, Tex. (Johnson, Bohannon, Prescott & Abney, Dallas.)

Trinity Broadcasting Corp., Oak Cliff (Dallas) (KLIF)—Opposes proposals of: (1) A. H. Belo Corp., Dallas, favoring assignment of Channel 8 to Dallas. (2) East Texas Television Co., Longview, to assign 9 to Longview and 10 to Lufkin. (3) KFBI Inc. and Taylor Radio & Television Corp., Wichita, Kan., to assign 11 to Wichita Falls. (4) KTRH Broadcasting Co., Shamrock Broadcasting Co. and South Texas Television Co., Houston, to assign 5 and 10 to Houston. (5) Red River Valley Broadcasting Corp., Sherman, to assign 10 to Sherman-Denison. (6) Stephens County Broadcasting Co., Breckenridge, to assign 7 to Breckenridge. (7) Allen B. DuMont Laboratories Inc., New York, only if adopted in part, adversely affecting Dallas. (Cohn & Marks.)

Texas State Network Inc., San Antonio (KABC)—Opposes proposal of Lack's Stores Inc., Victoria, Tex., to assign Channel 12 to Victoria. (Eugene L. Burke.)

Walmac Co., San Antonio (KMAC)—Opposes proposal of Lack's Stores Inc., Victoria, Tex., to move Channel 12 from San Antonio to Victoria. (Dow, Lohnes & Albertson.)

Red River Valley Broadcasting Corp., Sherman (KRRV)—Opposes proposal of Allen B. DuMont Laboratories, New York, for failure to provide vhf channel to Sherman area. (Fisher, Wayland, Duvall & Southmayd.)

Red River Valley Publishing Co., Sherman—Opposes proposals of Allen B. DuMont Laboratories Inc., New York, on grounds it assigns no vhf channel to Sherman-Denison. (Fisher, Wayland, Duval & Southmayd.)

Sherman Television Co., Sherman—Opposes proposals of Radio Station KFRO, Longview, to assign Channel 12 to Longview. (Johnson, Bohannon, Prescott & Abney.)

Bell Broadcasting Co., Temple (KTEM)—Opposes proposal of Allen B. DuMont Laboratories, New York, for failure to provide vhf channel to Temple. (Fisher, Wayland, Duvall & Southmayd.)

Lucille Ross Buford, Tyler (KGKB)—Opposes proposal of Trinity Broadcasting Co., Oak Cliff (Dallas), Tex., to assign Channel 8 to Tyler in lieu of 7. (Haley, McKenna & Wilkinson.)

Lacks Stores Inc., Victoria—Opposes proposal of Allen B. DuMont Laboratories Inc. in failing to assign vhf channel to Victoria. (Cohn & Marks.)

Texoma Broadcasting Co., Wichita Falls (KTRN)—Opposes proposal of Allen B. DuMont Laboratories Inc., New York, to delete Channel 3 from Wichita Falls and assign it to Lawton, Okla. (Eugene L. Burke.)

Wichtex Radio & Television Co., Wichita Falls (KFDX)—Opposes proposals of: (1) KFBI Inc. and Taylor Radio & Television Corp., Wichita, Kan., to assign Channel 11 to Wichita Falls in lieu of 3. (2) Allen B. DuMont Laboratories Inc., New York, to delete 3 from Wichita Falls. (Samuels, Brown, Herman & Scott, Wichita Falls.)

UTAH

Salt Lake City Broadcasting Co. Inc., Salt Lake City (KALL)—Opposes proposals of Uncompaghre Broadcasting Co., Montrose, Colo.; Eastern Utah Broadcasting Co., Price, Utah, and Oquirrh Radio & Television Co., Tooele, Utah, to assign Channel 2 to Tooele. (Haley, McKenna & Wilkinson.)

Uintah Broadcasting Co., Vernal (KJAM)—Same as Northwestern Colorado Broadcasting Co., Craig, Colo. (Paul L. Badger.)

VIRGINIA

Appalachian Broadcasting Corp., Bristol (WCYB)—Opposes proposals of Allen B. DuMont Laboratories Inc., New York, to delete Channel 5 from Bristol, Tenn. (Fly, Shuebruk & Blume.)

Beachview Broadcasting Co., Norfolk—Opposes proposals of Hampton Roads Broadcasting Corp. to assign Channel 2 to Norfolk in lieu of 12. (Irving M. Kipnes.)

Commonwealth Broadcasting Corp., Norfolk (WLOW)—Opposes proposal of Hampton Roads Broadcasting Corp. to substitute uhf channel for vhf in Norfolk. (Jack J. Siegel.)

Louis H. Peterson, Petersburg (WSSV)—Opposes proposals of following to assign Channel 8 to respective cities, unless otherwise indicated: Larus & Brother Co., Richmond Newspapers Inc., Richmond; Radio Station WCHV, Charlottesville; Allen B. DuMont Laboratories Inc., New York (to Norfolk). (Cohn & Marks.)

Havens & Martin Inc., Richmond (WMBG & WTVR)—Opposes proposals of: (1) Radio Virginia Inc., Richmond, and Radio Kentucky Inc., Louisville, to limit vhf power, hold up construction until allocation plan is final, institute time-sharing arrangements, require return of applications now on file and establishment of new cut-off date for filings. (2) Allen B. DuMont Laboratories Inc., New York, Winston-Salem Broadcasting Co. and Piedmont Publishing Co., Winston-Salem, to assign Channel 6 to Winston-Salem. (Fletcher & Midlen.)

WASHINGTON

KVOS Inc., Bellingham (KVOS)—Opposes proposals of: (1) Fisher's Blend Station Inc., Totem Broadcasters Inc. and Queen City Broadcasting Co., Seattle, to assign Channel 2 to Seattle and 3 to Victoria, B. C. (2) Allen B. DuMont Laboratories Inc., New York, to assign 3 to Victoria and 12 to Vancouver, B. C. (3) Twin City Broadcasting Corp., Longview, Wash., to assign 2 to Vancouver, B. C. (Haley, McKenna & Wilkinson.)

Fisher's Blend Station Inc., Seattle (KOMO)—Opposes proposals of: (1) Twin City Broadcasting Corp., Longview, Wash., to assign Channel 2 to Longview. (2) KVOS Inc., Bellingham, Wash., to add 12 to Bellingham, substituting 3 for 12 in Chilliwack, B. C. (Fisher, Wayland, Duvall & Southmayd.)

KING Broadcasting Co., Seattle (KING & KING-TV)—Opposes proposals of: (1) Twin City Broadcasting Corp., Longview, Wash., to assign Channel 6 to Victoria, B. C. (2) Central Wilamette Broadcasting Co., Albany, Ore., to assign 5 to Salem, Ore. (Haley, McKenna & Wilkinson.)

Tribune Publishing Co., Tacoma (KTNT-FM)—Opposes proposal of Tom Olsen, Olympia, Wash., to delete Channel 11 from Tacoma. (Dow, Lohnes & Albertson.)

WEST VIRGINIA

Clarksburg Broadcasting Corp., Clarksburg (WPDX)—Opposes proposal of Ohio State U to assign Channel 12 to Columbus, O., from Clarksburg. (Mechlin, Marshall & Smith.)

Ohio Valley Broadcasting Corp., Clarksburg (WBLK)—Opposes proposals of following to assign Channel 12 to respective cities unless otherwise indicated: Southeastern Ohio Broadcasting System Inc., Zanesville, O.; Shenandoah Valley Broadcasting Corp., Harrisonburg, Va. (to Zanesville); Ohio State U, Columbus, O. (Cohn & Marks.)

Greater Huntington Radio Corp., Huntington (WHTN)—Opposes posals of: (1) Ohio State U, Columbus, to assign Channel 12 to Columbus and delete 13 from Huntington. (2) Allen B. DuMont Laboratories, New York, to assign 9, 49, 52 & 65 to Huntington in lieu of 8, 13 & 53. (Loucks, Zias, Young & Jansky.)

Community Broadcasting Inc., Wheeling (WKWK)—Opposes proposals of Washington Broadcasting Co., Washington, Pa.; Allegheny Broadcasting Corp., Pittsburgh Radio Supply House Inc., WCAE Inc., Westinghouse Radio Stations Inc., Pittsburgh, Pa., and Allen B. DuMont Laboratories Inc., New York—insofar as they would delete Channels 7 & 9 from Wheeling. (Pierson & Ball.)

Fort Industry Co., Wheeling (WWVA)—Opposes proposals of: (1) Washington Broadcasting Co., Washington, Pa., to assign Channel 63 to Wheeling in lieu of 9. (2) WSTV Inc., Steubenville, O., to assign 7 or 9 to Steubenville from Wheeling. (3) Allen B. DuMont Laboratories, New York, to delete 7 & 9 from Wheeling, as well as entire DuMont allocation proposal. (4) Allegheny Broadcasting Co., Pittsburgh Radio Supply House, WCAE Inc., Westinghouse Radio Stations Inc., Pittsburgh, to assign 9 to Pittsburgh from Wheeling. (Dow, Lohnes & Albertson.)

Williamson Broadcasting Corp., Williamson (WBTH)—Opposes proposal of Allen B. DuMont Laboratories Inc., New York, to substitute Channel 60 for 17 in Williamson. (Fletcher & Midlen.)

WISCONSIN

Green Bay Newspaper Co., Green Bay (WJPG)—Opposes proposals of following to assign Channel 6 to respective cities: Milwaukee Broadcasting Co., Wisconsin Broadcasting System, Hearst Radio Inc., Milwaukee; Music Broadcasting Co., Grand Rapids, Mich. Also opposes proposals of Columbia Broadcasting System, New York, to assign 13 to Chicago. (Roberts & McInnis.)

Booth Radio & Television Stations Inc., Milwaukee (WJLB, Detroit)—Opposes proposal of Columbia Broadcasting System Inc., New York, to assign Channel 13 to Chicago without increasing number of vhf channels in Milwaukee. (Caldwell-Rollo-Russell.)

City of Milwaukee—Opposes proposal of Wisconsin Broadcasting System and Hearst Radio Inc., Milwaukee, to reserve uhf channel for educational use in lieu of 10. (Walter J. Mattison, city attorney.)

Hearst Radio Inc., Milwaukee (WISN)—Opposes proposals of: (1) Quad City Broadcasting Corp., Moline, Ill., to assign Channel 10 to Grand Rapids. (2) Columbia Broadcasting System to replace 12 with 6 in Milwaukee. (3) Music Broadcasting Co., Grand Rapids, Mich., to move 6 to Grand Rapids. (Dempsey & Koplovitz.)

The Journal Co., Milwaukee (WTMJ & WTMJ-TV)—Requests opportunity to participate in hearings to protect self against possible adverse implications of proposals by Quad-City Broadcasting Corp., Moline, Ill., and Allen B. DuMont Laboratories, New York. (Hogan & Hartson.)

TV RATES UP, AM DOWN, AS OF JULY 1: TV time charges surge to new highs with NBC-TV's increase in network rates for its entire lineup of 63 affiliates, effective July 1.

New one-time rate for purchase of hour on all these stations (Class A time, 6-11 p.m. Mon. thru Fri., 1-11 p.m. Sat. & Sun.) would thus be $45,425 as against $36,775 at present, up 24%. That's exclusive of talent costs, subject to discounts.

Local time rates generally are considerably under network. But in compiling data for our TV Factbook No. 13 (due July 15) we find that just about 50% of all TV stations are also boosting their rate cards as of July 1, or thereabouts.

Mounting costs of telecasting time are illustrated by boosts for NBC's own stations: WNBT, New York, upped from $3100 an hour to $4000; WNBW, Washington, from $750 to $950; WNBK, Cleveland, from $1050 to $1275; WNBQ, Chicago, from $1650 to $2000; KNBH, Los Angeles, from $1650 to $2000. (These are network rates; NBC also raised KNBH local rate from $1000 to $1250, one-minute spots from $165 to $200.)

ABC-TV's own stations were similarly hiked week ago (Vol. 7:23): WJZ-TV, New York, $3100 to $4000; WENR-TV, Chicago, $1650 to $2000; WXYZ-TV, Detroit, $1100 to $1350; KECA-TV, Los Angeles, $1650 to $2000; KGO-TV, San Francisco, $600 to $850.

CBS-TV may raise rates Sept. 1, but plans none across-the-board. Its last rate card change was Jan. 1, when it posted $3250 network charge for WCBS-TV, New York (Vol. 7:1), which compares with WCBS rate of $1350, highest in radio. Its KTSL, Los Angeles, charges $900, and WTOP-TV, Washington (45% owned) charges $750.

DuMont says it has no present plans to up rates; network charge for WABD, New York, went to $2200 last Feb. 1; WTTG, Washington, $400; WDTV, Pittsburgh, $600.

NBC-TV sales v.p. Edward D. Madden said hike means cost-per-thousand homes is $3.46, compared with $3.85 in July 1950 -- with "circulation" 7 times greater. Customary 6-months protection is given contract advertisers signing before July 1.

* * * *

How high can TV rates go? One rough guess, by Young & Rubicam's TV-radio manager W. Rodney Erickson, is that by 1955 there will be 35,000,000 TV homes and that a 52-week half-hour show on 125 stations by then will cost $3,000,000 a year for time and talent. He made guesstimate before AFA meeting in St. Louis June 13.

TV rate increases come on eve of effective date of AM decreases by networks (Vol. 7:16-17) -- and radio broadcasters, still smarting, have moved to attack. Some actually have raised rates, but not many; others are promoting hard to show radio is still better buy. This week, though it was first to order 10% AM rate cut, CBS ran full-page newspaper and trade paper ad jibing at TV. Headlined "Television's Big Brother," ad said [radio] "can still lick anybody on the block." Theme was that radio is still only medium combining all advertising essentials -- "nation-wide coverage, thumping impact...and minimum cost."

"The big advertisers know better than anybody that you don't send a boy to do a man's work," the text reads. "When there's a big job to be done, you'll want

Copyright 1951 by Radio News Bureau

JUN 28 1951

radio..." CBS network radio cost of $1.18 per thousand is compared with leading magazines' $2.72, newspapers' $4.03.

National reps of stations rushed into fray with big ads, too. Katz Agency trade ad tells how spot TV can be bought on network stations at 19% less. Petry, in similar double-spread, charges network AM rate cuts were "indiscriminate," took no notice of increased listening, added radios -- especially in non-TV areas. It also observed that "revalued" radio doesn't mean "devalued" radio.

Other activity in radio rate picture: (1) Affiliates Committee held exploratory meeting with ANA's Paul West and others, "found no areas of disagreement," according to chairman Paul Morency. (2) Sponsor Magazine June 18 reported Wm. Esty agency (Colgate) has written AM stations recently raising rates to ask "how come?" in light of network radio reductions. Marschalk & Pratt previously had questioned AM station rates, too (Vol. 7:18). And (3) Don Lee Network ordered 10% rate cuts for 1-10 p.m. daily from July 1.

EVERYBODY HELL-BENT TO THAW FREEZE: Hunt for formula for quick end to TV freeze -- at least one promising quicker action than present FCC procedures -- is in full cry at every level of Commission and industry.

Prospects for speedup appear brightest yet. That doesn't mean things could be wound up in couple of months -- but "out of the trenches by Christmas" is now considered realistic goal; that is, processing applications by then. New station construction is another matter. "Well into 1952" is still safest guess.

Idea of calling off oral testimony for city-by-city hearing now scheduled to start July 9 (Vol. 7:24), relying instead on FCC to come up with final allocation on basis of written comments, is gaining impetus.

Many variations on the theme are being considered, and FCC welcomes them. There's widespread feeling, almost one of desperation, that currently-scheduled hearing can't possibly be concluded in less than 6 months -- and some think a year is even more likely. After that, several months more would be needed to end freeze.

Willingness to forego hearing is by no means unanimous. DuMont, with its completely new national plan based on different fundamental premises from FCC's, may insist on hearing -- and Commission may prefer it that way. Then some of the 31 stations which FCC proposes to shift to new channels may feel lack of hearing would short-change them.

But both cases would be small potatoes compared with the size of hearing implicit in the 1000-plus comments & oppositions filed (Supplements No. 72 to 72-C).

Formal petition to dispense with hearing -- the kind of urging sought from industry by Commission -- was filed this week by Westinghouse Radio Stations. It proposes that its direct testimony be submitted in writing, that only cross-examination be conducted orally. Some think cross-examination should be dropped, too.

* * * *

Interwoven with search for "ways and means" is question of the FCC's legal authority to promulgate an allocation plan fixed in its rules. On June 28, Commission will finally hear pros and cons in oral argument.

But preponderant opinion is that FCC will prove virtually unshakeable in conviction of its authority, that it will decide it risks no greater delays from court appeals now than it will at any other stage of proceedings.

Legality question shapes up as battle royal, with industry lined up on both sides of question. FCC Bar Assn. (Wm. Porter or Leonard Marks arguing) and several law firms oppose FCC. CBS (Richard Salant), Joint Committee on Educational TV (Telford Taylor), plus other law offices, side with Commission with equal vigor. FCC will have its own general counsel Benedict Cottone argue for it.

This industry split lends weight to predictions FCC will sustain itself. Sen. Johnson, who really pushed FCC into granting oral argument now, before proceedings render it meaningless, congratulated Commission for "forthright" action. And FCC confirmed the obvious this week -- announcing that partial freeze lifting can't be effected pending oral argument and settlement of legality question.

Industry has been applauding Sen. Johnson for his cool attitude towards the reservation of channels for educational institutions. But, after reading comments filed by Colorado educational groups, that they support reservations, he wrote Commission that he knows very well schools in his State can't afford such "frills". Then, he added, way to get education into TV may be through imposing conditions on licenses of commercial stations "requiring them to devote appropriate time for educational purposes."

Meanwhile, to clear up rag-tag of allocation issues, in preparation for the "big push," Commission is attempting to dispose of 470-500 mc question -- that is, whether band should be given to TV or set aside for common carrier use.

TELECASTERS PLAN SELF-CENSORSHIP CODE: Telecasting industry gets off to good start with the Washington authorities, so far as self-regulation of programs is concerned, if attitudes manifest at all-industry conference on program standards mean anything.

Instead of threatening with a big stick, FCC Chairman Coy and the powerful Sen. Ed Johnson, chairman of Interstate & Foreign Commerce Committee ruling radio, simply passed along friendly words of admonition and advice to the 103 telecasters representing 65 stations and all networks attending NARTB-sponsored parley June 22.

Though Coy called meeting "logical forerunner" of FCC's announced program inquiry (Vol. 7:3-5,16), the soul-searching among telecasters themselves and conciliatory attitude of the lawmakers was so heartening that some ventured opinion such a probe (which some fear has Blue Book implications) can be headed off -- that is, if industry does good job of uplift and self-censorship.

Opinion was well-founded, for FCC plainly wants to be friends with industry and has hands plenty full with problems of ending freeze -- under prodding now of Sen. Johnson himself. Even Coy remarked he seems to be "on a honeymoon" with the broadcasters again, now that he has been reappointed.

Group unanimously adopted resolution by WBAP-TV's Harold Hough calling for "extensive and careful review of present program practices with a view to establishing standards of self-regulation designed to improve character of TV programming..."

Thereupon NARTB president Harold Fellows was directed to appoint committee, to make "an immediate and thorough investigation of all the aspects of promulgating standards for TV...in consultation with representatives of govt., public, civic and other special groups" -- and to draft a proposed code.

* * * *

Said Sen. Johnson: "I know you can do it yourselves." He warned against program excesses (though said he, as a fan and grandfather of children who love TV, found few to complain of). But he warned that criticisms aren't always the work of "bluenoses". He went on, after telling how school kids of his own Colorado (still without TV) are writing him to ask when it will come there:

"I like television. It is the greatest science and art that ever came to the human race. It has restored the home again.

"I'm a TV and radio fan, and I'm not ashamed to admit it. I get a lot out of it, including the advertising. When cleverly done, that too is entertaining [loud applause] and I think most people feel the same way as I do."

Said Coy: "I am delighted that you are exploring ways and means here today to strengthen TV...by moving in on these problems yourselves." He predicted that positive action by telecasters to improve the programming level would bring about "an immediate upsurge of public confidence" -- and said this could be done "without the benefit of govt. intervention."

* * * *

Coy cited as "most prevalent" of some 1000 complaints FCC had received during 72-day period (covering both radio and TV): objected to advertising alcoholic beverages, 255; indecency, obscenity or profanity, 221; false or misleading advertising, 128; lotteries & giveaway schemes, 107. He noted, though, that anti-liquor complaints were obviously part of organized prohibition and temperance campaigns.

Coy suggested telecasters consider these "Blue Book" points in determining

whether they hold licenses in public interest: (1) Assistance in civic improvements. (2) Promotion of educational and cultural opportunities. (3) Integrity of the news. (4) Promotion of community labor relations and inter-racial understanding. (5) The wholesomeness of entertainers and their sense of responsibility as "visitors" in the home. (6) Fairness in controversial issues. (7) Reliability, good taste, excesses in advertising. (8) Advertiser domination of program schedules.

Self-criticism during discussions included warning from Paramount's Paul Raibourn, citing movie industry's experience, to "organize or be censored" -- and he urged positive action, not mere list of "don'ts".

NBC passed around newly-published booklet "Radio and Television Broadcast Standards" setting forth its limitations on commercials, restrictions on "indecent exposure," "lewd dances," "sex references" -- first such code-book yet published, available from network on request.

There was some disappointment that more of the 107 stations weren't on hand, but prominently present were ABC and CBS representatives, auguring possible return of those networks to NARTB membership.

COLOR NOW UP TO PUBLIC AND INDUSTRY: A 5-city network, top-flight talent, one hour of programming daily, a handful of friendly sponsors -- and 20 receivers available for public showings of color TV.

These are the simple facts as CBS begins commercial colorcasting June 25.

Watching with keenest interest will be a skeptical industry, still largely opposed to the FCC-approved CBS system, still dubious about its public saleability, still bent on perfecting and proving a superior all-electronic system.

FCC Chairman Coy will participate in debut -- but he has also consented to take a look at RCA's tri-color tube next week, personally accompanied by president Frank Folsom, with presumably a full-blown demonstration.

Significant also was industry's all-out mobilization this week to whip into shape its promised compatible system. Prospects looked so good that, at week's end, even that wary scientist-industrialist Dr. Allen DuMont was impelled to declare, after his lab workers had hooked their own test color circuits to RCA tricolor tube:

"For the first time, I have seen color pictures which I consider eminently satisfactory and practical for home receivers." For the first time, reporters found the usually cautious and skeptical Dr. DuMont really enthusiastic.

* * * *

Publicity is by far the most important device left to CBS. It's about only thing that could break the chicken-egg cycle, and possibly create demand for color sets that CBS hopes other manufacturers will find impossible to resist.

No great promotional campaign had been started up to our press time, but everyone is expecting big ad splurge (in the 5 cities) to herald June 25 "premiere". CBS is now apparently playing its promotion by ear -- an unusual practice for that company, known for its well-planned, long-range campaigns.

CBS's relative quietness on color lately has some people thinking that true zeal is somewhat lacking within the organization -- clearly manifest among many of its employes and among its own station affiliates.

Moreover, CBS is now deep into TV manufacturing field (Vol. 7:15,20,24) -- with the same stake in its selling economics as all other manufacturers.

* * * *

All 5 stations will carry Monday's 4:30-5:30 premiere. After that, here's the setup, as revealed by the stations:

New York: WCBS-TV will undoubtedly transmit all scheduled colorcasts -- 10:30-11 a.m. & 4:30-5 p.m. daily, plus some Saturday sports events, including major football games if NCAA permits (Vol. 7:24). CBS will have 10 sets for press and public, but had not disclosed their locations.

Baltimore: WMAR-TV will carry morning shows only, plus occasional Saturday events. Two 7-in. sets, magnified to 10-in., borrowed from CBS, will be used for public showings in lobbies of old and new Baltimore Sun buildings (Vol. 7:24).

Boston: WNAC-TV can handle only morning shows, has also borrowed 2 sets from CBS, will display them at Jordan Marsh dept. store until CBS takes them back, according to manager Linus Travers. Hub Distributors has an Air King, plans showings in Hotel Somerset for its dealers Monday and several days thereafter.

Philadelphia: WCAU-TV plans to carry only Saturday programs, nothing on weekdays for the present. It also has 2 sets on loan from CBS, will show them in its own auditorium.

Washington: WTOP-TV will accept morning programs only, including 10-10:30 test pattern. Three sets are on hand for the premiere, fabricated by stations' own technicians -- one at Carlton Hotel for FCC, Congressmen, other VIPs; one at studio, one monitor at transmitter. Manager John Hayes reports dept. stores and TV dealers begging for display receivers.

Air King (now CBS-Columbia Inc.) won't have quantity of sets ready until late September, and other companies planning sets or converters are moving in rather slowly. But CBS spokesman says many home-made sets will be tuned to colorcasts, estimating these at "around a thousand" in New York, "hundreds" elsewhere. There are also quite a few manufacturers with field-sequential test sets of their own.

Besides celebrities scheduled for first program (Vol. 7:24), 16 sponsors have been lined up for it: General Mills, Lincoln-Mercury, Longines, Pabst, Wrigley, Revlon, Lipton, NBC (National Biscuit Co., that is), Toni, Monarch Foods, Procter & Gamble, Standard Brands, Quaker Oats, Best Foods, Pepsi-Cola, Chesterfield.

Four sponsors have bought 13-week station breaks: Phoenix Aristomat (stove covers), O'Cedar (mops), Bulova (watches), Wembley (neckties).

* * * *

Manufacturers' faith in compatible system appeared stronger than ever this week, as National TV System Committee (NTSC) geared itself for field tests, and RCA supplied all its licensees with tri-color tube -- key device to system's fruition.

NTSC formed 9 color panels, laid out test program, during June 18 New York meeting. [For panel chairmen and vice chairmen, see p. 7.] Now that most manufacturers have receiving equipment to work with, they'll be able to use the compatible signals transmitted by RCA and DuMont (with Hazeltine assistance) in New York area, Philco in Philadelphia, probably Zenith, Hallicrafters and Motorola in Chicago. Chicago is only one of the 3 not yet transmitting.

Dr. DuMont's burst of enthusiasm was expressed in June 22 telegram to Coy, after company had fired up RCA tri-color tube. He invited Coy to see it June 25. Dr. DuMont admits it will take time to get tube into mass production, but he said "the Columbia system will take plenty of time, too." To DuMont's recommendation that commercial advent of CBS color be delayed, Coy answered: "We concluded our hearings some time ago."

* * * *

RCA's tri-color tube symposium June 19-20, in New York's Waldorf-Astoria, was heavily and enthusiastically attended. Each set maker planning experimentation was given 16-in. tube and kit of about 15 parts to make receiver for it. They may buy more when available. Tube makers were also given tube components, with complete story on how to put them together, make their own tubes.

Attendees agreed mass production of tube will be tough job, but RCA likened situation to that existing when industry geared for black-and-white production.

RCA is concentrating on 3-gun tube at present. Reason is that system is now essentially simultaneous, and 3 guns give 3 times the brightness of single-gun. Tubes distributed are 16-in., but 21-in. (round, metal-coned) was also shown. It has same 600,000-dot structure as previous tubes. DuMont claims it is working on tubes with many more dots, some even larger than 21-in., using similar techniques.

Observers at symposium say RCA let down its hair completely, answered all questions frankly. Apparently, company described no radical changes in techniques previously revealed in bulletin distributed to licensees (Vol. 7:10).

There was some criticism in press, though, because tube wasn't shown in

action. Shortly afterward, however, RCA announced public showings to start July 9 -- receivers with tri-color tube picking up live subjects.

First demonstrations will be in Radio City's Exhibition Hall -- from WNBT in morning before regular programming hours, via closed-circuit thereafter. Radio, TV and Broadway stars will be featured.

Network transmissions to other cities will be added later, with "at least 100" color sets to be available for public viewing -- some undoubtedly to be placed in Washington and made available to FCC members and staff.

Remote pickup camera has been developed and successfully tested, according to RCA. FCC critics have said that absence of this device was one of biggest factors contributing to RCA's defeat.

RCA indicates no plans to petition FCC to reopen whole color issue at this time. It may well develop into an all-industry request, through aegis of NTSC, after period of field testing (Vol. 7:23-24).

* * * *

Bendix and Crosley caused raised eyebrows this week when former showed CBS-type converter in Chicago and latter announced June 28 press showing of one in New York's Park Sheraton. But both said emphatically that their only purpose was to show "readiness to meet demand" if and when it arose.

"Demand" remains keynote throughout industry. But, as one typical manufacturer put it: "A certain type of buyer will buy anything. But the depth of that market won't support mass production."

Another key producer pointed to price of Air King's sets ($400 & $500 for 10-in. magnified to 12½-in.), recalled testimony of Air King president David Cogan in October 1949, to effect that 10-in. color set would sell for only $75-$80 more than the then current $199 table model 10-in. Same manufacturer said his cost engineers reported that 12½-in. color set would cost company $600-$700 to make.

CBS-Columbia Inc. is reported to be paying $60 for motors alone, and one components manufacturer is said to be offering 10-in. disc-motor assembly for $230, 7-in. for $150.

Thus, no mass market is visible to the set makers -- though it's fair to assume that most are prepared to meet any true demand when and if it comes. Matter of fact, one very big manufacturer said he wanted to make 500-1000 color sets just to prove their market sluggishness when compared with far cheaper big-screen black-and-white. But he said his staff talked him out of it.

* * * *

That July 1 unveiling of Paramount's "Chromatic TV" set with Lawrence tri-color tube (Vol. 7:24) won't come off. Paramount v.p. Paul Raibourn says tube has to be "finished up," and he admits picture quality "isn't quite up to standards of the CBS picture." He says company won't conduct press or public showings until "people can look at it and say, 'That's it!'" Nevertheless, Raibourn says that the military like the tube, provide a market regardless of set production prospects.

Webster-Chicago, which plans to sell color converters under its own name and offers chassis to manufacturers, is still in "sample" stage. According to v.p. C.P. Cushway: "We're getting the loose ends together. We're getting some inquiries from manufacturers, and they're talking about substantial quantities. But we don't know whether they mean it. We can't move fast until we see the demand. Then there's the materials situation. Manufacturers may not want to jeopardize the market for known products while diverting materials to something new."

* * * *

Cost and efficacy of adapters, to get black-and-white from CBS colorcasts, is another controversial subject. Philco says its new sets are so designed that its own $20 adapter, now available, may be added at any time. Apparently, power-handling capacity of transformer and tubes was stepped up to do the job.

Adaptation of existing sets appears to be something else. Many responsible engineers assert that a true adapter would amount to "half a slave unit, tube and all, minus the disc." Television Equipment Co., New York, has an adapter to retail

for $13.95, but president John Milliken agrees that it would have to be tailored to each model of each set. He complains that "we have inquiries from everyone, but there's no cash-on-the-barrelhead demand. Somebody's got to subsidize it."

* * * *

Industry fought color hearing all over again -- in miniature -- during June 21 trade practice conference held by Federal Trade Commission (see p. 12). RTMA, as well as various dealer groups, wanted color and adapter claims tied down on such points as: (1) Size of color picture should be stated as size of tube, not magnified image. (2) Ads must indicate black-and-white pictures from colorcasts have less detail than standard picture. (3) Size of picture produced by converter must be stated. (4) Ads should indicate whether adaptation requires modification of set, new parts, serviceman, etc.

Such restrictions are totally unfair, CBS counsel Richard Salant argued. For example, he said, current TV ads don't specify whether sets have complete band-pass, giving full resolution of transmitted picture.

FTC moves slowly, won't act on recommendations until fall or later, by which time the color trend (if any) should be better resolved. FCC had own observer on hand, lawyer Arthur Scheiner, but he merely observed.

INTENSITY of FCC's interest in uhf is illustrated by fact Chairman Coy asked RTMA for opportunity to survey industry's receiver-converter development to date. Upshot is June 29 trip to Bridgeport, where commissioners and staff will see products of Hallicrafters, GE, Motorola, Stromberg-Carlson, DuMont, RCA, Zenith, Capehart-Farnsworth, Philco. Scheduled to attend are Comrs. Coy, Walker, Hyde, Webster, Sterling, possibly Jones, and staff members Cottone, Braum, Simpson, Chapin, Boese.

Meanwhile, Westinghouse, Bendix and tuner-maker Sarkes Tarzian showed off uhf units this week. Westinghouse demonstrated to its distributors in Bridgeport's Hotel Barnum. It's continuous-type, claimed to be competitive with any other in performance and price.

Bendix converter, unveiled at Chicago Home Furnishing Show, featured tuner made by Kingston Co., Kokomo, Ind.; it's also continuous. Company officials report excellent performance in field tests, including some in Bridgeport, say they plan to make design improvements.

Tarzian demonstrated his "UT1" at Bloomington, Ind. plant. It's useful with any set, regardless of type of tuner it contains. Tarzian claims that unit, which covers whole uhf band, rates particularly high in sensitivity.

National TV System Committee reorganized this week for color field tests (see story, pages 4-7), shapes up as follows: Dr. W. R. G. Baker (GE), chairman, D. G. Fink *(Electronics)*, D. B. Smith (Philco), E. W. Engstrom (RCA), vice chairmen. Chairmen and vice chairmen, respectively, of various panels: Dr. A. N. Goldsmith (consultant), D. E. Hyndman (Eastman Kodak), subjective aspects of color; D. G. Fink *(Electronics)*, A. G. Jensen (Bell Labs), color system analysis; A. V. Loughren (Hazeltine), W. T. Wintringham (Bell Labs), color video standards; D. E. Harnett (GE), M. R. Briggs (Westinghouse), color synchronization standards; Dr. D. E. Noble (Motorola), Rinaldo DeCola (Admiral), compatibility; Dr. T. T. Goldsmith (DuMont), G. E. Gustafson (Zenith), field testing; Frank Marx (ABC), R. E. Shelby (ABC), networks; D. B. Smith (Philco), I. J. Kaar (GE), coordination of panels; Dr. R. M. Bowie (Sylvania), M. W. Baldwin (Bell Labs), definition of terms. Additional organizations represented on NTSC: Bendix, Color Television Inc. (which reports brand new system), Crosley, Federal, Hallicrafters, Hogan Laboratories, NARTB, Tele-tone.

Network TV-Radio Billings

May 1951 and January-May 1951

(For April figures, see *Television Digest*, Vol. 7:21)

NETWORK TV time billings for first 5 months of this year, $43,589,968, already far exceed 1950's total $40,453,878 (about $45,000,000, if you include non-reporting DuMont)—auguring, with higher rates upcoming, better than $100,000,000 network sales for all of 1951. May's $9,398,488 was ahead of April's $9,089,454 (Vol. 7:21) and 5-month total compares with $11,211,455 for same 1950 months, according to monthly Publishers Information Bureau report. Only ABC-TV failed to show gain in May over April, but all gained considerably over May 1950.

Network radio in May went up to $16,518,337 from $15,921,908 in April (Vol. 7:21), totaling $80,572,128 for 5-month period, down slightly from same 1950 months. NBC and CBS showed AM gains over April, ABC and MBS slipping slightly; all but CBS showed gains over May 1950. The PIB figures:

NETWORK TELEVISION

	May 1951	May 1950	Jan.-May 1951	Jan.-May 1950
NBC	$ 4,946,338	$ 1,583,185	$22,495,292	$ 5,926,465
CBS	3,066,249	1,003,658	14,168,546	3,764,022
ABC	1,385,901	367,989	6,926,130	1,520,968
Total	$ 9,398,488	$ 2,954,832	$43,589,968	$11,211,455

NETWORK RADIO

CBS	$ 6,763,933	$ 6,319,197	$33,060,678	$30.224,024
NBC	5,329,752	5,639,188	25,260,843	27,709,142
ABC	2,913,834	3,260,839	14,582,390	16,571,195
MBS	1,510,818	1,356,580	7,668,217	7,289,006
Total	$16,518,337	$16,575,804	$80,572,128	$81,793,367

New type of survey, "covering an entire TV area and utilizing complete probability sampling," prepared for Dallas' WFAA-TV by Dr. Ira G. Corn of Southern Methodist U, claims "highest degree of accuracy known to marketing research." Survey indicates 113,947 homes in Dallas-Ft. Worth 12-county area, or 20% of all residences, have TVs—and house 381,722 viewers, or 30% of total population. Survey found that average of 3.3 persons live in a TV home, while all residences average 3 persons, thus indicating TV homes have 12% more people than non-TV homes. According to study, there were 115,717 sets in Dallas-Ft. Worth area May 1 (NBC set "census", Vol. 7:21, reported 117,000). Of these, 61.1% were found to be in 7-county Dallas area, 38.9% in 5-county Ft. Worth area.

Network Accounts: Norge Div., Borg-Warner Corp. (home appliances) is second sponsor to buy half-hour alt. weeks on new *Kate Smith Show* starting Sept. 19 on NBC-TV, Wed. 8-9, thru J. Walter Thompson Co.; Congoleum-Nairn was first to sign . . . Lambert Pharmacal Co. (Listerine) starting Sammy Kaye's *So You Want To Lead a Band* July 28 on CBS-TV, Sat. 7-7:30, thru Lambert & Feasley . . . Pearson Pharmacal Co. Inc. (Ennds deodorant pills), starting July 20, sponsors unnamed dramatic show on CBS-TV, Fri., 10:30-11, thru Harry B. Cohen Adv. . . . Bymart Inc. (Tintair), starting early in July will run *Somerset Maugham Theatre* weekly for 8 weeks during first half-hour vacated by *Robert Montgomery Presents* on NBC-TV Mon. 9:30-10:30; show will resume full hour alt. weeks when Montgomery returns in fall . . . Colgate-Palmolive-Peet Co. has renewed *Colgate Comedy Hour* on NBC-TV Sun. 8-9 on regular weekly basis starting Sept. 2 formerly bought only 3 weeks each month . . GE replacing *Fred Waring Show* with *General Electric Guest House* starring Oscar Levant for summer period starting July 1 on CBS-TV, Sun 9-10 . . . Lever Bros. (Lux) replacing *Lux Video Theatre* July 2 with *Pantomine Quiz* on CBS-TV, Mon. 8-8:30; *Lux Video Theatre* returns Aug. 27 . . . Wine Corp. of America (Mogen David wine) has bought Wed. half-hour on NBC-TV, thru Weiss & Geller, no time or show yet announced.

Station Accounts: Carrier Corp.'s Chicago distributor, Temperature Equipment Co., sponsoring 15-minute newscasts on WNBQ, Tue. 10:15 p.m., reports sales up "because TV viewers are thinking more than ever of home comfort"; last year, an estimated 210,000 such units were sold, compared with 89,320 in 1949, and industry looks to 1,000,000 by 1956 unless cut off by materials restrictions . . . Ideal Mfg. Co. (women's dresses), whose factory and sales offices are located in little Hammonton, N. J., midway between Philadelphia and Atlantic City, returns July 17 to WPTZ, Philadelphia, with *Pick Your Ideal*, fashion quiz, which last spring produced such crowds that, on Sunday particularly, State police had to be called upon to handle traffic converging on store . . . Sequences from film *The Frogmen* being used as trailer spots on all New York and nearby TV stations for several days before June 29 premiere; 20th Century-Fox will watch results to gauge value of this type of TV advertising . . . Boyle-Midway Inc. (Autobrite Silicone car polish) on June 25 starts sponsoring *Wrestling with Dennis James* on WABD, New York, Mon. 9-11, thru W. Earl Bothwell Inc., N. Y. . . . Kellogg Co. (Corn Pops) on June 26 starts *Wild Bill Hickok* on WJZ-TV, New York, Tue. & Thu. 6:30-7, thru Leo Burnett Co., Chicago . . . Among other advertisers reported using or preparing to use TV: Karseal Corp. (auto wax), thru Mogge-Privette, Los Angeles (KTSL); Effanbee Dolls, subsidiary of Noma Electric Corp., thru Lawrence Boles Hicks Inc., N. Y.; Phillips Packing Co. (canned soups & vegetables), thru Clements Co., Philadelphia.

TV helps increase magazine audience because TV owners stay at home more, spend more time on magazines. That's deduction of Macfadden Publications' researchers Everett R. Smith and Helen E. Johnson in June *Advertising Agency and Advertising & Selling*. Article uses following figures from recent Macfadden-sponsored survey by Stewart, Dougall & Associates: (1) More time spent at home than prior 6 months or year, said 56.3% of TV owners; this compares to half that number of non-TV owners who said they were spending more time at home. (2) Average number of magazines read in TV homes is 3, compared with 2.7 in non-TV homes. (3) Read magazines as much as they did 6 months or year before, said 66.7% of TV owners—with 11.4% saying they read more.

Personal Notes: Harold C. Lund, ex-Walker & Downing agency, named gen. mgr. of WDTV, Pittsburgh, succeeding Don Stewart, now assigned to DuMont New York headquarters . . . Howard E. Stark, radio and newspaper brokerage, has separated from the Smith Davis offices at 9 E. 62nd St., New York; Mr. Stark's new office is at 50 E. 58th St., telephone Eldorado 5-0405 . . . Robert M. McGredy named sales mgr. of WCAU-TV, Philadelphia, in split of sales staff; John S. DeRussy, ex-sales mgr. for both AM & TV, now heads AM sales . . . Frank E. Mullen has resigned as v.p. of Jerry Fairbanks Inc., recently absorbed by Isaac D. Levy's Official Flms Inc. (Vol. 7:22) . . . Louis A. Smith, ex-Chicago manager of WOR & WOR-TV, named Chicago sales mgr. of Petry TV div.; Theodore H. Walworth Jr., ex-ABC, joins Petry New York TV staff . . . Scott Donahue Jr., ex-WPIX, appointed asst. TV sales mgr., Katz Agency, succeeding Don L. Kearney, now TV program mgr. . . . Pel Schmidt, prominent in Baltimore radio and music circles for decade, joins WAAM as local sales mgr. . . . Noran (Nick) Kersta, ex-NBC-TV mgr., recently with Wm. Weintraub agency, will be sales v.p. of Roosevelt Enterprises Inc., packaging firm formed by Elliott and John Roosevelt and starting with 6 TV shows; also in firm are Dee Tucker and Henry Morgenthau III, who now produce Mrs. Roosevelt's NBC-TV show . . . Philippe de Lacy named asst. program director, Bob Seal production coordinator, Jamee Jamet acting traffic mgr., KTTV, Los Angeles . . . Harrison Dunham, ex-KTTV gen. mgr., named TV director of Commodore Productions, Hollywood package firm . . . Edmund J. Linehan, ex-KSO, Des Moines, appointed chief of Radio-TV Section, U. S. Savings Bond Div., succeeding Nathan P. Colwell, resigned; adv. director Elihu E. Harris also announced appointments of John Koepf, ex-RTMA, and Harry Gatton, ex-WSIC, Statesville, N. C. . . . Robert C. Duffield, mgr. of WOWO, Ft. Wayne, new mgr. of KDKA, Pittsburgh, succeeding Joe Baudino, named to head Westinghouse stations' headquarters office in Washington; Frank Tooke, from KYW, Philadelphia, goes to WOWO . . . Charles H. Crutchfield, v.p. & gen. mgr., WBT & WBTV, Charlotte, goes to Greece in July on special radio mission for State Dept. . . . John F. Royal, NBC v.p., retiring in August under company's age retirement plan . . . Holcombe Parkes, ex-NAM public relations man, joins Benton & Bowles as public relations v.p., succeeding Charles F. Gannon.

CBS is considering various plans for corporate as well as functional reorganization, one being autonomous corporations for AM, TV, owned-&-operated stations, research & licensing (color), record-making (Columbia Records Inc.), TV-radio set manufacture (CBS-Columbia Inc.), tube manufacture (Hytron Radio & Electronics Co.)—prompted by recent merger with Hytron-Air King properties (Vol. 7:20, 24). President Frank Stanton is reported destined to head all operations (like president Frank Folsom at RCA), with present TV-AM sales v.p. Jack Van Volkenburg expected to become "president" of TV network subsidiary, v.p. Adrian Murphy continuing to master mind color, ex-Hytron executives (now CBS v.p.'s) heading manufacturing subsidiaries.

ABC is separating its TV and radio networks, also its owned-and-operated stations, as of July 2—naming Alexander Stronach Jr. v.p. in charge of TV network, Ernest Lee Jahncke Jr. v.p. for radio network, James Connally v.p. for radio stations and radio spot sales, Slocum Chapin v.p. for TV stations and TV spot sales. Cooperative sales dept. is also being separated, with Ludwig Simmel as mgr. for radio, George Smith mgr. for TV.

Tom A. Brooks, Hearst Radio Inc. v.p. in charge of its stations, died suddenly June 19 at age of 46. His widow and 4 children survive.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
June 23, 1951

DEALERS MOVE TVs, BUT FACTORIES DON'T: "Lift" the TV trade usually feels this time of year, when new models customarily begin cropping out and autumn-winter selling campaigns are generally contemplated, is noticeably lacking right now -- but the optimistic see some good signs:

(1) Dealers are slowly but surely depleting their inventories, though not replenishing stocks. They say, generally, that TV sales aren't too bad for this time of year, having picked up somewhat in last few weeks. "The aggressive dealers are doing all right," to quote words of one of biggest New York distributors.

(2) Hope springs eternal that Regulation W will be relaxed (see Topics & Trends), which nearly everybody in the industry thinks will give business the fillip needed to speed disposition of inventory. Once stocks are cleared, any imbalance between demand and supply is certain to be adjusted by reason of materials limitations and shortages created by accelerated defense requirements (Vol. 7:24).

(3) Factory vacation shutdowns (see story below) are welcomed this summer as never before as providing the needed "breather" for manufacturers whose factory inventories of TVs have been piling up all too fast -- reaching record 669,950 units as of June 15 (see below). Curiously, nearly every manufacturer likes to propound the fiction that "it's the other fellow, not me, who's loaded up."

"We've trimmed our sales because of market conditions," said one big set maker -- and that about tells story for all. "Our industry's trouble," he continued, "was that we borrowed at least 1,500,000 of this year's sales from last year."

Chicago furniture market is currently slower for TV-radio than for furniture generally, and latter is also at very low ebb. What the trade thinks about fall prospects may possibly be made more evident at time of the Music Merchants Show in Chicago, July 16-19. Only positive forecasts we've heard were noteworthy by their contrasting character:

Sales chief of one big manufacturing firm tells everybody that he's quite sanguine about outlook, thinks second-half TV business will be "as good as always." But head of rival concern told us, "Things are rugged now, and I think it's going to be a slugging match all through the fourth quarter."

* * * *

Factory inventory continues to climb, according to RTMA weekly report. It went to new high of 669,950 TV units as of June 15 from 620,299 June 8 and 593,633 June 1. The climb has been steady since March 2 report of 146,548 (Vol. 7:10).

Production of TVs week ending June 15 was 75,933 (2472 private label), very few more than preceding week (Vol. 7:24). Radios totaled 323,016 (173,727 private label), also about same -- with inventories rising to 399,086 from 377,625 one week before. Week's radios were: 148,091 auto sets, 134,038 home, 40,887 portable.

VACATIONS STARTING; AFTERWARD, WHAT? Vacation shutdown time for TV-radio plants is about here -- and the manufacturers welcome it as giving them just that much more time for deflating swollen inventories.

Nobody's sure what will come after the 2, 3 & 4-week shutdowns planned by big and little plants alike. When we queried them about vacation schedules and post-vacation prospects, they were cagey indeed -- few venturing any predictions at all, some pessimistic, few really optimistic. Typical replies:

"Post-vacation production outlook substantially less than fall of 1950, due to (a) steel limitation order, (b) probable reduced demand."

"Post-vacation manufacturing schedule about double present low level of production. I think we have seen the worst of the current slump."

"We anticipate continuing the same schedules on which we were operating prior to the vacation period."

"Outlook is only fair. It is, as might be expected, less than a year ago."

"We will, of course, be controlled by govt. restrictions and availability of materials. With information available now, we contemplate a TV production of approximately two-fifths the volume we had during our 1950 period, radio about 60%."

"Post-vacation production outlook should be very good as this crazy market is bound to dry up before the summer period is over."

Most vacations are first 2 weeks in July, as usual -- but there are some variations. Philco, for example, shuts down most TV and home radio production as of June 29, meshing this into July 16-30 vacation agreed upon with unions this week. "The cutback in civilian materials and the swing to govt. production, coupled with the seasonal industry trends in TV and radio, have made it desirable for Philco to balance stocks in proportion to sales during the summer weeks," company states.

This "slowdown," like RCA's ordered last week (Vol. 7:24), does not apply to govt. radar, microwave and other electronic materials, nor to auto radios, which continue full-scale. Philco's Sandusky TV plant closes July 16-30.

Of remainder of Big Four, RCA regular plant vacation is July 2-16; Motorola and Admiral observe same period.

Longest outright shutdown of commercial production announced is DuMont's -- entire month of July -- but its tube manufacturing plant's vacation is first 2 weeks (same as most other tube makers). Others reporting "odd dates" are: Arvin, June 22-July 9; General Electric, June 28-July 16; Wells-Gardner, June 22-July 17; Sylvania, July 16-27; Bendix, July 23-Aug. 5; Andrea, July 27-Aug. 6.

Remaining companies reporting all say first 2 July weeks, meaning actually the 10 workdays from July 2-13: Air King (now CBS-Columbia), Capehart-Farnsworth, Crosley, Emerson, Fada, Hallicrafters, Hoffman, ITI, Jackson, Kaye-Halbert, Magnavox, Meck, Olympic, Raytheon, Stromberg-Carlson, Westinghouse, Zenith.

TRADE SLUMP DELAYS ELECTROSTATIC TUBE: Indicative of manufacturers' plans regarding new materials-saving circuits, is decision by most set makers to defer use of electrostatically-focused CR tube until first quarter 1952 or later. This tube is heart of until-recently much-talked-about "conservation" receiver.

Average set today uses considerably less strategic materials than did its counterpart a year ago, but major conservation steps involving circuit redesign have been put off in most cases.

Reason: Under today's trade conditions, manufacturers have enough materials, despite shortages and limitations. They aren't feeling pinch -- yet.

Reduced demand and curtailed output is accomplishing what the conservation circuits were designed to do. Second quarter 1951 TV output will run less than 1,000,000 sets as against 1,500,000 same 1950 period; third quarter, with vacations, may be even less. By and large, new designs haven't been necessary so far.

Electrostatically-focused picture tube (Vol. 7:1) requires no focus magnet, saving cobalt, nickel, copper, in substantial quantities. Every tube manufacturer has a model ready. Practically every set maker plans new circuitry to accommodate this tube whenever materials situation conflicts with production plans.

Most set makers apparently don't see that condition emerging until first quarter of 1952 at earliest. These among others have said they don't plan electrostatic TV output before then: Admiral, Arvin, Crosley, Jackson, Radio Craftsmen, Raytheon, Sentinel, Sylvania, Tele-tone, Wells-Gardner, Westinghouse.

We know of only 2 using electrostatic tube in current output. RCA has them in all 17-in. sets, plans to incorporate them in some other sizes in its new line next fall or winter. Majestic says it began production this week of 2 new 20-in. sets using electrostatics made by Sanabria's American Television, Chicago.

Philco, which demonstrated "performance-conservation" set last February (Vol. 7:8), still has no definite plans for production of new chassis that would in-

clude electrostatic tube, says it will be guided by materials and trade conditions. Emerson plans no action on electrostatic set for at least "couple of months."

DuMont says it's still exploring situation, but its tube division hopes to have new 17-in. self-focusing electrostatic tube (Vol. 7:20-21) -- which requires no circuit redesign -- in production in August. If this type tube lives up to DuMont's claims and is generally accepted by industry, it will mean considerable saving in materials without necessity of new picture tube circuits. Rauland announced development last March of tube (Vol. 7:12) which appears somewhat similar to DuMont's, also requires no re-engineering of present receivers.

Topics & Trends of TV Trade: "Shootin' chance" to get Regulation W relaxed—that's sentiment of some industry observers following House Banking Committee's action June 20 favoring reduced down payments on TV and other appliances from 25% to 15%, and approving lengthening of repayment period from 15 to 18 months, as part of bill to extend Defense Production Act.

Senate Banking Committee rejected same proposal by 7-6 vote June 19 and 8-5 June 21—but closeness of vote encouraged hopes that provisions favoring TV can be inserted in bill on Senate floor as amendment. Failing that, industry leaders intend to push hard to get Senate to accept House version when bills go into conference—if credit relaxation provision can be kept in House bill.

Both committees voted for relaxation of auto credit terms, gave President Truman far from what he asked in more stringent controls. Senate will begin debate June 25, House June 27. Present Defense Production Act runs out June 30—so both houses are pressed for time.

Of course, there's likely to be many a slip in the involved process of coming up with a final bill. Proposal in House bill is just what TV-radio industry has been asking for some time—being twice turned down cold by Federal Reserve Board (Vol. 7:19-24). Except for 90-day moratorium on credit controls, it's precisely what Stromberg-Carlson president Tait urged before both Congressional committees two weeks ago (Vol. 7:22-23).

Flood of telegrams to Senators and Congressmen can be expected from retailers all over country, as well as from manufacturers and wholesalers. They are convinced that relaxation of 25% down payment on TVs can have stimulating effect on present depressed business.

* * * *

Auctioneer brought gavel down only 450 times, but 7000 TV sets were sold—and that means it wasn't true auction. New York City commissioner of licenses McCaffrey so reasoned in reprimanding Tobias, Fischer & Co., auctioneers who ran recent Monarch Saphin sale that caused such a ruckus in trade circles (Vol. 7:20-21) and started wave of TV auctions. He also noted that dealer-cost-price references were based on December-January lists, that 23 of 147 models in catalog weren't offered at auction, that Monarch Saphin refused to divulge cost figures. Reprimand did not lead to revocation of auctioneer's license, for "no complaint has been registered by a customer claiming to have suffered by the misrepresentation." Nor does decision penalize Monarch Saphin (except for adverse publicity). Auction flurry, meanwhile, seems about over; last gasp heard was Baltimore auction this week by Desser Distributing Co. of Majestic, Starrett, Freed lines plus scattering of Emerson, Motorola, RCA, Philco units.

Sales of retail TV-radio and appliance dealers in April were estimated at $216,000,000 in Census bureau's April *Trends in the Electrical Goods Trade*, a drop of $43,000,000 or 17% below March. Significant is fact that sales were $27,000,000 or 11% below April 1950, first time since July 1949 that TV-radio-appliance sales went below figure for same month of previous year.

RCA Victor's "Operation Trade" is working wonders in the sale of larger-screen models for liberally traded-in 10-in sets. Moreover, it's stimulating purchases of reconditioned small-screen sets as secondary home receivers.

That's the testimony not only of RCA home instrument dept. sales mgr. A. B. Mills but of William W. Cone, sales v.p. of Krich-New Jersey Inc., which initiated plan that other RCA distributors, let alone some other brand handlers, are emulating with success.

Plan simply guarantees dealers that distributors will buy any 10-in. accepted as trade-in on new RCA; that RCA Service Co. will recondition old set at nominal cost; that dealer can retain it for resale if he wishes (Vol. 7:19). In speech prepared for delivery at NARDA Chicago convention June 25, Mr. Cone tells how initial mail test to 201 small-set owners produced 43 trade-ins, 28 more prospects, and how RCA Service Co. absorbs usual $4.95 dealer installation charge for demonstration model if sale is made.

Note: Best trade sources indicate 2,444,000 tubes of 10-in. size have been produced to date—plus 553,000 of 7-in., 3,392,000 of 12½-in., not to forget 13,000 of 3-in. and 27,000 of 5-in. Thus, taking into account mortalities and tubes still in trade pipelines, it's estimated fully one-third of the nearly 13,000,000 sets-in-use are 12-in. and under.

* * * *

Sharp advance in personal saving has been by-product of current consumer buying slump, says U. S. Commerce Dept's *Survey of Current Business* for June. Survey points out consumer expenditures were 8% lower in May 1951 than in May 1950, while personal incomes were 14% higher. Govt. military procurement, it notes, "is gradually taking an increasing share of national output," but "the generally strong inventory position for the civilian products has prevented the development up to this time of general shortages of consumers' products in this transitional period between tooling up and the attainment of volume output of military end-items."

TV receiver, passenger car and refrigerator production were the 3 consumer industries hardest hit by production cutbacks in April and May, *Survey* reports, presenting these interesting comparisons: Auto production dropped 10% from March to April, an unspecified further amount in May; refrigerator output dropped about 25% from March to April; TV production was cut more than 50% from March to May—"from a weekly average of around 175,000 units in March to 117,000 in April and 80,000 in May."

* * * *

Sylvania's "mystery" device for increased viewing comfort is said to be lighted panel around screen, presumably of new "electro-luminescent" material (Vol. 7:23). Sylvania has been playing up feature with "teaser" ads in major slick magazines and newspapers. One competitor, usually crustily skeptical of rivals' claims, says he has seen device, calls it "wonderful." Apparently, panel provides optimum lighting conditions. If it's all that is claimed it would be biggest innovation in tubes, from viewing standpoint, since "black" face.

HOW to define TV receiver picture size—this issue provoked prolonged discussion at Federal Trade Commission's TV industry trade practice conference June 21 in Washington (Vol. 7:22-23). Aside from controversy over color claims (see p. 7), picture-size question was most thoroughly explored item at manufacturer-wholesaler-retailer-govt. meeting.

RTMA recommended advertisements be required to indicate size of tube *and* of image. NARDA thought size of image was enough. Most of discussion centered on how to measure tube and picture—whether by diameter (or diagonal) or square inches. No decision was reached, won't be until FTC comes out with proposed rules after second conference in mid-September. Public hearing will follow issuance of rules, then final trade practice code will be set up—first for industry since original radio rules were formulated in 1939. Other rules proposed at June 21 conference:

(1) Sets with built-in antennas shouldn't be advertised as requiring no external aerial in all cases. This proposal by RTMA drew strong support from among the 60-odd representatives of NARDA, National Association of Electrical Distributors, National TV Dealers Assn., and Assn. of Cathode Ray Tube Manufacturers—as well as many local retailers.

(2) Action should be taken to stop distributors' tie-in sales—whereby dealer must take whole line of TV-radios, and even appliances, in order to get products or models he wants. Trade rules should discourage "spiffs"—gratuities paid by manufacturer to dealer sales personnel to push one brand ahead of competitor.

(3) Dealers should have guarantee that sets delivered to them will be in good shape. National TV Dealers Assn. claimed one-third of the 12,000,000 sets in use last February-March weren't in good working condition when delivered to dealers.

(4) Limitation on number of model changes per year, or establishment of regular policy so dealer knows ahead of time when new models will come out.

(5) Rules should brand as unfair (a) exaggerated claims of receiver performance; (b) concealment of fact reconditioned tubes or parts aren't new; (c) description of set as "RCA licensed," implying it was made by RCA.

———■———

Merchandising Notes: "Color talk and publicity hasn't hurt much—but it hasn't helped, either." This epitomizes attitude of manufacturers-distributors-retailers alike; they don't discount its impact, but they seem to think low-priced TVs will continue to sell nicely against high-priced (and small-screen) color sets, once credit restrictions are relaxed . . . Phil Keller, mgr. of George's, Washington chain, surveyed customers to whom he sold 7-in. sets, found they all want larger pictures but don't have enough money for down payment; he believes decrease to 15% would be "just about right" to make difference between sale and no-sale, for on a $300 set 25% is $75 while 15% is only $45 . . . Desperation selling this week included 20-in. tables offered in Chicago and Washington at $169.50 & $199.50, respectively . . . Chicago dealer offered $46.50 Mixmaster free with purchase of any TV set; sale ads also featured Admiral 14-in. combination console (list $369) for $199.95 . . . Meek is out with new 14-in. table at $139.95 . . . Zenith's new Washington area distributor is definitely Simon Distributing Co., as of July 1 (Vol. 7:24)—Simon having given up Motorola franchise . . . Houston Post's KPRC-TV pushed local TV sales with 3-day TV Jamboree in civic auditorium that drew 30,000 persons.

Philco's Plant 9 in Philadelphia (refrigerators) from June 29 is being converted to govt.-industrial production of high priority marine, aircraft, ordnance equipment; its former schedules go to plant at Connersville, Ind.

Financial & Trade Notes: Short interest in TV-radio and related stocks on New York Stock Exchange showed these changes between May 15 and June 15, NYSE reported this week: Admiral, 50,030 shares on May 15 to 42,445 on June 15; Aveo, 21,464 to 19,680; CBS "A", 5337 to 12,283; CBS "B", 3312 to 7489; Emerson, 9965 to 7368; GE, 9056 to 11,215; Magnavox, 24,925 to 20,757; Motorola, 20,209 to 16,497; Philco, 16,779 to 18,444; RCA, 27,081 to 25,223; Zenith, 36,571 to 34,306.

Magnavox is currently operating at about break-even level, due to reduced TV demand, so that quarter ending June 30, which ends fiscal year, won't show much change from $3.40 a share reported for 9 months ended March 31 (Vol. 7:16), reports *Wall Street Journal*. Sales for current fiscal year will probably amount to about $45,000,000, compared to $31,700,000 in fiscal 1950 when earnings were $2.81 per share. Defense products currently run $500,000 to $600,000 a month, but aren't contributing much to profits. By October, these should reach $2,000,000 a month, with total backlog of war orders now $20,000,000 and more being negotiated.

Aerovox reports first quarter sales of $6,384,000 (vs. $5,003,000 same 1950 period), net earnings after taxes of $309,578 or 44¢ on 700,000 common shares (comparative 1950 figures not available). In letter to stockholders, president W. Myron Owen predicted "new highs" in sales fourth quarter of this year because of rapidly increasing backlog of govt. orders and expected pickup in TV sales, but warned that second and third quarters will not be as good as first. Owen revealed Aerovox has increased its loan with Prudential from $3,000,000 to $4,000,000 to finance larger inventories required in govt. work.

Sale of 1900 shares of ABC common by v.p. Earl E. Anderson was reported this week to N. Y. Stock Exchange. He now holds 6600 shares.

Sightmaster Corp. offering 600,000 shares of 5¢ par common stock at 25¢ per share through Tyson & Co. and E. L. Aaron & Co.

———■———

Trade Personals: Earl Smith, from Connecticut Cabinet Co., Mystic, Conn., named acting chief of OPS electronics & musical instruments section, Housewares & Accessories Branch, handling TV-radio; branch is headed by Lee McCanne, of Stromberg-Carlson . . . Leo G. Sands promoted from sales to Bendix Radio adv. & public relations director, with F. Donald Fenhagen and William W. Price as assistants . . . John B. Langley, ex-Ford accessories sales mgr., named gen. mgr., Motorola-Detroit Co., succeeding v.p. E. A. Holsten who joins Chicago headquarters July 1 as special merchandising mgr. . . . Roger B. Yepsen named marketing research mgr. for GE tube div., headquartered in Schenectady . . . Ted Lucas leaves Philco public relations dept. to join Jerrold . . . Walter J. Currie, ex-Crosley international representative, named deputy assistant NPA administrator for Office of Civilian Requirements under former MBS chairman Lewis Allen Weiss . . . Louis Kahn, Aerovox research director, appointed to armed forces Research & Development Board as consultant on components and chairman of capacitor sub-panel . . . Crosley appoints 3 divisional sales managers in new 21-zone realignment of factory field organization: M. R. Rodger, asst. gen. sales mgr., named mgr. for central div.; E. W. Gaughan, special activities, eastern div.; T. H. Mason, sales promotion mgr., western div.

RCA Victor and U of Pennsylvania are jointly conducting 10-week electronic engineering course, June 25-Sept. 7, for 15 Army combat officers; they will work in Camden plant through summer, return to university in fall for masters degrees in electrical engineering.

Mobilization Notes: NPA controls on third-quarter use of copper and aluminum in consumer durable goods turned out to be much more flexible than expected. As anticipated, Order M-47A, issued June 22, fixes permitted use of copper at 60%, aluminum at 50% of amount used by manufacturer during average quarter of first-half 1950 base period. But it permits him to switch his quotas of the 2 metals among long list of products.

Steel, as previously announced (Vol. 7:22), is restricted to 70% of amount manufacturer used for each group of closely-related products during base period quarter.

Here's example of how M-47A will work: Manufacturer can use in TV sets, during third quarter, 70% of amount of steel (including steel in parts) he used during average base period quarter to make TVs, TV-radio combinations, TV-phonos and TV-radio-phonos. But he can't, for example, borrow steel from his radio quota to make TVs. However, he can switch his copper or aluminum quotas as among the products he makes, including TVs, radios, phonographs, ranges, refrigerators, washing machines, and even motor scooters, toy whistles and civilian airplanes. In short, he can shift practically his entire line of consumer durables.

Many new items have been added to list for third quarter. Included are auto radio antennas, use of copper in which was banned in second quarter by order M-12. New order cancels copper Order M-12, supersedes much of aluminum Order M-7, discarding all lists of items in which use of the 2 metals had been banned outright.

Queer topical quirk in new order is provision which appears practically to ban production of color and uhf adapters and converters. These fit definition of "accessories" in M-47A, and constitute "separate item" on list—meaning that manufacturer in third quarter may use only 70% as much steel to make them as he used for them during base period quarter. But how many color and uhf converters were made during first-half 1950 base period? This isn't as significant as it appears, of course, since NPA has always made adjustments in unusual cases. In fact, an NPA official predicted that adapters and converters will probably be considered TV sets so far as steel quota is concerned, if anyone requests such dispensation. But no ruling is known to have been made yet on this subject.

* * * *

At least 75% of CMP applications received by NPA's Electronics Div. have been improperly filled out. And a like number of letters of transmittal submitted with applications are "absolutely useless."

Such was disappointed reaction at NPA as Electronics Div., at week's end, had scrutinized some 700 applications from manufacturers of electronic Class B products (standard, civilian-type). Division is still waiting for final word on slicing of materials pie before making bulk of allocations of steel, copper and aluminum to individual manufacturers.

Electronics Div. officials emphasize that each application is processed as an individual case; in many cases staff members must supplement applications with phone calls to manufacturers—because of obvious errors or insufficient information on application forms, and because official Class B list is highly inadequate. Many products don't appear on list; some listings are obscure. Revised list will be issued soon.

Biggest complaint is that not enough information accompanies applications. NPA people say letters of transmittal—one for each application—should explain application in detail. It's especially important to explain any sharp variations in use of materials or in requirements shown on application.

CMP applications for fourth quarter allotments will be due next month from manufacturers of consumer durables as well as those who filed for third quarter. NPA officials emphasize that plenty of headaches can be avoided by reading instruction sheet which accompanies form CMP-4B.

* * * *

Practically all metals used in electronic equipment are in scarcest category on NPA's new *List of Basic Materials and Alternates*, issued this week. Among metals listed under "Group I-A—In very short supply" are copper, aluminum, selenium, tin, lead, zinc, cobalt, tungsten, nickel, molybdenum. Pamphlet notes that "certain alloy metals, such as nickel, cobalt and tungsten, are in very short supply. All non-ferrous metals are tightening rapidly." On subject of plastics, it says: "The range of adaptability among plastics as substitutes for metals already has resulted in such a tightening of their supply that cellulose acetate is the only important plastic still generally available." List is available at NPA in Washington and all Commerce Dept. field offices.

Westinghouse received DPA certificate of necessity for construction of $12,010,000 electronic tube plant at Pittsburgh, 75% of cost of plant subject to 5-year tax write-off. Three other certificates for expansion of electronic production facilities were issued June 8-15: Polytechnic Research & Development Co., for facilities to produce electronic testing apparatus at Brooklyn, N. Y., cost $108,842, at 85% amortization; Haydu Bros., Mt. Bethel, N. J., tubes, $76,694 at 80%; Sylvania, Salem, Mass., tubes, $35,791 at 85%.

* * * *

International Standard Electric Corp. (IT&T) announces TV transmitter contracts from Radio Belgrano y Primera Cadena Argentina de Broadcasting, Buenos Aires, and Radio Televisao Paulista, S. A., Sao Paulo, Brazil. They will be Argentine capital's first, Brazilian metropolis' second station.

THEATRE TV's big hit, Louis-Savold fight June 15 (Vol. 7:23-24), netted International Boxing Club more $10,000 on basis of 40¢-a-seat payment by 9 theatres with total seating capacity of 25,000. Following spectacular success of first theatre-TV "network" experiment, prophets of TV's doom this week were predicting end of top-flight live sports events on free home TV; and some set owners were showing signs of getting restive about the whole thing, as evidenced by letters to newspapers.

Also greatly in evidence this week was idea that somehow "TV industry" is cooking up vast conspiracy to funnel entertainment from free home sets to theatre screens. Even the usually careful and accurate *Life Magazine* fell into the trap. In angry editorial June 18, *Life* suggested: "FCC may wish to have another look at the industry" for surrendering "an important public service function" by making viewers pay to see programs. "The industry" is warned: "When TV begins to charge us for what we see, let its high chieftains be well advised that they will have to give us something better than the Louis-Savold fight, dreary night club comedians or the idiotic quiz shows that now make up so many telecasts."

Group of 10 New York businessmen—9 of them attorneys—set up "Fair TV Practices Committeee" June 20, said they'll petition FCC to suspend license of any broadcaster caught participating in subscription or theatre TV.

Home TV got last word in Louis-Savold episode. CBS-TV showed films of June 15 bout in place of regular Wednesday night fights June 20 (sponsored by Pabst), with this unusual twist: Joe Louis himself, in studio, discussed the fight between rounds, and participated in running commentary on the fight itself. It wasn't 15 feet high, but it was a good show.

Count of TV Sets-in-Use by Cities

As of June 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

ONLY 269,400 units were added to TV sets-in-use during May, smallest number in years, reflecting current sales slump. Total thus was 12,769,300 sets-in-use as of June 1. Receding rate of additions to TV audience was also indicated in April, for which NBC Research reported figure of 328,400 (Vol. 7:21) and in March, 423,100 (Vol. 7:17). These are the June 1 estimates (consult individual stations for estimates of number of families within their respective ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	59,400
Atlanta	2	115,000
Baltimore	3	301,000
Binghamton	1	40,100
Birmingham	2	54,900
Bloomington, Ind.	1	16,500
Boston	2	741,000
Buffalo	1	205,000
Charlotte	1	79,900
Chicago	4	930,000
Cincinnati	3	258,000
Cleveland	3	477,000
Columbus	3	149,000
Davenport-Rock Island	2	57,600
Dayton	2	130,000
Detroit	3	491,000
Erie	1	48,000
Grand Rapids	1	79,000
Greensboro	1	69,600
Huntington	1	44,000
Indianapolis	1	138,000
Jacksonville	1	32,200
Johnstown	1	93,100
Kalamazoo	1	38,000
Kansas City	1	122,000

Objection to proposed sale of Channel 8 facilities of WSB-TV, Atlanta, while Cox newspaper interests *(Atlanta Journal* and *Constitution)* retain CP-holder WCON-TV's Channel 2, was filed with FCC this week on behalf of Georgia Tech's WGST, applicant for Channel 11. To prosecute case Gov. Talmadge appointed ex-FCC chairman Paul Porter (Arnold, Fortas & Porter) as deputy asst. attorney general. Proposed purchaser is Broadcasting Inc., local business group (Vol. 7:18, 22). WGST counsel claim sale precludes other stations in Atlanta, asks dismissal or placing in pending file until freeze is lifted. FCC this week also received application (total now 412) for Channel 6 from Ridder Newspapers' WDSM, Duluth-Superior, and for Channel 12 from KFVS, Cape Girardeau, Mo. [For details about foregoing applications, see *TV Addenda 12-X* herewith; for all applications pending, see *TV Directory No. 12* and *Addenda 12-A to 12-X*.]

More than 6 years after it was cited in now-famous FCC Blue Book case for alleged overcommercialization, Hearst Radio's WBAL, Baltimore (50 kw on 1090 kc) got its license renewed. Commission this week issued final decision, reiterating 3-2 findings last December that WBAL (and WBAL-TV) deserved to have license renewed, notwithstanding representations of newspaper columnists Drew Pearson and Robert S. Allen that they could "do it better" (Vol. 6:49). Comrs. Coy and Webster dissented.

Telecasting Notes: More TV station sales may result from current "shopping" by substantial interests wanting in; prices, though, have soared to fantastic heights, stimulated by CBS deals for KTSL and WBKB, Bitner purchase of WLAV-TV, O'Neil purchase of KFI-TV—all well into 7 figures (Vol. 7:23). Asking price for one big-city station is reported $10,000,000, which owner jocularly says is his way of keeping would-be buyers away . . . **KOTV**, Tulsa, appoints Petry as national rep, quitting Adam Young; it's first city in which Petry has separate TV & AM representation, latter being KVOO . . . Washington Star's WMAL-TV leaves ABC Spot Sales as of July 1 to be represented by Katz . . . New York Times June 24 begins series of articles by Jack Gould on social and economic impact of TV, based on reports from its correspondents throughout country . . . Non-telecast Pittsburgh Pirates reported to have given permission to WDTV to carry selected games rest of this season, sponsor and details to be released shortly . . . **ABC** to convert storage warehouse at 39-41 W. 66th St., New York, into TV-radio building, with studios, offices, library, to supplement its plant at 7 W. 66th St.; cost estimated at $610,000 . . . **U of Illinois**, recipient of $245,350 grant from Kellogg Foundation for "educational broadcasting," announces gift of TV transmitter by GE, plans to telecast (on educational Channel No. 12 reserved for Urbana) when and if it gets post-freeze grant from FCC . . . **Monogram's releases to TV** (Vol. 7:24) will be 26 old features, 26 westerns, to be leased to Elliott Hyman, reports *Variety;* film producer later may have own TV distributing setup . . . **TV Authority's George Heller** is described as "master of the four-letter word, with a tongue that lashes like a mule-skinner's whip" in June 20 "New York Closeup" column in *Herald Tribune* . . . **Screen Directors Guild** survey shows 55 out of 253 regularly employed Hollywood film directors are currently working on TV film production . . . **Bing Crosby** going on TV next year via film, reports *Billboard.*

NPA is now processing applications for construction or alteration of TV-radio stations under order M-4 (Vol. 7:19-20, 22). Most or all of those now under consideration are from broadcasters who were caught in the squeeze—had their materials and were ready to begin construction before construction controls were amended to include broadcast stations. None of the applications has received final action yet, and NPA apparently isn't ready to consider applications for new stations where grantees haven't bought their building materials. NPA June 21 brought construction under Controlled Materials Plan (CMP Reg. 6), but left builders the choice whether to apply for govt.-allocated building materials or buy them on the free market.

Confirmation of Comr. Frieda Hennock as New York Federal district judge (Vol. 7:4) is delayed, pending objections raised by New York Bar Assn. and request by American Bar Assn. that hearing be postponed. Senate Judiciary Committee reports no additional opposition has been heard, that it hasn't set date for hearing, that it hasn't even received formal notice from New York Bar Assn. Committee has unique procedure; during hearing, anyone can walk in and oppose nominees—without filing prior notice of intention to appear. Prospects of confirmation still remain good, though there's some political opposition, too, from within Democratic organization.

Eight more illegal TV stations (Vol. 7:6, 7, 23), all in West Virginia, have been reported to FCC. Such stations, symptomatic of tremendous pent-up demand for TV, were picking up and rebroadcasting WSAZ-TV, Huntington. Strangely and stupidly enough, some were using WSAZ-TV's own frequency, Channel 5, creating intolerable interference. Logan and Marmet are 2 of towns involved.

Addenda to

DIGESTS OF OPPOSITIONS TO COMMENTS ON TV ALLOCATION PLAN

Hearing Scheduled before FCC Starting July 9, 1951: Docket 8736

Note: Digests of oppositions listed below are in addition to those published in Supplement No. 72-B, June 16, 1951.

KPIX Inc., San Francisco, Cal. (KSFO and TV station KPIX) -- Opposes proposals of: (1) KARM, the George Harm Station, and McClatchy Broadcasting Co., Fresno, Cal., to assign Channel 5 to Fresno. (2) Television California, San Francisco, and Columbia Broadcasting System, New York, to assign 6 to Stockton. (Fly, Shuebruk & Blume)

News-Journal Corp., Daytona Beach, Fla. (WNDB) -- Opposes proposals of: (1) City of Jacksonville; Isle of Dreams Broadcasting Corp. and WKAT Inc., Miami; Central Florida Broadcasting Co., Orlando, to substitute Channel 11 for 2 in Daytona Beach. (2) Allen B. DuMont Laboratories, New York, to substitute 13 for 2 in Daytona Beach.

Hampden-Hampshire Corp., Holyoke, Mass. (WHYN) -- Opposes proposals of: (1) Travelers Broadcasting Service Corp., Hartford, Conn., to assign Channel 3 to Hartford from New London, Conn. or 10 to Hartford from Providence, R.I. (2) Hartford Times Inc., Hartford, to assign 3 to Hartford from New London. (3) Greylock Broadcasting Co., Pittsfield, Mass., to assign 12 to Worcester, Mass. from New London. (4) WTAG Inc., Worcester, to assign 12 to Worcester from Providence. (5) Columbia Broadcasting System, New York, to assign 10 to Albany, 8 to Portland Me., from Lewiston, Me., 3 to Calais, Me., 11 to Providence. (6) Brockway Co., Watertown, N. Y., to assign 8 to Montreal-Verdun, Quebec. (7) Allen B. DuMont Laboratories Inc., N.Y. to assign only uhf channels to Springfield-Holyoke. (8) Outlet Co. and Cherry & Webb Broadcasting Co., Providence; Thames Broadcasting Corp., New London, Conn., all of which approved FCC proposed allocation plan. (Bingham, Collins, Porter & Kistler)

Adrian Broadcasting Co., Adrian, Mich. (WABJ) -- Opposes proposal of Wayne U and Detroit Board of Education to delete Channel 11 from Toledo. (Arnold, Fortas & Porter)

Trebit Corp., Flint, Mich. (WFDF) -- Opposes proposal of Michigan State College, E. Lansing, to assign Channel 10 to E. Lansing. (Dempsey & Koplovitz)

Mid-Continent Radio-Television Inc., Minneapolis, Minn. (WTCN & WTCN-TV) -- Opposes proposal of Northwest Broadcasting Co., Ft. Dodge, Ia., to assign Channel 4 to Ft. Dodge, substitute 2 for 4 in Sioux City, Ia. (Fly, Shuebruk & Blume)

Forest Capital Broadcasting Co., Lufkin, Tex. (KTRE) -- Opposes proposal of East Texas Television Co. Longview, Tex., to assign Channel 9 to Longview, substituting 10 for 9 at Lufkin. (Cohn & Marks)

Tri-City Broadcasting Co., Wheeling, W. Va. (WTRF) -- Opposes proposals of: (1) Allegheny Broadcasting Corp., WCAE Inc., Westinghouse Radio Stations Inc. and Pittsburgh Radio Supply House, Pittsburgh, to move Channel 9 from Wheeling to Pittsburgh. (2) Allen B. DuMont Laboratories, New York, to substitute 18, 39, 43 & 63 for 7, 9 & 57 in Wheeling. (3) Washington Broadcasting Co., Washington, Pa., to interchange 9 & 63 between Washington and Wheeling. (4) WSTV Inc., Steubenville, O., to assign 7 or 9 to Steubenville. (Barnes and Neilson)

Monona Broadcasting Co., Madison, Wis. (WKOW) -- Opposes proposal of Radio Wisconsin Inc., Madison, to move all commercial TV to uhf. (Fly, Shuebruk & Blume)

STATUS OF TV-AM-FM AS OF JUNE 30: At mid-year, TV stations in operation remain at exactly 107 -- only one more than year ago when Nashville's WSM-TV was still building for September debut. But new-station applications have climbed to 415 from 373 last Jan. 1 and 351 the year before. It's clear that seekers after new stations will increase by leaps and bounds, once end of now 34-month-old freeze is in sight.

AM stations continue to multiply, but at decelerating rate. June 30 finds 2399 AM stations authorized (2251 licensed and on air, 148 CPs), up from 2351 (2199 licensed, 152 CPs) at end of 1950 (Vol. 7:1). End of 1949, there were 2246 AMs authorized; end of 1948, 2131; end of 1947, 1961; end of 1946, 1579; end of 1945, 1056.

Applications for new AMs pending totaled 256 as of June 30, only slightly down from 259 last Jan. 1. During last 6 months, 9 AM licenses, 11 CPs were dropped.

FM had 670 commercial grantees on June 30 (642 on air) vs. 706 grantees (672 on air) last Jan. 1 and 791 on Jan. 1, 1949. In addition, 81 non-commercial FM licenses are outstanding. Dropped during last 6 months were 24 FM licenses, 24 CPs, and only 11 new FM station applications are pending.

[For lists of TV stations & applicants, see TV Factbook No. 12 with weekly TV Addenda to date. For details on AM-FM licenses, grants, applications, etc., see our AM-FM Directory of Jan. 1, 1951 with weekly AM-FM Addenda to date.]

Note: FCC reports that July 1 marks 10th anniversary of commercial TV. On April 30, 1941 FCC authorized commercial telecasting to begin July 1. Of many experimental licensees, only NBC's WNBT & CBS's WCBS-TV chose to go commercial, but by May 1942 Commission's log showed 10 commercial outlets -- 6 of which continued to provide service during World War II.

URGENT QUEST FOR QUICK FREEZE END: Though FCC again delayed start of city-by-city allocations hearing -- pushing date forward from July 9 to 23 -- it did so this week with earnest hopes and intentions of speeding up end of freeze. But the calendar of new station possibilities still stands:

None this year, first prospects no sooner than late 1952 -- considering not only the legal but war-affected equipment and construction factors.

Commission postponed hearing ostensibly to mull June 28 oral argument concerning its allocations authority (Vol. 7:18-20, 24-25). Equally important, probably more so, is that FCC is giving industry more time to come up with request that it call off hearing -- partially or totally -- and decide allocation on basis of additional written comments.

Prospects of such a request are currently very strong. Actually, Westinghouse had already filed petition (Vol. 7:25). But Commission itself would be reluctant to call off hearing, for fear of being labeled "arbitrary", without stronger industry support. Petition from group such as NARTB-TV might precipitate action. Latter is now polling its board. First responses favor move.

Many lawyers also favor dispensing with hearing, feeling it would bring

Copyright 1951 by Radio News Bureau

JUL 5 1951

freeze end 6-12 months sooner, even though some feel FCC has no legal right to fix an allocation plan in the rules -- which is purpose of hearing.

DuMont is only outfit so far to speak up in opposition to contemplated procedure, wiring Commission that it wants complete oral hearing.

Many ideas for quickening freeze-end tempo are being bandied about, e.g.:

(1) Make it optional, granting hearing to anyone requesting it.

(2) Require parties to "show cause" why they should be given oral hearing.

(3) Accept written direct testimony, conduct oral cross-examination.

(4) Grant hearing only for those proposals involving conflicts greater in number than specified minimum.

If hearing is dropped, FCC may give everyone 20-25 days to file additional material supporting original proposals filed May 7 (Supplements No. 72 & 72-A), then same amount of time to amplify oppositions submitted June 11 (Supplements No. 72-B & 72-C). People in Commission think the final allocation could be made in couple more months, and processing of applications could begin by year's end.

* * * *

June 28 oral argument, on FCC's legal authority to fix allocation plan in rules and reserve educational channels, was unusual in that rarely have so many come away from an FCC hearing so fully convinced they could predict decision -- namely, that the Commission won't change its mind.

Every possible nuance of Communications Act was brought into play -- its conception, birth, adolescence and manhood -- but arguments boiled down to this:

Opposition contends that law guarantees person right to file an application for a channel and requires Commission to give him full hearing before granting or denying him a license.

Commission and its supporters insist law gives FCC authority to determine whether a channel exists, and to ignore applications which specify channels not included in allocation plan. They insist that FCC procedures give applicants adequate opportunity to seek change in plan.

Only Comr. Jones sided against FCC majority, when he implied he considers forthcoming city-by-city hearing a "kangaroo" hearing, compared with regular "due process" hearing on applications.

Some think FCC may not even render decision on subject. Others think Sen. Johnson's interest (Vol. 7:22-23) impels one. Though there's possibility an adverse decision may be appealed to courts and could hold up whole allocation plan, much doubt exists whether such appeal can be made before allocation plan is made final.

Lined up with FCC majority were: Telford Taylor and Seymour Krieger (JCET), Richard Salant (CBS), Henry Fisher (New York Board of Regents), Abe Stein (WTTV, Bloomington), Maurice Barnes (Mich. State College), George Sutton (several clients), James McKenna (ABC), Vernon Wilkinson (several clients).

Against FCC were: William Porter (Bar Assn.), Theodore Pierson (several clients), Paul Spearman (clients), Robert Booth (WKMH, Dearborn), Thomas Wilson (clients). Supporting FCC on authority to fix allocation plan, but opposing its right to reserve channels, were Thad Brown (NARTB-TV) and E.D. Johnston (DuMont).

HEARST BUYS INTO SEATTLE OUTLETS: Latest TV station deal, whereby Hearst Radio Inc. purchases 25% interest in Seattle's KING-TV and its AM-FM companions for $375,000, points up another noteworthy trend in telecast operations -- newspaper ownership.

Exactly 45 of today's 107 TV stations are now owned in whole or part by newspaper interests, following trend in radio -- a trend less long delayed in TV than radio, manifest also in large number of newspaper applications for new TV stations.

[Complete lists of newspaper, network, manufacturer, multiple ownerships of TV stations, plus list of applications showing newspaper-radio interests of the principals, will be included in our TV Factbook No. 13, due off presses July 15.]

Mrs. Dorothy Stimson Bullitt, wealthy widow of noted Northwest lumberman, paid exactly $375,000 for KRSC-TV and KRSC-FM just 2 years ago (Vol. 5:20), joined

them with her 50-kw AM station KING. Founder Palmer K. Leberman, publisher of Family Circle Magazine, said he had invested about that much, didn't want to continue taking losses then running $1000 monthly, preferred to retain his local AM only.

TV property is "in very good condition" now, according to Mrs. Bullitt, who recently hired the able ABC-TV stations v.p. Otto P. Brandt as general manager. Sale deal was concluded June 28 between Mrs. Bullitt and New York Mirror publisher Charles G. McCabe, president of Hearst Radio, which also operates WBAL & WBAL-TV, Baltimore; WCAE, Pittsburgh; WISN, Milwaukee. It had been negotiated by Hearst Radio v.p. Tom Brooks, who died suddenly last week (Vol. 7:25). The KING stations will have working tieups with Hearst's powerful Seattle Post-Intelligencer, but there will be no changes in management, personnel or policy, according to Mrs. Bullitt.

Note: Sale deal follows close upon purchase of WLAV-TV, Grand Rapids, by the Harry M. Bitner interests for $1,300,000 (Vol. 7:19). Mr. Bitner was onetime Hearst general manager and former publisher of Hearst's Pittsburgh Sun-Telegraph.

COLOR TV—SHORT & LONG-RANGE OUTLOOK: Where does CBS color go from here, now that it's commercial? This much is more obvious than ever:

If it gets anywhere at all, it will get there very slowly.

Impact on black-and-white sales remains first and most important thing to watch. Second factor is sale of color devices when they arrive this fall. Third, of course, is progress of compatible system.

If today's battered market becomes critically depressed, and condition can be clearly attributable to color, and stays that way for considerable time --

If color sets sell like hotcakes when nothing else does --

If compatible systems appear definitely to be years off --

Then, color may be eyed desperately by the manufacturers. But those "ifs" are extremely unlikely for these reasons:

* * * *

(1) Color has been very small factor in keeping people out of stores. The magic word "commercial," tacked onto color, means almost nothing to the customer. He has to see color -- lots of it, good programs -- before he's persuaded he's missing anything. One hour daily, at very poor times, won't impel him to buy an expensive color set. At least, that's general feeling within trade.

CBS promises 20 hours of color weekly by fall, but certainly few stations besides WCBS-TV, New York, will carry that much of it during decent viewing time. Matter of fact, only one of CBS's 4 affiliates now carrying color uses the full hour of color transmitted daily -- other 3 using half hour or less. What will change affiliates' mind by fall, when number of color sets will still be insignificant?

As aptly put by Linus Travers, manager of CBS's Boston affiliate, WNAC-TV: "We intend to cooperate, but we have a responsibility to 750,000 set owners."

And, taking FCC Chairman Coy's view of color development -- that it will be very much like history of black-and-white (Vol. 7:22) -- here are TV set production figures for its "normal" inceptive years 1946-50: first year 6475, second 178,571, third 975,000. Boom didn't begin until 1949 when production (and demand) went to 3,000,000, output leaping to 7,463,800 in 1950.

* * * *

(2) Manufacturers wouldn't be so opposed to CBS system, even though most of them consider it technically inferior and abhor its incompatibility, if they thought a profit could be made in color sets. But the brand-name companies don't.

They've carefully analyzed costs, fail to see how CBS can make any money on the sets to be offered at $400 & $500, even if 25,000 are produced this year -- the production goal indicated by CBS-Columbia Inc. (formerly Air King) president David Cogan. What's even more important, they see no "depth" to the market, nothing that promises the fruits of mass production -- inexpensive sets.

Even the CBS adherents -- Meck, Muntz, Tele-tone, CBS itself -- are extremely careful to preserve black-and-white market. All have made statements insisting on

continued value of black-and-white. Now a set and tube maker itself, CBS faces the same hard facts of manufacturing life that everyone else does.

Nevertheless, there's some danger color will develop into a depressant to black-and-white sales. If it becomes one during next few months, it will be solely because of publicity. Then, after a few sets are finally on dealer floors, there's possibility people may remain reluctant to buy anything, decide to wait for cheaper, bigger, color sets. "Eager beaver" buyers already have their TV sets. Current prospects have either less money, less desire, or both. And substantial new markets are at least 1-2 years off because of freeze.

* * * *

CBS's June 25 commercial "premiere" was big hit -- no question about it -- particularly to those seeing color for first time. Our own reactions to program, as a show, coincide almost exactly with those of Variety's George Rosen, who found it deficient in showmanship, despite big names, and spotty in color values.

Color fidelity wasn't as consistent or as good as it has been in past. Virtues and defects of system stood out clearly. Flicker was worse than we've ever seen it, and breakup continues to annoy some, but not everyone. Brightness is fair, should be greater. In Washington, technicians finally doused room lights, and observers liked picture much more. Low resolution, particularly after coaxial losses, makes closeups mandatory. At its best -- model displaying lipstick and nail polish -- pictures were superb. This was generally true of advertising subjects.

Press and public reaction ran wide range, generally highly commendatory. New York News' Sid Shalit: "There were times when the hues were lush and dripped with pure beauty." Philadelphia Bulletin's Harry Harris: "Color was varied and realistic, and compared favorably with the color of Hollywood films." New York Times: "CBS presented one for the record yesterday; it was hardly more." New York Journal-American's Jack O'Brian: "As the 'first commercial colorcast,' it was unsatisfactory on several levels."

But man-in-the-street was genuinely thrilled, though some criticized skin and hair tones, color breakup, small picture size, magnifying lens, etc.

CBS broke full-page ads in June 25 newspapers in the 5 colorcasting cities, but tone of promotion is still more restrained than many expected. One ad heralded premiere, other announced availability of $500 CBS-Columbia set in late summer (no mention of $400 set). Ads made it clear CBS isn't trying to unsell public on black-and-white. Ads didn't say "wait for color" but CBS radio newscaster Don Hollenbeck said on the air: "The wait may be worthwhile."

Statement by FCC Chairman Coy, during program, was in keeping with his previous comments: "FCC sincerely believed that color in TV now is more important than a promise of color in the future. Such promises in the past have had a way of going unfilled. Today is a day of fulfillment." He emphasized CBS system is only one approved, said nothing about possible development of any other.

* * * *

Fresh public interest in compatible system will be generated when RCA runs demonstrations of own and NTSC electronic system (Vol. 7:25) for press and industry in New York week beginning July 9. Based on sort of preview we saw at DuMont Labs June 26, we venture that reaction will be one of consternation to those who think CBS's field-sequential should be the one and only system.

We saw RCA tri-color tube, fed by DuMont's version of NTSC basic system (Vol. 7:18). It would be unfair to make exact comparison with CBS system, since pictures we saw were off-the-line, slides -- a laboratory version. But with previous day's CBS picture still in mind, we were struck by remarkable fidelity, high resolution and brightness, freedom from flicker and breakup. From still to moving images is "mere detail," no great problem, said Dr. DuMont.

DuMont plans to telecast such signals, on uhf, for benefit of manufacturers in New York area, from site of its WABD when latter has moved to Empire State Bldg. in month or so. Idea is to give manufacturers more time to work with off-the-air pictures than will be possible from NBC's WNBT, which is limited to non-programming

hours. Signal will be 700-706 mc, about 8 kw to start, more power later. Hazeltine may microwave various types of color signals from its labs at Little Neck, Long Island, for rebroadcast by DuMont.

RCA's July 9 show will be for press -- the demonstrations lasting 15-20 minutes, repeated 10 a.m., 2 & 4:15 p.m. Remote pickups may be shown -- not definite yet. For first time, 21-in. tri-color tube will be demonstrated.

Important technical aspect of RCA pictures will be so-called "oscillating color sequence" (Vol. 7:18). Net result of technique, as Hazeltine's Knox McIlwain puts it: "You can make receivers sloppy as hell and the colors still stay true."

Demonstrations will continue daily through Friday, after which engineers will knock off for few weeks rest, then return for public showings. Signals will be networked to Washington shortly thereafter.

RCA hasn't indicated when it will ask FCC for new hearing, presumably waiting to go along with rest of industry through NTSC after period of field-testing. Nevertheless, its spokesman asserts positively it can meet all color criteria now.

* * * *

Coy's look at tri-color tube will be July 2, at RCA's Lancaster tube plant. He'll look over tube's innards, see how it works. Other commissioners are to be invited later -- all informally.

CBS raised roof early this week because it hadn't yet received tube whereas DuMont had, accused RCA of trying to keep "mechanical" stigma attached to CBS system. But RCA said tubes were shipped June 27 to both CBS-Columbia and Hytron.

CBS faces delicate job when it does get tube and hooks it up. If it then boasts its system is no longer mechanical, it runs danger of persuading customers that its forthcoming CBS-Columbia sets with rotating discs are already obsolete.

DuMont also had built own tri-color tube, but isn't satisfied with it yet -- mostly because of poor red phosphor. We saw 16-in. tube with dots covering complete face, and company says it has put 1,300,000 dots on tube. Rauland, Zenith subsidiary, has built tube with 1,000,000 dots, performance details unavailable. On DuMont tube, dots were difficult to see, even with magnifying glass. Philco isn't saying anything, nor is Sylvania, but it's hard to believe they haven't already made tubes.

Now that manufacturers have tubes, you can expect more and more of them to come up with new ideas, improvements, economies. Which, of course, is industry's whole purpose (Vol. 7:25). Dr. DuMont, who doesn't enthuse very readily and who is himself one of TV's great tube inventors, confesses he's "now completely sold" on tri-color tube, though sees tough but not insurmountable mass production problems. He now thinks commercial telecasting of NTSC all-electronic compatible system should be ready by January, if FCC approves.

* * * *

No manufacturer has gone all-out on CBS color, no matter how enthusiastic he is about it. During June 24 discussion on Chicago's WJJD, John Meck said he planned to have "Add-a-Color" slave unit, with 14-in. tube and "10 to 14-in." picture available in 60-90 days. "We're shooting at under $150," he said. He and Hallicrafters' Wm. Halligan disagreed on market for slave units and probable prices of compatible and incompatible sets. Meck felt there will be large demand that can be satisfied now, regardless of future developments in any system.

Crosley displayed own slave unit June 28 in New York's Park Sheraton, but v.p. John Craig indicated company has little faith in system, had built unit solely to meet possible demand. "There is every probability that the all-electronic compatible system will emerge," he said.

Muntz now talks of 2-3 months for beginning of color production, whereas he first said "one month," and he also emphasized value of black-and-white.

Many small outfits are promising and predicting mightily, but as yet there is little evidence of actual production plans and capabilities. Some adapters are being made and sold. Extent of that market is anyone's guess; Philco offers one for $20 (Vol. 7:22) but says it has had little or no demand. Apparently, some customers

feel adapters will either bring color or make it easy to get, find it difficult to understand that they merely give black-and-white.

Demand for color, as gauged in Videotown survey (see p. 11), hasn't changed much. Says survey: "There is today very little interest among the people in Videotown for color TV. Only a handful gave that as a reason for not buying a set this year. When asked about color, the expressed attitude was that they might buy it if it didn't cost too much; if they wait long enough, they will be able to receive color TV on their present sets at little or no extra cost; or that they are pretty well satisfied with black-and-white. Color is something that will come at some time, but no one is very excited about it."

One of best analyses of color was given by Capehart-Farnsworth engineering v.p. Antony Wright, at June 25 NARDA meeting in Chicago. It's worth quoting because he pretty well reflects best industry opinion:

"My own estimate for a good receiver which will operate on both black-and-white and color, providing the same size picture for color as in black-and-white, with the same inherent stability which the customer has a right to expect, is double the cost of the black-and-white. Such a receiver in table model form would be $500 ...Of course there will be cheaper [sets] but they will not be very good...

"Of course, there is always a market for the pioneer, and a good salesman should be able to differentiate between the ordinary customer who expects to get a good color TV picture with a flip of the switch and the experimentalist who will put up with almost any inconvenience...

"TV is a medium for entertainment. I think we must all realize that so long as the result is satisfying, and enjoyment is obtained through this medium, it does not matter too much whether it is black-and-white or color."

* * * *

NPA created some confusion with its M-47A order (Vol. 7:25). As worded, it provides no steel for manufacture of converters, adapters (or even uhf converters). Actually, it's expected order will be amended to permit manufacturers to divert steel currently earmarked for TV sets.

Manufacturer who didn't make TV during base period, like Webster-Chicago, must appeal in order to get any steel for converters or adapters. And it's good bet that steel he does get will be subtracted from amount he's permitted for his other consumer durable products.

Note: NPA hasn't had single manufacturer inquiry as yet on converter-adapter situation. Complete color sets aren't involved. They're simply called TV sets.

OPERATIONS of ABC-TV turned profit corner first quarter this year—after taking bad beating 3 preceding years of network and 5-station operation. Net income from all TV sources for 3 months ended March 31, 1951 was $7012, before Federal income taxes, according to summary published in notice of July 27 stockholders meeting and proxy statement released June 25 in connection with proposed ABC-United Paramount merger (Vol. 7:21). Details of merger plan are disclosed in full, including hitherto unrevealed fact that ABC's approximate losses from TV operations, network and stations combined, were $1,737,562 in 1948, $4,544,545 in 1949, $1,972,568 in 1950.

Thus, TV was largely responsible for poor over-all earnings record of ABC in recent years: total $468,488 profit on total net sales of $37,110,726 in 1948; loss of $519,085 on sales of $40,267,488 in 1949; profit of $84,605 on sales of $45,879,660 in 1950.

First quarter's total profit was $221,858 on sales of $14,560,345, auguring well for rest of year, particularly since TV losses have been halted—though as yet TV station profits are barely offsetting TV network losses. Station income isn't broken down, but it's significant that national spot and local time sales of ABC's 5 TV and 5 AM stations combined climbed from $4,965,889 in 1948 to $6,194,231 in 1949 and $9,286,008 in 1950, and $2,763,281 in first quarter 1951.

Significant, too, is this statement: "Of the total dollar volume of sales of ABC for the 3 months ended April 30, 1951, radio broadcasting represented slightly more than 50% and TV broadcasting the balance. Because of growing popularity and effectiveness of TV as an advertising medium, it is expected that TV broadcasting sales will shortly produce a larger proportion of revenues of ABC."

Terms of merger deal are as previously reported (Vol. 7:21), but also disclosed is fact that new American Broadcasting-Paramount Theatres Inc., if deal gets FCC approval, assumes Jan. 1, 1951-58 employment contract of ABC president Robert Kintner, who stays as president of ABC division, whereby he gets $75,000 salary plus increases depending on profits. Also assumed are $75,000 annual salary contract of vice-chairman Mark Woods, which runs to Dec. 31, 1953; $27,500 salary contract of v.p.-treasurer Nicholas Priaulx, also running to Dec. 31, 1953 and remuneration contract of Paul Whiteman ($87,000 salary in 1950), running to April 1, 1956.

Note: Mark Woods on June 30 announced his resignation from ABC to enter either the advertising agency or TV-radio consulting field after vacation until September.

Personal Notes: Fred Shawn, NBC-TV director of production services, heads 2 newly formed divisions in realignment this week by Lyman Munson, TV operations director: Production Operations, managed by James Kovach, and Staging Services, headed by Benjamin L. Webster . . . Robert J. Wade, ex-NBC mgr. of production services, named executive coordinator of production development, Robert Brunton supervisor of stage special effects . . . Charles F. Holden named ABC-TV asst. director of program production under TV v.p. Alexander Stronach Jr.; Dean Shaffer promoted to mgr. of TV sales development, Eugene Accas mgr. of radio sales development, Don Coyle mgr. of research, under Oliver Treyz . . . Telford Taylor, representing Joint Committee on Educational TV, has opened own law offices at 400 Madison Ave., New York; he was onetime FCC general counsel, held rank of brig. gen. as prosecutor of Nuremberg war trials, returned to join Paul, Weiss, Rifkind, Wharton & Garrison . . . John H. Battison, associate editor of *Tele-Tech* and author of new book titled *Movies for Television*, joins TV-radio dept. of Dancer-Fitzgerald-Sample Inc. . . . J. Neal Reagan, Hollywood TV-radio mgr., McCann-Erickson, elected 1951-52 president of Advertising Assn. of the West . . . Edward Roberts Carroll, ex-DuMont teletranscription chief, now v.p. & gen. mgr., Vidcam Pictures . . . Carlos Franco, ex-Kudner, joins Wm. Weintraub agency July 2 to work on TV-radio . . . Robert Colodzin joins Cecil & Presbrey as TV production supervisor . . . William J. Flynn, CBS asst. treasurer, elected chairman of New York Credit & Financial Management Assn.'s new radio-TV broadcasting group . . . Abiah A. (Bob) Church, 1950 George Washington U law school now with U. S. Court of Claims, joins NARTB law staff Aug. 1 . . . Francis Martin Jr., ex-DuMont and MCA, joins Blair-TV Inc. . . . Francis P. Matthews, Secretary of the Navy, who is president of WOW & WOW-TV, Omaha, appointed June 28 as Ambassador to Ireland . . . Wm. B. Campbell, ex-Young & Rubicam, joins Borden Co. as asst. adv. mgr. handling TV-radio . . . Chester H. Lang, GE adv. v.p., named to new post of GE public relations director in New York.

Station Accounts: New York Telephone Co.'s Long Lines Div. buys spots in John Wingate's newscasts on WOR-TV, Wed. 8:45-9, to point out that defense preparations have placed burden on long-distance operations, urging users to save time by giving operator exact phone number if possible; placed thru BBDO, N. Y. . . . Zenith Radio's first national use of TV will be 20 & 60-second Sarra film spots featuring John Cameron Swazey, Bob Trout, Westbrook Van Voorhis, Arctic explorer Comdr. Donald McMillan, plugging Zenith Super Trans-Oceanic portable radio, thru MacFarland, Aveyard & Co., Chicago . . . High cost of TV decided Florida Citrus Commission on newspapers and radio for its new $2,000,000 advertising campaign, according to J. Walter Thompson Co.'s Don Francisco, handling account, but some TV spots will be used to illustrate recipes and menus . . . Universal-International, film producer, will use TV to promote pictures, planning bi-weekly 5-minute *Movie Star Album* consisting of 20 stills, transcription of star's voice, prepared script enabling station announcer to "interview" star; account handled by adv. v.p. David A. Lipton . . . Delaware floor products div., Congoleum-Nairn Inc., for its Flor-Ever vinylite floor covering, will use TV spots in fall, in addition to its participation in NBC-TV *Kate Smith Show* (Vol. 7:24), thru McCann-Erickson . . . B. F. McDonald Co. (industrial safety devices) using film spots on western stations, thru Philip J. Meany Co., Los Angeles . . . Hoffman Radio to sponsor 23 Fri. & Sat. night local college and junior college grid games next fall on KFI-TV, Los Angeles . . . MacLevy Studios (dance school) sponsoring *The Magic Door*, children dramatizing fairy tales, with ballet and choral groups, on WOR-TV, Sun. 5:30-6, thru Associated Adv. System, N. Y. . . . Among other advertisers reported using or preparing to use TV: A. Goodman & Sons (noodles, spaghetti), thru Al Paul Lefton, N. Y.; New York Frito Inc. (Frito corn chips), thru Ruthrauff & Ryan (WCBS-TV); American Home Foods Inc. (G. Washington coffee), thru Ted Bates & Co. (WCBS-TV); Personna Blade Co. (razor blades), thru J. D. Tarcher & Co. (WCBS-TV); Damar Distributing Co. (Damar household accessories), thru Maxwell Sackheim & Co., N. Y.; West Coast Soap Co. (Powow cleansers & White Navy soap), thru Buchanan & Co., San Francisco; Plastics Mfg. Co. (plastic dinnerware), thru Product Services Inc.; Forest City Products Inc. (Cropax foot aids), thru Foster & Davies Inc., Cleveland; Beaute Vues Corp. (Nutri-Tonic permanent wave), thru Hixson & Jorgensen Inc., Los Angeles; Olympic Distributors Inc. (Nids deodorant pills), thru Knight Adv., Los Angeles; Prim Products Co. (Prim waterless hand cleaner), thru Copley Adv. Agcy., Boston; Wiggins Chemical Co. (Wiggs waterless cleanser), thru Associated Adv. Agcy., Cincinnati; Paxton & Gallagher Co. (Butter-Nut coffee), thru Buchanan-Thomas Adv., Omaha (WTMJ-TV).

Network Accounts: Cory Corp. (coffee brewer) is first purchaser of 15-min. segment of new Frances Langford-Don Ameche show which starts Sept. 12 on ABC-TV, Mon.-Fri. noon-1 p.m.; starting Oct. 2, it's taking Tue. & Thu. segments under plan to sell 15-min. segments to advertisers on "escalator" basis whereby each sponsor moves up to preceding period each day. Agency is Dancer-Fitzgerald-Sample . . . Gillette will sponsor 1951 All-Star baseball game on NBC-TV July 10 from Briggs Stadium, Detroit; game will also be piped to WOR-TV, New York; WGN-TV, Chicago; WNAC-TV, Boston . . . Colgate-Palmolive-Peet, starting July 4, buys additional evening half-hour of *Strike It Rich* on CBS-TV, Wed. 9-9:30; show continues regular runs for same sponsor on same network, Mon.-Fri. 11:30-noon . . . *Your Esso Reporter*, long-time radio spot feature, will make debut on CBS-TV, Thu. 9-9:30, starting July 12, occupying time of *Alan Young Show* for 8 weeks . . . Jacques Kreisler Mfg. Corp. (men's jewelry) starts sponsorship of *Tales of Tomorrow* Aug. 3 on ABC-TV, alt. Fri. 9:30-10, thru Hirshon-Garfield, N. Y. . . . C. H. Masland & Sons (rugs) will sponsor *Masland at Home* starting Aug. 30 on ABC-TV, Thu. 10:30-10:45, thru Anderson & Cairns, N. Y. . . . Eversharp Inc. (Schick razors) starts unnamed show Sept. 4 on CBS-TV, Tue. 9-9:30, thru Kudner Agency . . . Procter & Gamble will sponsor new serial on CBS-TV, Mon.-Fri. 12:30-12:45 p.m., starting Sept. 3, thru Biow . . . American Home Products has bought Mon.-Fri. 12:15-12:30 p.m. on CBS-TV for unnamed serial to start Sept. 24, thru Biow . . . General Electric will sponsor Bill Goodwin on NBC-TV, Tue. & Thu. 3:30-4, starting Aug. 28 . . . Holiday Hotel on ABC-TV, Thu. 9-9:30, being replaced by *Don Ameche's Musical Playhouse* starting July 5; Packard and Cluett, Peabody & Co. (Arrow menswear) retain alt. weeks . . . Lucky Strike replacing *This is Show Business* July 15 with *Go Lucky* comedy quiz starring Jan Murray on CBS-TV, Sun. 7:30-8; *This is Show Business* returns Sept. 9 . . . General Foods (Sanka) replaces *Who's Whose?* July 2, after one performance, with panel-quiz *It's News to Me* on CBS-TV, Mon. 9:30-10, John Daly moderator . . . General Foods (Jello products) replacing *Aldrich Family* Aug. 26 with new show featuring Jackie Kelk on NBC-TV, Sun. 7:30-8, thru Young & Rubicam.

Arthur M. Sherwood, ex-GE and RCA executive, died June 29 in Princeton Hospital. He was 63, and a brother of playwright Robert E. Sherwood.

Financial & Trade Notes: Phenomenal growth of electronics industry in 10 years is exemplified by these comparative figures from July *Fortune Magazine* article on "The Electronics Era." Table only gives rough idea of electronic expansion since many of these companies have vast non-electronic business, such as electrical equipment, refrigerators, lamps:

Percent increase in income		Income in millions 1940	1950
4,908%	Admiral	$ 4.7	$ 230.4
4,319	DuMont	.17	76.0
1,782	Motorola	9.9	177.1
1,746	Collins Radio	.72	12.6
1,709	Raytheon	3.5	59.5
1,132	Sylvania	14.3	162.5
880	Emerson	10.6	74.2
657	Zenith	20.4	134.0
641	Philco	52.3	335.3
469	Bendix Aviation	46.7	219.4
459	RCA	127.8	586.4
426	Westinghouse	239.4	1,019.9
372	Olympic Radio	.05	21.9
368	General Electric	532.7	1,960.4
342	Sperry	47.5	162.4
328	Claude Neon	.44	14.4
281	Hazeltine Electronics	1.4	4.0
243	Hoffman Radio	.12	29.6
	Hallicrafters (inc. 1943)		28.5
	Packard-Bell (inc. 1945)		13.9

DuMont's first five 4-week periods (Jan. 1-May 20) resulted in sales of $23,970,335 as against $22,474,562 during comparable 1950 periods. But profits before taxes went down to $832,018 from $3,885,186 during same 1950 period. After taxes, profits were $487,618 vs. $2,380,886. Dr. DuMont told June 29 stockholders meeting that defense orders totaling $30,000,000 have been received, but conversion is some months away and production won't reach high level until end of year. When 4-week plant vacation ends in August, TV production will resume at about 40% the comparable 1950 rate, he said.

Muntz TV Inc. reports $749,852 net income, or 74¢ per share on 1,013,994 shares of common stock outstanding, during first year of operation ended March 31. Earnings before taxes were $1,781,352. Sales for year were $27,147,846. Current assets on March 31 were $5,171,634, current liabilities $3,466,025. President Earl W. Muntz stated company will have color TV models, but expects changeover to be gradual and demand for black-and-white sets to continue for some time.

Sentinel Radio reports net sales $20,090,708 for fiscal year ended March 31 vs. $9,072,994 for fiscal 1950. Net profits were $706,252, or $1.96 per share on 360,000 common shares vs. $47,717 (13¢). Profit before taxes was $1,899,524 vs. $77,717 last year.

Miscellany: Secondary offering of 18,000 shares of CBS Class B stock, made June 27 by W. E. Hutton & Co., was oversubscribed (at 26¾ a share) and books closed; block of stock was said to be remaining holdings of Isaac D. Levy, resigned director . . . Change in stockholdings reported to SEC: Abraham Rosen, asst. treas., Emerson Radio, sold 1920 shares of Emerson common in May, reducing direct holdings to 500 shares . . . Hoffman Radio took no dividend action at June 28 meeting due to financial requirements for transition to military production; has been paying 25¢ quarterly . . . Keystone Custodian Fund discloses 11,400 shares of Hazeltine among new purchases.

Dividends: Tele-tone A, 16¾¢ payable July 1 to holders of record June 20; Emerson, 25¢ payable July 15 to holders July 5; Howard W. Sams & Co., $2.50 on 5% cumulative payable July 1 to holders June 21; Olympic Radio, 25¢ payable July 19 to holders July 9; Avco, 15¢ payable Sept. 20 to holders Aug. 31; American Phenolic, 20¢ payable July 27 to holders July 13.

Avco names Lt. Gen. Albert C. Wedemeyer, retiring 6th Army commander, as v.p. and director as of Sept. 1.

Mobilization Notes: Many electronics manufacturers are going to get a jolt when they receive allocations of steel, copper and aluminum under Controlled Materials Plan. All signs indicate allotments of the 3 controlled metals for producers of class B (standard, civilian type) electronic products and components have been cut to bone.

On basis of past actions, it's good bet NPA Electronics Div. will appeal—and probably successfully—to higher NPA and DPA echelons to get bigger share of materials pie for electronics industry. Throughout entire mobilization period, as well as during last war, top control authorities have consistently sold electronics short—then reconsidered when pressure was applied.

Electronics Div. staff worked day and night this week to process all applications by June 30 deadline. Manufacturers will be notified of their allocations by July 5; most will receive them July 2. Plenty of individual appeals are anticipated, especially from larger manufacturers who apparently have been hardest hit. NPA has gone much easier on small business in first CMP metals allocation.

* * * *

Certificates of necessity granted week ended June 22 by DPA for rapid tax amortization of new or expanded facilities for production of defense electronic equipment: Sangamo Electric Co., Springfield, Ill., sonar equipment, $125,500 at 85% tax write-off over 5 years; Sylvania, Boston, electronic tubes, $47,688 at 80%; DuMont, Clifton, N. J., electronic detection equipment, $11,755 at 75%.

Extensive controls over all production can be expected as result of Manly Fleischmann's appointment June 25 to head DPA, succeeding Edwin T. Gibson. Defense mobilization chief Charles E. Wilson upgraded the exponent of strong controls as first step in streamlining and coordinating loose-jointed production control setup. NPA will probably be stripped of all its remaining policy functions and devote itself entirely to carrying out DPA policy. Fleischmann temporarily continues to head NPA as well as DPA pending his confirmation by Senate and completion of reorganization plans.

Trade Personals: Cleo F. Craig, finance v.p., named acting president of AT&T in place of the late Leroy A. Wilson; T. Brooke Price, general attorney, elevated to v.p. & general counsel, succeeding John H. Ray, retiring Sept. 30 . . . Carl E. Wideberg named gen. mgr., George G. Jones personnel director, AT&T Long Lines Div. eastern area . . . Ballard F. Smith, ex-RCA Victor, Indianapolis, named Motorola wage & salary administrator; R. A. Holsten named special merchandising mgr. of Motorola . . . Scott Morency, ex-Western Automatic Machine Screw Co., named Washington representative of Zenith war contracts div. . . . Dr. W. R. G. Baker, GE v.p. in charge of electronics operation, awarded honorary degree of doctor of engineering by Syracuse U . . . H. L. Pierce resigns as gen. sales mgr., Sparton, his duties taken over by asst. sales mgr. B. G. Hickman . . . W. D. Espey elected v.p. of Lear Inc. . . . Paul V. Galvin, president of Motorola, awarded honorary degree by Loyola U, New Orleans . . . L. D. Cahoon named president of Astatic Corp., succeeding F. H. Woodworth, retiring . . . P. B. Reed, RCA Victor v.p. in charge of govt. service div., leaves July 6 on 4-week tour of military installations in Europe to which RCA Service Co. field personnel are attached.

* * * *

Avco reports consolidated net income of $5,547,211 for 6 months ended May 31 vs. $4,804,685 for same period preceding year, after all tax provisions. That's equal to 61¢ per share on 8,731,058 shares outstanding, compared with 67¢ on 6,751,611. Sales for first half of fiscal 1951 were $158,959,656 vs. $98,223,246.

Trade Report
June 30, 1951

GOOD AND BAD IN THE TRADE PICTURE: Theories and wishful thinking are about all you can get from key TV-radio producers and merchandisers, in trying to evaluate market for rest of year. There's no unanimity of opinion, no crystalized thinking, no feeling of certainty or even confidence.

Main factors worth reporting, after talking with key industry sources and studying latest trade reports and business services, are these:

(1) Nobody seems to go along with gloomy view attributed to one industry leader some weeks ago that there's enough TV inventory at factories and in pipelines to fulfill all demands for rest of year. Yet cold fact is that factory inventories alone rose to unprecedented 713,032 units as of June 22.

(2) Everybody thinks relaxation of Regulation W will help -- but few think it's the whole answer. Aside from season, "high cost of groceries" is simplest explanation of current buying recession. Yet there was better-than-seasonal pickup at retail levels in latter June -- enough to pull down dealer-wholesaler inventories somewhat but not enough to help factories move all new production (Vol. 7:25).

(2) Trade is wary rather than worried about impact of color promotion on buyer demand, will of course sell color sets and converters if there's demand. Their concern was lessened when CBS-Columbia Inc. (formerly Air King) indicated $400 and $500 prices for 10-in. color receivers, which many think can't stand up price-wise against 16, 17, 19 and 20-in. black-and-white at around $200 to $300.

(4) The business services and investment house letters are so confident that the general outlook is good, that surpluses and price-cutting won't last long, that consumer buying will pick up after the hot summer in view of high employment and wages -- that their views become infectious. They're saying what all want to believe.

(5) Second, third and fourth quarter profits will be nothing like what the trade enjoyed all last year and first few months of this year. Higher taxes and low margins on defense contracts, to say nothing of reduced civilian output, mean that the industry can't possibly achieve 1950's fabulous earnings levels. (For cogent example, see DuMont's first 20-week report in Financial Notes).

* * * *

It's estimated up to 2,000,000 TVs are in inventories -- but we won't really know until first RTMA-arranged Dun & Bradstreet survey of dealer inventories is made available toward end of July.

Second quarter production will add up to about 1,150,000 TVs, as against first quarter's 2,199,669. Week ending June 22, RTMA reports, saw 73,911 sets made (3004 private label), not much change from preceding week (Vol. 7:25), but inventory at factories climbed to 713,032 from 669,950 on June 15. Final week of quarter, to be reported next week, shouldn't show much output change; then come plant vacations.

Radio output held steady level -- 314,661 sets in week (170,666 private label), not much change from preceding June weeks. Radio inventory at factory was 417,153 on June 22, up from 399,086 on June 15. Units were 129,587 home radios, 142,436 auto, 46,638 portable.

Interesting trend in TV prices is noted in fact that average factory price per set was $191.21 in January, $205.70 in February, $197.55 in March, $171.85 in April. Downgrading is doubtless due to current emphasis on low-end units.

* * * *

If TV industry were entering third quarter all tooled up for maximum conservation (which it isn't) and with strong incentive to turn out every set it could (which doesn't exist), it might possibly stretch materials supply enough to equal second quarter production total.

But getting off to poor start, especially with 2, 3 & 4-week plant vacations in July-August (Vol. 7:25), it seems certain third quarter output will lag behind

second quarter. For not to be lightly dismissed is 30% cut in steel, 40% in copper, 50% in aluminum, as against 20% steel cut and no copper-aluminum end-product cuts during second quarter.

And because of flexibility of copper and aluminum restrictions (Vol. 7:25), manufacturers can cut back TV even further if they want to use copper and aluminum they save in order to make more radios, appliances or whatever is in biggest demand. Add to this the near-certainty that soaring military demands will tighten pinch on nickel, tungsten, cobalt during third quarter.

Fourth quarter can't possibly be better, will probably be worse, what with defense production taking an ever-increasing share of the materials pie.

One of biggest producers has been betting on TV shortages this fall to the extent of keeping lines humming second quarter, piling up sets in own and distributor warehouses. His sales chief says there never was a September without business pickup, feels that if year ends with 750,000 inventory in all pipelines that will mean normal and successful market. Still another top sales chief said, "If we can cut the present inventories by 50%, we should be prepared this fall for a good, healthy business."

DuMONT SELLING 30-in. SETS AND TUBES: If this weren't a "price market," you'd be hearing lots more about DuMont's 30-in. tube, largest yet made, as yet offered in only one super-duper receiver called Royal Sovereign, selling at $1795, most expensive TV set on the market today.

Even so, DuMont has sold more than 500 such sets since first brought out last March (Vol. 7:10), has orders for about 500 more, is now making tube available to other manufacturers at $175, to distributors at $200, dealers $231, consumers $242, including excise tax. One manufacturer has placed order for 200 per month.

It's distinctly a luxury item, yet mass production could bring set and tube prices down -- if size clicks. Picture is fully as satisfactory as 19 or 20-in., even more so in very large room. For public places, it's vastly better than most smaller sizes, certainly superior to any projection screen -- and we viewed it as close as 5 or 6 feet quite comfortably.

Tube is metal-coned, round, affords 525 sq. in. of picture space vs. 215 on 20-in., 208 on 19-in., 150 on 17-in., 145 on 16-in. It has 90-degree deflection angle, as against 70-degrees in 17 & 19-in. It's 23½-in. from face to end of neck, only inch or two longer than 20-in., weighs 40 lbs., requires 20,000 volts as against 12-13,000 in 19-in.

Dr. DuMont has reputation for leading way in tube sizes ever since he would not go along with first industry 10-in. standard, instead made first 12-in., led way to the larger sizes now vogue. He isn't sure the 30-in. will win mass popularity, thinks next step up from 20-in. may be 24 or 26-in. GE has 24-in., but in today's moribund market hasn't done much with it; Sylvania worked on 24-in., and Philco's Lansdale plant is also known to be working on stepups from present 20-in. maximum.

Dr. DuMont says 30-in. can be made rectangular eventually, has plans on the boards for a 5x7-ft. tube which he says should be entirely practical and could gain same acceptance as that size movie screen. Giant 20x15-ft. tube for theatre TV is also within realm of possibility, he thinks. And the larger the size, the easier to make tri-color tubes, which RCA has modeled at 17 & 21-in. but which DuMont says can be made even more easily at 24 & 30-in.

Merchandising Notes: Chicago's summer furniture market, ending June 28, suffered 14% decline in attendance—about 16,000 during the 10 days as against 18,644 at last summer's market . . . Trade-in guide for 1951-52 TV receivers will be issued soon by National Appliance & Radio Dealers Assn., president Mort Farr told NARDA Chicago convention June 25. He also told of plan to assist new TV area dealers, based on experiences of "vetcran" TV merchandisers . . . Sears and Spiegel fall catalogs now being mailed; noteworthy is Sears offer of 17-in. table TV at $189.95, whereas last year's catalog's lowest priced 16-in. was $209.95 . . . Electron Enterprises, Berwyn, Ill., offers clever gimmick—lady's overnight case, 16x12x7-in., with built-in portable radio, 4-tube, battery-powered . . . Auctioning TVs via radio, buying local spots between midnight and 3 a.m., "moved considerable inventory" for Video Store, Pacific Beach, Cal., owned by L. N. Papernow, applicant for TV station in San Diego; merchandise was described on air, phone bids accepted . . . Westinghouse Supply Co. testing "Old Trader" campaign in Newark via 10 dealers, using newspaper ads, skywriting, etc. to call on public to trade in "anything around the house" for a Westinghouse TV—mentioning old percolators, toasters, radios, tricycles, irons, iceboxes, skates, tools, etc.

Topics & Trends of TV Trade: Battery-powered, portable TV has been developed by National Scientific Laboratories, 2010 Massachusetts Ave., N.W., Washington, D. C. (Dr. Robert I. Sarbacher), formerly the Wedd Laboratories—and it has been shown some manufacturers with an eye to commercialization. It operates on one or 2 wet cells, each capable of 4 hours of performance, with 25 watts to power 3-in. CR tube magnified to about 5-in. by means of lens. Set also covers full FM broadcast range. It can also operate on house current, and batteries are rechargeable off house current. Only 13 miniature tubes are used, whole unit being encased in satchel-like casing measuring 18x10x5-in., weighing about 21 lbs. It's claimed some 5 lbs. more can be taken off in commercial production, and that set could be made to sell for under $100.

* * * *

Replacement and second-set market doesn't look too promising, as gleaned in ad agency Cunningham & Walsh's fourth annual "Videotown" survey (Vol. 6:26), covering unidentified city of 40,000 that's 50% TV-saturated—believed to be in New York City area. Since 1949, intent of owners to replace sets has been dwindling—11% of TV families that year substituting old sets for new ones with larger screens, 10% doing so in 1950, less than 4% showing interest in doing so this year. As for second sets, only 16 families in 1950 had them; this year 65 said they did, but half of these reported first set "in storage." Among non-owners, interest in buying has dropped from 28% in 1950 to 21% this year—but of course non-owners last year were 70% of population, are 50% now.

National Retail Dry Goods Assn., in TV study just released, indicates doubt TV sales will take their usual upturn in September. What's needed are "added incentives to buy," says report—incentives such as price, picture size, shortages. Report is based on study of TV sales in all markets since 1948, includes charts to show retailer his potential market (which isn't always total of homes in his area). As for color TV, report sees it as "replacement proposition" and sees "slave unit" as having possibilities, price-wise. Copies of 40-page report are available from NRDGA at $5 a copy to members, $10 to non-members.

Reflecting trade slump, Bureau of Internal Revenue collected $17,327,085 in excise taxes on TV-radio sets, phonos for May—$897,463 less than April (Vol. 7:21) and $6,000,000 down from high of $23,390,352 collected in March (Vol. 7:18). May collections compare with $4,436,908 in same 1950 month. Total excises collected from TV-radio industry for 11 months from July 1, 1950 were $118,432,959, compared to same preceding period's $37,919,797.

Dept. store tie-ins for color promotion are being pushed in number of cities. Washington's WTOP-TV has loaned set to Hecht's. Boston's WNAC-TV is working with Jordan-Marsh. And CBS-Columbia Inc. reports it's being "swamped" with requests from such stores as Lyon & Healy, Chicago; Shillito, Cincinnati; D. L. Hudson, Detroit; Macy's, Gimbel's and Abraham & Straus, New York.

* * * *

Trade Miscellany: Add Kaye-Halbert, Pilot and Teletone to list of TV plants shutting down for vacations first 2 weeks in July (Vol. 7:25) . . . Canadian RCA Victor starts construction of $1,000,000 new electronics plant at Prescott, Ont., to employ 700 . . . Raytheon's new 3-story, 144,000 sq. ft. $2,000,000 power tube building at Waltham, Mass., had first girders placed at ceremony June 26; it's due for completion in fall, will add 1000 employes . . . Sylvania has leased plant in Nelsonville, O., for production of welded lead-in wires for tubes, lamps and electronic equipment, plans eventually to move to new building scheduled for construction by city of Nelsonville.

Commander Television Corp., New York (M. F. Jaffa, president) is fourth TV set-making firm to go through bankruptcy proceedings thus far this year, having filed petition under Chapter XI of Federal bankruptcy act proposing to pay creditors 100% over 30 months. Liabilities are listed at $86,750, assets $15,600. Creditors include DuMont, $6441; Regal, $3522; Trad, $7641; Victory Container, $3213. According to gen. mgr. Robert Ehrlichman, who resigned June 28, assets actually are $35,000, liabilities actually $68,000. Earlier this year, similar proceedings involved Freed Radio (Vol. 7:10), Richmond Television (Vol. 7:7, 10, 17); Videraft (Vol. 7:7, 9).

Emerson's "1952 line" of 15 receivers, featuring 17 & 20-in. only, includes only 2 new models—17-in. console with phono and 20-in. console, each $349.95; instead of regular mid-year distributor convention, Emerson will hold series of regional meetings.

Radio receiving tube sales in May totaled 34,074,356, slightly down from April's 35,883,627, bringing total for first 5 months to 188,235,226. Of May shipments, 21,187,963 went to TV-radio set manufacturers.

———■———

FCC's uhf junket to Bridgeport June 29 as guest of RTMA (Vol. 7:25) was most solid evidence of Commission-industry reconciliation since start of color hearing. Chairman Coy was particularly complimentary, in comments at luncheon, suggested RTMA take receiving equipment on tour throughout nation to convince broadcasters of uhf's feasibility. Particularly impressive to Commission was fact uhf is much more resistant than vhf to some types of interference, such as diathermy. Eight manufacturers demonstrated converters, quoted off-the-record tentative prices averaging $40. One showed 1-channel and 2-channel devices to sell for $10-$15. Attending were all commissioners except Jones, staffmen Cottone, Braum, Simpson, Roberts, Boese. Crosley's John Craig was host. Manufacturers demonstrating were Capehart-Farnsworth, Crosley, GE, Hallicrafters, Philco, RCA, Stromberg, Zenith.

President Truman won't withdraw nomination of FCC Comr. Hennock for New York Federal district judge (Vol. 7:24-25), despite opposition of American Bar Assn. and New York City Bar Assn. on grounds lady commissioner is "totally unqualified." President so told press-radio conference June 28. Second week went by without Senate Judiciary Committee setting date for hearing on Miss Hennock's nomination, which American Bar Assn. asked be postponed until after July 15. Support for Miss Hennock has come from fellow New York Democratic Leader Senator Lehman and Rep. Louis B. Heller. New York Republican Senator Ives said he's withholding judgment until after hearings. *New York Daily News* in June 14 editorial, although not taking sides, chided New York City Bar Assn. for not being more specific about its objections.

Eve of July 1 network radio rate cuts (Vol. 7:16-18) saw broadcasters breaking out with rash of trade ads, some strongly worded, to counter implications that radio is on downgrade (Vol. 7:25). Even NBC took full page in June 20 *New York Times* tying in with Jack Gould's series on TV's social and economic impact; it was captioned, "Yes, Mr. Gould, TV does have impact, but . . . Network Radio Reaches More People in More Places at the Lowest Cost . . ." Nashville's WSM got quite emotional: "The infection, until these last few months shielded from the public by the skin and flesh of sober judgment, has broken through, a blood-red rash across the face of the industry . . ." Charlotte's WBT ran coldly factual graphs to show Sunday night listening audiences first quarter this year about same as same months last year. Mutual plumped: "More Radio Homes Than Ever Before."

Telecasting Notes: Considering high prices of TV stations (Vol. 7:24) and higher rates for TV time as AM network rates go down (Vol. 7:25), story of Washington's 250-watt WINX, on which FCC Chairman Coy cut his commercial teeth as manager, may be symptomatic: *Washington Post* paid $500,000 for it in 1944, lost nearly that much on its operation, sold it in 1949 for $130,000 to buyers who didn't do so well with it and now propose to sell it for $120,000 . . . TV isn't alone in raising rates (Vol. 7:25); Curtis Publishing Co., effective next January, hikes *Saturday Evening Post* rates 10% (to $12,935 per one-time black-&-white page), *Ladies Home Journal* 6% ($13,510), *Country Gentleman* 6% ($6900), *Holiday* 6% ($4320) . . . Also raising rates 10%, as of next Jan. 15, is *Look Magazine* . . . Lutheran Television Productions Inc. being formed by Missouri Synod of the Lutheran Church (which comprises 5000 churches and operates AM station KFUO, Clayton, Mo., suburb of St. Louis) to produce 26 half-hour Bible dramatizations for TV; $750,000 has been voted for project . . . Cowboy star Roy Rogers got restraining order from Federal district court in Hollywood last week to prevent Republic Pictures from releasing any of his old films to TV, and Gene Autry has indicated he will take similar action . . . June 27 *Variety* front-pages story that Warner Bros. offering 600 unproduced story properties for sale to TV networks and ad agencies . . . Jerry Fairbanks Studios, now part of Isaac D. Levy's Official Films Inc. (Vol. 7:22) hires Sid Rogell as operations mgr. for stepped-up production of films for TV . . . Historic Fort Lee, N. J., studios, where some of early movies were made, being remodeled by Shuberts for lease to TV producers; 80x120-ft. stage to be ready Aug. 1, another 40x80-ft. in fall . . . Spike Jones troupe to be paid $200,000, or $40,000 per performance, for 5 NBC-TV shows next fall, 3 probably on Colgate series again, according to Hollywood reports . . . Fordham U-CBS Summer Institute of Professional TV and Radio will use CBS studios and staff in 6-week course, July 5-Aug. 14 . . . Robert J. Landry, ex-*Variety* and ex-CBS, now publishing newsletter *Space & Time*, will direct New York U's summer Radio-TV Workshop, July 2-Aug. 10 . . . Big color TV feature is planned for a late July issue of *Life Magazine*.

CBS raises network charge for WCBS-TV from $3250 to $4000 for night time hour Sept. 1, thus following by week similar actions by ABC and NBC (Vol. 7:23, 25). ABC raised all its owned & operated stations Aug. 1, NBC its complete rate card July 1. About 60% of CBS-TV affiliates raise rates July 1, substantial number during following months (see *TV Factbook No. 13*, due July 15). No change is indicated for WTOP-TV, Washington (45% owned by CBS). CBS-owned KTSL, Los Angeles, actually is being reduced July 15—from $1600 to $1500.

American Bar Assn. has named committee to study "constitutionality and advisability" of telecasting and broadcasting trials and Congressional hearings, to report at annual meeting in New York Sept. 17-21. Chairman is John W. Davis, New York attorney and Democratic candidate for President in 1924. Other members: Bruce Bromley, New York; John A. Danaher, Hartford; Joseph J. Daniels, Indianapolis; Joseph W. Henderson and Wm. A. Schnader, Philadelphia; Monte M. Lemann, New Orleans.

First educational TV channel application to be formally filed came this week from Lindsey Hopkins Vocational School, Miami, seeking Channel No. 2 there, earmarked for educational institutions under FCC's proposed allocations. Also filing for new TV outlets this week were WIBA, Madison, Wis., seeking Channel No. 13 in Eau Claire, and WJOB, Hammond, Ind., seeking uhf Channel No. 56 . . . [For further details about these applications, see *TV Addenda 12-Y*.]

NBC's move into film-making and distribution of TV-inspired films to theatres sounds as if it has all sorts of possibilities—emphasizes anew TV's impact on show business. As envisaged by TV executive v.p. Sylvester (Pat) Weaver, NBC intends to film 60-90-minute shows, highlighting season's top TV entertainment—with Durante, Cantor, Sid Ceasar-Imogene Coca, Martin & Lewis shows among those prominently mentioned. Entertainers would re-create high spots of TV season, and these would be filmed on 35mm at NBC's New York Center Theater. Some kines would be used. Undecided yet is choice of producer and distributor. Robert Montgomery will be narrator for those films needing one. *Variety*, which broke story in June 27 issue, says Weaver estimates $150,000 cost per picture. Pitch to theatre-owners would be: (1) Proven audience of 15,000,000, not all of whom have seen performers' entire series on TV. (2) High pull in non-TV areas, where public has heard about but hasn't seen the TV stars. "Shooting" may start Aug. 1, with release planned for Sept. 1.

Second theatre-TV "network" boxing bout June 27 repeated success of first (Vol. 7:24-25)—for the theatres at least. Nine of 11 theatres in 8 cities screening Bob Murphy-Jake LaMotta slugfest reported overflow crowds (though Washington's colored Lincoln Theatre was three-quarters full). Fight wasn't telecast or shown in New York theatres, yet drew only 21,257 spectators to Yankee Stadium—less than one-third of capacity. Promoters blamed threatening weather. Theatres again paid total of about $10,000 to International Boxing Club for TV rights. Two new theatres joining closed-circuit "network" were Warner's Stanley in Philadelphia and Fabian's National in Richmond. Next exclusive theatre-TV showing is Rex Layne-Rocky Marciano bout from Madison Square Garden July 12. Success of experimental showings undoubtedly will feature in FCC hearing scheduled Sept. 17 on theatre interests' request for special theatre-TV frequencies (Vol. 7:17). Washington consulting engineer Frank McIntosh was hired to represent Motion Picture Assn. of America at hearing.

Edward W. Allen Jr. is FCC's new chief engineer—his appointment putting "first team" man in top engineering advisory position. He succeeds Curtis Plummer, now Broadcast Bureau chief. As long-time head of technical information div., Allen participated actively in postwar broadcast developments, FM and TV particularly. He's known as "an engineer's engineer" among industry's technicians. He's 1925 electrical engineering graduate of U of Virginia, got LL. B. from George Washington U in 1933, worked for Westinghouse and Chesapeake & Potomac Telephone Co. before joining Patent Office in 1930, transferring to FCC in 1935. He takes new office July 23, when he returns from CCIR conference in Geneva (Vol. 7:20).

TV Factbook No. 13

Exactly 415 applications for new TV stations are on file with FCC as of end of first half of 1951—44 having been filed, 2 withdrawn, since publication of our last TV Factbook in January. All applications to July 15, 1951, plus detailed data (including rate summaries) on all the 107 operating stations and the networks will be published—along with present and proposed channel allocation tables and many other directory features—in *TV Factbook No. 13*, due off presses July 15. Full-service subscribers will receive copies in usual routine; Newsletter-only subscribers may order at $2.50 per copy. Pre-print orders in quantities of 20 or more will be accepted up to July 6 at $1 per copy.

FILM TREND TO TV DOMINATES TRADE NEWS: Pointing up TV's ever-increasing affinity with motion picture industry was announcement this week that The March of Time is dropping its theatrical motion picture series, popular in movie houses since 1935, in favor of concentrating on producing TV and special theatrical films.

Only 3 more issues of March of Time are in works, plus certain documentaries -- also "Crusade in the Pacific" now being put together as sequel to "Crusade in Europe" for TV release. Said Time Inc. president Roy E. Larsen: "Our company has been increasingly active in recent years in developing and producing programs for TV and our facilities are admirably suited for the new medium."

Theatrical trade press is so replete with TV items these days that news of stage and movies is often overshadowed. Getting big play are subscription-TV projects, notably Skiatron and Paramount's Telemeter. These will doubtless be subject of FCC hearings, as yet unscheduled, along with Zenith's Phonevision. Meanwhile, they're riding high tide of free publicity, despite the fact FCC must yet rule on pay-as-you-look principle -- and approval is by no means assured.

Much ado, too, over NBC's plans to film highlights of TV programs for showings in theatres (Vol. 7:26), which may be extended to top AM programs like Tallulah Bankhead's. Then there's theatre-TV, notably recent fightcasts (Vol. 7:24-26), and of course United Paramount's projected merger with ABC (Vol. 7:21,26). Variety got so hot about wedding of TV with films that it headlined July 6 edition: "Films' New Prosperity -- Via TV" and observed, anent NBC-TV movie project:

"The prime objective is a triple-threat ballyhoo for the picture theatres, the talent and TV. It would blend and wed the 2 media for mutual boxoffice or other benefits, bringing to non-TV audiences a sample of video's talent values, and attract into video-saturated sectors the 'lost' audiences who may have gone overboard for TV favorites at the expense of the boxoffice."

Also worth noting was meeting of Isaac D. Levy, a co-founder of CBS, now in TV film business, with RCA president Frank Folsom (see back page).

HIGHER HOPES FOR FASTER FREEZE THAW: FCC got what it was looking for -- petition from NARTB-TV asking it to call off city-by-city oral allocations hearing, accept another round of written comments, come up with final allocation plan (Vol.7:25-26).

NARTB-TV contends 8-15 months delay is inherent in oral hearing, asks that 30-day deadline for new comments be set, with 30 additional days for oppositions -- and that's all. Petition filed July 6 asks FCC to issue "due notice that opportunity for oral presentation will not be provided, unless good cause is shown to the contrary by specific petition."

Whether NARTB-TV's petition alone is enough to spark off speedup procedure, it's hard to say. FCC may wait for "overwhelming" demand by more organizations, and for substantial number of individual petitions.

Convinced of its rule-making authority, FCC is going ahead with plans to adopt fixed allocation plan in rules, to be changed only by rule-making. It may be

Copyright 1951 by Radio News Bureau

assumed Commission has rejected contentions of illegality made during oral argument of FCC Bar Assn. and others last week (Vol. 7:26).

But Commission's course isn't clearcut yet. DuMont has insisted on oral hearing, may get it. And many parties object to facets of DuMont's nation-wide plan, may demand to join hearing. It could snowball, get out of hand.

Educators, too, are worried. If FCC sets 20-30 day deadline for filing additional comments, attorneys for Joint Committee on Educational TV may feel they will need more time to prepare cases.

Then, the 31 station shifts proposed by FCC present knotty question. WKY-TV, Oklahoma City, brought this to a head when it filed petition for "severance" and "formal hearing." It contends that FCC's intentions to shift it from Channel 4 to 7 must be thrashed out in conventional "due process" hearing, not buried among hundreds of unrelated issues involved in national rule-making proceeding.

Informal conference of attorneys, to establish "ground rules" for oral or written procedures -- whichever prevails -- is being considered by Commission, may be called sometime during week of July 16.

If July 23 oral hearing is dropped, in whole or part, some within FCC feel that consideration of final allocation may begin around end of September, then concluded in month or so. Most observers regard that target as pipe dream, would be delighted with final decision by Jan. 1.

* * * *

Meanwhile, FCC has at least 3 other matters to clear:

(1) 470-500 mc allocation. There's every indication that this 30-mc band, sought for common carrier use by Bell Labs, will shortly be assigned to TV.

(2) "Partial" unfreezing. FCC originally hoped to increase vhf powers, grant vhf stations in Territories and authorize uhf stations -- all in near future, before lifting of general vhf freeze. Decision on these is now likely to remain suspended until nature of speedup procedures, if adopted, become clear.

(3) California-Mexico border conflicts. These are in process of solution through removal of one vhf channel from San Diego, one from Mexicali. FCC may have to give San Diego TV aspirants opportunity to protest deletion.

SOCIAL AND ECONOMIC EFFECTS OF TV: How is TV changing the pattern of American life?

New York Times provides plenty of clues -- if not the answers -- in series of 7 articles June 24-30, written by able radio editor Jack Gould, based on reports from correspondents in more than 100 cities.

It's well-nigh impossible, even for the capacious Times, to give a really definitive picture of TV's impact. But this series has come closer to it than anything yet. Mere fact that the Times undertook project emphasizes recognition of the social and economic revolution being wrought by mere handful of TV stations (107 as against some 2250 radio stations) -- the video signals as yet within reach of very little more than half the nation's homes, only some 13,000,000 as yet with TV sets.

Yet this series is "must reading" for everyone connected with TV-radio, and we urge you by all means to get copy of pamphlet of reprints available for 10¢ from Dept. TV, New York Times. Some highlights, just to give you an idea:

CHILDREN -- Surprisingly enough, "the overwhelming majority of school officials from coast to coast believe [TV] is benefiting youngsters...and is not having significantly adverse effects." TV stimulates imagination, vocabulary and interest in current events, educators are saying. Even Hopalong comes in for praise -- and a Columbia U psychiatry professor calls cowboy films "an excellent outlet" for children's natural and normal hostility and aggression.

POLITICS -- President Truman and Thomas Dewey both acclaim TV to be a great force for public enlightenment but strongly oppose televising of "trials" such as the Kefauver hearings. TV is causing revolution in politics, where it's destined to replace the old-time political rally. Candidate who is telegenic, quick with the answers and at ease before the camera has head start at election time.

SPORTS -- TV makes biggest inroads on the second-raters. Top-notch events still attract capacity crowds, but poor teams, small-timers, high school athletic events are getting crushing blows at the gate.

RADIO -- Big radio programs have lost sizable hunk of after-dark audience. New Hooper tabulations for New York show Jack Benny had 4.8 rating in early spring 1951 vs. 26.5 in early spring 1948; Amos 'n' Andy 5.9 vs. 13.6; Arthur Godfrey (radio) 5.9 vs. 20.3; Lux Radio Theatre 8.4 vs. 25.3; My Friend Irma 6.6 vs. 18.8; Bob Hope 3.2 vs. 16; Bing Crosby 3.8 vs. 18; Fibber McGee 5 vs. 17.2; Big Town 2.2 vs. 12.7; Groucho Marx (radio) 5 vs. 12.

NIGHT LIFE -- Where TV once was boon, now it's bane to taprooms. It's competing with night clubs not only for customers but for chorus girls and other entertainers. People eat out less often than before TV, with restaurant business off 25% in Chicago. Lodges and labor unions are having hard time getting quorums for evening meetings.

READING -- Sale of books to adults has fallen off in most cities, but most public libraries report children reading more than before. Newspaper circulation continues to gain in TV cities. Several booksellers want publishers to advertise on TV, but publishers say network time is too costly.

CULTURE -- Educators are divided every-which-way on TV's merits, faults, possibilities. Series presents typical quotes from leading educators, representing virtually every conceivable viewpoint -- no clear-cut trend of thinking about merits or demerits of TV; rather, a desire to probe its potential further.

MOVIES -- Theatre attendance has dropped 20-40% since advent of TV, with 70 theatres closing in Eastern Pennsylvania, 135 in Southern California, 61 in Massachusetts, 64 in Chicago area, 55 in metropolitan New York. Good films still draw good audiences. Washington exhibitor's comment is typical: "You can't charge for mediocrity any more when everybody can get it at home for nothing."

Other "impact points" are covered in articles -- from TV's effect on life at sea (coastwise vessels now equipped with TV) to its impact on bus and streetcar riding (fewer passengers often blamed on TV stay-at-homes). Even eating habits may be feeling influence of TV --

Will TV produce nation of fat men? Asbury Park, N.J. physician is quoted as believing many of his patients are putting on weight because they spend night after night at home eating additional snacks and munching sweets and nuts (drinking beer, too, he might have added). Credence to this point of view, says article, is lent by druggist reports of sharp rise in sale of weight-reducing preparations.

ALL EYES FOCUS ON RCA COLOR PICTURES: Next week will be one of most critical yet in color struggle. RCA demonstrates its system to press and industry for first time since last December, first since CBS system finally achieved commercial status.

If RCA's pictures are as good as claimed, compatible system will be well on its way back to Commission hearing rooms. And if cost, stability and versatility of receiving and transmitting equipment unmistakably fulfill FCC's rigid criteria, the eventual approval of compatible system will be clearly foreshadowed.

Comments of press, subsequent reaction of public, should be watched with extreme care. They're likely to establish tenor of whole battle from now on.

Demonstrations start July 9, 10 a.m., 2 & 4:15 p.m., running daily all week in Radio City's Exhibition Hall for benefit of press and industry. Shows will feature Broadway-TV stars Nanette Fabray, Yma Sumac, Ray Malone, Bob Smith, George Burton, plus Conover models, with Ben Grauer announcing.

Engineers then rest few weeks, return for public showings, network feeds.

* * * *

This week, flat demand that FCC reverse itself came from Congressman Wolverton (R-N.J.), ranking minority member of Interstate & Foreign Commerce Committee. In June 28 Congressional Record, he states:

"It is unfortunate that the decision rendered by the FCC relating to color TV has had the effect of denying to owners of TV sets a system that could be uti-

lized to receive broadcasts in color or plain black-and-white interchangeably.

"The advancement that has been made in this art now makes it possible to have a system that can be interchangeable. The sensible thing for the FCC to do under the circumstances would be to review the decision previously made to the end that the best possible system be made available to the public."

* * * *

FCC Chairman Coy toured RCA's Lancaster tube plant July 2 in company of RCA president Frank Folsom. He saw how tri-color tube is made -- no color demonstration. He made no comment to press, but is said to have been particularly interested in rate of production. Rest of commissioners are due to be invited soon. RCA doesn't indicate whether it will ask Commission to see New York color demonstrations.

Rest of industry, through National TV System Committee (Vol. 7:17-26), is gearing for field tests of compatible system, albeit slowly because of vacations.

In Chicago, Hallicrafters expects shortly to "fire up" tri-cclor tube it received from RCA, is building 20 more chassis for tubes to come. Company has own color generating equipment. Zenith has been testing Rauland-built tube (Vol. 7:26). Admiral and Motorola are known to have color programs mapped out, but they aren't talking about them. Nor is Philco, also very active on color.

To get color signal on air in Chicago, there's good chance Zenith's experimental Channel 2 station (used until recently for Phonevision) may be employed.

Unequivocal stand against CBS system was taken by Olympic this week when it advised its dealers of decision not to make CBS sets, declaring:

"Before long a very superior color system, providing large screen, high-definition color images with excellent color fidelity and complete compatibility will emerge and will have the backing of the entire TV manufacturing industry, as well as broadcasters, sponsors and the public."

But mass production of compatible system can't come until year or more, company estimated. Meanwhile, CBS-Columbia Inc. (formerly Air King) will "gauge" color market, in a sense, with its offering rest of this year of some 25,000 color receivers due for initial deliveries to dealers in September (Vol. 7:26), and various other smaller manufacturers promise sets and slave units.

* * * *

CBS's biggest current promotion seems to be via dept. stores. It has loaned sets to Gimbel's, Abraham & Straus and Gertz, in New York area. Estimated 1500-2000 people saw demonstrations July 3. In Boston, Hub Distributors reports that over 1200 dealers attended 3-day showings of CBS-Columbia set.

Reason behind CBS's less-than-all-out campaign, according to July 7 Billboard, is that "CBS believes that the only way to effectively promote color TV is to have people see it for themselves." Thus, CBS awaits fall crop of receivers.

CBS also hopes for lift from sports, is seeking NCAA permission to colorcast Eastern football games, arguing that paucity of sets means no impact on gate. Horse races are first events on sports schedule, with colorcasts of Monmouth Park (Oceanport, N.J.) races set for July 14, 21, 28 & Aug. 4 at 3:45-5:15 p.m.

To coincide with Music Merchants Show in Chicago July 16-19, CBS will feature Columbia Records artists Rosemary Clooney and Frankie Lane in closed-circuit colorcasts in WBBM auditorium, to be viewed on CBS-Columbia sets.

FIRST broadcast station to receive NPA construction authorization (Vol. 7:19-20, 22) was WEKZ, owned by Green County Broadcasting Co., Monroe, Wis. Application got o.k. June 16. Authorization was for a "broadcast building" to cost $10,200. WEKZ was granted CP by FCC March 21 for 500 watts daytime on 1260 kc. Apparently the case for NPA authorization was clear-cut matter of "community need" since there is now no station in Monroe (pop. 6182), 35 air miles south of Madison, 20 miles north of Freeport, Ill., 35 miles northwest of Rockford, Ill.

Operating under its emergency authority, NPA is known to have taken action on applications for construction and alterations by other radio and TV stations since approval of WEKZ, but names of applicants and disposition of their cases haven't yet been disclosed. As of June 16, NPA hadn't denied any applications from broadcasters. Applications cover only the cost of actual construction, not broadcast equipment, which NPA calls "personal property."

New or existing stations may install personal property without authorization if installation cost (as distinguished from cost of property itself) doesn't exceed $2000 in any 12-month period. Construction Order M-4, as revised July 1, specifically mentions "theatre seats, TV transmitter" as examples of personal property.

Personal Notes: John F. Royal's retirement as NBC v.p. is definitely set for Aug. 1; now 65, he's going into consulting business, and *Variety* says his first clients will be NBC and Mexico's Emilio Azcarraga and that he's negotiating to sell his biography as veteran showman for filming as "The Royal Story" . . . **Judge Justin Miller**, NARTB chairman and gen. counsel, off this week with **Forney Rankin**, detached from U. S. Embassy staff in Mexico City, on 6-week Latin American tour for State Dept., studying international radio, notably work of Voice of America . . . **Edward Lamb** and **Stephen Mack** announce new law firm of Lamb & Mack, Security Bldg., Toledo. Mr. Lamb is owner of TV stations WICU, Erie, and WTVN, Columbus. Former partnership of Lamb, Goerlich & Mack was dissolved June 1 after appointment of Mr. Goerlich as associate counsel, UAW-CIO . . . **William H. Hylan** appointed CBS-TV asst. sales mgr. in charge of color TV sales . . . **Norman Boggs**, executive v.p., WMCA, New York, July 23 joins Don Lee as sales v.p., **Ward Ingrim** having been elevated to Don Lee executive v.p. and **Wm. Pabst** elected to board of Thomas S. Lee Enterprises . . . **Reynold Kraft**, ex-NBC-TV sales mgr., recently TV v.p. of Paul H. Raymer Co., named to head new Chicago sales office of Fort Industry Co. (Storer stations) . . . **John William Quinn**, ex-Rural FM Network, Ithaca, N. Y., named production mgr., WBTV, Charlotte . . . **Donald Shaw** promoted to regional mgr., ABC-TV stations dept. under **Richard B. Rawls**; new regional mgr. also is **Carl Cannon**, ex-NBC, Branham and WSMB, New Orleans . . . **James A. Glenn**, photographic engineer, appointed mgr. of new NBC-TV special effects dept. . . . **Theodore P. Wallower** appointed TV-radio timebuyer, Bermingham, Castelman & Pierce . . . **Robert Sawyer** joins Kenyon & Eckhardt as TV-radio supervisor . . . **James N. Manilla**, ex-BBDO, named film supervisor in TV-radio dept., Geyer, Newell & Ganger Inc., N. Y. . . . **Raoul Pagel**, ex-General Service Studio mgr., named production mgr. of Jerry Fairbanks-Official Films operations in Hollywood, first change made by new executive v.p. **Sid Rogell**.

NARTB-TV engineering committee, set up to advise TV board on any or all engineering matters: Raymond F. Guy, NBC, chairman; R. J. Rockwell, Crosley; R. D. Chipp, DuMont; J. G. Leitch, WCAU-TV, Philadelphia; J. E. Mathiot, WGAL-TV, Lancaster; C. G. Nopper, WMAR-TV, Baltimore; J. R. Poppele, WOR-TV, New York.

Jack Kent Cooke, Canada's first TV applicant, has purchased Toronto Maple Leaf baseball club, whose games are broadcast by his CKEY.

TV Factbook No. 13

Rate cards of the 4 TV networks, digests of rate cards with other detailed data about the 107 TV stations now in operation, directory of present or projected TV stations in Canada and Latin America, listing of the more than 400 applications pending for new TV stations—these are main features of *TV Factbook No. 13* due to be mailed to all full-service subscribers July 14. Many other features valuable to station operators, new-station applicants, advertising agencies, film syndicators, etc., will also be carried, including present and proposed vhf and uhf allocation tables broken down geographically and by frequencies. Included with each *Factbook* will be a 20x30-in. wall map showing TV areas with status of stations and network routes. Extra copies of *Factbook* will be available to subscribers at $2.50; to non-subscribers, $5.

FCC Chairman Coy took dim view of some proposed "purity" safeguards suggested by Senate Labor subcommittee studying ethical standards in govt. Testifying July 5, he said Congress conceivably could go too far, though he thought proposed Federal commission on ethics could be valuable in calling attention to practices in regulatory commissions. It may be, he said, some officials are "over-friendly" to groups they regulate, but he believes legislation to ban former FCC members for specific period from joining any private business subject to FCC regulation is "much too restrictive." He added: "Within limits . . . I would prefer a bit of abuse to a generally incompetent staff."

Vigorous opposition to educational channel reservations came to FCC this week, from a TV-savvy educational institution—Western Reserve U, Cleveland. University's Radio-TV Council resolved that "the interests of education can best be served by cooperating with existing commercial TV stations." School, under Barclay Leathem, director of dramatic arts dept., has produced nearly 200 shows over WEWS and WXEL. Says Leathem: "We felt that the university will do a better job and reach more people by concentrating on producing a limited number of excellent, professionally-done programs on a commercial station than by spreading itself thin . . . What we need is not a TV station, but a TV studio, which might be connected to the commercial transmission facilities."

Sen. Johnson's attitude on educational TV was reemphasized this week when he sent FCC copy of letter he received from Syracuse U graduate student Sidney Dashefsky, who is working on master's degree in education, specializing in TV. Student describes and endorses tieup between university and WSYR-TV, wherein school has own studio and studio equipment, and students provide free production help for station's local originations. Dashefsky contends such arrangement, with one additional factor—FCC requirement that stations set aside specific times for school use—is far superior to complete operation of stations by educational institutions.

Sold on uhf, one experienced broadcaster and TV station founder-manager, who attended June 29 showings for FCC in Bridgeport (Vol. 7:26), had this to say: "I can foresee uhf as the program service the majority will eventually receive . . . I am convinced that uhf will work and that its advantages may offset disadvantages (which are mostly the distance you can get good pictures)." He observed reception in 20-mile-distant New Haven, on Zenith, RCA, Crosley and GE converters, termed pictures "acceptable" despite 15-kw radiated power (compared with FCC's proposed 200-kw maximum).

Investigation of TV-radio programs which contain "immoral or otherwise offensive matter, or place improper emphasis upon crime, violence and corruption," is called for by H. Res. 278, introduced June 28 by Rep. E. C. Gathings (D-Ark.). Bill directs House Interstate & Foreign Commerce Committee to conduct probe and recommend legislation "to eliminate offensive and undesirable" programs. NARTB-TV committee to draw up program standards (Vol. 7:25) will be named next week.

FCC was upheld by U. S. Court of Appeals this week in refusing to extend CP of city-owned WJAX-TV, Jacksonville, granted Channel 2 in August 1948 for completion by April 1949 but revoked for failure to pursue construction diligently. Court ruled Commission did not act arbitrarily in denying extension requested last July.

League of American Song Writers has been organized to protect composers of popular music and lyrics, reports attorney Robert Daru, 292 Madison Ave., N. Y.; it differs from ASCAP in that publishers are ineligible for membership.

Station Accounts: New or expanded brewery sponsorships reported during last week: Esslinger Inc., Philadelphia, feature movies, on WPTZ, Philadelphia, thru J. Cunningham Cox, Philadelphia; Terre Haute Brewing Co., Terre Haute, Ind., news and sports, on WFBM-TV, Indianapolis, and WJIM-TV, Lansing; Stegmaier Brewing Co., Wilkes-Barre, Pa., thru McManus, John & Adams, Detroit; G. Kreuger Brewing Co., New York, expanding in South, thru Charles Dallas Reach Co., N. Y.; George Wiedemann Brewing Co., Cincinnati, *Boston Blackie* series, thru Strauchen & McKim, Cincinnati; Brewing Corp. of America (Carlings beer & ale), purchases TV-radio rights to Cleveland Browns pro football games, to be placed on WXEL . . . Rudisco Inc., DuMont Albany distributor, sponsoring Fri. night *Teen Age Barn*, now in third year on WRGB, Schenectady, claims it enjoys highest rating of any local or network TV show; performers are high school and dramatic groups, glee clubs, church choirs . . . Owens-Illinois Glass Co., thru J. Walter Thompson Co., to use TV spots to promote throwaway beer bottles . . . Rockwood & Co. (mint-flavored chocolate wafers) and Quaker Oats Co. (Aunt Jemima cake mix) planning joint campaign in fall to promote use of both products in making cakes . . . American Medical Assn., in campaign against socialized medicine, reported planning to use TV as well as radio, thru Russel M. Seeds Agency, Chicago . . . Local Chevrolet dealers to sponsor 9 grid games of Loyola U, Los Angeles, on KNBH this fall, thru Campbell-Ewald; none of games is Saturday afternoon . . . Among other advertisers reported using or preparing to use TV: Dictograph Products Inc. (Acousticon hearing aids), thru McCreery, Quick & McElroy Inc., N. Y.; Aeolian-American Corp. (Knabe pianos, Aeolian pianola keyboard), thru George N. Kahn Co., N. Y.; Bachman Bakeries Inc. (pretzels), thru Aitkin-Kymett Co., Philadelphia (WPTZ); Olympic Knitwear Inc. (Tish-U-Knit sweaters), thru Sterling Adv. (WABD); Lexor Corp. (Sip-and-See straws), thru Franklin Bruck Adv. Corp. (WABD); Saratoga Racing Assn., thru George R. Nelson Inc. (WABD).

TV network and spot billings have tripled since 1949, but their total increase was only $36,000,000 while newspapers gained $54,000,000 and magazines $24,000,000 in same time. These figures by Harold S. Barnes, director, ANPA Bureau of Advertising, were cited June 27 at Newspaper Advertising Executive Assn. convention in Denver, with admonition that if they fight hard for their medium they have nothing to fear from TV. Mr. Barnes recalled radio's sensational gains in early '30s, said that in present expanding economy there's room for increased budgets in all media.

TV's inroads into newspaper classified advertising have been most serious in used car and real estate classifications. So panel on "competing media" told Montreal convention of Association of Newspaper Classified Advertising Managers last week. *Cincinnati Post* classified ad manager Larry Keller suggested TV is profiting because it is "glamor advertising," despite fact that it produces less sales and is more costly than classified advertising.

TV can be "terrific" circulation builder, Charles Staab, *Cincinnati Enquirer*, told International Circulation Managers Assn. at June 19-21 convention in Washington. He cited 6024 requests for 2 weeks free trial subscription offer made over WLWT during 3 week period, said 35% have remained as regular subscribers. Other speakers claimed TV has not cut into circulation.

More July 1 sets-in-use reported since NBC Research's "census" of June 1 (Vol. 7:25): Fort Worth-Dallas 124,148, up 3148; Utica 45,200, up 1700; Greensboro 70,808, up 1208; Memphis 87,600, up 1100; Washington 270,450, up 5450.

Bids by 4 ad agencies on behalf of potential sponsors for college football games under National Collegiate Athletic Assn.'s "controlled TV experiment" (Vol. 7:23-24) were submitted to NCAA's full TV committee in Chicago July 6. Names of agencies, sponsors and amounts bid weren't disclosed, but TV chairman Tom Hamilton indicated only one agency would be granted contract for network football TV, but other agencies may bid later for rights outside network area (beyond cable). Under NCAA plan, each market district would have 3 of 10 Saturdays when no home game would be televised, and each district would be limited to one TV game on remaining 7; each college is limited to one home game and one away on TV. Francis Murray, U of Pennsylvania athletic director, appeared at meeting at own request to explain Penn's decision to televise home games, defying NCAA plan. Notre Dame has openly opposed plan, and Justice Dept. is still investigating whether plan violates anti-trust laws.

Latest survey by Woodbury College, Los Angeles, based on 10,000 interviews in Los Angeles, San Francisco, San Bernardino, Portland, Denver and Fresno, found: (1) Subscription TV seems to be more welcome than theatre TV—with 50% to 63% (depending on city) willing to pay $1 for top movies and major events on former, while about one-third thought they'd pay $1 for theatre-TV showings. (2) In non-TV areas, desire to have TV was evinced by 57% to 62%, with 47% to 66% willing to buy sets; 55% of Portland respondents and 62% of those in Denver said they've seen TV. (3) In Los Angeles, 16.1% own Admiral sets, 13.8% Packard-Bell, 13.2% Hoffman; in San Francisco area, it's 16.5% Hoffman, 14% RCA, 13.2% Admiral. (4) Wrestling, Milton Berle and Groucho Marx are favorite shows. (5) TV's moral standards are considered somewhat higher than those of movies; about half of respondents feel TV should have equivalent of movie morals czar. (6) About two-thirds would like to see station devoted solely to educational programs. (7) About one-third find TV beneficial to children, and approximately 10% find it harmful, with mysteries considered worst offender.

Average daytime TV viewer in New York spends 10 hours Mon.-Fri. watching programs between 9 a.m.-5 p.m., according to third study on subject by Advertest Research, New Brunswick, N. J. Based on May 4-15 interviews with 765 women, study also shows: (1) Length of ownership has no effect on daytime viewing; those who have owned set more than year watch longer than those who own sets less than year. (2) Almost 95% of daytime viewers watch mostly noon-5 p.m. (3) Daytime viewer watches average of 4 hours, 23 min. at night, compared to non-daytime viewers, 3 hours, 24 min. at night. (4) Daytime TV "homes" numbered 880,750 in May, compared to 631,000 in June 1950, 147,500 in March 1950. (5) Of non-daytime viewers, 50% listen to radio during day.

Interest in community antennas (Vol. 7:2, 7, 11, 21-24) has brought Bell Telephone companies 70 inquiries concerning pole rentals, according to AT&T spokesman. He says Bell system once considered providing complete service itself, but shelved plans because of materials shortages. Competition among equipment manufacturers has grown so great that WESB, Bradford, Pa., seeking to establish service, reports it has been approached by Jerrold, RCA and Technical Appliance Corp. (Sherburne, N. Y.). Latest multiple antenna equipment offered, designed for hotels, etc., with 64 receivers or less, is RCA's SX-7C (7 channels) and SX-4D (4 channels).

WTTV's 660-ft. tower on outskirts of Bloomington, Ind., authorized recently for relay use (from Cincinnati), is intended for station itself, eventually, move to be effected whenever FCC permits. Station also plans to increase height of relay tower at Columbus, Ind.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
July 7, 1951

OUTPUT WAY DOWN BUT FACTORY STOCKS UP: Trends aren't easy to discern these summer dog-days, period of TV-radio plant shutdowns for annual summer vacations. Nor is it possible as yet to calculate, with positiveness, effects of Korean truce.

TV-radio industry is still preoccupied, at moment, with getting rid of its bloated inventory, still hoping against hope for upturn and "normal" fourth quarter.

Main encouraging sign was improvement in June retail sales -- so good for one brand manufacturer that he tells us his wholesale-retail inventories as of June 30 were down 30% in units and 36% in dollar value from low point of May 1; also that he now has virtually no factory inventory.

* * * *

But over-all picture for TV-radio trade still isn't good. RTMA this week reported production plunging to 27,109 sets for week ending June 29, just preceding start of most vacations. This was lowest week of year so far, lowest since first vacation week in July 1950.

Factory inventories climbed to new high of 723.909 units as June ended, peak of steady increase during each of the 5 June weeks: 593,633 as of June 1; 621,299, June 8; 669,950, June 15; 713,032, June 22; 723,309, June 29.

Thus 5-week June saw 304,392 TVs produced, as against 522,000 same month last year -- but last year at this time buyers took every set as fast as produced.

Radio production fell to 229,713 units (157,789 private label) week ending June 29, of which 155,549 were auto radios, 47,630 home receivers, 26,534 portables. Radio inventory June 29 was 419,002 vs. 417,153 June 22 (Vol. 7:26). June's total radio output was 1,429,493 vs. 1,539,000 in June 1950.

For first 6 months of 1951, TV production totaled 3,312,357, somewhat ahead of the 3,136,300 recorded for first half 1950. Radios were 8,374,741 vs. 7,333,600. Of 1951 TV production, 2,196,669 were produced in first quarter, 1,115,688 second, compared with 1,605,200 in first quarter last year, 1,531,000 in second quarter.

* * * *

Federal Reserve Board continues firm against any relaxation of Regulation W, but Congressional pressures may result in easier terms for TVs along with autos and other goods. House bill due for vote next week specifies down payment of 15% and 18 months to pay, which Senate-approved bill does not.

Treasury is still asking for stiffer excise taxes, citing TV as example how present 10% excise amounts to only 6% at retail level as against 17% on admissions, toilet goods, luggage, etc. House bill makes no changes in present 10% excise.

AFTER KOREAN CEASE-FIRE, WHAT? Aftermath of Korean peace could bring, in opinion of several major manufacturers engaged in both military and civilian electronics:

Period of deflation, marked by (1) stretching out of govt. contracts, and (2) continued poor civilian business.

If materials restrictions are relaxed, if materials get cheaper, then there may be cheaper TV-radio receivers. But that would be meaningless if unemployment results and buying power disappears.

Electronics industry leaders, no less than those of other arms industries, see plenty of trouble ahead for everybody if Russians are pulling tricks to get us to disarm or slow down rearmament. They go along with Defense Mobilizer Wilson, whose second quarterly report to President July 4 warned against any letdown.

Mr. Wilson reasserted that output of consumer durables "will be reduced" in third quarter, but he stated that because of high first-quarter production "supplies available to consumers during remainder of this year will still be high." He did not

mention TV or stick out his neck, as he did in last report, when he estimated that TV output this year would be 7,000,000. He said:

"Military production is still for the most part in the 'tooling up' stage -- the period during which orders are placed, blueprints drawn, subcontracts worked out, and production lines organized...

"The military production program is highly selective in character. It is heavily concentrated in those items in which obsolescence has taken the largest toll on our World War II surplus stocks -- and is therefore particularly heavy in aircraft, combat vehicles and electronic equipment. The program also emphasizes new weapons, such as guided missiles, and items for which long periods of time are required to organize production and to subcontract for component parts."

* * * *

Despite Wilson's warnings, it's generally expected that any cease fire will affect military procurement and production. Tempo may slacken a little, arms appropriations may be whittled down, since we will no longer be fighting a war on top of our rearmament effort. This could mean lesser degree of tightening of materials availability during fourth quarter -- but any actual loosening still appears to be out of the question. Some NPA officials feel best that civilian industry can hope for in fourth quarter is same amount of materials as in third quarter -- but this is pure conjecture. Less metals are likely in fourth quarter, as military programs reach the production stage.

ELECTRONICS—FASTEST GROWING INDUSTRY: Riding TV boom, electronics has leaped in 3 years to major industry rank -- and "at the rate it is going...will some day crowd the dynamically expanding chemical industry as the premier industry in the second half of the century."

Thus Fortune Magazine for July evaluates "The Electronics Era" in exciting and well-documented article.

Today, electronics sustains estimated $2.5 billion industry, says author Lawrence P. Lessing, whereas in 1940 it barely went beyond $500,000,000 [of which about $175,000,000 represented factory value of radio receiver output -- TV being then virtually non-existent].

With defense orders, factory output should be worth $5 billion next year, Fortune reckons, and "in any all-out war that would be run up to $10 or $15 billion a year, greater than the whole aviation industry and 3-4 times the electronic peak in World War II." Other highlights from Fortune article:

New electronic industries have sprung up like weeds -- as exemplified by aviation's heavy preoccupation with electronics (Vol. 7:4). One-third to half the cost of military aircraft is in electronic equipment, and aircraft firms now have "electronic orders running into the hundreds of millions...Bendix alone has backlog of $475,000,000."

But TV industry's woes are just beginning. Trade slump will be followed by lag between material shortages and defense production. Defense business this spring ranged "from less than 5% for RCA to about 25% for GE's electronics dept." And these dim prospects lie ahead for TV-radio manufacturers --

TV production will be cut "at least in half" by fall, when defense program will show its first real impact. Cut won't be forced by direct defense business, though, but "by the increasing pinch in nickel, cobalt, tungsten and steel for other defense needs and stockpiling."

Defense orders will bypass most of TV industry. "Even when defense production of electronics hits its stride -- about March 1952 -- it will not employ much more than 15% of the industry's capacity. Many makers of radio and TV receivers only, therefore, do not have enough defense orders to take up the forced cut in civilian production.

"Heavy military business has gone outside the industry proper to such specialists as Western Electric, Federal Telephone & Radio, Sperry and the aircraft companies. And the big orders in the industry have gone to such basic companies as

NAB LIBRARY

GE, Westinghouse, Raytheon, RCA and Sylvania, having engineering and research staffs big enough to handle heavy engineering requirements of military electronics."

"A tiny bombshell," says the writer, threatens technical revolution in electronics' most basic department, the tube industry. Shaking industry's foundations is the little transistor, which can be housed in cartridge the size of a pencil eraser and can do most of the things a vacuum tube does -- but with no vacuum, no glass tube, no heat required, and practically indefinite life.

"More revolutions of profound impact on industrial society" are in progress through electronics than through any other technology. Impact may be strongest in these 4 new growth areas: (a) mobile 2-way radio, (b) microwave relay, (c) industrial instruments and controls, (d) computers or "electronic brains."

Topics & Trends of TV Trade: Their passing has gone almost unnoticed—but fact is that, one by one, quite a few small TV manufacturers have quietly been giving up the ghost. Many think more will have to do so, considering hard times now facing an industry that was riding high and handsome this time last year.

In compiling directory of Television Receiver Manufacturers for our semi-annual *TV Factbook No. 13*, to be published July 15, we come up with only 91 companies claiming to be making TV sets, plus 13 TV-radio manufacturers in Canada. This compares with 98 in Factbook No. 12 of Jan. 15, 1951, well over 100 in early 1950.

No brand-name manufacturer has disappeared from rolls, but over last 6 months such names as Altec-Lansing, Natalie Kalmus, Mercury, Reeves Soundcraft, Rembrandt, Tru-Vue, U. S. Television, Videraft have disappeared as set makers, among others. None ever did cut much ice in receiver production, and Videraft was among the several which since start of year have gone through bankruptcy proceedings (Vol. 7:26).

Lists of 37 picture and 11 receiving tube manufacturers remain virtually unchanged, except for addition of Westinghouse, still making ready.

One copy of the semi-annual *Faetbook*, whose lists of telecasting stations in operation or applied for are kept up-to-date with weekly Addenda, will be sent to each subscriber to the full TV services of *Television Digest* at no additional charge. Extra copies are available to all subscribers at $2.50 per copy. Volume carries no advertising.

* * * *

RCA entry into white goods field, also other appliances, subject of published reports this week, brought statement from president Frank Folsom that "RCA is always studying new fields and new products" but that "we couldn't do anything about new lines now, even if we wanted to, in view of materials restrictions." Merchandise-wise Mr. Folsom, onetime Montgomery Ward executive, was said in reports to be looking for new items to counterbalance seasonal trends in TV-radio-recording lines.

Plant Expansions: GE announces plans for 150,000-sq. ft. electronic tube plant at Anniston, Ala., costing $6,000,000, employing 2000, to be ready early next year; tube divisions mgr. J. M. Lang said it will permit further concentration on specialized tube types . . . GE's subsidiary Precision Laboratories Inc., Irvington, N. J., July 5 announced new 20,000 sq. ft. plant about 12 miles west of Newark, 5 miles from present factory, to make metal parts for TV, radio, other tubes; it will double Irvington factory's capacity, said E. L. Hulse, mgr., components div.

Picture tube sales continue to reflect low set production rate. RTMA reports May sales totaled 229,250, compared with 278,955 in April, 608,396 in March. Value of tubes was $5,120,553; 80% were 16 & 17-in. rectangular, and 1914 were 24 & 30-in. Year's total to end of May was 2,330,998, worth $61,882,188.

Trade Miscellany: Sylvania's "mystery" picture tube device for greater viewing comfort (Vol. 7:25) may have rival in new GE picture tube promising greater contrast; secret is "transparent" phosphors heightening blacks on face of tube . . . Scott Radio third to announce 24-in. receiver (others are GE, Stromberg)—out with console called "Wellington" with proposed list of $645, including tax and warranty . . . DuMont's Ernest A. Marx, gen. mgr., receiver sales div., recently returned from TV survey abroad, is author of roundup in July 3 *Retailing Daily*, providing invaluable data to firms interested in export markets. It details transmission standards, type of electric current, currency situation in 16 different countries . . . Standard Transformer Co., 3580 N. Elston Ave., Chicago, has new TV catalog listing about 1500 models and chassis made under 79 brand names . . . Pittsburgh Steamship Co.'s 7 ore boats plying Great Lakes equipped with TV sets, tests having proved reception in many areas excellent . . . RTMA has asked Govt. to protest trade-marking of word "electronic" in Chile, being proposed by Compania Electro Industrial Ltda., Santiago, claiming it's a dictionary word derived from generic word electron.

Merchandising Notes: TV servicing eventually will be like automobile servicing, customers paying for specific jobs—and the business can be profitable under good management, sound accounting system. That was gist of June 26 NARDA convention speech by Crosley sales v.p. W. A. Blees, himself a veteran of automobile business . . . One-day "cash and carry" TV set servicing is unique setup instituted by dealer Mort Farr, Upper Darby, Pa., who is also NARDA president. Idea is to have customers deliver set on way to work in morning, pick it up on way home—saving both time and cost of transportation . . . TV dealers advertising sets not actually available for sale are liable to prosecution, says New York Better Business Bureau, quoting Markets Commissioner Masciarelli and citing recent fine of $300 against Dynamic chain for such offense. Industry was urged to adopt own fair practice rules . . . Capehart-Farnsworth's export sales mgr. A. J. Gilardi reports order for 11,000 TV sets from Compania Standard Electrica, S.A., of Argentina, also affiliated with IT&T; Capehart now appointing distributors in various Latin American countries.

Improved TV-radio sales by New York dept. stores in June were noted in monthly *Herald Tribune* survey, reporting 7 out of 11 registered increases over June 1950, with 82% best gain; it was month of New York's price war, with over-all sales gaining 14%.

New transistor, device replacing vacuum tubes for some purposes, was announced by Bell Labs this week. Called "junction" transistor, it's claimed to be capable of taking 1 microwatt, amplifying it to 1 watt.

Gates Radio, Quincy, Ill., entering TV transmitter field, will supply vhf & uhf equipment, including cameras, antennas, etc., of other companies.

Among the 100 top national advertisers in the 4 major media during 1950, according to Bureau of Advertising, American Newspaper Publishers Assn., RCA ranked 26th, spent $6,509,622 (newspapers $3,168,624, general & farm magazines $1,522,691, network radio $906,155, network TV $912,152.) Philco ranked 28th, spent $5,951,494 (newspapers $2,373,382, magazines $948,418, network radio $1,618,266, network TV $1,011,428). Admiral ranked 38th, spent $4,542,170 (newspapers $2,724,631, magazines $1,023,659, network radio $34,347, network TV $759,533). Motorola ranked 48th, spent $3,399,657 (newspapers $2,046,758, magazines $1,066,549, no network radio, network TV $286,350). Zenith ranked 92nd, spent $1,927,219 (newspapers $792,991, magazines $1,134,288, no radio or TV). Note: Foregoing does not include dealer cooperative advertising, trade papers, national radio and TV spots. GE (ranking 10th) is listed with $694,933 expenditures for network TV, $39,650 for network radio; Westinghouse (32nd), $673,920 & $152,895; Avco (45th), $270,795 & no radio—but the ad expenditures of these big advertisers cover big lists of appliances generally, not just TV-radio apparatus.

Canada's credit restrictions, like those in U. S., are blamed for slowdown in demand for TVs, with May production 75% down from April, 82% from March. Radios dropped, too, down 42% from April, 50% from March. Canada requires one-third down payment, 12 months to complete installments. According to Canadian RTMA, 1116 TVs were sold by factories for $555,257 during May, with inventory of 8335 units as month ended. Table models under $400 list totaled 305, over $400 totaled 418. Consoles under $500 totaled 34, over $500 totaled 332. TV-phonos numbered 27. Windsor area (Detroit) took 37% of May sales, Toronto-Hamilton 35%. First 5 months of 1951 cumulative unit sales were 19,577, valued at $10,752,979. Cumulative TV sales to May 31 were 57,400 valued at $27,029,562, with 43% in Windsor area, 35% in Toronto-Hamilton, 17% in Niagara Peninsula, 5% in other areas.

There's no FM receiver shortage, say manufacturers—but FM broadcasters insist there is—leading joint RTMA-NARTB FM committee meeting in Washington June 26 to agree that broadcasters will advise manufacturers when their areas run short. Manufacturers' survey showed 145,059 AM-FM sets in distributor inventories, 42,872 at factories as of May 25. During May, radios with FM turned out by factories totaled 75,337, 12% of all home sets. Demand for FM is greatest in South-Southwest. At recent Chicago furniture mart, radios were reported selling fairly well, at least by contrast with TVs, with AM-FM table models and portable radios in best demand. But console sales were down.

Color impact on trade, according to *Retailing Daily* roundup, has brought these reactions, among others: (1) Sales resistance because of color, still not very prevalent, is generally countered by salesmen who tell customer adapter and converter may be added when desired—at total price no greater (perhaps less) than that of complete color set which won't be here for some time. (2) Sales of small-screen trade-ins may improve because of presumed easier convertability to color.

Export market continues sizable factor in radio economy, amounting during April to $12,150,159 vs. $5,840,072 in April 1950, reports Commerce Dept.; included were 7545 radios at $1,291,226, 6566 auto sets at $208,991, transmitter & receiver parts and accessories valued at $1,456,424. No TV exports were listed.

Color TV imitations keep cropping up, most persistent being rash of transparent colored films offered as equipment "bringing color to TV." In Huntington, W. Va., some 1000 people crowded Frankel's Appliances Store to see devices shown by Marvel-Lens Industries, Philadelphia.

Financial & Trade Notes: Though TV business is slow and Belmont plant in Chicago has been operating at low level, Raytheon's fiscal year ended May 31 saw sales and earnings higher than for any year save during World War II. Company, moreover, has more than $100,000,000 worth of govt. orders on books, reports president Charles F. Adams Jr. Full-year sales figures haven't yet been released, but during 9 months ended Feb. 28 sales were $64,000,000 compared with $39,000,000 in same 9 months a year earlier and $59,533,000 for full year ending May 31, 1950. Despite higher taxes, net profit for year is estimated in excess of $2,000,000, compared with $935,413 (49¢ a common share) the preceding year.

Miscellany: ABC directors Wm. Zeckendorf, New York realtor, and Earl E. Anderson, a v.p., sold 2000 and 1900 shares, respectively, in May—all the former's holdings, and leaving Mr. Anderson with 6600 shares . . . P. R. Mallory & Co. sales believed to have exceeded $24,500,000 for 6 months ended June 30, reports *Wall Street Journal* . . . Avco (Crosley) has borrowed $10,000,000 to finance present and anticipated defense production, 3¾% loans to Sept. 1, 1970 negotiated with Prudential and Metropolitan insurance companies through Emanuel, Deetjen & Co. and Lehman Brothers . . . Net income of WJR, The Goodwill Station Inc. (Detroit) for quarter ended March 31 rose to $165,382 (32¢ a share) from $152,696 (30¢) for same period last year.

Glowing report on CBS by Thomson & McKinnon, New York stockbrokers, calls it "quarterback in a growth industry," says it's "calling the signals" and points to its "cornering of the Sunday night radio time with a galaxy of performers," then the introduction of LPs, color victory before Supreme Court, initiation of reduced radio time rates, acquisition of Hytron.

———■———

Production of 2,200,000 to 2,500,000 TVs during second half of 1951, making nearly 6,000,000 for year, is foreseen by Packard-Bell executive v.p. Robert S. Bell. In talk to Los Angeles Security Analysts Society June 27, he said he thought one or two good sales months could clear out "present 1,500,000 total inventory," revealed Packard-Bell has $8,500,000 in govt. contracts.

AFL Electrical Workers Union, Local 1031, has sent letter to President Truman blaming layoff of some 13,000 TV-radio factory employes in Chicago area on FCC freeze, Regulation W, lack of defense contracts.

Trade Personals: Robert Paxton, GE v.p. in charge of manufacturing policy, named executive v.p. to succeed Hardage L. Andrews, retiring after 41 years service . . . William V. O'Brien, ex-commercial v.p. & asst. mgr. of marketing policy, promoted to commercial v.p. & mgr. of marketing, GE apparatus marketing div., succeeding Chester H. Lang, now public relations v.p. . . . W. Benton Harrison Jr. named treasurer of Sylvania, succeeding Max F. Balcom, who now devotes full time to post of chairman . . . Fred Abrams, recently working on govt. contracts, promoted to head new Emerson Radio parts sales-service div., assisted by William Kay, parts dept. mgr., and Harold Bernstein, service dept. mgr. . . . Sydney J. Mass named sales mgr., Edmund D. Lucas Jr. adv.-public relations mgr., Jerrold . . . Tyler Nourse, ex-*Broadcasting Magazine*, joins information staff of RTMA, Washington . . . Charles Andress has resigned as sales mgr., Admiral-New York . . .

William C. Grunow, 58, founder with B. J. Grigsby of old Majestic Radio and in late '20s one of radio industry's first millionaires, died July 6 of heart attack in Hotel Stevens, Chicago. He made and lost several fortunes, lately has operated prosperous poultry farm at Lake Geneva, Wis.

Mobilization Notes: Sizzling report of Senate Armed Services "watchdog" subcommittee makes it clear that tungsten is one of most critically short materials, pins blame directly on Army and Munitions Board (not present board headed by John D. Small).

Explosive 55-page report, issued July 4, says nation's supply of the strategic metal used in armor-piercing shells, jet engines—and indispensable in electronic tubes—"is little short of desperate . . . The harsh, inescapable fact is that we can foresee nothing short of a miracle that will produce enough tungsten for the combined essential needs of ourselves and our allies."

Stockpiles have gone "down to the danger point" because Munitions Board failed to buy up and store adequately from July 1946 to July 1950, report says, and as a result "the United States and the free world stand on the verge of tungsten starvation." There won't be enough to go around, report predicts, even if production is increased, more efficient methods found and non-essential uses slashed ruthlessly.

Senate group estimated U. S. civilian requirements at 14-15,000,000 lbs. a year. Domestic output for 1951 was forecast at 5,450,000 lbs., imports at 7,000,000 lbs.—leaving potential deficit of 2,000,000 lbs. for civilian needs alone, not considering military or stockpile requirements at all. Far Eastern warfare cut off Chinese and Korean supplies of tungsten. Korean mines are now being reopened, but it may take years to get them back to full operation.

Report climaxes period of increasing concern by govt. control officials over tungsten situation. Tungsten pinch hasn't been felt yet by electronic tube industry because of long lead time involved in drawing the metal into filaments, but production planners who are hep to electronics industry are forecasting it will be by far most serious shortage to hit civilian TV-radio. NPA officials are predicting tube makers will really begin to feel tungsten shortage some time in fourth quarter. August allocation of tungsten to tube industry, made this week, was about the same as July's—but more of it will be used to make military tubes, less for civilian tubes. At the moment tube makers are more worried about nickel shortage than about tungsten.

"Watchdog" committee urged: (a) Prompt decision by Defense Dept. on feasibility of new process for making tungsten carbide. (b) Immediate Munitions Board authorization of tungsten metal powder and tungsten carbide stockpiling. (c) Govt. be made sole importer and reseller of foreign tungsten. (d) Program to stimulate foreign production. (e) Determination of whether custom mills and a retreatment plant are needed.

* * * *

Appeal for more copper by NPA Electronics Div., to be used for essential civilian electronic products under CMP (Vol. 7:26), was granted by DPA July 5. CMP programs in electronics industry originally had been allotted 24,360,000 lbs. of copper, but appeal provided 750,000 more. In addition, DPA shifted copper allocations from some electronics programs to others where allotments were seriously short—resulting in about 3,000,000 lbs. extra for areas of electronics industry which were short-changed by original allotments. At week's end, supplemental allotments were going out to manufacturers whose dole of copper originally had been cut to the bone. Electronic programs also were allotted 56,500 tons of steel, 13,200,000 lbs. of aluminum.

New CMP "Class B" product list, issued this week by NPA, covers more territory than old list, but still leaves much to be desired. It's supposed to be listing of all Class B (civilian type) products and components, with appropriate code numbers and NPA industry divisions, for use by manufacturers filling out CMP forms for fourth quarter. Added to list, assigned to Electronics Div., are radio and TV transmitting and receiving antennas, aural and video link and relay equipment, radiosondes, antenna rotators, TV boosters, TV focus devices, deflection yokes, commercial recording turntables, radio frequency converters (including uhf converters). Color converters and adapters aren't listed, but are expected in next revised list. Intercommunication equipment has been transferred from Communication Div. to Electronics Div. Telephone and telegraph radio relay equipment is listed twice—under Electronics and under Communications Div., where it appeared in last list. NPA officials say latter listing is erroneous.

No certificates for tax aid were granted for expansion of electronic production facilities week ended June 29, but DPA did issue authorizations for rapid amortization in these related fields: Molded Insulation Co., Philadelphia, for production of cable connectors and radiosonde equipment, expansion estimated at $370,000, of which 75% will be written off in 5 years for tax purposes; Curtiss-Wright Corp., Caldwell, N. J., flight trainers, stimulators, radio aid units, $70,137 at 85%; Helipot Corp., South Pasadena, Cal., potentiometers, $53,623 at 85%; GE, Schenectady, research and development, $41,000 at 75%; Buck Engineering Co., Freehold, N. J., oscillators, $4247 at 85%.

Technical and scientific laboratories can assign themselves priorities to obtain small amounts of critical materials under NPA Order M-71, issued June 26. Order also makes provision for NPA assistance to laboratories requiring larger amounts. NPA said this action doesn't permit use of materials acquired under the order for making trial production runs of experimental models, or for "experimental models to be distributed for promoting sales or creating consumer demands."

About 50% of the cobalt required in jet engines can be saved by substitution of more plentiful alloy as result of conservation program by National Advisory Committee for Aeronautics, Defense Mobilizer Charles E. Wilson revealed in second quarterly report on defense program. TV-radio industry is now using cobalt (speaker, focus magnets) at one-fourth last year's rate.

How to form production pools—groups of small businesses pooling facilities and know-how to obtain defense contracts—is detailed in new DPA booklet, *Production Pooling for Defense.* Advantages and disadvantages of pools and immunity from anti-trust laws are also treated in pamphlet, available from Commerce Dept. field offices.

Common questions about CMP are answered in new booklet, *Questions and Answers on the Controlled Materials Plan*, available from NPA and Commerce Dept. field offices.

Philadelphia Signal Corps Procurement Agency has moved to 225 S. 18th St.; New York regional office now at 180 Varick St.

———■———

Those ancient light bulbs—unfrosted, with pointed tips, straight filaments—which went out of manufacture about 1925, seem to be "naturals" when it comes to causing TV interference. Number of engineers have called attention to them lately; but it's hard to tell how important they are. Bulbs are generally in attics, basements, closets, etc., where they get infrequent use. In any event, it's easiest type of interference to stop—by replacement.

Three-dimensional TV—suitable for black-and-white or color—is claimed as one application of new stereoscopic movie film developed by Air Force Maj. Robert V. Bernier, demonstrated June 3 at Wright-Patterson Air Base. Spectators wear Polaroid glasses to view picture, but unlike other 3-dimensional film systems, Maj. Bernier's invention uses single conventional movie projector.

Telecasting Notes: Advertising Council is preparing campaign, including TV, seeking 25,000,000 membership and $3,500,000 funds to support Crusade for Freedom—theme being "Help Truth Fight Communism." Bakelite's Allen Brown is serving as volunteer coordinator, with Hewitt, Ogilvy, Benson & Mather as volunteer ad agency . . . Springfield, Mo., getting some "fringe" service from Kansas City, 147 miles away, will have TV applicant shortly—Springfield Television Inc., formed by Lester E. Cox and *Springfield News* and *Leader & Press* (KGBX) . . . "Banks Now Open to TV Loans," reads headline in June 29 *Hollywood Variety*, which relates that big Bank of America, once chary of financing TV deals, now is amenable. Story refers to TV film production, which it says bank is already financing . . . New York Board of Education joins with WPIX to present vocational guidance and home industries series titled *The Living Blackboard*, starting about Oct. 15; it's estimated by board that there are TVs in homes of 80% of students prevented from attending school by illness or physical disabilities . . . CBS-TV and Blatz see no grounds for squawk of National Assn. for Advancement of Colored People that new all-Negro *Amos 'n' Andy* film show (Thu. 8:30-9) depicts Negroes in derogatory manner—alleged in resolution passed at Atlanta convention last week. First performance drew accolade from critic John Crosby, who called it "darned good comedy show," though he doubted it would go 25 years, as did radio show . . . Republic Pictures' first releases to TV will be 200 full-length films, half being Roy Rogers, Gene Autry, Red Ryder westerns, reports July 7 *Billboard*. Legal action taken by Rogers to halt releases (Vol. 7:26) has led Republic to promise to indemnify sponsors and agencies . . . Los Angeles Superior Court jury, after month's trial, on July 3 awarded $800,000 damages to John Masterson, John Reddy and John Nelson, producers, upholding contention KLAC-TV's *Wedding Bells* plagiarized their radio show *Bride & Groom* . . . Walter Winchell being kinescoped during current ABC radio broadcasts to work up suitable TV format . . . WXEL, Cleveland, adding 11,000 sq. ft. to studio-transmitter building at Parma, O., including 45x50-ft. studio 2 stories high; also planned are downtown offices and small studio in $500,000 expansion.

Proposed sale of WOW & WOW-TV, Omaha, is being kept closely guarded secret, pending inquiry by principals into feasibility of $2,500,000 purchase in light of 19-year-old leases on physical properties held by Woodmen of World Insurance Co. Only thing divulged is that Tom O'Neil recently looked over plant with view to buying for General Tire's Yankee-Don Lee string, to which Los Angeles' KFI-TV was recently added (Vol. 7:23), but he's not now involved. President of WOW Inc. is Francis P. Matthews, recently Secy. of Navy, newly appointed Ambassador to Ireland. Estate of late John Gillin owns 25%.

Hibbing, Minn., iron ore capital, seeks TV outlet in sole application filed this week—by Head of Lakes Broadcasting Co., which operates WMFG, Hibbing, and WHLB, Virginia, Minn., as well as WEBC, Duluth. Channel 10 is sought. Same interests (Morgan Murphy-Walter Bridges) also have applied for TV in Duluth and Madison, Wis. (WISC). FCC this week also got request from John L. Booth interests asking for Channel 3 instead of Channel 8 in Saginaw, Mich. (WSGW). [For further details, see *TV Addenda 12-Z* herewith.]

"Plenty of buyers" for AM properties reported by brokers—but not nearly as many for sale as TV impact would portend, they say. Latest reported deal is for WCOL, ABC outlet in Columbus, O., with Airtrails Inc. as purchaser. Airtrails is headed by Secretary of Commerce Charles Sawyer, who owns WING, Dayton, and WIZE, Springfield, O.

Ex-CBS director Isaac D. (Ike) Levy met this week with RCA president Frank Folsom, just before Levy sailed for Europe July 3 to arrange for more film footage to be handled by Official Films Inc., of which he's chairman. Levy has sold all his CBS stockholdings (some $3,000,000 worth), is now devoting entire energies to his film production and syndication project—convinced future TV programming is primarily dependent on film (see Film Trend to TV Looks to More Stations; Vol. 7:22). On that score, he and Folsom found themselves in agreement, despite fact RCA owns NBC-TV network; also noted was fact RCA chairman Sarnoff holds similar views. Like ABC and CBS, NBC has acquired Hollywood property with ultimate object of producing films as well as live shows for TV.

"Future fabulous, present painful" is how *Wall Street Journal* sizes up young TV film production industry in July 5 Hollywood-dated article. Bank of America official is quoted as saying he's counted 250 films made by shoestring enterpreneurs "which never even got a good nibble from a buyer." Networks and ad agencies are cool to small producers, and one of biggest obstacles is present low TV advertising budgets: "Last year advertisers spent a total of $162,000,000, on TV, about one-ninth of the amount movie-goers laid down at the boxoffice." TV film folk are anxiously looking to freeze-end and new stations, meaning wider field of syndication, but bankers who are financing the small film companies are still dubious whether new film industry will ever pay, article says.

Number of movie theatres actually increased from 19,094 to 23,120 since 1948, or during period of TV's greatest growth, impelling Arthur L. Mayer, executive v.p., Council of Motion Picture Organizations, to state reports of adverse impact of TV are "entirely erroneous." Recent theatre closings, he said, were small, marginal operations, more than offset by new openings, especially of drive-ins, actually increasing today's total seating capacity. "With a weekly attendance estimated at 60,000,000, picture theatre operators are mystified by the repeated assertions that their business faces a dubious future," said Mayer. However, he said he must admit that "the competitive forms of entertainment have made inroads and the battle for the entertainment dollar is very severe."

Assurances, once again, from United Paramount Theatres' president Leonard Goldenson that proposed merger with ABC (Vol. 7:21) does not mean ABC radio operations will be vitiated: "While it is TV that holds forth the promise of growth," says his letter last week to stockholders accompanying proxy calling July 27 ratification meeting, "we believe that radio, adapted to the new competitive conditions arising from the expansion of TV, can and will continue to be a vital and popular medium of entertaining and informing the public, as well as being a profitable business investment."

U. S. film transmission, up to now inferior to British because of fact latter's TV system has 25 frames (very close to film's 24), should show great improvement if Bell Labs new scanner gets wide usage. Scanner employs 2 electronic servos to eliminate jitter and flicker, produces picture that is "very, very good—better than anything on the air today anywhere," according to *Electronics* editor Donald Fink. July issue describes equipment which Bell plans to license others to build.

Screen Actors Guild defeated Television Authority July 3 by total vote of 438 to 48 in 6 contested NLRB elections in Los Angeles. Results also cover some production in New York. Vote by studios: Apex, SAG 123, TVA 6; Bing Crosby Enterprises, SAG 76, TVA 15; Cisco Kid Pictures, SAG 42, TVA 3; Hal Roach Studios, SAG 41, TVA 4; Jerry Fairbanks, SAG 68, TVA 12; Flying A Pictures, SAG 89, TVA 8.

YOUR TV FACTBOOK No. 13 IS READY: Subscribers to our full TV services are receiving, via first-class mail herewith, 13th (July 15) edition of our semi-annual TV Factbook -- a compendium which has become the standard reference guide of the telecasting, TV manufacturing and related industries. Its 96 pages compare with 72 pages in edition preceding (Jan. 15), and these are the major new features:

(1) Analysis of The 162 Most Important Markets of the U.S., showing TV outlets, if any; population, dwelling units, retail establishments, retail sales volume. Tables prepared from study by J. Walter Thompson.

(2) FCC's proposed new VHF & UHF allocations by states & cities and by channels. Educational channels and proposed station shifts indicated.

(3) Directories of Engineers and Attorneys Specializing in TV.

(4) 34x22-in. wall map in color, showing present TV areas and actual and projected coaxial-microwave network routes, 1951-52.

All former directory & reference sections are continued, brought up-to-date -- such as latest rate cards, facilities, personnel of the 4 TV networks; digests of rate cards with personnel and data about the 107 existing TV stations; listings of Latin American & Canadian TV stations, actual and projected; details of 416 pending (frozen) applications for new stations; directories of the 92 TV set manufacturers, the 13 in Canada, the 38 CR tube and 12 receiving tube manufacturers, the 27 makers of TV transmitter and associated equipment.

There are also list of 465 firms offering films and other program services to stations; directory of TV station sales representatives; and miscellaneous other listings such as ownership of stations by newspapers, networks, etc., experimental stations, trade associations and groups, labor unions, etc. TV-radio production by months since 1946 and latest count of TV-sets-in-use by areas are chronicled.

Extra copies of the TV Factbook cost subscribers $2.50, non-subscribers $5.

COMPATIBLE COLOR—LITTLE DOUBT NOW: Compatible color took giant stride back to FCC hearing rooms this week when RCA presented series of New York demonstrations, which left little doubt that its promises of 2 years ago have been fulfilled. Reactions of press, industry and public (see roundup of views, p. 4) should make that clear. The questions which immediately arise, however, are these:

(1) When will FCC reconsider a compatible system?

(2) Who will take it to Commission -- RCA or NTSC?

(3) Can CBS system entrench itself before FCC reopens the color issue?

First and most important criterion -- color fidelity, trueness to life -- is about tossup between RCA and CBS at this stage of game, in opinion of average lay observer. RCA's remarkable skin tones are generally balanced against CBS's "more brilliant" colors.

Clamor for "side-by-side" comparison of systems has arisen on part of newsmen and industry observers alike -- spontaneous evidence that over-all quality of

Copyright 1951 by Radio News Bureau

the systems strikes most people as comparable today, even forgetting potentials.

RCA obviously learned from CBS's mistakes in showmanship. Demonstrations were half-hour or less, no more than couple minutes for each bit, no commercials. Featured were singer Nanette Fabray, dancer Ray Malone, Howdy Doody, George Burton and love birds, South American singer Yma Sumac.

Smooth switching between 2 cameras enhanced program, demonstrated system's stability. Color remained exactly same with both cameras.

Ace card was remote pickup from swimming pool at Palisades Park, N.J., microwaved on 7000 mc across Hudson, with Buster Crabbe and girl swimmers. Obviously, this was to show FCC that its fetish -- "RCA can't do a remote because its system is too delicate to trust out of the studio" -- is unfounded. Proof was conclusive.

RCA's other major pitch was compatibility. With big July 8 ads in New York papers, it invited viewers to report on quality of black-and-white reception of its color transmissions. According to RCA, NBC switchboards were jammed with calls attesting to excellence of reception. If home viewers saw what we did in studio, they enjoyed better monochrome pictures than they've ever seen. By week's end, RCA-NBC said more than 8000 enthusiastic calls, cards and letters had been received.

* * * *

Our own evaluation of RCA color quality is as follows:

Color fidelity was generally excellent, skin tones perfect. Buster Crabbe's suntan looked like a suntan. CBS's colors are sometimes more brilliant. RCA claims they're unnaturally "garish". This is purely subjective. Some people like color "brighter" -- "natural" or not. Other preferences tend to "softer" values. But everyone insists on proper skin tones.

Saturation of colors, or "brilliance," may be varied to suit taste, according to RCA engineers. It's a matter of adjusting "chroma" controls.

CBS's pictures are "crisper" on closeups. RCA's give much more detail on long shots. This may well be because of difference between tri-color tube, with its dot structure, and CBS's rotating filters.

Systems should be compared with tri-color tube on both. It's manifest that relative "brilliance" and "sharpness" would then be clearly demonstrated.

CBS now has 3 tri-color tubes, got them from RCA as licensee for receivers, tubes, transmitters. But it's mum on whether tubes have been tried out -- though its Hytron officials have stated they also are working on tri-color tube. Delegation of 20 CBS topkicks saw RCA pictures July 13, had no comment. Included were Messrs. Paley, Stanton, Murphy, Goldmark, Lodge, Coffin, Cogan, Rosenman, Salant.

With color fidelity a close race between the two systems today, real superiority of compatible system comes to fore -- completely aside from basic issue of compatibility. There's no flicker, no breakup, no fringing -- plus vastly greater resolution and almost unlimited brightness ceiling. RCA hasn't yet reached optimum brightness, but there's nothing in system to stop it.

Use of tri-color tube with CBS system may help its flicker-brightness problem somewhat, but "breakup" -- those color flashes which appear when eye sweeps across screen -- is inherent in system, terribly annoying to many people.

* * * *

RCA used 5 receivers during thrice-daily showings in Radio City's Johnny Victor Theatre -- 3 color, 2 black-and-white. One color set had 16½x12½-in. picture in 21-in. envelope. Other 2 color sets displayed 12x9-in. pictures within 16-in. envelopes. Black-and-white sets were 14-in.

Show at 10 a.m. was Channel 4 broadcast, but 2 & 4 p.m. demonstrations were on closed-circuit (though fed through small transmitter to simulate broadcasts), because of FCC time stipulations on experimental license.

RCA president Frank Folsom opened program with these assertions:

"We were never more certain than we are now that a compatible, all-electronic color TV system is in the public interest...Compatible color can be logically introduced into TV broadcasting with advantage to everyone and loss to none...We at

RCA are convinced that an all-electronic, fully compatible color TV system will be the ultimate public choice."

Demonstrations were out of lab scientists' hands. RCA Victor built sets, NBC personnel did programs under engineering supervision of O. B. Hanson, NBC v.p.

Brunt of penetrating questioning by newsmen was carried by RCA labs research v.p. Dr. Elmer Engstrom. Two principal facts emerged from sessions with newsmen:

(1) Cost of receivers, at this stage of development, is RCA's most vulnerable spot -- perhaps only vulnerable spot -- in light of FCC's detailed criteria for new color systems (Vol. 7:24). Dr. Engstrom wouldn't conjecture as to prices, but unhesitantly admitted color sets currently employ 54 receiving tubes. Mr. Folsom rose quickly to call attention to history of black-and-white -- how RCA's 10-in. 630-TS started at $375, came down to $139 before it was eliminated from line.

One RCA engineer had this to say privately about costs: "I think that previous demonstrations showed we moved too fast in trying to reduce the number of tubes. Reaction to these pictures indicates that picture quality comes first."

(2) RCA will play by ear the "political" aspects -- when and how to reapproach FCC. Dr. Engstrom said RCA system "goes straight down the road laid out in National Television System Committee's report."

* * * *

Obviously, RCA is quite jealous of its work, though acknowledging with reluctance the contributions of others such as Hazeltine. Just as obviously, Hazeltine's work has been very important. Also quite apparent is fact other RCA competitors have pride in their own work, would like a "piece" of ultimate system. Philco is said to be particularly eager to get some of its ideas across.

There's considerable misunderstanding about compatible systems. RCA's is now simultaneous, whereas it was dot-sequential when first introduced. Yet Dr. Engstrom says it's still basically the same, asserts that original color sets would operate on today's signals with only slight alterations allowing sets to "recognize" oscillating color sequence (Vol. 7:18).

NTSC hasn't yet fixed on complete system, yet it has agreed on same fundamentals employed by RCA. Most of NTSC's current work is directed towards setting exact "numbers," whether sampling frequency should be 3.58 mc or 3.99 mc, etc.

Dr. Engstrom also disclosed that:

(1) "Good progress" on single camera tube has been made.

(2) Larger tri-color tubes are in works. The 21-in. has 800,000 dots, as compared with 600,000 on 16-in. Projections 6x9 ft. have been accomplished, using 3 tubes, but home projections are not in immediate prospect.

(3) CBS system has been received on tri-color tube, but Dr. Engstrom said he didn't think he should comment on results. He did indicate CBS sets become more complicated with use of tube.

* * * *

No one knows where RCA system goes from here. After vacations, system will be shown to public, probably in larger quarters, with more sets, probably also in Washington where FCC and other public officials can view it.

Coaxial and microwave network feeds will then be made. Other field tests are scheduled -- mainly to refine receiving and transmitting apparatus.

What FCC thinks of system, which it hasn't seen since April 1950, isn't revealed by any commissioner. Commission hasn't yet been invited to showings, but RCA spokesmen said "they'd be welcome."

Has FCC hinted disapproval of public demonstrations? Mr. Folsom answered: "We'd be very much surprised if anything limited field testing." Actually, some commissioners have expressed concern over demonstrations, but many observers think FCC would be putting itself over a political barrel if it appeared to be hampering developmental work.

Intense as feelings have been, rigid as FCC may be in demanding adherence to criteria, even considering natural human inclination to "save face" after deci-

sion so overwhelmingly unpopular with the industry -- nevertheless, a vindictive attitude isn't likely to prevail among FCC majority. If it did, Sen. Johnson should be first to scotch it. This is clear in his statement in July 11 Variety. After praising FCC for choosing CBS system, he said:

"I was not surprised to read the statement issued by the Commission on June 11, which indicated again in no uncertain terms that it was not closing the door to further experimentation in the art...This should dispel once and for all the contention that the Commission is stifling progress by adopting standards...

"The Commission has no right under the law to foreclose the public from the fruits of progress in the TV art and the Commission will not attempt to do so. So from now on may we have less kicking up dust and more sweat in the laboratories. The public deserves the best -- now; not a lot of talk about 20 years from now."

A rapt viewer was David Lilienthal, ex-chairman, Atomic Energy Commission, now a consultant to RCA and other companies. He saw first demonstration, said he thought pictures superb, was convinced "march of science" cannot be halted by any govt. fiat. He said he thought tri-color tube greater development than atom bomb in that it offered boon to mankind.

* * * *

CBS's course is tougher than ever. Simply put, its future depends on production and acceptance of color sets. Mass production of such sets appears further away than ever, as major manufacturers (whose top executives viewed this week's showings) went all out in their praise of RCA's pictures.

CBS's stake in black-and-white has increased many-fold since it acquired set-manufacturing subsidiary Air King (now CBS-Columbia Inc.). It cannot afford to kill off black-and-white sales until it's certain color sales will replace them.

As if to emphasize this factor, "CBS-Columbia" brand this week announced 2 new black-and-white models -- 20-in. table at $299.95, 20-in. console at $469.95.

Sears, Roebuck, a prime private-label customer of Air King, created some stir with demonstration of color set at Brooklyn store. Said TV-radio manager A. T. Chameroy: "Frankly, we don't know what public reaction [to buying it, when ready] will be. We're in the merchandising business. We're out to sell goods. FCC approved the system, and we want to know whether these sets will sell." He added:

"I saw RCA's color this week, and I think it compares with CBS's. We'd all like to see a compatible system, but I don't know whether the RCA set could be produced at a reasonable cost. I have no doubt that the ingenuity of the manufacturers could make it simpler and cheaper eventually."

CBS affiliates aren't sticking necks out in clearing time for color. Washington's WTOP-TV, 45% owned by CBS, is adding Saturday horse races (Vol. 7:27), but still carries only 10-11 a.m. daily show, has no plans for afternoons. Station has one color set making rounds of dept. and appliance stores, one week at each place.

Things are about same in Baltimore, according to WMAR-TV director E.K. Jett. Station has only one set, gets good-sized enthusiastic crowds. Color schedule remains 10:15-11 daily, no plans for afternoon or Saturday shows.

One of CBS's most color-conscious affiliates -- WAFM-TV, Birmingham, will shortly join color network. President Thad Holt reports that test programs are now being received, that station will telecast half-hour morning show and feed afternoon program to dept. store by relay -- as soon as it gets sets and CBS approves.

RCA COLOR—PRESS & INDUSTRY OPINION: Pressure of public opinion on FCC appears destined to grow many-fold as result of RCA's week of successful color demonstrations, plus public demonstrations promised after summer vacation hiatus. It's apparent now the issue will only be resolved if and when --

(a) FCC approves compatible system, RCA's or NTSC's or anyone else's that measures up, to parallel or supersede FCC-approved CBS system, or

(b) Mass demand and production for CBS-type receivers indicate that system has really won popular approval.

It was RCA's inning this week in the battle that has rocked the industry -- and, some think, helped cripple the TV set market -- since FCC's decision last fall. Now, it's up to public, the real arbiter. Industry at large has never had doubts that compatibility was basic -- but big question always was whether CBS and FCC had more accurately than industry gauged public "hunger" for color-in-a-hurry.

RCA's publicity mills, grinding as fast this week as well-oiled ones of CBS, claimed public reaction to compatibility has been overwhelming. It released many quotes from set owners who were invited in newspaper ads to report observations. This was typical:

"Excellent. If I hadn't read about it in the papers, I wouldn't have known the difference between your color broadcast and others. Very clear. I will never go through with the adapter, converter, etc. expense. Keep up the good work because I am sure millions are with you."

Quotes from newsmen and industry leaders, for whom the demonstrations were staged, offer some searching evaluations. Newsmen were particularly objective:

* * * *

NEW YORK TIMES (Jack Gould): "Sufficient improvements appeared to have been made in the RCA method to make difficult a direct comparison [with CBS system]. Many observers...expressed the opinion that the color controversy had reached the point where only a side-by-side showing...would be pertinent.

"RCA system had a decided edge over the CBS method in the reproduction of flesh tones. Its blue and green hues also seemed superior to the CBS equivalent seen last week, but the RCA red lacked the warmth of the CBS red...RCA system enjoyed marked freedom from flicker and it was possible to turn away from the screen without the persistence of vision 'taking along' patches of red, blue and green."

NEW YORK JOURNAL-AMERICAN (Jack O'Brian): "[CBS's] system presents a slightly richer definition of color -- at its best. RCA's has somewhat lighter definition, but many neutral viewers consider that a help rather than a hindrance. They feel the deeper, more vivid tones are tougher on the eyes over any sustained period; even half an hour...No 'flare' dazzled uncomfortably when eyes were pulled away from the picture itself, as [CBS's] tinted TV unfortunately does."

NEW YORK HERALD TRIBUNE (Joseph Kaselow): "Most observers agreed that the color was highly acceptable, with some minor reservations.

"It was not so bright or sharp as the CBS color, and a critical eye could detect a bluish haze over the picture at times. Also the color receivers were 'prototypes' of what would be commercial sets under the RCA system, and had 54 tubes as against 25 or 30 in standard black-and-white sets, making for a bulky receiver. However, flesh tones were good and there was no 'running' of colors."

* * * *

ASSOCIATED PRESS: "The quality of RCA's color compared favorably with that of the CBS...To a layman, it appeared to be not quite so vivid and warm as CBS color but to have a slight advantage in producing flesh tones.

"Also, it was less distracting to watch directly on the face of the RCA tri-color tube than the CBS color, which is viewed through a magnifier and a motor-driven color disc in front of the picture tube."

WALL ST. JOURNAL (Eugene Smith): "The rapid motion [was] caught clearly by the cameras, with no apparent distortion or 'bleeding' of colors.

"A bluish-green haze was especially noticeable in the more distant shots and, with no familiar objects for comparison, most colors appeared in pastel tones, except in close-ups...

"Shots of Buster Crabbe...appeared against a completely colorless sky and near-by trees took on completely black coloring."

RETAILING DAILY (Martin Rosenblum): "Major improvement...was the absence of smear when a subject on the screen moved quickly. However, by and large, the pictures in color appeared hazy, and at times, lacked adequate detail. The colors them-

selves were not as bright and vivid as those produced [by CBS]...In an outdoor scene, the colors didn't appear to be true, with trees in the background much darker than nature has made them. The blue sky was washed out and at times appeared green."

NEWSWEEK: "RCA showed a picture that, compared with CBS's, seemed to have a greater color fidelity (blues rarely turned into greens), less reflection (skin tones were a mite better) and, to the layman's eye, was a little softer."

* * * *

VARIETY (George Rosen): "Vast improvement...So much so, in fact, that to the casual viewer...it suggested anew that the ever-recurring RCA vs. CBS controversy could conceivably be headed back to the FCC's doorstep for re-examination and re-appraisal...

"Despite the unquestioned refinements achieved in the past few months... there were equally apparent weaknesses and drawbacks in the transference to tint, with occasionally not much more than a pastel quality brought to screen surface."

BILLBOARD (Joe Csida): "If Frank Folsom and his RCA gang are able to deliver the same color and monochrome signal when these field test electronic, compatible shows are carried on Channel 4 in New York -- and later in other cities on the cable -- as it delivered at this closed-circuit preview, CBS and its field sequential adherents are in for the struggle of their lives.

"The color picture ranged from fair to excellent, with more than 75% of it in the latter category. The black-and-white picture...was far better than any monochrome this reporter has ever seen."

WASHINGTON POST (Sonia Stein): "After last Monday's showing, I'll acknowledge that RCA has color -- which it could produce for mass use sometime in the future for some unknown price. The color it produces is no better than, and probably not as good as CBS color. That RCA can produce an acceptable black-and-white picture from a color show is important, but obviously more important to other people than to me...Monday's press demonstration...indicates that RCA [is] now able to produce colors which appear as natural to the viewer as do the CBS colors -- at least until the viewer begins to wonder why there's so little clear yellow in the RCA color pictures. Since color memory is considered by experts to be among our shortest, it is hard to carry the true subtleties of both systems in the mind's eye very long."

WASHINGTON STAR (Harry MacArthur): "Might be called the best color TV yet seen...Flesh tones are about the only hint you have when you see only the picture, and those seen yesterday [were] the most natural, most life-like yet seen.

"Another hint of the RCA system's color fidelity could be seen during the outdoor scenes, when the camera picked up a row of breeze-swept trees in the far background. The deep green of the foliage and the pale green of the underside of the wind-turned leaves were as true-to-life as any you ever saw without looking at a real tree."

* * * *

Reaction of manufacturers was one of unrestrained enthusiasm. They grinned throughout programs, erupted into spontaneous applause after the demonstrations. Generally, they feel faith in industry engineers has been vindicated. Some opinions, as gleaned by ourselves and other reporters after several of the demonstrations:

PHILCO: "This is terrific," said president Wm. Balderston, "It's out of this world." Chairman Larry Gubb nodded agreement, and TV-Radio Division president Larry Hardy remarked: "Tremendous progress, tremendous." Could you sell this sort of thing? he was asked. "Darn right," he replied.

Philco engineering v.p. Leslie Woods said: "This is a remarkable progress report. There are still some obvious defects, but none that are insurmountable." Executive v.p. Jimmy Carmine was less restrained: "This is 10 years ahead of a year ago. The long shots today were clear. No 25-cycle flicker. No color breakup. The CBS pictures are often off focus, with only its closeups really clear. There is no question but that electronic TV can be fully perfected."

DuMONT: Always bluntly outspoken, Dr. Allen DuMont asserted, "This is on the right track. Columbia now ought to pick up its marbles and quit. This is better than CBS right now. It's good enough to start commercial operations immediately."

DuMont research chief Dr. T.T. Goldsmith said: "RCA has done a wonderful job in getting a color TV camera into the field for remote shots. It's a real step forward. I was impressed by the brightness, definition and fidelity of the big 21-in. tri-color tube...great promise for the big-picture, direct-view tube of the future."

HAZELTINE: "This is a great step forward," said president Jack Binns. "The color is very good, particularly the rapid motion, and there was no color breakup at all. The compatible color system has got to win for it is in the public interest." Engineering chief W.A. MacDonald was also enthusiastic, said added refinements will make it impossible to reject an electronic system.

MOTOROLA: "I'd have no hesitancy," said president Paul Galvin, "in marketing this color receiver now. From a picture standpoint, I feel it is ready for the FCC, but I haven't spoken to my engineers as yet." Said v.p. Robert Galvin, "I was very pleased. The color pictures were excellent and the black-and-white fine."

GENERAL ELECTRIC: "Excellent," said Dr. W.R.G. Baker. "Not only the color but the black-and-white was outstanding." He made it clear, though, he thinks an all-industry system, endorsed by NTSC, is what finally should be brought to FCC.

CROSLEY: Radio products manager W.H. Myers remarked on the "tremendous improvement" over the last demonstration. "This is unquestionably the best color show I have ever seen. We should get it out to the public as soon as we can."

EMERSON: President Benjamin Abrams thought show "very good and ready for the FCC right now." But, he added, "I'd like to see the two systems side-by-side."

HALLICRAFTERS: Executive v.p. Ray Durst said, "We thought it was particularly good, especially the high fidelity during rapid movement. Compatibility is the thing that impresses us the most." Sales chief R.J. Sherwood said: "Remote control pickup and the tremendous action, with the colors staying true, were remarkable performances. Anybody who doesn't like compatible color needs his head examined."

* * * *

There were others too numerous to chronicle, including veteran parts makers like Leslie Muter and Robert Sprague, past and present RMA leaders -- and their enthusiasm was unrestrained.

Some of the truly "forgotten men" of the color controversy, the telecasters, vitally affected but staying out of the controversy so far, attended several demonstrations. Telecaster reaction was almost universally enthusiastic, too, but with their traditional wariness of FCC they didn't want to be quoted. For list of those attending, see page 10.

THEATRE vs. HOME TV—BATTLE JOINED: TV set manufacturers struck back this week at theatre TV's threat to deprive them of one of their biggest selling points -- top-notch sports events in the living room.

Nine major set makers, under the aegis of sports-conscious DuMont Network, snatched video rights to July 18 Ezzard Charles-Joe Walcott heavyweight championship fight from under noses of theatre interests.

Riding high on the heels of 3 highly successful exclusive theatre-TV bouts (Vol. 7:23-26), each of which cost them a token $10,000, theatre interests upped the ante to bid $65,000 for the championship event in Pittsburgh.

But set makers, through DuMont, bid $100,000 for TV rights -- with another $50,000 paid by Pabst for radio rights (on CBS). International Boxing Club, which turned down big money from prospective TV-radio sponsors for last 3 fights -- and in return received a less-than-expected compensatory hike in gate receipts -- apparently couldn't resist the higher bid.

Theatre interests, looking to 18-theatre hookup for the bout, evidently felt it was their turn to lose money when they made the $65,000 offer -- since 18 theatres would have to charge close to $2 admission to pay for TV rights alone, not to men-

tion regular expenses, film rental (if movie is shown along with fight), cable and technical costs -- or the little matter of profit.

Latest shot in battle of free-TV vs. fee-TV was admittedly an attempt by set makers to hypo sagging sales by assuaging fears of sports fans that prime sports events had been removed forever from the armchair arena.

Bout will be carried by 40 TV stations, with Pittsburgh and Johnstown, Pa. blacked out. Participating in sponsorship will be Admiral, Crosley, DuMont, GE, Motorola, Philco, RCA, Sylvania, Westinghouse.

Now the battle has been joined, TV manufacturers are looking for other big athletic events to "buy away" from the theatres. Both home and theatre-TV promoters have their eyes on September's Joe Louis-Ezzard Charles and next Randy Turpin-Sugar Ray Robinson matches. Bidding should be spirited.

* * * *

Another facet of theatre-TV-vs.-home-TV bears watching: Rivalry for network cable-microwave facilities. If and when theatre-TV webs are firmly established, home TV networks are going to find it harder to clear time with AT&T's long lines.

Conflict for cable is inevitable, AT&T spokesman told us. "In many cases," he said, "we're now allocating time among the 4 networks. If we have 5 or 6 customers for those facilities, it will mean less time for each of them until we can install more facilities -- and that takes time."

Surge of orders for theatre-TV equipment was one result of successful boxing shows. RCA reports well over 100 orders, with "very big pick-up" following theatre-aired bouts. RCA ran double-spread ad in July 14 Motion Picture Herald, pointing to success of theatre bouts and advising: "Order your RCA theatre TV...NOW."

New equipment is being developed to supply growing demand of theatres, large and small, for projection TV. General Precision Laboratory, long a strong proponent of Paramount's film-relay TV, this week announced new direct projection set. And Skiatron (Subscriber-Vision) president Arthur Levey says he'll have "Theatre-vision" projection units to rent to small houses within a month.

'END-THE-FREEZE' DRIVE IN HIGH GEAR: FCC whipped out 3 TV allocations actions this week, did much as expected by:

(1) Proposing to drop oral hearing (Vol. 7:25-27), thus hasten freeze end.

(2) Giving TV 470-500 mc band, making total of 82 channels -- 12 vhf, 70 uhf.

(3) Reaffirming its legal authority to fix allocation plan, city-by-city and channel-by-channel, in its rules, subject to change only by rule-making procedures.

Deletion of oral hearing isn't final yet, is still "proposed". What FCC did was to call July 20 formal pre-hearing conference of parties or their attorneys to see whether there's overwhelming support for plan.

So far, only NARTB-TV (Vol. 7:27) and handful of parties have petitioned for new procedure. Commission wants more, fears being tagged "arbitrary" unless opposition is miniscule.

If FCC considers support inadequate, it says it will go ahead with oral hearing, as planned, to start on July 30 instead of previously-set July 23.

Commission will be open to suggestions during conference, but it obviously considers its plan a good one. In essence, plan would permit all parties who have filed comments so far to file additional supporting material. Only oral presentation possible would be cross-examination -- and then only if "it appears relevant factual issues cannot otherwise be satisfactorily resolved."

No exceptions are contemplated. This includes DuMont, which insists its nation-wide plan can't be presented properly except by oral testimony. Educators, too, may object, but their attorneys haven't yet made up minds.

No deadlines for filing of written comments are suggested by FCC. NARTB-TV thinks 30 days for original comments, additional 30 for oppositions, would be adequate. Attorney George Sutton, speaking for number of clients, suggests 45 to 60 days for each period.

Addition of 470-500 mc band gives TV 5 more uhf channels -- which may well have gone by default if a few industry folk hadn't got concerned at last minute. Reason given for assigning band to TV, rather than to common carrier, is simply that TV has greater need and common carrier can be placed elsewhere in spectrum.

* * * *

Highly technical legal points upon which FCC decided it has authority to fix TV allocation plan in rules and to reserve education channels need no elaboration. Ruling can't be appealed now, but many attorneys feel that someone will take it to courts eventually. Commission went out of its way to show "we ain't scared," saying: "It is obvious enough that if we are to perform our duties properly we can give no weight to the contention that the Commission should refrain from adopting the rules in spite of its belief that they are both legal and in the public interest, because their adoption might lead to litigation..."

Comr. Jones dissented, as expected. One of his principal objections is that allocation plan, fixed by rule, appears insufficiently flexible to permit proper use of new knowledge of the art as it develops.

"It is obvious that the Commission violated its table of priorities so materially," he added, "that by its own proposed criterion it cannot be sustained in court." This, he says, is indicated by fact that 909 cities are allocated only one channel, 169 would have two, 74 would get three, etc.

Actually, commissioners all want to put more flexibility into plan. How this may be done, with fixed rules, has attorneys guessing.

Congressional heat about freeze is really on, Sen. Johnson's Interstate & Foreign Commerce Committee this week voting to ask FCC Chairman Coy to report July 18 or 25 on status of freeze, educational channels, a few other issues.

Station Accounts: Continental Baking Co., filling in vacationing *Garroway at Large* period on hookup of Crosley Ohio stations (WLWT, WLWD, WLWC) with *Live It Again*, described as a "telehistory of bygone days in which film clips and musical numbers are combined to re-create a period," Sun. 9-9:30, thru Ted Bates Inc. . . . Chicago Symphony will quit radio (WCFL) next fall season, plans 25 or 30-piece TV symphonic group, Rafael Kubelik conducting, for placement on WENR-TV, which has sold weekly half-hour series to Chicago Title & Trust Co. . . . Henry T. Campbell Sons Corp. (Sakrete ready-mixed cement) sponsoring *Family Handy Man*, how-to-do-it household tips, on WJZ-TV, New York, Thu. 10-10:15 p.m., thru H. Lee Hoffman Adv., Baltimore . . . B. F. McDonald Mfg. Co., making safety helmets, goggles and dirt respirators for construction workers, has ordered 5 one-minute films with *Careless Charlie* and *Safety Sam* routines from TV Ads Inc., Los Angeles, for placement as sports participations, thru Philip J. Meany Co., Los Angeles . . . Florida Citrus Exchange, Tampa (Sealdsweet fruit juices & concentrates) has appointed Ruthrauff & Ryan, N. Y., and California Fruit Growers Exchange (Sunkist lemon juice & frozen lemonade) currently using TV on big list of stations, thru Foote, Cone & Belding, Los Angeles . . . Add to expanding list of beer accounts these users of INS-Telenews: Jacksonville Brewing Co. (Jax beer) on KPRC-TV, WOAI-TV & WKY-TV; Duquesne Brewery, WDTV & WICU; Dixie Brewing Co., WDSU-TV; Stag Beer, KSD-TV . . . Among other advertisers reported using or preparing to use TV: Mawsaid Products Co. Inc. (Titeliner auto-rope lock), thru Ray C. Jenkins Adv. Inc., Minneapolis; Piatt & Smillie Chemicals Inc. (antiseptic liquid detergent), thru Krupnick & Associates Inc., St. Louis; Minute Maid Corp. (frozen orange juice concentrate), thru Ted Bates & Co. (WCBS-TV); Dow Chemical Co. (Real-Kill bug killer), thru MacManus, John & Adams Inc., Detroit; Bunte Brothers (candy), thru Schoenfeld, Huber & Green, Chicago; Sheraton Corp. of America (hotels), thru BBDO, N. Y.; Rayco Mfg. Co. (auto seat covers), thru Robert B. Grady Adv., N. Y. (WOR-TV); Squirt Co. (soft drink), thru Harrington-Richards Inc., Los Angeles.

Network Accounts: Pet Milk scheduled to participate with 2 others, as yet unsigned, in sponsorship of *All Star Revue* on NBC-TV, Sat. 8-9, resuming in Sept. with Jimmy Durante, Danny Thomas, Ed Wynn, Jack Carson, alternating, just before 9-10:30 *Show of Shows* with Sid Caesar and Imogene Coca; Pet Milk participated in sponsorship of these stars on recent season's Wed. night *Four Star Revue* . . . Campana Sales Co. (Italian Balm) is first sponsor of *Ruth Lyons' 50 Club* which starts Oct. 1 on NBC-TV, Mon.-Fri. noon-12:30; Campana, thru H. W. Kastor & Sons, bought 12:15-12:30 Fri. segment of show, which will originate at WLWT, Cincinnati . . . Procter & Gamble (ivory flakes) starting Aug. 7 will sponsor 1:15-1:30 segment of *Steve Allen Show* on CBS-TV, Tue. & Thu. 12:45-1:30, thru Compton Adv. . . . Admiral will sponsor annual Chicago Tribune Charities *All-Star Football Game* from Soldier's Field Aug. 17 on DuMont . . . Philco resumes *Don McNeill TV Club* Sept. 12 on ABC-TV, alt. Wed. 9-9:30, thru Hutchins Adv. Co. . . . Wine Corp. of America (Mogen David wine) starts *Charlie Wild, Private Detective* Sept. 26 on NBC-TV, Wed. 11-11:30, thru Weiss & Geller Inc. . . . Kellogg Co. (cereals) starting July 7 replaced *Victor Borge Show* with *Tom Corbett, Space Cadet* for 8 weeks during summer on NBC-TV, Sat 7-7:30 . . . Goodyear Tire & Rubber Co. replaced *Paul Whiteman Revue* for 8 weeks starting July 15 with *Goodyear Summertime Revue* on ABC-TV, Sun. 7:7:30; Whiteman returns Sept. 9 . . . Gruen Watch Co. starts *Gruen Guild Theatre* Sept. 27 in place of *Blind Date* on ABC-TV, Thu. 9:30-10, thru McCann-Erickson; show will run 52 weeks.

TV is "partly to blame" for slump in weekend bus and street-car business, Minneapolis Street Railway Co. told City Council in requesting permission to reduce service.

PLANS to build new broadcast station facilities during fourth quarter may have to be deferred because of serious shortage of structural steel. So far as telecasters and broadcasters are concerned, that's crux of DPA's announcement July 10 that demand for the building steel is nearly double estimated supply for last 3 months of year. Heavy expansion of defense industry will reach building stage by that time, and all users of structural steel will feel tight squeeze.

Meanwhile, NPA prepared to toss out construction control Order M-4 (Vol. 7:19-20, 22, 27) and supplant it with new Controlled Materials Plan regulation. This will mean that, instead of applying for permission to build, potential builders will apply for the steel, copper and aluminum they need. If their applications are accepted, they're guaranteed the materials they require. If they're rejected, they can't get materials—therefore can't build.

NPA announced July 13 that all construction applications must be made on new form CMP-4C, which completely replaces old form NPAF-24. Persons having applications pending on old form are being notified to fill out new one. Commerce Dept. field offices, which had been processing applications involving 50 tons of steel or less, were instructed to send all pending applications to Washington for action.

FCC and NPA representatives are continuing talks on construction policy respecting TV and radio stations. Although NPA has taken action on several applications by broadcasters, no final decisions have been reached in the FCC-NPA talks. Decision on over-all policy toward broadcast building is expected soon as result of negotiations.

———■———

FCC is urged to expedite merger of ABC-United Paramount Theatres (Vol. 7:21, 26) before Oct. 31, in formal applications filed July 12 by attorneys Paul Porter for ABC, Duke M. Patrick for UPT. Applications seek approval of transfers of the 5 TV, 5 AM & 4 FM stations involved, plus okay on contingent deal for CBS $6,000,000 purchase of WBKB, Chicago, while merged companies retain those same call letters for WENR-TV. WBKB's companion FM outlet, WBIK, would be dropped since both ABC and CBS already have Chicago FMs. Also to be dropped, contingent upon FCC approval of deal, would be new-station TV applications in "freeze file" from UPT subsidiaries in Boston, Detroit, Des Moines and Tampa.

Principals are hoping FCC approval will come without hearing, but fact that $24,000,000 exchange-of-stock merger is biggest such deal in radio history may impel FCC to go through formality of hearing. Letter of submittal to FCC says basic purpose is "to establish resulting company which can function more efficiently in the public interest"; asserts UPT's record of accomplishments assures building up of ABC "to point of competitive vigor" and to "degree heretofore non-existent"; states funds are available to promote operation of resultant American Broadcasting-Paramount Theatres Inc. "to position of equality with those who now lead in the network field."

In view of fact that ABC has run poor third in radio and TV networking, that its radio operations have been slipping, that its obvious prime assets are its TV station properties, that some have feared new company might let radio slide in favor of TV, UPT counsel's letter gives FCC this assurance: "We are as fully intent upon improving and strengthening the radio operations of stations and network as in making new and important strides in TV."

* * * *

More July 1 sets-in-use reported since NBC Research's "census" of June 1 (Vol. 7:25): Miami 75,000, up 5000; St. Louis 297,000, up 4000; Kansas City 125,047, up 3047; Norfolk 71,600, up 2500; New Orleans 58,565, up 1065; Baltimore 304,418, up 3418.

Broadcasters attending RCA color demonstrations in New York this week included: Cecil Mastin, WNBF-TV, Binghamton; M. J. Kallett, Wm. T. MacNeilly & M. C. Fusco, WKTV, Utica; D. L. Provost, WBAL-TV, Baltimore; Wilbur Havens and W. A. Bowry, WTVR, Richmond; W. E. Walbridge, WWJ-TV, Detroit; Aldo De Dominicis, WNHC-TV, New Haven; Harry M. Bitner Sr.; WFBM-TV, Indianapolis; Louis Read, WDSU-TV, New Orleans; G. E. Yeldell, KSD-TV, St. Louis; Clair McCollough, WGAL-TV, Lancaster & WDEL-TV, Wilmington; J. Leonard Reinsch, WSB-TV, Atlanta & WHIO-TV, Dayton; Arden Pangborn, WOAI-TV, San Antonio; H. F. Gross, WJIM-TV, Lansing; Irving Waugh, WSM-TV, Nashville; George B. Storer, WJBK-TV, Detroit, WAGA-TV, Atlanta & WSPD-TV, Toledo; Walter Damm, WTMJ-TV, Milwaukee; B. J. Rowan & W. J. Purcell, WRGB, Schenectady; A. D. Schrott, WJAC-TV, Johnston; Joe Baudino, Westinghouse stations; J. R. Poppele, WOR-TV, New York; Paul Morency, WTIC, Hartford.

NARTB's TV Program Standards Committee, detailed to task of drawing up program code (Vol. 7:25), is headed by Robert D. Swezey, WDSU-TV, New Orleans. NARTB president Harold Fellows said rest of committee will be named this month. It will include, he said, NARTB board and non-board members and network representatives, with special attention to geographic representation. Frank U. Fletcher, co-owner of WARL, Arlington, Va., was named chairman of NARTB's new legal-legislative committee. He'll represent FM and independent stations. Other members: Frank M. Russell, NBC v.p., TV & network; Hugh B. Terry, KLZ, Denver, medium-sized AM stations; Robert T. Mason, WMRN, Marion, O., small AM; John H. DeWitt Jr., WSM & WSM-TV, large AM & TV.

Confirmation of Comr. Frieda Hennock's appointment to New York Federal judgeship (Vol. 7:24-26) is still up in air, though few doubt eventual approval. Senate Judiciary Committee named subcommittee to hold hearing, date not yet set. It comprises Sen. Pat McCarran (D-Nev.), chairman; Sen. Alexander Wiley (R-Wis.), Sen. Willis Smith (D-N.C.). Last is former president of American Bar Assn., which, along with New York Bar Assn., is opposing Miss Hennock as "unqualified."

RTMA legal committee to supersede legislative committee, named this week: John W. Van Allen, RTMA general counsel, chairman; Frederick J. Ball, Crosley; Philip Dechert, Philco; Robert Estes, GE; Samuel E. Ewing, RCA; Irving Herriott, Zenith; Raymond Herzog, Emerson; Ray S. Donaldson, RTMA, ex officio.

———■———

Personal Notes: Paul Hollister, ex-CBS v.p., onetime Macy's advertising v.p., has rejoined Macy's as corporate publicity advisor . . . Norman Gladney, ex-Franklin & Gladney Adv., named director of newly formed TV merchandising div., Bulova Watch Co., handling dealer advertising . . . Ralph W. Hardy, NARTB govt. relations director, elected to board of Assn. of Better Business Bureaus Inc. . . . Stanley A. Lomas, chief of TV commercial production dept., Wm. Esty Co., named v.p. . . . Carole Gottlieb, ex-Kenyon & Eckhardt, named asst. TV-radio director, Marfree Adv. Corp, N. Y. . . . Capt. John B. Green, NBC-TV production staff, recalled to active Marine Corps service, assigned to m.c. *Marine Corps Review*, Fri. 3:30 p.m. . . . Robert J. McAndrews, managing director, Southern California Broadcasters Assn., elected president of Hollywood Ad Club . . . Arthur Bellaire promoted to head BBDO TV-radio copy staff.

Charles Wesley Turner, 39, maintenance supervisor of KECA-TV, was drowned July 7 at Newport Beach, Cal., in attempt to save 7-year-old son.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
July 14, 1951

NO HIATUS YET IN FACTORY INVENTORIES: Those few TV-radio manufacturers who continued producing during first week in July, when most plants closed down for annual vacations (Vol. 7:25-26), turned out mere 12,817 TV receivers, 74,863 radios.

Yet factory TV inventories, despite this relatively miniscule production, went up still more -- to 739,945 units as of July 6 from 723,309 June 29 (Vol. 7:27). Factory inventories of radios were 406,046, down from 419,002 the preceding Friday.

Actually, TV inventory estimated by RTMA as of July 6 showed higher gain (some 16,000) than week's output of 12,817, lowest since same 1950 week's 8672.

No TVs were made for private label first July week, but 63,722 radios were. Week's radio output broke down thus: auto 62,863, home 9630, portable 2370.

* * * *

It's a seasonally quiet retail market right now, with dealers slowly but surely getting rid of stock while biding time about putting in new supplies. Some say summer TV-radio business, particularly June, hasn't been too bad -- indeed, for some it was a bit better than expected. What bothers everybody is uncertainty ahead -- but that feeling is shared in all consumer durable goods fields.

Easing of Regulation W, main hope for upturn in late summer and early fall, is still opposed by Federal Reserve Board. Chairman Martin July 11 urged Congress not to tamper with credit controls because, he said, "inflationary pressures, even though abated at present, threaten to reemerge irrespective of Korean developments." Senate-passed Defense Production Act extension provides for easier credit terms on autos. House version, still being debated, includes easier terms for TV-radio and other appliances (Vol. 7:27).

House vote has again been postponed, to next week. Judging from temper of Congress toward Administration requests, chances favor retention of provisions easing present credit restrictions.

OUTLOOK FOR METALS AND REPAIR PARTS: TV-radio repairmen got their long-sought priority to obtain parts and materials this week (Vol. 6:51, 7:2,10,15) -- and DPA hinted the steel-copper-aluminum pinch on civilian manufacturers isn't going to get much worse.

As CMP application forms went out for first time to consumer durable goods manufacturers, DPA-NPA administrator Manly Fleischmann assured civilian producers they'll get all the steel, copper and aluminum they need this quarter with which "to produce at permitted levels."

Pointing to TV sales slump, Mr. Fleischmann said in response to question at July 10 press conference he couldn't foresee any civilian goods "pinch" this quarter. He feels there'll be "more than enough" to take care of all customers.

No sharp cut in supply of the 3 basic metals to civilian manufacturers is contemplated in fourth quarter, the materials control boss revealed for first time. Matter of fact, Mr. Fleischmann said he hopes steel, copper and aluminum will begin to loosen up early next year.

As for repairmen, new CMP Regulation 7 appears to give them what they want. It authorizes all types of repair shops to write their own defense priority tickets to procure limited amounts of parts and materials. Maintenance, repair and operating (MRO) supply priorities for all establishments except households (Vol. 7:9) were also brought under CMP this week in CMP Regulation 5.

All consumer goods will probably come under Controlled Materials Plan next quarter -- but decision won't be announced officially until next month. At present, manufacturers of parts and components used in consumer goods get CMP allotments of the 3 basic metals, but end-product makers must seek their share on "free market".

CMP won't solve all of TV-radio's material problems, though. No matter how

much copper and steel is available, you can't build a set without tubes -- which require nickel and tungsten. These metals are expected to be bigger bottleneck than steel and copper (Vol. 7:16,18,27).

As for the truce -- if there is a truce -- Mr. Fleischmann is one of the few govt. officials who admit the rearmament program will feel its effects. Even on basis of present planning -- regardless of any chipping of appropriations by Congress -- Mr. Fleischmann draws common-sense conclusion that "if you aren't losing equipment in a war, you meet your goal a little earlier."

Obviously the goal won't be met this year. But while target date for full rearmament is in 1953, Mr. Fleischmann sees possibility the effects of truce would be felt next year in form of some relaxation of curbs on civilian production.

* * * *

Some smaller TV-radio manufacturers may get a break as result of new revision of Direction 1 to CMP Regulation 1, blanketing all very small users of steel-copper-aluminum into CMP. It permits them to assign themselves priorities to buy as much as 500 lbs. of copper, 500 lbs. of aluminum, 5 tons of carbon steel, half ton of alloy steel each quarter -- not including metal in parts they buy ready-made.

Topics & Trends of TV Trade: Big Music Trade Show in Chicago's Palmer House, July 16-19, staged annually by National Assn. of Music Merchants, will attract more TV-radio manufacturer exhibitors than did recent Chicago furniture marts (Vol. 7:24)—but only a handful are showing new models. Roster of several hundred exhibitors, mainly makers of musical instruments and associated equipment, includes these TV manufacturers:

Admiral, Air King (now CBS-Columbia), Crosley, GE, Hoffman, Jackson, Magnavox, Majestic, Pathe, Philco, RCA, Video Products, Scott, Sparton, Starrett, Stromberg-Carlson, Sylvania, Tele King, Tele-tone, Trad, Westinghouse, Zenith. Radios are also being exhibited by most of foregoing plus Fisher, Jewel, Regal, and there will be exhibits by such parts makers as Jensen & Webster-Chicago.

Of foregoing manufacturers, only Jackson, Magnavox, Pathe, Scott and Stromberg have stated new sets will be shown, new prices posted. Tele-tone, at Stevens Hotel, will unveil some new sets plus its color converter, a "slave unit" capable of attachment to black-and-white receivers for reception of CBS color—and CBS-Columbia plans Mon. thru Wed. demonstrations of its color system at 10:30 a.m. and 2, 3 & 4 p.m. via closed-circuit transmissions from Palmer House exhibition floor to its upstairs Suite 649-650.

* * * *

"Halolight" is what Sylvania calls its finally-revealed device designed for greater viewing comfort (Vol. 7:23,25). Utilizing principle of "surround lighting," engineers developed "cold cathode" light bulb, curved all the way around picture tube. It gives off "soft, cool light" to ease eye's transition from screen to darker surroundings, increases apparent size and clarity of picture.

Only 3 top models of Sylvania's new "Golden Jubilee" line—20-in. consoles and combinations running $490-$600—will include device initially. Cost of including it adds $30 at retail. Company has applied for patents, reports no other set makers using it now. One conservative manufacturer says he's seen device, considers it "terrific."

* * * *

Merchandising Notes: Some new models and prices due in next few weeks, including line of 15 Arvin TVs ranging from present 8½-in. retailing at $129.95 to 21-in. console at $499.95, to be released at distributors meeting in Moraine Hotel, Highland Park, Ill., July 29-Aug. 1 . . . Stromberg-Carlson's new line includes 17, 19, 20 & 24-in. models, prices to be announced at NAMM show next week . . . Stromberg guaranteeing distributors net prices on all current models until next Dec. 1, has reduced suggested list of 17-in. "Stafford" from $299.95 to $289.95 and "Pembroke" from $489.95 to $439.95 . . . Jackson reduces 20-in. table from $249.95 to $179.95, console from $299.95 to $199.95 . . . Pacific Mercury has new models ranging from $299.95 to $399.95 . . . DuMont's 30-in. "Royal Sovereign" (Vol. 7:26) presented to President Socarras of Cuba by his ministers for use in presidential palace . . . Goar Mestre, who operates Havana's CMQ-TV and controls Cuba's Admiral distribution, says publicity about color TV has been hurting sales of receivers, yet audience is still growing; he plans new satellite stations in Matanzas, Santa Clara, Camaguey and Santiago, which are expected to boom Cuba's TV sales.

First legal ruling on community antennas (Vol. 7:2, 7, 11, 21, 23-24) came from Wisconsin Public Service Commission, which this week said it had no power to authorize community systems, adding: "Whatever jurisdiction the PSC may have been given by the Wisconsin legislature has been nullified by complete supervision exercised by Congress over transmission by TV. This necessarily transcends state lines and is, therefore, interstate in character." Decision came after petition to install system in Rice Lake was submitted by Edwin F. Bennett. He took decision to mean he can proceed, since FCC has adopted no policy on systems, though staff has studied them. Latest system under construction is in Grass Valley, Cal., 155 miles from San Francisco. Jerrold equipment is being installed by Community Antenna Co., whose president is appliance dealer John Colling.

Trade Miscellany: Concord Radio Corp., 901 W. Jackson Blvd., Chicago, handling TVs, radios, parts, etc., about 50% via mail order, filed bankruptcy petition in Federal district court this week, showing liabilities of $445,549, book net worth of $184,485 . . . Arvin Distributors Inc., 8 W. 30th St., New York, formed as wholly-owned subsidiary of Arvin Industries to distribute and service Arvin TVs, radios and appliances in New York-New Jersey area . . . General Precision Laboratory Inc. purchased 3½-acre site in Pleasantville, N. Y., for new 35,000-sq. ft. plant for manufacture of electronic devices, to be ready in early 1952 . . . Philips of Eindhoven plans making Holland factory biggest in Europe turning out TVs, reports $28,000,000 profit after taxes on 1950 business, which included heavy radio tube exports to Great Britain, Germany and other countries . . . Sylvania's research chief Frank Mansfield predicts replacement tube market will rise to $154,000,000 in 1952 and $286,000,000 in 1953.

Trade Personals: Frank Folsom, RCA president, spending remainder of this month at Bohemian Grove, Monte-Rio, Cal.; he was subject of "Business and Finance Leaders" sketch in July 13 *New York Herald Tribune* . . . Benjamin Abrams, president of Emerson Radio, awarded bronze plaque at Waldorf-Astoria banquet last week in tribute to his service in the State of Israel bond drive . . . Earl B. Abrams has resigned as editor of *Television Digest* . . . Walter Lukas promoted to chief TV engineer, Francis J. Burger chief radio engineer, L. G. Zucker chief mechanical engineer, Emerson Radio, reporting to R. T. Capodanno, director of engineering . . . George J. Ikelman, member of FCC Safety & Special Services Bureau for 11 years, named to staff of NPA Scientific & Technical Equipment Div.; Arthur T. Koyce, ex-Signal Corps radio-radar specialist at Philadelphia, joins same division as chief, electrical indicating instrument section . . . Karel van Gessel, ex-Philips of Holland, appointed to newly created post of coordinator for foreign manufacturing affiliates of Sylvania . . . P. M. Pritchard, ex-Victor Electric, named gen. sales mgr. of Sylvania parts div. . . . Clifford J. Cosgrove named asst. mgr. of subcontracting, John Siena staff asst. to director of industrial relations, Bendix Radio . . . Nathaniel B. Nichols, ex-Taylor Instrument Co., then MIT researcher, recently U of Minnesota professor of electrical engineering, named mgr. of Raytheon research div. . . . John B. Tuthill, ex-asst. v.p., American National Bank, Indianapolis, named asst. to gen. mgr., Collins Radio . . . Frederick W. Timmons Jr. promoted to regional sales mgr., DuMont cathode ray tube div. . . . Robert Digges, Philco division mgr. in Cleveland, appointed head of Atlantic div., Philadelphia, succeeded at Cleveland by L. H. Huntoon, ex-Pittsburgh sales rep. . . . Bernard Grae appointed product design mgr., CBS-Columbia Inc. (formerly Air King) in charge of all designs for TV-radio receivers . . . Gordon Groth, president of Electra Mfg. Co., Kansas City, named executive v.p., Erie Resistor Corp. . . . Zee Goodman new v.p. & gen. mgr., Pacific Mercury Television Mfg. Corp., Los Angeles; Elliott Peikoff new sales mgr. succeeding James Oliver, now with Hoffman . . . Carl E. Smith, ex-tube div., named supervisor of factory sales service, Sylvania, Emporium, Pa. . . . Ray S. Donaldson, ex-administative asst. to Senator Capehart of Indiana, DePauw '32 and Harvard Law '35, named RTMA staff attorney in Washington.

———■———

Electromagnetic radiation bill (Vol. 7:2-11) is emerging in form acceptable to everyone. Senate Interstate & Foreign Commerce Committee voted to report S. 537 with amendments giving President emergency powers to control devices capable of radiating signals, from 10 kc to 100,000 mc, useful for navigational purposes beyond 5 miles. FCC, RTMA and NARTB had all agreed that original bill submitted by military was unnecessarily strong, would have given military control over literally billions of devices. Bill, when reported, will also have penalty clause—$1000 and/or one year imprisonment for individuals, $5000 for others. Climax came 2 weeks ago, when military finally agreed to accept amendments and stipulated the 5-mile limitation.

Self-focusing electrostatic picture tube has been announced this week by Thomas Electronics, Passaic, N. J. New tube, apparently similar to DuMont's self-focusing tube (Vol. 7:20-21, 25), eliminates external focus devices and controls, uses low voltages and is said to be interchangeable with magnetic focusing tubes in present sets. Samples of 17-in. tubes have been sent to set manufacturers. Perfection Electric Co., Chicago, is marketing "Kine-Center," new picture-centering device for electrostatically-focused tubes.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for May: Earl E. Anderson sold 1900 ABC, holds 6600; William Zeckendorf sold 2000 ABC owned through holding corporation, holds none; Dee S. Lenfesty sold 100 Arvin, holds 4700; John E. Bierworth bought 200 Avco, holds 200; Frank Cordes sold 1000 Blaw-Knox (April), holds 25,165; D. V. Sherlock bought 500 Blaw-Knox, holds 600; Isaac D. Levy sold 26,826 CBS Class A, 15,179 Class B, holds 5296 Class B; James M. Seward bought 200 CBS Class B, holds 200 Class A, 200 Class B; George D. Macbeth sold 1000 Corning Glass, holds 8000; Bernard Goodwin sold 200 DuMont, holds none; Neil H. McElroy bought 100 GE, holds 200; William J. Halligan gave 1000 Hallicrafters as gift (April), holds 35,900, holds 139,200 in trusts, wife holds 24,000; Laurence B. Dodds sold 100 Hazeltine, holds none; Clendenin J. Ryan sold 23,000 IT&T, holds 12,500.

Frank L. Taylor exchanged 8470 shares of National Union preferred for 13,984 common (August 1950), bought 16 common (December 1950), holds 14,000; James T. Buckley gave 398 Philco as gift, holds 21,987; Charles S. Cheston bought 13 Philco (April), holds 250; Joseph H. Gillies gave 30 Philco as gift, holds 9407; John F. Gilligan bought one Philco (January), holds 10,969; R. L. Heberling gave 100 Philco common as gift, bought 100 preferred "A", holds 23,987 common, 300 preferred; Robert F. Herr bought one Philco (February), holds 27,587; Meade Brunet bought 100 RCA, holds 300; William Gammel Jr. gave 100 Raytheon as gift, holds 17,070; Max F. Balcom bought 134 Sylvania (March), holds 3739; Howard C. Riordon bought 100 Sylvania (October 1950), received 40 as compensation (March), holds 240; R. L. Huffines Jr. bought 1000 United Paramount, holds 1000; Andrew W. Robertson sold 400 Westinghouse, holds 1000.

Sale of 2500 shares of Philco by Thomas A. Kennally, Philco v.p. and president of its refrigeration division, was reported to New York Stock Exchange this week. He now holds 22,974 shares.

* * * *

CBS gross radio billings of more than $33,000,000 for first 5 months of 1951 (Vol. 7:25) represent 9.4% increase over same 1950 months, NBC's $25,260,000, down 8.8%, but July 11 *Variety* reports CBS anticipates loss for year on radio while NBC figures to break even—notes CBS is paying final installments this year on its 1948-49 talent deals. In TV network operations, neither these nor ABC-TV and DuMont are expected to show profit, but their owned-&-managed stations, with possibly one or 2 exceptions, are all expected to be good earners.

General Instrument Corp. consolidated statement for quarter ended May 31 shows net loss of $36,550 as against net profit of $258,810 same quarter last year.

———■———

Small business survey committee, formed to draft program for RTMA assistance to small manufacturers in military and commercial fields, was announced this week by president Glen McDaniel. Chairman is A. D. Plamondon Jr., Indiana Steel Products Co. Members: G. O. Benson, Premax Products; G. R. Haase, Operadio; Otto H. Hofman, General Magnetic Corp.; Matt Little, Quam-Nichols; Richard W. Mitchell, Industrial Development Engineering Associates.

May shipments of TV receivers to dealers totaled 234,522, compared with 261,357 in April, making 2,310,646 units shipped during first 21 weeks of 1951. RTMA monthly report tabulating all counties to which as many as 25 sets were shipped is available on request from association headquarters, 1317 F St. NW, Washington.

Telecasting Notes: "Finding Radio's Future Format," headlines article in July 11 special "Review-Preview" section of *Variety*, which pretty well epitomizes chief preoccupation of very TV-conscious broadcasting industry today. Article is by NBC program v.p. Charles (Bud) Barry, but there are others "Presenting the Case for Radio" by WOR's Theodore Streibert, WDSU's Robert Swezey, WSB's John Outler, KFWB's Harry Maizlish, KMBC's Arthur Church, WIP's Ben Gimbel, WTIC's Paul Morency—interesting reading. Noteworthy is fact that first 3 of these also operate TV stations . . . NBC's Sylvester (Pat) Weaver, in another article in the Rialto idiom, sums up "the revolution" being wrought by TV: "If television is a fad," he writes, "so is breathing. Enterprises that will feel the direct impact of TV will be sharply modified, recast, remolded. Alas, poor Security, all is flux" . . . It's common knowledge NBC-TV network revenues are about to overtake its AM network's—but as if to prove healthiness of radio, non-TV-operator MBS reported this week that its gross billings for first 6 months are up 4% over same period last year, being estimated at $8,500,000 . . . Korean cease-fire, many hope and expect, will bring biggest boon to TV-radio industries in possible slowdown of draft and reduced drain of staff through calling up of reserves . . . NBC-TV clocking commercial time "runovers," as in radio, plans to send detailed reports to agencies each month with request these be eliminated in subsequent programs . . . "America Is Sold on ABC" is theme of series of page sales promotion ads in New York dailies and trade papers to run 13 weeks, plugging both TV and radio facilities . . . Bing Crosby may or may not pursue now-frozen TV applications for his home town of Spokane and for Tacoma and Yakima, filed in October 1948, but meanwhile he has acquired minority investment interests in AM stations KMBY, Monterey, Cal., and KGLC, Miami, Okla. . . . Erie's WICU, which claims first building exclusively designed for TV, will move into additional quarters July 15, Austin & Co. having completed doubling size of structure; owner Ed Lamb also plans to ask FCC for power increase to 40,000 watts . . . Phillips H. Lord's radio series *Gangbusters* to be prepared for TV by CBS, planning fall start . . . WTVN, Columbus, July 1 raised base hour rate from $500 to $675; one-min. rate remains $110 . . . KTLA, Los Angeles, Aug. 1 raises base hour rate from $1000 to $1250, one-min. from $175 to $250, also changes noon-6 p.m. Sun. from Class A to Class B.

WOW & WOW-TV, Omaha, aren't on block, if spokesman for present control is to be believed—but property has been looked over with view to possible purchase by Tom O'Neil, Don Lee Enterprises (Vol. 7:27); Ed Lamb, WICU and WTVN; Meredith Publishing Co., WHEN; O. L. (Ted) Taylor, Texas radio station operator; probably others. Reports of $2,500,000 sale deal with Mr. Lamb are denied by principals.

Three applications for new TV outlets, one uhf, filed with FCC this week, bringing total pending to 419: WLAM, Lewiston, Me., seeking Channel No. 8; WJPG, Green Bay, Wis., No. 2; Booth Radio, for Grand Rapids, Mich., uhf Channel No. 23. Also filed was request of WBTM, Danville, Va., to have application amended to ask for uhf Channel No. 24 in lieu of Channel No. 7. [For further details about these applications, see *TV Addenda 13-A herewith.*]

Robert L. Lippert, independent Hollywood producer, reported July 12 he has cancelled film series for TV plus theatre release that he had planned to make with Hal Roach Jr. Extra payments demanded by Screen Actors Guild, Screen Writers Guild and AFM made it impossible to turn proposed pictures out at profit, he said. Two of projected 12 films, each 15-minutes, that have been completed will be released only to theatres.

CBS becomes parent company of 6 divisions, each with own president, under operational realignment ordered effective July 16. Already functioning are newly acquired Hytron Div. (Bruce Coffin, president); CBS-Columbia Inc. (David Cogan, president); Columbia Records Inc. (James Conkling, president). New divisions and presidents are: TV Div., Jack Van Volkenburg, presently TV sales v.p.; Radio Div., Howard S. Meighan, until recently v.p. in charge in Hollywood; Laboratories Div., Adrian Murphy, who as v.p. has handled color campaign, now will handle that and also the coordination of all manufacturing divisions. Each division will have own departments for programs, sales, promotion, press, legal, accounting, etc. Chicago and West Coast network operations continue as in past, with executives reporting to proper counterparts in New York. Besides president Frank Stanton, only parent company appointment announced was that of Herbert V. Akerberg, who continues as station relations v.p. for both TV and radio.

Reassurance that FM channels are in no danger of extinction came from FCC chairman Coy July 13 in letter to Josh L. Horne, owner of WFMA (FM), Rocky Mount, N. C. Coy made public his reply to letter in which Horne expressed concern about reports FCC may turn 18 of FM's 20 mc over to TV. Said Coy: "The FCC is not considering the deletion of the FM band or any part of it . . . The approximately 700 stations now operating in the FM band is real testimony to the strength of the service, particularly when one considers that many manufacturers do not make sets and none of them have carried on continuously aggressive sales campaigns. In almost every area in the country there is an unfilled demand for FM receivers."

Several big advertisers, notably Time Inc., Gillette & Pabst, seeking exclusive TV-radio rights to Republican and Democratic national conventions in Chicago next summer—with payments up to $1,000,000 mentioned for each series of sessions. It's understood politicos are amenable, provided legal way can be found for part of money to go not only toward defraying expenses but also into party coffers. Decision is up to party arrangements committee, not yet named. In 1948 conventions, *Time-Life* had working arrangement (non-sponsorship) with NBC, *Newsweek* with DuMont. Meanwhile, movement is under way to shift conventions to International Arena at Chicago stockyards instead of Chicago Stadium, urged by some TV-radio interests because better facilities are available at former.

Canadian Broadcasting Corp. ran deficit of $1,149,000 last fiscal year, gross income being $8,300,000 and expenditures $9,200,000 plus depreciation—leading to official statement in Parliament that CBC's first TV station in Toronto, due for "early 1952" debut (Vol. 7:22), will not be ready until mid-summer of next year, the one in Montreal presumably even later. At same time, it was indicated private CPs won't be granted for a while, ostensibly because of materials shortages but actually because govt. policy apparently is not to let private outlets get going before CBC's projected two. CBC drew $5,500,000 of its revenues from $2.50 annual radio set licenses, $2,400,000 from advertising, now wants annual subsidy (up to $5,000,000 mentioned) from Govt. Ten TV applications are pending from private enterprises.

Joining opposition of Atlanta's WGST to proposed sale of Channel 8 facilities of WSB-TV, Atlanta, while that station retains CP-holder WCON-TV's Channel 2 (Vol. 7:25), is Eurith Dickinson Rivers Jr., operator of WEAS, Decatur, Ga. and applicant since January 1947 for Channel 8 in Atlanta; he's son of onetime Gov. "Ed" Rivers, owner of several other AM outlets. WGST also filed similarly "frozen" application, for Channel 13, in January 1948 (TV Addenda 1-G & 1-I).

WITH AM/FM REPORTS

PUBLISHED WEEKLY BY RADIO NEWS BUREAU, 1519 CONNECTICUT AVE. N.W., WASHINGTON 6, D.C. TELEPHONE MICHIGAN 2020 • VOL. 7, NO. 29

July 21, 1951

In this Issue:

Regulation W May Be Eased, *page 1.*
Freeze-End in Sight—But Not Quick, *page 1.*
NPA OKs First Building Applications, *page 3.*
Peering Into Colored Crystal Ball, *page 6.*
Count of TV Sets-in-Use, July 1, *page 10.*
'Bedrock Now—No Place to Go But Up', *page 11.*
What CBS Color Sets Will Be Like, *page 12.*
Trade, Mobilization, Financial Notes, *pages 13-15.*

REGULATION W MAY BE EASED SOON: Chances look good now for easier consumer credit terms, despite persistent Federal Reserve Board opposition -- House having passed amendments relaxing Regulation W during past-midnight session on control legislation July 20-21. House bill permits household appliances (including TVs & radios) to be purchased with 15% down and 18 months to pay in lieu of present 25% and 15 months, also permits trade-in allowances to be applied toward down payments.

Senate bill doesn't include this provision, as passed in June, but its committee votes were close (Vol. 7:25) and industry people have Senatorial assurances of staunch support when bill goes to House-Senate conference next week. On other hand, bill's over-all controls were so watered down that many think President Truman may veto whole bill.

Rep. Patman (D-Tex.), sparking opposition to present tight credits, got through an amendment, 140-43, permitting new and used autos to be purchased with one-third down and 21 months to pay (now one-third and 15 months); then came the household appliances amendment, and then another permitting household furnishings to be purchased 10% down and 21 months, then the trade-in amendment by Rep. Forester (D-Ga.). RTMA, prime mover in seeking remedial legislation, had unsuccessfully sought to get TV-radio classified as house furnishings.

FREEZE-END IN SIGHT—BUT NOT QUICK: A vague and unjustified optimism about speedy end to the freeze -- a sort of wistful wishful thinking that new stations, somehow, can be rushed onto the air -- still pervades much of industry.

Even FCC Chairman Coy, after 3 years of agonizing delay, prolonged by color issue, sometimes lapses into it. Witness his widely-publicized testimony before Senate Interstate & Foreign Commerce Committee this week.

TV-radio stocks actually rose on the exchanges the day he testified -- on basis of incomplete and misleading news reports indicating end-of-freeze was nigh.

Actually, clearest view yet of freeze-end did appear on horizon this week -- but it's not going to be a quick ending, not by a long shot. Paste this into your hat again, whatever else you read or hear or hope:

No new telecasting stations on the air before late 1952. None in any sizeable markets until well after that -- probably not until 1953 sometimes -- unless by some clever arranging the FCC itself can get competitive applicants together to agree to consolidate or drop out.

* * * *

It's highly involved in legalisms -- but better picture of freeze-melting process evolved from heavily-attended FCC-industry conference July 20. Meeting left little doubt that Commission, in effort to hasten thaw, will adopt procedures it proposed last week (Vol. 7:28) -- namely, drop oral hearing scheduled for next Monday, July 30, instead conduct it by written comments.

Clincher came at end of long day of palaver, when FCC Chairman Coy asked if anyone in lawyer-packed room had any "legal" objection to written procedure. Only

JUL 30 1951

attorneys for Philadelphia's WIBG & WIP spoke up -- on grounds they had already gone through pre-freeze hearing for channel which FCC proposes to delete, thus have rights which might be abridged.

Though end of freeze seems less nebulous with new procedure, and will come much sooner than with longsome oral hearing, it's still no flip of the wrist.

Five months for filing of comments and counter-proposals, was suggested at conference. This might be cut to 3-4. But FCC needs additional month or so to render final decision. Then, it has promised at least 2 additional months hiatus for filing of new applications.

Thus, it's first quarter 1952 before grants of new stations are possible. But only a few of these, in small uncontested markets, can be made out of hand, and fierce competition for the precious few franchises in more desirable markets will inevitably require individual city hearings.

So it will be many, many months before final decisions in these important markets; then probable appeals to courts by rejected parties -- and then still more months before stations are actually on the air.

* * * *

Two major bones of contention dogged the conference -- "time element" and "rules of the game." Attorneys and engineers generally couldn't see how they could properly present cases in suggested 30-45 days. Many thought FCC should finalize Appendices A & B of its allocation proposal (TV Allocation Report, March 24, 1951), so that parties would know how to prepare their cases in respect to mileage separations, powers, heights, priorities, etc.

To resolve these questions, Coy appointed FCC-industry committee to meet during lunch. It comprised Commission staff members Curtis Plummer, Joseph Kittner, Paul Dobin, Cyril Braum, plus industry attorneys Paul Spearman and Telford Taylor, engineers Earl Cullum and Stuart Bailey.

They came up with "staggered" system, Bailey's idea, as solution to "time" problem. Briefly, system would give industry a lot of small deadlines to meet, rather than 2 big crises. Suggestion of committee is this:

Divide country into 10 areas. Give first group 30 days to file comments. Give parties opposing those comments 30 days to reply. Then allow 10 days for all parties to request oral cross-examination. Repeat this procedure, at 10-day intervals for other 9 area groups. This would take total of 150 days.

No one opposed suggestion. Most thought it best yet. It's very likely to be adopted, though Coy said he was "appalled" at thought of 150 days. Quite possible is reduction of number of groups and intervals between deadlines.

Order in which groups would have to file comments would probably follow list of appearances issued by FCC this week "in the event an oral hearing is held."

It starts with Maine, works down to District of Columbia, then across northern half of U.S., down California and across southern half. FCC planned to send copies of the 98-page document, listing some 700-900 parties who have filed 1100-odd comments, to all hearing participants and their attorneys. It may send it out anyway, with notation of new groupings for written procedures. Or it may issue new list, reflecting new groups.

Regarding "rules of the game," committee made no recommendation, except that parties be permitted to raise no new objections to mileage separations, etc. It's extremely unlikely that FCC will finalize Appendices A & B now. Its attitude seems to be: "We're still not ready. We want to see whether these basic rules should be changed, as people show us their particular cities are 'different'."

Spirit of cooperation at session was truly extraordinary -- for an FCC procedure. Moderate amount of bickering in morning dissipated by day's end. All 7 commissioners were on hand, plus 100 or more industry attorneys, engineers, et al. Coy ran the conference, and everyone who desired had his say.

* * * *

Coy's oscillation between rosy hopes and realism came during his July 18 appearance before Senate committee. Needled by Senators, particularly Kem (R-Mo.),

he dreamt that final decision could come by late September. But in answer to question by Chairman Johnson (D-Colo.), he got down to hard earth and said:

"You'd be lucky if Denver had a station on air by Labor Day 1952." Denver is largest non-TV city; and Coy made it clear, in answer to other Senators' quick queries, that same estimate goes for Hartford and similar major markets.

Unfortunately, some news stories carried estimate of final decision, but left out on-the-air prediction. That's what lifted TV stocks.

Coy gave less than complete answer when Sen. Kem asked how long competitive hearings would take in individual cities, once final allocation is made. Where 6 applicants would be involved, Coy said, it might take 3 weeks. What he failed to point out was that:

Commission has only 7 examiners...there will be scores of hearings...examiners already have hands full of non-TV cases...it takes months for examiners to render proposed decisions...it takes additional months for FCC to finalize those decisions...many defeated applicants are likely to appeal decisions to courts, after considerable period of trying to get FCC to reverse itself.

Kem asked whether "remedial legislation" would move things faster. Coy said it wouldn't, that freeze would be lifted before such legislation passed. He also delivered his philosophy on 3 significant points:

(1) FCC isn't alone to blame for lack of TV in many cities. "Many would-be telecasters lacked the desire to break ground, to become pioneers," he said. "They thought of television as a losing business."

(2) An allocation plan is needed because, otherwise, "every big city would hog the facilities, and the small communities would be outside looking in. Under an allocation plan, people in smaller communities have time to get financial resources in order to build."

(3) Priority of grants, post-freeze, will be cities with no TV, first; those with one station, next -- and so on. Coy estimated 1500 TV stations may be built in next 5 years, 2500 in 10, possibly 3000 ultimately.

* * * *

Educational channel reservation absorbed considerable time. Coy set Johnson back on his heels by saying he questioned legality of the Senator's pet idea -- that of stipulating in station's license that it must devote specific portion of time to educational programs, in lieu of reserving channels for schools.

Coy thought censorship provisions of Communications Act barred FCC from such action, but said he'd ask his general counsel for opinion. If Commission does not have such power, said Johnson, "there ought to be some legislation."

Sen. Benton (D-Conn.) plugged for the educators -- appeared to want schools to become "a little bit pregnant," as one observer put it, when the Senator said he'd like to see channels reserved but permit schools to go commercial.

Coy called this "a snare and a delusion." If schools want to go commercial, he said, let them apply for commercial channels, not ask for reservation.

What if schools don't want reserved channels, as in Kansas City? Kem asked.

"I don't think we ought to impose channels on them," Coy answered.

Coy handled himself beautifully, basking under warm eye of Sen. Johnson, with whom he's a favorite. He appeared to have convinced the Senators, including Kem, who seemed to be nodding in agreement by time Coy finished testifying.

NPA OKs FIRST BUILDING APPLICATIONS: First go-ahead by NPA for alterations to a TV station was announced this week -- along with approvals of building projects involving 9 radio broadcasting stations.

This first batch of approvals by the emergency materials control agency didn't set any clear-cut precedents or give real clue to attitude NPA is going to take toward construction of new TV stations or alterations to present ones that may be necessary by power increases, cramped studio space, etc.

What it did show is that NPA is treading cautiously -- pending determination

of definite criteria for TV-radio station construction (Vol. 7:19-20,22,27), now being worked out between FCC and NPA in consultation with NARTB, et al.

FCC Chairman Coy is optimistic over chances for construction of new TV stations, once freeze is ended. At Congressional hearing July 18, he said both FCC and NPA "think TV is a dynamic industry which should expand."

He suggested single antenna tower for all stations in a community, after pattern of cooperative Empire State Bldg. venture (Vol. 6:27,40,48; 7:2). Many stations, he asserted "can be built without use of great amounts of materials." He noted a number of prospective telecasters already have buildings and antenna towers which can easily be converted to TV.

Most applications granted to date by NPA have been "hardship" cases -- where applicant had purchased materials, contracted for building job before NPA's M-4 construction order was amended to include TV-radio (Vol. 7:19).

First TV station to receive approval was WJAR-TV, Providence, authorized to make alterations to its studios, including reinforcement of walls and ceilings to accommodate Klieg lights. It had ordered materials before building restrictions were imposed. The alterations will cost an estimated $54,455.

WEEU, Reading, Pa. (AM) was authorized to build new studios in an existing building -- requiring very little critical materials. This was also "hardship" case, and the work will cost about $47,200.

Five AM grantees not yet on air received NPA authorizations to begin construction: KBOX, Modesto, Cal., studio building, $27,000; KORK, Las Vegas, Nev., station, $21,000; WIST, Charlotte, N.C., transmitter building, $12,000; WSYD, Mt. Airy, N.C., station, $7850; WLOP, Lancaster, S.C., station, $7500.

Two AM stations with CPs for increased power received approval to alter transmitter buildings: KSOO, Sioux Falls, S.D., $19,500; WMSC, Columbia, S.C., $7101. WHBL, Sheboygan, Wis., was authorized to alter transmitter building, $8450.

New NPA regulation due next week is expected to exempt from building curbs all construction requiring less than 2 tons of steel. NARTB was unsuccessful in its efforts to have this upped to 25 tons in case of TV-radio.

July 20 was deadline for applications for construction during the fourth quarter, but if NPA runs true to form, applications arriving late will be given equal consideration -- especially since NPA gave practically no advance notice of deadline. Action on applications -- as well as allotments of steel, copper and aluminum (Vol. 7:27) -- can be expected by second week in August.

INDUSTRY-SPONSORED SPORTS MAY STICK: Powerful and sudden as Jersey Joe Walcott's left hook, TV set manufacturers think they've found effective weapon against threatened inroads on receiver sales by exclusive theatre-TV sports bookings.

"Once again your living room becomes the greatest showplace on earth," said Bill Stern to televiewers tuned to July 18 Walcott-Charles championship bout.

First round in theatre TV vs. free TV -- the 3 exclusive theatre-televised bouts (Vol. 7:23-26) -- was clearcut victory for theatre TV.

But this week's second round, hastily arranged (Vol. 7:28), went unanimously to home-TV exponents -- at least, from public-relations standpoint. The 8 sponsoring set makers (Admiral, Crosley, DuMont, Motorola, Philco, RCA, Sylvania, Westinghouse) believe they've hit on formula that will work.

It's a sort of insurance: If no other sponsor wants to make it worthwhile for sports promoters to give TV owners a look-in on their contests, these and other set makers will. DuMont sales director Tom Gallery, prime mover in deal, makes it plain this week's show, dramatized by unexpected knockout, was only the beginning.

Permanent organization is in the wind -- the TV set makers to contribute on pro-rata basis toward bids on sports events when necessary. "We have nothing up our sleeves," says Gallery. "It's not important who sponsors the program or what network carries it, just so it's on home TV.

"If some other sponsor -- for instance, Pabst -- can get TV rights to a fight, so much the better. But if nobody else can meet the price, then we'll step

in." Gallery points out it will be long time before theatre interests can rival offers made by entire TV industry, working together.

Fight telecast featured no plugs for individual set makers. The 8 manufacturers' names were flashed on screen several times, but crux of message was: "Lean back in your favorite chair, and enjoy the fight in the comfort of your own home." Viewers were also urged to trade in old small-screen sets, patronize service organizations of the sponsoring manufacturers. Pabst, which bought radio rights (CBS) and relinquished time on some TV stations, got couple plugs.

Hookup of 47 stations in 46 cities (both Birmingham stations carried Pittsburgh fight, with Pittsburgh and Johnstown blacked out) brought bout to TV homes. DuMont paid $100,000 for TV-radio rights, re-sold radio rights. Bill amounted to $15,000 for each participating company for entire TV package -- including announcers, time charges, etc. Fight brought in gate of $245,000, exclusive of radio rights -- record for this year in U.S.

Ten manufacturers originally were lined up to sponsor bout. Zenith reconsidered because of its Phonevision, which it hopes some day will compete with commercial TV for rights to sports contests. On other hand, RCA, which is pushing its theatre-TV equipment hard these days, was among sponsors -- in apparent competition with itself. GE pulled out at last minute, reportedly because it was refused permission to prepare its own individual advertising copy.

Tremendous lift in morale of sports-loving set owners, plus aid to TV set sales, should result from success of June 18 sportcast and promise of more to come. Moreover, latest move firmly establishes TV manufacturing industry as the staunch defender of home TV, should banish forever oft-repeated gripe that "TV industry" is conspiring to shift best shows from home to theatre.

* * * *

Battle is far from won -- by either side. Theatre interests still have an inside track on many sports events. For 3 previous New York bouts, International Boxing Club refused to listen to competitive bids, sold exclusive TV rights to theatres outside New York for $10,000 a fight on "experimental" basis. IBC sees theatre TV primarily as method of insuring big gate receipts.

Boxing promoters are enjoying current dispute over TV rights. Playing each side against the other, IBC president Jim Norris told the Associated Press July 19: "We will not consider anything below $250,000 for TV-radio rights [to next fall's Turpin-Robinson and Walcott-Charles return matches]. If we can't get at least that, we will go back to theatre TV...

"We are exploring both of these fights with the idea of getting the most we can possibly get," Norris said. "If we go back to theatre TV, it will be considerably more than a $10,000 proposition."

IBC wasn't so anxious to give Pittsburgh bout to theatre TV as it was its New York matches; good gate was relatively certain when it accepted manufacturers' offer. Norris says there was no bidding, as such, for rights to bouts. "Warner Brothers theatres intimated they might be willing to pay $50,000, but no firm bid was made," said Norris. "The theatre-TV people talked in terms of $20-25,000. Then the set manufacturers came up with their $100,000 offer."

* * * *

Another challenge to home TV comes from National Collegiate Athletic Assn.'s "controlled TV experiment" on college football games this fall (Vol. 7:23-24,27). With end of U of Pennsylvania's revolt (Vol. 7:23) and expected endorsement by once-rebellious Notre Dame, there are no longer any defections in NCAA's ranks.

NCAA plan has been softened considerably since it was first proposed, but it still sharply limits live telecasting of college games -- at the same time approving live theatrecasts of the games banned from home screens.

CBS was first TV network to fall in line with NCAA's "experiment". It's reported planning to film highlights of top eastern games each Saturday for TV presentation the following afternoon. This is in addition to CBS's plans -- with NCAA's blessing -- to present live color telecasts of 9 games this fall.

PEERING INTO COLORED CRYSTAL BALL: Thinking ahead 6 months or so in the color war, we venture that dominant motifs will be: "dual standards" and "universal receiver."

Everything points that way. Reasons appear quite simple:

(1) RCA now produces excellent color. That alone is a solidly-planted foot in FCC's oft-reiterated "open door" to compatible systems.

(2) Cost of compatible system sets, which now employ 54 tubes, will certainly come down as did early TV sets, but is likely still to appear high at year's end. And mass production of tri-color tubes will probably still appear more difficult task than mass output of CBS discs, drums and motors.

Those 2 "cost and time" factors could prove enough to keep FCC from totally reversing itself and replacing CBS system with compatible one -- despite latter's equality or superiority in color quality, to say nothing of the basic overwhelming desirability of compatibility.

* * * *

Commission may then size up situation something like this:

"We acknowledge high quality and compatibility of new system. But we have doubts about prices and immediacy of sets, also about enthusiasm of manufacturers to make color sets in absence of competition. If compatible system is indeed superior, it should be hastened, but not at public's expense.

"Best goad to manufacturers will be competition provided by CBS system, which has the jump in cost and potential speed of manufacture.

"Dual standards are the answer. But we cannot burden public with cost of buying 2 sets to get all color programs. Therefore, we will authorize both systems, IF "universal receiver" can be built to accept both signals -- at a cost no greater, or little greater, than that required for most expensive of the two systems."

This sizeup may sound too pat. Possibly it is. We think not, because --

It's directly in line with FCC's color decision; with post-decision statements of commissioners; with "multiple standards" efforts, all through hearing, of Comr. Jones, the prime color mover; and with the entire background and thinking of Sen. Johnson, whose great drives are "competition" and "anti-monopoly."

It wouldn't be surprising, in fact, if Sen. Johnson and/or Comr. Jones were to take lead in advocacy of dual standards.

Much hinges on feasibility of universal set. We think this a small detail. If such set is the condition FCC puts on adoption of a system in which industry has obstinately placed its technical and economic faith, ingenuity of its engineers will meet it -- with margin to spare.

Any existing CBS sets won't get compatible color, if dual standards are adopted. But a Commission which rejected importance of compatibility when there were 10,000,000 sets isn't likely to hesitate at partially obsoleting a few thousand, or even a few hundred thousand, sets which could still get monochrome from both systems, plus CBS color.

It must give Commission pause when it considers that manufacturers, though desperate for a sales fillip, have not leapt into production of CBS color in hopes of quick profits envisioned by a few.

* * * *

In interim, before compatible system is again presented to FCC, 2 principal factors are most important: (1) Public demonstrations of compatible system, by RCA and/or others of the NTSC group. (2) Production of CBS sets.

If FCC deems RCA's shows are for "exploitation" purposes, to combat acceptance of CBS system, it may initiate clampdown. But this would seem to be an unlikely procedure, from obvious public relations and political standpoints.

If Commission is satisfied, on other hand, that demonstrations are designed to compile field-test data on public evaluation of color quality, compatibility, etc., it isn't likely to complain -- inasmuch as it has previously stipulated such tests are important facets of field tests.

RCA will open color demonstrations to public about Aug. 22, relaying signals

to other cities sometime thereafter. Company reports over 12,000 responses, uniformly highly favorable, to its requests for evaluation of compatible pictures. Tenor of letters reflects full appreciation of meaning of compatibility.

Many respondents said they resent "jumble of lines" they get from CBS colorcasts, recoil from cost and bother of adapters required to get pictures out of them.

RCA is answering each letter with card, signed by president Frank Folsom, advising of future color showings, inviting attendance and reactions.

Public hasn't yet seen RCA's latest color, but additional press comments, like those of last week (Vol. 7:28), leave little question they'll react favorably.

Anticipating network feeds of RCA color, AT&T July 12 filed new rates, effective Aug. 15, stipulating same charges for all color systems. These are same as black-and-white, plus $450 monthly station connection charge.

Other manufacturers' work on compatible system goes on, though slowed by vacations. From Chicago, for example, Hallicrafters' Wm. Halligan reports tri-color tube has been put to work, using signal from flying-spot scanner. He plans to add camera chain, hopes to see signal on air soon, for use of all Chicago manufacturers.

* * * *

Sort of climax to press reaction was Time Magazine's July 23 cover story on RCA chairman David Sarnoff which said:

"The public scored David Sarnoff's RCA with a lost round last year in the great color TV fight with CBS. Sarnoff did not stay down. Last week he showed the TV industry a new tube that receives clear, true color, and he showed the public that RCA's color system can do what CBS's can not: color programs broadcast by RCA can be received in black & white on present sets without any change. It looked as if radio's miracle man had not run out of miracles...

"There was no blurring or running of colors, even in the fastest movement, e.g., a pair of performing lovebirds flapping their wings. As a show topper, an RCA mobile unit focused on a swimming pool near New York where a troupe of swimmers and divers performed. The outdoor telecast, which RCA explained could just as well be a football game or boxing match, came through almost as clearly as the studio show."

But Gen. Sarnoff is cautious, Time says, regarding rapid spread of color. It quotes him:

"Commercial color TV on a big basis is still 2 to 5 years away. Material shortage, NPA cutbacks on TV production and defense orders will delay it...[And] it will take a long time to get the bugs out of mass production of the color tube."

Other TV men disagree, according to Time, which says: "Now, TV manufacturers are up to their ears in unsold sets, are more likely to grab at RCA's system, which they think will get customers buying again...if FCC gives the go-ahead."

[For other press comments this week, see page 9.]

* * * *

CBS's sorest problem remains -- sets. Not only to test public acceptance, but even to get affiliates to take network feeds. [For CBS's receiver plans, see p. 12.] Number of stations are willing to try color, but their refrain seems to be:

"We can't put on programs no one can see." That goes for such stations as Chicago's WBKB, Detroit's WJBK-TV, Louisville's WHAS-TV. Spokesmen for these CBS basic affiliates tell us they need monitors, as well as sets. Typical response was that of John Mitchell, WBKB manager:

"We're in a cooperative state of mind, but we'd like at least 10 sets before putting on color. I'm still very cognizant of the million set owners in Chicago. We've ordered a monitor from Gray Mfg. Co., but they gave us 90-day delivery date. We've made no commitment to CBS. One of our problems is that we have no time open for CBS's present color schedule."

CBS has to spread very thin its limited amount of equipment. Thus, Cincinnati's WKRC-TV will pick up CBS color for "one week stand" July 20-28 only, broadcasting signals to set rotated among Kroger supermarkets.

What CBS lacks in transmitting and receiving equipment, it's trying to make

up in well-publicized demonstrations and in continued output of publicity releases. Latest quote foreign radio dignitaries:

Jan Philip Boon, managing director general of National Belgian Broadcasting Institute, stated: "We have the advantage of being able to start TV broadcasting in color and should do so." President of Broadcasting Corp. of Japan, Tetsuro Furukaki, said: "After having seen the CBS system, which is so simplified and which brings such good results, I hope our country can inaugurate color telecasts very soon."

* * * *

How CBS sets will sell remains puzzler. Most manufacturers still place little stock in CBS system, either as a system or as potential market item. But RTMA (to which CBS now belongs by reason of Hytron merger) has taken new stand of impartiality, as expressed in speech by president Glen McDaniel at Chicago Music Show July 18. He said:

"The controversial language and the emotionalism should be forgotten. Some unduly sensitive souls [believe] that TV manufacturers would refuse to make and sell equipment to receive [CBS color] because their advice had been rejected by the Commission. This is nonsense. Our industry was recently described by the chairman of the FCC himself as perhaps 'the most competitive of all industries.' He is right...

"Whenever a public demand arises for adapters, converters, or color sets at prices that make production feasible, I'm sure that manufacturing industry will meet that demand...They would be particularly interested in a market for a new product at this time when they're suffering severely from heavy inventories and lack of sales."

As for compatible system, McDaniel said that "the industry is taking the Commission and Senator Johnson at their word" -- that any better system can again be brought to FCC when sufficient experience has been gained through field testing.

* * * *

CBS color was big attraction at Music Show, but few dealers appear to be going overboard. Writes Retailing Daily's correspondent:

"Buyers who seem to be well versed in the color controversy showed little or no interest in color at the show, while those attending who have never seen the phenomenon mobbed the booths of CBS and CBS-Columbia Inc.

"One New York store representative reported that his CBS color demonstration caused only passive interest in his customers until RCA went on the air with its field tests last week. At that moment, he reported, there suddenly was considerable activity in color and people assumed that color was here."

Lack of consumer interest, according to this buyer, was because CBS programs were "very, very bad" and "because of all the detrimental stories being circulated about the drawbacks of CBS-type equipment."

GE's TV sales director Donald Davis, in speech before Music Show group, put the merchandisers' case thus, vis-a-vis expected small output of color receivers by few set makers promising them:

"Remember that your store is an emporium and not a museum. If you put on your floor a color set today without actually being able to take orders on it and without knowing the price or being able to give an accurate delivery date, you're going to find your customers saying, 'I'll wait for that,' and refusing to consider the merchandise you have to sell -- black-and-white sets."

Some manufacturers are gearing themselves, meanwhile, for any eventuality. Stromberg-Carlson & Stewart-Warner are latest reported with sample slave converters -- a la Crosley, Bendix, Tele-tone, Meck -- ready to meet whatever demand arises.

Rights to CBS color for use with Eidophor theatre TV (Vol. 7:7,18) have been acquired by 20th Century-Fox. President Spyros Skouras says 20th Century will use the color TV in its own theatres and make it available to others. Film company plans demonstration of combined systems in September, may eventually produce some of its own shows for theatre network. A 20th Century official said company may some day make Eidophor projection TV sets for home use. Quality of picture produced by the Swiss system, he said, is "nearest thing to home movies."

Reproduction of CBS color pictures in July 23 *Life* isn't quite accurate. Actually, CBS closeups are somewhat sharper than most of the pictures. *Life* commented cautiously: "The [CBS] premiere went off on schedule and, although some critics found the entertainment a bit ragged . . . most agreed that color TV was fascinating."

PRESS reaction to RCA color (Vol. 7:28) continues in same vein as last week, overwhelmingly favorable. Herald Tribune syndicate columnist John Crosby, who has always been sold on compatibility, wrote: "CBS's system [is] now the law of the land. Yet it is still an uncomfortable secret which CBS would like to share with the rest of us but doesn't quite know how to go about it. The RCA system, while not exactly illegal, is terribly unofficial . . . As to the merit of the two systems, it would be pretty hard to determine unless CBS and the improved RCA receiver were set side by side. The differences, I suspect, would be of great interest to the engineers but probably wouldn't be very noticeable to you and me.

"RCA color, I think, is sometimes a little more pallid, not quite so rich in texture as the CBS brand, just the same it's good color transmission . . . Just now TV needs a lot of things—imagination, taste and money, to name three; it needs almost everything *except* color. The progress of the art [would] be seriously interrupted by any noncompatible system like CBS's; it would be left unimpaired and possibly unchanged for years to come by RCA color . . ."

Bruce Robertson, of *Broadcasting*, which has maintained cautious approach throughout, ventured: "A reopening of the color TV question, probably on a petition for dual standards . . . seemed inevitable last week . . . Fine quality of the black-and-white reception of the colorcast images also was noted . . . RCA's colors seemed to tend toward the pastel shades, pleasing but less vivid and exciting than the hues shown by CBS . . . There was no fringing in RCA colors . . . Most noticeable advantage of the RCA method [was] in the flesh tints. RCA's were true and lifelike at all times, while the faces of the performers before the CBS color cameras paled and darkened as they turned toward and away from the studio lights . . . No one could ask for better color fidelity or more accurate skin tone reproduction than was demonstrated in the pictures of Nanette Fabray."

Leaning towards CBS in past, *Editor & Publisher's* Jerry Walker said: "This department, which has had a soft spot for CBS on the same ground as the FCC—that the CBS system was the only one really ready, as of last year—finds it difficult now to chase the cruel thought that FCC is riding an obsolete horse. The RCA pictures seen this week could easily stand up to comparison with the CBS presentation . . . The direct large-sized pictures, with 16-in. and 21-in. tri-color tubes, were easier on the eyes than those seen through magnifying glass. Also noted was the absence of flicker and color hangover. The eyes carry over a flashing spectrum as they blink while watching a CBS 'mechanical' (rotating disc) picture."

After thumbing through some of RCA's thousands of viewer responses regarding compatibility, *New York Herald Tribune's* Joseph Kaselow wrote: "Many letters said the black-and-white pictures had better definition and clarity than the regular telecasts and, in some instances, that something approaching a 3-dimensional effect was achieved. The pictures also were said to have 'more blackness' than usual. A random sampling of the letters and cards showed that, in addition to giving the basic information asked by RCA, many set owners were surprisingly well informed on the issues involved in the color controversy . . . As was to be expected, viewers liked the idea of being able to receive the colorcasts without having to buy and install adapters . . . The few letters which included criticism of the pick-ups said that there had been blurriness in the long shots and during rapid action."

Harry MacArthur, of the *Washington Star*, mulled over what he'd seen, wrote another piece on it: "It is hard to foresee anything but approval of the system when it is submitted to the FCC, which is certain to happen in due course . . . You can be sure of one thing. Before it is submitted to the FCC again, this RCA color system will have been tested, retested and tested again until it is definitely proved immune to earthquake, fire, flood, unexpected cataclysm of nature or any possible disaster . . . The two color TV systems are close enough together now that some might find it hard to choose between them."

Personal Notes: Harold L. Morgan Jr., ABC-TV operations director, elevated to v.p. in charge of TV program dept., reporting to Alexander Stronach Jr., TV v.p.; Charles M. Underhill, ex-CBS, joins ABC-TV July 30 as national director, program dept.; Henry T. Hede named business mgr., Anthony M. Hennig production mgr., program dept. . . . James C. McNary has withdrawn from consulting engineering partnership of McNary & Wrathall, will continue Washington offices while Grant Wrathall continues to operate from Aptos, Cal. . . . D. L. Provost, business mgr. of WBAL & WBAL-TV, Baltimore, named acting gen. mgr., Hearst Radio Inc. under president Charles B. McCabe; he will work out of Baltimore . . . William A. Williams elected asst. treasurer, NBC, reporting to Joseph V. Heffernan, financial v.p. . . . Ray Stone named asst. mgr., CBS-TV network sales service dept. under Robert F. Jamieson . . . Robert G. Dalchau promoted to film editor, KEYL, San Antonio, succeeding Tom J. Maloney, resigned; Vernon Poerner named stage mgr., following promotion of Bill Michaelis to director . . . Frank A. Daniel appointed mgr. of TV-radio dept., Lennen & Mitchell . . . Clinton F. Wheeler Jr., ex-BBDO, named director of TV-radio, Hewitt, Ogilvy, Benson & Mather . . . Michael Foster scheduled to head up TV public relations dept. of newly-reorganized CBS setup (Vol. 7:28), George Crandall to handle radio . . . Henry J. Christal, partner in Petry rep firm, has resigned, indicating no future plans . . . I. E. (Chick) Showerman, Free & Peters, nominated to succeed WMCA's Norman Boggs (soon joining Don Lee) as president of N. Y. Radio Executives Club.

TV Program Standards Committee (Vol. 7:25, 28) will lay groundwork for TV code July 30 at NARTB headquarters in Washington. In addition to chairman Robert D. Swezey, WDSU-TV, New Orleans, members are: From NARTB board—Harry Bannister, WWJ-TV; Harold Hough, WBAP-TV; Clair R. McCollough, WGAL-TV & WDEL-TV; Paul Raibourn, KTLA-TV. Non-board members—Walter J. Damm, WTMJ-TV; James C. Hanrahan, WEWS-TV; J. Leonard Reinsch, WSB-TV & WHIO-TV; Henry W. Slavick, WMCT-TV; Donald W. Thornburgh, WCAU-TV. Network members—Davidson Taylor, NBC; James L. Caddigan, DuMont.

Code of ethics for TV films was adopted at July 19 meeting of National Society of TV Producers in Hollywood, with ex-newsman and movie producer Martin Mooney named to administer it. Code covers such subjects as "crimes against the law, race and nationality, vulgarity, obscenity and profanity, religion and sex," is similar in content to motion picture code. NSTP also announced it is setting up committee under president Louis T. Snader to formulate standard labor relations contract for TV film industry.

FM committee of NARTB, named this week by president Harold Fellows: Ben Strouse, WWDC-FM, Washington, chairman; Frank U. Fletcher, WARL-FM, Arlington, Va.; Josh L. Horne, WFMA, Rocky Mount, N. C.; Edward A. Wheeler, WEAW, Evanston, Ill.; Raymond S. Green, WFLN, Philadelphia. Alternates: Everett L. Dillard, WASH, Washington; Victor C. Diehm, WAZL-FM, Hazleton, Pa.; Herald Harrison, WMAS-FM, Springfield, Mass.

Count of TV Sets-in-Use by Cities

As of July 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

SETS-IN-USE total went above 13,000,000 as of July 1, up from 12,769,300 reported for June 1 (Vol. 7:25) by NBC Research—reflecting steady audience growth despite receding rate of sales due to slump. New York area total went to 2,435,000, up 45,000 from preceding month. Los Angeles was credited with an even 1,000,000, up 67,000. On other hand, Philadelphia's 863,000 was mere 5000 gain in month, Chicago's 940,000 gain of 10,000. These are the July 1 estimates (consult individual stations for estimates of number of families within respective service ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	60,000
Atlanta	2	119,000
Baltimore	3	304,000
Binghamton	1	40,700
Birmingham	2	57,400
Bloomington, Ind.	1	16,800
Boston	2	748,000
Buffalo	1	207,000
Charlotte	1	82,600
Chicago	4	940,000
Cincinnati	3	261,000
Cleveland	3	482,000
Columbus	3	150,000
Davenport-Rock Island	2	58,600
Dayton	2	131,000
Detroit	3	501,000
Erie	1	49,200
Grand Rapids	1	79,400
Greensboro	1	70,800
Huntington	1	46,100
Indianapolis	1	143,000
Jacksonville	1	33,000
Johnstown	1	101,000
Kalamazoo	1	40,600
Kansas City	1	125,000
Lancaster	1	104,000
Lansing	1	55,000
Louisville	2	93,300
Memphis	1	87,600
Milwaukee	1	247,000
Minneapolis-St. Paul	2	269,000
Nashville	1	33,300
New Haven	1	163,000
New York	7	2,435,000
Norfolk	1	71,600
Omaha	2	79,900
Philadelphia	3	863,000
Pittsburgh	1	310,000
Providence	1	156,000
Richmond	1	83,700
Rochester	1	84,600
Schenectady	1	159,000
St. Louis	1	297,000
Syracuse	2	124,000
Toledo	1	95,000
Utica	1	45,200
Washington	4	270,000
Wilmington	1	72,400
Total Interconnected	81	11,045,800
Non-Interconnected Cities		
Albuquerque	1	9,000
Dallas	2	124,000
Fort Worth	1	
Houston	1	82,200
Los Angeles	7	1,000,000
Miami	1	75,000
New Orleans	1	58,600
Oklahoma City	1	91,900
Phoenix	1	38,400
Salt Lake City	2	47,500
San Antonio	2	47,500
San Diego	1	103,000
San Francisco	3	204,000
Seattle	1	87,500
Tulsa	1	*74,200
Total Non-Interconnected	26	2,042,800
Total Interconnected and Non-Interconnected	107	13,088,600

* Same as June 1; no new figure reported for July 1 at time of going to press.

Station Accounts: H. J. Heinz Co. (57 Varieties) using TV for first time starting Aug. 10 on WDTV, Pittsburgh, sponsoring 26 Friday segments of *Kay's Kitchen*, Kay Neumann's local domestic science show, placed thru Maxon Inc., N. Y. . . . "Old Stove Round-Up" campaign of 800 gas utility companies, joining with 62 gas range manufacturers and 40,000 appliance dealers, will have $1,500,000 ad budget for September-October campaign, using TV along with local newspapers and radio . . . Glidden Co. to advertise new Spred Satin rubber latex emulsion "wonder paint" for interiors, to use TV along with radio, newspapers, magazines, thru Meldrum & Fewsmith, Cleveland . . . Scrip to Israel, corporation headed by Bartley C. Crum, to promote sending certificates to persons in Israel which may be redeemed without ration points for food, clothing, etc., will use TV and radio, thru J. R. Kupsick Adv., N. Y. . . . BAB has issued 30-page report on dairy industry, designed to aid broadcasters in servicing accounts . . . Drewry's Ltd., South Bend (beer), has named MacFarland Aveyard & Co., Chicago, to replace Maxon Inc. as agency, plans spending $250,000 rest of year on TV-radio, about 75% on Chicago and Michigan TV stations, remainder on regional radio; Drewrys is about to merge with Atlas Brewing Co. and Schoenhofen Edelweiss Co., both Chicago . . . Muntz TV sponsoring *I Want to Get Married*, advice panel on KTTV, Los Angeles, Tue. 9-9:30 p.m. . . . Among other advertisers reported using or preparing to use TV: Dentabs Inc. (mouthwash & gargle), thru Raymond Morgan Co., Hollywood; Kingan & Co. Inc. (meat packer), thru Warwick & Legler, N. Y.; Ben-Gee Products Inc. (bean sprout balm), thru Schoenfeld, Huber & Green Ltd., Chicago; Radion Corp. (TV antennas), thru Calkins & Holden, Carlock, McClinton & Smith, Chicago; W. F. McLaughlin & Co. (Manor House coffee), thru Earl Ludgin & Co., Chicago; Thomas (hair & scalp specialists), New York (WOR-TV); Kentile Inc. (flooring material), thru Ruthrauff & Ryan, N. Y.

Network Accounts: NBC-TV's Saturday night *All Star Revue* and *Your Show of Shows*, resuming Sept. 8, are virtually sold out—only vacancy left on *All Star Revue*. Lineup for 8-10:30 show begins with Pet Milk and newly signed Snow Crop Marketers participating in *All Star Revue*, 8-9; Camel will sponsor 9-9:30 segment of *Your Show of Shows*, with Benrus, SOS (scouring pads) and Minnesota Mining Co. (Scotch tape) sharing 9:30-10 time and Lehn & Fink (Lysol, Hinds) and Eversharp-Schick alternating 10-10:30 portion weekly . . . Celanese Corp. of America (textiles, plastics, chemicals), starting Oct. 3, will sponsor *Celanese Theatre* alt. weeks on ABC-TV, Wed. 10-11 . . . General Foods (Maxwell House coffee) substituting *The Ad Libbers* for *Mama* during 5-week vacation beginning Aug. 3 on CBS-TV, Fri. 8-8:30 . . . ABC-TV has bought *Crusade in the Pacific*, sequel to *Crusade in Europe*, will make it available to all affiliates for early fall local sponsorships.

Some 80% of the program time on American TV stations is sponsored, NARTB's research dept. reported July 18 in analysis of program logs of 81 stations. This doesn't include out-of-program or spot announcements, which averaged 216 a week per station, or 3.2 per hour of operation. Analysis showed average TV station is on the air 82 hours, 25 minutes per week, exclusive of test patterns. Study also indicated TV stations devote average 6.5% of weekly broadcast time to "educational, religious and discussion programming," including travelogs, educational films and features, press interviews, forums and discussions, but not including news, weather or market information. Fifty-five interconnected stations took 50% of their programming from networks; 12% kinescope, 18% film, 17% live local programs. Twenty-four non-interconnected stations derived 46% of their program time from kine, 28% film, 29% local live shows.

CBS will reflect reorganization (Vol. 7:28) right down to network identification announcements. Starting July 22, it's: "This is CBS television." Next day, it begins: "This is the CBS radio network."

Bulova president John H. Bullard presented plaque this week by NBC chairman Niles Trammell to commemorate 10th anniversary of TV's first commercial time signal placed July 1, 1941.

TV Station & Network Map

New Television Map of the United States, in color, revised to July 15, 1951, showing locations and lists of all operating TV stations with present and projected (1951-52) network routes, was made available with each copy of our *TV Factbook No. 13*. It's 22x34-in., suitable for wall or desk, usable as working outline. Demand for this map has been so great that we've ordered re-run, can offer extra copies at $1 each—or 50¢ each in quantities of 20 or more.

Television Digest WITH AM-FM REPORTS

Trade Report
July 21, 1951

'BEDROCK NOW—NO PLACE TO GO BUT UP': Still loaded with factory TV inventories that may be nearly as large as total in trade pipelines (see figures below), most TV-radio manufacturers resume post-vacation production determined to err this time on side of conservatism. They plan no great surge of output -- however confident some are about fall-winter market, for which they normally begin producing about now.

So it will be surprising, indeed, if second half 1951 production comes anywhere near first half's 3,300,000-odd TVs, 8,000,000-odd radios (Vol. 7:27). Third quarter, with July-August vacation shutdowns running 2-4 weeks (Vol. 7:25-26), seems certain to fall off to negligible total compared to first quarter's 2,200,000 and second quarter's 1,110,000. Thereafter, it's anybody's guess.

[Note: It's interesting fact that first half 1951 TV units are very few more than automotive industry's 3,103,111 passenger car production in same period.]

* * * *

Where do we go from current small-scale output -- for it's no secret that all factories have post-vacation schedules in low gear? RTMA president Glen McDaniel told NAMM convention in Chicago this week:

"I do not believe I am being unduly rash when I say that business will improve this fall and winter. To begin with, we are at bedrock now and there's no place to go but up. Second, the fall and early winter are normally the best sales months for our industry. Third, the quickness with which set manufacturers cut back their production in the second quarter has had its effect in lowering retail inventories and putting an end to threats of dumping.

"Many of you will recall the somewhat alarming condition that arose in May when a public auction was announced in New York for the purpose of unloading $5 million worth of TV sets and similar auctions were started in other cities. The extended credit condition of many dealers throughout the country was a cause of very grave concern to us when the auction movement started. Balance quickly restored itself, however, and dumping operations decreased.

"I believe that the action of the manufacturers in sharply curtailing production was instrumental in avoiding financial catastrophe for many dealers. Dealer inventories are now generally being reduced, and a return to normal dealer buying can be expected by late summer or early fall."

McDaniel held out hope for relaxation of Regulation W, approved by House a few days later (see p. 1). As to outlook for raw materials, he said:

"It now appears that, despite growing limitations on civilian uses of these materials, the industry will be able to manufacture as many TV and radio sets as the market will absorb before end of the year unless more severe shortages develop. This is due in part to progress the industry has made in its materials conservation efforts...achieved without any sacrifice of quality in the equipment or parts."

* * * *

Dun & Bradstreet report on dealer inventories should be out in week or so, giving first authentic figures on extent of pileup. Meanwhile, with RTMA releasing ever-mounting factory inventory figure each week, popular trade guessing game -- and source of lots of whispers -- is who has most of the sets?

Only frank admission that it was warehousing considerable numbers came from General Electric, which turned out somewhat over 300,000 sets first 6 months of this year, resumed production July 16 at rate of 75,000 per quarter -- in other words, plans to turn out half as many second half 1951 as it did first half. It doesn't tell how many TVs it has in warehouses, but GE's TV sales chief David Davis said in Chicago this week:

"We believe that the present excess inventory position of the industry will reverse itself into a definite shortage position before the end of the year. We

believe that any inventories you may accumulate during the summer will be the best insurance that you will be able to satisfy the great acceptance and demand which we expect to have this fall [when] we believe that the industry as a whole will be seriously curtailed."

Few others will admit big inventories, some pointing ruefully to the huge financial resources that enable GE to do what they cannot -- even if they were minded to. Taking cognizance of whispers about its condition, Admiral issued statement denying it now has any factory inventory at all and revealing its strong financial position (see Financial Notes), particularly as one of the few big (or little) companies in TV-radio without any bank loans.

* * * *

Output of TVs dropped to mere 8270 (no private brands) during second summer plant vacation week, ended July 13. Radios totaled only 99,667 (88,673 private). The TVs compare with 12,817 week preceding, radios with 74,863 (Vol. 7:28). Radios were 72,553 auto, 21,964 home, 5150 portable.

Factory inventories of TVs went up a bit more -- to 744,162 from 739,945 week before. Radio inventories were 351,368, down from 406,046.

RTMA revised 6-month output figures now show 3,331,268 TVs (vs. 3,136,300 same period last year) and 8,027,254 radios (vs. 7,333,600). Of these, 2,199,669 TVs and 4,343,600 radios were produced during first quarter.

WHAT CBS COLOR SETS WILL BE LIKE: CBS-Columbia Inc. now plans novel color receivers with 2 picture tubes -- one tube 17 or 20-in. for black and white, the other 10-in. (magnified to 12½) for color. Proposed models would have tubes side-by-side and/or one above the other. "Shot-in-dark" estimate of price: $600.

That's latest from big radio network's manufacturing subsidiary, revealed by its president David H. Cogan. But first color production, he said, will be $500 10-in. (magnified) color-monochrome set with disc that splits to give black & white (Vol. 7:23). Pilot run of 500 is slated for late August, going to 300-a-day rate in September -- "if we can get materials, and we're having a little trouble."

Then will come $249 "slave" unit with 10-in. tube, along with a $400 color-monochrome set. Thereafter, the 2-tube set may emerge in October.

Plan is to devote former Air King factory one-third to color sets, produce 25,000 by year's end. Air King, said Mr. Cogan, has been making 20,000 black-and-white sets monthly -- heavily in private label field (including Sears Roebuck).

* * * *

If ardor for FCC-approved CBS color system has been dampened by RCA's very successful demonstrations of tri-color tube last week (Vol. 7:28), it isn't apparent among CBS folk. Well-attended showings of its color models at Chicago Music Trade Show this week were deemed huge success. Said Mr. Cogan: "We aren't taking orders, because we have orders for all we can produce from our established distributors -- and they're on allocation."

What did he think of RCA's color, as he and other CBS executives saw it last week? "No better," he replied, "than last year. Do you think their set is a production item? With 54 tubes? And a tri-color tube that would cost $200?

"RCA says our sets are too expensive. Then they say they can bring their costs down. Don't they think we can bring our costs down, too?"

CBS chairman Wm. Paley may differ with Cogan in evaluation of RCA color. According to Variety, Paley "reportedly told friends he was impressed by the 'tremendous improvement'...He is said to have been especially impressed by RCA's compatibility feature...He observed, however, that CBS colors are still more brilliant."

CBS has tried the RCA tri-color tube with its system, and Cogan reports: "It doesn't compare. Don't think we wouldn't use such a tube if there were a good one. We'd be glad to have it. We're in the tube business, too [Hytron] -- not in the manufacture of discs and motors. It just happens that the disc is the best and cheapest way of producing color today."

It would take only 4-5 extra receiving tubes to incorporate tri-color tube

in CBS sets, he added. He emphasized rejection of tri-color tube when he said that drum sets for 17-in. or larger pictures are planned next year.

* * * *

Besides TV and radio advertising, splurges in Life, Saturday Evening Post, etc. are planned in promotion campaign this fall-winter. But CBS is now treading cautiously, for it faces (1) problem of keeping that two-thirds line of monochrome receivers moving; (2) task of meeting pro-compatibility arguments of main body of the TV-radio industry, who also are good advertisers and promoters; (3) probable need to persuade own color set customers their sets won't be obsoleted soon. As a starter, it has published booklet "Questions and Answers About Color Television."

Topics & Trends of TV Trade: NAMM's annual music trade show in Chicago this week resulted in little, if any, more business for TV manufacturers than did dull summer furniture market there few weeks earlier. Reports were uniformly "blue"—*Retailing Daily's* Martin Rosenblum even describing how some of the exhibitors (Vol. 7:28) whiled away their time (as retailers merely "looked around") by watching ball games on their display sets or playing gin rummy. Consensus seemed to be that it was slowest such show in many years, that much of the time was spent bemoaning sad state of business and engaging in guessing games about when upturn would come.

Reporter Rosenblum even told of furniture chain picking up 17-in. tables at $85, to be promoted shortly at $139 retail; of "secondary manufacturers" quoting 17-in. leatherette-covered table at $105, 20-in. table at $130, 20-in. open console at $140, latter 2 with tax-warranty included.

New York trade circles sat up and took notice this week when Gertz dept. store in Jamaica advertised 17-in. table sets (made for store's own Ambassador brand by Starrett) at $99 plus $20 to cover excise tax year's warranty on picture tube, 90-day warranty on replacement parts. Needless to say, the sets sold like the proverbial hot cakes.

Off-brand manufacturers are known to be offering enormous concessions to dealers to help move factory inventories, and it's generally felt some mortalities are inevitable. But the top brand producers insist they're sticking to wholesale price schedules, pressing their outlets to promote more and more, some even paying 100% of the retail advertising bills. In fact, one of biggest told us last week that, so far as his company and others at top level are concerned, business at retail level has been "extraordinarily good" this summer—better than seasonally expected; even better than same time last year.

Factory sales are another matter, and the big boys are simply biding their time until retailers unload; they're confident of good fall-winter season, though nobody thinks it will be as good as lush 1950's. Some think the industry was lulled by easy selling last year into thinking that condition would be permanent.

* * * *

Prices being quoted on such new models as are coming out don't indicate any price collapses—quite the contrary. Magnavox's 2 additions to line are TV-radio-phono combination at $595 list in mahogany, $610 blonde, and TV console at $475. Zenith has 5 new super-dooper 19-in. mahogany units selling from $1300 to $1925. Stromberg-Carlson adds 12 new sets, lowest priced being 17-in. at $290, with 4 new 24-in. at $675, $725, $795, $975 proposed list. Pilot's new sets range from 17-in. mahogany table at $299.50 to 20-in. console at $495. Trad has 24-in. console at $340, 20-in. console at $220. Video Products Corp., now operating as Sheraton Television Corp., has 20-in. line starting with table at $300 up to console at $379, plus 24-in., unpriced.

RASH of articles on how to hypo TV sales has broken out in current issues of merchandising publications. For example:

July *Electrical Merchandising* features spread on "Two Ways of Riding the TV Slump," discusses results achieved by Algene Electric Co., Bridgeport, Conn., based on good servicing department, very little advertising, no price-cut promotions or big trade-in offers. Contrasting methods used by Music Shop, Cleveland, are described in same article; it increased sales volume from $20,000 to $75,000 a month on basis of large trade-in business built up solely by newspaper advertising. Store does no installation or servicing.

Sales resistance fostered by color ballyhoo is hot topic in July *Radio & Television Retailing*. Two-page question-answer feature, "What to Tell Your Customer About Color Television," points to paucity of color programs and sets, high cost of sets, "open door" to compatible systems, etc. Another article, "How One Dealer Overcomes the Color TV Sales Bogey," points to success of Sneed's Radio & Television Co., Tulsa, in telling public via ads and talks that "folk who 'wait' will miss big shows now on air." In same magazine is story on how to "Sell More TV Sets via the Home-Trial Method."

"How a Music Dealer Sells Television" through planned promotions, intelligent displays, alertness to changing times is discussed in July *Radio & Television Journal* article on Hopper-Kelly music store, Seattle.

Overcoming credit restrictions is topic of big feature in July 12 *Retailing Daily*, which cites "new, aggressive merchandising plan" which it says boosted TV sales of Dorn's House of Miracles chain in Los Angeles $500,000 in 5 months. Dorn's, says article, turned "temporary defeat by hands of Regulation W into startling sales victory." Owner Harry Dorn is quoted: "The crux of the whole problem is that you must offer sets at a low enough total price so that the down payment is also budgetwise."

Note: In anticipation of end of freeze, NARDA is instituting unique program to acquaint dealers from non-TV areas with problems and techniques of TV retailing. NARDA members in TV areas are being asked to serve as hosts to dealers from non-TV cities to give them first-hand look-see into the unique aspects of TV receiver selling.

* * * *

Sylvania is out with 14 new models, four embracing its new "Halolight" for better viewing comfort (Vol. 7:23, 25, 28). Three 17-in. tables sell at $250, $300, $310; one 20-in. at $400. Two 17-in. open consoles are $370 & $380; two 20-in. with Halolight are $500 & $520. Two 17-in. consoles with doors are $400 & $420, and 20-in. console with Halolight $530. Console combinations are 17-in. at $550 & $570, and 20-in. with Halolight $660. Carried over are 12 models, ranging from 14-in. table at $220 to 20-in. consoles with doors at $490 & $510 to 17-in. combination at $550.

Some new lines have uhf converters offered separately, Sylvania's at $44.95 and Stromberg's promised later this year at around $50.

Trade Personals: Marvin Hobbs named electronics advisor to chairman John Small, Munitions Board, succeeded as chief of Office of Electronics Programs by Col. C. A. Poutre, Signal Corps . . . Edward M. Tuft, RCA Victor v.p. and director of personnel, appointed to newly created post of v.p. in charge of organization development, coordinating company's manpower for expansion and development; Albert F. Watters promoted to director of personnel . . . K. R. Patrick, gen. mgr., engineering products dept., RCA Victor Ltd., Montreal, new president of Canadian Aviation Electronics Ltd. . . . Joseph Thwaites appointed mgr. of electronic research, Canadian Westinghouse Ltd. . . . Robert H. Bishop, Sylvania sales v.p., resigns as of Sept. 1 to join Drew Chemical Co., N. Y. . . . M. D. Schuster, ex-Hoffman Sales Corp. gen. mgr., recently with Magnavox as district mgr., has returned to Hoffman Radio as national sales mgr. under R. J. McNeely, director of sales . . . William J. Halligan Jr., 25, eldest son of founder-president of Hallicrafters, Notre Dame graduate, Navy radio veteran, appointed chief of Hallicrafters communications equipment sales . . . Robert D. Dunn, ex-asst. treasurer, Phillips Export Corp., promoted to v.p. . . . Henry R. Geyelin, DuMont receiver sales div. adv. mgr., appointed to coordinate advertising of various DuMont activities . . . Muriel Young, ex-Raymond Loewy Associates, appointed head of Emerson industrial design dept.

———■———

Time Magazine's July 23 cover story on RCA chairman David Sarnoff discloses that he has "plans to expand RCA into new territory." It states: "He is already itching to put RCA into the electric-appliance business, NBC into the movie business (to make films for TV), and is planning a 'pay-as-you-hear' TV system which would not depend on telephones as does Zenith Radio Corp.'s system." Trade gossip has long had RCA entering appliance fields, and it's known to have looked into several properties. This week, there was unconfirmed report that IT&T, which last year purchased Farnsworth, was negotiating for control of Coolerator Corp.

Trade Miscellany: Crosley distributor meetings to be held in Chicago, July 26-27 . . . Philco holding no summer convention but has called distributors (no dealers) for informal sessions in New York's Waldorf-Astoria, Aug. 3-4, and in Chicago, Aug. 6-7 . . . Westinghouse's new TV-radio line to be showed to distributors in New York Aug. 6, Chicago Aug. 13, San Francisco Aug. 20 . . . Admiral calling in some 200 executives of own and distributor branches for Aug. 10-11 meetings in Drake Hotel, Chicago —won't show new models but will conduct "clinic" on selling, on uhf & color, other merchandising problems.

Merchandising Notes: "Price is now the deciding factor in moving goods," said William Tobey, v.p. of big Abraham & Straus dept. store, Brooklyn, in reporting July 20 on "more than satisfactory" volume achieved this week in selling Wilcox-Gay 17-in. table model at $129 (regular list $290), 17-in. console $159 (regular $359), 19-in. console with doors $249 (regular $475) . . . Kaye-Halbert Distributors Inc., Los Angeles, offering customers 5 days with room and board at 3 southern California and Mexican resorts with purchase of each model priced from $369; salesman gets clothing certificates for each set sold, same type paid vacation if he sells 24 sets . . . Big Hudson Ross chain opens branch in Chicago's Merchandise Mart soon, to be managed by Frederick Dumont . . . DuMont new policy warrants its TV tubes sold as replacements for 6 months from date of installation in user's set; formerly it was 6 months after shipment from factory. Move is designed to stimulate replacement-conversion business among the 1,000,000 TVs 3 years old or more and the 3,000,000 sets 12½-in. or smaller.

Mobilization Notes: Top 50 defense contractors include 8 firms which are heavy producers of electronic equipment. This was revealed July 18 when Senate Small Business Committee made public list of companies receiving "heaviest concentration" of military orders from July 1, 1950, to June 1, 1951. Committee's complaint was that 10 big firms got 40% of defense contracts during that period. Most of the "electronic" firms listed make many non-electronic military items.

Two electronic firms made the "big 10." They were GE, seventh with $500,000,000 in military contracts, and Bendix, tenth with $475,000,000. Other companies in electronics field which appeared on list: Western Electric, 13th, $343,000,000; Westinghouse, 15th, $245,000,000; Sperry Corp., 21st, $198,000,000; Avco, 32nd, $122,000,000; RCA, 36th, $108,560,000; Raytheon, 39th, $103,500,000.

Heading whole list was General Motors with $3.5 billion, Ford with $1 billion. Among the first 10 were 6 aircraft companies in addition to Bendix—all of which are known to be deeply in production of aero electronic equipment (radios, radar, guided missiles, etc.). They are Boeing, Curtiss-Wright, Lockheed, Republic, United Aircraft, North American Aviation.

* * * *

Twelve electronic equipment firms received DPA certificates of necessity for tax aid in expansion of production facilities during 2 weeks ended July 13. Largest went to General Radio Co. for expansion of facilities for production of electronic test equipment at Cambridge, Mass., estimated cost $725,000, of which 75% is to be amortized over 5-year period. Other certificates were granted to: American Lava Corp., Chattanooga, Tenn., titania dielectrics, $362,000 at 75%; Amperex Electronic Corp., Wyandanch, L. I., communication and industrial electron tubes, $83,750 at 75%; Sylvania (Radio & TV Div.), Buffalo, N. Y., ordnance, $67,524 at 75%; Tung-Sol, Bloomfield, N. J., electron tubes, $65,951 at 75%; Gorham Mfg. Co., Providence, R. I., electronic mixer assemblies, $63,419 at 85%; Reeves-Hoffman Corp., Carlisle, Pa., oscillators, $50,765 at 75%; Clarostat Mfg. Co., Dover, N. H,. resistors, $40,740 at 75%; General Instrument Corp., electronic equipment, $30,612 at 85%; Polorad Electronics Corp., Brooklyn, N. Y., receiving equipment, $18,260 at 85%; Raytheon, Waltham, Mass., transformers, $14,079 at 85%; DuMont, cathode ray tubes, $6,038 at 85%.

Plant expansions have been authorized by NPA under construction control regulations (Order M-4) for 3 manufacturers of electronic equipment during 2 weeks ended June 30. General Electric was given approval to construct addition to laboratory at Syracuse, estimated cost $2,133,000. Magnavox got OK for new factory at Ft. Wayne, to cost $329,000. Sylvania was authorized to build industrial building at Buffalo, $315,000.

———■———

Ray S. Erlandson, president of San Antonio Music Co., was reelected president of National Assn. of Music Merchants by NAMM board at Chicago convention. Harry E. Callaway, Thearle Music Co., San Diego, was renamed v.p. Other officers elected: Thomas J. Holland, Glenn Bros., Salt Lake City, secy.; Ben F. Duval, W. W. Kimball Co., Chicago, treas. Wm. R. Gard was reelected executive secy.

Assn. of Electronic Parts & Equipment Manufacturers, at Chicago meeting this week, elected John H. Cashman, Radio Craftsmen Inc., as chairman; Francis F. Florsheim, Columbia Wire & Supply, vice chairman; Helen S. Quam, Quam-Nichols, treas.; Kenneth C. Prince, executive secy.

RTMA's inning on excess profits tax bill comes Aug. 2 when spokesmen (probably chairman Sprague and/or president McDaniel) will testify before Senate Banking Committee.

Financial & Trade Notes: Admiral's president Ross Siragusa reported this week (1) that company "has no completed TV sets in inventory at the factory level," and (2) that "while Admiral has large untapped available bank credits, it is free of debt financing, none is contemplated, and the company has expanded its working capital to $25,-700,000 compared with $21,900,000 in December while net worth has increased to $35,900,000 for the same period."

To all Admiral dealers, Siragusa sent letter with first half 1951 financial figures, stating "Admiral's financial health is in the best shape in its history," cautioning them to consider financial responsibility of manufacturers from whom they get goods, forecasting "healthy resumption of TV buying in the fall." Company resumed production this week after vacation period, gearing output to demand of distributors.

Admiral sales first 6 months of 1951 totaled $103,587,-355, net profit after taxes $4,093,421 ($2.12 per share), as against $103,295,848 sales and $8,485,184 ($4.24) profit for same 1950 period. Second quarter sales were $33,265,807, net profit $1,690,078 (88¢) vs. $57,004,439 sales and $4,326,-755 profit ($2.16) same 1950 quarter. Most of second quarter earnings, it was reported, came from readjustment of tax reserves. Drop in volume is shared with whole TV-radio industry, Siragusa blaming it on "general consumer apathy attributed to stringent govt. credit restrictions, 10% excise tax and confusion over color TV."

Govt. orders have increased, deliveries begun, expected to reach peak within 6 months so that "the $5,000,-000 to $6,000,000 rate of delivery per month of govt. orders will compensate in Admiral activity for any decline in civilian business occasioned by material shortages."

* * * *

United Paramount Theatres Inc. reports consolidated earnings of $4,849,000 for first 6 months of 1951, including capital gains and company's share of earnings of non-consolidated subsidiaries. Earnings are equal to $1.49 per share, compare with $5,660,000 ($1.74) for first half 1950. Provision for Federal taxes for first half amounted to $3,256,000 vs. $2,445,000 same period last year. Quarter ended June 20 showed $2,058,000 earnings (66¢) compared with $2,467,000 (93¢) for second quarter 1950. President Leonard Goldenson reported proxies on proposed UPT-ABC merger (Vol. 7:21, 26, 28) are overwhelmingly in favor. Through July 13, proxies from 12,319 stockholders representing 1,183,503 shares voted in favor of merger proposal and 75 holders representing 8474 shares opposed; thus, 36% of outstanding stock has been voted in favor, .03% against.

V-loan credit of $50,000,000, plus additional unsecured credit line of $20,000,000 was arranged this week by Avco president Victor Emanuel, who stated they're to finance defense contracts for "wide range of electronic equipment" along with tanks and aircraft engines and airframe components. It's largest loan processed to date through New York Federal Reserve Bank, participants being 14 banks headed by Bankers Trust.

How higher taxes are biting into profits is illustrated in GE statement for first 6 months, showing all-time record sales of $1,184,735,000 and pre-tax profit of $212,326,-000—latter reduced by 139% tax increase to $70,326,000 ($2.44 per share) as against $77,445,000 ($2.68) same period 1950. June quarter sales were $615,047,000, net earnings $35,329,000 ($1.33).

International Resistance Co. has purchased Hardy Instrument Co., Forest Hills & Long Island City, N. Y., makers of Microstak rectifiers, etc., will operate it henceforth under IRC specialty div., Philadelphia; president Norman Hardy and chief engineer Benj. Solow join IRC.

Motorola sales for first half 1951 were approximately $72,000,000 compared with $70,568,388 for same 1950 period. Second quarter sales slumped to $25,500,000 from $34,717,415 for second quarter 1950 due to falling off of TV demand. Forward buying of TV sets first quarter this year, says preliminary report, "borrowed" greatly from sales in first quarter. Said July 16 letter from president Paul Galvin to stockholders:

"Assuming a Korean armistice and no world war, this is about the way the next six months appear in prospect. We do not expect to equal the dollar volume attained in the last six months of 1950, nor do we expect to show earnings equivalent to those of the same period of 1950. Volume reduction will be influenced greatly by controlled material govt. regulations which will limit our production of civilian goods. Car radio sales should parallel automobile sales which, in turn, will be curtailed by govt. regulations. TV sales, in addition to regulations limitations, will be influenced by the forward buying of the past year, as well as by the restriction of markets due to the [FCC] 'freeze' . . . Our home radio and communications sales, however, will probably remain about the same as in the last 6 months of 1950. Our govt. business will be very moderate for this period because military contracts for the most part require lengthy preparation and tooling and, therefore, will not influence our billings to any substantial degree until 1952.

"Net profits, in addition to being influenced by a lesser volume of business for the next 6 months, will be affected by the excess profits tax. Nevertheless, at this writing, we expect to earn a satisfactory profit for the year 1951."

* * * *

Official Films Inc., Isaac D. Levy's big films-for-TV project which recently absorbed Jerry Fairbanks Studios (Vol. 7:22, 27), holds special stockholders meeting Aug. 2 to change authorized capital from 1,000,000 shares of Class A common (10¢ par), 1,000,000 Class B (10¢) and 36,230 shares of 35¢ cumulative preferred ($5 par) to 2,000,000 shares of common—eliminating distinction between A & B. Preferred has already been redeemed. Board will also be increased to 12 members, says letter by president Aaron Katz accompanying notice signed by Emanuel Sacks (RCA v.p.) as secretary.

Short interest in TV-radio and related stocks on New York Stock Exchange showed these changes between June 15 and July 13, NYSE reported this week: Admiral, 42,445 shares on June 15 to 37,405 on July 15; Avco, 19,680 to 20,280; CBS "A," 12,283 to 3400; CBS "B," 7489 to 1452; Emerson, 7368 to 5775; GE, 11,215 to 13,296; Magnavox, 20,757 to 17,373; Motorola, 16,487 to 17,373; Philco, 18,444 to 18,252; RCA, 25,223 to 29,986.

———■———

Society of Motion Picture & Television Engineers won't participate in forthcoming hearings on requests for theatre-TV frequencies (Vol. 6:2, 9; 7:17), president Peter Mole announced following June 20 board meeting in New York. Pointing out that SMPTE is a technical organization not concerned with "commercial or industrial matters as such," Mole said: "The Society is convinced that the matters under consideration at these hearings can be adequately . . . handled by the qualified engineering representatives of the motion picture organizations." In letter to FCC, Society explained that its mission to coordinate various technical aspects of theatre TV has been accomplished, invited Commission and 8 motion picture organizations to "call upon it at any time" for answers to specific technical questions. Theatre-TV hearing, scheduled for Sept. 17, will probably be postponed because of crowded FCC calendar.

Telecasting Notes: Senate crime investigating committee (Kefauver) to "play" return TV engagement in New York shortly after Aug. 1 under new chairman, Sen. O'Conor (D-Md.), who will permit telecasts of new probes. Meanwhile, ABC-TV has optioned rights to Sen. Kefauver's syndicated feature and book, *Crime in America*, will use factual stories as basis for dramatic series . . . ABC has purchased Eagles Bldg., 4-story structure in downtown San Francisco, for studio-office space, will spend $1,000,000 on alterations including 70x100-ft. studio 30 ft. high accommodating audience of 750 and 3 more TV studios each 30x40-ft. . . . NBC-TV officials Lyman Munson, Fred Wile, Sam Fuller, Pete Barnum were in Hollywood this week seeking studio space for expected insurge of network programs with completion of coast-to-coast cable-microwave facilities; they were said to be eyeing big Walt Disney sound stage, reportedly available for lease . . . Uncertainty about delivery of steel for TV-FM tower in Toronto may delay completion schedule for Canada's first TV outlet, but CBC engineers are still aiming for completion in March 1952 (Vol. 7:22) . . . In theatre-TV experiment celebrating opening of *Cyrano de Bergerac* film, Washington's RKO Keith's Theatre July 18 picked up 5 minutes of WTOP-TV's local Mark Evans-Elinor Lee program discussing the film and Douglas Edwards' 15-minute newscast which followed—commercials and all. Theatre official said "the audience loved it," applauded after news show . . . Young America Films Inc. has acquired TV film rights to "My Most Unforgettable Character," regular feature in *Reader's Digest*, plans series of half-hour shows . . . Television Authority and the 4 TV networks July 16 announced statement of policy pledging expansion of opportunities for Negro artists on TV . . . Still under TVA picketing after 16 weeks of strike, KFI-TV, Los Angeles, has dropped more than dozen employes; it looks like impasse with union until FCC approves proposed $2,500,000 sale (Vol. 7:23) to Don Lee Enterprises (Tom O'Neil) . . . Screen Actors Guild July 17 announced signing of collective bargaining contracts with 37 companies, "most of which make TV films" . . . McCall's Magazine setting up awards for achievements by women in TV-radio—3 to go to broadcasters, 3 to executives—for service to community, to women, to children . . . WBZ-TV, Boston, raises base hour rate Aug. 1 from $1000 to $1250, one-min. from $200 to $250, changes Class A time to 7-11 p.m. daily except Sun. (6-11 p.m.) . . . KSTP-TV, St. Paul, Aug. 1 raises base hour rate from $650 to $800, one-min. from $130 to $160 . . . WCPO-TV, Cincinnati, revises July 1 rate card to fix 6-11 p.m. Mon.-Fri. as Class A time and 7-11 p.m. daily Class A announcement time; also to raise one-min. rate from $110 to $150, 20-sec. rate from $92.50 to $135.

Republic Pictures' first sale of its old films to TV (Vol. 7:23, 26-27) was deal reported this week with KNBH (NBC), Los Angeles, involving package of 26 mystery features and 48 serial episodes for $77,700. Films were made between 1938 and 1945, sold on basis of one TV run for each feature, 2 for each serial. KNBH was said to have turned down Gene Autry, Roy Rogers and Red Ryder westerns on ground one-run price of $30,000 each would be too steep for a sponsor. Also on films-for-TV front, Snader Telescriptions this week changed name to Snader Productions, announced plans to distribute full-length films to theatres as well as TV. Snader has exclusive American rights to 13 British Alexander Korda films, of which 9 will be released both to theatres and TV, 4 to TV only.

Negotiations with ASCAP for TV station performance rights have broken off, and petition was filed July 18 by Judge Simon Rifkind and Stuart Sprague on behalf of 56 stations asking Federal district court in New York to fix reasonable terms and conditions for local station and network licenses.

Telecasting industry employs some 12,500 persons as staff members of TV stations and networks, according to fourth annual TV Employment & Wages Report compiled by NARTB employe-employer relations dept. under Richard P. Doherty. Report shows average TV station employed 85 persons (61 full-time, 24 part-time) during late spring 1951 vs. 57 in 1950 and 66 in 1949. Average weekly station payroll is $6267. Median salary for non-supervisory technical personnel ranges from $63-$84 weekly, according to job classifications; average for supervisory technicians is from $153 for chief engineers to $98 for assistant technical supervisors; average for film personnel is $70-$81. Supervisory program personnel average is $51-$135, non-supervisory $56-$83.

Much-needed uhf signals at top of 470-890 mc band will be broadcast by RCA-NBC's experimental KC2XAK, Bridgeport, beginning approximately Aug. 1. FCC has been asked for permission to operate station on 850-856 mc, with directional antenna fed by 300-watt transmitter, radiating 110 kw visual power, 22.4 aural, towards New York. Station has served as industry "guinea pig" for over 1½ years, operating on 529-535 mc.

North Dakota's first TV application was filed this week—by WDAY, Fargo, seeking Channel 6. Only other state with no TVs as yet on file, among the 421 thus far is Montana. Also applying this week was WIMA, Lima, O., asking for uhf Channel 35. [For further details, see *TV Addenda 13-B* herewith; for complete list of all pending TV applications, see *TV Factbook No. 13* with Addenda to date.]

"Trial" community antenna installations (Vol. 7:28), numbering 18-20, are operating in New York State with Technical Appliance Corp. equipment, according to sales engineer S. K. McNeil. They're called "trial," he says, because Bell Telephone has yet to write code governing use of its poles. Therefore, he adds, "Until this has been written, most of the installations will be only in the stage of running to the first group of homes or down the hill to the edge of the community."

Network TV-Radio Billings

June 1951 and January-June 1951

(For May figures, see *Television Digest*, Vol. 7:25)

NETWORK TV time billings for first half of this year rose to $52,037,560, excluding non-reporting DuMont, auguring far better than $100,000,000 year inasmuch as best months are ahead. Total compares with only $14,032,166 for same 1950 months. June billings slipped to $8,432,462 from May's $9,398,488 (Vol. 7:25) and April's $9,089,454 (Vol. 7:21), but this is seasonal drop—and July billings will probably fall still lower. June billings, however, compare with only $2,820,711 in June 1950.

Network radio billings in June went down to $14,872,111 from $15,145,753 in June 1950 and $16,518,337 in May of this year—also seasonal drop. All 4 AM networks showed declines. Total radio time sales for first half 1951 was $95,489,672, down from $96,939,120 for same 6 months of 1950. The figures by Publishers Information Bureau:

NETWORK TELEVISION

	June 1951	June 1950	Jan.-June 1951	Jan.-June 1950
NBC	$ 4,244,240	$ 1,574,771	$26,739,532	$ 7,501,236
CBS	2,900,782	840,374	17,069,328	4,604,396
ABC	1,287,440	405,566	8,228,700	1,926,534
Total	$ 8,432,462	$ 2,820,711	$52,037,560	$14,032,166

NETWORK RADIO

CBS	$ 6,220,959	$ 5,837,873	$39,285,216	$36,061,897
NBC	4,739,193	5,200,901	30,000,036	32,910,043
ABC	2,720,268	2,902,341	17,344,512	19,473,536
MBS	1,191,691	1,204,638	8,859,908	8,493,644
Total	$14,872,111	$15,145,753	$95,489,672	$96,939,120

Full Text of TV Power-Boost Order Published as Supplement No. 74, herewith
City-by-City Deadlines for Comments in Allocations Proceedings Published as Supplement No. 73, herewith

STATION POWER HIKES—EVERYONE GAINS: Wider TV station coverage and improved pictures in a few areas -- in a matter of days. Similar improvement for virtually all other TV markets -- potentially. And all before end of freeze.

That's meaning of "power increase" order issued by FCC this week (full text in Supplement No. 74 herewith), its first action after adopting "written hearing" procedure designed to hasten end of freeze (see story, p. 2).

Action won't revolutionize TV coverage overnight, by any means, but it does offer prompt relief for those few markets cursed with very weak signals -- while promising long-run benefits to public everywhere and enhancing set markets and stations' coverage claims.

Specifically, FCC will permit stations to radiate up to 50 kw effective radiated power (ERP), with heights up to 2000 ft., for 6-month periods renewable at end of each period. Only 3 exceptions are stations designated as "community" under old rules -- WGAL-TV, Lancaster, Pa.; WDEL-TV, Wilmington, Del.; WNHC-TV, New Haven, Conn. These are limited to 1 kw ERP, presumably with 2000 ft., though ruling isn't specific about height.

Though new order leaves some questions unanswered, one provision is clear:

Any station now operating 5-kw transmitter at less than full output may run it wide open simply by requesting and obtaining FCC permission to do so. Permission may be requested informally, by letter or wire. Commission promises quick action in absence of complications -- and few are expected.

FCC engineers count 43 stations now running 5-kw transmitters at less than full 5-kw rated output. These may boost powers simply by turning a few transmitter dials. Of these, most will gain only slightly. A few should show marked improvement; for example, New York's WJZ-TV may go from 3 kw to 16-18 kw, WOR-TV from 9 kw to 22 kw. Columbus' WTVN can hike from 6 kw to 19.7 kw; Miami's WTVJ is eligible to jump from 2.2 kw to 16.5 kw, etc., etc.

[For list of all 43 stations, with present transmitter outputs, see p. 6. By using Television Factbook No. 13, showing present ERPs of these stations, engineers may calculate ERPs immediately possible.]

Within 48 hours, 15 stations had requested power hikes (see list, p. 6).

* * * *

Confusion arises where stations are now operating transmitters full blast, as most of them are. People at FCC differ on interpretations, but most think such stations may increase ERP and coverage by installing antennas with greater gain and/or by building higher towers -- but not by installing bigger transmitters.

One commissioner puts it this way: "We don't want people investing large sums for equipment for facilities which won't be final until end of the freeze." He said reason for permitting use of higher-gain antennas, but not more powerful transmitters, is that antenna is minor investment.

Copyright 1951 by Radio News Bureau

AUG 3 1951

Yet some transmitter powers may be doubled, according to engineers, simply by modest changes in final stage. They're awaiting Commission clarification.

Only exceptions to ban on larger transmitters are those 6 non-community stations now using transmitters rated at less than 5 kw. These may apply for CPs to install 5-kw units, though they may decide to wait until end of freeze to buy even larger transmitters to achieve 100-200 kw. These are the 6 stations, with maximum output of present transmitter in parentheses: WTTV, Bloomington (1 kw); WFMY-TV, Greensboro (.5 kw); WLWD, Dayton (3 kw); WBNS-TV, Columbus (.5 kw); WICU, Erie (.5 kw); KDYL-TV, Salt Lake City (1.2 kw).

FCC emphasizes power increases aren't permanent, have no influence on final powers to be authorized at end of freeze. For any permanent changes, all stations remain subject to same limitations held throughout freeze -- namely, higher antennas may be authorized but powers will be reduced so that coverage is no greater than with previous facilities. FCC action on Empire State Bldg. antennas is typical.

Commissioner Jones dissented for 2 reasons: (1) "After 3 years of freeze, the first to benefit are the existing stations. I don't think that's right." And -- (2) Possibility of prejudicing final decisions re powers, heights, mileages, etc.

MODUS OPERANDI FOR ENDING THE FREEZE: Granted virtual free hand to write own ticket on procedures to end freeze -- something almost unheard of in the ferociously competitive radio-TV industry -- FCC this week whipped out an order adopting "written hearing" with time schedule pared to the bone.

Final decision a few weeks after Nov. 26 is now entirely possible, barring complications. And there should be few of these, considering tenor of industry.

Commission liked the "staggered" system proposed last week (Vol. 7:29) and, as expected, compressed whole thing into 4 months instead of suggested 5 -- July 25 to Nov. 26, with first filings due Aug. 27.

Taking order of testimony originally set up in event an oral hearing were held, FCC regrouped the 40 groups therein into 9 geographical areas, gave them deadlines week apart -- in lieu of 10 days previously suggested. Then, opposition has 21 days to reply, instead of suggested 30. After that, there are 2 weeks for briefs on legal questions which may arise, instead of opportunity for oral argument.

FCC is sending copies of order of testimony, with filing deadlines, to all parties or their attorneys. For quick reference, we've listed cities, with respective deadlines, in Supplement No. 73 herewith.

Parties may still request oral presentation or cross-examination. But it's no secret that Commission intends to be tough in granting requests -- probably won't grant any except when it fears possibility of successful challenge in courts.

Actual mechanics of written procedure requires that:

(1) Parties may amplify, with sworn statements & exhibits, their original comments (digested in our Supplements 72 to 72-C). No new proposals are permitted.

(2) Basic allocations policy issues, contained in Appendices A & B of FCC's plan (see TV Allocation Report), remain undecided. But parties aren't permitted to suggest any new changes beyond those proposed in comments already on file.

(3) Fifty copies of all statements must be filed with FCC. They may be inspected at Commission offices or borrowed "for reasonable periods." Parties are "encouraged" to send copies of their statements to other parties affected. Separate statements must be filed for comments on each party's proposals.

Commission's schedule for DuMont's plan, and oppositions thereto, caught many parties off-base. Seems FCC intends not only that DuMont conclude its pitch by Aug. 27, but that all opposing parties file their objections to DuMont plan by same date, rather than Sept. 17. Engineers fear they can't make it.

Looking beyond Nov. 26, here's situation regarding true lifting of freeze:

Commission hopes to clean up oral presentations, if any, as they arise. But some may be dangling after Nov. 26, take up undeterminable period thereafter.

Next, time is needed to write final decision. Commission hopes decision will be crystallizing as comments are filed, take only few weeks to write.

After final decision, how long will FCC accept applications before starting to make grants? Chairman Coy has continually spoken of 2 months, but some commissioners are thinking about one month, saying people can fill out everything but engineering data almost anytime.

Beyond this, Commission is just beginning to consider ways and means of speeding up comparative hearings in cities where applicants will outnumber channels -- meaning virtually every sizeable market -- sure to run well into 1952 & 1953.

Commission maintains its budget is so limited that it can't expand personnel required for comparative hearings -- which includes, in additional to examiner, one attorney, one engineer and secretarial help for each hearing.

Some think an appeal to Congress might bring special appropriation, if it's timed right and international conditions permit. That's possible, considering attentive Congressional ear given to outraged howls from "frozen" constituents.

10 STATIONS SOLD TO DATE, MORE PEND: Thus far, exactly 10 TV stations (out of 107 total on air) have been sold to new owners since postwar emergence of telecasting -- aside from proposed transfers, by way of merger, of the 5 ABC-owned outlets into projected new American Broadcasting-Paramount Theatres Inc. (Vol. 7:21). In most cases, reasons for selling were simply that operators couldn't make ends meet during TV's days of rough fiscal sledding and/or could sell out at handsome profits.

San Antonio's KEYL, which began operation only 1½ years ago -- on Feb. 15, 1950 -- is being sold to George Storer group for $1,050,000 at time it's just beginning to turn a profit and with future outlook very bright. Successful operator of 7 radio stations and 3 TVs (WJBK-TV, Detroit; WSPD-TV, Toledo; WAGA-TV, Atlanta), Storer's Fort Industry Co. wants to latch onto FCC-imposed limit of 5. So it outbid another group seeking KEYL, said to be San Antonio Express (KTSA), by $10 a share.

Storer is also TV applicant for Cincinnati, Wheeling, Miami, where he has AM stations, presumably will drop 2 of these -- possibly all 3, if he should get his fifth by way of purchase. [Note: Many stations are being approached with offers, and several more sale deals are in offing -- with broadcasters, newspapers, theatre people as prime movers. Story persists that sale of Omaha's WOW-TV & WOW is imminent (Vol. 7:27-28), but parties involved say it isn't so.]

The $1,050,000 purchase price of KEYL represents $210 per share for 5000 shares, largest holders being W. L. Pickens of Dallas, R. L. Wheelock of Corsicana, H. H. Coffield of Rockland, all Texas oilmen, each holder of 1098 1/3 shares: W. R. Nichols, Dallas, 418 shares; W. D. Rogers Jr., who stays as gen. mgr., 418; Vernice Ford, Lubbock, 300; R. Guy Carter, Dallas, 168; John Yakimo, Dallas, 60; Jack Bloom, Dallas, 35; Roger Kuykendall, Lubbock, 32; R. W. McKinney, Nacogdoches, 25 -- plus 10 others owning not more than 10 shares each.

* * * *

Other TV station sale deals to now, exclusive of projected ABC merger, were these -- all save last 3 already FCC-approved: KSRC-TV, Seattle (now KING-TV), sold to Mrs. A. Scott Bullitt for $375,000 (Vol. 5:20), who in turn sold 25% recently to Hearst Radio for $375,000 (Vol. 7:26); KBTV, Dallas (now WFAA-TV), sold to Dallas News for $575,000 (Vol. 6:4,11); KLEE-TV, Houston (now KPRC-TV), sold to Houston Post for $740,000 (Vol. 6:13,21); WOIC, Washington (now WTOP-TV), sold to Washington Post 55%, CBS 45%, for $1,400,000 (Vol. 6:25); KFMB-TV & KFMB, San Diego, sold to John A. Kennedy interests for $925,000 plus other considerations (Vol. 6:46, 7:17); KTSL, Los Angeles, sold to CBS for total consideration of $3,600,000 (Vol. 6:52); WLAV-TV, Grand Rapids, sold to Harry Bitner group for $1,300,000 (Vol. 7:19); WBKB, Chicago; sold to CBS in connection with ABC-UPT merger for $6,000,000 (Vol. 7:21); KFI-TV, Los Angeles, to General Tire (O'Neil) interests for $2,500,000 (Vol. 7:23).

Actually, there was an 11th sale -- but no actual transfers of money were involved. The 3 Texas oilmen in KEYL deal were also principals in grant of KPHO-TV, Phoenix (Vol. 5:26), but by time it went on air they had pulled out (Vol. 6:5,20).

Note: Deficits marked operation of most of these stations at time of sales, but WOIC (WTOP-TV) was reported coming out of operating red when sold, WLAV-TV is a good earner, and WBKB is reputed to be one of telecasting's best earners. KFI-TV is

known to be losing $20,000 per month. Biggest bargain of all, KING-TV, was losing $1000 a month when Mrs. Bullitt purchased it in early 1949. All other sales took place in 1950 and 1951 (see issue of Television Digest indicated for full details).

* * * *

Sales point up eagerness of broadcasters, to say nothing of many non-radio interests, to get into the TV swim -- especially now that the business shows great profit promise. Veritable "gold rush" for new station permits is certain after FCC ends freeze, but some well-heeled interests have chosen to make haste by buying.

It takes blue chips to go into telecasting business, as compared with radio, which is reason why Howard Stark, broker formerly associated with Smith Davis, plans to set up company to help finance grantees by buying and leasing costly equipment required -- sure-fire idea so far as demand is concerned but requiring FCC blessing.

Stark says he has Wall Street money interested, predicates plan on belief local banks and insurance companies, usually requiring brick-and-mortar collateral, will hesitate about financing new TV stations, as they did about radio in the past -- and many broadcasters simply haven't the necessary resources.

COLOR LABS RACE CBS's 'HEAD START': Developments in all-industry compatible color system, plus CBS's redoubled efforts to make its system "stick" as its investment in system mounts daily, foreshadow fiercest kind of showdown this fall and winter.

From one of industry's top color experts, and one of most confident, Hazeltine v.p. Arthur Loughren, we have these comments on status of compatible system:

(1) Agreement on system standards, among National TV System Committee members, should be reached by September. Exhaustive field testing will then be conducted until end of year, by which time it should be ready for presentation to FCC.

(2) Cost of now complex compatible color receivers will be reduced drastically and rapidly. "By year's end," Loughren predicts, "at least 15, if not 20 tubes will be removed from RCA's 54-tube set -- with no loss in performance."

(3) Controversy over RCA's "pastel" colors vs. CBS's more "brilliant" hues (Vol. 7:28) is something of a joke to Hazeltine engineers, he says. "During RCA's demonstrations, we varied controls on our receiver, got more saturated colors, but our men thought they looked much less natural."

Loughren also reports tri-color tube now in operation, calls it "excellent" -- a big relief from looking down "dichroic tunnel" required with 3-tube sets.

Schedule of compatible colorcasts will be issued bi-weekly by NTSC's field test panel under DuMont's Dr. T. T. Goldsmith. Next demonstrations to be obesrved by Loughren's standards panel: Aug. 6, GE, at Syracuse; Aug. 7, Hazeltine, Little Neck, L. I.; Aug. 8, RCA, Princeton; Aug. 9, Philco, Morrisville, Pa. Tour will wind up in New York Aug. 10 with discussion of observations.

FCC this week granted Philco authority to begin compatible colorcasts over WPTZ's Channel 3 facilities, using experimental call KG2XDT, running 90 days from July 23. Transmissions are limited to periods outside regular programming hours.

Then, around Aug. 22, RCA starts public demonstrations (Vol. 7:29).

* * * *

Meanwhile, CBS is making most of its best promotional prospects to date:

(1) Nine top-flight eastern football games (Army, Navy, Penn, et al), banned on black-and-white, to be colorcast, Sept. 29-Nov. 24. These will be fed to stations able to clear time.

Availability of games may spark purchases of adapters, to get games in black-and-white, whether or not it moves color sets and converters.

(2) Tieup with 20th Century-Fox on theatre TV, employing CBS system with Swiss-developed Eidophor large-screen system (Vol. 7:29). This week, GE agreed to make color camera for combined systems, said it will have definition greater than black-and-white's 525 lines -- but doesn't say how much greater. Demonstration of large-screen color, says 20th Century-Fox, may come before year's end.

In Cincinnati, CBS reports, color proved such hit that WKRC-TV extended programs second week. Signals are received on set rotated among Kroger stores.

CAMPAIGN to bolster radio as "greatest mass medium" and "biggest advertising value" is in full sway in wake of July 1 radio network reductions and drops in network radio billings (see PIB figures, Vol. 7:29).

Letter from CBS president Frank Stanton to affiliates assures them CBS still considers radio "America's No. 1 mass medium." CBS, which broke radio rate dike (Vol. 7:15 et seq), was "able to stave off a rate reduction as long as it was humanly possible," said Stanton. "Without the exceptional network value that CBS radio held out to advertisers, the great pressure for rate adjustments would have come much sooner." But, Stanton added:

"No policy of support for radio can stand up today without recognizing TV. We have found, despite radio's absolute values, that it is nonetheless extremely difficult to sell on a declining trend. And so what we are doing now is to project radio values forward to January 1952 . . . in effect, building a floor under network radio—an impressive level of values that advertisers can count on next year, as a bare minimum."

Stanton told affiliates that radio's net audience loss to TV in 1951 "cannot exceed 8.5%, and it may well be less."

New CBS promotional piece, *Where Advertising Makes the Difference*, shows 18 of 25 top advisers select network radio above all other media. July 23 *Broadcasting Magazine* survey found "radio business is better than it was a year ago in both TV and non-TV markets," with vast majority of radio stations reporting increases in local and national spot.

Big July "Fall Facts Issue" of *Sponsor Magazine* devotes most space to radio, advises "network radio offers the astute advertiser a better buy than ever before." On top of this, says *Sponsor*, "network radio will this fall offer the advertiser bonus values relative to TV," because TV set sales are in "serious slump" while "sale of radio sets keeps increasing phenomenally." Radio, *Sponsor* concludes, is "still the Goliath towering over other media," July issue contains 14 pages of charts to back contention.

As to TV, *Sponsor* sees daytime as best bet, spot easier to clear this fall than network. Magazine predicts average 15% network TV rate boost by October, with good time availabilities "impossible" to clear this fall.

NARTB president Harold Fellows in July 18 *Variety* article challenges AM broadcasters to "go to work, face the facts squarely . . . to be confident, to be visionary, to be intelligent and to be industrious in utilizing the force and in bringing about an ever increasing realization of [AM's] 'necessities' and the vital part it plays in the American scene, all the way from quickly locating a lost child to building businesses through advertising."

Network Accounts: Frigidaire starts new series, as yet untitled but dealing with youth opportunity, on CBS-TV Sept. 2, Sun. 6-6:30 . . . Sterling Drug Inc. starts sponsorship of 10:30-11 portion of *Songs for Sale* Sept. 15 on CBS-TV, Sat. 10-11; Carter Products Inc. (Arrid) has 10-10:15 segment which leaves only 10:15-10:30 available . . . Toni Co. (White Rain shampoo), starting Sept. 27, will share alt. week sponsorship of *Casey, Crime Photographer* on CBS-TV, Thu. 10:30-11, with Carter Products Inc. (drug products) . . . Burkhart Mfg. Co. (shoes), starting Aug. 11, sponsors noted ballerina in *Patrica Bowman Show* on CBS-TV, Sat. 6:45-7, thru Winius-Brandon Co., St. Louis . . . Schick Inc. (electric shaver), starting Sept. 4, will sponsor *Gangbusters* on CBS-TV, Tue. 9-9:30, with ex-Kefauver committee investigator Rudolph Halley as narrator; agency is Kudner . . . Gerber Products Co. (baby foods) will sponsor Wed. 4:45-5 portion of *Kate Smith Show* on NBC-TV, Mon.-Fri. 4-5 starting Sept. 12.

Station Accounts: Successful use of TV trailers and spots to boost movie attendance is being emulated by road show of *Guys & Dolls*, smash Broadway hit, opening this week in Los Angeles after playing San Francisco last week, and due to play Dallas Oct. 6-22; musical comedy is using spots on TV stations in areas played . . . Necchi Sewing Machine Sales Co. (Robert M. Phillips, adv. director) plans cooperative dealer-distributor use of TV, radio & newspapers this autumn, thru Doyle Dane Bernbach Inc., N. Y. . . . National Shoe Stores (women's shoe store chain) resuming use of TV in expanded fall-winter campaign, thru Emil Mogul Co., N. Y. . . . American Snuff Co. to sponsor *Old American Barn Dance* for 13 weeks from Sept. 1 on 7 Southeastern TV stations, thru Simon & Gwynn, Memphis . . . Southern California Pharmaceutical Assn., comprising 1300 independent druggists, sponsoring *Bob Shannon's Varieties*, half hour, on KTTV, Los Angeles, thru Crossley & Jeffries . . . Union Oil Co. Aug. 1 starts sponsoring *Watch and Win*, quiz show, on KPIX, San Francisco, and KTSL, Los Angeles, thru Foote, Cone & Belding, L. A. . . . National Pressure Cooker Co. (Presto household utensils) appoints George R. Nelson Inc., Schenectady, to handle TV campaign starting with participations in CBS-TV's *Homemaker's Exchange* (21 stations) . . . Among other advertisers reported using or preparing to use TV: Tuwill Chemical Co. (Knoba car shampoo), thru A. W. Evans Co., Los Angeles; Stewart Hartshorn Co. (Diana Fyrban shade cloth) and M. J. Holloway Co. (confectioner), thru Calkins & Holden, Carlock, McClinton & Smith, N. Y.; Bol Mfg. Co. (Hopalong Cassidy Aid drink), thru Goodkind, Joyce & Morgan, Chicago; Erno Laszlo Co. (cosmetics), thru Dowd, Redfield & Johnstone Inc., N. Y.; Jetron Inc. (Dust Free silicone polish & 88 car wax), thru Robert W. Maerckein Adv., Milwaukee; O'Donnell-Usen Fisheries Corp. (Taste O'Sea fish), thru Arnold & Co.

■

Life Magazine points up stature of TV-radio in full-page ads in metropolitan newspapers this week, ranking national advertising media in this order on basis of January-June 1951 total investments by advertisers: (1) *Life*, $43,089,969. (2) CBS-Radio, $39,285,216. (3) *Saturday Evening Post*, $34,121,636. (4) NBC-Radio, $30,000,036. (5) NBC-TV, $26,739,532. (6) ABC-Radio, $17,344,512. (7) CBS-TV, $17,069,328. (8) *Time*, $14,229,834. (9) *Ladies' Home Journal*, $11,484,173. (10) *Better Homes & Gardens*, $11,413,731. (11) *This Week*, $10,911,380. (12) *Look*, $9,743,833. (13) *Collier's*, $9,197,871. (14) MBS-Radio, $8,859,908. (15) ABC-TV, $8,228,700. (16) *Good Housekeeping*, $7,904,187 (17) *American Weekly*, $7,182,-895. (18) *Woman's Home Companion*, $6,318,319. (19) *Newsweek*, $5,971,709. (20) *McCall's*, $5,476,607.

Top CBS executives named this week, heading TV and radio divisions (Vol. 7:28), include: Four vice presidents common to both divisions—H. Leslie Atlass, Central Div.; Harry S. Ackerman, Hollywood programs; Herbert V. Akerberg, station relations; Wm. B. Lodge, general engineering. Five vice presidents in TV Div.—Hubbell Robinson, network programs; Frank B. Falknor, operations; David V. Sutton, sales; Merle S. Jones, CBS-owned stations; I. S. Becker, business affairs. Five TV Div. dept. heads—Oscar Katz, research; Wm. S. Harrison, senior attorney; Wm. Golden, creative director, advertising & sales promotion; John Cowden, operations director, advertising & sales promotion; Michael J. Foster, press. In Radio Div., administrative vice presidents are Louis Hausman, James M. Seward, J. Kelly Smith. John J. Karol is v.p., network sales; Arthur Hull Hayes, v.p., San Francisco. Lester Gottlieb is director, network programs, and Edmund Chester, director, news & public affairs.

Personal Notes: Tom Gallery relinquishes sales managership of DuMont Network to head newly organized sports program sales dept., succeeded by Ted Bergmann; John H. Bachem, ex-NBC & CBS, promoted to asst. sales mgr., succeeding Trevor Adams, who on Aug. 13 joins ABC as mgr. of its WJZ-TV, New York . . . Don L. Kearney, ex-Katz Agency program director, named ABC-TV spot sales mgr., representing its 5 stations . . . Tom J. Maloney, ex-KEYL-TV, San Antonio, joins INS-INP TV dept. as sales and TV film specialist . . . H. Norman Neubert named NBC spot sales mgr. of sales development, advertising & promotion, succeeding Jacob A. Evans, named NBC radio advertising-promotion mgr. . . . Fred N. Dodge, ex-*American Weekly* and *Puck*, joins NBC as director of merchandising for radio under John K. Herbert, radio sales v.p. . . . Thomas H. Peterson, ex-John E. Pearson reps, named mgr., western sales development, CBS Radio Sales . . . William P. Sedgwick promoted to ABC-TV spot sales development mgr., Lillian Dishian promoted to mgr. of radio spot-cooperative program sales promotion, and George W. Huelser named radio network sales mgr. . . . Charlton G. Shaw promoted to executive v.p., A. C. Nielsen Co. . . . Howard Nussbaum, who as an Army colonel served with Armed Forces radio dept., was radio officer on Gen. Bradley's staff, lately has been special asst. to Stuart Symington at NSRB, assumes newly created post of TV-radio director, Harry B. Cohen Adv., N. Y. . . . David Crockett, ex-asst. program director, KING-TV, Seattle, named head of TV-radio dept., MacWilkins, Cole & Weber, Seattle . . . Hal Hoag new western mgr., Free & Peters, Hollywood; Wm. A. Morrison, ex-Sidney Garfield agency, named radio mgr., San Francisco . . . Roy Winsor and Roland Gillett named co-directors, TV-radio dept., Biow Co.; Robert McNell named dept. coordinator . . . Nathan Halpern is devoting full time to Theatre Network Television Inc. (TNT), of which he is president, having dropped assignments as TV consultant to Fabian Theatres and Theatre Owners of America . . . Lewis Allen Weiss, director of NPA Office of Civilian Requirements, ex-MBS chairman, ex-Don Lee president, appointed chairman of DPA subcommittee on civilian requirements.

Telecasting Notes: United Press business mgr. LeRoy Keller and 20th Century-Fox's Peter Levathes masterminding new film-&-news service for TV, still in planning stage, think they have answer to hitherto unsolved problem how to make spot news as important in TV station schedules as in radio . . . No such inhibitions or prohibitions face them, in this project, as faced UP when it first broke down newspaper opposition to sale of its wire news to radio, now a major source of income—they're letting TV stations tell them what they want and need and are tailoring new service accordingly . . . Meanwhile, INS this week announced new wire service for TV stations, entirely separate from its newspaper-radio circuits—proposing to supply wire news and newsreel film to "provide the world's first complete basic news service for TV" . . . Kansas City televiewers got birdseye views of flood and fire last week as WDAF-TV trained its telephoto lens on disaster area from its hilltop studios in center of town; film made from flood telecasts was also shown over station later and will be viewed by Congressional committee helping to work out flood relief program . . . Canadian Broadcasting Corp. this week awarded 5-year contract to Bell Telephone Co. for TV network service linking projected new stations in Montreal and Toronto (Vol. 7:22, 29), also permitting their hookup with Buffalo so as to get U. S. network service . . . Cecil B. DeMille may become TV film producer, says *Billboard*, DeMille's long association with Paramount Pictures having "resulted in a strong following among United Paramount Theatres execs, who would like to see the film maker part of ABC's future film plans" . . . *Billboard* also sees producer David O. Selznick going into TV films, possibly with close friend Wm. Paley (CBS) in job similar to that now held with NBC-TV by ex-Paramount studio chief Henry Ginsberg . . . A. J. Balaban, one of founders of Chicago's Balaban & Katz theatre circuit, to quit as executive director of New York's Roxy Theatre Jan. 1 to produce live TV show, *Cavalcade of the Motion Picture Theatre* . . . TV Hooperatings monthly in 23 multi-station cities, thrice yearly (or oftener, as demanded) in 27 single-station cities, are promised in new project by C. E. Hooper, who will discontinue his 12-city program popularity ratings; Hooper recently sold his TV-radio national-regional rating services to A. C. Nielsen . . . Hopalong Cassidy Enterprises, 8907 Wilshire Blvd., Beverly Hills, Cal., now offering users of its TV films 15 & 50-second commercials tailored to local retail sponsors . . . Credit courses in TV now offered by Brooklyn College, Boston U, Western Reserve U . . . Metropolitan Museum of Art, New York, plans $820,000 alteration in 710-seat lecture hall to provide TV-radio facilities . . . WINX, 250-watt AM which cost *Washington Post* $500,000 in 1944, lost nearly that much in operation, was sold for $130,000 in 1949, is being sold again—for $95,000 instead of $120,000 originally proposed (Vol. 7:26) . . . WJZ-TV, New York, on Aug. 1 extends Class C time full hour up to 6 p.m.; 7-7:30 Mon. thru Sat. will be Class B, 7:30-10:30 Class A. Also offered are new frequency discounts for use of 2 or more ABC-owned stations, and eliminated is 20-second rate in Class B & C times . . . KGO-TV, San Francisco, new Aug. 15 rate card raises basic hour rate from $480 to $600, one-min. from $80 to $120, changes Class A time to 7-10:30 p.m. Mon.-Fri., 6-10:30 p.m. Sat. & Sun.

———■———

Following 43 stations may increase powers quickly, under new FCC ruling (see p. 1), simply by boosting transmitter output to 5 kw from current operating figures indicated: WBRC-TV, Birmingham, 4.06 kw; KNBH (2.97) & KTSL (1.1), Los Angeles; KPIX, San Francisco, 4.9; WTVJ, Miami, .44; WAGA-TV, Atlanta, 3.4; WBKB (2.18), WENR-TV (4.42), WGN-TV (1.92) & WNBQ (4.69), Chicago; WHBF-TV, Rock Island, 2.36; WOI-TV, Ames (Des Moines), 4.14; WAVE-TV (1.37) & WHAS-TV (.89), Louisville; WMAR-TV, Baltimore, 4.83; WWJ-TV, Detroit, 3.35; WLAV-TV, Grand Rapids, 3.5; WKZO-TV, Kalamazoo, 2.55; KMTV (3.53) & WOW-TV (4.7), Omaha; WNBF-TV, Binghamton, 2.5, WCBS-TV (1.87), WJZ-TV (.81), WNBT (1.42), WOR-TV (2.04) & WPIX (3.5), New York; WHAM-TV, Rochester, 3.81; WHEN (2.78) & WSYR-TV (4.45), Syracuse; WKTV, Utica, 2.25; WCPO-TV, Cincinnati, 4.4; WNBK (4.2) & WXEL (4.1), Cleveland; WTVN, Columbus, 1.52; WKY-TV, Oklahoma City, 3.85; KOTV, Tulsa, 4.76; WJAC-TV, Johnstown, 3.5; WCAU-TV, Philadelphia, 4.41; WSM-TV, Nashville, 3.02; KRLD-TV, Dallas, 2.52; WTAR-TV, Norfolk, 4.96; WTVR, Richmond, 3.53; WSAZ-TV, Huntington, 3.6. At week's end, these had already applied for power boosts: KTSL, WTVJ, WBKB, WGN-TV, WAVE-TV, KMTV, WOR-TV, WHAM-TV, WHEN, WKTV, WXEL, WTVN, WICU, WSM-TV, KRLD-TV.

* * * *

RCA describes full line of transmitting equipment in new brochure, offers up to 200 kw on any vhf or uhf channel. Vhf transmitters are 500-watts, 2 kw, 10 kw, 20 kw, 50 kw. Vhf Antennas are 3, 5, 6 or 12-bay, plus "Super-Gain" special installation. Uhf transmitters are 1 kw & 10 kw antenna is slotted type, Bridgeport's being prototype.

DuMont offers new camera chain, claims number of improvements, including extension of image orthicon life up to 1500 hours and easy convertibility to CBS color.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
July 28, 1951

CONGRESS BREAKS REGULATION W LOG-JAM: By the time you read this, big push that may break TV sales log-jam -- relaxation of credit controls -- will probably have been completed by Congress. Industry gets all it asked for, and more.

Barring veto by President Truman, now deemed unlikely, extension of Defense Production Act will remove Regulation W's barrier to set sales. Senate-House conference committee, writing compromise version of bills passed by both houses, accepted House provisions easing installment curbs (Vol. 7:29). Final bill provides:

Down payment of 15%, balance in 18 months -- in lieu of present 25% down and 15 months. AND -- it also provides that trade-in allowance may be applied toward down payments, or in place of them.

Committee action was victory for RTMA, which had asked 90-day moratorium on credit curbs, then 15% down, 18 months to pay (Vol. 7:22), and had been rejected by Federal Reserve Board in several appeals. It was also victory for NARDA, which had proposed the exact provisions finally adopted.

Final approval by Senate came Aug. 27, is expected in House Aug. 30. The President must sign measure by Aug. 31, when stop-gap controls law expires.

Industry leaders are optimistic, but cautious, about effects of new credit regulation on TV trade. While at first it seemed this was answer to their prayers for relief from inventory stalemate, there's growing realization that major sources of current trade apathy are (1) too easy selling during 1950 boom, and (2) high cost of groceries. But business forecasters generally see better times ahead (see below).

RTMA president Glen McDaniel feels new rules "will give the industry the psychological lift it needs to reverse the trend." But he hastens to add they can't possibly bring back the good old days when customers virtually beat down doors to buy TVs. Dealers must still use aggressive merchandising techniques, beat the bushes for customers, he says -- but this time it should bring more results.

BUSINESS OUTLOOK & TV-RADIO TRADE: Business looks good for the long pull, say the forecasters with almost one accord -- but hard-hit TV-radio industry is nevertheless moving very cautiously. Easier credit terms may bring speedier inventory relief, but no one sees repetition of 1950 boom short of opening up lots of new TV markets -- unlikely before well into 1952-53 (Vol. 7:29). Right now, trade can take comfort from these assurances in usually very authoritative U.S. News & World Report:

"Worried about a general business slump? Forget it. The signs point to prosperity, whatever happens finally in Korea. Figures indicate the present 'slow period' is temporary. They promise new highs in production and trade by early 1952. Outlook varies in different lines. But total spending is to go up. It means a market for almost everything available."

On that theme, it states: "Appliance dealers, for example, will begin to fare better after a few more months. Rising income can boost demand for TV sets, refrigerators, toasters even without any easing of Government credit controls."

* * * *

Such words are heartening, of course, but right now the TV-radio and other appliance plants are still feeling pinch of shutdowns, layoffs and shortened work weeks forced by heavy trade inventories, slow demand, uncertainty about fall-winter trade. Materials shortages would be factor, of course, if demand were there.

This week, more layoffs were reported from plants just resuming post-summer production: 200 at DuMont plant in E. Paterson, N.J.; 400 at Westinghouse appliance plant (refrigerators, etc.) in Mansfield, O.; 100 at Erie Resistor Co., Erie, Pa. There probably are many more, unreported.

Expectations of most of TV-radio industry were nicely put by Westinghouse division sales manager Joseph F. Walsh to Retailing Daily last week: "I think the

market will firm up after Labor Day, but not to the extent it did last year. Instead of 3 buyers for every set, there will be one reluctant buyer for each receiver and it will become necessary to increase stress on selling, including outside sales, home demonstrations and the like."

Because of the uncertainty, he added, Westinghouse will formulate its production plans on a month-to-month basis rather than on an entire season.

* * * *

We won't know over-all dealer inventory figure until end of August, now, due to fact Dun & Bradstreet survey couldn't get under way earlier. Plan is to contact 4000 to 5000 retailers early in August to ask them to count their total table TVs, all others, total portable radios, all others -- and from this "sample" of units on hand to project an Aug. 1 total inventory figure for all nation's dealers.

Thereafter, the monthly reports will automatically indicate month's sales and purchases -- first such figure for the industry. Dun & Bradstreet is asking -- and certainly should get -- full dealer cooperation as it breaks this new ground.

* * * *

Statistics at factory level are available weekly from RTMA, of course -- and output for week ending July 20 was reported as 44,196 TVs (1322 private label), good jump from vacation-time lows of 8270 and 12,817 first 2 July weeks (Vol. 7:29), reflecting reopening of factories. Radios totaled 180,339 (84,580 private label), of which 85,689 were home sets, 59,385 auto, 35,265 portable.

Factory TV inventories went up to 754,717 from 744,162 preceding week, and radio inventory climbed to 375,066 from 351,368. Last distributor inventory figures reported were 622,080 TVs and 999,590 home radios as of May 25.

NEW STEEL-COPPER CUTS IN PROSPECT: Air of optimism among top government materials control authorities showed signs of disintegrating at week's end, when DPA-NPA boss Manly Fleischmann pulled aside curtain on materials picture for fourth quarter.

Consumer durable goods -- including TV-radio -- will have to take another 5% cut in steel, possibly more in copper, Fleischmann indicated. This caused some surprise, coming on heels of his July 10 statement that there probably would be no change in civilian steel-copper-aluminum supply for fourth quarter (Vol. 7:28).

TV-radio and other consumer durables are permitted this quarter to use steel at 70% of first-half 1950 rate, copper at 60%, aluminum at 50% (Vol. 7:25). Fleischmann points out that while military program will engage only about 20% of nation's economy next quarter, total demands for the 3 basic metals by defense industries are "vastly higher" -- mainly due to expansion of industry.

Copper situation is particularly serious. Said Fleischmann: "If we were to prohibit manufacture of all consumer durables, including autos, it still would not free enough copper to satisfy the demand from other segments of the economy."

Further copper pinch is inevitable as result of 4-week-old CIO Steelworkers strike at big American Smelting & Refining Co. smelter at Garfield, Utah. Stoppage is cutting into output at rate of 25,000 tons a month, about one-fourth of domestic production. President Truman has asked Wage Board to try to settle dispute.

Whether or not consumer durables are brought under Controlled Materials Plan next quarter, the same amount of materials will be reserved for them. CMP, in this case, is merely method of assuring equitable distribution.

* * * *

Military and defense-supporting electronics programs were again sliced sharply in latest division of CMP materials pie. It's good bet NPA Electronics Div. will appeal to higher echelons for more steel-copper-aluminum for essential production, as it successfully did for third quarter allotments (Vol. 7:26-27).

In face of steadily increasing military orders and resumption of production after summer vacations, Electronics Div. was assigned these fourth quarter totals for Class B (standard part & product) manufacturers (third quarter figures are in parentheses): steel, 72,550 tons (56,500); copper, 33,385,000 lbs. (25,157,000); aluminum, 15,750,000 lbs. (14,800,000).

Topics & Trends of TV Trade: Jerrold Electronics claims 1,000,000 people live in towns where contracts have been signed to use its community antenna equipment (Vol. 7:29). Company says installations are now being made in following towns: Pennsylvania—Ashland, Bangor, Bellefonte, Coaldale, Coal Township, Harrisburg, Lansford, Lewistown, Lock Haven, Mahanoy City, Oil City, Palmerton, Plymouth, Pottsville, Port Carbon, Shamokin, So. Bethlehem, St. Clair, Tamaqua. New York—Dansville, Watertown, Corning. In addition, Jerrold reports contracts in following: Grass Valley, Cal.; Cumberland, Md.; Biddeford, Me.; Pikesville & Maysville, Ky.; Beckley, W. Va.; Kingsport, Tenn.; Newport, Ark.; Uvalde, Tex.; La Salle-Peru, Ill. Company says that over $100,000 worth of sets have been sold in Lansford, Pa., first to get installation (Vol. 7:2).

* * * *

Three industry groups will appear before Senate Finance Committee next week to oppose Administration's request for 15% hike in manufacturers' excise taxes on TV-radios in revenue bill H. R. 4475 (Vol. 7:20-21). Scheduled to testify Aug. 2 are RTMA, probably represented by chairman Robert C. Sprague, and NARTB govt. relations director Ralph W. Hardy. Mort Farr, NARDA president, will be heard Aug. 1. Also appearing before committee Aug. 2 will be L. G. Horney, Bendix, and J. M. Marks, Fada.

GE's Dr. W. R. G. Baker reappointed chairman of RTMA's TV committee for ensuing year, other members named by Chairman Sprague being: Benj. Abrams, Emerson; Robert S. Alexander, Wells-Gardner; Max Balcom, Sylvania; W. J. Barkley, Collins Radio; H. C. Bonfig, Zenith; John W. Craig, Crosley; Allen B. DuMont; J. B. Elliott, RCA; E. K. Foster, Bendix; Paul V. Galvin, Motorola; W. J. Halligan, Hallicrafters; L. F. Hardy, Philco; W. A. MacDonald, Hazeltine.

Admiral's Ross Siragusa told *Retailing Daily's* Martin Rosenbloom July 23 that, barring further materials restrictions, Admiral will have produced 650,000 TVs this year (as against reported 1,000,000 in 1950); that recent "free radio-phonograph" with each TV console moved 15,000 sets between April 28 & May 14; that refrigerators have been moving at rate of 300,000 a year.

* * * *

IT&T moves further into appliance field with purchase, announced this week, of Coolerator Co., Duluth, makers of refrigerators, freezers, electric ranges. Company was bought for undisclosed sum, involving stock and cash, from Gibson Refrigerator Co., Greenville, Mich. IT&T's other manufacturing subsidiaries include Capehart-Farnsworth (TV & radio sets), Federal Telephone & Radio and Federal Telecommunications (broadcast transmitters, microwave equipment, etc.).

Value of electronics exports tripled in May, compared with year ago—$16,717,022 vs. $5,721,446—according to Census Bureau. TV sets aren't listed as such, but Census plans to specify them in breakdowns beginning first of year. Lion's share of May exports, $7,896,103, is listed in "special category," understood to include radar, air navigation aids, etc. Included in May breakdown are: 1791 home type radio phonographs worth $163,832; 22,575 other home type receivers, $582,988; 4381 automobile sets, $164,564; 8863 radio sets not elsewhere specified, $1,829,993.

Receiving tube sales first 6 months of 1951 totaled 215,902,325 units, compared with 170,375,921 same period last year. RTMA report shows 153,957,766 tubes sold for new equipment, 50,105,634 for replacements, 10,358,858 for export, 1,480,067 to govt. agencies. June sales were 27,667,099 compared with 32,480,668 in June 1950.

Trade Miscellany: Westinghouse introduces new TV line, some table radios and portables, in about week (Aug. 6), reports it plans biggest TV-radio ad campaign this autumn . . . Philco International putting on special August drive to promote sale of its tropic radios & radio-phonographs, offering foreign dealers special prizes for window displays . . . Hoffman Radio reported planning regional warehouse at 321 Grand Ave., Chicago, to stockpile TVs, radios, replacement parts . . . Kent Television, Brooklyn, leases 8000 sq. ft. additional space at 187 Varet St. . . . Tel-A-Ray Enterprises Inc. has purchased 75,000 sq. ft. factory in Henderson, Ky., for manufacture of antenna-mounted TV boosters, etc. . . . General Radio, Cambridge, Mass., building 3-story brick plant in W. Concord, Mass., for production of electronics gear . . . Dukane Corp. is new name of Operadio Mfg. Co., St. Charles, Ill., brand name under which firm makes intercom and sound equipment, sound slide film projectors and magnetic tape recorders . . . Canada modifies credit controls, effective Aug. 1, to permit trade-ins to be applied toward down payment on all types of goods . . . Western Union Services Inc., recently formed TV receiver-servicing subsidiary of big telegraph company (Vol. 7:16), plans TV and newspaper promotion campaign, thru United Adv. Agency, N. Y. . . . CBS-Columbia Inc. (formerly Air King) names Beller Distributors Inc., Newark (Jack Gaertner) for northern N. J. and for Orange & Rockland counties in N. Y. . . . Raytheon moves into Mexican market with appointment of Television Continental, Mexico City (Pedro Block, mgr.).

* * * *

Scott Radio (Meck) showing "most expensive and exclusive home instrument of its type ever offered to discriminating music lovers"—model called "Limited Edition," a TV-radio-3 speed phono with separate amplifier unit and special 15-in. speaker, to list at $2000. Picture tube is 24-in. Cabinet is mahogany breakfront credenza, 68-in. wide, 38-in. high, 24-in. deep, styled in 18th Century, French Provincial and modern. Price-wise, this unit exceeds DuMont's 30-in. "Royal Sovereign" at $1795 (Vol. 7:26) as most expensive set on market.

Arvin is out with 14 new models, one holdover—latter being its 8½-in. "portable" at $130 (GE picture tube). Three new 17-in. tables list at $250, $270, $280; two 21-in. at $370 & $380. Three 17-in. open consoles are $300, $320, $330; one 20-in. $450; two 21-in. $400 & $420. Consoles with doors include one 17-in. at $350, one 20-in. at $450, and 21-in. French Provincial at $500. All prices include tax, with warranty extra except on the 8½-in. Sets may be easily converted to uhf or color, Arvin says. Company also has 30 new radio models in AM, FM or both.

———▪———

Audio & Video Products Corp., specializing in technical installation for ad agencies and factory representatives for Ampex magnetic tape recording apparatus, Altec amplifiers and speakers, etc., has moved to old WQXR studios at 730 Fifth Ave., New York, may soon float stock issue. President is Charles E. Rynd, ex-ABC v.p. & treasurer, with Richard Rynd v.p. W. Oliver Summerlin, ex-Capitol Records chief recording engineer, is engineering v.p. Other directors are Percy L. Deutsch, founder of World Broadcasting System; Fred M. Thrower, ABC-TV sales v.p.; Thomas P. Robinson, ABC-TV sales service mgr.; Russell O. Hudson, ex-ABC Hollywood.

Roy Rogers got temporary injunction from Federal district court in Los Angeles this week restraining Republic Pictures from syndicating his old cowboy movies to TV (Vol. 7:26-27)—case seen as test whether studios have right to sell for TV sponsorship old films that weren't originally meant to accompany advertising.

Mobilization Notes: July 31 is deadline for filing applications for fourth quarter allocations of steel, copper and aluminum under Controlled Materials Plan. Manufacturers of consumer durable goods are required to file for first time—and NPA's Electronics Div. is preparing for about 850 applications from electronics manufacturers. This is 150 more than Division received for third quarter, TV and radio manufacturers making up the difference.

In estimating requirements for fourth quarter on Form CMP-4B, TV-radio manufacturers are being warned by Electronics Div. to observe materials limitations imposed by NPA Order M-47A (Vol. 7:25). In other words, a manufacturer shouldn't list in his requirements for fourth quarter more steel, copper or aluminum than he's permitted to use during third quarter.

TV-radio makers were also urged not to include in their requirements the steel, copper or aluminum in Class B items (parts & components) they purchase ready-made —since allocations of metals for these products are made directly to parts manufacturers—and are asked to mention in letters of transmittal accompanying applications that these items aren't included.

Since household TVs, radios, phonographs and combinations are all lumped under the same product class code in NPA's "B product" list, they may all be included in same application. NPA has announced no official decision as to whether consumer durables will actually be included in CMP next quarter, but it's generally expected they will.

* * * *

Emergency DPA loans for expansion of industrial facilities needed for defense effort were granted 2 electronics firms between May 28 & July 18. **Electronic Associates Inc.**, Long Beach, N. J., received $150,000 to purchase land, building, machinery and equipment for manufacture of electronic devices for Signal Corps. **Industrial Research Laboratories**, Baltimore, received $75,000 to buy facilities for research and development, alteration and equipment; it develops electronic and radar systems for industry and Armed Forces. DPA also issued certificates of necessity for rapid tax amortization to 2 electronic firms: **Oak Mfg. Co.**, for new facilities at Crystal Lake, Ill., for production of switches and tuners, to cost $408,673, of which 80% will be written off in 5 years for tax purposes; and **Thomco Mfg. Co.**, Redwood City, Cal., tape recorder parts, $5954 at 90%.

Radio amateurs will get defense priorities to buy parts and equipment, if new order now being prepared by NPA gets final approval. Electronics Div. began work on order at suggestion of electronics parts distributors, picked up heavy support from such govt. groups as military services and civil defense, as well as Red Cross. Order is expected to permit "hams" to write their own priority ratings, with dollar ceiling on amount of priority equipment they may buy in given time period. Members of amateur networks such as Military Amateur Radio Service (MARS) may be authorized to buy more priority parts than non-members. Reason for this, NPA official explained, is to induce amateurs to join emergency nets such as MARS or civil defense amateur service.

Communications industry—radio, telegraph, telephone & cable, but not including commercial TV-radio broadcast stations & networks or radio "hams"—receives special priorities assistance to obtain materials for maintenance and expansion under terms of NPA Order M-77, issued June 27.

"Defense Loans for Small Business" titles pamphlet issued July 20 by NPA Office of Small Business. It's available for 5¢ from Commerce Dept., Washington, and Commerce Dept. field offices.

Trade Personals: **W. E. Dulin**, former acting asst. chief of FCC's Marine Div., World War II chief of Navy Bureau of Ships Electronics Div., radio maintenance section, named chief radio communications equipment section of NPA Electronics Div., reporting to **J. A. Milling**, end equipment branch chief; **Gerald W. Davis**, ex-Bureau of Standards electronic scientist, ex-Raytheon & GE engineer, heads communications equipment unit under Dulin . . . **Earl R. Smith**, ex-RCA International, on leave from Connecticut Cabinet Co., heads new electronic & musical instrument section of OPS, formed from old radio, TV & miscellaneous section of housewares & accessories branch, Consumer Durable Goods Div., headed by **Harold B. Wess** . . . **David H. Cogan**, president of CBS-Columbia Inc. (formerly Air King), elected July 25 to CBS board . . . **William Garstang**, technical products contracts coordinator, named administrative director of engineering & research, Belmont (Raytheon), with **Robertson Gannaway** continuing as chief engineer . . . **George Hakim** named adv. mgr., DuMont receiver sales div., succeeding **Henry R. Geyelin**, now coordinator of all DuMont advertising . . . **Michael R. Buehner** promoted to chief mechanical engineer, Hoffman Radio . . . **H. B. Nelson Jr.** named asst. to **John T. Thompson**, sales mgr. of replacement tubes, GE tube div. . . . **J. J. Kahn**, Standard Transformer Co., named 1951-52 chairman of RTMA promotion committee, other members being **Max F. Balcom**, Sylvania; **Paul V. Galvin**, Motorola; **Leslie F. Muter**, Muter Co. . . . **H. N. Henrye Saller**, of John E. Fast & Co., reappointed chairman of RTMA credit committee, with **D. F. Reed**, Raytheon, eastern vice chairman; **A. D. Sigler**, Crucible Steel Co., western vice chairman . . . **Herbert J. Ravis**, president of Peerless Album Co., phonograph record albums, appointed president and gen. mgr. of Tele-King Distributors, Los Angeles, **Russell Martin** continuing as sales mgr. . . . **Henry Onorati**, ex-RCA Victor Records, joins Crosley as director of electronics advertising.

Henry A. Sullivan, 63, who retired as RCA controller in 1950, died July 23 at his home in Ridgewood, N. J.

———■———

NPA received some 490 requests for assistance from small electronics manufacturers Nov. 1 to June 15, of which the majority received aid. This is revealed in report on NPA's small business program, soon to be made public. Report shows 48,000 small businessmen asked for NPA aid during that period, and substantial majority received special assistance.

Plant expansions have been authorized by NPA under construction control regulations (Order M-4) for these electronics manufacturers July 2-19: **Wilbur B. Driver Co.**, factory building at Newark, estimated cost $663,450; **Bendix**, remodeling of electronic equipment plant at Elmira, N. Y., $43,850; **GE**, addition to plant at Bridgeport, $42,114.

* * * *

Annual "Buyers' Guide," published by *Electronics*, runs 640 pages this year, is now available from McGraw-Hill Pub. Co., 330 W. 42nd St., New York ($2). It includes: (1) Lists of parts and end-product manufacturers, with addresses, alphabetically and by products. (2) Index of trade names. (3) List of equipment distributors.

British Marconi has sold complete TV stations to Spanish Govt. for Madrid and Barcelona. Recently, it also sold studio and camera equipment for United Nations headquarters in New York and for CBC's projected new stations in Montreal and Toronto (Vol. 7:22, 29).

Tax of $11.60 per TV set levied on basis of $200 personal property assessment by Ridgewood, N. J. (pop: 4000 TVs) was discontinued July 25 by village commissioners after irate citizens protested.

Financial & Trade Notes: Sylvania's first half net sales reached record total of $103,822,579, up 70% from $61,086,101 in same 6 months of 1950. Net earnings were $5,680,670, equal to $2.95 on 1,856,550 shares now outstanding after payment of preferred; this is more than twice the $2,259,453 ($1.41 on 1,456,550 shares) profit shown for same 1950 period. Second quarter sales also set record: $43,191,494, up 36% from $31,738,190 for same 1950 quarter, with earnings of $2,165,515 ($1.11) vs. $1,033,609 (64¢). Earnings before Federal taxes amounted to nearly 4½ times what they were first half 1950. Study by Freehling, Meyerhoff & Co., Chicago, gives these operating statistics since 1941—noting that capitalization, besides 1,856,550 shares of common as of June 1, 1951 and $9,964,276 of preferred, includes funded debt of $17,200,000.

Year	Sales	Pre-Tax Profits	Net Income	Per Share Earnings *
1950	$162,514,814	$19,221,185	$8,221,185	$5.37
1949	102,539,866	5,027,840	3,052,840	1.82
1948	99,347,751	6,183,382	3,823,382	2.84
1947	95,715,638	2,847,075	2,507,075	2.10
1946	69,313,127	1,360,017	2,384,017	1.97
1945	125,750,512	8,383,820	2,136,279	2.05
1944	100,398,043	9,353,479	2,053,235	2.04
1943	60,473,821	7,097,636	1,567,936	1.79
1942	32,338,870	3,617,060	1,057,760	1.76
1941	20,561,246	2,402,186	1,067,186	1.78

* Based on shares outstanding at end of fiscal years.

* * * *

Zenith and subsidiaries report estimated net consolidated profit of $2,379,797 ($4.83 per share) after provision of $2,611,603 for excess profits for 6 months ended June 30. Consolidated sales totaled $53,007,639. Second quarter profits were $151,088 (31¢), after taxes of $159,610, on sales $15,954,575. Since company has changed fiscal period to end Dec. 31 instead of April 30, there are no comparable figures for same periods last year—but 1950 annual report (Vol. 7:12, 17) showed net profit of $5,627,003 ($11.43 a share) on sales of $87,704,071 for 8-month period ended April 30, 1950, and net profit of $8,479,390 on sales of $134,012,595 for 12 months of 1950.

"Although production and sales of TV receivers have been substantially curtailed because of the normal summertime seasonal decline and the restraining effect of Regulation W, the company has been maintaining normal production schedules of radio receivers, particularly portable receivers, AM-FM receivers and table model AC-DC sets," says July 25 statement by president E. F. McDonald. "Inventories of Zenith TV sets presently in the hands of the company's distributors and dealers are higher than at the same date a year ago but they are not considered burdensome."

* * * *

Packard-Bell sales for 9 months ended June 30 were $16,893,445, net income $989,902 ($1.68 per share) after deduction of $401,700 for taxes. This compares with $9,325,128 sales, $796,648 ($1.35) net income for same 1950 period. Defense orders now exceed $8,500,000, deliveries beginning this quarter and reaching volume proportions in fiscal year beginning Oct. 1, according to executive v.p. Robert S. Bell.

Aerovox, despite decline in TV business and shift to defense contracts, about duplicated first quarter's $6,000,000 sales during second quarter for gain of 16% over the $10,300,000 in first half of 1950 when net was $1,749,418 ($2.51 per share on 691,356 common), reports *Wall Street Journal*. Current net is not up to last year's rate due to taxes. Company reports only once a year.

Hoffman Radio reports net loss of $247,345 on sales of $7,703,942 in first half of 1951. During same 1950 period, sales were $11,229,630, net profit $930,279 ($2.19).

WJR, The Goodwill Station Inc., Detroit, reports sales of $1,693,993 for first 6 months of 1951 vs. $1,713,703 same 1950 period. Profit was $288,253 (56¢) vs. $271,463 (52¢).

RCA and subsidiaries achieved all-time record of $302,333,933 sales during first 6 months of 1951, compared with $248,784,358 during same period last year. Net profit, however, was $15,703,361 ($1.02 per common share) after provision of $16,608,000 for Federal taxes, compared with $20,961,643 ($1.40) after provision of $14,140,000 for taxes same period 1950. Second quarter sales totaled $116,742,178, net profit $3,801,819 (22¢) vs. $121,414,808 sales and $9,725,412 (65¢) profit during same 1950 quarter.

Mid-year balance sheet indicates sales pace rather well sustained during second quarter, considering drop in TV demand, but it's unlikely remainder of year will enable company to achieve record $586,393,000 sales shown for all 1950 (Vol. 7:9)—certainly not the net profit after taxes of $46,250,000 ($3.10) earned in 1950, in light of higher tax rates.

* * * *

ABC-United Paramount Theatres merger (Vol. 7:21-24, 26-29) got stockholders' approval of both companies July 27, with 80.8% of ABC and 80.6% of UPT voting in favor. ABC stockholders will receive for each common share $7.50 in common stock of new American Broadcasting-Paramount Theatres Inc. measured at $19 a share, plus $7.20 of preferred measured at par value. New firm's capitalization will consist of outstanding issue of 608,047 shares of $20 par preferred and an authorized issue of 5,000,000 shares of $1 par common, of which 3,927,931 shares will be outstanding.

These changes in stockholdings by executives were reported to N. Y. Stock Exchange last week: Zenith president E. F. McDonald Jr. sold 4800 Zenith, decreasing indirect holdings to 34,131 shares, direct holdings to 10,260. Philco v.p. John S. Timmons sold 4950 Philco (June), holds 13,000. Isaac D. Levy, ex-CBS director, in June sold remaining 5926 shares of CBS Class B (Vol. 7:28), NYSE also reports.

American Phenolic Corp. reports net profit of $481,926 on sales of $11,109,262 first 6 months of 1951 vs. $457,811 on sales of $5,717,056 same period last year. June quarter accounted for $6,161,477 sales, $273,394 profit.

Dividends: Tung-Sol, 25¢ on common, 20¢ on preferred, payable Aug. 1 to holders of record July 17; Hazeltine, 25¢ payable Sept. 15 to holders Sept. 1; International Resistance, 10¢ payable Sept. 1 to holders Aug. 15.

———■———

THREAT to movies by TV has reached peak—barring unforeseen developments. That's general conclusion reached by Hollywood roundtable conference between exhibitors and film producers this week, sponsored by Council of Motion Picture Organizations. Closed session on TV at Beverly Hills Hotel attended by 30 delegates was highlight of meeting. Among topics on which there reportedly was general agreement:

(1) Movie films shouldn't be released to TV, nor should big name stars be encouraged to appear too often on TV. (2) Good pictures, comfortable theatres and better promotion are best answers to threat of TV. (3) Pay-as-you-see TV is still in "impractical" stage for mechanical reasons, such as susceptibility of coin boxes to tampering, etc.

At session on advertising and exploitation, Universal-International v.p. David Lipton estimated that of the $60,000,000 spent annually to promote films, some $50,000,000 goes to newspapers. He suggested some of this money be re-channelled to make much wider use of TV to advertise films, and to use radio in non-TV areas. Roundup story in July 27 *Wall Street Journal* reports general pickup in movie business, with most exhibitors quoted crediting better pictures, and many hopefully suggesting "tired of TV" may be reason.

REQUEST for "reasonable and equitable basis" for computation of telecasters' excess profits tax (Vol. 7:9, 21 24) was voiced July 27 by Fort Industry Co.'s John B. Poole, spokesman for TV Broadcasters Tax Committee before Senate Finance Committee. He pointed out that radio earnings of companies operating in both TV and radio during the 1946-49 base period for excess profits computation had been slashed by large losses suffered in pioneering TV operations, gave figures to show that "losses sustained in TV during this period so depressed normal profits derived from radio broadcasting that the average industry rate of return . . . declined from 24.9% in 1946 to 10.1% in 1949."

He urged Senators to approve S. 1861, introduced last week by Sen. Frear (D-Del.), which would permit any broadcaster deriving 30% or more of his income from TV to compute average base period income by multiplying December 1949 assets by (1) his ratio of income to assets in pre-TV 1946, or (2) by radio broadcasting's industry-wide rate of return for 1946 (24.9%)—whichever is greater.

Effect of proposal would be to allow telecasters a rate of profit comparable to that of radio broadcasters before subjecting them to excess profits tax. Senate committee is considering tax proposals in connection with House-passed revenue bill (H.R. 4475).

———■———

Ford Motor Co.'s library of 16mm films is being made available to TV stations, rental free, through its 6 Film Library branches in Dearborn, Mich. (Earle Harger, distribution supervisor), and in New York, Washington, Chicago, Kansas City, Richmond, Cal., where catalogs are available. Seven films have full TV clearance, namely, *The American Cowboy, The Big Race, Canyon Country, Men of Gloucester, Pride of Workmanship, Southern Highlanders, Driver Education Series.* Films are 20 or 30 minutes, with exception of driving series which comprises six 10-min. shorts. "All other films listed in the catalog," states Mr. Harger, "can be televised without the use of the sound track. With these, other background music can be dubbed in, or a commentary approximating that on the sound track can be given in the studio."

Westinghouse will sponsor live college football games this fall under National Collegiate Athletic Assn's "controlled TV experiment," NCAA's TV committee announced July 24. Financial details weren't revealed, and according to NCAA ruling Westinghouse will deal individually with some 40 colleges whose games will be televised. In complicated 10-week "experimental" schedule, each area will be blacked out for 3 Saturdays, no team will be televised more than twice and Westinghouse will assist in research to determine effects of TV. About 50 stations will carry contests. Network plans haven't been announced, but on 2 Saturdays entire interconnected TV hookup will be used, on others there will be regional and sectional hookups. Deal was made through Ketchum, MacLeod & Grove agency, Pittsburgh.

Time Inc. now lukewarm about acquiring TV rights to Democratic and Republican national conventions next summer (Vol. 7:28), but other sponsors may continue trying. Trade reports had *Chicago Tribune's* Col. McCormick objecting to Time-Life tieup—they're politically opposed. So far as GOP is concerned, decision on principle of sponsorship (from which it's thought $1,000,000 might be derived) must be decided by 20-member convention arrangements committee, to be appointed by Chairman Gabrielson in September.

July 1 sets-in-use figure for Tulsa is 77,200, up 3000 from June 1. Revised Los Angeles total shows 1,002,000 as of July 1, an increase of 2000 from the even 1,000,000 given in NBC Research figures last week (Vol. 7:29).

Another TV station and 3 AM stations received approval to begin construction under NPA's building control Order M-4 (Vol. 7:19-20, 22, 27, 29) during week ended July 19. WTOP-TV, Washington, got go-ahead to build addition to studio building, to cost about $16,350. Two AM grantees not yet on air received OK from NPA—WLEA, Hornell, N. Y., to build radio station at $21,100; WCMY, Streator, Ill., transmitter building at $6400; WLBB, Carrollton, Ga., already on air, authorized to build station costing $24,900. Other authorizations have been made by NPA field offices, but so far only actions announced have been those by Washington office. There is no record of denial of any broadcaster's application to date.

Three applications for new TV outlets filed with FCC this week came from St. Louis Amusement Co., subsidiary of big Fanchon & Marco talent booking firm, seeking Channel 11 in that city; WEAU, Eau Claire, Wis. (same interests as WEBC, Duluth, and WISC, Madison, and other stations, with Eau Claire *Press* and *Leader* as 24% stockholder), Channel 13; KRIC, Beaumont, Tex. *(Beaumont Enterprise* and *Journal)*, Channel 6. [For further details, see *TV Addenda 13-C herewith;* for complete list of all pending TV applications, see *TV Factbook No. 13* with Addenda to date.]

New DuMont TV Center in Manhattan, to be partially occupied Oct. 1, is remodeled 7-story Central Opera House at 205 E. 67th St., which will house "largest and most modern video studios ever constructed under one roof." Five studios for live telecasts, 2 for coordinating film and remote programs, all program and engineering facilities, will be contained in 1,000,000 sq. ft. interior. Engineering chief Rodney D. Chipp is supervising equipment installation. Thompson Starrett Co. is doing construction work.

Coast-to-coast TV network is still due "by year's end," according to AT&T. Regarding July 25 *Variety* story to effect that hookup is planned for September, AT&T spokesman said: "Our engineers sometimes work miracles, but I haven't heard any of them mention a date as early as September. Within 30 days, we think we'll be able to predict the date with reasonable accuracy." *Variety* reported President Truman will keynote inaugural hookup featuring big-name Hollywood and New York talent.

Appropriation of $6,116,500 for FCC for year ending June 30, 1952, was agreed upon this week by Senate-House conferees. Commission had asked for $6,575,000; Senate bill had authorized $6,233,300, House bill $6,000,000. During July 20 FCC-industry conference on freeze-ending procedures (Vol. 7:29), FCC Chairman Coy warned that cut to $6,000,000 "could be translated into loss of 100 man-years" with consequent adverse impact on quick end to freeze.

Freeze lift in U. S. Territories, subject of FCC report due soon, is considered probable. Principal complication is fact educational channel reservation issue hasn't been finally settled, presumably won't be until final decision on all freeze issues. At present, there are no applications from Territories.

TV Station & Network Map

New Television Map of the United States, in color, revised to July 15, 1951, showing locations and lists of all operating TV stations with present and projected (1951-52) network routes, was made available with each copy of our *TV Factbook No. 13.* It's 22x34-in., suitable for wall or desk, usable as working outline. Demand for this map has been so great that we've ordered re-run, can offer extra copies at $1 each—or 50¢ each in quantities of 20 or more.

Deadlines for Comments

AGENDA FOR FCC's ALLOCATIONS PROCEEDINGS, BY CITIES

Cities below are grouped according to dates by which written statements must be filed in accordance with FCC's Order of Hearing Procedure (Notice 51-739) of July 25, 1951. Statements to be filed are those in support of comments previously filed. For digests of previous comments, see Television Digest Supplements 72 to 72-C inclusive.

Note: Each group has 3 dates. First is deadline for statements supporting original comments, offering counter-proposals to FCC allocation plan (see TV Allocation Report of March 24, 1951). Second is for oppositions to counter-proposals. Third is for briefs on issues of fact or law. Groups & dates are as follows:

DuMont plan	Aug. 27	Sept. 17	Oct. 1	Groups X-AA	Oct. 1	Oct. 22	Nov. 5

Supplement No. 74
July 28, 1951

Report and Order

FCC Authorizes Temporary TV Power Increases

Full Text of Public Notice No. 51-752 Adopted July 25, 1951, Effective Immediately

Upon request for special temporary authority (STA), stations may boost effective radiated powers (ERP), thus widening coverage areas, improving signal quality, pending final decision on freeze issues; see story Vol. 7:30

In the Matters of

Amendment of Section 3.606 of the Commission's Rules and Regulations.	Dockets No. 8736 & 8975
Amendment of the Commission's Rules, Regulations and Engineering Standards Concerning the Television Broadcast Service.	Docket No. 9175
Utilization of Frequencies in the Band 470 to 890 Mcs. for Television Broadcasting.	Docket No. 8976

FIFTH REPORT AND ORDER OF COMMISSION

1. On May 6, 1948, the Commission issued a "Notice of Proposed Rule Making" (FCC 48-1569) in the above entitled Dockets 8736 and 8975 designed to amend its Table of television channel assignments for the United States. During the hearing subsequently held by the Commission on its proposed Table, evidence was presented concerning tropospheric interference, directional transmitting antennas, increased power and mileage spacings between television stations. As a result of this evidence, an Industry-Commission Conference was held on September 13, and 14, 1948, on the following issue, among others:

"If the standards are to be revised, what policy should be adopted with respect to applications now pending before the Commission."

At the conclusion of that Conference the Commission announced its plan to hold an engineering conference "to consider questions regarding revision of the Commission's Rules, Regulations and Standards with respect to the technical phases of television allocations."

2. On September 30, 1948, the Commission issued a "Report and Order" (FCC 48-2182), commonly referred to as the "freeze" order. By the terms of said Order, Section 1.371 of the Commission's Rules was amended by adding footnote 8(a) thereto, reading as follows:

"[8a] Pending further consideration of the issues in Docketc Nos. 8975 and 8736, requests for television authorizations on channels 2 through 13 will be considered in accordance with the following procedure:

"(a) Applications pending before the Commission and those hereafter filed for permits to construct television stations on channels 2 through 13 will not be acted upon by the Commission but will be placed in the pending files.

"(b) Applications pending before the Commission and those hereafter filed for modification of existing permits or licenses will be considered on a case-to-case basis and Commission action thereon will depend on the extent to which they are affected by the issues to be resolved in the proceedings bearing Docket Nos. 8975 and 8736.

"(c) No hearing dates will be scheduled with respect to applications for construction permits which have been designated for hearing, and in cases in which hearings have been commenced or completed but decisions have not been issued, no further action will be taken.

"(d) This procedure does not apply to construction permits or other television authorizations heretofore issued by the Commission."

3. Pursuant to the provisions of subparagraph "(a)" above, no applications then pending or thereafter filed for construction permits for new television stations have been granted, and there are now on file with the Commission 420 such applications. Since December, 1948, in considering various applications before it for modification of outstanding construction permits, the Commission has clarified its intentions concerning the "case-to-case basis" specified in the subparagraph "(b)". In passing on these applications, the Commission has not granted applications for modification of construction permits where such grants would result in increased coverage over that resulting from the effective radiated powers and antenna heights specified in the applicants' authorizations outstanding on September 30, 1948, the date of the Commission's "freeze" order. It has granted requests for lower powers and increased antenna heights which would result in coverage not in excess of that existing on the "freeze" date. It has not granted increased powers and lower antenna heights since such increased power involved questions of increased troposperic interference. It has issued partial grants in accordance with the above policy.

4. On March 22, 1951, the Commission issued its "Third Notice of Further Proposed Rule Making" (FCC 51-244) in which it provided in paragraph "10" thereof the following:

"10. The most important single factor which induced the issuance by the Commission of its 'freeze' order of September 30, 1948, was the desire to ascertain whether sufficient mileage spacing had been provided between assignments set forth in its table. On the basis of the data contained in the record of this proceeding the Commission is proposing the separations specified in the attached Appendix A. In the light of these separations the Commission proposes to take the following actions upon the expiration of the time specified in paragraph 12 herein for the filing of comments and oppositions thereto:

"(a) The Commission will determine whether any issue has been raised which would prevent the lifting of the 'freeze' with respect to channel assignments in Alaska, Hawaiian Islands, Puerto Rico and Virgin Islands. These Territories are sufficiently removed from the continental United States so as not to be involved in the separations problems of continental United States and present no assignment problem with any neighboring countries. Separations have been maintained within the Territories which

AUG 3 1951

are in accordance with the Commission's proposals in Appendix A. Accordingly, in the absence of any issue with respect to these separations, the Commission proposes to lift the 'freeze' with respect to the above Territories without waiting to reach a final determination on all the assignments proposed in Appendix C.

"(b) The Commission will determine whether any issue has been raised with respect to the Commission's proposed assignments in the UHF band. In the absence of such issue, and where serious procedural or practical objections do not exist, the Commission will consider lifting the 'freeze' on applications which specifically request a UHF channel.

"(c) The Commission will determine whether any issue has been raised with respect to applications by existing television licensees and permittees to increase power in accordance with the proposals set forth in Appendix A. In the absence of such issue the Commission will consider lifting the 'freeze' so far as existing stations are concerned on a case-to-case basis where it appears that a grant of increased power not in excess of the maximum specified in Appendix A will not affect channel assignment proposals offered by the Commission or by interested parties and will not unduly restrict the Commission's flexibility in reaching final determinations with respect to assignments still in issue.

"(d) Should the Commission take action in accordance with the views expressed in subparagraphs (a), (b), and (c) above, a reasonable period will be provided for the filing of appropriate applications."

5. In advancing the above proposals for a partial lifting of the "freeze" the Commission recognized that the factors which called for a continuance of the "freeze" on the construction of new VHF television stations in the United States were not the same, in all respects, as those relating to the Territories, the UHF band, and increased power for existing stations. The Commission was of the opinion that under certain conditions a partial lifting of the "freeze" might be effected in the three instances specified in paragraph "10" of the Third Notice. However, with respect to the construction of new television stations in the VHF band, it became evident that a change in a channel assignment in a particular city, or the retention of a particular assignment might have a chain reaction on assignments in areas hundreds of miles away. For example, assuming the mileage separations specified in Appendix A, if a channel were changed in City X, it might require a change in co-channel assignments within a 180-mile radius from City X, as well as in adjacent channel assignments within 70 miles of City X, and possible shifting of other channels. These channel changes might require corresponding shifting of channels located within a 180-mile radius from the second group of channels. In the same way, if construction permits were issued for new stations in City X either on the existing channels or on the proposed channels, it might have the effect of freezing channel assignments within 180 miles, which, in turn, might freeze assignments within another 180 miles, ond so on. It followed, therefore, that any crystallization of channel assignments resulting from the authorization and construction of new television stations in particular areas might remove the element of flexibility, an element which is essential if the Commission is to remain free to adopt an assignment table based on the soundest engineering principles.

6. On June 15, 1951, in a "Memorandum Opinion and Order" (FCC 51-635) the Commission designated for oral argument questions relating to its authority to issue a Table of Assignments as part of its Rules and to reserve channels for non-commercial educational stations. Thereafter, on June 21, 1951, the Commission issued its "Third Report of Commission" (FCC 51-640) in which it explained why it could not, at that time effectuate the purposes of paragraph "10" of the Third Notice. In that Report the Commission pointed out that because of the existence of substantive and procedural objections it would take no action at that time to lift the "freeze" with respect to applications for UHF channels; and that, pending the above mentioned oral argument, it would take no action at that time to lift the "freeze" in the Territories and to permit existing stations to increase power. Subsequently, on July 13, 1951, the Commission issued its "Memorandum Opinion" (FCC 51-709) in which it concluded that it had legal authority under the Communications Act of 1934, as amended, to "(1) Prescribe as part of its rules and subject to change through rule making a table specifying the channels upon which television station assignments may be made in specified communities and areas; and (2) designate and reserve certain of the assignments provided in such table for use by non-commercial educational television stations." In view of these conclusions we have again considered the possibilities suggested in paragraph "10(a)" and "(c)" of our Third Notice. And we have concluded that it is now possible, consistent with the basic criteria set out in paragraph "10(c)" to take certain steps permitting some increase in power for existing stations. A separate further report will be issued with respect to the suggestion contained in paragraph "10(a)".

7. In suggesting the possibility, in the Third Notice, of permitting increased power for existing stations we recognized that this might be accomplished without encountering problems such as those which would arise if we permitted new stations to be constructed in areas having no service at present. Without prejudice to those areas not now having stations, we would be providing for a better service to the public from existing stations and would be creating a situation in which, as a general matter, existing stations could operate on a more nearly equal basis from the viewpoint of coverage—a condition which would contribute materially to the healthy development of the new television industry.

8. In paragraph "10(c)" of the Third Notice the criteria we enunciated were, in essence, that increases in power for existing stations would be permitted if, upon consideration of all comments, we could permit such increases on a "case-to-case" basis in a manner which would not affect channel assignment proposals offered by the Commission or by interested parties in this proceeding, and would not unduly restrict the Commission's flexibility in reaching final determinations with respect to assignments still in issue. Out of approximately 700 comments filed by interested parties pursuant to the Commission's Third Notice, only two comments opposed the Commission's proposal to increase power of existing stations. Neither of the two opposing comments advanced a single reason as to why the proposal should not be effectuated.[1] From a review of the many comments and oppositions heretofore filed in this proceeding we do not believe it to be advisable at this point in the proceeding to permit increases to the powers specified in Appendix A. However, the Commission is of the opinion that some action can be taken during this interim period to accomplish in part the basic purpose expressed in paragraph "10(c)" of that Notice. The Commission proposes to continue its present policy of considering applications for modification of existing facilities which request changes in transmitters, antennas or locations therefor, under the terms of the existing "freeze" policy as described in paragraph "3" herein. We would also provide, on an interim basis, for a more efficient use of authorized stations through the granting of special temporary authority (STA) permitting temporary increases in power within the framework of the Commission's existing Rules and Standards "which will not affect channel assignment proposals offered by the Commission or by interested parties and will not unduly restrict the

[1] The comments referred to are those of Radio Virginia, Inc., WXGI, Richmond, Virginia, and of Radio Kentucky, Inc., WKYW, Louisville, Kentucky. These comments, in pertinent parts, are as follows:

Radio Virginia, Inc.: "2) In general, we wish to register opposition to these phases of the plan: . . . C—The plan to grant power increases on the VHF channels."

Radio Kentucky, Inc.: "Radio Kentucky, Inc., opposes the granting of further power increases to VHF channels."

Commission's flexibility in reaching final determinations with respect to assignments still in issue." Accordingly, the Commission proposes to consider, on a case-to-case basis, requests by existing stations for special temporary authority to increase coverage beyond that permitted under the "freeze" policy. The following considerations will be applicable to such requests for special temporary authority:

(a) Community stations are permitted, pursuant to Sec. 3.603 of the Commission's Rules, to operate with a maximum effective radiated power of 1 kw and with an antenna height of 500 feet above average terrain. The Commission will consider requests by existing community stations (three in number) operating 500 watt transmitters with less than 500 watts power output for special temporary authority to increase transmitter power output to that figure, provided that the effective radiated power may not exceed 1 kw. Transmitters of more than 500 watts rating will not be authorized.

(b) Section 3.604 of the Commission's Rules permits metropolitan stations to operate with effective radiated power not in excess of 50 kw with antenna height of 500 feet. However, under the provisions of said Section, antenna heights in excess of 500 feet are permissible but such grants may be subject to reduced effective radiated power "so that the coverage (within the 5000 uv/m contour) shall be substantially similar to that which would be provided by 50 kilowatts effective radiated peak power and a 500 foot antenna." Under this rule antenna heights in excess of 500 feet have been authorized, but the Commission has until now limited effective radiated power so that the reduced power and increased antenna height would provide equivalent 5000 uv/m coverage. The Commission now will consider requests by metropolitan stations operating 5 kilowatt transmitters at less than 5 kilowatt power output for special temporary authorization to increase transmitter power output to that figure, provided (1) the effective radiated power may not exceed 50 kilowatts and (2), where antenna heights exceed 2000 feet, the Commission may limit effective radiated power to less than 50 kilowatts.

(c) Section 3.605 of the Commission's Rules provides for rural stations serving areas more extensive than those served by metropolitan stations, where the additional areas served are predominantly rural in character. This rule does not limit the powers and antenna heights of such stations and, prior to the "freeze," applications therefor were considered on a case-to-case basis. The Commission will consider requests by rural stations to use the same power proposed for metropolitan stations in subparagraph "(b)" above.

(d) Grants made in accordance with the provisions of subparagraphs "(a)," "(b)" and "(c)" above will be issued subject to the condition that they are without prejudice to any determination which the Commission may hereafter make with respect to outstanding proposals concerning Appendices A, B, C and D of the Third Notice.

(e) Special temporary authorizations issued pursuant to the above requests, and extensions thereof, will be limited to periods not in excess of six months.

(f) Applications by stations for changes in their classification will not be granted.

9. Applications filed by existing stations for changes of transmitters and antennas will, therefore, be considered in accordance with the existing "freeze" order, and requests for operation of authorized equipment beyond the limits of the "freeze" policy will be considered for temporary periods in accordance with the procedure described above. Since amendment of our rules to provide for this procedure constitutes an amendment relating to practice and procedure before the Commission, and constitutes a statement of policy, under Section 4 of the Administrative Procedure Act proposed rule making is not required and said amendment may be made effective immediately.

Accordingly, it is ordered, this 25th day of July, 1951, that effective immediately, Section 1.371 of the Commission's Rules and Regulations is amended so that subparagraph "(b)" of footnote "8a" (designated footnote "10" in the Code of Federal Regulations) shall read as follows:

(b) Formal applications pending before the Commission and those hereafter filed for modification of existing permits or license will be considered on a case-to-case basis and Commission action thereon will depend on the extent to which they are affected by the issues to be resolved in the proceedings bearing Docket Nos. 8736, 8975, 9175 and 8976. Such formal applications will be considered on the basis that neither the coverage within the 500 uv/m contour nor the effective radiated power shall exceed that authorized on September 30, 1948; applications requesting greater coverage or power will be given consideration on the basis of partial grants within these limits. Licensees and permittees of television stations may apply by letter or other informal application for special temporary authority (STA), and for extensions thereof, for periods not in excess of six months, to operate under the following terms and conditions:

(1) Community television stations operating 500 watt transmitters with less than 500 watts power output may apply for special temporary authority to increase transmitter power output to that figure; provided that the effective radiated power may not exceed 1 kw.

(2) Metropolitan and rural television stations operating 5 kilowatt transmitters at less than 5 kilowatts power output may apply for special temporary authority to increase transmitter power output to that figure. In no event may the effective radiated power of a metropolitan or rural station exceed 50 kw. Where the antenna height of a metropolitan or rural television station exceeds 2000 feet above average terrain, the effective radiated power of such station may be limited to less than 50 kw.

(3) Applications by existing television stations for changes in their classifications will not be granted.

(4) Any authorization issued pursuant to the above subparagraphs shall be granted subject to the condition that it is without prejudice to any action the Commission may take with respect to outstanding proposals concerning Appendices A, B, C and D of the Third Notice of Further Proposed Rule Making and that such authorizations will either be modified to conform with any final determinations reached by the Commission in said proceeding, or will be cancelled.

FEDERAL COMMUNICATIONS COMMISSION

POWER BOOSTS ALL TO EVERYBODY'S GOOD: Up to 10 miles more coverage radius for some TV stations...better pictures for many televiewers...less interference annoyance... even the more effective use of built-in and indoor antennas.

These are immediate benefits assured from TV transmitter power boosts now being authorized by FCC. Acting speedily to implement new FCC policy of permitting maximum powers on temporary basis pending end of freeze, Broadcast Bureau is processing applications as fast as it can.

By end of week, it had approved increases for 22 stations in 18 cities -- and all or most of 20 remaining applicants, plus others who may file, should be similarly notified in matter of a few more days. (For list of authorizations and applications still pending at end of week, see p. 4.)

For this week's 22 stations, it merely means turning up power outputs of present transmitters -- in most cases to 5-kw maximum -- to derive benefits of last week's special order (Vol. 7:30 & Supp. 74), which permits maximum effective radiated power (ERP) up to 50 kw. The 3 "community" stations are limited to 1 kw ERP.

Majority of the stations will realize significant increases in powers radiated from their antennas as result of boosts granted this week. Some of the hikes, translated into ERP, are little short of spectacular. Miami's WTVJ should get biggest proportionate boost so far -- tenfold jump in ERP to approximately 22 kw.

One station will reach FCC's maximum of 50 kw ERP -- WHAS-TV, Louisville, which was authorized to turn its transmitter output up from .89 to 4.6 kw, instead of 5 kw, which would have shot it through the 50-kw ceiling. That's a 500% hike -- from present 9.69 kw. Louisville's other outlet, WAVE-TV, goes from 7 to 25 kw.

In New York, WJZ-TV announced it will turn up its power Aug. 9 from 3 to about 16.5 kw, same day it moves from temporary antenna to main TV mast atop Empire State Bldg. WOR-TV gets boost from 9 to about 22 kw, WPIX from 3.6 to 5 kw ERP.

Other typical increases in ERP expected as result of this week's actions: WGN-TV, Chicago, 11.2 to 28 kw; WBKB, Chicago, 11 to 20 kw; WSM-TV, Nashville, 14.4 to 27 kw; WHEN, Syracuse, 15 to 27 kw; KRLD-TV, Dallas, 15.1 to 30 kw; WXEL, Cleveland, 21 to 25 kw; WTVN, Columbus, 6 to 19 kw.

Note: It should be emphasized that ERP in TV isn't comparable to AM power. TV powers alone can't be used as criteria for comparison of station service areas -- which depend also on related engineering factors, such as antenna location and height and operating frequency.

NEW BORDER STATION OPENS RIPE MARKET: Nice new market for TV receivers opens up with start, promised sometime between Sept. 1 & 15, of new station in Matamoros, Mexico, just across border from Brownsville, at southeast tip of Texas. New XELD-TV will operate on Channel 7, be programmed mostly in English -- for all practical purposes another American outlet, though licensed by Mexico to Romulo O'Farrill Sr., publisher of Mexico City Novedades, operating XETV there, Latin America's first TV.

New 500-watt RCA transmitter has already been delivered, along with studio

Copyright 1951 by Radio News Bureau

AUG 6 1951

and field camera chains and projection equipment. It's located on high hill outside Matamoros, so that its .1 Mv/m signal is expected to embrace coverage of 50-mi. or more, taking in all or most of rich Cameron, Hidalgo & Willacy counties, to say nothing of substantial population cluster on Mexican side of Rio Grande.

Those counties alone total more than 300,000 population, include wealthy towns of Brownsville, 1950 estimated population 36,000; Harlingen, 23,000; McAllen, 20,000; San Benito, 13,000; Edinburg, 12,000; Mission, 11,000; Mercedes, 10,000; Raymondsville, 9000; Weslaco, 7500. Matamoros has only 8000, but its environs also share in rich fruitlands and big irrigation projects of Rio Grande Valley.

Manager Monte Kleban, an American, headquartering at 1111 S.E. Levee St., in Brownsville, has been lining up sponsorships in U.S. with considerable success, planning commercial operation along traditional lines -- with kine-recording-services from the U.S. networks. Luis Guaragna, of RCA Victor Mexicana, is engineer in charge of construction. RCA subsidiary will send sets from Mexico City factory into Mexican area, but by far largest sales are expected on U.S. side -- with sets to be channeled from wholesale houses of major manufacturers in San Antonio and Houston.

* * * *

Sovereign Mexico is fully within its rights in authorizing station, for it has no freeze and is party to agreement with U.S. whereby Channel 7 is allocated to Matamoros. In same allocation plan, but frozen so far as U.S. applicants are concerned, are Channels 4 & 5 allocated to Brownsville.

Senor O'Farrill's speedy enterprise will doubtless spur other Mexican interests to hasten efforts to get border stations and get going before FCC ends freeze. They will thus gain same head start in capturing audiences that stations in Buffalo and Detroit have in as yet non-locally served Canada.

The allocations agreement gives other Mexican border towns like advantages. For example, Juarez, opposite El Paso (130,000 population) gets Channels 9, 11 & 13 while El Paso gets VHF 2, 4, 5 & 7 and UHF 20 & 26, all frozen; Nuevo Laredo, opposite Laredo (51,000) is allocated VHF 11 & 13 while Laredo's VHF 3 & 8 and UHF 15 are frozen; Tiajuana, near San Diego (321,000) is allocated 6 & 12 while San Diego has one Channel 8 station in operation and VHF 3 & 10 and UHF 21, 27 & 33 frozen.

Note: For Mexican channel allocations, see p. 60, TV Factbook No. 13. Also in Factbook are proposed U.S. & Canadian allocations, lists of pending applications.

TV FILMS MAY SUPERSEDE LIVE NETWORKS: Conviction is growing in high places that most TV programming will eventually be on films -- whether produced by networks themselves or by other enterprisers. Reasons aren't hard to discern:

(1) High cost of coaxial-microwave hookups -- largest item in TV's overhead -- so much higher than for radio that some can't see any chance for network TV, per se, to earn a profit. Cost will mount to staggering proportions when, now promised as of Sept. 30, transcontinental relays west from Omaha will permit linking merely 4 more TV cities into present networks -- at huge per-mile cost.

(2) Control and editing of programs before telecasting, with just as good quality possible via modern film techniques as via wire or radio relays.

Hence the networks' preoccupation not only with their profit-earning owned-&-managed TV outlets, but with all kinds of film techniques: kine-recordings, still requiring more development for quality; simultaneous filming of TV shows during performance, permitting superior quality; filmed shows produced exclusively for TV.

NBC-TV has even gone so far as to plan making films of popular TV programs and stars for actual showings in movie houses (Vol. 7:26).

"Except for news and special events, what's there on network TV that can't be shown just as well on a delayed basis?" to quote a top network executive. "And for news and special events, we can simply buy special hookups on a plug-in basis instead of contracting for monthly or yearly rentals of coaxial-microwave circuits."

AT&T may not like it -- but, then, neither did the radio networks like it at first when high-fidelity recording came along, indistinguishable from live shows, offering just as good program fare, winning official recognition of FCC when it

accepted the late Henry Bellows' suggestion (he was a radio commissioner, then a CBS v.p.) that they be given the euphemious label "electrical transcription."

Many years passed before networks would deviate from self-imposed rule not to use recordings for anything but sound effects. Now they're all up to their ears in transcriptions, as are stations -- using them regularly for time-zone or time-clearance repeats, and even for such big-name network radio shows as Bing Crosby's.

* * * *

Everett Crosby, who runs his brother's Bing Crosby Enterprises, goes along with "Ike" Levy's fast-building rival Official Films Inc. (Vol. 7:22,27) in conviction that most future TV programming will be via film--at least 75%, he says. Moreover, he told Advertising Age, TV program headquarters will eventually be Hollywood.

Crosby said he has spent $2,000,000 to back up this belief, citing firm's highly successful "Fireside Theater" series (produced for Procter & Gamble), promising new productions titled "Cry of the City," 30-min. drama; "Inside Football," with coaches as commentators; "Freedom Hour," based on documents on the Freedom Train; "Parade of Champions," greats in sport; "The Chimps," animals with human voices.

Argument that film shows have less spontaneity is dismissed as nonsense by Bing's elder brother and business partner. "They used the same argument for radio until Bing disproved it. These people are worried because comedians sometimes get good laughs out of fluffs. If a mistake adds to a show, there's no reason why it can't be left in the film."

Will Bing himself, contracted to non-TV-releasing Paramount for 2 films per year, and a major stockholder in that firm, go on TV anytime soon? Not this fall, said Everett. He's under CBS contract, but "he's not in favor of hard work."

COAST-TO-COAST TV STARTS SEPT. 30: Next World Series, Rose Bowl and other football games, certainly some top-name network shows, "go transcontinental" after Sept. 30 as result of AT&T decision to begin operating its new TV relays then. Networks have already contracted for time on the new circuits -- 2 westward, 2 eastward -- and CBS-TV is already talking about piping some or all of Jack Benny's shows eastward from Hollywood, also Burns & Allen.

Extensions westward from Omaha, present limit of network service, will permit hookup of stations in Salt Lake City, San Francisco, Los Angeles, San Diego. Seattle, only other far western city with TV outlet as yet, won't be hooked up for awhile yet, though there's now a coaxial out of Sacramento for phone service with Seattle and it can be modified for TV.

Phone company's plans for rest of year (see Television Digest map) also envisage more microwave circuits into Southwest for phone service but not yet definite for TV. Due for completion in October is new Memphis-Birmingham-Atlanta coaxial extension via Jackson, Miss. The Omaha-San Francisco links require some 70 towers, for microwave relays, whereas whole $40,000,000 New York-San Francisco project requires 107 in all, spaced about 30 miles apart -- by a curious coincidence, same number as there are TV stations now operating.

HARADEN PRATT GETS TOP GOVT. POST: Neither FCC nor any govt. agency loses autonomy, ostensibly, because of President Truman's choice of own Telecommunications Adviser in person of Haraden Pratt, top IT&T engineering executive, v.p. of American Cable & Radio Corp. and director of IT&T's Federal manufacturing and lab subsidiaries.

But fact is Mr. Pratt will act as sort of "one-man FCC" over all the govt. agencies maintaining communications facilities -- a sort of "bridge" between Govt. and private industry, so far as uses of wire and wireless are concerned.

He'll advise President how to exercise existing powers to allocate radio frequencies to govt. users, notably the military and safety of life services; also, how best to control communications during emergencies.

President Truman elected to have one man perform this function rather than set up a "Telecommunications Advisory Board" of 3 men suggested in recent report of the President's Communications Policy Board (Vol. 7:13). That 240-page document was the fruit of full year's work by 5 eminent scientists and administrators who were

asked to review whole subject in broader policy aspects. ("Telecommunications: A Program for Progress", published by Govt. Printing Office, $1.)

Report suggested ways and means of best utilizing spectrum, was welcomed by industry because it urged that all govt. "users" must justify their radio frequency demands no less than private users, and that there must be close cooperation with FCC in allocating as between govt. and non-govt. users and uses.

Report ran whole gamut of wire and wireless fields. With respect to TV's hopes for more vhf channels, it threw cold water on idea because of impact on military and safety of life services already entrenched.

Pratt is now in Geneva attending an international radio conference, is due back soon to be sworn into $15,000 job which is supported by White House contingent fund and requires no Senate confirmation. He will have offices and staff provided by National Security Resources Board. He must resign IT&T jobs. Just turned 60, he is a native of San Francisco, veteran of old Marconi Wireless Co., onetime Navy and Bureau of Standards scientist, IT&T technical executive for last 23 years.

FIRST official FCC look-see at compatible color, as demonstrated with tri-color tube by RCA (Vol. 7:29) and further developed under auspices of National Television Systems Committee (Vol. 7:30), takes place next week when Commission's top-level engineers view 4 different demonstrations by NTSC Panel 13.

This panel of 20 leading industry engineers, headed by Hazeltine's A. V. Loughren, is preparing color video standards for submission to full NTSC, after which field-testing of those standards will be conducted under Panel 16 headed by DuMont's Dr. T. T. Goldsmith. FCC technicians have also been assigned to view field tests later.

Standards panel is considering "variant forms," so NTSC can choose details regarded most advantageous. Thereafter, it can be presumed NTSC—probably RCA also, separately—will ask FCC to reopen color hearings and adopt new standards either in lieu of or in addition to already-adopted CBS field sequential.

At NTSC invitation, FCC designated its group to go to GE labs in Syracuse, Monday, Aug. 6; Hazeltine, Little Neck, N. Y., Aug. 7; RCA, Princeton, Aug. 8; Philco, Morrisville, Pa., Aug. 9. FCC representatives are Edward W. Allen, chief engineer; Curtis B. Plummer, ex-chief engineer, now chief of Broadcast Bureau; Edward W. Chapin, chief of Laboratory Div.; William C. Boese, acting chief, Technical Research Div.

Commission, meanwhile, this week authorized GE's experimental KE2XHX in Syracuse to carry color transmissions, and Philco will demonstrate via its own WPTZ on Channel 3. Live subjects presumably will be used at most of the demonstrations, though Hazeltine plans still pictures because it does not yet have camera.

Philco also is planning periodic demonstrations on non-commercial hours (9:30-10:30 a.m.) to ask WPTZ viewers to report on quality of monochrome images received—just as did RCA-NBC in recent New York colorcasts. Meanwhile, company offers adapters to its sets for those wishing to get CBS pictures in black-&-white, but itself is not planning to make any CBS-type receivers or slave units.

Upon shoulders of CBS-Columbia Inc. (formerly Air King) is falling burden of task of popularizing field-sequential receivers, very few other set makers finding it feasible as yet to spare materials from their black-&-white lines. Company is understood to be facing serious materials shortages, as are all other manufacturers, due to govt. limitations. There's considerable doubt in trade whether CBS Brooklyn plant can actually turn out promised 25,000 color TV receivers plus 50,000 black-&-white sets remainder of this year—unless NPA grants special aid, regarded unlikely in view of past actions.

CBS reports such enthusiastic response to its color demonstrations in Cincinnati, in collaboration with WKRC-TV, that they're being extended to Aug. 22. But instead of rotating receiver among local Kroger stores, WKRC-TV is placing it in local Coney Island amusement park so more people can see. Dayton's WHIO-TV, starting Aug. 8, will carry full CBS color schedule (10:30-11 a.m. & 4:30-5 p.m.) for 3 days, with receivers rotated in Kroger stores.

Next big New York promotion will be CBS colorcasts of 3 Brooklyn Dodgers games from Ebbetts Field, Aug. 11 & 25 and Sept. 8.

* * * *

Summary of NTSC standards for composite system of compatible color is featured in August issue of *Electronics*. Editor Don Fink describes approaches taken by different companies in industry effort to find best system. In same issue is article describing simple all-electronic picture generator for color TV, by Hazeltine's R. P. Burr, W. R. Stone and R. O. Noyer. Test patterns developed by generator, which can provide signals for RCA or CBS systems, are illustrated in color on magazine's cover.

Following 22 stations were authorized by FCC this week to increase powers (see story, p. 1)—all to 5-kw transmitter output unless otherwise noted: WDEL-TV, Wilmington (500 w); WTVJ, Miami; WAGA-TV, Atlanta; WBKB & WGN-TV, Chicago; WHAS-TV (4.6 kw), WAVE-TV, Louisville; KMTV, Omaha; WJZ-TV, WOR-TV & WPIX, New York; WHAM-TV, Rochester; WHEN, Syracuse; WKTV, Utica (4.3 kw); WXEL, Cleveland; WTVN, Columbus; WICU, Erie (500 w); WJAC-TV, Johnstown; WGAL-TV, Lancaster (250 w, aural only); WSM-TV, Nashville; KRLD-TV, Dallas; WSAZ-TV, Huntington. Applications pending at week's end: WBRC-TV, Birmingham; KNBH & KTSL, Los Angeles; KFMB-TV, San Diego; KRON-TV, San Francisco; WENR-TV & WNBQ, Chicago; WHBF-TV, Rock Island; WTTV, Bloomington; WFBM-TV, Indianapolis; WWJ-TV, Detroit; WKZO-TV, Kalamazoo; WNBF-TV, Binghamton; WCBS-TV & WNBT, New York; WSYR-TV, Syracuse; WCPO-TV, Cincinnati; WNBK, Cleveland; WKY-TV, Oklahoma City; WTVR, Richmond.

RCA has announced new 10-kw vhf TV transmitters, to conform with FCC's proposal for higher power stations. It's forerunner of projected 50-kw amplifier. New transmitters use air-cooled tetrode tubes in final power stages, eliminating water-cooling methods, provide peak visual power of 10 kw, aural 5 kw. Model TT-10AL is designed for channels 2-6, TT-10AH for 7-13.

IRE's fall meeting scheduled for Oct. 29-30 in King Edward Hotel, Toronto, being arranged by Sylvania's Virgil M. Graham, with color main topic.

Personal Notes: Wayne Coy, FCC chairman, vacationing until Aug. 15 at Cape May, N. J., vice chairman Paul A. Walker acting . . . Earl B. Abrams, ex-*Television Digest*, has joined editorial staff of *Broadcasting Magazine* . . . Walter W. Powell, veteran CBC station mgr., appointed commercial mgr. of CBC to succeed E. A. Weir, retiring; his asst. is W. R. Johnston . . . James M. Valentine quits as ABC-TV central div. operations supervisor to become South American TV engineering representative for Federal Telecommunications Labs, headquartering in Buenos Aires . . . Richard Hodgson, director of TV development for Paramount Pictures, president of its subsidiary Chromatic Television Laboratories Inc., named research-development consultant to Gen. Hoyt Vandenberg, chief of staff, Air Forces; he was radar advisor to Gen. Vandenberg's 9th Air Force during war . . . James S. Pollak, WJZ-TV program mgr., named ABC-TV central div. program mgr., effective Aug. 15 . . . Alex Kennedy promoted to director of program promotion, CBS-TV network; David Luhmann named promotion director, CBS-owned TV stations . . . James Sirmons promoted to mgr., CBS Radio Network operations; George Bristol director of radio sales promotion & advertising . . . Frank McGivern resigns as gen. mgr., WCFL, Chicago, to join Tom O'Neil, director of Don Lee-Yankee operations . . . Gene Dawson, Washington correspondent of *Indianapolis News*, named executive secy. to Sen. Capehart (R-Ind.), succeeding Charles Egenrod. who becomes administrative asst., taking place of Ray Donaldson, now RTMA counsel . . . Betty Forsling, ex-TV-radio editor of *Newsweek*, joins ABC-TV as asst. to Charles M. Underhill, new national program director; Joan Walker, daughter of famed newsman Stanley Walker, takes over *Newsweek* post . . . Don Blauhut, ex-H. B. Humphrey Co., named TV-radio director, Peck Adv. . . . Al DeCaprio resigns from CBS-TV production staff to join Young & Rubicam as liaison on GE's *Fred Waring Show* . . . George T. Duram, ex-Lever Bros., formerly with Dancer-Fitzgerald-Sample and Kastor ad agencies, joins C. E. Hooper Inc. as account executive . . . James D. Shouse, director of Avco and president of Crosley, elected to board of Hines-Park Foods Inc., Ithaca, N. Y., headed by Duncan Hines . . . Merritt Coleman named director of business affairs, CBS-TV Div., under v.p. I. S. Becker . . . Lawrence H. Rogers succeeds Marshall L. Rosene as general mgr., WSAZ & WSAZ-TV, Huntington, W. Va., Mr. Rosene resigning to become president of WNXT, Portsmouth, O.

Station Accounts: Cleveland's WXEL will feed its nightly 12-12:10 a.m. *Sohio Reporter*, with Warran Guthrie, sponsored by Standard Oil of Ohio, to an Ohio Valley Network—piped Mon. thru Fri. to WLWT, Cincinnati; WLWC, Columbus; WLWD, Dayton; and Tue. Thu. & Fri. to WSPD-TV, Toledo . . . American Vitamin Associates, Los Angeles (Thyavals, Orvita, etc.), sponsoring Chicago baseball on WGN-TV (Vol. 7:13) and using shows and spots elsewhere, names Schwimmer & Scott, Chicago, as agency—promotion director Walter Lewis and account executive Jerry Hill joining S&S Hollywood staff in merger with The Counselors, Hollywood agency, whose president Frank J. Miller becomes executive v.p. of S&S Hollywood branch . . . National Carbon Div., Union Carbide & Carbon Corp., returns to TV in September & October for spot campaign promoting Prestone anti-freeze, thru Wm. Esty & Co., N. Y. . . . Philadelphia Leather Goods Co. (White Star Luggage) debuts in TV with musical on WCBS-TV, New York, Tue. 9-9:30, thru Ellington & Co., N. Y. . . . Webster-Chicago Corp. (wire & tape recorders) buys newscasts on WNBQ, Chicago, Fri. 10:15-10:30, thru Fuller & Smith & Ross, Cleveland . . . Among other advertisers reported using or preparing to use TV: Wilson & Co. Inc. (Ideal dog food), thru Ewell & Thurber Associates, Chicago; Reo Motors Inc. (trucks & lawn mower), thru William Hart Adler, Chicago; Leigh Foods Inc. (frozen juices), direct; S. A. Schonbrunn & Co. Inc. (Savarin coffee), thru Lawrence C. Gumbinner Adv., N. Y. (WABD); Hotels Mayfair & Lennox, St. Louis, thru Olian Adv., St. Louis; Megs Macaroni Co. (Pennsylvania Dutch Bott Boi pot pie), thru Michenor & O'Connor, Harrisburg; Southern Cal. Fish Corp. (Blue Seal tuna & Marca Italia Tonno), thru Hixson & Jorgenson, Los Angeles.

Network Accounts: Chesterfield will present Bob Hope on NBC-TV, Sun. 7-7:30, starting in early fall, using other stars on rotating basis . . . Kellogg's purchase of participation in *All Star Revue* on NBC-TV, Sat. 8-9, completes sellout of NBC-TV *Saturday Night Revue*, 8-10:30 (Vol. 7:30) . . . Goodyear Tire & Rubber Co. will take over vacated time for as yet unnamed dramatic show when Philco in the fall sponsors *Television Playhouse* alt. weeks on NBC-TV, Sun. 9-10 . . . Florida Citrus Commission (canned fruit juices) Aug. 4 started 5-week sponsorship of *Doodles Weaver Show* on NBC-TV, Sat. 10-10:30, thru J. Walter Thompson . . . Sterling Drug Inc. starts *Mystery Theatre* Oct. 5 on ABC-TV, Fri. 8-8:30, thru Dancer-Fitzgerald-Sample, N. Y. . . . Bristol-Myers Co. will sponsor *Mr. District Attorney* on ABC-TV starting in Oct., time and date unannounced . . . Stokely-Van Camp Inc. (canned foods) has renewed time for the *Little Show* on NBC-TV, Tue. & Thu. 7:30-7:45, but will probably replace John Conte with Dinah Shore when show returns in fall . . . Schlitz will sponsor *Schlitz Playhouse of Stars* on CBS-TV, Fri. 9-10, starting Oct. 5, thru Young & Rubicam . . . Atlantic Refining Co. and Brewing Corp. of America (Carling's ale) sign for 10 Chicago Bears and 10 Cleveland Browns games on DuMont Network, which begins football season with Admiral's Aug. 17 sponsorship of All-Stars vs. Cleveland Browns game from Chicago and Sept. 9 Miller Brewing Co. sponsorship of Chicago Bears-Cleveland Browns game . . . George S. May Co. (business engineering services) sponsoring both Aug. 5 & 12 All-American and Tam O'Shanter golf tournaments on 10-city DuMont hookup, Sun., 6:30-7, placed direct . . . Old Gold takes over sponsorship of *Down You Go* on DuMont, now keyed from WGN-TV, Thu. 9-9:30, starting date and new time not yet decided.

FCC hearing on theatre-TV frequencies has been postponed from Sept. 17 to Nov. 26, deadline for filing statements from Aug. 15 to Oct. 26. Hearing promises to be lively, with new Fair TV Practices Committee (Vol. 7:25) prepared to press its charge that theatre TV is illegal. Committee Chairman Jerome W. Marks, New York attorney, in Aug. 3 letter to AT&T president Cleo F. Craig, expressed "grave concern" over "proposals to employ the time of coaxial cables for the purpose of box-office TV," thereby denying them to free commercial TV.

Army-Air Force plan to use 35% of their 1952 ad budget on TV-radio, while whole Defense Dept. recruiting service has $3,100,000 earmarked for advertising—including $735,000 for TV-radio, $525,000 national magazines, $420,000 newspapers, $84,000 films, plus about $1,000,000 on local advertising. Figures were adduced from House Appropriations Committee testimony of Maj. Gen. T. J. Hanley, chief of military personnel procurement.

City of Jacksonville's WJAX, beaten by FCC in courts in effect to get its 1948 CP for TV reinstated (Vol. 7:27), reapplied this week for Channel 12—only TV application of week, bringing total now pending to 425. [For further details see *TV Addenda 13-D herewith;* for list of all applications pending see *TV Factbook No. 13* with Addenda to date.]

NATION-WIDE study of "viewers' evaluation of TV" was voted by NARTB's TV Program Standards Committee (Vol. 7:25, 28-29) at organizational meeting in Washington July 30, as step toward compilation of TV program code. Survey will be conducted by NARTB research dept. under Dr. Kenneth H. Baker, and supplemented periodically to reflect changing opinions of viewers.

Four subcommittees were named by chairman Robert D. Swezey, WDSU-TV, each charged with making tentative drafts of sections of code for presentation to full committee in Washington Oct. 2-3. Subcommittees, their meeting places and dates:

Education & culture, responsibility toward children, acceptability of program material, decency & decorum in production: Davidson Taylor, NBC, chairman; James L. Caddigan, DuMont; Clair McCullough, WGAL-TV; Paul Raibourn, KTLA; Donald W. Thornburgh, WCAU-TV. Meets in New York Aug. 6.

News, public events, religion, community responsibility, controversial issues: Harold Hough, WBAP-TV, chairman; Leonard Reinsch, WSB-TV; Henry W. Slavick, WMCT; Mr. Swezey. Meets in New Orleans, Aug. 10.

Advertising practices: Walter J. Damm, WTMJ-TV, chairman; Harry Bannister, WWJ-TV; James D. Hanrahan, WEWS. Meets in Milwaukee, Aug. 8.

Standards observance: Mr. Raibourn, chairman; Mr. Bannister; Mr. Thornburgh. Date and place of meeting to be announced.

Parent committee agreed to serve as reviewing body—to "interpret the standards and advise participating TV broadcasters on day-to-day developments affecting such standards."

———■———

TV-radio rules in case of war disaster were announced Aug. 1 by New York State Civil Defense Commission following conferences with committees representing 12 TV and 129 radio stations in State. To avoid confusion and panic, rules make it felony to broadcast announcements other than official ones during "yellow" alert warning of possibility of attack. Commission gave all TV-radio stations 30 days to prepare plan of action and list of individuals to be notified in case of alert. Commission chairman Col. Lawrence Wilkinson said in event of "red" or imminent attack alert, TV stations would announce alert, broadcast siren warning signal, then leave air. Radio stations would broadcast music between official announcements if security doesn't necessitate their leaving air.

Hollywood "can win substantial control of TV" if it's willing to risk the money, predicts highly critical article in August *Fortune*. With unconcealed glee over what it calls "TV's time of trouble," unsigned article maintains: "The big story about TV today is no longer one of irresistible power. It lies rather in the unexpectedly strong bargaining power of TV's competitors, heretofore given up for lost, and in the equally unexpected weaknesses of the new medium." High costs of TV time and talent will be biggest contributor to its undoing, article reasons, sounding this rallying cry to subscription TV, Hollywood and the educators: "The mastodon is in the mire. Now is the time to harness him."

British TV manufacturers—notably Scophony-Baird, Pye & Thorn Electrical Industries—have been pressing Australia to get into TV but, says correspondent of *Motion Picture Herald*, commercial men think it's 5 years away—and then only for Sydney. Govt.-owned Australian Broadcasting Corp.'s gen. mgr. Charles J. Moses thinks it can come in 2 years. It's estimated TV would mean added burden of $4,500,000 on Postoffice Dept., which has jurisdiction, for one station only one year, and would require license fee of at least £3 per set (radios now pay £1).

"Some of the bloom has worn off Bloomington," laments radio-TV columnist John Crosby, as he contemplates fact WTTV now gets network shows, via its own relay. In his July 25 syndicated column extolling manufacturer-telecaster Sarkes Tarzian, Crosby describes this "paradise": "If anyone in Bloomington wants to get on TV, he just calls the station. With no audition and very little rehearsal, he's on. Almost anyone, Bloomington has discovered, has *something* to say or do, and, even in the worst cases, it isn't any worse than some of the celebrities who show up on Ed Sullivan's shows and in many cases it's a lot more interesting." Crosby goes on, with his typical snappishness: "Tarzian, in fact, has just reversed the usual order of things. The normal, but by no means the best routine with a new TV station (in a one-station town) is to throw a switch putting on whatever of the 4 network shows the program manager happens to like. In that way you can avoid the headaches of local programming, and can almost avoid thinking at all . . ."

One-fourth of non-TV owners haven't purchased set because they can't afford it, one-fifth are waiting for color or improvements, one-eighth aren't interested. So Advertest Research, New Brunswick, N. J., reports in study based on 1,350,000 non-TV households (36.1%) out of 3,740,000 in 17 counties of New York area. Sampled homes totaled 758. Among conclusions: (1) One-third of all non-owners, or 450,000, expect to buy set within 12 months. (2) Average non-owner watches TV 1.5 days a week, equivalent to 11 minutes a day; he listens to radio 114 minutes a day. Some 30% don't view TV regularly. (3) Non-owner families are smaller than TV families; only 35% of non-TV families have children, while 55% of TV families have children. (4) Average sponsor identification by non-owners is 71% for TV, 56% for radio.

Color adapters and converter parts, kits, etc., continue to be announced by various companies. In addition to those previously reported, Colortone, New York, offers adapters and discs, no motors yet; Color-Video, Long Island City, has Philco adapters (Vol. 7:23) at $17.95 list; United States Service Co., Philadelphia, reports plans to make and install converters; JFD Mfg. Co., Brooklyn, is reported planning to manufacture adapters and converters under CBS license. Spectacular, often lurid ads, are appearing to herald color films that fit over picture tube to give illusion of color—but have nothing to do with TV systems (Vol. 7:24). These are getting quite a play despite fact colors rendered bear no relation to scenes, which are transmitted in black-and-white.

Newly formed **CBS Laboratories Div.** has been organized into 2 departments—engineering research & development under Dr. Peter C. Goldmark, v.p., and licensing & contracts under Richard C. Mahler, director. Both report to division president Adrian Murphy. Licensing & contracts dept. will negotiate licenses and contracts with manufacturers under CBS patents covering color, recording, etc., will also handle govt. and other contracts for engineering development.

* * * *

Hollywood correspondent Thomas M. Pryor, *New York Times*, reported Aug. 1 that David O. Selznick may make deal for release of some of his old pictures "if he is convinced that the market can provide sufficient financial reward". These would constitute most important group of Hollywood-made films yet made available to TV from standpoint of dramatic value and big names. Included would be *Duel in the Sun, Spellbound, The Parradine Case, Since You Went Away, Rebecca, Little Lord Fauntleroy, Portrait of Jenny*—ranging in age from 15 years for *Fauntleroy* and 3 years for *Jenny*.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
August 4, 1951

THE TV TRADE PICTURE BRIGHTENS: It's the wrong season now to expect any big upsurge in TV sales right away, even with stimulus of the relaxed credit regulations that went into effect Aug. 1. But season's traditional turning point, Labor Day, isn't far off -- and outlook is now good.

Not only the easing of Regulation W (Vol. 7:30), but telecasting station power boosts and the promise of good fall-winter programs should give market exactly the lift needed to dispose of inventory and get back on even keel.

Power boosts especially (see p. 1) are hailed with delight, for they mean stronger signals, over-riding more local interferences -- plus better pictures and widened fringe markets. It's first fillip to trade from FCC since color imbroglio.

* * * *

Manufacturers were inclined to be more restrained in their comments on how eased credits will work than they were before Congress approved relief. Some are leaving things entirely to dealers, others plan factory-directed promotions to help speed unloading of inventories so they can resume as full production as defense materials limitations now allow.

"The change in Regulation W is bound to have a beneficial effect," said one major producer, "but it isn't the cure-all. We know we're facing the competition of the high cost of living." Said another: "It has already eased the frame of mind of dealers and public." Another: "Regulation W isn't the full answer, but it will be a decided stimulant. It means a better market when the buying season opens up than if the old restrictions were still in effect."

Factories are intensely concerned with near-depression that has hit wholesale and retail levels. Dealer bankruptcies, said RTMA chairman Robert Sprague in testimony before Senate committee this week (see Topics & Trends) were up 222% first 6 months of 1951 over same 1950 period. Also --

"As of the end of June 1951, the number of employes engaged in making TV sets had declined 40% from the levels of June 1950...Total employment in the industry has been reduced by about 50,000 persons since early 1951."

Manufacturers can take up some slack (though earn less profit) in defense work -- but: "During June 1951, production of military equipment accounted for average of only 10.8% of the capacity of members of the industry. At least 50% of the dollar value of military electronic contracts represents foundry, sheet metal and precision machine work generally performed by companies outside electronics..."

* * * *

Urge to move piled-up stocks may temporarily mean over-generous allowances under new 15% down and 18 months to pay, with trade-ins applicable to down payments. But that isn't expected to last long, may just be current flurry. Rash of ads now appearing, some with fantastic offers, obviously is designed to get rid of inventory and acquire needed cash.

Wide-open loophole in new Regulation W as drafted by Federal Reserve Board is clause permitting trade-ins to be credited as all or part of the down payment. Because there's no "blue book" of trade-in values in TV-appliance field, and because -- at direction of Congress -- FRB didn't stipulate what can be traded in or how much can be allowed for it, return to the "no money down" days seems likely.

But this time the battle-cry will probably be a more dignified "no cash required." New York Better Business Bureau already has suggested ban on use of the words "no down payment" in reference to trade-in allowances, and FRB says it has no intention of issuing an immediate interpretation of its ruling -- though Board officials informally seconded BBB's warning that "no down payment" is misleading.

Under wording of Regulation W, a dealer may allow more on a traded-in item

than it's worth -- or he may accept anything in trade on new TV, radio or appliance. He could accept an old crystal set, a doorknob or lead pencil as full down payment on set sold at "list price" -- cutting his price on "down payment" end rather than cutting dollars off list price, as is done now.

* * * *

Production is still creeping forward, fourth July week's output of 50,772 TV units (only 851 private label) comparing with 44,196 preceding week (Vol. 7:30). Total for July's 4 weeks is 106,055, lowest since July 1949. Radios totaled 184,685 (69,936 private label) for week ending July 27, bringing month's total to 734,281. Week's radios were: 112,884 home receivers, 27,606 portable, 44,195 auto.

Factory TV inventories rose again -- to 761,448 from peak 754,717 the week before. Radio inventories were 384,415, up from 375,066. At beginning of June the factory TV inventory figure was 593,633, at beginning of July 723,309.

NPA LOOSENS MATERIALS STRAITJACKET: All TV-radio manufacturers stand to gain from latest revision of NPA materials control formula for consumer durable products.

Effective immediately are sweeping changes in Govt.'s method of limiting use of steel-copper-aluminum in consumer hard goods during current third quarter. While limitation percentages are unchanged -- 70% of first-half 1950 steel use, 60% of copper, 50% of aluminum (Vol. 7:25) -- keynote of Aug. 2 revision of Order M-47A is flexibility. It actually permits set makers to use more material and parts.

Principal change is one industry has long sought -- allows manufacturers to switch their metal quotas among long list of products, including practically any or all appliances, to meet changing market conditions or seasonal demands.

A manufacturer of TVs & radios who also makes other appliances -- refrigerators, air conditioners, ranges, anything -- may now use the steel, copper, aluminum formerly earmarked for TV-radio to make any product he chooses. Or he may take his appliance quotas and use them for TV & radio. He may even branch out into new fields of appliance manufacture without appealing to Govt.: e.g., TV-radio company could begin making electric toasters or other consumer durables under wording of order.

Color and uhf adapters and converters are among items mentioned in new order and steel-copper-aluminum going into these products may come out of manufacturer's quota of materials for practically any consumer durable product he made during first half of 1950. Other important changes in new order:

(1) Manufacturer who uses less metal than he's entitled to under M-47A may step up correspondingly his purchases of ready-made parts and sub-assemblies -- and vice versa.

(2) Manufacturer may disregard metal content of any parts he buys or makes which are CMP "Class B" products -- if he so chooses. In TV-radio, this means practically all parts and components. If he does this, he must subtract this metal from base period use as well as third quarter use under M-47A. This provision could result in availability of more parts to TV-radio manufacturers, since it removes the metal in parts from scope of order's percentage limitations.

* * * *

New order applies to third quarter only. It's now virtually certain that consumer durables will come under Controlled Materials Plan in fourth quarter. But whether they do or not, best information indicates that their share of materials will be: steel, 65% of base period use (cut from 70%); copper, 55% or slightly less (cut from 60%); aluminum, slightly less than present 50%.

CBS-Columbia Inc., new CBS subsidiary formed from old Air King Products Co. Inc., in open letter to TV distributors and dealers published as trade ad Aug. 1, makes big pitch for franchisers—promising "CBS-Columbia is destined to be America's leading line in television . . . a great *new* name!" Consumer campaign breaks early in September in *Life, Saturday Evening Post, This Week* and other magazines, supplemented by local TV, radio and newspaper advertising of both black-&-white and color TV sets (Vol. 7:29). Officers of CBS-Columbia Inc. were named this week as follows: David H. Cogan, president; Bruce A. Coffin, executive v.p.; J. A. Stobbe, operations v.p.; L. M. Kay, engineering v.p.; M. A. Gardner, v.p. in charge of purchases; Allan Strauss, exports v.p.; John Ward, controller, asst. secy. & asst. treas.; Sam Dean, treas. & secy. Board members are Bruce Coffin, chairman; Mr. Cogan, Lloyd H. Coffin, Adrian Murphy, Frank Stanton, Sam Dean, Ralph Colin.

Topics & Trends of TV Trade: Emerson's bold move to "guarantee" its current sets against any obsolescence by color drew news headlines this week—but it's still too early to determine how public is taking to it. All sets in Emerson's 9-model "1952" line are being sold with stipulation that at any time within 2 years of sale they may be returned to dealer and "total purchase price returned as full or partial payment on any color receiver, regardless of make." Emerson will reimburse dealers for any sets returned.

Color refund plan was first announced July 30 in conjunction with John Wanamaker store in New York and Philadelphia's Stern & Co. chain, but was extended Aug. 1 to all Emerson dealers. President Ben Abrams reported offer has attracted much "favorable attention" and increased store traffic at Wanamaker's and Stern's.

Offer was designed "to give the business a shot in the arm," according to Mr. Abrams, who maintains "color talk has hurt TV sales more than any other factor, including Regulation W." He reaffirmed Emerson's stand against production of non-compatible color sets, but guessed other manufacturers might turn out as many as 1,000,000 color sets in next 2 years.

Trade-in plan is scheduled to run for limited time only —possibly 3 months. Mr. Abrams said at July 31 press conference that company may have to stand loss of more than $1,000,000 because of trade-ins, but "we are persuaded [that] the ultimate results will fully warrant the goodwill and business-building investment." Operating at a production rate slashed in half by "defense demands," Mr. Abrams estimated Emerson will produce 125,000 sets rest of this year.

Emerson's offer caught the imagination of *Wall Street Journal*, which gave it big play as "$20,000,000 gamble." The *Journal* didn't explain its arithmetic.

* * * *

Chances are excellent that Senate will follow House's lead in scrapping Administration's request to hike TV-radio excise taxes from 10% to 25% (Vol. 7:6 et seq), in opinion of industry and trade leaders. RTMA chairman Robert C. Sprague and NARDA president Mort Farr were optimistic after testifying before Senate Finance Committee this week. Both made point of TV industry's present depression, recent upsurge in dealer bankruptcies.

Sprague asked Senators to consider removing present 10% tax instead of increasing it, pointed to surveys indicating remaining market for TV consists of families earning less than $5,000, submitted analysis by Boni, Watkins, Mounteer & Co., showing "higher excise tax would unquestionably depress and aggravate sales even further."

For broadcasters, NARTB govt. relations director Ralph W. Hardy told Senators public relies on TV-radio as major source of news and general information; therefore, receivers shouldn't be taxed any more than newspapers. Bendix Radio's Leo G. Horney appeared before Committee to urge removal of excise taxes from industrial and communications electronic equipment. Hearings completed, Committee plans to report bill out by Aug. 25.

* * * *

Canadian RTMA reports 20,070 TVs sold for $11,007,218 during first 6 months of 1951, inventories totaling 11,451 units as of June 30. Windsor area (Detroit) took 41% of 6 months sales, Toronto-Hamilton 35%. June sales were lowest yet, with only 493 units sold for $254,239, compared with 1116 in May (Vol. 7:27). Table models under $400 list totaled 139, over $400 totaled 236. Consoles under $500 totaled 8, over $500 totaled 100. TV-phonos numbered only 10. Toronto-Hamilton area took 38% of June sales, Niagara Peninsula 27%. Windsor area (Detroit), which usually leads others, dropped to 22% of sales.

More liberal price ceilings on TV-radio sets and electronic parts and equipment are inevitable as result of new controls bill signed July 31 by President Truman. To avoid "profit-control" squeeze, Congress specified manufacturers may include in their costs such expenses as increased advertising expenditures, sales costs and general administrative expenses. Under old law, (Vol. 7:9, 14, 17-18, 21-22), increased labor and material costs were only major items which could be taken into consideration. OPS is studying law and will issue new regulation soon incorporating new provisions voted by Congress.

OPS July 31 revoked General Overriding Regulation 13 and put back into effect the major manufacturing orders which had been held in suspension for a month. These include GPR 22 (which regulates, among other things, home TV-radios and their parts) and GPR 30 (including other electronic equipment and parts). Deadline for filing the various forms and reports required by the orders has been extended to Aug. 13. Most producers who have already filed under the 2 orders will be entitled to adjustments of their ceilings under forthcoming new OPS regulations.

* * * *

Westinghouse's new line consists of 16 TVs, 10 radios, being shown to eastern distributors in New York Aug. 6, in Chicago Aug. 13, Los Angeles Aug. 20. Prices are generally lower than previous models, of which 8 holdovers are still in stock. Line begins with 16-in. black plastic table at $199.95, plus four 17-in. tables: black plastic $229.95, mahogany plastic $239.95, mahogany veneer $259.95, oak $269.95. Mahogany table with 20-in. is $349.95. Consoles are five 17-in. models: mahogany wood open-face at $299.95 & $329.95, oak $349.95, French Provincial full doors & same in fruitwood $399.95. Two 20-in. consoles with full doors are $449.95 & $469.95. Two combinations with AM-FM-phono are mahogany full-door at $499.95, oak $525. Top of line is 24-in. TV-only with paneled half-doors at $675. Radios range from $25 to $230, include company's first clock radio at $37 and 2 AM-FM tables at $60 & $63. Big ad campaign, tying in with Westinghouse football sponsorships (Vol. 7:30), is planned.

Stewart-Warner showed 10 TV sets, mostly in present line, and 17 new radios (8 AM table, one AM-FM table, 4 clock models), priced from $20 to $290, to annual sales convention in Chicago Aug. 3. New TV set was 17-in. consolette at $299.95 with unique white frame for picture that is as wide as set itself. Sales mgr. Edward L. Taylor said company was "ready for uhf" with turret tuner already built into all but about 5000 of its earliest models, "ready for color" with plug-in for CBS color and "a CBS color adapter if you want it."

New Hoffman line unveiled at this week's distributor convention is said to be all-new models, with new price list. Line starts with 14-in. oak table at $199.95, 17-in. mahogany table at $299.95. Consoles are 19-in. at $369.95, 20-in. at $465, and three 17-in. at $299.95, $339.95 & $395. Combinations are 20-in. in maple or mahogany at $595 and 17-in. at $495. New 24-in. console to list for $595 will first be offered on West Coast only.

Pocket-sized conservation handbook has been mailed by RCA to all TV service organizations. Illustrated 34-page booklet contains detailed suggestions on saving of installation and maintenance materials resulting from tests conducted by RCA Service Co. Possibly most useful feature is extensive list of alternate parts and tubes which can be substituted when exact replacements aren't available.

No new models before Sept. 1, is report from RCA; in fact, "no new line—simply adding some models." Company guaranteed present line to Aug. 1, which some distributors extended on own to Sept. 1. Field salesmen meet in Camden Aug. 13.

Trade Miscellany: More plant layoffs (Vol. 7:30): GE electronics dept. at Syracuse takes 500 workers off TV production lines this week, blaming govt. restrictions on materials; placing most of them on other work . . . Sylvania reports it's spending $14,000,000 this year on new plant and equipment, including $1,250,000 for metallurgical lab at Bayside, N. Y., largely for work with Atomic Energy Commission . . . Paul H. Wendel's Television Technical Lecture Bureau, Indianapolis, forms Lecture Bureau Publishing Co. Inc. to publish *National TV Tuner*, trade paper for servicemen, first issue due Oct. 15. Paul V. Forte, ex-TV Contractors Assn., Philadelphia, is editor . . . "Webcor" will be used as trade name on all consumer products of Webster-Chicago Corp.; it's already label on its magnetic tape recorder, will be put on wire recorders, phonographs, record changers, amplifiers, etc. . . . Superior Tube Co., Norristown, Pa., acquires 15,000 sq. ft. factory in Wapakoneta, O., where in December it plans to produce seamless nickel cathodes . . . RCA has tied up with Allied Laboratories Inc. (pharmaceuticals & biologicals) for closed-circuit telecasts of American Veterinary Medical Assn. surgical demonstrations during Milwaukee convention, Aug. 21-22 . . . DuMont sues Tel-O-Tube in Newark Federal court, charging patent infringements . . . Delco Radio Div., General Motors, buys Reliance Mfg. Co. plant in Kokomo to add 150,000 sq. ft. for expansion for defense work and later more auto radios.

* * * *

Official report on TV-radio and appliances at last month's Western Merchandise Mart, San Francisco, is almost carbon copy of reports on recent Chicago marts, notably Music Trade Show (Vol. 7:29). Writes market analyst Marion West:

"Price was definitely the objective of appliance and TV dealers . . . Those distributors who did not offer some sort of 'deal' [got] little attention . . . hit by 'closed purse' policy of retailers, mainly because this is where retail inventories are still the biggest.

"Contrary to past Markets where branded merchandise was most important, firms with off-brand goods were attracting customers if prices were right. Regulation W [was] taking much of the blame for the present slump in retail sales. [But] most dealers were fairly optimistic about business this fall, and both salesmen and buyers expect October to usher in increased activity."

Hoffman Radio's Leslie Hoffman, in speech, said radio for 20 years before TV did one-third of its business first 6 months, two-thirds second 6 months, and forecast that "the fall of 1951 will follow the historical pattern, and inventories will be fully absorbed by Oct. 15."

* * * *

Merchandising Notes: Washington Electric Institute figures may be indicative of national trend, showing 2710 TVs sold by distributors to capital area retailers in June vs. 2974 same month last year. Total for 6 months was 23,616 vs. 31,358. On other hand, radios ran ahead, cumulatively: 21,086 straight and 2933 combination models sold first 6 months vs. 18,003 & 1794 same period last year . . . By reason of heavy promotions, 3 of the 11 New York City dept. stores surveyed by *Herald Tribune* reported July gains of 14, 32 & 65% in dollar volume of TV-radio set sales over same month last year; but 8 stores showed these percentage declines: 6, 28, 42, 43, 50, 57, 75 & 75 . . . Most exciting junket of them all seems to be that of GE Supply Corp., Newark, for 70 area dealers—10-day all-expense flying trip to Paris on chartered Stratocruiser as reward for TV sales results . . . Meck extends TV price guarantees to Nov. 15, superseding previous Sept. 15 limit.

Trade Personals: RCA chairman David Sarnoff returns from Europe Aug. 12 on *Queen Elizabeth;* president Frank Folsom back Aug. 2 from Bohemian Grove, Cal. . . . B. Bion Howard named acting director of OPS Consumer Durable Goods Div., succeeding Harold B. Wess, resigned . . . Walter G. Whitman, MIT chemical engineering dept. head, named chairman, Defense Dept. Research & Development Board, succeeding William Webster; Lawrence W. Bass, ex-Sears Roebuck v.p., head of MIT's Sloan School for Industrial Management, appointed chairman of board's committee on equipment & materials . . . Harold Coddington, gen. mgr., TV-radio div., Sparks-Withington Co., elected v.p.; B. G. Hickman, asst. sales mgr., promoted to gen. sales mgr., replacing Henry L. Pierce, resigned . . . Ray F. Sparrow, sales v.p., P. R. Mallory & Co., elected exec. v.p., succeeded by Harold C. Buell . . . Albert Kahn, president, Electro-Voice, named chairman of RTMA's newly revived amateur radio section . . . Fred A. Mann, ex-Trans-Vue and Aireon, named sales mgr., Jackson Industries, succeeding Henry Goldsmith, who joins Pathe as sales mgr. . . . Robert E. Giannini, from Schenectady tube headquarters, appointed district representative for GE tube div. in Los Angeles, under Gordon E. Burns, field mgr. of replacement tubes . . . D. W. (Winnie) May, ex-Philco and GE distributor, named Hoffman Radio regional mgr. in New York City and northern New Jersey, with offices at 30 Church St., N. Y. . . . Elwood Reeves, ex-Motorola Div., Kieruff & Co., named Los Angeles district sales mgr., Magnavox, succeeding M. D. Schuster, now Hoffman sales.

———■———

TV picture tube sales to manufacturers first 6 months of 1951 were considerably under period's receiver output of 3,334,505 units. Tubes totaled only 2,552,757, or 20% fewer than the 3,171,660 in same period last year. RTMA states 86% of all the tubes were rectangular, 92% were 16-in. and larger. First 6-month sales to manufacturers were valued at $66,546,932. June sales totaled 221,759 valued at $4,664,744.

Huge drop in excise tax collections on TVs, radios & phonos in June, reported by Bureau of Internal Revenue, illustrates how dollar value of manufacturers' output has declined during trade slump. Bureau collected $9,754,385 for June—$7,572,700 less than May (Vol. 7:26) and $13,636,000 below high of $23,390,352 collected in March (Vol. 7:18).

Sales of TV-radio and appliance wholesalers dipped 10% from May to June, but inventories also dropped 3%, Census Bureau reports in its *Monthly Wholesale Trade Report.* June's wholesale sales were 17% below June 1950, but sales for first 6 months of 1951 were 16% ahead of same period last year. Inventories were 63% higher than June 1950. Stock-to-sales ratio at end of June was 240 vs. 227 in May, 115 in June 1950.

* * * *

Philadelphia's Better Business Bureau has printed 200,000 copies of instruction book titled *What Can You Rightfully Expect from Your TV Set and Your Dealer?* designed to help consumer purchasing, financing, servicing, etc. Major local distributors-dealers cooperated in preparation of booklet, which advises on set buying and tells existing set owners: "There is nothing about a TV set that a good servicing organization cannot fix if the parts required are available."

IRE West Coast Section holds its 1951 convention Aug. 22-24, coincidently with annual Pacific Electronic Exhibit in San Francisco's Civic Center.

Arthur L. Brown, 65, president of Dominion Sound Equipments Ltd., sales v.p. of Northern Electric Co., thrice president of Canadian RMA, died July 30 in Montreal.

Financial & Trade Notes: Raytheon reports net profit of $2,179,063, or $1.12 a share on 1,736,753 shares of common outstanding, on sales of $89,662,122 for fiscal year ended May 31, 1951. Profit was after estimated Federal taxes of $3,850,000. Net profit compares with $935,000 (49¢ on 1,447,294 shares) on sales of $59,533,000 for preceding fiscal year when taxes were approximately $675,000. Raytheon's current backlog of govt. orders was reported as $140,000,000.

Stromberg-Carlson Co. reports net earnings of $169,444 (31¢ a share) on sales of $13,926,511 for first 6 months of 1951, which compares to loss of $72,903 (equivalent to 43¢ a share) on $13,273,725 sales in same 1950 period. President Tait reported July 31 that telephone, sound equipment & broadcasting divisions substantially increased earnings to offset to considerable extent cost of TV-radio Div. shutdown most of second quarter. Outlook for second half is "excellent" for those divisions, he said, and TV-radio in second half "should certainly show greatly improved operation as compared to the first."

Motorola's net income for first 6 months of 1951 was $3,756,863 ($4.27 per share) on sales of $73,449,844—and president Paul Galvin, in letter to stockholders Aug. 2, promised "a satisfactory profit for the year 1951." Profit for same period last year was $5,197,517 ($5.91) on sales of $70,564,388. Profit before taxes was $9,017,937 vs. $8,496,378 same period last year. Govt. materials controls, said Mr. Galvin, will lessen volume of TV and car radio sales rest of year, but radio and communications sales will remain at same high level as second half 1950.

Tung-Sol Lamp Works, Inc., reports $17,681,953 sales, $1,305,114 net profit after taxes ($2.71 on 475,411 common shares) for 26 weeks ended June 30. This compares with $12,834,508 sales, $1,244,824 profit ($3.60 on 326,245 shares) for comparable 1950 period. Provision for taxes was $2,549,587, as against $1,311,807 for 1950 periods. Company reports it's building $3,100,000 plant of about 100,000 sq. ft. at Washington, N. J., for making subminiature tubes. Change of corporate name to Tung-Sol Electric Inc. becomes effective Oct. 1, 1951.

Muter Co. reports sales of $7,879,678 for 6 months ended June 30, net profit before taxes of $1,036,154, profit after taxes $459,093 (70¢ per share). This compares with $6,272,647 sales, $857,642 profit before taxes, $525,883 (80¢) profit after taxes in same 1950 period. Stock split of 2-for-1 in May 1950 and 1-for-10 in December 1950 left 651,200 shares outstanding.

Blaw-Knox sales first 6 months of 1951 were $47,071,747, up from $26,450,933 same 1950 period. Net profit after $1,739,000 taxes was $1,510,406 ($1.07) vs. $1,301,530 (92¢) after $948,000 taxes in same 1950 period. Second quarter sales were $26,631,014, net profit after taxes $967,131 (69¢) vs. $15,193,873 sales and $1,024,872 (72¢) profit after taxes in same 1950 quarter.

DuMont sales of $25,612,000 for first 24 weeks of 1951, ended June 17, represented slight decline from $26,786,000 for same 1950 period—reflection of reduced demand for TV receivers and tubes—but profit after taxes fell to $109,000 (2¢ a share), from $2,797,000 ($1.16).

Scott Radio, controlled by Meck, showed net profit of $167,811 (40¢ per share) on net sales of $2,775,795 for fiscal year ended May 31—first profit in 4 years. Sales were up from $604,900 preceding year, when loss was $176,285. Earned surplus still stands at deficit of $164,016.

National Union Radio Corp. reports net profit of $414,719 on sales of $7,419,705 during first 6 months of 1951 vs. $317,158 on sales of $5,600,874 for same 1950 period.

TV industry was one of 6 earning less during first half of 1951 than first half 1950 in compilation of semi-annual reports by New York *Journal of Commerce* (Aug. 1). Tabulation of profits of 196 firms in 26 categories shows average profit increase of 25% from 1950 to 1951, but 4 TV firms listed dropped 23% during that period. The unnamed TV manufacturers totaled $32,636,551 profit during first 6 months of 1950, dipped to $25,229,890 for comparable 1951 period. Only floor-coverings firms exceeded TV in amount of decrease during year. Air transport led listing with 740% increase in profit in year.

Westinghouse sales first half 1951 totaled $590,562,000, net income $31,564,000 ($1.98 a share on 15,458,481 shares) vs. $461,731,000 sales and $27,207,000 profit ($1.86 on 14,109,949 shares) same period 1950. Federal taxes for 1951 period were $44,964,000, for 1950 period $18,331,000.

Stewart-Warner sales were $51,410,156 first 6 months of 1951, up 53% over $33,649,039 same period of 1950. Net profit was $2,209,253 ($1.71 a share) after taxes of $4,450,174, which compares with $1,750,979 ($1.36) after taxes of $1,545,758 last year's period.

Arvin Industries reports earnings after taxes of $889,609 ($1 a share) for quarter ended July 1 vs. $936,357 ($1.05) same quarter 1950.

Mobilization Notes: Despite July 31 deadline, NPA Electronics Div. has received a scant 100 applications from electronics manufacturers for fourth quarter allotments of steel, copper and aluminum. With manufacturers of home TV-radios-phonos required to file for first time, NPA expects more than 800 applications this time, compared to third quarter's 700.

In contrast to slow traffic in CMP applications, NPA was deluged this week with appeals from TV-radio manufacturers for adjustments in base period use of steel-copper-aluminum under M-47A. Number of requests was greater than any previous week. This relief was requested with an eye to fourth quarter—since consumer durables manufacturers, in filling out CMP forms, aren't allowed to request more material for next quarter than they're permitted to use this quarter.

Unfortunately, CMP is a mess—so far. A CMP allotment, far from being a "certified check," is still a fishing license—because far too much metal was allotted this quarter. Allotments will be drastically cut next quarter, in the hope that they'll balance with supply.

* * * *

Defense Materials Procurement Agency, charged with "procuring and increasing the supply of critical and strategic materials at home and abroad," was set up Aug. 1 by President Truman in response to Congressional criticism of materials situation. New defense agency will be headed by Jess Larson, resigning as chief of General Services Administration, who will be responsible to Defense Mobilizer Charles E. Wilson.

NPA relaxed cadmium order M-19 (Vol. 6:50, 52) July 30 because expected shortage never developed; in fact, there's surplus of the metal in producers' warehouses. NPA ruled early this year that TV chassis may be plated with corrosion-resistant cadmium, but most radios can't (Vol. 7:11, 13, 20). Amended order continues same restrictions regarding radio. Principal relaxations in order involve non-electronic uses of cadmium. Thirty-day inventory restriction was amended to permit accumulations of greater amounts when necessary.

Britain has called off construction of 5 low-power TV stations due to defense program, but will complete 3 high-power outlets now under construction. BBC has only 2 stations now operating—in London and Birmingham.

Telecasting Notes: Radio buildup plans of CBS (Vol. 7:30) include promotion budget of $8,000,000, of which some $7,000,000 will be spent on network and local radio and $1,000,000 on newspapers-magazines, biggest media investment ever made for such purpose, according to administrative v.p. Louis Hausman of newly-formed CBS Radio Network Div. . . . Chicago Tribune's WGN-TV & WGN name George P. Hollingbery Co. as national rep. . . . WNAC-TV, Boston, names H-R Representatives as national rep., quitting Petry . . . New Orleans' WSMB switches from NBC to ABC Oct. 4 under shift whereby WDSU (which is AM sister of WDSU-TV) switches to NBC (Vol. 7:24) . . . ABC-TV leases another playhouse—Little Theatre, 238 W. 44th St., N. Y., seating 600, with 50-ft. stage . . . Radio Daily out Aug. 2 with 130-page *Shows* edition, packed with ads and listings of TV and radio program availabilities—good program buying guide for agencies and sponsors . . . Canadian Broadcasting Corp., which gets $2.50 fee per radio, has recommended $10 license fee for TV receivers, but majority of Dominion Cabinet is said to favor $7.50; Parliament is expected to establish fee next fall . . . Weekly "dog college" on WTMJ, Milwaukee, is clinic on obedience conducted with cooperation of Wisconsin Humane Society; after summer series, children will be invited to actual "dog audition" to display results of teaching, with trophy awards . . . To use its funds frozen by French Govt., Procter & Gamble is reported planning to back production of 65 fifteen-minute TV films in Paris, costing $2500 each, to be filmed by Peter O'Crotty Productions and to be sponsored in U. S. . . . Spread of remotes is illustrated by NBC's July 29 telecast of "Pilgrimage to Plymouth" from Plymouth Rock; mobile unit with 3 cameras televised ceremonies through elaborate setup involving 2 microwave relay stations, relaying picture to WBZ-TV, Boston, 45 miles away . . . Defense Dept. TV-radio crew this week began making films and tape recordings in Europe illustrating progress of rearmament and retraining program; after completion end of this month, the films and recordings will be made available to TV-radio stations and networks . . . WJIM-TV, Lansing, Mich., planning new $250,000 studio-office building, breaking ground in 60-90 days; also will install new transmitter.

———■———

ABC-United Paramount Theatres merger (Vol. 7:21-24, 26-30) faces opposition from several objectors: Partmar Corp., Paramount Hollywood Theatre Corp. & Cabart Theatres Corp., all Los Angeles, joining with St. Louis Amusement Corp. & Eden Theatres Corp., both St. Louis and connected with Fanchon & Marco exhibitor interests, petitioned FCC this week to intervene, alleging past history of UPT indicates "greatest danger to the public interest." AM station rep Wythe Walker circularized stations urging them to fight merger. Gordon P. Brown, owner of WSAY, Rochester, wired FCC Chairman Coy to deny any application "which would further the monopolization of the radio, television, theatre and motion picture industries." On another front, Zenith counsel asked FCC to declare proposed shift of UPT's WBKB, Chicago, from Channel 4 to Channel 2 under pending allocation, will not jeopardize Zenith's experimental use of that channel for Phonevision or prejudice Zenith's commercial application for the channel. Under ABC-UPT deal, WBKB is to be sold to CBS for $6,000,000, merged firms retaining WENR-TV on Channel 7 (whose call would be changed to WBKB, while CBS would use call WBBM-TV).

California National Theatres chain plans 71-theatre TV network, to cost $3,500,000, seating capacity more than 110,000, using CBS-20th Century-Fox-Eidophor color projection system, scheduled to open next spring.

Next FCC vacancy, it's generally assumed, is earmarked for Robert T. Bartley, Speaker Sam Rayburn's nephew and assistant, onetime Yankee Network and NAB official—but it's learned that quiet efforts are being made to get post for Eugene H. Merrill, 44, onetime chief engineer of Utah Power Commission, telephone & telegraph expert with old War Production Board, chief of reorganization of German communications under Gen. Lucius Clay, 1945-50. He's presently director of DPA materials div. Story first broke in *Variety*, which said he has been "offered" Comr. Hennock's post as and when she gets Federal judgeship, but Mr. Merrill says he knows of no "offer." It's possible deal is in making whereby Senator McCarran (D-Nev.) will release Hennock appointment, now bottled up in his Judiciary Committee, in return for getting a westerner on FCC.

Comr. Frieda Hennock's Federal judgeship (Vol. 7:24-26) still hangs fire, though nearly 2 months have elapsed since President Truman appointed her to New York district bench. Senate Judiciary Committee hasn't yet scheduled hearing requested by American Bar Assn., but New York County Lawyers Assn. added its opposition this week to that of Assn. of Bar of the City of New York —also charging she "lacks the qualifications." General opinion still is that she will eventually be confirmed; meanwhile, she apparently has declared moratorium on long series of public speeches she had been making to promote her plan for TV channel reservations for educational institutions.

New NPA construction controls, announced this week, are more liberal in permitting small construction and alterations without application to Govt., but it appears probable many larger TV-radio station construction projects will have to be deferred until next year. New regulations (Order M-4A & CMP Reg. 6) permit builders to assign themselves priorities in fourth quarter to obtain materials for projects requiring not more than 2 tons of steel, 200 pounds of copper. For projects using more than these amounts—or any quantity of aluminum—NPA authorization will be required. Structural steel situation being extremely critical now, NPA says it will defer, at least until first of the year, all large projects except those most vitally needed by nation or community.

Landmark in history of televised sports is sale to NBC Aug. 2 of 3-year TV-radio rights to annual Rose Bowl football game for $1,510,000—expected to bring in more money than gate. NBC will pay $400,000 for 1952 game, $500,000 for 1953 game, $610,000 for 1954. Gate receipts for 1951 game totaled $381,000, including concessions. Added to this was $110,000 paid by CBS for TV-radio rights. CBS submitted bid of $840,000 for new 3-year contract and KTTV, Los Angeles, was second highest bidder at $1,000,000. ABC-United Paramount Theatres withdrew from bidding when Tournament of Roses announced it wouldn't permit theatre telecasting of games. All bids are contingent on completion of transcontinental TV facilities, scheduled Sept. 30 (see p. 3).

Team performance, not TV, continues to be most important factor in sports gate receipts, according to C. L. Jordan, N. W. Ayer v.p. In recent talk to Atlantic Refining Co. sportcasters, using data compiled by son Jerry (Vol. 6:19, 23, 33, 47), he reported that by July 4 top 8 teams in both baseball leagues had achieved 4% increase over last year. Bottom 8, he said, lost 20%—for over-all loss of 8%.

More Aug. 1 sets-in-use reported since NBC Research's "census" of July 1 (Vol. 7:29): Washington 278,100, up 8100; Miami 78,200, up 3200; Utica 47,000, up 1800; Ft. Worth-Dallas 125,720, up 1720; Greensboro 71,721, up 921.

MEXICO PUSHING NEW TV STATIONS: You can expect Mexico to go forward with TV station construction faster than we "unfreeze" -- with border stations prominent. Aside from the one in Matamoros, opposite Brownsville, Tex., promised in September (Vol. 7:31), there are informal reports one or 2 will soon be constructed in Tiajuana, near San Diego, and one in Mexicali, opposite Calexico, Cal., in the Imperial Valley.

Mexico's director-general of telecommunications, Miguel Pereyra, while in Washington this week to consult with State Dept. and FCC for agreements on stations 250 mi. on either side of border, said "20 or 22 grants" have already been made to Mexican enterprisers for stations to be built within a year.

He would mention only a few in the works, however -- notably wide-coverage transmitters planned atop mountains near Mexico City by Romulo O'Farrill, already operating a station in Mexico City and builder of the one in Matamoros; and by radio tycoon Emilio Azcarraga, operating Mexico City's other TV. Also, XEW chief engineer Guillermo Gonzales Camarena plans one there to use his "sequency" system of color (Vol. 5:52), apparently same as CBS system.

Another station is on tap for Monterrey and one for Guanajuato, latter in geographical center of Mexico, 170 mi. from capital. They may be ready "very soon." List of applications and grants hasn't been officially released, said Senor Pereyra.

BUSINESS OF TELECASTING—DOLLAR SIGNS: You can count on one hand the telecasting stations that haven't at least pulled out of the operating red by now.

Many may not yet be showing much net profit, due to depreciation charges on big investment and the amortization of heavy early losses -- to say nothing of their very unfavorable excess profits base.

But simple fact is that the business of telecasting, even now during summer doldrums, is booming. And it's going to enjoy a huge fall-winter business, with time sellouts on books for some networks and many stations.

This year's gross time sales of the 4 networks and 107 TV stations will far more than double the industry's aggregate revenues of $105,800,000 of 1950, which compared with $34,300,000 in 1949 (see Vol. 7:13 for official FCC figures).

Indeed, we'll go out on limb once again -- pretty strong limb, we hope, as was our calculation of $100,000,000 for 1950 (Vol. 6:52) — and forecast that TV time sales for 1951 will equal or exceed $250,000,000!

It's impossible to forecast profits -- FCC will report these in spring of 1952 -- but it's reasonable to assume huge upsurge in time sales mean that the 1950 deficit of $7,900,000 and 1949's deficit of $23,300,000 are things of the past.

During 1950, according to official FCC report (No. 51-308), 54 stations enjoyed operating profits, mostly $100,000 or less each -- a few showing $400,000 or more. Networks and their 14 stations accounted for $55,000,000 sales, 93 reporting stations for $50,800,000. Telecasting as whole had operating loss of $7,900,000 largely because nets lost $10,500,000 while their stations showed $1,500,000 profit.

Only ABC and CBS, listed on New York Stock Exchange, release P&L statements

AUG 13 1951

-- otherwise, neither networks nor stations make public their gross business and net profits. Even ABC-CBS do not break down figures as between TV-radio. Nor does FCC release anything but annual aggregate figures well after end of year.

But it's possible, on basis of monthly network sales figures, which are officially released, plus experiences of stations reported privately and informally to us, to draw some reasonable conclusions about the course of this year's business.

* * * *

Network time sales were $55,098,126 first half of this year, according to Publishers Information Bureau -- NBC $26,739,532, CBS $17,069,328, ABC $8,228,700 (Vol. 7:29). Unreporting DuMont's sales are known to be $3,060,566. These sums are exclusive of the time sales of their own stations, now numbering: ABC & NBC 5 each, DuMont 3, CBS 2 plus 45% of a third.

Best income months for networks and stations are fall-winter, and nearly all have rate increases in effect or about to go into effect. So, if networks did about $55,000,000 first half of 1951, it's fair to assume they'll do a lot better during second half. Let's guesstimate combined network sales for year at $125,000,000.

Old rule-of-thumb in radio was that national-regional spot plus local about equalled network sales -- but in recent years ratio has been nearer 70% spot-local, 30% network. In TV, it probably isn't that yet -- but it's good guess that the 107 stations in the aggregate are grossing more from spot-local than the networks are from national. Quite a few stations are exceeding $1,000,000 billings rate, some much higher -- one sold $4,000,000 worth of time last year alone (Vol. 7:13).

Spot-and-local, in fact, have been going like the proverbial house afire -- Rorabaugh Reports at the end of May listing 4227 local-retail advertisers plus 1093 national-regional spot advertisers on 99 reporting stations, up from 3883 & 894, respectively, at end of 1950. There were 158 network users at end of May.

Therefore, merely doubling the network sales figure to account for gross time sales by the telecasters as a whole would seem quite conservative.

Figure for all would thus come to $250,000,000. Our opinion is it will be higher in the final reckoning from FCC. Meanwhile, we can go only by monthly network "gauges", as reported by PIB and published regularly in these pages.

* * * *

A quarter-billion dollar "take" by mere 107 stations in 63 markets, plus 4 networks that so far extend to only 48 of those markets -- and then only part time due to paucity of circuits! What will the figure be when there are more stations and wider networks? Your guess is as good as ours.

But it's noteworthy that the 6-year-old TV child is fast approaching the comfortable estate of its radio parents, whose 30 years have spawned some 2250 AM and 650 FM radio stations. These and the 4 radio networks grossed $447,700,000 last year, an all-time high, according to FCC audit (Vol. 7:16).

COMPLEXES IN COAST-TO-COAST HOOKUPS: Only one TV circuit westward as of Sept. 30, one eastward about month later -- that's all AT&T promises for transcontinental network service in immediate future. The 4 networks will have to divvy the facilities.

We erred last week (Vol. 7:31) in reporting 2 TV microwave circuits westward, 2 eastward -- though it's fact there are additional telephone channels in each direction. It's also fact that AT&T contemplates more circuits, both phone and TV, for it has just filed 71 applications with FCC for that many additional transmitters on its Chicago-San Francisco relay towers, proposing to spend $3,000,000.

All sorts of stories are going rounds since prospect of transcontinental baseball, football and Hollywood shows opened up with definite time fixed for coast-to-coast hookups. AT&T says there's as yet no big-name time-and-talent show planned on all 4 networks to inaugurate transcontinental service, such as it sponsored when first hookup from East to Midwest was opened up in January 1949. But it indicated occasion will probably be made gala one, with possibly big sponsored show.

Between Omaha and San Francisco, only Salt Lake City (2 stations) can tap into transcontinental for network service, but there's story from Denver (no outlet)

that theatre interests there now propose to do likewise -- simply projecting TV shows taken off the relays onto local screens. And trade headlines now proclaim that "international" and "world-wide" TV hookups are in offing, making good copy out of Hollywood interviews with NBC's Pat Weaver. Best "international" TV prospect in near future is projected linking of Canada's Montreal-Toronto hookup (stations not yet built) into U.S. networks via Buffalo (Vol. 7:30). Nearest to "world-wide" service in foreseeable offing is shipping of kine-recordings of big TV shows to U.S. troops.

Newly completed Omaha-San Francisco microwave setup comprises 55 relay stations, Chicago-Omaha 18, New York-Chicago 34 -- 107 in all. No time commitments have been made to networks yet, though it's taken for granted they will divide by agreement as they do on other limited-circuit routes.

Note: Coaxial-microwave intercity TV links spread spectacularly but slowly, won't get real impetus until TV freeze ends and new stations are actually built. For rest of year, AT&T plans only new Memphis-Birmingham-Atlanta coaxial via Jackson, Miss. Only others definitely in works: San Antonio-Austin microwave, due sometime in 1952; added Washington-Atlanta microwave circuits, also sometime in 1952; and an Oklahoma City-Amarillo coaxial now under survey but no construction scheduled yet. All are designed basically for added phone service, for which Omaha-San Francisco setup is also to be used starting Aug. 17.

NICE LIFT REPORTED FROM POWER BOOSTS: The quick and easy benefits of FCC power-hike ruling (Vol. 7:30-31) have already been achieved by almost all stations eligible -- 41 of the 46 requests having been granted in last 2 weeks. [For list of this week's grants, see p. 14; for last week's, see Vol. 7:31.]

Sharp improvements in service have come in number of markets, but picture enhancement has been moderate or merely nominal in many instances -- though stations are naturally making most of every watt, promotion-wise.

Real payoff comes in such places as Miami, where WTVJ had been operating with weakest signal of all metropolitan stations. Now, with station's ERP lifted from 2.2 to 16.5 kw, manager Lee Ruwitch tells us that signal is getting into West Palm Beach, 63 miles away, so well that dealers had 300-400 sets shipped in, sold 150 at once, expect 2000 sales before end of season. And one enterprising West Palm Beach dealer rushed to buy time on WTVJ to reach his potential customers -- but sizeable antennas and boosters are still needed there, according to Ruwitch.

Most marked improvement came in 30-mile radius, he reports. There, indoor antennas now work, whereas outdoor installations used to be mandatory.

New York's WOR-TV telecast request for reactions to its 9-to-22 kw boost, drew rash of glowing reports from towns well into Pennsylvania, New Jersey, upper New York State, etc. -- as well as from New York City's "canyons" where shadows and indoor antennas often degrade pictures.

WOR-TV's desire to join others on Empire State Bldg. could conceivably cool now. Says engineering v.p. Jack Poppele: "Why, people are now getting good pictures with the ends of their antennas pointed at us."

Two big jumps at once were taken by New York's WJZ-TV Aug. 9 when it hiked power 5½ times to 20 kw and moved to permanent Empire State Bldg. antenna.

Full report on improvement will come from survey, by outside organization, of 420 fringe-area homes, but engineering v.p. Frank Marx is all smiles, says spot observations indicate improvement is everything hoped for. "Next, 200 kw," said he.

Other New York stations achieving increases haven't yet reported results.

* * * *

Any further gains will be long coming, since they involve purchase and installation of new equipment, rather than mere twist of transmitter dials. Actually, few operators can see good reason for buying gear to get the 50 kw ERP now permitted, when freeze-end seems certain to bring 100 and 200 kw authorizations.

However, high-powered transmitters and amplifiers would be snatched up and put to work as soon as available -- if FCC permitted. But it won't, since it feels: (1) It can't give iron-clad guarantee that end of freeze will make such equipment

permanent, and (2) As soon as station has equipment capable of more power, pressures grow for permission to use it.

Example cited at Commission is WNHC-TV, New Haven. It was granted as "community" station, with 1-kw maximum. But, FCC men say, station was given 1.82 kw in "a moment of Commission weakness." Station bought 5-kw transmitter, but has been limited to only 500 watts of it. This week, it asked permission to use full 5 kw.

Commission's basic premise, stemming primarily from legalistic caution: We will permit nothing outside of existing rules until freeze is over.

This goes for powers, heights, station classifications. It even applies to propagation curves, despite fact FCC knows they're obsolete. All during freeze, and currently, it has been granting site changes, etc., calculating coverage on old propagation and protection data.

Stations have been pounding at Commission gates for hikes to FCC-proposed 100 and 200 kw, but Commission has been adamant, is likely to stay that way until someone comes up with arguments more persuasive than those employed to date.

Now that virtually everyone's throttle is wide open, only prospects for further improvement before end of freeze are:

(1) Installation of 5-kw transmitters by those few stations, not community-type, using smaller units -- WFMY-TV, Greensboro; WTTV, Bloomington; WLWD, Dayton; WICU, Erie; KDYL-TV, Salt Lake City. Incidentally, WBNS-TV, Columbus has been operating 5-kw job, not .5 kw as reported in Vol. 7:30. WFMY-TV has already asked for CP to install 5-kw. Others may elect to wait for freeze-end, install big ones then.

(2) Use of higher-gain antennas. Commission will permit outlays for these, but won't let stations touch transmitters to get more than 5 kw. Not too many of these are expected -- also because of freeze-end uncertainties.

(3) Construction of taller towers. Actually, this means more than do most power boosts. Number of these are in works, steel availability permitting.

NEW CURBS WON'T END STATION BUILDING: Still no "ban" or "freeze" on TV-radio station alterations and construction -- notwithstanding widespread misinterpretations of new NPA regulations placing construction under Controlled Materials Plan (Vol. 7:31).

Small scale construction may be easier to start, in fact, under new controls than it was under old (Vol. 7:19 et seq). On basis of best information, it's likely these types will get go-ahead from NPA in fourth quarter: (1) Remodeling of TV or radio studio & transmitter buildings. (2) New station construction on modest scale.

These projects may be deferred: (1) Big new TV antenna towers. (2) Radio City-type buildings. But by time freeze is over, it's unlikely TV station building will be subject to severe restrictions -- barring shooting war, of course. Big industrial expansion program for defense production, which necessitated building controls, is scheduled to be over the hump by first or second quarter 1952 and construction material situation will then be much more favorable.

Principal provisions of new building regulations (M-4A, CMP Reg. 6), as they apply to broadcast stations: (1) NPA won't specifically OK any construction before Oct. 1. (2) No new building can be begun before Oct. 1 unless builder has all the materials he needs, or doesn't need more than 2 tons of steel, 200 lbs. of copper or any aluminum. (3) After Oct. 1, anyone may build -- and receive guaranteed allotment of materials -- if he doesn't need more than 2 tons of steel, 200 lbs. of copper or any aluminum. (4) If he needs more than that, he must apply to NPA. If application is approved, he'll receive allotment of all the steel, copper and aluminum he needs. If it's denied, he can't build in fourth quarter.

Most broadcast alteration and construction projects use relatively little controlled materials, and NPA approval is expected to be more or less routine. Many alterations need less than 2 tons of steel, can be built without application.

FCC offered to supply NPA with general criteria on "community need" as it applies to TV-radio stations -- for use in deciding applications for construction of broadcast facilities. NPA turned down offer, said it was applying no "predetermined standards," but would use FCC as source of information in checking applications.

BIG OMAHA & HAVANA STATION SALE DEALS: Watch how publishing and theatrical interests become prime competitors of the radio broadcasters -- not only as applicants for new TV stations, come end of freeze, but also as purchasers of existing stations.

We had further example of their eager quest for TV properties this week, when two more 7-figure sale deals were disclosed -- one in Cuba. You can expect more as the affinity of TV, journalism and films becomes increasingly apparent.

WOW-TV, Omaha, with its AM counterpart WOW were sold for $2,525,000 to the Meredith Publishing Co., $24,000,000 concern which publishes the widely-circulated magazines Better Homes & Gardens and Successful Farming. Sale culminated probes by several prospective buyers (Vol. 7:27-28), frequent denials by principals headed by recent Secretary of Navy, now Ambassador to Ireland, Francis P. Matthews.

Meredith also owns WHEN, Syracuse, which it started Dec. 1, 1948 as 47th station in nation, has pre-freeze applications pending for Rochester and Albany, is hell-bent to become major factor in TV -- indicated also by its purchase this week of 40% interest in Princeton Film Center Inc., Princeton, N.J.

CMUR-TV, Havana, with its Union Radio Network, has been sold for reported $1,500,000 by Director Kaspar Pumarejo and backers (including local Polar brewery and Partagas tobacco interests) to Manuel Alonso, owner of Noticiaro Nacional, the island's main newsreel producer. Alonso actually holds CP for Channel 7, but he and his backers apparently prefer to take over going CMUR-TV on Channel 4, Cuba's first outlet, founded by Pumarejo and inaugurated less than year ago (Oct. 24, 1950). Rumors have Cuba's President Prio and family back of Alonso, but this is denied.

* * * *

Omaha deal is complex, involves Meredith assuming 25-year rental lease from Woodmen of the World, original owner of WOW, at $160,000 a year -- first profits to go into $750,000 fund guaranteeing lease and providing for equipment purchases. Half has already been paid in, with 19 years to go. WOW Inc. has $200,000 paid capital, $720,000 surplus account, total current assets of $673,000, current liabilities of $220,000. Combined TV-AM stations first 6 months of this year had operating gross of $996,386, net profit of $91,100 after provision of $97,800 for taxes.

Stockholders own equal amounts of the 1000 shares of common and 1000 preferred, estate of late manager John J. Gillin holding 238; Mr. Matthews, 250; Guy C. Myers, New York & Seattle utilities magnate, 250; Robert P. Samardink, head of local detective agency, 83; M.M. Meyers, financier, 84; J.J. Isaacson, governor of Ak-Sar-Ben fair grounds, 83; Cecelia Broderick, Mr. Gillin's former secretary, 12.

* * * *

Of 3 other recent station deals still pending FCC approval (of 10 since TV's post-war emergence; Vol. 7:30), one got nod this week -- the $2,500,000 sale of KFI-TV, Los Angeles (Vol. 7:23) by Earle Anthony to Thomas S. Lee Enterprises Inc. Comr. Walker dissented, Hyde, Webster, Jones & Sterling approving. The 2 others pending FCC approval: WLAV-TV, Grand Rapids, sold to Bitner group for $1,300,000 (Vol. 7:19) and WBKB, Chicago, sold for $6,000,000 to CBS but involved along with ABC-TV's 5 owned stations in projected ABC-Paramount merger (Vol. 7:21). The KFI-TV & WLAV-TV sales excluded AM counterparts, retained by present owners.

Note: Atlanta's pre-freeze CP, only one still on FCC books, looks like it will shortly turn into full-fledged commercial outlet -- nation's 108th -- FCC this week granting transfer of WCON-TV to local group (for details, see p. 14).

FINAL INDUSTRY COLOR SYSTEM EMERGING: "Definite improvement." That's the most you can get in way of comment from any of 4 top FCC staff engineers who attended 4 important compatible color demonstrations this week. But there can be little doubt they were greatly impressed with their first view of such pictures since May 1950.

And there's less industry doubt than ever that compatible system is rushing pell-mell back to FCC for eventual approval, along with CBS system or in lieu of it.

Commissioners themselves will probably see latest pictures soon. RCA is expected to invite them when it starts public showings later in month -- but decision apparently awaits chairman David Sarnoff's return from Europe next week.

Every variation on compatible theme was shown Broadcast Bureau chief Curtis

Plummer, chief engineer Edward Allen, Technical Research acting chief Wm. Boese, Lab Div. chief Edward Chapin. Demonstrations were successively Aug. 6-9 by GE in Syracuse; Hazeltine, Little Neck, L.I.; RCA, Princeton; Philco, Morrisville, Pa.

Main purpose of demonstrations was to enable National TV System Committee Panel 13 (standards), under Hazeltine's A.V. Loughren, to agree on which set of standards to field test from here on out -- probably until year's end.

Panel wound up in New York Aug. 10, agreed on "large fraction" of issues, according to Loughren. Recommendations will be submitted to NTSC's overall committee Aug. 15, and field testing during forthcoming several months will be based on them, if parent body is satisfied with them. [For panel members, see below.]

"There was agreement in principle," says Loughren, "with several specific 'numbers' recommended. We didn't pin everything down, but we're closer and closer to agreement. We did pretty well today. We'll let it soak a while."

Here are types of system variations shown:

(1) Color carrier at 3.58, 3.89 and 3.99 mc.

(2) System with and without oscillating color sequence (OCS), also called "color phase alternation" (CPA) or "flip flop".

(3) Pictures with and without constant luminance factor.

Only RCA showed live pickups, rest using still pictures from flying-spot scanners. As test of color fidelity, resolution, etc., RCA compared televised color picture with slide projection of same scene, side-by-side. One observer scratched his head, blurted: "Which is which?"

Philco supplied weak-signal test in Morrisville, about 25 miles from its WPTZ transmitter, right on noisy U.S. Route 1. Then signal was attenuated to equivalent of 40-50 mile reception, and Philco v.p. David Smith concluded: "Stands up as well as black-and-white under adverse signal and interference conditions."

Schedule of further field tests will probably be issued soon. Zenith says it's prepared to cooperate by transmitting compatible signals over its experimental Channel 2 facilities in Chicago, first such telecast signals there. Zenith has also experimented with CBS-type transmissions.

* * * *

Cost of compatible receivers would probably trouble FCC if system were put before it today. But most experts foresee drastic drop in matter of months, many agreeing that subtraction of 15-20 tubes from RCA's current 54-tube set is conceivable before year's end (Vol. 7:30).

Even more important, some say, are such critical techniques as color phase alternation, which permits far greater tolerances in construction. And there's little question cost of tri-color tube will plummet, just as tubes did for black-&-white, when mass production becomes fact. Since manufacturers will want tri-color tubes -- for CBS system, even if FCC again rejects compatible system -- they're likely to invest in plants to make them.

Personal Notes: John T. Quisenberry appointed general attorney, AT&T, succeeding T. Brooke Price, who on July 1 became v.p. & general counsel . . . John McClay, ex-WPIX, New York, returns to WCAU-TV, Philadelphia, as asst. to v.p. Charles Vanda . . . William Dozier, ex-Samuel Goldwyn Productions, joins CBS-TV story dept. Oct. 1, assigned to develop new talent . . . W. Eldon Hazard promoted to sales mgr., CBS Radio Network; Guy Dell Cioppa promoted to director of CBS network programs, Hollywood . . . Cecil Barker, ex-KTSL, named TV program director, KECA-TV and ABC western div. . . . Norman V. Farrell, ex-Weed & Co., joins WATV & WAAT, Newark, as asst. sales mgr. . . . Louis L. Ergmann, ex-Hewitt, Ogilvy, Benson & Mather, named TV-radio director of Robert W. Orr & Associates . . . George R. Jeneson, ex-WLW Chicago sales office, Aug. 27 becomes Midwest sales mgr., WOR & WOR-TV . . . Leavitt T. Pope, ex-*New York News*, named asst. to G. Bennett Larson, WPIX gen. mgr.

Members of NTSC Panel 13 (standards) who attended 4 color demonstrations this week (see story above) include: A. V. Loughren, Hazeltine, chairman; W. T. Wintringham, Bell Labs, vice chairman; Wm. Bradley, Philco; George Brown, RCA; Charles Hirsch, Hazeltine; Leo Mead, Hallicrafters; John Rennick, Zenith; Garrard Mountjoy, Stromberg-Carlson; Albert Murray, Caldwell-Clements; Lewis Winner, IRE; Henry Samulon, GE; Kurt Schlesinger, Motorola; H. G. Schwarz, Crosley; G. R. Tingley, DuMont; B. F. Tyson, Sylvania; S. Klapman, Admiral; G. C. Larson, Westinghouse; Ralph Evans, Eastman Kodak.

Old song with new words: WCTU president Mrs. D. Leigh Colvin, at big temperance convention in Boston this week, said TV and radio are turning American parlors and kitchens into "beer bars".

To compete with TV on meeting nights, Chicago Newspaper Guild now offers door prizes. Other unions report they're shifting dates away from big TV shows.

HOME or theatre TV for major sports events? Both sides in the battle fired volleys this week, and TV networks and set manufacturers were talking about rigging up a weapon that could turn out to be a blockbuster—or a dud.

DuMont Network sports sales chief Tom Gallery met with NBC's TV operations & sales v.p. Ed Madden to lay groundwork for multi-network drive to outbid theatres for rights to topflight sports. Scheme is to set up permanent organization of TV manufacturers—each contributing on pro-rata basis—to sponsor sports on home TV. Plan is outgrowth of successful 8-manufacturer sponsorship of July 18 Charles-Walcott bout (Vol. 7:28-29). But there's many a slip, and some in industry doubt such an alliance could be formed, or, once formed, hold together. Other developments this week:

(1) Nathan Halpern's Theatre Network TV Inc. announced it had bought exclusive rights to Aug. 15 Joe Louis-Jimmy Bivins 10-rounder in Baltimore for 15-theatre hookup, with New York City and Boston on circuit for first time. Baltimore theatres will be blacked out.

(2) Pabst announced simultaneously it had pushed its fight telecast schedule ahead 6 weeks to include 2 championship bouts over CBS-TV & radio this month. Joey Maxim-Bob Murphy light-heavyweight bout Aug. 22 and Kid Gavilan-Billy Graham welterweight Aug. 29 will lead off season of 41 Pabst-sponsored fights.

(3) Rep. L. Gary Clemente (D-N. Y.) introduced resolution Aug. 6 for investigation of boxing—including question whether denial of bouts to TV set owners constitutes monopoly practice.

(4) Theatre-TV interests were working out plans for full 9-week schedule of telecasts of college football games which will be kept from home screens under National Collegiate Athletic Assn.'s experimental program. Halpern estimated 100 theatres will carry the games, but figure seemed a bit high to most observers. Already signed up for theatre TV are Princeton, Notre Dame, Pitt, Yale, Fordham, Dartmouth, Navy. United Paramount was negotiating for right to Midwest games.

(5) Continuing its letter-and-press-release campaign, group known as Fair TV Practices Committee protested Navy's proposed tie-up with Theatre TV to Vice Admiral Harry W. Hill, Naval Academy superintendent. Aug. 11 letter accused Navy of following "bad policy" because Academy "is entirely supported by public funds and presumably should be operated solely in the public interest."

(6) Westinghouse, official sponsor of NCAA's "limited experimental schedule" of grid game telecasts this fall (Vol. 7:30), picked NBC-TV as network outlet.

Network Accounts: Reynolds Metals Co. (aluminum products), makes TV debut Sept. 26 with sponsorship of half-hour alt. weeks of *Kate Smith Evening Hour* on NBC-TV, Wed. 8-9, thru Buchanan & Co.; Reynolds is third to sign for show which starts Sept. 19, Congoleum-Nairn and Norge Div., Borg-Warner Corp. being others. At same time, Reynolds bought first half-hour of Tallulah Bankhead's *Big Show* on NBC-Radio, Sun. 6:30-8, starting Sept. 30, and on Aug. 9 it sponsored *Hambletonian Stake*, harness race, onetime on CBS-Radio . . . United States Shoe Corp. (Red Cross shoes) Sept. 12 presents *Irving Berlin's Salute to America* one-time on NBC-TV, Sun. 8-9; revue will be directed & hosted by Berlin, who will contribute fee to Girl Scout Fund. It's second one-shot for Red Cross shoes, first having been tribute to Richard Rodgers last March 4 (Vol. 7:3) . . . Pabst Sales Co. (Pabst Blue Ribbon beer) renews sponsorship of live telecasts of championship fights on CBS-TV, Wed. 10-11, starting Aug. 22 with Joey Maxim-Bob Murphy light heavyweight title bout followed Aug. 29 by Kid Gavilan-Billy Graham fight for welterweight crown; 41 fights in all are scheduled for season . . . U. S. Tobacco Co. (Model, Dill's Best, Old Briar, Tweed pipe tobaccos), brings back *Martin Kane, Private Eye* Aug. 30 to NBC-TV, Thu. 10-10:30, Lloyd Nolan replacing William Gargan as star of show . . . Ralston Purina Co. (cereal) resumes sponsorship Sept. 9 of *Space Patrol* on ABC-TV, Sun. 4:30-5 alt. weeks; Ralston also sponsors *Your Pet Parade* during alt. week period . . . Florsheim Shoe Co. brings football news back for second year starting Sept. 27 with *Red Grange Predicts* on ABC-TV, Thu. 10:45-11, thru Gordon Best Co. . . . Seiberling Rubber Co. (tires) starts sponsorship Sept. 24 of *The Amazing Mr. Malone* on ABC-TV, alt. Mon. 8-8:30, thru Meldrum & Fewsmith, Cleveland; show will alternate with Bristol-Myers' *Mr. District Attorney* starting Oct. 1 . . . Sundial Branch, International Shoe Co. will sponsor 11:15-11:30 portion of *Foodini the Great*, filmed puppet show, on ABC-TV, Sat. 11-11:30 a.m. starting Aug. 25; Bristol-Myers will sponsor 11-11:15 segment starting in Oct. . . . Wine Corp. of America (Mogen David wine) starts *Charlie Wild, Private Detective* Sept. 11 on ABC-TV, Tue. 8-8:30, thru Weiss & Geller Inc., Chicago, not on NBC-TV as erroneously reported in Vol. 7:28 . . . M & M Ltd. (candy) resumed alt. week sponsorship Aug. 12 of 5:30-6 portion of *Super Circus* on ABC-TV, Sun. 5-6; Peters shoes (International Shoe Co.) shares alt. weeks with M & M Ltd., Canada Dry sponsoring 5-5:30 segment weekly . . . Hall Brothers Inc. (Hallmark greeting cards) reported readying Oct. 7 sponsorship of Sarah Churchill interview show on CBS-TV, Sun. 5:45-6, thru Foote, Cone & Belding, Chicago . . . Armour cancels NBC-TV *Garroway at Large*.

Station Accounts: National Assn. of Manufacturers has placed order for one-time use, between Aug. 15-31, of its 15-min. film *Story of 'Kip' Van Winkle*, on one station in each market, thru Benton & Bowles . . . Twin City Lines, operating streetcars & buses, using WTCN-TV, Minneapolis, along with radio to promote traffic and improve public relations; formerly used only newspapers . . . Gordon Baking Co., for Silvercup Bread, has 20-sec. & 1-min. films prepared by Video Films for use on stations in New York, Chicago, Detroit, Toledo, thru N. W. Ayer . . . Pure Drug Chemical Co., Chester, Pa., maker of foot antiseptic spray called No-If, is newcomer to TV, sponsoring *Mrs. Greater Philadelphia* contest to select area's Mrs. America contestant, Fri. 9:30-10 on WPTZ, Philadelphia, thru Lohmeyer-Adelman Agency, Philadelphia . . . Dallas Home Builders Assn. using WFAA-TV Sun. 2-3 to display homes for sale, floor plans, discuss financing . . . Cling Peach Advisory Board, San Francisco, plans "Party Peach Pie" promotion in October, tying in with Pet Milk Co., using TV, newspapers, magazines, store tie-ins . . . E. L. Bruce Co. (Bruce floor cleaner, wax & applicator) will use TV in fall campaign, thru Christiansen Adv., Chicago . . . Among other advertisers reported using or preparing to use TV: Good Humor Corp. (ice cream products), thru Grey Adv. Inc., N. Y. (WCBS-TV); American Biscuit & Cracker Co. (ABC crackers & cookies), thru Condon Co. Inc., Tacoma; Brown & Williamson Tobacco Corp. (Raleigh cigarettes), thru Russell M. Seeds Co., Chicago; Albert Inc. (BraVete nylon slips), thru Edward A. Grossfeld & Staff, Chicago; Shulton Inc. (Old Spice men's toiletries), thru Wesley Associates, N. Y.; Sol Friedman & Sons (slips & gowns) & Seely Shoulder Pad Corp. (shoulder pads), thru Dunay Co., N. Y.; Meyenberg Milk Products Co. (evaporated milk), thru Mayers Co., Los Angeles; R. M. Hollingshead Corp. (Whiz automotive chemical products), thru Campbell-Mithun, Chicago (KSTP-TV); Slumberland Products Co. (bedding), thru Hirshon-Garfield, Boston (WNAC-TV).

Telecasting Notes: NBC-Radio, too, is making big pitch to national advertisers, with full-page ads this week beginning buildup paralleling CBS's (Vol. 7:31). Ad captioned "People sell better than paper" makes point that "when you want to close a sale with a tough customer, you don't send a printed page" and that radio reaches 19 out of 20 families whereas TV as yet reaches only 3 out of 10. "The voice is more persuasive than ink," says first ad, which looks like it's going to start nice furore among competing printed media. Printed NBC-Radio ads in 14 business papers will be backed up by 5 Sun. night radio shows starting Aug. 12, promoting radio as ad medium, playing on theme "You Can't Take It With You." Whole campaign is budgeted at $720,200 for rest of year . . . AFRA will bar from membership Communists so proven by State or Federal court action "since Dec. 31, 1945", result of 2118 to 457 vote on ballots sent to 7000. Federation will also disqualify subversives identified by FBI, Justice & State depts. . . . Of 244 adult Negro TV viewers polled by Advertest Research about CBS-TV *Amos 'n' Andy* show, 75% said it's "not harmful" to colored race; 86.5% said it should be continued; survey was occasioned by Negro association's threats of boycott (Vol. 7:27) . . . CBS has leased 25,000 sq. ft., 6 upper floors, in 7-story building being built on E. 52nd St., adjacent its Madison Ave. quarters, for use as executive offices . . . Cathedral Films has released entire backlog of 40 religious pictures to TV, asking $12,500 per film, for first run . . . Douglas Fairbanks Jr. and producer Sol Lesser planning to reissue about 16 old Doug Fairbanks Sr. films to theatres, then sell them to TV . . . KLAC-TV, Los Angeles, reported to have paid $320,500 for 52 old features bought from Quality Films (Charles Weintraub) who put package together from properties of independent producers and local Chemical Bank & Trust Co. . . . WKZO-TV, Kalamazoo, raised base hour rate Aug. 1 from $400 to $500, one-min. from $60 to $90, set 9 a.m.-5 p.m. as Class B time . . . WDAF-TV, Kansas City, raises base hour rate Aug. 15 from $450 to $550, one-min. from $90 to $110 . . . WHBF-TV, Rock Island, new rate card Sept. 1 raises base hour rate from $250 to $300, one-min. from $50 to $60, changes Class A time to 6-11 p.m. Mon.-Fri., 1-11 p.m. Sat. & Sun., Class B to 5-6 p.m. Mon.-Fri. . . . WENR-TV, Chicago, raises base hour rate Sept. 1 from $1300 to $1500, one-min. from $250 to $300.

———■———

TV network hookups via coaxial and/or microwave cost 7 times more than radio, requiring much wider-band channels, but they're far from highest item in networking overhead, according to AT&T spokesman taking issue with our observations about high cost of coaxial-microwave (TV Films May Supersede Live Networks; Vol. 7:31). Long lines represent far less than 5% of average program cost, actually average only 10¢ per mile per half hour of program time, or $11 per station on 40-station hookup, we're informed. There are now approximately 18,500 miles of coaxial-microwave TV circuits, and during 1950 (when combined TV networks took in $55,000,000) total long lines billings ran some $5,000,000, according to FCC sources.

Admiral $7,000,000 plant expansion program includes $2,000,000 for new 300,000 sq. ft. building at Cortland & Springfield, Chicago, for defense work; $1,500,000 seven-story office building at Cortland & Hamlin; $1,000,000 expansion of Galesburg plant by 120,000 sq. ft.; $2,500,000 for added distribution space and facilities in Chicago, New York, Boston—all financed from working capital, no borrowings.

Dr. Edward U. Condon, director, Bureau of Standards, has resigned as of Sept. 30 to join Corning Glass as director of research and development.

TRULY international TV standards, meaning easy direct exchange of programs without film, just aren't in the cards for visible future: regional standards have good chance. Those facts are clear from June 5-July 6 international committee sessions in Geneva, according to recently-returned U. S. participants. No nation would yield in advocacy of its system—405 lines, 5 mc channels (Britain); 525, 6 mc (U. S. and most of Americas); 625, 7 mc (most of Europe); 819, 14 mc (France).

All that was agreed upon were 11 standards common to all systems—4:3 aspect ratio, 2:1 interlace, independence of power supply frequency, etc. Besides number of lines, and channel widths, systems differ in fields (50 & 60), modulation (positive and negative picture, AM & FM sound), other basic characteristics.

Participants decided to study many problems, including: (1) Color, which all want to integrate inexpensively into their systems. (2) Bandwidth reduction techniques, such as dot-interlace, "crispening", long-persistence phosphors. (3) Interchange of programs among nations and between systems. (4) Desired-to-undesired signal values.

* * * *

Foreign TV stations now operating, other than Latin American, are as follows, according to data submitted at Geneva sessions (all experimental except British and French): Denmark—1 station, 625 lines, .5 kw transmitter output, 50 receivers, 6 more stations planned. France—1 station on 441 lines, 30 kw; 2 on 819 lines, 3 kw, 25,000 sets, 3 more stations planned. Italy—1 station, 625 lines, 5 kw, 1000 sets. Japan—1 station, 525 lines, .5 kw, 25 sets. Netherlands—2 stations, 625 lines, one with 3 kw, other 5 kw, 1000 sets, 1 or 2 more stations planned. Britain—2 stations, 405 lines, one with 17 kw, other 42 kw, 1,000,000 sets, 3 more stations planned. Sweden—1 station, 625 lines, 1 kw, 25 sets, 1 more station planned. Switzerland—1 station, 625 lines .4 kw, 30 sets. Czechoslavakia—1 station, 625 lines. Germany (Allied High Commission)—1 station, 625 lines, 1 kw, 25 sets, 6 more stations planned. Russia—number of stations and sets not given, 625 lines (8 mc channels). Countries without stations, but planning to build: Spain 2, Morocco-Tunisia 2, Monaco 1. Still others report existence of "planning committees."

———■———

TV's own "Battle of Berlin" opens Aug. 13 when U.S. throws two electronic "divisions" into cold war to show strength and productivity of free world. Sponsored by ECA, both CBS and RCA will give most Berliners their first taste of TV—color and monochrome, respectively. Two-week demonstrations are expected to attract thousands from World Communist Youth Festival in East Berlin, for which Russia claims 2,000,000 attendance. CBS contingent of 7, headed by Dr. Peter Goldmark, will conduct closed-circuit color programs in Funksturm Exhibit Grounds. RCA's Richard Hooper and staff of 27, taking along some 35 tons of materials, have installed complete monochrome transmitter, the pictures to be received on 3 big-screen units in Schowenedgerstadt Park. Additional 110 home-type sets will be scattered throughout West Berlin. CBS also plans color transmissions of surgery, sponsored by Smith, Kline & French Labs, at Sept. 24-29 International Congress of Surgeons in Paris.

GE Appliance Div.'s 150 distributors and salesmen meet in NBC-TV's Studio AA in Chicago's Merchandise Mart Sept. 5 for 9-9:30 a.m. closed-circuit preview of GE's *Bill Goodwin Show*, starting Sept. 11, Thu. 3:30-4, thru Young & Rubicam. It's part of sponsor's sales counselors convention in Chicago, and 48 interconnected stations will carry the preview so local GE distributors and dealers can also watch. NBC calls it "pattern for what may be the typical sales convention of the future."

Television Digest WITH AM-FM REPORTS
1619 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
August 11, 1951

TRADE 'CLIMATE' IS TURNING BETTER: Signs are still good, "psychological impetus" seems to be there -- but we'll have to wait a few more weeks, maybe a month or so, to be able to gauge fall-winter industry trends with any feeling of assurance.

Right now, you can almost feel the "lift" TV-radio trade is enjoying as result of bullish developments: excellent values of product, whether in new lines or old; easier credit terms, not yet making deep impression on retail trade but reasonably certain to do so when people turn homeward from vacations; higher TV powers, improving signals and widening service areas of many markets; super-dooper new telecasting programs promised soon, and coast-to-coast network service in offing; assured public buying power as Congress acts favorably on multi-billion dollar defense budget covering procurement to mid-1952, production into 1953.

With defense effort still on upgrade, with materials shortages no mere chimera, there are those in the industry who still feel TV-radio merchandise must inevitably go into short supply by end of year or maybe a bit later. Even discounting huge inventories, discounting their impulse to "talk up" better times, there may be some basis for long-term bullishness -- though certainly the present pile-up of TV receivers doesn't seem to bear them out for near future.

Distributor meetings thus far have reflected bullish outlook, despite fact wholesalers are probably loaded as heavily as manufacturers. Consensus is that the dealers are slowly but surely getting rid of inventory, and are now more inclined to buy -- "their frame of mind much better," to quote one executive.

Puzzler to trade is effect CBS-Columbia's upcoming color promotion campaign will have on black-&-white market, in which CBS as a telecaster as well as manufacturer now has same stake as rest (see story, page 10).

* * * *

Weekly output figures, meanwhile, tell more of same. Week ending Aug. 3, RTMA reports, saw only 51,217 TVs produced (3229 private label), up less than 500 from preceding week's 50,772 (Vol. 7:31) -- and comparing with first August 1950 week's 160,000! Yet factory inventories forged ahead again, reaching new high of 768,766 compared to 761,448 week before.

Radios went up to 212,946 units (92,877 private label) from 184,685 the preceding week. Factory inventories were 394,223, some 10,000 up from preceding week. Week's radios were: 120,921 home sets, 63,117 auto, 28,908 portable.

4th QUARTER UNDER CMP—FEWER SETS? NPA is preparing to allot the TV-radio industry enough steel, copper and aluminum to make about 940,000 TVs, 2,200,000 radios during fourth quarter under Controlled Materials Plan (CMP).

Figures are rough estimates -- NPA's -- based on present mix. They compare with 2,199,669 TVs and 4,235,597 radios produced in this year's first quarter and 1,134,836 TVs & 3,792,338 radios in second quarter. The fourth quarter estimates are based on NPA's plan to dole out to TV-radio and other consumer durables manufacturers steel at rate of 65% of first-half 1950 use, copper at 54%, aluminum at 48% -- compared to 70%, 60% & 50% for third quarter under Order M-47A (Vol. 7:25,31).

Decision to include consumer durable goods in CMP next quarter -- announced this week -- came as no surprise to anyone. This had been only segment of economy operating outside govt.'s all-out materials rationing plan, and its inclusion was inevitable to keep soaring military production from squeezing out civilian industry.

Tighter restrictions are almost certain next year. House's approval Aug. 9 of whopping $56 billion for Armed Forces during the year ending June 30, 1952 foreshadows accelerated military buildup. And it's to be followed by more money for foreign military aid, and possibly still more for our own Armed Forces this fall.

It's good guess that $4-5 billion of this is for electronic equipment (for

partial breakdown, see Mobilization Notes) -- although many electronics contracts go outside TV-radio industry, and many have lead time of a year or more. So they can't be counted on to take up much of the slack caused by curtailed TV-radio production.

You can get idea of magnitude of this appropriation by comparing it with this week's Pentagon announcement that Defense Dept. obligated $35.3 billion for military procurement during first 12 months following Korea. Of this amount, $27.9 billion represents contracts for military "hard goods". By rule of thumb, something less than $3 billion, or about 10%, is for electronic equipment.

But civilian industry won't be blotted out by military, except in all-out war. Govt. takes great pains to make that clear. In Aug. 7 broadcast, DPA-NPA boss Fleischmann stressed desire to maintain healthy economy by "allowing the largest volume of civilian production consistent with meeting our military needs first." To back this up -- for fourth quarter, at least -- DPA has instructed NPA's operating divisions to slash some "essential" or "defense-supporting" programs deeper than consumer goods.

Reports on CMP's operation haven't been good during current "dry run". DPA has been widely accused of "over-allotting" -- writing too many checks against its bank of strategic materials. To which Fleischmann replies fault is manufacturers' -- too many have placed duplicate orders with different suppliers; others have not cancelled excessive orders. He's ordered crackdown, pledges smoother operation during fourth quarter.

But applications have been drifting in too slowly to begin fourth quarter allocations on schedule. Electronics Div., for example, has received only about half the 1200 applications it expects. Fleischmann extended July 31 deadline, warns that anybody who doesn't file before Aug. 15 "is running a tremendous risk" of not getting enough materials next quarter. (For other CMP news, see Mobilization Notes.)

There's still a rub -- even if CMP works as planned next quarter. Most production experts expect big electronic bottlenecks as a result of shortages of the so-called "rare metals" -- rather than the "controlled metals," steel, copper and aluminum. Fleischmann took cognizance of this in his broadcast, when he said of nickel, cobalt and chrome:

"Practically 100% of the available supply of these materials must go directly into the military, defense-supporting and expansion programs."

OUTLOOK FOR CBS COLOR SET PRODUCTION: Who's going to make CBS color sets? And how many? Only CBS-Columbia, Tele-tone, Webster-Chicago, Meck, Muntz have shown any enthusiasm, made consistent promises thus far. Crosley and Bendix have shown samples, but with noticeable lack of faith in system. Their apparent purpose is to show their dealers they won't be left out in cold if demand grows.

None of biggest producers has yet gone even as far as Crosley and Bendix, but there was talk this week that one or more might -- to keep dealers "protected".

It's extremely questionable whether any top producer would really throw his full weight into CBS-type production, albeit FCC-approved, since industry's faith in ultimate approval of compatible system mounts daily (see p. 5). Of course, virtually every manufacturer has made CBS sets in labs, for own edification and protection.

But CBS's promotion -- football, baseball, etc. -- is likely to produce some impact on trade, according to some manufacturers. "It's the moral effect of the Godfrey kind of propaganda that bothers us," said one -- explaining he means the kind of publicity that renders low-income folk indecisive about buying their first black-and-white set, inevitably cheaper than color, and that keeps wealthier folk from buying their second or third set.

* * * *

Meanwhile, CBS-Columbia says it "will try like hell" to meet its goal of 25,000 color units by year's end. President David Cogan feels company has good argument to persuade more materials out of NPA. "We were changing models during our base period," he says, "and naturally our production was lower. But I think NPA will be reasonable."

If NPA doesn't relent, Cogan points out, company can shift materials from

black-and-white to color as demand warrants. Types of color sets and slave units planned are same as previously announced (Vol. 7:29). Same goes for costs, though Cogan says engineers are learning short-cuts, should be able to cut prices next year. First of pilot-run sets are due about Sept. 1.

Tele-tone will build 10,000 to 15,000 slave units this fall, according to president S.W. Gross. "We'll feel our way," he says. "Materials situation will be tight as hell during fourth quarter."

Complete color sets aren't due until next year, Gross says, adding: "Our engineers are working on something that looks promising for sizes up to 20-in." Projection? "No". Drum? "Wouldn't call it a drum."

Philco reports almost no demand for its $20 black-and-white adapters. And Motorola says it plans adapters, designed for most of its models, past and present, will know production dates and costs in 30 days or so.

Topics & Trends of TV Trade: Philco reports substantial orders—"all we asked for"—from distributors attending its sessions in New York and Chicago, and its speakers urged comparisons with "last half 1949, not 1950" in calculating markets ahead. It wasn't officially stated, but it's manifest Philco, like other majors, is inclined to err on side of under-production rest of this year rather than over-production—materials restrictions forcing this anyhow (see p. 9).

New 1952 Philco line of TVs comprises 28 models, includes tax in price, offers 90-day warranty on all models at flat $12.50. Prices are downward at low end. Popular feature with distributors was placing of casters on all consoles.

Seven 17-in. table models range from plastic models at $199.95 (mahogany finish) and $229.95 (cordovan leather) through (rounding out prices) $260, $280, $300 (2 models), $330. Eleven 17-in. TV-only consoles are priced from $300 through $340, $350 (2), $370 (2), $380, $400, $420, $500, $550—latter being Sheraton full-door de luxe models. There's also one 17-in. combination with AM-FM-3 speed at $450.

New 20-in. table models are $360 mahogany, $380 blonde; 20-in. consoles $450 & $480; with full doors, Georgian, $450 & $480. Combinations in 20-in. are $600 & $629. One with remote control is $800, same without remote $750.

Radio line continues many old models, tables ranging from $19.95 to $49.95; clock radios, $37.50, $39.95, $42.50 (white or ivory); one AM-FM table, $69.95; portables at $35, $40, $50; table radio-phonos, $80 in ebony, $100 mahogany; radio-phono combinations at $200 for AM-only in mahogany, $250 for AM-FM mahogany, other at $270, $300, $320. Big promotion push is "tube saver" limiting current during power surges.

* * * *

Manufacturers' price controls, including those on TV-radio and other electronic equipment and parts, were postponed indefinitely Aug. 9 while OPS prepares new regulations incorporating the more liberal provisions of new Defense Production Act (Vol. 7:31). New manufacturers' price ceilings, which were to have been effective Aug. 13, may be ignored, OPS announced. "Capehart amendment" of new controls law permits manufacturers to ask for ceilings based on their pre-Korea prices plus all reasonable cost increases between then and July 26, 1951. In the OPS manufacturers' orders, only increases permitted were those in labor costs up to March 15, 1951, material costs to Dec. 31, 1950.

Described as "magazine for audio-philes," *High Fidelity* titles new popular quarterly publication being issued by Milton B. Sleeper.

Trade Miscellany: Non-profit TV service plan, members paying $10 year and then getting service at cost, projected by Authorized Manufacturers Service Co., Brooklyn, partnership of George Fried, Alfred Coleman, Morton Greenberg, proposing this scale of "at cost" fees: home service call, $2.35; shop labor, $2.85 an hour; antenna & installation, $3.90 an hour; parts at 20% discount to members . . . Pennsylvania Legislature bills to license TV-radio servicemen after examinations unanimously endorsed by 3500 members from 9 chapters of Federation of Radio Servicemen's Assns. . . . Illinois Cabinet Co. becomes Rockford (Ill.) Cabinet Works of GE as of Sept. 1, result of merger, gen. mgr. Oscar M. Lindgren continuing on job . . . Sylvania has new subsidiary, Sylvania Electric of Puerto Rico Inc., formed to fabricate mica for radio tubes, within 60 days starts production by 100 persons in 10,000 sq. ft. plant outside San Juan to supplement supplies from Brazil and U. S. . . . IT&T, which last week bought Coolerator Corp. (Vol. 7:31), has purchased 31% of common, 40% of preferred stock of Kellogg Switchboard & Supply Co., Chicago, for $2,240,000, from former president J. G. Kellogg; none of present president James H. Kellogg's or other directors' stock involved, and no changes in management contemplated . . . Western Union Services Inc., new TV servicing subsidiary of WU, handling all standard makes, expanding present New Jersey servicing territory (Essex, Passaic, Union counties) to include Bergen and Hudson counties.

* * * *

Distributor Meetings: Admiral sales convention in Chicago postponed from Aug. 10-11 to Aug. 17-18, which will enable company's 600 distributor delegates to attend All-Star grid game being sponsored by Admiral Aug. 17 on DuMont Network . . . Crosley showing new TV, freezer & range lines in Savoy Plaza, New York, Aug. 14-16 . . . Sentinel has new TV models to show at Sheraton Hotel, Chicago, Aug. 14-15 . . . Motorola's new TV-radio lines to be shown in Essex House, New York, Aug. 21-22 . . . Hoffman's new sets (Vol. 7:31) promised for September delivery, with distributor meetings due in St. Louis, Aug. 12-13; San Antonio, Aug. 13-14; Salt Lake City, Aug. 14-15; Memphis, Aug. 16-17; Oklahoma City, Aug. 27-28; Tulsa, Aug. 30-31.

Stop misleading public, warns New York Better Business Bureau in special bulletin condemning retail ads stressing "no money down" or "no cash required" in buying TVs and radios since easing of Regulation W (Vol. 7:30). BBB says its shoppings revealed very few trade-ins met full down payments, higher prices being asked when no trade-ins were available. It also cautioned dealers that Regulation W, even as amended, requires record be kept of each sale showing down payment in cash and trade-in value.

Financial & Trade Notes: CBS gross income rose to $77,369,615 first 6 months of 1951 from $60,276,582 same 1950 period, but net profit after providing $4,125,000 for taxes fell to $2,221,317 ($1.29 a share) from $2,495,370 ($1.45) after $3,286,700 taxes. First quarter CBS sales were $39,323,391, profit $1,276,054 (74¢) vs. $30,809,064 & $1,304,050 (Vol. 7:16). The 1951 figures are exclusive of earnings of recently-merged Hytron and subsidiaries, effected last June 15. The earnings per share were calculated on 1,717,352 shares of $2.50 par stock outstanding prior to June 15, increased as result of merger (Vol. 7:20-24). Next quarterly report will reflect operations of new manufacturing subsidiaries.

Along with Raytheon's annual report, showing unusual gains in both sales and profits for its fiscal year ended last May 31 (Vol. 7:31), proxy notice to stockholders asks them to vote at Sept. 6 meeting on resolution to increase authorized $5 par common shares from 2,250,000 to 3,000,000 and total shares of all classes from 2,346,370 to 3,096,370. Proxy report also shows Charles F. Adams Jr. owning 6000 shares of common & 600 pfd., drawing $40,083 salary for fiscal year; David T. Schultz, v.p.-treas., holding 7594 common, $34,450 salary & $5000 bonus; Percy L. Spencer, v.p. & mgr. of power tube div., $22,500 salary & $5000 bonus.

* * * *

Among officers' and directors' stock transactions reported to SEC for June: Dee S. Lenfesty sold 400 Arvin, holds 4000; T. Earl Robinson bought 3 Arvin, holds 632; Albert L. Cuff bought 500 Blaw-Knox, holds 1000; Charles M. Thorp Jr., sold 60 Blaw-Knox, holds 1740; William J. Flynn bought 40 CBS Class B (May), holds 40; J. A. W. Iglehart bought 300 CBS Class B, holds 1300; Isaac D. Levy sold 5296 CBS Class B, holds none; J. L. Van Volkenberg bought 100 CBS Class B (May), holds 100; Octave Blake sold 200 Cornell-Dubilier, holds 36,638 common & 31 pfd.; C. Russell Feldmann sold 116,100 National Union pfd., holds none; Strong, Carlisle & Hammond Co. bought 116,100 National Union pfd., holds 116,100; Larry E. Gubb sold 43 Philco, holds 28,930; Thomas A. Kennally sold 2500 Philco, holds 22,974; John S. Timmons sold 4950 Philco, holds 13,000; Edward M. Tuft sold 100 RCA, holds none; William Gammel Jr. sold 100 Raytheon, holds 16,970; John F. Fennelly sold 200 Stewart-Warner, holds none; Walter R. Seibert bought 41 Sylvania, holds 141; E. F. McDonald Jr., sold 4800 Zenith, holds 34,131.

Television-Electronics Fund Inc., open-end investment trust, reports net assets of $7,153,000 as of Aug. 6, or $13.14 per share on 544,194 shares outstanding, and declared year's third quarterly dividend of 15¢ payable Aug. 28 to holders of record Aug. 16. July 31 quarterly report shows net assets of $6,970,933 ($12.86 a share), compared with $5,180,307 ($10.88) same time last year. Cash and govt. securities accounted for 23.1% of total assets, up from 10.2% at Jan. 31, 1951 and 4.7% at July 31, 1950.

"There appears to be no reason to change our opinion," president Chester D. Tripp reported to stockholders, "that the decline of demand for telesets has been largely seasonal and that a normal upswing will commence in the not too distant future. There is a large segment of the population still not enjoying TV but . . . within the range of reception. It is our belief that the improved programs which will be put on the air will be an important factor in inducing purchase by many of these families."

These were the Fund's common stock holdings as of July 31: **TV & Electronics (41.23%)**—Aerovox 7000 shares, ABC 6000, American Phenolic 2000, Bendix Aviation 3000, CBS "A" 4000, Cornell-Dubilier 3000, Corning Glass 1600, Erie Resistor 2000, Fansteel 3000, GE 5000, General Instrument 5000, Hazeltine 2000, International Resistance 3000, Mallory 1200, Muter 4000, Oak Mfg. 6000, Owens-Illinois 2000, RCA 15,000, Raytheon 5000, Sprague 4000, Sylvania 2000, Westinghouse 6000.

Electronics Other Than TV (26.03%)—American Bosch 9000, Clark Controller 2000, Consolidated Engineering 3000, Cutler-Hammer 4000, Fairchild Camera 2000, Hammond Instrument 1000, IBM 1000, Minneapolis-Honeywell 5000 common & 425 pfd., Remington Rand 7000, Sperry 3000, Telecomputing Corp. 3000, Tung-Sol 2000, Webster-Chicago 9000. **Primarily TV (16.84%)**—Admiral 3500, DuMont "A" 6000, Emerson 7500, Motorola 5100, Philco 11,500, Zenith 2500. **Miscellaneous (15.9%)**—AT&T 1000, Disney 6500, Eastman 4500, Federal Enterprises 2000, General Controls 2800, Haloid 1800, I-T-E Circuit Breaker 1100, LaPointe Plascomold 5000, Otis Elevator 4000, Tracerlab 2000, United Specialties 2100, Conrac 9000, Television Associates 2400.

* * * *

Dividends: CBS, 40¢ payable Sept. 7 to holders of record Aug. 24; Magnavox, 37¢ payable Sept. 15 to holders Aug. 15 and 25¢ on "A" pfd. payable Sept. 1 to holders Aug. 15; Standard Coil, 25¢ payable Aug. 15 to holders Aug. 9.

Merchandising Notes: Lots of TV-radio set advertising in all media, particularly radio, scheduled for fall in big promotion drives, with Westinghouse's football schedule one of biggest promotions (Vol. 7:31) . . . CBS-Radio gets 2 big network campaigns scheduled by industry leaders—*GE Football Roundup*, Sat. 2:30-5 p.m. for 8 weeks starting Sept. 29, thru Maxon Inc.; Sylvania sponsoring Grantland Rice football forecasts on CBS-Radio starting Sept. 28, Fri. 8-8:15, and *Sammy Kaye's Sylvania Sunday Serenade*, Sun. 3-3:30 p.m. starting Oct. 7, thru Roy S. Durstine Inc. . . . Capehart-Farnsworth to sponsor 15-min. news commentary with Fred Van Devanter on Mutual Network, starting Aug. 19, thru J. M. Mathes . . . DuMont allowed dealers 33% discount on 17-in. console listing at $535 and 19-in. at $625 & $675, giving rebates on inventory bought between May 23 & Sept. 10, then withdrew offer after enough goods had been moved . . . Chicago's Hudson-Ross and Goldblatt Bros. ran full-page ads in Aug. 9 *Tribune* plugging Emerson's 2-year 100% trade-in-on-color-set deal (Vol. 7:31) . . . Westinghouse assuming floor plan charges on new TVs and radios (Vol. 7:31) delivered by Oct. 1, also guarantees prices to Nov. 15 . . . Muntz TV reported by *Retailing Daily* as contemplating new branches in Houston, Kansas City, Rock Island-Davenport . . . Motorless receiving antenna, with "360-degree electronically switched beam," is being offered by Snyder Mfg. Co., Philadelphia; it has 3 elements, 120 degrees apart, single lead-in, 3-way switch at receiver.

S.M.A. Co., sold recently (Vol. 7:18) to Samuel C. Rudolph, New York, who disposed of TV inventory, has been bought back by Chester W. Lytle group, is now operating as S.M.A. Co., division of Lytle Engineering & Mfg. Co., 4721 Kedzie Ave., Chicago, selling complete TV receivers for domestic and export as well as TV kits. It plans new vhf-uhf model, is field-testing new uhf converters, reports Mr. Lytle.

Credit sales of major appliances and TV receivers showed "a slight but definite improvement" first 10 days of this month, reported *New York Times* Aug. 11. Its canvass of leading stores indicated dealers attributed this to relaxation of Regulation W. One important store was reported 70% ahead in appliances, 60% in TVs of last week in July—but this was still off 20% & 50% from comparable 1950 week.

Mobilization Notes: Organization plan of NPA Electronics Div., now nearly fully staffed, has been approved by Administrator Manly Fleischmann. In 9 months of its existence, Division's staff has increased from mere handful to about 80. Leadership of Division's branches and sections has been recruited largely from electronics industry, with members drawn from manufacturing, trade and broadcasting fields. Other staff members are from electronics and communications branches of Armed Forces and govt. bureaus such as FCC and Bureau of Standards. Many of WPB's Radio-Radar Div. staffers are back in jobs similar to their World War II posts.

Electronics Div. serves as "claimant agency" for electronics manufacturing industry in questions of materials availability, allocations, restrictions, etc., and for broadcasters with respect to construction controls. As such, it's the industry's principal point of contact with NPA. Division is headed by Edmund T. Morris Jr., who is also chairman of DPA's inter-agency Electronics Production Board while on leave from directorship of Westinghouse electronics & X-ray div. Donald S. Parris, former chief of Commerce Dept. consumer durables div., is deputy director. Bureau and section chiefs in newly-approved organizational set-up (recent additions to staff identified in parentheses):

End Equipment Branch, J. A. Milling; radio & TV receivers section, Lee Golder (acting); radio communications equipment section, W. E. Dulin; broadcast & sound equipment section, J. Bernard Joseph; broadcast equipment unit, Donald Cooper (ex-acting chief engineer, WNBW & WRC, Washington); military equipment section, N. C. Harris.

Components Branch, Louis H. Niemann; capacitor & resistor section, R. D. Parker; transformer section, E. MacDonald Nyhen; electron tube section, N. H. Stewart (on leave as section mgr., Westinghouse electronic tube application engineering dept.); special components section, Delmus J. Fagge (acting).

Programs & Requirements Branch, appointment of chief pending; CMP section, O. W. McDaniel Sr.; programs & statistics section, Eric D. Bovet; foreign section, Robert R. Burton (ex-Civil Defense communications div. chief, ex-State Dept. international frequency expert); plant expansion section, William J. Bapst; conservation section, E. W. Glacy.

* * * *

RCA's expansion of electronic tube production facilities received DPA approval this week in form of 2 certificates of necessity for 5-year tax writeoff on new Harrison, N. J., plant facilities to cost estimated $2,879,482. Of this amount, 75% will be subject to rapid amortization. Other certificates granted by DPA during 2 weeks ended Aug. 3 for tax aid in expansion of electronic production facilities: Sylvania, $844,604 at 75% amortization, for production of thyratron tubes at Seneca Falls, N. Y.; Operadio Mfg. Co., $324,500 at 75%, electronic amplifiers, St. Charles, Ill.; Hastings Instrument Co., $255,315 at 80%, electronic receivers & indicators, Hampton, Va.; Eitel-McCollough Inc., $114,329, power tubes, San Bruno, Cal.; Raytheon, $26,264 at 85%, research & development, Waltham, Mass.

Opportunities for subcontractors are suggested in new lists maintained by Navy Material Inspection Service. Lists contain components needed by Navy prime contractors, are kept up to date and are available at the Service's 80 offices. One of principal categories on lists is electronic & electrical items. Subcontractor exhibits to enable small businessmen to examine military items they might make under subcontracts are planned by Armed Forces Regional Councils in Pittsburgh Aug. 15-17, Atlanta Sept. 10-12, Detroit Oct. 29-Nov. 1.

Late applicants for CMP must make their applications conform to consumer durables Order M-47A as it was before the Aug. 2 amendment which permits manufacturers greater latitude in use of materials during current third quarter (Vol. 7:31). NPA made this ruling this week so that manufacturers who filed CMP forms on time won't be penalized by the more restrictive wording of the earlier consumer goods order. Officials say NPA will be lenient in granting adjustments to manufacturers who want to change their product "mix" under CMP in order to meet changing market conditions in fourth quarter.

Manufacturers will still be able to buy some steel, copper and aluminum on open market after Oct. 1, even though all-out CMP is supposed to be in effect by then. This "free area" will be maintained to take care of producers whose applications aren't processed in time to meet October schedules. It's expected to get smaller in November and disappear entirely by year's end.

———■———

Funds for electronic equipment in House military appropriation of $56 billion haven't been itemized separately, but they're believed to total $4-$5 billion (see story, p. 9). In their original requests for $57.6 billion, however, these were among funds Armed Forces asked: Army—$944,616,000, Signal Corps supplies & equipment; $831,000, radio-radar for army boats. Air Force—$473,200,000, electronics & communications equipment; $5,915,000, electronics & communications for Air National Guard. Navy—$441,583,000, Bureau of Ships electronics procurement. These figures probably total less than half of bill's actual funds earmarked for various electronic projects.

Trade Personals: Walter H. Stellner, merchandising v.p., and George R. McDonald, finance v.p., both also directors, have resigned from Motorola—former's plans as yet unannounced, latter says he'll become a gentleman farmer in South Carolina . . . E. W. Merriam, DuMont mgr. of teleset service control, who is chairman of RTMA service committee, and C. W. Cooper, mgr. of service control in New York, have resigned . . . Harold G. Cheney, lamp sales administrator, named sales mgr. of new Westinghouse tube div. under v.p. Eugene W. Ritter, headquartering in Bloomfield, N. J., pending completion of new plant in Elmira, N. Y. . . . Richard E. Laux resigns as president-treasurer of General Instrument Corp. as of Aug. 31, continuing as director; Monte Cohen, president, F. W. Sickles div., elected executive v.p. and Abraham Blumenkrantz, chairman, assumes duties of treasurer . . . Dr. Ivan A. Getting, ex-MIT professor, authority on radar, and for last year chief scientist of Army Air Force, named Raytheon engineering-research v.p. . . . Fred D. Wilson, Capehart-Farnsworth president, will retain that post, in addition to becoming president of Coolerator Co., newly acquired by IT&T (Vol. 7:30) . . . Charles Robbins, Emerson sales v.p., named president of Emerson-Midwest Corp., 512 S. Michigan Ave., Chicago, newly formed Emerson-owned distributor taking over from S. E. Schulman Co.; sales v.p. is Rube Schoenberg and secy.-treas. is Bertha Engel. Stanley M. Abrams is now acting director, Emerson sales . . . John W. Bullock new gen. mgr., Hallicrafters-Chicago Inc.; R. W. Dansby, ex-Texas Wholesalers Inc., named Hallicrafters regional mgr. for Texas, Oklahoma, New Mexico . . . A. Earle Fisher, Westinghouse TV-radio div. merchandising mgr., appointed New England district mgr. . . . Benjamin Wax, treas., Kent Television Inc., elected president of subsidiary Kentcraft Finishing Corp. . . . V. S. Mameyeff, Raytheon, reappointed chairman, RTMA export committee, W. M. Adams of Sprague vice chairman . . . Henry C. L. Johnson, ex-Crosley account executive at Benton & Bowles, now handling RCA account for J. Walter Thompson Co. . . . Carl A. Zehnle, ex-Motorola director of purchases, Sept. 1 becomes v.p., Electronic Supply Corp, Battle Creek, Mich.

Grants of power increases to 19 more stations this week bring total to 41 (see story p. 3). For all previous grants, see Vol. 7:31. This week's authorizations, all permitting full 5-kw transmitter output: WBRC-TV, Birmingham; KNBH, Los Angeles; KFMB-TV, San Diego; WENR-TV & WNBQ, Chicago; WHBF-TV, Rock Island; WFBM-TV, Indianapolis; WOI-TV, Ames-Des Moines; WWJ-TV, Detroit; WKZO-TV, Kalamazoo; WNBF-TV, Binghamton; WCBS-TV & WNBT, New York; WSYR-TV, Syracuse; WCPO-TV, Cincinnati; WNBK, Cleveland; WKY-TV, Oklahoma City; WCAU-TV, Philadelphia; WTVR, Richmond. Applications still pending at week's end: KRON-TV, San Francisco; WBEN-TV, Buffalo; WABD, New York. In addition, KTSL, Los Angeles, and WTTV, Bloomington, request temporary increases pending action on applications to move to new sites.

Broadcasting Inc., formed by group of Atlanta business men offering to pay Atlanta Newspapers Inc. $525,000 for facilities of WCON-TV, last remaining pre-freeze CP holder (Vol. 7:15, 18, 22), was declared by FCC legally, financially and otherwise qualified to hold license—and Commission approved deal in Aug. 9 order (No. 51-815). At same time, FCC rejected oppositions of Georgia Tech's WGST and E. D. Rivers Jr., WEAS, Decatur, Ga., both applicants for TV in Atlanta (Vol. 7:25, 28). Unless there's an appeal, WCON-TV will switch its Channel 2 assignment with WSB-TV's Channel 8, under terms of deal, will go commercial as country's 108th outlet on or about Oct. 1. Its general manager will be William T. Lane, ex-mgr., WAGE, Syracuse; sales manager, Arch Ragan, ex-WAGA-TV; chief engineer, Harvey J. Adelhold, who built WCON-TV and returns to old job from present post with WIBC, Indianapolis. Sale was forced by fact that *Atlanta Journal* and *Constitution* were merged, former owning WSB-TV and latter having built but not yet started operating WCON-TV.

Production of Ford Foundation Workshop's first TV films, to run 15 & 30 minutes, starts in September, reports James Webb Young, consultant in charge of new $1,200,000 project "to produce cultural and public service programs for commercial broadcasters." Head man of Workshop will be announced next week—information on types of shows, producers, stars to follow. TV sendoff, now set for January, follows CBS November radio premiere. Already in production, radio series titled *The People Act* shows how citizens band together to solve community problems. TV output will be offered networks and stations and sponsorship will be permitted.

Whether 1952 political conventions shall be commercially sponsored will be discussed by TV-radio network topkicks at parley Aug. 15 in Washington's Mayflower Hotel with GOP publicity chief William Mylander and radio chief Ed Ingle and their Democratic opposite numbers Charles Vandeventer and Kenneth Fry. They'll simply discuss principles involved, final decisions being up to respective national committee chairmen and their convention arrangements committees.

Congressional baseball investigation will be broadened this fall to cover TV-radio angles, House Monopoly subcommittee announced Aug. 10. Group is considering 3 bills to exempt organized professional sports from anti-trust laws. Rep McCulloch (R-Ohio) protested that bills as now written could kill some small radio stations and "involve the right of 50,000,000 people to see the World Series." Chairman Celler (D-N. Y.) said he will call witnesses from TV, radio, newsreels, FCC.

Printers' Ink predicts total advertising expenditures this year will exceed $6 billion, reporting $5,691,300,000 for 1950, which was up 9.4% from 1949's $5,202,200,000.

FCC's many worries about movie interests and its fears they may dominate or throttle TV will finally be thrashed out, now that Commission this week finally set for hearing (Public Notice 51-814), at unnamed date, all questions involved in old Paramount company's anti-trust violation history, plus plans, policies and management of the companies into which it was split by consent decree (Vol. 4:29, 5:5, et seq). Action automatically delays approval of projected ABC-United Paramount Theatres merger (Vol. 7:21-24, 27) since latter is half of Paramount split. Commission doesn't say how it intends to handle merger hearing. TV stations kept in "limbo," on temporary licenses, pending final decision: Paramount Pictures' KTLA, Los Angeles; DuMont's WABD, New York, WTTG, Washington, WDTV, Pittsburgh; United Paramount's WBKB, Chicago. In issues to be heard, FCC again indicates it's particularly concerned with movies' intentions regarding release of their films and talent to TV (Vol. 7:13-14). Commission intends to go into nature of old Paramount's anti-trust violations, qualifications and policies of all companies' management, all companies' intentions towards theatre TV, ownership of DuMont, etc.

Value of old films to TV is fast fading, through simple deterioration of negatives and prints. Aug. 8 *Variety* carries warning from Richard Griffith, of New York's Museum of Modern Art, that maximum life of celluloid is about 30 years, that poorly processed films of '30s are already crumbling, that cost of duplicating only top films would run into millions, that even major studios are doing little to preserve old epics. Griffith points out, for example, that Museum has only known remaining prints of such movies as *Morocco* (1930), starring Marlene Dietrich, Gary Cooper; *Night Must Fall* (1937), with Robert Montgomery, Rosalind Russell. What's worse, he knows of no existing negatives, so more prints can't be made. Paper prints are partial solution, he says. Library of Congress has made films from paper prints of *Great Train Robbery* (circa 1903).

Worth further note in discursive, rambling article titled "TV's Time of Trouble" in August *Fortune* (Vol. 7:31), pointless rehash mainly of a lot of warmed-over statistics: That neither MGM, Warner nor RKO has as yet set up TV subsidiaries (though Paramount, 20th Century, Columbia, Universal all have); also, that "Wall Street syndicates . . . have been eager to pick up control of some timorous producer, liquidate the company, and realize [via TV] on the sale of the film backlog." Article says that in 1934-45 period alone, Hollywood produced and has stashed away in its vaults 5380 features, 7636 short subjects—"enough to provide [on TV] 9342 hours of entertainment"—and that more film is being made for TV annually than for theatre projection (1000 hours vs. 775 hours). Author coins new symbol for theatre TV: TTV.

Two applications for new VHF stations in Maine, one for UHF in Indiana, were this week's FCC batch, bringing total pending to 428. Community Broadcasting Service, operating WABI, Bangor, seeks Channel 5 there, Channel 6 in Portland; partners are ex-Gov. Horace H. Hildreth and station mgr. Murray Carpenter. UHF Channel No. 59 is sought by WFAM, Lafayette, Ind. [For further details, see *Addenda 13-D* herewith; for list of applications pending, see *TV Factbook 13* with Addenda to date.]

TV's role in Congressional hearings came step closer to being decided by court Aug. 10 when Senate, by 38-12 vote, rejected move by Sen. Cain (R-Wash.) to quash contempt citations against Morris Kleinman and Louis Rothkopf, alleged Cleveland gamblers who refused to testify before Kefauver Committee because hearings were being televised (Vol. 7:8-9, 11-13). Sen. Cain called televised hearings "a vaudeville show" and "an extravaganza."

Transcontinental Telecasts Moved Up to Sept. 4, *page 10.*

PARADOXES ON THE COLOR BATTLEFRONT: Excellent progress in compatible color standardization is reported by manufacturers. At same time, more are beginning to offer their distributors-dealers color adapters and "slave" units on optional basis. They don't find this inconsistent, nor do they seem to fear availability of such items will depress the black-&-white market.

Quite the contrary: They don't think such units will sell, not in quantity at least, yet they're hedging against any eventuality and at same time indicating to FCC their willingness to give CBS-type receiving apparatus a fair whirl.

Admiral and Motorola were first of the big producers to show their distributor conventions color slave units -- to be available "if anybody wants them." There was notable lack of enthusiasm among the tough-minded merchandisers attending meetings, who were said to have placed orders almost entirely for black-&-white sets.

Admiral announced "Color TV Optional," a 10-in. slave unit, plus adapters (see p. 8). Motorola didn't even release any publicity about its 8½-in. sample. Admiral became first major to advertise color to public -- plugging term "color optional" Aug. 17 on its ABC-TV sponsorship of Browns-All Stars grid game in Chicago.

Webster-Chicago started deliveries of its long-promised slave units, says it will have "moderate production" by Oct. 1. It's 10-in., magnified, unpriced but may retail at $200-$250.

And Hallicrafters joined Philco, Westinghouse and others offering or planning to offer adapters. Hallicrafters announced "Color Transcender" adapter, to sell "under $20" so its set owners can get black-&-white from colorcasts, stating:

"We are taking this step to provide a way for Hallicrafters set owners to receive on their present sets any special broadcasts, such as certain East Coast football games now scheduled for color telecasting. We want our set owners to be able to receive all the telecasts made over the free air."

* * * *

Attitude of such manufacturers is summed up by GE's Dr. W.R.G. Baker, chairman of National TV System Committee (NTSC) which is spearheading industry's efforts to perfect a compatible system beyond possibility of FCC rejection:

"A lot of people say they won't do this or that. I think that's a little unfortunate. What do you do when you have a new product? You make a few. We'll make a few. I think everyone will. Let your distribution system feel out the market. That doesn't mean you're convinced these items will sell. You may also give your customers your personal opinion that a superior system is coming.

"A real question is price. Will people buy color at these prices, with a small picture and a rotating mechanical disc?" (CBS has announced first unit as 10-in., magnified, at $500; Vol. 7:29.)

* * * *

Still in quest of distributors, CBS-Columbia Inc. stepped up its campaign with interesting trade ad this week. Its impact on distributors, dealers and public

Copyright 1951 by Radio News Bureau

AUG 20 1951

remains to be seen -- along with impact of its promised consumer ads in the slick magazines. Aug. 15 full-page ad in Retailing Daily read:

"Get ready for color with the new CBS-Columbia compatible receiver. Internally adapted to receive color broadcasts in black and white." Most noteworthy is use of word "compatible." Only "floor and home demonstration samples" are offered.

CBS got accolade for first baseball colorcast, which was viewable on only few receivers but on which it obviously plans big merchandising peg. Red Smith, Herald Tribune sports columnist, commenting on Dodgers-Braves game, said the "reproduction was excellent, striking and only faintly phony." He noted a few technical flaws such as "slight running of colors" and "rainbow of bats in varying colors." But he thought the colors were "about as good as in Technicolor."

Between baseball and football, CBS obviously intends to pitch hard to plug its color system and receivers -- though unless there's huge demand for color sets and/or adapters, it's hard to see how it can afford to devote very much of its now-increasingly commercial afternoon schedules to small audiences in prospects.

Don't be surprised if CBS, now deep in the struggling manufacturing field, undertakes to buy more plants -- seeking not only production facilities but a badly-needed bolster to its distribution setup. It ought to be able to find sellers among the 90-odd set makers, some of whom obviously can't stand current economic gaff.

* * * *

Resumption of compatible color field tests is announced by RCA, to begin Sept. 10 with receivers in NBC's Center and Johnny Victor theatres. First 2 weeks' showings will be primarily for industry -- NBC affiliates, RCA distributors, etc., then they'll be opened to general public. Plans include network feeds to Washington, Philadelphia, Boston, Chicago, perhaps other cities.

Decision on reapproaching FCC hasn't been made, said chairman David Sarnoff (just back from Europe), at Aug. 15 press conference. He doubted whether petition would come before year's end, said he didn't know whether it would be offered by RCA, NTSC or both. He pointed out that RCA is cooperating with NTSC.

"Dual standards" -- FCC approval of both CBS and compatible systems -- are eminently satisfactory to Gen. Sarnoff. In fact, he prefers them to substitution of compatible system for CBS's. "Let the public choose," he said.

Compatible color theatre TV will be demonstrated before year's end, he disclosed, saying that it's compatible with existing theatre TV equipment.

* * * *

NTSC is avoiding expression "color standards" for present, says it's seeking to set up "provisional specifications for field testing." Says Chairman Baker:

"When we've field-tested it to everyone's satisfaction, then we can talk about 'color standards.' We're making better time than I thought we would."

NTSC met Aug. 15, hashed over Panel 13 recommendations (Vol. 7:32), sent slightly revised version back to panel for approval. Everyone anticipates final agreement, preliminary to field tests, at Sept. 18 New York meeting.

Among specifications to be field tested, it's expected following will be included: 3.89-mc color carrier, oscillating color sequence, constant luminance.

Dr. Baker was heartened by Commission's attitude in sending 4 engineering observers to NTSC demonstration last week (Vol. 7:32). He says Chairman Coy has also promised observers for field tests.

Target date of Jan. 1, for presenting completed standards to FCC, is still a good one, Dr. Baker believes.

AT FCC—COOPERATION & SWEET REASON: At the moment, things appear calm at FCC, with time and good faith on part of both Commission and industry beginning to heal even the color-decision wounds, particularly those caused by the clumsy bracket-standards meat-ax (Vol. 6:35 et seq).

Maybe it's true peace. May it's mere armed truce while FCC and industry pursue urgent common goal -- the too-long-delayed expansion of TV. There's no question that "end-the-freeze" is by far most important factor conducing to cooperation.

It also stems partly from new key staff, whose attitude appears to be less Big Government, less punitive, than that which seemed to motivate some earlier authorities. Possibly it's also due to sober fact that cat-&-mouse tactics have produced no public-interest results. But you can't tell about the Commission.

"Don't get any idea we're just working for your industry," said one commissioner, who nevertheless agreed the FCC atmosphere is now clearer. "We have always tried to work for the public interest, and we're not going to be run by anybody." This member deplored the ruckus over color TV, probably the most bitterly controversial issue in all the history of radio regulation.

He thinks color case was greatly overemphasized, though admits its economic impact was greater than anticipated. He regrets issue went to court, though does not blame the principals. He feels "open door policy" respecting any new and better system than the one chosen is all the industry has right to expect. Decision, he believes, was "the right one on the record." But so far as he's concerned, "open door" means just that -- and he will gladly welcome anything that proves superior.

* * * *

Fact is that FCC is now keenly concerned with getting things done in TV. Some members are really disturbed by delays caused by color squabble, which accounts for at least one of the 3 years of TV freeze. Now we see these salutary moves:

(1) Streamlining of end-of-freeze procedures, through "paper" hearings (Vol. 7:30) solicited by FCC and assented to by industry.

(2) Lifting of TV station powers to enable them to give better and wider service (Vol. 7:30 et seq). Everybody gains, nobody loses, by this belated move.

(3) Sending of FCC's 4 top technicians to view advance tests of compatible color system being developed under all-industry auspices (NTSC). That, too, is all to the good, presages formal reopening of color case on more objective, less emotional, even friendlier basis. Meanwhile, commissioners can't hide their curiosity about great new developments reported (Vol. 7:31 et seq) -- and no less a critic than Comr. Jones frankly says he's intensely interested in seeing them.

(When history of color imbroglio is written, Jones' pressure upon industry, though sometimes harsh and acrimonious, will undoubtedly be credited with giving country color TV, whichever system, ahead of time it would otherwise have emerged.)

(4) Traveling of commissioners to Bridgeport to inspect uhf progress. They unstintingly give industry pat on the back for it (Vol. 7:25-26).

(5) Encouraging rather than clubbing industry into coming up with answers to admittedly acute oscillator radiation problem (Vol. 7:4,11,20,23).

(6) Withholding of force on TV programming problems, giving industry reasonable time to clean its own new and still-cluttered house -- task now well in hands of NARTB-TV committee (Vol. 7:16 et seq).

* * * *

Another development that has telecasters as well as broadcasters feeling well-disposed: FCC counsel has written opinion saying it hasn't authority, as condition of license, to fix percentage of broadcast time to be devoted to educational programs. Opinion says FCC "will not prescribe any fixed quantitative program standards for non-specialized broadcast stations."

True, a majority gave nod to Comr. Hennock's channels-for-education scheme, but some members think few if any institutions can get wherewithal to build, let alone operate, such inevitably expensive projects on non-commercial basis. Comr. Hennock right now maintains discreet and -- for her -- unusual silence pending action on her Federal judgeship, still bottled up in Senate committee (see p. 10).

Chairman Coy returned from vacation this week, still under doctor's orders. It won't be surprising if health forces him to quit before year ends. He's had handsome offers, most prior to his June reappointment. He's represented as feeling the reappointment vindicated his administration. Now that he has machinery set up for ending freeze, he could resign knowing groundwork is laid for orderly buildup of the TV structure. But he isn't saying anything about his plans, if he has any.

TEMPORARY power increases, permitted under recent FCC order (Vol. 7:30-32), have been granted 42 stations. Following table, prepared from FCC sources, shows old and new effective radiated powers (ERP). Your copy of our *TV Factbook No. 13* may be brought up to date by entering new ERPs. Powers are for visual ERP, expressed in kilowatts.

Station & City	Old ERP	New ERP
WBRC-TV, Birmingham	12.2	15
KNBH, Los Angeles	15	25.2
KPIX, San Francisco	29.9	30.5
KFMB-TV, San Diego	20	27.4
WDEL-TV, Wilmington	.476	.680

WSAZ-TV, Huntington	12	16.7

* Temporarily reduced to 14.5 kw and antenna rephased to fill in nulls. ** Aural power only.

Prospects are good, NARTB reports, for TV's inclusion in Dept. of Commerce's essential industries list. Association executives headed by president Harold Fellows appeared Aug. 15 before technical subcommittee of govt.'s inter-agency Committee on Essential Activities & Critical Occupations, made such good case that they felt able to report "it looks hopeful both radio and TV soon will be listed." Industry spokesmen emphasized that TV-radio stations operate with few manpower reserves in most cases, might be unable to meet "minimum civilian requirements" in sudden emergencies. NARTB engineering chief Neal McNaughten said stations throughout country are now asking for operator relief at rate of about one a day, because so many engineers are being called up as reservists. NARTB case was bolstered by Civil Service Commission's Richard E. Scneder, who testified Commission regarded TV-radio as essential to its activities.

Two more hot boxing matches were snagged by Theatre Network TV Inc. (Nathan Halpern)—Ray Robinson-Randy Turpin return middleweight match Sept. 12 and Willie Pep-Sandy Sadler featherweight title event Sept. 26, both from New York Polo Grounds. Some 20 theatres are due to be tied in for latter, including for first time houses in St. Louis, Detroit, Minneapolis. Reportedly, Pabst tried to get Robinson-Turpin match for home-TV sponsorship, but was deterred by cost and dangers of rain causing postponement. Pabst does have Aug. 22 Joey Maxim-Bob Murphy light-heavyweight and Aug. 29 Kid Gavilan-Billy Graham welterweight matches set for CBS, both TV & radio.

RADIO and TV station construction may be authorized by NPA (Vol. 7:32), but new outlets in well-served markets will be particularly hard to justify if they ask for large amounts of scarce materials—meaning, mainly, structural steel. First station in new market will have easier time of it, but you can expect NPA to ask whether every materials-saving alternative has been exhausted—use of existing towers, etc.

That's sizeup by top mobilization officials as NPA this week set up 4 priorities for various kinds of construction to be alloted controlled materials during fourth quarter. TV-radio falls in lowest group, along with office buildings, stores, service facilities, etc.

"Very rough fourth and first quarters," is way it's put. But since few if any TV stations will be authorized by FCC before end of first 1952 quarter, it's latter 1952 that really counts.

"Situation could ease somewhat then," said one official, "depending upon whether or not Congress appropriates a lot of money for heavy military construction."

Atlanta's new TV outlet, authorized by FCC last week when it approved sale of WSB-TV facilities to local group while WSB-TV takes over facilities of CP holder WCON-TV (Vol. 7:32), may be stymied by court action—counsel for Georgia Tech's WGST, Atlanta, petitioning FCC this week to stay and reconsider grants. Wording of petition makes it apparent WGST counsel Paul Porter, onetime FCC chairman, is laying groundwork for appeal and request for court order staying Commission's decision. Present plans of new owners are to take over Channel 8 facilities of WSB-TV from *Atlanta Journal* Sept. 30, assuming WCON-TV's Channel 2 and the 1063-ft. tower built for WCON-TV. Now operating experimentally, plant requires more work before Cox newspaper interests can put it into full commercial operation, when it would become nation's 108th TV outlet.

Two more requests for power boosts, under recent FCC ruling (Vol. 7:30-32), arrived at FCC this week from KPIX, San Francisco, and WLAV-TV, Grand Rapids. Former has already been granted, bringing number of station hikes to 42. All stations are beating drums about increases, generally in proportion to amount of increase. For example, Pulse survey for New York's WJZ-TV showed 90% of fringe viewers reporting improved reception from station's 5½-times power hike and move to permanent Empire State Bldg. antenna. Survey found 77% of viewers reporting "good" or "excellent" reception after boost, compared with 28% previously.

Three applications for new vhf stations, one for uhf, were filed with FCC this week, bringing total pending to 432. The vhf applicants: Cowles newspaper interests *(Minneapolis Star* and *Tribune)*, seeking Channel 9; KFDM, Beaumont, Tex., Channel 6; KHMO, Hannibal, Mo. (Lee Newspapers' *Courier-Post)*, Channel 7. UHF Channel 39 is sought by Steinman interests for Allentown, Pa.; they own WEST, in nearby Easton, various other AM stations, plus WGAL-TV & WDEL-TV. [For further details about these applications, see *TV Addenda 13-F* herewith; for listings of all pending applications, see *TV Factbook No. 13* and Addenda to date.]

Elliott Roosevelt, onetime Hearst Radio executive, now with interests in Marathon, on the Florida keys, heads Miami-TV Inc., new corporation formed to apply for new TV station in Miami. He's associated with ex-Gov. E. D. Rivers, of Georgia, who owns AM station WGAF, Valdosta, Ga. Miami now has one station (WTVJ) and 6 applicants already have filed for its proposed allocation of total of 4 vhf channels (see *TV Factbook No. 13).*

Personal Notes: Joseph H. McConnell, NBC president, and Mrs. McConnell, with Mr. & Mrs. R. S. Reynolds Jr. going to Europe for recordings on Sept. 16 (and broadcasts via BBC) of Talullah Bankhead's 90-min. *Big Show*, for which she's taking entire troupe. Shows are to be carried on NBC (AM) under Reynolds Metals Co. sponsorship Sept. 30 & Oct. 7. NBC program v.p. Charles C. Barry and Williams F. Brooks, with ex-v.p. John Royal, going to Europe in advance to make arrangements . . . Robert Saudek, ABC v.p., Sept. 6 joins Ford Foundation's new TV-Radio Workshop (Vol. 7:32) as director, with offices at 655 Madison Ave., N. Y.; his duties as director of public affairs, research, advertising & promotion taken over by John W. Pacey, acting, with Art Donegan acting mgr. of publicity dept. . . . Merle S. Jones, newly named CBS-TV v.p in charge of stations & general services, arrived in New York Aug. 13 to assume duties, but for awhile he'll commute between New York and Los Angeles while winding up duties as gen. mgr. of CBS's KTSL & KNX and the CBS Pacific Network . . . Lorin S. Myers, ex-NBC-TV, joins CBS-TV Aug. 20 as market research counsel . . . E. Carlton Winckler, ex-ABC-TV, Hollywood, Aug. 20 becomes gen. mgr., CBS-TV program dept. . . . Karl R. Sutphin, ex-ABC, joins BBDO as TV-radio account executive for Libby's frozen foods div. . . . Norman S. Livingston resigns as WOR-TV commercial program director to become v.p., Roy S. Durstine Inc. . . . John Pival promoted to mgr., WXYZ-TV, Detroit, Peter Strand taking over as program mgr., according to James G. Riddell, president . . . George Cranston, mgr. of WBAP & WBAP-TV, Ft. Worth, sailed Aug. 17 for European vacation, during which he and Mrs. Cranston will visit their son Maj. Robert Cranston, attached to Gen. Eisenhower's staff . . . Richard S. Jackson, ex-WAVE-TV, Louisville, appointed asst. TV-radio director, J. M. Mathes Inc. . . . Jack Holmes, ex-Ziv TV, joins James McBride Adv. Agency, Fort Worth, now known as McBride & Holmes Adv. . . . Steve Beard, ex-Tracy-Locke, Dallas, joins John Blair Co. Dallas office . . . H. Douglas Johnson appointed v.p.-mgr. of WAGE, Syracuse, succeeding William T. Lane, appointed mgr. of new WCON-TV, Atlanta (Vol. 7:32) . . . Raymond Lewis, chief investigator, FCC Hearing Div., with Commission since 1940, joins Wage Stabilization Board's industrial relations div. as supervisor.

Network Accounts: Philip Morris starts *I Love Lucy* with Lucille Ball and Desi Arnaz Oct. 15 on CBS-TV, Mon. 9-9:30, thru Biow . . . Procter & Gamble (Joy, Lilt, Spic & Span) sponsor *Search for Tomorrow* on CBS-TV, Mon.-Fri. 12:30-12:45 starting Sept. 3, thru Biow . . . American Home Products Sept. 24 starts *Love of Life* on CBS-TV, Mon.-Fri. 12:15-12:30 . . . General Foods (Jell-O) Aug. 26 starts Jackie Kelk as *Young Mr. Bobbin* on NBC-TV, Sun. 7:30-8, thru Young & Rubicam . . . Hollywood Candy Co. (candy) sponsors *Hollywood Junior Circus* starting Sept. 8 on ABC-TV, alt. Sat. 10:30-11 a.m., thru Ruthrauff & Ryan . . . International Shoe Co. (Red Goose shoes) starts *Kids & Co.* Sept. 1 on DuMont, Sat. 11-11:30 a.m., thru Westheimer & Block, St. Louis . . . Bigelow-Sanford Carpet Co. (carpets & rugs) starts series of films Sept. 6 on DuMont, Thu. 10-11, thru Young & Rubicam . . . *Kukla, Fran & Ollie* returns Aug. 27 to NBC-TV, Mon.-Fri. 7-7:30, with RCA sponsoring Mon. segment, Procter & Gamble (Tide, Camay, Drene) Tue. & Fri., National Biscuit Co. Wed., Life Magazine Thu. . . . Schick Inc.'s anti-crime show with Rudolph Halley changes starting date from Sept. 4 to Sept. 18 on CBS-TV, Tue. 9-9:30; *Gangbuster* title dropped . . . Lucky Strike brings *Your Hit Parade* back Sept. 8 to NBC-TV, Sat. 10:30-11, thru BBD&O . . . Lever Bros. (Lux soap) resumes *Lux Video Theatre* Aug. 27 on CBS-TV, Mon. 8-8:30 . . . Kaiser-Frazer Sales Corp. (Kaiser, Frazer, Henry J) resumes *Adventures of Ellery Queen* Sept. 13 on DuMont, Thu. 9-9:30, thru Wm. Weintraub . . . General Cigar Co. (Robert Burns, White Owl, etc.) reported readying sponsorship of sports feature on CBS-TV, Wed. for 15 min. following fights.

Station Accounts: Though it has no stores in Pittsburgh, S. A. Meyer jewelry chain, largest jewelry firm in western Pennsylvania, has purchased studio variety show *Mr. & Mrs. Melody* on WDTV, Mon. 3:15-3:30, thru Friedman & Riech, Pittsburgh . . . Strauss Stores, big New York automotive goods chain, sponsoring wrestling on WABD Sat. nights, with Car-Hop Inc. (auto accessories), Susquehanna Mills (plastic seat covers) and Simoniz (wax) as cooperating sponsors, placed thru Products Service Inc., N. Y. . . . New York's WPIX, hiking "A" time from $1200 to $1500 an hour Sept. 15, "B" time from $900 to $1125, advertised in N. Y. newspapers this week with impressive list of 45 local advertisers & agencies, plus spots carried for theatres showing Columbia Picture's *Born Yesterday*, RKO's *Hard, Fast & Beautiful* and *The Thing*, MGM's *Kim* . . . Continental Oil Co. (Conoco), after hiatus of 15 years from radio, got such good sales from TV & radio spots plugging new motor oil that it has increased TV spot campaign to 6-a-week on 20 stations year round ($200,000 budget), radio to 4-a-day on 95 stations ($400,000), thru Detroit office, Geyer, Newell & Ganger. So reports Aug. 13 *Sponsor Magazine* in success story titled "Conoco Hits a Gusher" . . . Parents Institute *(Parents Magazine)*, to promote *Compact*, new magazine for teen-age girls, plans to use TV . . . Fifth Army recruiting, planning TV-radio, has shifted account to Fuller & Smith & Ross, Chicago . . . Toni Co. including TV in big plans for promotion of new home permanent wave called "Prom," thru Foote, Cone & Belding, Chicago . . . W. A. Sheaffer Pen Co. offering dealers series of 16 slides on 35mm for 20-second spots to be placed locally . . . Jacob Ruppert Brewery takes sponsorship of Allen Funt's *Candid Camera* on WJZ-TV Aug. 27, Mon.-Wed.-Fri. 7:15-7:30 . . . Mell O. Haldeman Corp., distributor of A. O. Smith water heaters, Aug. 31 begins *Tom Harmon's Sports News* on KTSL, Los Angeles, Fri. 7:35-7:40, thru Byron H. Brown & Staff, Los Angeles . . . Harvey Lumber Co.'s *Dr. Fixum's Household Hospital* on WENR-TV, Chicago, being filmed by Vogue Wright Studios for syndication . . . Local Ford dealers sponsoring 11 Sunday films of U of Kentucky grid games on WHAS-TV, Louisville, thru J. Walter Thompson, Cincinnati . . . Among other advertisers reported using or preparing to use TV: Citation Hat Co. (hats), thru Jones Frankel Co., Chicago; Champion Spark Plug Co. (spark plugs), thru J. Walter Thompson, N. Y.; Son-Chief Electrics Inc. (toasters, grills & heaters), thru H. B. Humphrey, Alley & Richards, N. Y.; Wilson & Co. (B-V meat extract), thru Ewell & Thurber Associates, Chicago; Larsen Co. (Veg-All mixed vegetables), thru Campbell-Mithun Inc., Chicago.

CBS-TV distributing 55-p. booklet titled *Five Big Reasons for Getting Into Daytime Television—Now!* Reasons stated: keep ahead of competition, messages to large housewife audiences, low cost-per-thousand, proven impact of daytime TV, obtain valuable daytime period. Pertinent points made in CBS-TV presentation: that 64 (of the 107) stations by fall will be on program schedules beginning by 10 a.m., 99 by noon; that average percentage of TVs tuned in 1-5 p.m. has doubled in last year—from 8.3% to 15.6%; that 39% of viewers watch TV sometime between 9 a.m. & 5 p.m.; that women watch daytime TV average of 2 hours, 52 minutes a day; that big sponsors are buying daytime TV more and more (21 now, whereas in June 1950 there was only one such sponsor), with Procter & Gamble alone buying 22 daytime quarter-hours weekly.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
August 18, 1951

RCA CUTS LISTS ON 9 MODELS $30-$115: In drastic move to unload inventory, RCA Victor as of Sept. 1 reduces list prices of all 9 models in present line -- cuts ranging from $30 to $115. On or about Aug. 27, it will announce to trade 10 new "super-sets" at lists of $225 to $495. Big advertising and promotion campaign breaks Sept. 16 with 2100-line newspaper ads in every major market, similar space Sept. 24 & Oct. 1. Reduced prices also will be featured in Sept. 24 Life and big splurges on TV-radio.

"Market stimulation plan" is what company calls new merchandising program, to run "for a limited time only". "The dealers can look forward to rapid profitable sales of RCA Victor's current receivers as long as they last, and when new models are introduced they will be sold at normal margins," said v.p. Joseph B. Elliott.

Models reduced are 14-in. table Bentley (4T101), from $219.95 to $179.95; 17-in. table Newport (7T103), from $269.95 to $239.95; 17-in. table ensemble Kent (7T104), from $299.95 to $259.95; 17-in. console Highland (7T112), from $359.50 to $289.95; 17-in. console Fairfield (7T122), from $389.50 to $299.95; 17-in. console Regency (7T123), from $415 to $329.95; 17-in. combination Winston (7T132), from $495 to $395; 19-in. table ensemble York (9T105), from $419.45 to $339.95; 19-in. console Hillsdale (9T126), from $475 to $359.95.

Trade circles say RCA is merely formalizing reductions already being offered by dealers without authorization in their eager efforts to unload -- but big promotion's impact on market as whole will be watched carefully. RCA calls it "move to revitalize the TV market and achieve maximum customer traffic."

NO BUYING SURGE YET—BUT HOPES HIGH: Chief characteristics of new "1952 models" now being introduced by the manufacturers, even in face of still-heavy inventories, are that (1) they're generally priced downward; (2) they're nearly all adaptable to uhf as and when such stations materialize, good year or more hence; (3) some are suitable for color "slave" attachments, with adapters available to get black-&-white from color transmissions; (4) they're otherwise little different from this year's earlier models -- in some cases actually the same, with a bit of "face-lifting".

Caution is the main tendency among makers and sellers as the autumn season approaches, with its promise of improved demand. No great surge of output has begun yet, nor has any buying rush developed. But better retailing days are being reported -- and the signs all point to a "return to normalcy" after Labor Day.

Even more than easier credit terms, the upcoming new program offerings of the networks -- big-name shows plus some football plus World Series in October plus telecasts from Hollywood after Nov. 1 -- are expected to provide prime stimulus to revival of set buying. "Saturation" is still far away in most TV areas.

* * * *

It's much too early to report positively about any trend in a trade whose plunge from a sellers' to buyers' market caught nearly all by surprise when it began last March. But prevailing feeling among manufacturers and distributors is one of high optimism. Some retailers, too, share this feeling. Sales have picked up in last few weeks -- portending good possibility that supply and demand may be brought into balance by traditional autumn peak season.

Crosley's W.A. Blees, an old marketing hand, schooled in the ups and downs of pioneer automotive sales, diagnoses the factors making for upswing in appliance and TV sales after Labor Day thus:

(1) Heavy "scare" buying during 6 months after outbreak of Korean War, inactivity that followed, were "like a person who has eaten a heavy meal and must digest it before becoming hungry again." Blees thinks public has digested heavy volume of "scare" purchases and is now ready to resume buying.

(2) International and domestic crises have left public "very tired" -- too weary to plan, budget, shop for durable goods wanted and needed. Public now takes

these crises in stride, is "recuperating from its emotional fatigue" and "there is developing a generally healthier atmosphere in which industrial and merchandising activities necessary to a sound civilian economy can be carried on."

(3) "More practical consumer credit controls...should accelerate increased buying trend this fall. "We are, in fact, already noticing the salutary effects..."

(4) Aggressive new selling, advertising and promotional drives this fall will stimulate sales.

* * * *

Olympic's Percy L. Schoenen says retail sales have already improved so much that consumer demand now exceeds factory production -- probably true, in light of hugely curtailed production (see latest figures below). He thinks total TV output may go as high as 2,000,000 sets in third and fourth quarters, making 5,300,000 for year as against the 7,500,000 of 1950.

But he's probably high, considering that only about 200,000 sets were made during first 6 weeks of this second half, and there's still plenty of inventory. Also, there's now inescapable fact certain basic materials are definitely limited.

RCA consumer products v.p. Joseph B. Elliott sizes up market outlook thus: "With millions of people employed and billions of expendable dollars available, this country may be approaching the biggest retail season in its history. Economists say the sales potential is higher than ever before."

Only clouds on trade horizon seem to be (1) dumping of excessive inventories at distress prices; (2) possible effects of color promotion on prospective purchasers -- some in trade feel many will decide not to buy now but "wait for color," even though long wait is indicated in view of inevitably limited production.

* * * *

Production was still way down week ending Aug. 10 -- RTMA reporting only 43,359 units (2039 private label) compared to 51,219 week before (Vol. 7:32) and a far cry from the 175,000 turned out in comparable 1950 week (Vol. 6:36).

But factory inventories turned downward for first time since last March, though only slightly. Figure was 765,916 units as of Aug. 10, compared with 768,766 one week earlier. This is much too narrow margin to say it betokens trend -- yet.

Week's radios totaled 231,479 (113,970 private label), not much change from preceding week, and factory inventory went down to 362,643 from 394,223 (Vol. 7:32). Week's radios were: 112,830 home sets, 30,920 portables, 87,729 auto.

Trade Miscellany: Westinghouse TV-radio div. starts limited production Sept. 4 in new 400,000 sq. ft. plant near Metuchen, N. J., began hiring this week—takes on 50 first month, about 200 by end of year, mostly women assemblers to work on defense contracts; original plan to use plant to triple TV production postponed . . . Deltronic Corp., 9010 Ballanca St., Los Angeles, established as subsidiary of Signal Oil & Gas Co., for research, development and manufacture of electronic equipment and subcontract work; George Urey, ex-RCA, named gen. mgr., Leonard Larson sales mgr. . . . "Beam-Bender" passive relay, for re-directing 7000-mc microwave TV signals to points not within line of sight, is offered by Technicraft Laboratories, Thomaston, Conn. Device comprises parabolic antenna, is unpowered, contains no tubes . . . Diamond Power Specialty Co., Lancaster, O., has been licensed by IT&T to use Farnsworth dissector tube and other patents in manufacture of its "Utiliscope" system of industrial TV . . . Tele-tone reports $1,000,000 order for telephone-telegraph signal units for Army on subcontract from Kellogg Switchboard . . . One-day walkout of 225 TV tube assemblers in GE Syracuse works ended Aug. 15; they simply said they attended a union (UEW-CIO) meeting . . . GE tube div. has taken long-term lease on Garden State bus lines building in Clifton, N. J., its 50,000 sq. ft. to be used for warehousing tubes and parts handled out of Schenectady.

Trade Personals: Ross Siragusa, Admiral, off with 2 sons for several weeks of big game hunting in Alaska; he uses bow and arrows, no gun . . . RCA's Vladimir K. Zworykin called "the Tom Edison of TV" in "New York Close-Up" sketch in Aug. 17 *Herald Tribune* . . . Dr. Henry M. O'Bryan, since 1947 asst. executive secy., National Research & Development Board, appointed mgr., Sylvania physics lab, Bayside . . . Gardiner C. Greene, ex-president, Workshop Associates, Needham, Mass., appointed v.p. in charge of Gabriel Co.'s electronics divisions, including Workshop Associates and Ward Products Co., Cleveland, both recently acquired . . . Milton R. Neaman, ex-Soft-Lite Lens Co., Bay State Optical Co., Lansing Associates, Burroughs Optomat Inc., appointed senior attorney, newly formed CBS Laboratories Div. . . .Max Epstein, gen. mgr., elected v.p. & director of Royal Wood Products Mfg. Co., cabinet-making subsidiary of CBS-Columbia Inc., acquired in recent Hytron-Air King merger . . . Joseph H. Kerner, ex-TV Development Corp., joins Blonder-Tongue Labs, Mt. Vernon, as sales mgr. . . . Robert R. Parks named Sentinel sales mgr. under E. G. May, now holding title of director of sales . . . George R. Faustman named general factory mgr. Bendix Radio, succeeding Edward F. Kolar, named gen. mgr. of Bendix Red Bank div. . . . Samuel J. Brechner succeeds Charles Andress, resigned, as sales mgr., Admiral-New York . . . Arthur L. Rathburn named supt. of Hoffman Radio's 7 Los Angeles plants.

Topics & Trends of TV Trade: Production of automatic-focusing picture tubes (Vol. 7:20-21) is now under way in DuMont and GE plants. Former is making 17 & 20-in.; latter has started 17-in., plans 21-in. later, using both spherical and cylindrical face plates. New tubes use no focusing controls, coils, network resistors or mechanical focusers—thus save considerable amounts of scarce materials. Manufacturers stress easy substitution for old tubes.

GE isn't making much noise about it, but apparently has met considerable success in marketing its 24-in. picture tube, with quite a few manufacturers offering it in new sets. It's too early yet to discern public reaction to it as next step up from increasingly popular 20-in.

* * * *

Admiral showed its distributors, at Chicago meetings Aug. 17-18, additions to line starting with 14-in. plastic table at $160 and 17-in. plastic table at $200, both mahogany finish. The 20-in. tables (prices all rounded out) are $280 in walnut, $290 mahogany, $300 blonde; 20-in. open consoles $330, $340 & $360; 20-in. combinations $470, $500 & $520; 17-in. consolettes $260, $270 & $290; 17-in. combinations $380, $400 & $420.

Prices are scaled downward from previous comparable models, and Admiral offers "quick conversion" of any of its 2,000,000 sets now in use with uhf strip that can be fitted in matter of minutes "with a flick of the wrist." Also shown was a 10-in. color "slave" unit, unpriced, to be made available as and if there's demand "now or at any time in the future." When plugged into an Admiral set, adapter switch provides for (1) usual black-&-white, (2) CBS-type color in black-&-white, (3) reduction of size of picture for color.

Admiral's sales v.p. Richard Graver made it clear Admiral has not changed its attitude "against mechanical color," still thinks color should not have been authorized until compatible electronic system was perfected, expects latter in near future. Some dealers will get models of "slave" unit to deliver if demanded, but they're instructed to brief customers clearly on obsolescence factors.

Admiral line also includes clock radios at $30 in ebony, $33 mahogany, $35 ivory; radio-phono tables at $60 in ebony, $80 mahogany; console combinations at $170 walnut, $180 mahogany, $190 blonde.

* * * *

Crosley sticks to 17 & 20-in. sizes in the 21 new models it introduced, along with 5 freezers and 9 electric ranges, at Savoy-Plaza meeting in New York Aug. 14. No new radios were brought out, nor were any TV holdovers shown. All new TVs have plug-ins for color converters, or slave units, as and when available, and for uhf when ready—latter to be tunable with Crosley's own "Ultratuner" that can be attached by layman and will cost "under $50" (Vol. 7:15). Warranty on all is flat $10.

Crosley models now bear famous names in addition to conventional model numbers, line starting with 17-in. table at $249.95. Other 17-in. tables are (prices rounded out) *John Philip Sousa*, $280 mahogany & $290 blonde. The 17-in. consoles: *Walter Hampden*, modern, open-faced, $330 & $340; *Stephen Foster*, 18th Century traditional, half-doors, $370; *George Arliss*, same in modern, blonde, $390; *Sarah Bernhardt*, French Provincial, maple, half-doors, $390; latter 3 with radio-phono and pull-out drawer, $100 extra each; *Lillian Russell*, Regency, full doors, $400; *Jenny Lind*, same in modern blonde, $420; *Otis Skinner*, early American, mahogany, $575; same in maple $595.

Six 20-in. models, all consoles, are: *Mary Garden*, modern, $400 & $420; *David Garrick*, 18th Century, half doors, $450 & $470; *Enrico Caruso*, Georgian, full doors, with AM-FM-3 speed, $795.

Motorola's publicity, in introducing 16 new models at distributor meeting in Chicago's Hotel Stevens, stressed lowered prices ranging from $50 to $100 under similar sets in line shown last January. Self-contained plug-in unit for uhf, simply attachable to any Motorola set, will be offered at $49.95; built-in at factory, only the knob showing, it will cost $40. No new combinations were introduced.

Motorola also showed color "slave" unit, with 8½-in. tube magnified to 10-in., said it will be available if there's any demand. It was unpriced since no production schedules are set.

Line begins with 14-in. mahogany wood table model at $170, blonde $190 (figures rounded out). Three 17-in. table models include plastic at $200, mahogany $240, limed oak $260. Four 17-in. open consoles are $270 & $300 in mahogany, $290 & $320 in limed oak. The 17-in. consoles with doors are mahogany $330, oak $350, maple $350. Two 20-in. table models are $300 (attachable legs $10 extra), oak $330 (legs included.) Open-face console at top of line is $360, with doors $390.

* * * *

Philadelphia Electrical Assn. reports June TV unit sales in area at 5761, valued at $1,719,191 retail (average price $295), down 52% in units, 42% in value from June 1950. For first 6 months of year, unit sales were 103,186 valued at $35,051,456 (average $339) vs. 150,912 at $41,-259,511 ($273) same period last year. Total sales in all 1950 were 364,233 units; in 1949, 220,366; 1948, 82,606; up to Dec. 31, 1947, 18,672—total 789,063 to June 30, 1951. Report covers sales of 18 top brands in area.

County-by-county shipments of TV sets to dealers, reported monthly by RTMA, added up to 2,470,954 for 26 weeks ended June 29, as against first half's total production of 2,199,669 units (Vol. 7:17). June shipments were 160,308, down 74,000 from May. Copies of detailed report available from RTMA, Washington.

Sentinel sales chief Robert Parks says TV sales have picked up to "about halfway point toward a normal market," thinks sales will really get good about mid-September. Company's production is about 69% of same time last year, he said. New models are lower priced, 17-in. table at $260 comparing with $290 for predecessor, 17-in. console at $300 is $50 down, 20-in. console at $470 is $20 less.

RTMA chairman Robert C. Sprague has appointed Leslie E. Woods, Raytheon, chairman of industrial relations committee, Harvey Stephens, International Resistance, vice chairman; reappointed A. M. Freeman, RCA, chairman of tax committee; reappointed John B. Swan, Philco, chairman of traffic committee, W. L. Fogelson, Mallory, vice chairman.

Official fall market of American Furniture Mart, Chicago, set for Oct. 22-27, called off after poll of tenants.

———■———

"Psychological peacefare," as opposed to psychological warfare, was suggested by Brig. Gen. David Sarnoff, RCA chairman, in interview Aug. 15 following return from Europe—and he urged appropriations as high as $500,000,-000 if needed in order to get Voice of America's messages through the Iron Curtain. He suggested new govt. agency to handle Voice of America, patterned after British Ministry of Information, its head having Cabinet rank and having advice of nation's best minds. Voice is doing better job than before, he said, but it's mere wishful thinking to expect shortwaves to pierce barriers and combat Russia's jamming and propaganda. Since most Europeans listen regularly to standard stations, Gen. Sarnoff suggested European nations could contribute to effort by letting Voice use their local facilities as part repayment for economic aid we're giving them.

Mobilization Notes: "Take the electronics thing. My God! They are conceiving things that are just amazing, but awfully intricate to build."

Speaker was mobilization chief Charles Wilson, testifying secretly before House Appropriations Committee 2 weeks ago. His testimony released Aug. 16, and included therein was statement that production of electronic equipment has increased 300% in the last 6 months, and another 300% is expected in last half of this year. Electronic gear on some planes, he observed, was now costing more than the entire plane cost in the last war.

He said steel output is 7% better than year ago, will be 9% better in another year. Aluminum and copper shortages are serious, he said. Over-all military spending is now running at rate of $1.5 billion a month, will accelerate to $3 billion a month in a year—with $10 billion in orders placed during last 3 months, $49 billion now outstanding.

* * * *

A 60-day "breather" on certificates of necessity, which permit 5-year tax amortization, was called this week by Mobilization Director Charles Wilson. Said Wilson, in letter to DPA Administrator Manly Fleischmann asking moratorium to begin Aug. 18: "The extremely tight situation in the availability of critical materials, such as structural steel, makes it unlikely that new facility construction beyond that now planned can proceed for several months except for the most urgent projects." He asked for "minimum of exceptions."

Most recent list of certificates, covering Aug. 3-10, includes 3 electronics firms: GE, Bridgeport, electronic equipment, $131,700, of which 75% can be amortized over 5-year period; Transducer Corp., Boston, research & development, $11,376, and electronic equipment, $11,177, both 75%; Transformer Engineers, Pasadena, electronic equipment, $13,453, 75%. In addition, DPA authorized 2 emergency loans for electronics firms during July 27-Aug. 9 period: Varian Associates, San Carlos, Cal., $1,520,000 for expansion of research, development and production facilities; Lear Inc., Grand Rapids, $863,000 to buy machinery and retire debt.

* * * *

Slow rate of CMP applications for fourth-quarter allotment of raw materials puzzles NPA officials. Of anticipated 1200 from electronics industry, only 700 had been counted by week's end, though deadline was Aug. 15. According to H. J. Holbrook, chief of consumer durables division, many manufacturers don't seem to realize they're taking serious risks for next year if they don't get their requests in now, even if they think they're well fixed for fourth quarter.

To ease delivery problems of small users of steel, copper and aluminum, NPA amended Direction 3 to CMP Reg. 1, to permit manufacturers to hike from 35% to 50% amounts of the metals they can order for any single month. Order also permits users to order full carload of carbon steel at one time, even though they're allotted as little as one carload for whole quarter.

Whole NPA Electronics Div. moves Aug. 21 from 801 E St. NW. to Temporary Bldg. T, Constitution Ave. & 14th St., in Washington.

———■———

Automatic activator for sleet-melting elements on antennas has been developed by American Instrument Co., 8030 Georgia Ave., Silver Spring, Md. It has "sensing" unit which turns on heating elements during proper temperature-moisture conditions. Company says device is particularly useful for unattended relay stations which generally employ parabolic antennas.

Financial & Trade Notes: ABC's net income after taxes rose to $472,000, or 28¢ a share, first 6 months of 1951, continuing rise since recent report to stockholders that first quarter profits were $221,858 on sales of $14,560,345 (Vol. 7:26). Six-month profit, in fact, was slightly more than shown in all of 1948, when net was $468,488 on sales of $37,110,726. In 1949, ABC lost $519,085 on sales of $40,267,488; in 1950 it earned $84,605 on sales of $45,879,660.

ABC's first 6 months earnings compare with profit of $180,000 (11¢) for same 1950 period, loss of $46,141 for same 1949 period. Gross sales figure isn't announced, but for ABC's gross TV & radio time sales for the 6 months, see PIB figures, p. 16, Vol. 7:29.

* * * *

Philco sales rose to $171,023,000 during first 6 months of 1951, up 16% from the $147,012,000 of same 1950 period. But net income after taxes of $8,046,000 fell to $6,342,000, or $1.74 a share after preferred dividends, from $6,672,000 (after $5,378,000 taxes) or $1.84 per share for first half 1950. Second quarter sales were $57,499,000, net earnings $1,988,000 (53¢) vs. $67,525,000 sales and $2,598,000 ($1.49) earnings same quarter last year. During all 1950 (Vol. 7:12), Philco's sales were $335,318,000, up 56% from 1949's $214,884,000; earnings $15,484,000 ($4.50), up from 1949's $5,692,000 ($1.58).

Cornell-Dubilier reports sales of $26,202,998, net profit of $1,415,738 ($3.21 a share) first 6 months of 1951. This compares with $19,432,514 sales, $970,148 profit ($2.15) same 1950 period. During quarter ended June 30, sales were $8,981,505, profit after taxes $475,521 ($1.08) vs. $9,265,156 & $415,325 (94¢) same 1950 quarter.

Muntz TV Inc. reports net loss of $7282 for June 30 quarter, compared with $154,436 loss same quarter last year. For its fiscal year ending last March 31, Muntz reported profit of $749,852 (74¢ a share) on $27,147,846 sales (Vol. 7:26).

General Precision Equipment Corp. consolidated net income for quarter ended June 30 was $188,035 (30¢ a share) on $7,654,493 sales vs. $195,662 (33¢) on $6,779,814 for same 1950 quarter.

Webster-Chicago sales rose to $9,928,723 first 6 months of 1951 from $7,907,740 same 1950 period, but profit dropped to $409,944 (91¢ a share) from $618,038 ($1.37).

Oak Mfg. Corp, reports net income of $1,188,037 ($2.27 a share on 524,715 shares) for fiscal year ended May 31 vs. $1,179,334 ($2.62 on 450,524 shares) in preceding fiscal year.

Dividends: Philco, quarterly 94¾¢ on pfd. payable Oct. 1 to holders of record Sept. 15, and 40¢ on common payable Sept. 12 to holders Aug. 27; Cornell-Dubilier, quarterly $1.31¼ on pfd. payable Oct. 15 to holders of record Sept. 24, and 30¢ on common payable Sept. 25 to holders Aug. 28 (raised from former 20¢ quarterly); Webster-Chicago, 25¢ payable Sept. 20 to holders Sept. 10.

———■———

Weaker signals very near transmitter, a concomitant of extremely tall antennas with high gain, are being boosted by antenna phasing techniques which direct more radiation towards antenna base. WNBT, New York, is latest to try it. Allowed 18.3 kw ERP at Empire State Bldg., it was granted STA to beam more energy downward, reducing over-all ERP to 14.5 kw. KECA-TV and KTTV, Los Angeles, have used technique, and others plan to try it.

Note on progress-under-Socialism: London reports say National Radio Show, Aug. 29-Sept. 8, will bring forth fewer 9 & 10-in. TVs, with 12-in. becoming "standard" and some 15 & 16-in. emerging.

Telecasting Notes: Changes in the Mexican border vhf channel allocations, both sides, will be made soon—result of tentative agreements reached with Mexico's director-general of communications Miguel Pereyra while in Washington last week (Vol. 7:32); for presently proposed allocations, see pp. 59-60, *TV Factbook No. 13* . . . CBS plans to affiliate XELD-TV, new Mexican station in Matamoros, opposite Brownsville, Tex. (Vol. 7:31-32), has asked FCC whether there's any objection to sending it kines, films, etc. CBS believes FCC approval unnecessary, but wants to make sure. If Commission follows AM precedent, it should have no objection . . . Blair TV Inc. named national rep for XELD-TV, reports test patterns start Aug. 24, commercial operation Sept. 1 . . . Buenos Aires' first TV station, Radio Belgrano (Vol. 7:21, 25), should be on air mid-October, according to engineers of Federal, which supplied equipment. Channel 7 outlet will have elaborate setup with many studios, 2 sets of remote equipment, etc., radiating 40-45 kw from 5-kw transmitter and 8-gain antenna . . . FCC Comr. Webster, in Aug. 13 talk to Miami Lions Club, urged that all local organizations "lobby" for better TV programs, participate in round-table discussions, etc., but he suggested they also be patient in requests of stations because of limited time availabilities—particularly since so few stations are on air . . . Sarkes Tarzian's WTTV, Bloomington, Ind., whose AM counterpart is 5-kw WTTS, has absorbed another AM local—250-w WTOM. Last year it took over 1-kw WSUA. He now has the only AM in town (pop. 28,000) . . . Screen Gems Inc., subsidiary of Columbia Pictures, producing series of *TV Disc Jockey Toons*, 16mm films, to be offered stations for use while big-name records of the top makers are played; ex-TBA secretary Will Baltin going on tour of stations to introduce item . . . CBS-TV plans video version of Fred Friendly-Edward R. Murrow *Hear It Now* program, to be titled *See It Now;* radio version to be dropped, and high-budget show (about $25,000 a week) will be offered for sponsorship . . . Kine-recordings of *Trial of John Peter Zenger*, recently performed on Westinghouse's *Studio One* (CBS-TV), are being shown at several publishers' association meetings next month courtesy of sponsor and network . . . WDSU-TV, New Orleans, to telecast all Tulane grid games on films Mon. nights after games, all LSU games Tue. nights, sponsored by D. H. Holmes Co. . . . Senate crime committee (Kefauver) resumed hearings in Washington without TV—too costly to clear time—but radio carried it, notably via recorded highlights late evenings.

———■———

Betting big money on uhf, Humboldt Grieg's little WHUM, 250-watt AM in Reading, Pa., plans to spend $590,000 on 200-kw experimental station for which it applied this week. It lists $125,000 for 12-kw 716-722 mc GE transmitter, $125,000 for 1050-ft. tower (engineered by A. Earl Cullum Jr.), $40,000 for building, $200,000 for other equipment, including 4-bay helical antenna, aluminum wave-guide transmission line. Station says GE guarantees transmitter delivery in March. It hopes to broadcast CBS color, too, though CBS says it can't assure availability of programs because of other possible affiliations, talent contracts, etc. Philco, GE and CBS have told station they'll be glad to make propagation and receiver tests. Use of wave-guide is particularly interesting, since ordinary lines greatly reduce uhf signals in long runs.

Hearing on Comr. Frieda Hennock's appointment to New York Federal judgeship (Vol. 7:24-26, 31) has finally been set by Senate Judiciary Committee, for 10 a.m., Sat., Aug. 25. Committee doesn't list witnesses, but she is being opposed by American Bar Assn., Assn. of the Bar of the City of New York, New York County Lawyers Assn., who presumably will send representatives.

STATE DEPT. took diplomatic notice of projected opening of new transcontinental microwave circuits (Vol. 7:32)—and asked AT&T to advance timing of first coast-to-coast TV hookup so as to permit telecasts of Sept. 4-8 sessions of Japanese treaty conference in San Francisco.

AT&T agreed, as did the 4 networks which will carry event, with President Truman speaking Sept. 4 at 10:30 p.m. EDT. Since TV circuits are still on experimental basis, networks won't have to pay usual line charges.

Sept. 30 was date originally set for TV opening, and then only the single East-to-West circuit. West-to-East circuit was to have been opened about month later. Sept. 4-8 pickup from San Francisco is special event, probably won't change previous plans for opening of regular TV service. But it does mean a great historic event will mark first transcontinental TV hookup, and it will give American people opportunity to look in again on Soviet tactics.

Plans for Sept. 30 big-name show to be sponsored by AT&T on combined 4 networks have been deferred. Four-network show, possibly sponsored by AT&T, has instead been scheduled for Nov. 14, which means it can then consist of two-way pickups.

———■———

Only Pacific Coast TV city not hooking up with new transcontinental microwave relay service that starts Sept. 30 (Vol. 7:31-32) is Seattle—and there's no prospect for live network service for its KING-TV for some time. Pacific Telephone & Telegraph Co. advises us the coaxial from Sacramento extends only as far as Portland as yet, and microwave relay is now being engineered from Portland to Seattle, both for phone service. "We do, however, contemplate the possibility of future demands upon these facilities for TV use," writes R. C. Smith, PT&T editor. "After the radio relay system is installed, and if and when such demand develops, the radio relay system could be modified to provide TV transmission to Seattle."

Wolfberg theatre chain in Denver has ambitious plans to tap upcoming new transcontinental microwave relays (Vol. 7:32) in order to show telecasts on screens of its theatres in TV-less Denver. But there are hitches which preclude putting idea into effect for awhile, says AT&T, which reports it can't be done by Sept. 30 when East-West network service opens up, nor by November when two-way circuits are available. Manager John Wolfberg is reported to have spent $33,000 on the theater-TV equipment already.

DuMont filed 10 days before deadline for its comments in TV allocations "paper" hearing (Vol. 7:30), reiterated that its nation-wide allocation plan would provide more service to more people than FCC's. It points out, for example, that it would supply 53 cities (49% of population) with 4 TV stations, whereas FCC plan would give 4 to 21 cities (32% of population). DuMont shows same general comparison true for 3-station markets, 2-station, etc., whether it's vhf or uhf. Reason DuMont achieves more stations is that it spaces them near 180-mile minimum proposed by FCC, whereas Commission's average spacing is 220 miles or more. So far, FCC has clung to position that closer spacing penalizes rural viewers. DuMont maintains FCC plan would foster network monopolies, freezing out third and fourth networks from many major markets.

Sen. Benton (D-Conn.) has amended his educational TV bills (S. 1579, S. J. Res. 76) to eliminate request for retention of freeze while Senate studies question (Vol. 7:15, 20, 21-22). He still wants legislation establishing 11-man National Citizens Advisory Board to advise FCC and Congress on programming, but which would not "conflict in any way" with FCC's statutory duties. Joining Sen. Benton on bills were Senators Hunt (D-Wyo.), Bricker (D-O.), Saltonstall (R-Mass.).

NOTE: This reprint from Aug. 5 *St. Louis Post-Dispatch*, is such a fine example of a TV station's cooperation with local dealers and distributors toward helping them move inventory, and at same time such good station promotion, that the Editors of *Television Digest* deemed it worth reproduction—and possibly worthy of emulation in other areas.

NAB LIBRARY

300,000

Now there are more than THREE HUNDRED THOUSAND homes and public places throughout the KSD-TV area with television receivers.

Now more than half the homes in this area are equipped with "front row seats" for a complete variety of entertainment features, starring the most famous names in show business.

Now more than 52% of the families in this area are experiencing across-the-table intimacy with the most notable personages of our time.

At this time last year there were only 150,000 television homes in the KSD-TV area--and TWO years ago there were only 33.000. The number of television homes in this area has DOUBLED during the past twelve months—increased nine-fold during the past 24 months.

This remarkable acceptance clearly reflects television's consistent and unprecedented impact as a source of entertainment, information and public service.

Many television dealers throughout the KSD-TV area are offering especially attractive values to purchasers of new television receivers, so that tens of thousands MORE families in this area may enjoy the thrills and advantages of having television in their OWN homes.

If You Do Not Yet Have a Television Set,

Text of Important Address on 'Electronics Production for Defense' Published as Special Report Herewith

MULTI-MILLIONS IN STATION EQUIPMENT: Anticipating freeze-end, TV station equipment manufacturers are well ahead of Washington in contemplating delivery of transmitters (both vhf & uhf) and associated gear. Their stake is high -- tens of millions of dollars worth of initial installations will be sold within few years after thaw.

Manufacturers have already poured millions into development programs and production facilities, with result that quick-delivery outlook is "rosy," to quote one leading sales representative. But while all equipment makers say the materials situation "isn't bad right now" -- and NPA officials agree -- there's belief things will get much tighter starting first quarter next year.

That's about when freeze can be formally lifted, and first non-competitive applications granted -- and it's apparent, from our canvass of the manufacturers, that initial grantees can expect reasonably quick deliveries. Demand, according to all makers, is "simply incredible." Two offhandedly reported sales of 3-4 stations each only last week -- all say inquiries are pouring in, particularly about uhf.

Best estimate is that 35-40 complete transmitters have been built since freeze was imposed Sept. 30, 1948. Some have actually been delivered to non-grantees, others set aside for firm purchasers. Several have gone into export -- Latin America, mainly -- and most are contingent on FCC grants.

By mid-1952, some 60 complete transmitters should have been turned out; by end of 1952, possibly 100 stations, vhf & uhf, could be supplied. That's best composite information from the makers.

* * * *

It's a nice piece of business -- very nice -- that awaits the manufacturers of station equipment, to say nothing about prospects for soaring TV set markets as soon as new stations get going. Hence the zeal of the equipment makers, leaders among whom also sell receivers, isn't hard to understand.

Added impetus for transmitter development and production came this spring when FCC's end-of-the-freeze plan (see our TV Allocation Report, March 24) proposed stations of 100 & 200 kw power, compared with previous 50-kw maximum. At same time, the uhf bogey was emphatically scotched (Vol. 7:15 et seq).

A bit of arithmetic tells why equipment business is so attractive. Assuming today's prices, average station will cost $150,000-$200,000 in electronic gear alone -- forgetting land, buildings, towers, labor, etc.

If as many as 100 stations are authorized shortly after freeze is lifted, that will mean up to $20,000,000. If 1500 stations are built in next 5 years (FCC Chairman Coy's guess, Vol. 7:29), that means up to $300,000,000.

Coy looks for 3000 stations ultimately -- so market potential, for initial installations alone, may be more than half a billion dollars!

Then there's bonus market in foreign sales, at which only the British have thus far loomed as competitor -- making a few desultory stabs.

Copyright 1951 by Radio News Bureau

AUG 28 1951

Nor should supplementary and replacement equipment be overlooked. The cost of towers, real estate, labor, etc. may well add up to multi-billion business.

Even if Coy proves over-optimistic by a substantial margin, even if prices continue to drop (5-kw transmitters went from $90,000 to $65,000 in last few years) -- the relatively few manufacturers have enormous kitty to split. New manufacturers of the basic transmitter-antenna equipment aren't likely to spring up overnight.

* * * *

Competition is already rough among the few now in the business, though as yet nothing like the dog-eat-dog rivalry of the 90-odd receiver makers.

Today, 4 companies -- DuMont, Federal, GE and RCA -- have the field pretty much to themselves. There may be others later and quite a number are carving, or intend to carve, a slice of the lighter equipment business -- camera & film chains, microwave gear, industrial TV, etc. Among these are General Precision Laboratories, Standard Electronics (Claude Neon), Gates, Diamond Specialty, Remington-Rand.

Considering only transmitters, here are delivery dates and prices quoted to us by the top companies -- antenna delivery dates quoted by all makers generally paralleling or preceding transmitter availabilities:

GE: 5-kw vhf transmitters will be available Oct.-Nov. 1951, at $65,000 for Channels 2-6, $69,000 for Channels 7-13. Scheduled for delivery second-third quarters 1952 are 35-kw amplifiers for Channels 2-6 at $75,000, 20-kw amplifiers for Channels 7-13 at $65,000. Uhf transmitters are due second and third quarters 1952, include 120-watt "hamlet" unit at $37,000, 12-kw unit at $125,000.

RCA: 20-kw amplifiers for existing 5-kw transmitters are scheduled Jan.-Feb. 1952. New 10-kw transmitters (5 kw has been dropped) are due July 1952, priced at $79,000 for Channels 2-6, $84,000 for Channels 7-13. Further into future, about July 1953, are 50-kw units at $225,000.

DuMont: Fifteen 5-kw transmitters available in "next few months," 13 of these already sold, priced at $65,450 for Channels 2-6, $69,250 Channels 7-13. Ten .5-kw units, 4 already sold, will be ready by March 1952, at $35,750 for Channels 2-6, $38,450 Channels 7-13. Amplifier to boost .5-kw transmitter to 5 kw is $35,000. In planning stages, details unrevealed, are 50-kw vhf transmitters and uhf units, powers of latter not disclosed.

Federal: 1 & 5-kw vhf transmitters in production, but everything sold out, at $46,000 for 1-kw units, $75,000 for 5-kw Channel 2-6 models, $82,500 for Channels 7-13. Prices include much associated equipment -- consoles, monitors, dummy loads, etc. Mid-1952 is estimated date for delivery of 20-kw vhf amplifiers, 10-kw uhf transmitters. Company also makes high-gain, high-band vhf antennas, plans low-band, offers full line of equipment, including cameras obtained from DuMont.

Note: Though transmitter is biggest single equipment item, associated gear brings cost of electronic equipment to the $150,000-$200,000 average. This includes antennas, monitoring equipment, camera & film chains, transmission lines, switching equipment, microwave relays, etc.

EVALUATING THE STATION POWER HIKES: Results of power boosts permitted by the FCC (Vol. 7:30-33) can now be fairly well assessed, though major manufacturers, notably Philco and RCA, are in process of nation-wide surveys to get more exact gauge of market enhancement. Improvements seem to amount to this:

Noticeable widening of some markets, no change in most, and better in-city pictures in all cases. Translating increases into new potential purchaser-viewers, for nation as a whole, brings only modest results.

Increases of 3 to 8 times original powers are recognized as valuable by everyone. Anything less is regarded "all to the good, but nothing really exciting."

Much more important than recent station boosts, manufacturers say, has been constant improvement in receiver sensitivity over last few years. Philco's research v.p. David Smith puts it this way:

"Receiver sensitivity has increased about 15 db over the years. That's equivalent to something like a 35-times increase in station power. This increased

sensitivity is what has given us the fringe sales. But we're approaching the theoretical limit in sensitivity, so that more and more of the improvement will have to come from station increases."

Dr. Allen DuMont has similar reaction, saying: "Industry never went after fringe areas much until last 6 months. Our company is putting a 'caboose tuner' in all current sets, with improvements in the tuner and IF giving more sensitivity."

Stations tend to greater optimism over increases. Many give case histories to prove how nicely their coverage horizons have widened.

Increase from 9.6 to 50 kw for Louisville's WHAS-TV, reports manager Victor Sholis, gave Lexington (68 miles) "excellent picture 6 nights a week and a fairly good picture on the other night." Previously, "we were giving viewers a usable picture possibly once a week." He estimates range widened to include: 22% more families and 23.8% more people, with 21% more buying income.

Omaha's KMTV reports results of survey by U of Omaha graduate student who traveled 1100 miles to interview 200 set owners after station went from 11.7 to 16.7 kw. He asked: "Have you noticed a change in the quality of your TV reception in the past few days?" Improvement was noted by 68%.

Number of hikes granted by FCC has reached 43, Grand Rapids' WLAV-TV moving from 20 to 28.5 kw. Another application, still pending, is that of WOW-TV, Omaha, to increase from 16.2 to 17.5 kw. (For previous grants, see table Vol. 7:33.)

BOX-OFFICE TV—THE QUESTIONS POSED: Pay-as-you-look TV fight shapes up as even more acrimonious cause celebre than color TV -- if whole idea isn't rendered moot by the economics of telecasting and movie-making before FCC gets around to considering it. Every man-in-the-street can understand what it means. The basic policy question can't be lost in befuddling technical terms.

Our hunch is that public will decide this one -- through Congress. Can you visualize Congress leaving it to Commission? Matter of fact, Comr. Webster still feels, as he did when Zenith's Phonevision tests were authorized (Vol. 6:6), that:

"It is such a fundamental change of the American system of broadcasting that it may well be that the Commission, upon further consideration, will conclude that the change should be made only after Congress has established the new policy by an appropriate amendment to the Communications Act."

Chairman Coy has expressed no such qualms, has said he views box-office TV as something which may keep, or acquire, major events for TV.

Actually, true open mind on subject seems to prevail at Commission. Few commissioners or staff members have done much thinking about it lately, having been so intensively preoccupied with color and freeze.

Issue isn't likely to come to head, at FCC level at least, for quite some time. Necessity for haste is hard to prove for a technique which is demanding no spectrum space and apparently can be started any time.

Commission intends to melt freeze completely before biting off another big mouthful. And Commission seems to regard theatre TV as next man-sized project, inasmuch as that service wants frequencies.

Four box-office TV systems have been proposed to date: Zenith's Phonevision, Skiatron's Subscriber-Vision, Paramount's (50%-owned) Telemeter, RCA's still-unrevealed technique. More may come. None has yet requested hearings looking towards actual establishment of service. It may well be year or 2 before FCC gets to it, though Zenith has been expected to ask for consideration momentarily. Paramount this week asked FCC for permission to test Telemeter via its KTLA, Los Angeles, for 6 months (see p. 4).

Economic questions are the big ones, in eyes of Comrs. Jones and Hennock, according to their statements at time of Zenith's experimental authorization. And telecasting economics were biggest bait dangled in front of station operators by Zenith's public relations consultant Millard C. (Tex) Faught (Vol. 6:6).

To program 1000 stations, plus 200 satellites, divided into 4 networks, he figured it would cost $1,740,353,500 annually. That figure gave industry pause 1½

years ago. Today, it fazes few when they consider that mere 107 stations stand to do gross volume of $250,000,000 this year (Vol. 7:32).

Business of movie-making may not be in such a phenomenal rise, but film industry is currently incensed over Aug. 13 Life Magazine story to effect it's in such bad way that it regards fee-TV as "the hero in the proverbial happy ending...ready to swoop down and rescue the damsel from the dangers that assail her." Movies challenge story step-by-step, assert that their attendance is up, that new theatre openings outnumber closings, etc.

Box-office TV proponents face big job of proving desperate need.

* * * *

Once FCC hearing starts, here are some of many questions to be answered:

(1) Is it in the public interest? Simply that. Should public be required, or have opportunity -- to look at it from proponents' side -- to pay for programs off "their air" directly in cash rather than indirectly through advertising?

(2) Is it legal? Is it broadcasting as contemplated by Communications Act and international frequency agreements? If not, must it necessarily require new spectrum space? One thing is clear: There isn't a chance for new frequencies. And: Is educational channel reservation a precedent for permitting specialized services on regular broadcasting or telecasting channels?

(3) Will public have choice of fee-TV or free-TV? And should it? In one-station community, it would have none. In other cities, it might have choice.

(4) Who will set rates? FCC might find itself under public pressure to take jurisdiction, if law isn't clear on it.

(5) How much box-office TV could a station carry -- X% in one-station market, Y% in 2-station, etc.? How would such time allocations fit into FCC's traditional "balanced-programming" criteria?

(6) Which system should be chosen? Or -- shades of the color hearing! -- should all systems be permitted on competitive basis, even if they're incompatible with one another, requiring different receiver attachments for each system?

Meanwhile, moderate-to-loud promotion campaigns are under way in each proponent's camp. Each knows his own strength, his competitors' Achilles heels. Just ask them. They're having heydey riding this publicity hobby-horse.

Note: Above was written well before we saw "What About Pay-As-You-Look TV?", by Victor Ullman, in Aug. 25 Saturday Evening Post. Writing primarily about Phonevision, Mr. Ullman is on safe ground when he talks about results of Zenith's 90-day test and enthusiastic conclusions drawn therefrom by some movie interests and sports promoters. But he's way too superficial on economics of telecasting, political aspects, regulatory questions of spectrum utilization, systems' technical handicaps.

TELEMETER tests planned by Paramount Pictures Inc. (see p. 3) are technical, not economic—"how does picture scrambling effect signals" not "will people buy it" —thus differing from Zenith's Chicago Phonevision tests. In requesting authority to test coin-operated system via KTLA, Los Angeles, for 6 months, Paramount told FCC it works as follows:

One unit is placed inside receiver, unscrambles picture. Other unit is box 8½x4x4-in., called "comparator", which accepts coins from nickels to half-dollars. Comparator contains magnetic tape which records a code sent out on subcarriers imposed on audio channel of transmitted signal. Comparator contains 2 "windows"; one is "instructed" by code to show how much is charged for program, while other indicates how much money has been dropped in slot. When the 2 figures match, first unit goes into action, unscrambles picture.

At intervals, serviceman picks up money and magnetic tape. Latter is run through electronic computer which tells how much was paid for which programs.

Telemeter plans to test receivers under all possible conditions—with and without attachment, in strong and weak signal areas, with & without ghosting conditions, etc.

Electromagnetic radiation bill (S. 537), approved by Senate (Vol. 7:28), met little objection in Aug. 22 hearing before House Interstate & Foreign Commerce Committee. Drastically toned down from bill originally proposed by military, measure met approval in testimony of Air Force's Maj. Gen. F. L. Ankenbrandt, FCC Comr. Edward Webster, NARTB's Ralph Hardy. RTMA sent letter indicating "no objection." House may want to change criminal provisions of bill to vary punishment with magnitude of violation, also increase it.

Rear Admiral John R. Redman, chief of Naval Communications since August 1949, named director of communications-electronics, Joint Chiefs of Staff, succeeding Maj. Gen. H. M. McClelland, retiring Sept. 1. Capt. Wilfred B. Goulett, Admiral Redman's assistant, named acting chief—with Rear Admiral Wm. B. Ammon, ex-deputy director, expected to take over post later, coming in from Pacific Fleet. It's also reported Maj. Gen. Francis Ankenbrandt, director of Air Force Communications, is joining Gen. Eisenhower's headquarters in Europe as deputy chief of staff for communications, to be succeeded by Maj. Gen. Raymond C. Meade.

Station Accounts: WNBT's *Kathi Norris Show*, weekday 1-2 p.m. participation, becomes *Eve Hunter's Program* early in Oct., Miss Norris resigning and new NBC-owned show being handled by former "Miss San Francisco" . . . Success story of *Lits Have Fun*, supplier-cooperative sponsored by Lit Bros. dept. store on WCAU-TV, Philadelphia, told to trade in Aug. 16 *Retailing Daily*—how twice-weekly zany 10-10:30 a.m. show draws big audience into store where staged . . . Ward drug chain sponsoring *Foto-Test*, adaptation of *Look Magazine* feature, on KRLD-TV, Dallas . . . Rand drug chain (Ohio-Pennsylvania-W. Va.) buys TV for first time, using 5-min. UP news show Wed. midnight on WDTV, thru W. Craig Chambers Adv., Pittsburgh . . . Gunther Brewing Co. sponsoring Mon.-thru-Fri. 6:55-7 p.m. newsreel strip titled *Hi Maryland!* on WMAR-TV, placed by Biow . . . Holland Furnace Co. testing TV in 6 Midwest markets, thru Roche, Williams & Cleary, Chicago . . . George Ziegler Candy Co., Milwaukee, sponsoring *Pooch Parade* on KSTP-TV, St. Paul . . . Among others using or preparing to use TV: International Milling Co. (Robin Hood flour), thru H. W. Kastor & Sons, Chicago; Chemical Corp. of Colorado (chemical products), thru Bill Bonsib Adv., Denver; Hunter-Douglas Corp. (Flexalum venetian blinds), thru Doyle Dane Bernbach Inc., N. Y.; Illinois Meat Co., Chicago (Broadcast brand canned products), thru Arthur Meyerhoff, Chicago; Charles Antell Inc. (Formula 9 hair & scalp treatment), thru Television Associates, Baltimore; Phillips Petroleum Co. (Phillips 66), local football, thru Lambert & Feasley, N. Y.; Armour & Co. (Dial deodorant shampoo), thru John W. Shaw Adv., Chicago; Stegmaier Brewing Co., Wilkes-Barre, Pa., (Gold Medal Beer), thru McManus, Johns & Adams, N. Y.; H. E. Pliner Shoe Co., Philadelphia women's & children's shoe chain, thru Lavenson Bureau of Advertising, Philadelphia (WCAU-TV); Barcolene Co., (all-purpose cleaner & glass wax), thru Ingalls-Miniter Co., Boston; Reliable Packing Co. (Realite shortening), thru Sidney Clayton & Associates, Chicago; Garrett Wines (Virginia Dare), thru Ruthrauff & Ryan.

March of Time's second foray into TV syndication on its own, with *Crusade in the Pacific*, looks like same big hit as its precursor *Crusade in Europe*, judging from enthusiastically received preview of 4 of its 26 half-hour chapters before Washington brass Aug. 23. Thirty-eight stations carried its first self-syndicated feature, *March of Time Through the Years*, built out of old March of Time releases, according to TV sales chief Frank J. Shea, and more are expected for new series. Whereas *Crusade in Europe* was sold as package to ABC, March of Time is selling new series at rates ranging from $175 to $1550 per chapter direct to stations or sponsors—has already signed up 26 markets, only 7 as yet unsponsored. Stations and sponsors to date: WNBK, Cleveland, Society for Savings; WDTV, Pittsburgh, Mellon Bank; WJAR-TV, Providence, Citizens Savings Bank; WENR-TV, Chicago, City National Bank; WXYZ-TV, Detroit, The Detroit Bank; WBZ-TV, Boston, Shawmut National Bank; KSD-TV, St. Louis, First National Bank; WSM-TV, Nashville, Third National Bank; KPRC-TV, Houston, City National Bank; KSTP-TV, St. Paul, Northwestern National Bank; WBAL-TV, Baltimore, W. Burton Guy & Co. (realty); WNBF-TV, Binghamton, Stegmaier Brewing Co.; WDSU-TV, New Orleans, American Brewing Co.; WCAU-TV, Philadelphia, R. M. Hollingshead Co.; WAVE-TV, Louisville, Stewart Dry Goods Co. In addition, Miller Brewing Co. sponsors on WTMJ-TV, Milwaukee; WTAR-TV, Norfolk; WMBR-TV, Jacksonville; WTVJ, Miami. Series has also been sold, but no sponsors yet reported to WJZ-TV, New York; WMAL-TV, Washington; KSL-TV, Salt Lake City; WFBM-TV, Indianapolis; WDAF-TV, Kansas City; KGO-TV, San Francisco; KING-TV, Seattle.

Network Accounts: When *Frances Langford-Don Ameche Show* debuts on ABC-TV Sept. 10, noon to 1 p.m. Mon. thru Fri., sponsors will include Cliquot Club Co. (beverages), taking Thu. 12:30-12:45, starting Sept. 13 thru Frank Weston Adv., Providence, and DuPont rayon dept. (Orlon curtains), taking Fri. 12:45-1 starting Sept. 21, thru BBDO; big new daytimer had previously signed Cory Corp. (household appliances) for Tue. & Thu. 12:45-1, thru Dancer-Fitzgerald-Sample . . . Jene Sales Corp (Jene home permanent) to sponsor alt. Thu. 10-10:30 period on ABC-TV, starting Sept. 27, program to be announced, thru Rodgers & Associates, Chicago . . . Bona Fide Mills Inc. (Bonny Maid Linoleums & Versa-Tile) Oct. 5 starts *Versatile Varieties*, starring Lady Iris Mountbatten, on ABC-TV, Fri. 9:30-10, thru Gibraltar Adv. Agency . . . Gillette Sept. 7 begins sponsoring Madison Square Garden and other New York boxing shows on NBC-TV, Fri. 10 p.m., thru Maxon Inc.; first bout is Walter Cartier-Billy Kilgore middleweight . . . Singer Sewing Machine Co. starting Sept. 11 sponsors Tue. 4:45-5 segment of *Kate Smith Show* which resumes Sept. 10 on NBC-TV, Mon.-Fri. 4-5, thru Young & Rubicam . . . Standard Oil of Indiana returns *Wayne King Show* to 11 Midwest NBC-TV stations Aug. 30, Thu. 9:30-10 CST, with KSD-TV carrying it at 11 p.m., WFBM-TV Sat. 6:30 p.m. . . . CBS-TV has dropped option on Paul Tripp's *Mr. I. Magination* . . . Don Ameche's *Musical Playhouse* on ABC-TV, Thu. 9-9:30, discontinuing as of Sept. 27, with Cluett Peabody, alternate sponsor, considering Herb Shriner.

Personal Notes: Richard D. Buckley, v.p. & gen. mgr., John Blair & Co., New York office, named president as of Sept. 1, Mr. Blair becoming chairman of board. Robert E. Eastman promoted to v.p. & New York sales mgr. . . . George Whitney has resigned as gen. mgr., KFI & KFI-TV, Los Angeles, to become sales v.p., Don Lee Network . . . Sherrill E. Edwards, ex-KEYL, San Antonio, named commercial mgr. of new XELD-TV, Matamoros, Mexico, across Rio Grande from Brownsville, Tex. (Vol. 7:31-33); Bert Metcalf is program director, Francisco Maza chief engineer . . . Charles L. Glett named v.p. in charge of network services for both CBS Radio and TV divisions, Hollywood, with William Shaw promoted to gen. mgr., KNX, Hollywood and Edwin Buckalew asst. gen. mgr. in charge of sales . . . Carl J. Burkland named director of station administration, CBS Radio, and Wendell Campbell is now sales mgr., CBS Radio Sales . . . Carl Ward, ex-WCCO, Minneapolis, named gen. mgr., WCBS, New York, with G. Richard Swift now devoting fulltime to managing WCBS-TV . . . Harold Fellows, NARTB president, named to board of visitors, Boston U School of Public Relations . . . Richard A. R. Pinkham, circulation mgr. and a director of *New York Herald Tribune*, named NBC-TV manager of planning under TV v.p. Pat Weaver . . . George H. Gribben, v.p., named head of TV-radio commercial dept., Young & Rubicam, with William J. Colihan as dept. mgr. . . . Roger Pryor elected TV-radio v.p., Foote, Cone & Belding, representing consolidation of New York radio & TV departments; Thomas M. McDonnell named TV-radio production director, George Wolf mgr. of TV-radio programs . . . Ross Donaldson appointed NBC supervisor of literary rights, succeeding Thomas Adams, resigned.

Hearing on Comr. Hennock's nomination to New York judgeship, (Vol. 7:24-26, 31, 33), scheduled for Aug. 25, has been postponed to unnamed date because of lack of Senate Judiciary Committee quorum, according to Chairman McCarran (D-Nev.). New date, in "near future," is expected. In addition to various oppositions to her confirmation, endorsements have been received—including several from women's organizations.

Television Digest WITH AM-FM REPORTS
1619 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
August 25, 1951

TV PRICES—KNOCK-DOWN-AND-DRAG-OUT? Things are looking up, so far as marketability of TV receivers is concerned -- but factory-ordered price slashes may add up to actual "price war" that could mean intensified buying surge but little or no profit.

Only thing certain is that public will get some marvelous values.

Clouding widespread confidence that trade is firming up, is puzzle where the price breaks will lead -- who can survive. It's true swollen inventories must be disposed of, true that lowered picture tube and components costs can be passed on to the public. But the anomaly is that new lines are being introduced at same time.

RCA gave official sanction to what has been done without approval on name brands when it ordered big reductions last week (Vol. 7:33). Also heavily stocked, GE did same thing this week (see p. 8), but unlike RCA it isn't offering new models at same time. And next week Philco will slash prices on all 28 sets it introduced just 2 weeks ago (Vol. 7:32), as well as on the 11 lower-end models it brought out last June (Vol. 7:22) -- at same time may also introduce several new models!

What comes next is anybody's guess, but this sort of maneuvering and price-cutting is more than mere factory sanction for what the overloaded dealers have been doing anyhow during last 4 or 5 months of trade slump. RCA and GE frankly state it's out-and-out effort to get rid of inventory, but Philco claims it hasn't much inventory any more -- as does Admiral -- so the price-cutting on such big scale thus takes on deeper competitive undertones. It could turn out to be knock-down-and-drag-out.

* * * *

All this is happening just as everybody was beginning to feel sure buying slump was just about over. Not only are all the trade factors favorable for seasonal upsurge (Vol. 7:33), but reliable trade estimates are that even during the summer months the retailers sold not less than 1,000,000 sets -- proving that people had not really stopped buying altogether.

GE still clings to belief, not much talked about now, that materials shortages and govt. controls will drastically cut production later this year anyhow, and its receiver manager W.H. Sahloff says "costs are increasing in every area of production." GE admittedly has huge inventory, but Mr. Sahloff says "demand for our product is greater than our present ability to produce" and he definitely forecasts an "actual shortage" before the year end.

RTMA president Glen McDaniel, in significant speech in San Francisco this week, analyzing defense demands on the electronics industry, also predicted: "In the light of tightening materials controls, TV receivers may again be in short supply before Christmas." Long range, he said, the industry has every reason to be optimistic. (We regarded his analysis of defense impact on electronics economy so significant that salient excerpts are published as Special Report with this issue.)

* * * *

With customers "looking and buying" once again, with inventory out of way and current production held down, bitter experience of the 1951 spring-summer may impel the industry's survivors to pace themselves more prudently -- more slowly than during the too-lush days of 1950. Everybody wants equilibrium of supply and demand.

Production is being kept down, meanwhile, and latest weekly figure is still quite low -- only 52,748 TV units (3489 private label) for week ending Aug. 17. This compares with 43,359 week before (Vol. 7:33) and with some 180,000 during comparable third August week in 1950 (Vol. 6:36).

Factory inventories went down some 11,000 units, too, even as production went up less than 10,000 from preceding week -- marking what everyone in the industry may well hope will be a continuing trend. Total factory inventory Aug. 17 was 754,854, or down to about the July 20 level.

Latest distributor inventory figure was 633,077 sets as of June 29 -- as

usual, about 2 months old. RTMA may have new one soon. Meanwhile, dealer inventory survey by Dun & Bradstreet is due around Sept. 1, covering Aug. 1 holdings and now organized for monthly reports. Henceforth, it's hoped to be able to chart course of the industry a little more surely than weekly factory and belated distributor figures have hitherto permitted.

Radio output totaled 231,854 (112,018 private label) week ending Aug. 17, about same as week before; factory inventory was 368,280, up by only a few thousand. Week's radios were 112,220 home receivers, 27,343 portables, 91,976 auto.

RTMA revised July output figures up to 116,000 TVs, down to 539,500 radios. These compare with 330,377 & 722,518, respectively, for same 1950 month. For first 7 months of year (30 weeks), total output figures thus come to 3,483,674 TVs and 8,413,136 radios. Radios were 4,233,611 home, 915,482 portables, 3,264,043 auto.

PRIME use of color to date has been, ironically, as black-&-white promotional peg—with CBS no exception. CBS-Columbia cleverly lifted word "compatible" from proponents of compatible color system, is using it to help move internally-adapted black-&-white sets. Admiral's promotion of "color TV optional" (Vol. 7:33), like everyone else's advertising of adapters, converters, etc., is primarily aimed at easing prospective purchasers' minds about buying black-&-white now.

Fact is, few in industry see how anyone, including companies large as Admiral and small as CBS-Columbia, could manage any sizeable color production this year—possibly next, too, in light of materials shortages and controls. Aside from time required for tooling up and field-testing processes, special components such as discs and motors simply aren't available in big quantities.

Admiral to date has built only 4 "slave" converters in console cabinet, 10-in. magnified, as yet unpriced. Its distributors and dealers have big cardboard replicas to display, instructed to show cut-outs of actual-size 20-in. screens alongside. Purpose is plainly to hypo black-&-white sales.

One of the 4 Admiral color sets was shown in Washington this week. Dealers paid it little attention, were all excited instead about prices of new line (Vol. 7:33). Between Admiral's lower prices and rest of industry's competitive prices, the high price of color receivers and converters is going to make black-&-white extremely attractive, in minds of industry people—particularly Admiral, which makes no bones about its intention of using the color gimmicks (including $14.95 adapter) as come-on for black-&-white sales.

Demonstration we saw on Admiral set was well below CBS average in quality. But Admiral officials make it clear they made it only to be ready to jump any direction consumers demand; if customer should order the set, he can't be promised delivery date, let alone quoted price, for Admiral says the wheels aren't available.

Admiral has issued consumer booklet stressing 3 points: (1) "Optional" arrangement gives big picture on monochrome, regardless of size of picture on color slave. (2) Lower cost: "Even with color added to a 20-in. Admiral Table Model, your combined investment will be substantially less than the cost of a 10-in. color set." (3) Freedom from obsolescence: "These amazing new Admiral TV receivers are so engineered that color can be added regardless of what system of telecasting is ultimately adopted."

Competitors aren't happy about Admiral campaign, some outright sore, saying it will further "muddy the trade waters." CBS hasn't said anything yet, and Admiral hasn't taken out CBS patent license.

CBS-Columbia still sticks to oft-iterated color production schedule (Vol. 7:29). President David Cogan says pilot production should be coming off line mid-September, with moderate regular production in October. Price of first-scheduled unit, $500 for combination 10-in. magnified color-monochrome console, is still unchanged. "We're already learning how to save dollars," says Mr. Cogan, "and we'll be able to pass them on in later production." Prices of company's black-&-white line, higher than those of competitors' in midst of "war" (see p. 6), will probably have to come down, Mr. Cogan indicated. New prices are due Sept. 1. Detroit is next city to get demonstration for CBS-Columbia dealers. Pictures will be picked off network Aug. 27-28, fed closed-circuit to Masonic Temple.

Permission to colorcast both compatible and CBS systems was requested of FCC this week by Crosley's WLWT, Cincinnati. Receiver development is principal purpose, company says. Some demonstrations will be open to public to test picture acceptability. Studio and remote pickups are planned. Meanwhile, CBS reports plans to transmit color in Paris in mid-September at request of French Govt. This is in addition to closed-circuit demonstrations scheduled for Sept. 24-29 International Congress of Surgeons in Paris. Both CBS and RCA report enormous public reaction to TV—color and monochrome, respectively—at recent Berlin demonstrations (Vol. 7:32). CBS relayed report of London newsman who wrote: "I prophesy that when color of the American standard reaches Britain . . . then black-&-white pictures will become the daguerreotype of the 'fifties'." RCA reported over 500,000 witnesses of its programs, said police had to control crowds, and showings at 2 locations had to be discontinued because of traffic congestion.

Donald B. Sinclair, chief engineer, General Radio Co., Cambridge, Mass., nominated for 1952 president of IRE on ballots now being voted by mail. Harold L. Kirke, BBC asst. chief engineer, nominated for honorary v.p. Voting is to choose 2 of these 5 nominees for directors-at-large: Ben Akerman, chief engineer, WGST, Atlanta; William B. Lodge, engineering v.p., CBS; Simon Ramo, co-director of research & development, Hughes Aircraft Co.; Prof. John D. Ryder, U of Illinois; Prof. Ernst Weber, Brooklyn Polytechnic Institute. Nominees for regional directors, one to be chosen in each: *Region 1*—Glenn H. Browning, Browning Labs; Dale Pollack, New London Instrument Co. *Region 2*—Fred W. Albertson, attorney, Washington; Prof. Cornelius G. Brennecke, No. Carolina State College; Irving G. Wolff, RCA Laboratories. *Region 5*—Alois W. Graf, patent lawyer, Chicago; Orrin W. Towner, technical director, WHAS & WHAS-TV, Louisville. *Region 7*—Robert L. Sink, chief electronics engineer, Consolidated Engineering Corp., Pasadena, Cal.; Prof. Karl Spangenberg, Stanford U.

Topics & Trends of TV Trade: Federal Trade Commission's second trade practice conference for TV-radio industry—manufacturers, wholesalers, dealers—has been scheduled for Sept. 26-28 in National Archives Bldg., Washington, FTC attorney Paul H. Butz presiding and FTC chairman James M. Mead supervising. Rules covering set and tube advertising, sales methods, color claims, etc., as suggested at June 21 conference (Vol. 7:25), have been drafted for release about Sept. 1 to furnish basis for discussions. New rules would supersede pre-TV rules covering radio trade that date back to 1939. Conference is for purpose of getting "meeting of minds" after which formal FTC proceedings are required. RTMA and National TV Dealers Assn., Washington, have been prime movers in getting FTC to hold conferences.

RTMA's small business assistance program culminates in conference in New York's Hotel Roosevelt Sept. 18. Program involves recording and classifying capabilities of small companies, forwarding of data to prime defense concontractors. According to RTMA, govt. officials say it's first association "to undertake a practical program" to aid small business members in defense work. Membership of Small Business Survey Committee: A. D. Plamondon Jr., Indiana Steel Products, chairman; G. O. Benson, Premax Products; G. R. Haase, Dukane Corp.; Otto H. Hofman, General Magnetic Corp.; Matt Little, Quam-Nichols Co.; Richard W. Mitchell, Industrial Development Associates.

GE's new line pends disposal of the 13 models it ordered its heavily-laden distributors and dealers to sell at "new prices [to] remain in effect as long as the present competitive situation exists." Reductions up to $100 are in effect "for limited time only" and are "subject to revision upward on 24-hour notice to our distributors," said Aug. 24 announcement by W. H. Sahloff, gen. mgr., receiver dept. Full price protection is assured distributors-dealers in line with policy statement of last May 25.

New prices on 17-in. models are as follows, all figures rounded out and old prices in parentheses: 17T1, mahogany table $250 ($270); 17T2, mahogany table $250 ($290); 17T3 blonde table $260 ($300); 17C103, mahogany open console $290 ($320); 17C104, blonde open console $310 ($340); 17C105, mahogany open console, $290 ($350); 17C107, console with half doors $300 ($380); 17C108, same in blonde $320 ($400); 17C110, console with half doors $300 ($380); 17C111, same in blonde $320 ($400); 17C109, console with full doors $370 ($400). Two 20-in. consoles, both with half-doors, are reduced: 20C150 to $475 ($575) and 20C151, same in blonde $495 ($595).

Prices include tax and 90-day set warranty, but not tube warranty of $4-$8. Unchanged were GE's 16-in. combinations—the AM-FM-3 speed 16K1 at $520 & 16K2 at $540. The 24-in. full-door console also stays at $775.

* * * *

New RCA Victor line will consist of 17 & 21-in. models only, marks departure from 14 & 16-in., will be promoted with "Picture Power" as catch-words. No combinations are included. Line starts with 17-in. table Bristol (17T153) at $279.95 in mahogany, $289.95 in blonde; 17-in. table Preston (17T155) at $299.95 mahogany or walnut, $309.95 blonde—base offered with each at $20 extra. The 17-in. consolette Hampton (17T160) is $329.50 in choice of mahogany, walnut or oak; 17-in. console Kendall (17T174) is $389.50 in mahogany, walnut or oak.

RCA's first 21-in. models are all consoles: Suffolk, colonial (21T176) at $425 in mahogany or walnut, $445 oak; Donley, modern (21T177) at $450 in mahogany or walnut, $470 oak; Rockingham, Regency (21T178) at $475 in mahogany or walnut; Clarendon (21T179) in mahogany, walnut or maple at $495.

Trade Miscellany: Philco plans to erect plant at Frederick, Md. to make electronic tubes for defense contracts dropped permanently, due to change in orders . . . Sprague Electric's fifth branch plant will be located in Kingston, N. Y., building of 12,000 sq. ft. to be constructed to employ about 100 starting next year . . . Electronic Devices Inc. has purchased Precision Rectifier Corp., will operate Brooklyn plant as division producing selenium rectifiers . . . Striking Tele-tone workers, out since June 26, began going back to work Aug. 21, agreement calling for election to decide whether UEW or IUE shall represent them . . . June exports of radio apparatus totaled $14,472,601, more than double the $6,019,463 same month last year . . . North American Philips has purchased A. W. Haydon Co., Waterbury, Conn., maker of electronic devices, timing motors, etc.; will operate it as division.

Merchandising Notes: New Zenith sets due to be shown shortly after Labor Day . . . Trav-Ler releases 7 new TVs, 9 new radios Aug. 29-30 at distributor meetings in Chicago offices . . . Hallicrafters not discontinuing its 14-in., but has cut list on 14-in. table from $200 to $150, on 16-in. table from $200 to $180, on 17-in. table from $250 to $200; is offering new 19-in. mahogany console at $280 . . . Arvin bidding for high ranking in TV-radio with its biggest ad campaign yet, sharply increasing cooperative newspaper space and point-of-sale material, buying 25 pages for TV, 20 for radios in 16 slick magazines from Sept. thru Dec. 5 . . . Arvin to distribute through Goodyear retail stores, detailing Leslie M. Graham to liaison job, Thomas E. Davis replacing Graham as Indiana-Michigan TV-radio mgr. . . . Stromberg-Carlson's new TVs & radios to be promoted with 51 ads in 10 leading consumer magazines, plus local cooperative newspaper and TV-radio advertising—biggest ad campaign in firm's history.

No new DuMont line is in early prospect, though company has unloaded most of high-priced models recently offered at one-third off list. Fall marketing plans are to be discussed with sales chief Walter L. Stickel Aug. 30-31 at factory meetings with field men. DuMont's 30-in. sets (Vol. 7:26) have all been sold, and new run is planned—probably somewhat lower in price.

Three-pound saving in airborne radar is DuMont's claim for its automatic focusing "Selfocus" CR tubes (Vol. 7:20-21, 33).

Trade Personals: Barton K. Wickstrum promoted to v.p. & gen. sales mgr. of Sylvania, effective Sept. 1, up from gen. sales mgr. of lighting div.; he succeeds sales v.p. Robert H. Bishop, who resigned to become v.p. of E. F. Drew & Co., and is succeeded in lighting div. by Charles A. Burton . . . Bernard Hecht, ex-RCA and International Resistance, new gen. mgr., Starrett, under president Frank D. Langstroth . . . R. C. Freytag, Scott Radio v.p., elected to board . . . J. B. Farr, recently with Tradeways Inc., named mgr. of sales training, GE receiver dept.; R. M. Lutz promoted to supervisor of cooperative advertising . . . Harold Karlsruher, New York State regional sales representative for Emerson, named president of new Emerson-owned subsidiary in Detroit, to be called Emerson-Michigan Inc. and succeed Merchants Wholesale Distributing Co. . . . C. J. Ward, ex-Crosley N. Y. zone mgr., named branch mgr., Crosley Distributing Corp., Albany . . . Sydney J. Mass has resigned as Jerrold sales mgr., his duties taken over temporarily by president Milton J. Shapp and adv. director E. D. Lucas . . . Howard L. Bredlow named Chicago district mgr., Hoffman Radio, planning warehouse there . . . Eugene F. Haines, asst. treasurer, RCA Victor, retires Aug. 31 at age 65 after 50 years with company.

Paradoxes and Marvels

'Electronics Production for Defense'

Factors Involved in the Mobilization of TV-Radio and Related Industries

Salient Excerpts from Address by Glen McDaniel, RTMA President, San Francisco, Aug. 23, 1951

Before Western IRE Convention and Pacific Electronic Exhibit sponsored by West Coast Electronic Mfgrs. Assn.

Editor's Note: *Total of $3.8 billion in electronics contracts let during first fiscal year after Korean outbreak . . . estimated $3.8 billion more to be let during current fiscal year . . . present annual rate of production, under $1.5 billion, due to reach going rate of $4 billion yearly by next summer—and who knows what else in light of current war situation? Why, then, the paradox of idle plants and unemployment in an industry accomplishing such miracles of military production and materials conservation? RTMA's president Glen McDaniel spells out the whys and wherefores in a speech significant enough to merit close reading by everyone in the industry.*

THE American industrial machine is being called upon to perform an unprecedented task in this period of partial mobilization becausc it is required to do four things all at the same time.

First, it must produce the arms and equipment that will make us strong enough to discourage would-be aggressors from starting World War III.

Second, it must provide large amounts of scarce materials for stockpile, to be used if all-out war should come.

Third, it must substantially increase our capacity to produce military equipment.

Fourth, it must maintain the civilian economy at as high a level as possible so that we may follow a pay-as-we-go policy and also protect the kind of life we are fighting for.

Today I should like to talk mainly about the first of these tasks —production of military articles. I might say in passing that we in the electronics industry are helping on the second task—stockpiling—through our industry-wide program for the conservation of critical materials. It is a very active and well organized program that hastens development of methods enabling us to make the same high quality radio and television sets with less of the scarce war materials like copper and nickel.

As to the third task of increasing plant capacity, I believe the job is being done in electronics. For example, of 300 applications so far filed for Certificate of Warranty in our industry, 132 have been granted covering expansions costing $107,000,000. Close to half of this amount is for tubes, which provide many special and difficult problems in military equipment. We have plenty of plant capacity of the civilian assembly type. I believe that the plant expansion problem is not as critical in electronics as in certain primary products like steel.

On the fourth task of maintaining and expanding civilian production I shall have a few words to say later.

The Challenge of Electronics Production for War

In considering our problem under the first task of producing electronics equipment for the military services, we must first make sure we understand the seriousness—I might even say the gravity—of our responsibility.

The dual rise of electronics in military operations and television in civilian life should make us all pause and consider our tremendous responsibilities to our nation and to our generation. Seldom, if ever, has an industry been faced with such far-reaching requirements within a single decade.

As Edwin T. Gibson, of the Defense Production Administration, recently pointed out: "Modern weapons and modern machines of war are vastly bigger, faster, and more complex than they were in World War II. They have, in many instances, outstripped the ability of the human mind to control them. The answer," he said, "lies in remote controls provided by the electronic genius which has so greatly changed our way of life in the brief span of 30 years."

One of your West Coast aircraft officials recently said this to me: "In World War II, electronics equipment was considered as an aid to the personnel operating an airplane; today, the airplane is a platform to carry the electronics equipment which does the fighting."

The truth of this statement is indicated by several objective facts. You may have noticed Charles E. Wilson's statement last week that in some instances the cost of the electronics equipment for a military airplane is more than the total cost of the plane in World War II. Both government officials and aircraft manufacturers say that in some airplanes 60% of the total cost represents electronics equipment, and I am reliably informed that of the average cost of all combat airplanes 32% represents electronics equipment.

General Carl Spaatz, former Chief of Staff of the Army Air Force and one of the military leaders who directed our successful air operations during World War II, recently wrote in *Newsweek:*

"Electronics played a far more important part in the fight for air supremacy in the second world war than is so far realized . . . But these achievements of electronics in the second world war are nothing to what is ahead if there is a third world war. In another war, superior electronics would be decisive."

This statement by such an eminent military authority puts in plainest terms the vital role of electronics in modern warfare. I do not know how he could have expressed the challenge more clearly than by using the word "decisive."

Is the electronics industry being called upon to meet the challenge of producing equipment that may be "decisive" in the next war? The figures would certainly indicate so.

Our latest information is that the military services awarded contracts for electronics and communications equipment and parts totaling $3.8 billion during the first fiscal year after the Korean outbreak. That seems to be a startling figure when you recall that the industry's total commercial business in 1950, its peak year, was only $2.5 billion.

Moreover, authoritative defense officials estimate that another $3.8 billion in electronic contracts will be let during the current fiscal year.

Total appropriations, voted and expected, for electronics and communications products in two years of rearmament represent three-fourths of expenditures in the same category for the entire period of World War II.

Of course, the timing and extent of the impact of these huge contract commitments depend on delivery schedules, and many of the schedules go into 1953 and 1954.

Yet the military services are demanding rapidly accelerating electronics deliveries. The current annual rate of production is under $1.5 billion, and officials say it must reach a going rate of $4 billion yearly by next summer if electronics is to keep pace with the other phases of the defense program.

Defense Production Administrator Charles E. Wilson told the House Appropriations Committee that the production of electronics equipment for the military services increased three-fold during the first half of 1951 but that another three-fold increase is necessary and expected during the second half.

Idle Plants and Unemployment—a Paradox

With this enormous amount of military contracts outstanding, the average citizen would think that every plant in the country capable of producing or assembling electronic equipment would be humming with production.

Yet, information submitted recently by RTMA member-companies in response to a questionnaire indicate that, on an average, set and parts manufacturers in June 1951, were utilizing only half of their plant capacities in both defense and non-defense production. This was broken down roughly as 11% in defense work and 39% in non-defense manufacturing. An earlier RTMA survey showed losses of employment of 50,000 workers among Association members alone in an industry that normally employs about 200,000. The great IBEW Local 13 in Chicago, whose membership is largely confined to radio and television plants, recently reported that over one-half of its 26,000 members were unemployed.

Perhaps this situation would not be so alarming if it merely involved survival of the fittest in normal commercial competition.

However, much more than that is at stake: the ability of the electronics industry to meet its responsibility when and if a third world war comes.

To those not familiar with our industry this situation would seem incredible. Certainly it is anomalous. To those in the industry, however, it is no cause for alarm. People who have been living through the meteoric rise of electronics know that the process of rapid industrial growth is not without its pitfalls, and is often accompanied by dislocations in industry patterns and practices. We are now going through one of those periods of dislocation or relocation, but I am confident that our industry, noted as it is for resourcefulness, will emerge stronger than ever before.

We realize that civilian business went into a slump and military business failed to take up the slack. Here is what happened:

First, the fear of wartime shortages developed into a wave of buying that drove television receiver sales to record heights during the latter half of 1950. People bought in 1950 many of the television sets that would normally have been purchased in 1951.

Second, consumer credit controls, higher taxes, higher living costs, and other economic factors resulting from our partial mobilization program along with normal seasonal influences, slowed down consumer buying with the result that TV set production in 1951 dropped to a quarter of its 1950 peak.

Third, despite large appropriations for military procurement of electronics products, most radio-television manufacturers have been unable to obtain enough defense contracts to offset their losses in civilian business.

Why Military Production Does Not Take Up Slack

All of you will have your own ideas as to why military production has not taken up the slack in civilian production. I will mention some of the factors bearing on the point:

(1) Electronic developments have been so great since World War II that the whole character of manufacturing requirements has changed.

Citing the highly complex electronic fire control and radar equipment developed since World War II, Mr. Edwin T. Gibson said recently that the radar equipment used in World War II was more easily adapted to mass production methods common to the radio-television industry. The number of radar units needed by our armed services today is numerically only a small fraction of the number of TV sets which our industry is equipped to build, but it requires much more time, more engineering, and more labor.

Officials estimate that not more than 20% of military electronics contract commitments will be spent for items which can be manufactured in normal mass-production fashion. Included, for example, are radar equipments costing $400,000 which use less than 350 separate components. Obviously, such equipment cannot be assembled on a production line basis. Assembly might be done by a total of 60 people, of whom half must be engineers.

Here is another example cited the other day by one expert: in $1000 worth of civilian electronics equipment, the manufacturer solders in 700 resistors. In $1000 worth of military equipment, he solders in 37.

The manufacturer of mass production radios and TV sets is likely to find that the biggest order he can get for a military item is 50,000 or 60,000 units. He could handle the job in 10 or 15 days of production, but it takes him 18 months to prepare for the production run.

If we use the 20% yardstick, the $7.6 billion I spoke of is reduced to about $1.5 billion for a two-year period, which is little more than could be expected in normal peacetime periods before Korea. It is in the assembly plants that most of the idle capacity and unemployment occurs.

(2) The complexity of the apparatus often places it beyond the engineering or production capacity of many companies to cope with. It is totally different from the products they are used to making. One of your California aircraft manufacturers recently gave expression to this point by saying that while most aircraft his industry is called upon to build is a modification of or closely related to earlier models, the electronics equipment presents novel engineering and production problems which are, as he termed it, "fantastically difficult." Another of your aircraft builders also illustrated the point by saying that the military services must come to the realization that electronics equipment requires more lead time for production than does aircraft.

Clearly, it is not every company which has the engineering skill and production experience that will permit it to assume responsibility for delivery of some of this complex apparatus.

(3) A substantial portion of military electronic contracts go to companies not normally considered a part of the electronics industry. I refer to aircraft companies, automobile companies, and various others, like Eastman Kodak and Minneapolis-Honeywell. The development by these many companies of interest and skill in electronics is very significant. It is another example of the increasing and widespread importance of the electronics art. It suggests that electronics may be a necessary part of any business of manufacturing mechanical apparatus, and that perhaps in the end it will be difficult to define the electronics industry. Perhaps we shall all be in one branch or another of the electro-mechanical industry.

(4) The military purchases do not offer as much business for the electronics industry as would at first appear. The statistics for "electronics" often include other equipment such as trucks upon which the gear is mounted. Also, even in items generally considered to be electronics, it has been estimated that about one-half of the dollar volume comes from outside the electronics industry. This refers to such things as foundry work for mounts and frames, and various kinds of precision machinery and mechanical gear forming a necessary part of electronics equipment. Recent studies indicate that 35% of the dollar volume of component parts of military electronics equipment, which parts makers are called upon to furnish, represent articles not normally considered as electronics. When spare and replacement parts are also considered, it seems that the 50% estimate for non-electronic components is not far afield.

Conclusions to be Drawn

From this situation it seems clear that two conclusions can be drawn:

(1) We must continue searching for practical methods of spreading the military load and enlisting the facilities and manpower of manufacturers whose plants are either idle or operating far below capacity.

RTMA is trying to do something about this situation. We have established a Small Business Committee and are setting up a liaison between large prime contractors and small manufacturers to facilitate more subcontracting. We compile and issue information leading to subcontracting opportunities. We are trying to anticipate future shortages so that new opportunities may be uncovered.

The larger prime contractors within our industry are already subcontracting on an average of 50% or more of their defense business, according to a survey made by our Association. A large proportion of these subcontractors are in the "small business" category as defined by the Government. That is, they employ less than 500 employes.

Of course, in spreading the work load there is no substitute for shoe leather. I have never seen it better expressed than in the following unofficial quotation on Charles E. Wilson's remarks in response to a question before one of the committees of Congress:

"You have to work for it. Too many people wait for this to come to them on a silver platter. I have not seen that platter myself. You go get it and you work intelligently at it, and you may have to give a considerable amount of help to the departments that are going to place it. That is the way you get it. It is not hard. It is there to get.

"Small business operators should know what they can produce and then should work on the prime contractors. Some of the little fellows got rich during the last war and they are going to get rich all over again.

"They are the ones who make money out of the big corporations. The big corporations are not going to make any money out of it, I hope—not more than a nominal profit."

(2) The second conclusion is that, short of an all-out war, manufacturers equipped only to do assembly operations will probably not be able to get sufficient military business to keep their plants busy. Therefore we must do everything possible to keep our civilian business strong and healthy, thus keeping our industry intact for a greater emergency and doing our part in the fourth task I mentioned earlier.

TV Sales Outlook Is Encouraging

Fortunately, the outlook is encouraging for a steadily rising production of TV receivers during the approaching fall and winter, with greater increases to follow as the "freeze" is lifted and new TV areas open.

Recent upswings in sales of television receivers at the retail level have followed the relaxation of consumer credit controls which Congress effected at the behest of our industry. All indications are that this improvement will continue and that inventories will gradually get back to normal. In fact, in the light of tightening materials controls, TV receivers may again be in short supply before Christmas.

From a long range point of view, we have every reason to be optimistic. Many new TV areas will be opened up within the next few years, and better service will be offered in numerous areas now having only one or two TV stations. Higher power for TV transmitters, now being allowed by the Federal Communications Commission, already is expanding present markets.

New export markets are opening up as other countries, especially in Latin America, are turning to television as they did formerly to American movies. American manufacturers, with a head start on most foreign radio-television producers, should be able to supply these new world markets as well as the expanding home markets.

Thus it appears that while the pattern of military production of electronics equipment is changing, there will be enough civilian business to keep the industry busy once television is permitted to extend its boundaries.

Mobilization Notes: Happy over kudos it's getting for the striking full-page institutional ads it placed in big dailies Aug. 21, relating how big business must team with little, RCA policymakers frankly hope other big electronic contractors join in explaining to public that they can't "hog the govt. business" even if they wanted to. Ads captioned "Mr. K. A. Swanstrom, of Doylestown, Pa., teams up with RCA for national defense" won praise of Sen. Sparkman (D-Ala.), chairman of Senate Small Business Committee, who inserted it in *Congressional Record* with these remarks:

"The advertisement calls attention to a very important fact in the economy of this country; that is, that the very lives of so-called big businesses or big corporations depend upon hundreds of and thousands, and in some cases tens of thousands of small businesses." He then went on to praise RCA president Frank Folsom for his World War II work in procurement for Navy and WPB, and urged "careful reading" of the RCA ad.

Ad relates how Mr. Swanstrom's Penn Engineering & Mfg. Co., employing only 26, is contributing to defense effort by work on new light-weight walkie-talkie, along with 118 other suppliers of precision parts—87 classified by Govt. as "small business." It tells how RCA calls on "literally thousands of small companies" to help with its military contracts, cites 3 current Air Force contracts "requiring the skills and facilities of 560 different suppliers." It winds up:

"This same kind of teamwork in peacetime has made more and better TV and radio sets, records and transmitting equipment. It has contributed materially to our standard of living—the highest the world has ever known.

"We are proud to tip our hat to our 5000 suppliers . . . Together, in peace and in war, we serve America."

* * * *

To ease manufacturers' transition to CMP in fourth quarter, NPA this week issued 7 changes to basic CMP, steel, aluminum and copper orders. Idea is to avoid disruption of normal flow of those metals from mills to consumer durables manufacturers, such as TV-radio, while manufacturers await their allotments from NPA. Thus, until Sept. 10, metal producers are to give "unrated" orders equal preference with authorized controlled materials (ACM) orders. But manufacturers are warned to convert unrated orders to ACM status by Sept. 10, since mills are directed to cancel all orders unconverted by that time. NPA is also riding herd on steel-aluminum-copper producers to see to it that they don't delay accepting or rejecting NPA-authorized orders. This is to give manufacturers time to get on mill schedules of other producers in time for fourth quarter deliveries. New orders are: Dir. 3 to CMP Reg. 3, Dir. 3 & 4 to M-1 (steel), Dir. 2 & 3 to M-11 (copper), Dir. 1 & 2 to M-5 (aluminum).

* * * *

W. W. Watts, DPA deputy administrator on leave from duties as RCA Victor engineering products v.p., has returned to company on part time basis. He's now spending 2-3 days weekly in Washington, assisting new deputy administrator Clay P. Bedford, Kaiser-Frazer executive v.p. Bedford also takes over chairmanship of DPA's powerful Production Executive Committee, authority of which was expanded this week. Edmund T. Morris, chief of NPA's Electronics Div. and member of the committee, gets additional title: Asst. DPA Administrator for Electronics.

Nickel situation is "awful rough," according to NPA officials. "Up to now," says Electronics Div. director Edmund Morris, "the tube makers having been living off the fat. The fat's all gone. CMP allotments should help some next quarter, but manufacturers are going to be in bad shape pretty soon unless we can find more nickel."

MOVE of NPA Electronics Div. to Temporary Bldg. T, 14th St. & Constitution Ave., has brought new lineup of room and phone numbers. For handy reference, here are assignments of top officials; phone numbers are extensions of STerling 5200:

Director: Edmund T. Morris Jr., Room 2362, ext, 3585; deputy director, Donald S. Parris, 2354, ext. 3587.

End Equipment Branch: chief, J. A. Milling, 2350, ext. 5911 & 4305; radio & TV receivers section, Lee Golder, 2343, ext. 4498; radio communications equipment, W. E. Dulin, 2331, ext. 3300; broadcast & sound equipment, J. Bernard Joseph, 2339, ext. 4541; broadcast equipment unit, Donald Cooper, 2339, ext. 4541; military equipment, N. C. Harris, 2335, ext. 3911.

Components Branch: chief, Louis H. Niemann, 2314, ext. 3750; capacitor & resistor section, R. D. Parker, 2324, ext. 3769; transformers, E. MacDonald Nyhen, 2331, ext. 3300; electron tubes, N. H. Stewart, 2316, ext. 3909; special components, Delmus J. Fagge, 2310, ext. 4611.

Programs & Requirements Branch: chief, James A. Mendenhall, 2346, ext. 3929; CMP section, O. W. McDaniel Sr., 2351, ext. 4338; programs & statistics, Eric D. Bovet, 2338, ext. 5608; foreign, Robert R. Burton, 2416, ext. 3380; plant expansion, Wm. J. Bapst, 2323, ext. 5602; conservation, E. W. Glacy, 2420, ext. 3429.

* * * *

NPA eased metal allotment restrictions on production runs of laboratory models of various products by amending order M-71. Companies may apply to NPA, on form NPAF-109, for authority to make trial production runs "only in the minimum number and the minimum size required to determine the suitability of the article for commercial production and use."

Selenium has dwindled to 3-day supply for some rectifier makers, industry group told NPA recently. NPA said it will work on new allocation method to replace present system after Sept. 30.

Financial & Trade Notes: International Resistance Co.'s interim report to stockholders last week shows total income of $7,310,208 first half of 1951 (Jan. 1-June 24), compared with $4,689,803 for comparable 1950 period. Net profit after providing $870,055 for taxes was $522,160 (49¢ a share) as against $340,346 (37¢) after $371,366 taxes for same 1950 period. IRC's total 1950 sales were $11,085,109, profit $1,056,638 ($1.01). Strong demand for resistors will follow summer dip, report says, and statement by president Earnest Searing predicts "good year" despite materials shortages, govt. regulations and tax increases.

Wilcox-Gay Corp. (Majestic) reports net income of $260,986 (8¢ a share) on net sales of $6,236,052 for first 6 months of 1951. First quarter profit was $355,787 on sales of $3,707,658 (Vol. 7:18). Comparable 1950 figures are not available, but in first 8 months of 1950, prior to merger with Garod-Majestic, Wilcox-Gay sales were $1,953,397 and loss $444,720, and consolidated statement for all 1950 showed sales of $8,002,572, net profit $28,205 (Vol. 7:13).

Dividends: Sylvania, $1 on pfd., 50¢ on common, payable Oct. 1 to holders of record Sept. 30; Sprague Electric, 50¢ payable Sept. 14 to holders Aug. 30; Oak Mfg., 35¢ payable Sept. 25 to holders Sept. 10; Stewart-Warner, 35¢ payable Oct. 6 to holders Sept. 14; Globe-Union Inc., 25¢ payable Sept. 10 to holders Sept. 1; I-T-E Circuit Breaker, 40¢ payable Sept. 1 to holders Aug. 23; Aerovox, 15¢ payable Sept. 15 to holders Sept. 1.

Raytheon placed new $4,000,000 note issue this week with New England Mutual Life Insurance Co. and State Mutual Life Assurance Co., due serially 1952-64; proceeds are for plant expansion and refund of $2,000,000 notes previously sold to same companies.

Network TV-Radio Billings

July 1951 and January-July 1951

(For June figures, see *Television Digest*, Vol. 7:29)

NETWORK gross TV time billings, including DuMont's for first time, rose to $8,964,581 for July, up from June's $8,432,462 minus DuMont (Vol. 7:29) and comparing with only $1,533,096 in July 1950. Billings for first 7 months of 1951 have reached $64,190,075, making it virtually certain networks will surpass predicted $100,000,000 for year (Vol. 7:32). Significantly, for first time, CBS-TV challenged NBC-TV's dollar leadership in July, reporting $3,434,659 billings vs. NBC-TV's $3,529,975.

Network radio billings in July were $11,733,804, considerably down from June's $14,872,111—CBS's $4,401,797 comparing with its June radio billings of $6,220,959 and NBC's $3,718,869 comparing with its June $4,739,193 (Vol. 7:29). January-thru-July network radio billings went to $107,232,580 from $109,231,899 same period last year. Radio reduction is accounted for not only by usual summer slump but by fact that lowered network rates were in effect. It's noteworthy that, during July, NBC-TV's dollar volume came within about $200,000 of its radio volume, and it's safe to assume its TV will overtake and exceed its AM within matter of month or so.

The Publishers Information Bureau figures:

NETWORK TELEVISION

	July 1951	July 1950	Jan.-July 1951	Jan.-July 1950
NBC	$ 3,529,975	$ 941,243	$ 30,246,722	$ 8,442,479
CBS	3,434,659	380,906	20,503,987	4,985,302
ABC	1,354,588	210,947	9,733,441	2,137,481
DuMont	645,359	*	3,705,925	*
Total	$ 8,964,581	$ 1,533,096	$ 64,190,075	$ 15,565,262

NETWORK RADIO

CBS	$ 4,401,797	$ 4,512,915	$ 43,650,557	$ 40,574,812
NBC	3,718,869	4,455,431	33,718,905	37,365,474
ABC	2,265,297	2,267,233	19,655,369	21,740,769
MBS	1,347,841	1,057,200	10,207,749	9,550,844
Total	$11,733,804	$12,292,779	$107,232,580	$109,231,899

* Figures for 1950 not available.

First labor union to apply for TV outlet is Chicago Federation of Labor (AFL), operator of commercial AM station WCFL, which filed this week for Channel 11, the educational channel FCC proposes to allocate to Chicago. United Auto Workers (CIO), operating FM station WDET, Detroit, has indicated intentions of applying for Detroit (Vol. 7:23), but hasn't filed as yet. Only other new TV applicants this week are WNOK, Columbia, S. C., seeking Channel 10, and WMOX, Meridian, Miss., Channel 11. These bring total applications now pending to 435.

Boxing fans are irate over capture of much-anticipated Sept. 12 Robinson-Turpin bout by Theatre Network TV (Vol. 7:33), asking what happened to coalition of TV set makers which nailed down July 18 Charles-Walcott fight for home TV (Vol. 7:28-29). Though no one is saying much, there's every indication manufacturers will be in there bidding for future fights. Some observers say manufacturers are showing they don't intend to be "played for suckers," outbidding everyone every time bait is dangled.

Dr. Philip Litvin, 45, husband of Mrs. Fanney Neyman Litvin, FCC examiner, was drowned Aug. 21 in rapids of Clarks Fork River in Montana when his canoe capsized. He was vacationing with his wife, who saw the accident, in which Montana broadcasters Ed Craney and Vern Totten managed to swim ashore after Dr. Litvin, who could not swim, was torn by force of water from Craney's grip. Dr. Litvin was a Washington psychiatrist, a lieutenant-colonel in Army medical reserve, and associate professor of neurology at Georgetown U.

Telecasting Notes: Only big league baseball team that never permitted telecasts, Pittsburgh Pirates, has relented for 3 away games to be sponsored on WDTV jointly by TV dealers and Sealtest, thru Ketchum, McLeod & Grove, Pittsburgh; first is Aug. 26 game with Dodgers from Ebbetts Field, Brooklyn, next are Sept. 22 & 23 with Reds from Cincinnati . . . Seven Detroit area AM stations, emulating CBS & NBC (Vol. 7:31-32), have joined for campaign to "sell radio" with newspaper, car card, radio promotion—using slogan "Wherever You Go—There's Radio" . . . Associated Tulsa Broadcasters, 6 AM stations headed by KVOO's William B. Way, has been formed to do same sort of promotion . . . NBC-Radio out with brochure titled *NBC Radio in TV Areas*, study of impact of TV on radio, with text, maps and charts designed to prove network radio is still good buy even in TV areas . . . "Takeover day" for KFI-TV, Los Angeles, whose $2,500,000 sale (Vol. 7:23) to Don Lee Enterprises has been approved by FCC (Vol. 7:32), is due on or about Sept. 1, after which call letters will be changed to KHJ-TV . . . Call letters for Atlanta's new outlet, scheduled to begin operation Oct. 1, subject to current dispute (Vol. 7:32-33), are to be WLTV —the WCON call to be abandoned . . . Denver's KLZ, TV applicant, is telling its constituents city's first commercial video won't be offered until March 1, 1953 . . . Long-term contract for *The Goldbergs* has been signed by NBC-TV, time and sponsor not yet announced . . . Ten pre-1948 Paramount releases produced by Wm. Pine & William Thomas, who own rights, being released to TV via MCA—ABC reported paying $175,000 for 2-run rights on its own 5 stations. Films are: *Wildcat, Wrecking Crew, Caged Fury, Tornado, Take It Big, Dangerous Passage, Follow That Woman, Swamp Fire, Fear in the Night, Shaggy* . . . Los Angeles Times' KTTV reported to have paid $225,000 for rights to 175 Republic films (minus Gene Autry & Roy Rogers items) . . . With NBC-TV relinquishing 11-12 midnight *Broadway Open House* time to stations, Camels has taken it for *Camel Film Theatre*, with releases from TV Films Inc., on NBC's WNBT, WNBW, WNBQ . . . New musical *Top Banana*, with Phil Silvers, opening in N. Y. about Nov. 1, has ABC-TV & MCA owning small pieces (trade press says $7000 each), following example of RCA-NBC in backing *Call Me Madam* . . . Philadelphia's WFIL-TV has asked FCC permission to install temporary 3-hop microwave from Atlantic City to carry Sept. 8-9 "marathon" from Convention Hall, on behalf of cerebral palsy campaign . . . KPIX, San Francisco, Sept. 1 raises base rate from $450 to $600 an hour, new Rate Card No. 4 granting discounts up to 20% for 260 or more times; Class B time now $450; one-min. spots $120 Class A, $90 Class B . . . Harold Gross' WJIM, Lansing, and WGFG, Kalamazoo, switch from ABC to NBC Sept. 30; he's owner also of WJIM-TV.

CBS will virtually rebuild Mt. Wilson installation of KTSL, Los Angeles, to which it expects to move within 60 days. This week it applied for and received FCC approval for reconstruction and move. Grant specifies reduction of powers from 9.3 kw visual, 6 kw aural, to .5 kw visual, .3 kw aural—per FCC's freeze-grant policy. Upon completion, station will undoubtedly ask for STA for increase under recent temporary power hike ruling (Vol. 7:30-33). CBS said present installation is "engineeringly unsound" in that tower is too close to building and transmitting equipment is poorly located. Another important reason is that FCC was considering whether station was constructed by original owner Don Lee before obtaining CP, was thus illegal. FCC grant indicates "taint" removed. CBS estimates cost of project at $130,569.

FCC loses 10% of appropriations in bill that cuts its budget to $6,116,650 for fiscal 1952 (July 1, 1951-June 30, 1952) from $6,600,000 of preceding fiscal year.

RULE-OF-THUMB FOR TV STATION COVERAGE: The old AM "power complex" is admittedly hard to shake, Mr. Timebuyer, but the basic facts of TV technical life clearly relegate brute power to a smaller role in TV coverage.

What with 40-odd power boosts recently authorized by FCC (Vol. 7:30-34), and with more and more stations moving to taller towers, coverage claims are becoming more confusing than ever. Nor will problem get any simpler when freeze ends.

Powers will jump to 100-200 kw. Antennas will frequently zoom to 1000 ft. or more. Uhf will be commercial for first time. Receivers and their antennas will improve. Channels will get more crowded.

It's not as easy to calculate as radio yet, and claims for TV powers are prone to be exaggerated. Actual proof of viewing is the payoff, of course, but certain factors will tell you whether a signal is likely to be available to be viewed.

This checklist will serve as rough guide -- rough because local situations vary greatly: (a) Note power, give it moderate weight but forget old AM power fetish. (b) Give close attention to height of antenna above general countryside -- "above average terrain" in engineering lingo. (c) Note whether channel number is high or low. (d) Check nearest stations on same channel -- how close, how high, how powerful. That gives you best rule-of-thumb.

* * * *

FCC and industry gave coverage question intensive study before Commission came up with current proposal for ending freeze. Two grades of service are specified for each station -- A and B. Very broadly speaking, these stand respectively for "good-to-excellent" and "fair-to-good" when divested of technical verbiage.

Today, average station has about 15 kw ERP (effective radiated power) on Channels 2-6, 25 kw on Channels 7-13. Using FCC's charts, you find 15-kw Channel 2-6 stations giving Grade A service out to 17 miles, Grade B to 45. With their 25 kw, Channel 7-13 stations give 21-mile A and 40-mile B. Note surprising fact that higher channels actually do better than low on Grade A.

Above figures assume antennas 500 ft. above average terrain -- about average among today's stations. Jump height to 1000 ft. and Channels 2-6 give Grade A out to 25 miles, B to 56. Channels 7-13 give 31 and 50 miles for A and B.

Now, let's go back to 500 ft. and see what power boosts may do. FCC intends to allow 100 kw for Channels 2-6, 200 kw for Channels 7-13. Lower channels would give 27-mile A, 57-mile B. Higher channels would give 33-mile A, 50-mile B.

Note carefully how addition of 500 ft. to antenna gives about same results, from distance standpoint, as 6-to-8 times increase in power. But there's no substitute for power in making indoor antennas work and driving signals behind buildings.

If you combine power and height increases, these figures emerge: Channels 2-6, 37-mile A and 70-mile B. Channels 7-13, 44-mile A and 61-mile B.

For uhf stations, due to get 200 kw, 500-ft. antenna would give 29-mile A, 41-mile B. With 1000 ft., it's 40-mile A and 52-mile B.

Practically speaking, service is obtained and will be obtained well beyond

Copyright 1951 by Radio News Bureau

mileages given for all foregoing categories. But Commission had to draw line somewhere, and there's no widespread disagreement with its vhf proposals. However, there's considerable question about uhf coverage, with many engineers dubious about uhf's potential in rough terrain -- particularly with "mere" 200 kw. There's little question uhf will operate at disadvantage in hilly areas like Pittsburgh.

Current reports of 100-150 mile reception will gradually diminish, as they did in AM, when more stations get on each channel. Each station acts as block to signals of others on same channel.

Single TV stations serving vast areas, as AM clear-channel stations do, just aren't possible with present type of station. AM signals hug curvature of the earth, while TV signals behave more like beams of light, most of energy shooting off into space beyond horizon. Hence the importance of antenna height -- wider horizon. Satellites or Stratovision and the like might offer wide-range coverage, but their prospects are slim for the visible future.

FCC aims to give all stations equal potential coverage -- hence more power for higher channels. But there will probably always be a "best antenna site in town." Yet here, too, FCC encourages all stations to use same "best" site, e.g., Empire State Bldg., now scheduled to be site of 6 of New York area's 7 stations.

PROGRAM RIVALRY—PUBLIC THE WINNER: This summer's programs, with a few exceptions, were admittedly pretty bad -- which may account in part for slow sale of TV sets.

But from now on, you're going to see such intense competition for audience -- networks vs. networks, stations vs. stations, sponsors vs. sponsors, TV vs. radio -- that this sixth year of post-war commercial programming can hardly fail to offer something to please the most exacting televiewer.

More than any other single factor, good programs sell receiving sets -- and the new crop of shows certainly should. And this season, actually only second year of big-time TV operation, most of the stations can hardly plead poverty, for:

(a) Their time is being sold at much higher rates, with plenty of sponsors.

(b) Nearly all have moved into profit operation, after some lean years, and so they're more inclined to spend on plant and programs. Good many stations are now grossing well into the millions, though most have heavy investments and past losses yet to write off; several we know will gross better than $5,000,000 each this year.

(c) All are thoroughly "sold" on the TV medium, thanking their lucky stars they got into TV before the FCC freeze. They're pioneer enterprisers who know from radio experience they can best consolidate their competitive advantages by pleasing the public. (All but 21 of the 107 stations are affiliated with local AM stations.)

Even before traditional Labor Day turning point, you see spectacle of the networks, always the program leaders, competing hammer and tongs for vantage. And networks in TV, as in radio, are the main experimenters and program providers.

Competitively, ABC & NBC would seem to have head start because each owns 5 stations in major markets, whereas DuMont owns only 3, CBS only 2 outright and 45% of third. Yet real race for leadership in TV, as in radio, is between NBC and CBS -- with former (backed by parent RCA, big laboratory and manufacturing pioneer) far ahead. Usually live-wire CBS was a later and more reluctant convert to TV.

ABC and DuMont are coming along nicely. But though they invested wisely in stations (which are quite profitable, whereas network operation per se isn't yet), they have never cut much ice either program-wise or sponsor-wise. They still run rather poor third and fourth in network billings, the best barometer (see Vol.7:34).

* * * *

Your daily newspaper listings will report the new and resumed shows, but best trade sizeup we've seen of the way the big competition is shaping up is that of Variety's George Rosen. That top-notch observer is more bluntly outspoken than trade reporters usually are. Here's how he looks on TV's big-league "slugging match":

"The NBC vs. CBS competitive TV program sweepstakes for 1951-52, which preem in the next couple of weeks, projects NBC as the powerhouse in its array of personalities and major productions. Video-wise, it's a throwback to the days when NBC was

riding wide and handsome in the two-way radio rivalry before Columbia's Bill Paley invested millions of dollars in corralling top personalities into the CBS fold.

"Oddly enough, some of those lured into the Paley camp, notably Groucho Marx and Red Skelton, have since joined the big-league NBC-TV roster. Likewise, the transitional era finds the two major personalities who succumbed to Paley's 'come-on-to-my-house' capital gains blandishments -- Jack Benny and Bing Crosby -- have yet to demonstrate their preeminence in TV, with Crosby still remaining aloof...

"That NBC has succeeded in jockeying itself into the TV program leadership is attributed in measure to a blueprint concept at variance with the Columbia philosophy of 'grab the client and let the show follow,' a state of affairs which finds one of the web's choice properties, Sam Levenson, frozen out of any of the choice time segments and provoking Gertrude Berg's signaturing with NBC.

"NBC, on the other hand, is credited with demonstrating an awareness of 'the show's the thing' formula in alloting specific time segments to the talent and inviting clients to take it or leave it...[A] breakdown of NBC-CBS program rivalry would indicate that, if anything, NBC is more of a powerhouse than ever."

Editor Rosen then goes on to compare nightly NBC vs. CBS showings, noting that Saturday-Sunday will offer the "greatest concentration of regularly scheduled names in show biz history." Saturday night on NBC-TV, for example, we're promised The Goldbergs at 7, One Man's Family at 7:30, All-Star Revue (Jimmy Durante, Danny Thomas, Ed Wynn, Jack Carson) at 8, show of Shows (Imogene Coca & Sid Caesar) at 9, Hit Parade at 10:30 vs. CBS's Sammy Kaye, Ken Murray, Faye Emerson, Songs for Sale.

Sunday nights, NBC-TV offers Chesterfield's Bob Hope alternating with Jerry Lester and others at 7, opposite CBS-TV's Gene Autry; Young Mr. Bobbin at 7:30, opposite This Is Show Business; Comedy Hour (Eddie Cantor, Martin & Lewis, Jackie Gleason, Tony Martin, alternating) at 8, opposite Ed Sullivan's Toast of the Town; Philco Television Playhouse at 9, opposite Fred Waring Show; Red Skelton at 10.

Those are merely the week-end night lineups. Daytime and other nights also have lots of big program money and brains and sweat going into them -- all for the delectation of the 13,000,000-plus American homes owning TV sets and the millions more the TV people want to add to that audience.

STATUS OF 'SILENT' FREEZE HEARING: "Paper" FCC hearing on TV allocations is in full swing, things going about as expected. DuMont's nation-wide plan drew a flock of oppositions, 124 in all, and deadline for first geographical group is Sept. 4.

It's too early to tell whether delays will occur after Nov. 26, when all filings are in. Real question is what FCC does about requests for oral presentation when and if they arrive. Commission will undoubtedly be extremely reluctant to grant such requests for fear of opening floodgates and winding up with interminable oral hearings -- back where everyone started.

Oppositions to DuMont proposal are same as those presented in original comments (Supplements No. 72-72C), with amplification. Fact there's such large number of these is popularly construed as widespread disapproval of plan. Actually, there are far fewer oppositions to DuMont's proposal than to FCC's -- largely because DuMont would allow more vhf stations. Most of those disagreeing with DuMont like its philosophy but prefer their own implementations of it.

Individual filings aren't generally voluminous yet, but some will be when first sectional group, covering Maine to Maryland, comes in. New York's Board of Regents, proposing 11-station educational network, has 400-page document.

[Deadlines for each area are detailed in Supplement No. 73.]

There's lots of cynicism about filings, many parties saying "FCC will never look at these." But industry went along with "written hearing" plan, and still does, because it offers target dates for ending freeze, whereas oral hearing loomed as talkfest without end.

* * * *

Educational reservation question took another turn this week. FCC Chairman Coy wrote Sen. Johnson that he now sees "in a new light" the question whether FCC

has legal authority to require commercial stations to set aside specific percentages of time for educational programs.

But Coy still doesn't think much of handling educational TV that way -- even though Sen. Johnson prefers it to reserving channels for schools. Said Coy:

"The policy problems involved in possible exercise of authority to devote a specified percentage of broadcast time to educational programs are of the most formidable kind, and I have a real doubt as to the desirability of such a requirement. The first problem, and probably the most difficult, would be adequate definition of the term 'educational' program."

Coy had changed his mind after reading memo from general counsel Benedict Cottone, who disagreed with original opinion by assistant Max Goldman (Vol. 7:33).

VIDEOTOWN FIGURES, HANDLE WITH CARE: "Videotown" surveyors got fingers burnt last year when they "warned" industry that their mid-year findings indicated set sales would amount to only 4,000,000 for 1950. Prediction was manifestly off-base at the time -- even if there had been no Korea-prompted buying rush in offing (Vol. 6:26).

Actually, prediction was quite accurate -- for Videotown. But it was cockeyed for country as a whole. This week, survey's sponsor, Cunningham & Walsh ad agency, issued "Videotown IV," which shows town's TVs increased 113% during 1950 over number in 1949. Thus, agency's prediction of "doubled" ownership was quite close. As we pointed out at time, danger lay in assuming that single small "mature" market (40,000 pop., 40 mi. from New York) was representative of whole U.S.

No national prediction accompanies new survey, which covers situation as of June 1, 1951 -- but year's sales outlook for Videotown should come closer to country-wide pattern, simply because all TV markets are one year older.

Survey estimates this year's sales will reach two-thirds those of 1950. Thus if 7,500,000 were made and sold last year, that means around 5,000,000 this year -- not far from most guesstimates. (Actually, inventory pileups indicate less than the 7,500,000 were sold -- possibly as many as 1-2,000,000 overlapping from 1950 production into 1951 pipelines.)

Replacement market of about 400,000 for 1951 could be anticipated, if it's safe to "extrapolate" Videotown findings. Of present owners, 3.8% intend to replace this year -- 62% wanting bigger screen, 29% seeking better performance.

* * * *

Survey in unidentified Videotown is exhaustive, comprising interviews with all 5457 TV owners in town, plus 528 non-owners. Among other findings: (1) Only 65 families own 2 sets, and mere 32 are using both. (2) Color impact is negligible -- 43% saying they'd leave it alone, 20% undecided; 17% planning on converter or adapter; 8% planning on converter or adapter, if they could afford one; 7% expecting to buy color set; 6% saying "it depends on cost." (3) Of total sets, 21% are 10-in., 32% are 12½-in., 31% are 16-in., 16% are 17-in. and up. (4) Fifteen brands, unidentified, account for 94.9% of sets; 4 dealers sold 48% of total.

Viewing-listening-movie habits: (1) During average evening, 86% of sets are turned on, compared with 88% last year; set is on 4.1 hours daily, same as last year. (2) Husbands watch 11.2 hours Mon.-Fri., wives 12.3, while children range from 6.6 hours for sons over 18 to 12.3 for youngsters 10-18. (3) Evening radio listening drops to one-eighth as much as pre-TV, but daytime listening is little affected. (4) Movie attendance is only 20% higher among non-owners than among set owners this year, compared with 100% last year, but attendance was down 40% in all groups -- thus attributable to something besides TV.

Televising of public hearings was endorsed on final report of Senate Crime Investigating Committee Aug. 31. Committee proposed code to govern telecasts of Congressional events which upholds public's "right to be informed of the activities of its Govt." as well as rights of witness to fair hearing, but says "a witness does not have any inherent right to interfere with the rights of the public in this regard." Other suggestions: (1) Sponsors for telecasts should be approved in advance by committee holding hearing. (2) Commercials shouldn't be broadcast from hearing room. (3) Station breaks limited to 10 seconds. (4) Proceedings shouldn't be interrupted for comment or commercials. (5) "Institutional" commercials of minute or less permitted during pauses and intermissions. (6) Local stations banned from interrupting network program to insert local or spot announcements.

FOOTBALL is CBS's greatest color effort to date. It claims 11-station network, East and Midwest, lined up for 9-game series to start Sept. 29 with Penn-California game at Franklin Field, Philadelphia. Schedule is attractive, but CBS suffers same enormous handicap it did when it went commercial 2 months ago (Vol. 7:26)—no sets. Only few dozen appear in prospect, most supplied by CBS.

Neither stations nor sponsor are yet disclosed by CBS. A regular sponsor would be CBS color's first; several advertisers gave system sendoff, but none has bought daily schedule since.

As inducement to stations, CBS is footing most bills, offering number of color sets (usually 5)—plus 10% of rate card. At least two of the stations planning to carry football chose to take it free, refusing 10% on grounds it's bad precedent to depart from rate.

In Midwest, definitely planning to colorcast games are: WBKB, Chicago; WBNS-TV, Columbus; WJBK-TV, Detroit. WHIO-TV, Dayton, is said to be "willing." WKRC-TV, Cincinnati, is undecided. Other cities may come in.

Reports in Chicago are that Webster-Chicago claims 10,000 slave units in works, that it could make 36 available to WBKB by mid-September, 36 more by Oct. 1.

How much demand for color sets and adapters will be created is anyone's guess. CBS faces mighty tough competition in "free" NCAA schedule to be sponsored by Westinghouse on NBC-TV (Vol. 7:30).

The 4 Eastern stations which have carried color feeds from New York give this status report on color schedule:

WMAR-TV, Baltimore—Will carry full football schedule if sponsored, "some" games if not. Continues daily 10:30-11 a.m. show. Has had one color set, expects 8-10 for football, 5 to be supplied by CBS.

WTOP-TV, Washington—"Probably" will carry all games. Continues daily morning program. Expects "some sets" from CBS for football.

WCAU-TV, Philadelphia—To use all games. Has been taking morning program from coaxial, feeding it closed-circuit to 2 receivers in studio. Expects 5 sets from CBS.

WNAC-TV, Boston—"Undecided" about football. Now colorcasting morning show.

Meanwhile, proponents of compatible system are anxious to get on with field testing. Panel 13 (standards) meets Sept. 7, hopes to fix definitely on set of specifications to field test (Vol. 7:32-33). Its findings go to whole National TV System Committee at N. Y. meeting Sept. 18.

RCA-NBC resumed its colorcasts in New York this week with 10-10:15 a.m. daily schedule. Larger-scale showings, including public demonstrations, are set for 10-10:20 a.m. Sept. 10-21. RCA, like all compatible system field testers, is handicapped by fact FCC limits colorcasts to periods outside regular programming hours. What with growing daytime commercial schedules, experimenters may soon find themselves transmitting color outside normal working hours only.

RCA chairman David Sarnoff renewed his campaign for dual standards—FCC authorization of compatible system alongside CBS's—with statement this week, reading:

"Neither pride nor prejudice, nor politics, nor the private interests of any member of the industry will make the final decision on this vital question. If given the opportunity to do so, the public can and will make that decision. I strongly favor giving the public such an opportunity . . . Only [with dual standards] can the public have the opportunity to see both systems in actual operation, to reach its own decision, and to make its own choice."

CBS's Dr. Peter Goldmark, in *Broadcasting Magazine* interview (Aug. 27), said tests using RCA tri-color tube with CBS system have shown that it performs far less satisfactorily than color disc in "every aspect—color, contrast and detail." He said tube is impractical to manufacture from mass production and price standpoints. Dr. Goldmark's statement is at variance with informal reports from several other set manufacturers who've been using RCA tube in their labs to monitor CBS colorcasts.

RCA-CBS competition never wanes, at home or abroad. Both claim great success in TV "Battle of Berlin" (Vol. 7:32). RCA reports that 1,250,000 saw its Berlin demonstations; CBS has brought back "Miss Color TV of Germany." CBS scheduled surgical showings in Paris; RCA announced 10-week surgical tour starting Sept. 1—Copenhagen, Catania, Milan, Rome, Turin, Brussels.

Telecasting Notes: Riding high on current tide of sponsorships, ABC issued 14-page press release Aug. 29 to report sale of $24,131,000 worth of time ($6,808,000 on its TV network) covering 7-week period to Oct. 14. Some 75% are new accounts, it stated, listing these new TV sponsors: Bona-Fide Mills, Bristol Myers, Brown Shoe, Celanese Corp., Cliquot Club, DuPont Orlon Div., Hollywood Candy Co., Jene Sales, C. H. Masland, Sundial Shoe Co. . . . Despite ownership of 5 TV stations, all quite profitable, ABC-TV as network has consistently ranked poor third in TV billings, now looks like it's approaching sellout status, as have NBC-TV & CBS-TV [for their relative status as of end of July, see PIB billings report, Vol. 7:34] . . . "Abatement of the TV hysteria" is one of reasons given by MBS president Frank White for that AM network's 7% increase in billings (to $10,200,000) for January-July period—this despite current radio network rate reductions . . . "Use radio to sell radio" campaigns (Vol. 7:31-32, 34) really under way, with NARTB preparing 15-min. transcriptions to be sent monthly to member stations to use as broadcasts to public—extoling entertainment, news, public service, advertising merits of radio; opposite side of discs contains radio-promoting spots . . . World Broadcasting System (Ziv) also preparing package of "sell radio" promotional material to go to affiliates of its transcription network . . . "Television Square," WOR-TV's 47,000 sq. ft. structure occupying nearly entire block from 67th to 68th Sts. between Broadway & Columbus Aves., New York, is month ahead of schedule, should be ready for occupancy Dec. 1 . . . Canadian Radio Section, setting forth in text and ads the merits of commercial radio in Dominion, occupies 35 pages of Aug. 27 *Sponsor*—mostly devoted to AM because "TV in Canada is today in a state of creeping growth" while CBC builds Toronto & Montreal stations now apparently delayed until "fall of 1952" . . . Foreign-language AM outlet WOV, New York, not itself in TV, has unusual tieup with one of its sponsors, Buitoni Macaroni Corp., of New York & Rome, whereby WOV staff under mgr. Ralph Weil will supervise film series to be shot at factory in Italy, titled *Continental Holiday with Buitoni*, films then used on sponsored spots on TV . . . New York's WPIX signs up 117 sports events from Madison Square Garden this season, including basketball, hockey, rodeo and dog & horse shows, under contract inked Aug. 31 . . . Louis B. Mayer, ex-MGM chief, reported by *New York Journal-American* to be planning to enter TV film production with Henry Ford II, Walter P. Chrysler and others prepared to invest $100,000,000 over 10-year period . . . WCBS-TV, New York, has issued Rate Card No. 10, effective Sept. 1, fixing base Class A hour rate at $3750, half hour $2250, 15-min. $1500, one-min. ann. or 20-sec. station breaks $775—with frequency discounts . . . WMAL-TV, Washington, Sept. 15 raises base hour rate from $500 to $600, 5-min. from $150 to $175, 1-min. from $90 to $120 . . . WHAS-TV, Louisville, has new rate card as of Sept. 1, raising base hour rate from $400 to $500, announcements from $65 to $100.

Personal Notes: Wayne Coy, FCC chairman, flies Sept. 3 to Japanese treaty conference in San Francisco as member of President Truman's party aboard the *Independence;* he was invited personally by the President, so as to be present at Sept. 4 opening of first transcontinental TV hookup . . . Robert McCormick, NBC-TV Washington news chief and commentator, assigned to Europe as business mgr. for NBC-TV news, leaving in mid-Sept. for Paris headquarters; his executive job in Washington is taken over by Julian Goodman, his commentator functions by David Brinkley . . . Robert K. Richards, NARTB public affairs director, reelected secretary of Council of Journalism Inc., Northwestern U's Baskett Mosse elected new chairman . . . John McClay, ex-WPIX, New York, now director of operations, WCAU-TV, Philadelphia . . . Bill Brennan named program director of KTSL, Los Angeles, succeeding Cecil Barker, now with KECA-TV . . . Robert M. Shaw, ex-General Motors, joins ABC as administrative asst. to TV program v.p. Harold L. Morgan . . . Albert Zugsmith, formerly associated with Smith Davis in newspaper-radio brokerage field, now in Hollywood, head of International Film Investment Corp., producing and financing pictures . . . Aaron Beckwith, ex-WAGE, Syracuse, now gen. sales mgr., United Television Programs . . . Wilfred S. Roberts, TV-radio director, and John F. MacKay, copy chief, elected v.p.'s, Pedlar & Ryan . . . A. J. Potter, ex-Wm. Esty Co., joins Los Angeles office of Calkins & Holden, Carlock, McClinton & Smith as TV-radio director . . . Lovick E. Draper, ex-ABC and D'Arcy Adv., has joined Houston office of Foote, Cone & Belding as account supervisor, Grand Prize Beer . . . Carlo DeAngelo elected president of Productions for Television Inc., at same time will supervise TV for Emil Mogul agency . . . Franklin S. Roberts, ex-Harry Fiegenbaum Adv., named TV-radio director, Wil Roberts Adv., Philadelphia.

Network Accounts: Second season of NBC-TV *Kate Smith Hour*, staged in Hudson Theatre Mon.-thru-Fri. 4-5, resumes Sept. 10 as complete sellout, with Procter & Gamble taking first 15 min. each day, others as follows: Mon., Pillsbury Mills, Chesebrough Mfg., Cannon Mills; Tue., Simmons Co., Esquire Shoe Polish, Singer Sewing Machine Co.; Wed., Andrew Jergens, Glidden Co., Gerber Products; Thu., Simoniz Co., Minute Maid Corp., Hunt Foods; Fri., Jergens, Glidden, Hunt. In addition, Miss Smith will start night variety show on NBC-TV under same title Sept. 19, Wed. 8-9 . . . NBC-TV *Show of Shows* (Sid Caesar & Imogene Coca) resumes Sept. 8, Sat. 9-10:30, with these sponsors: Camels, 9-9:30; S.O.S., Benrus and Libby, McNeill & Libby, partic., 9:30-10; Lehn & Fink and Eversharp, alternate weeks, 10-10:30 . . . CBS-TV daytime *Garry Moore Show*, Mon.-thru-Fri. 1:30-2:30, has been sold out, with Junket taking Tue. & Thu. 1:45-2 from Sept. 4 and Corn Products (Linit) taking Tue. 2:15-2:30 starting Oct. 16. Other sponsors: GE, 1:30-1:45 Mon.-Wed.-Fri. and Best Foods Tue. & Thu.; Chase & Sanborn, 1:45-2 Mon.-Wed.-Fri.; Procter & Gamble (Duz & Ivory), 2-2:15 Mon.-thru-Fri.; R. J. Reynolds Tobacco (Cavalier cigarettes), 2:15-2:30 Mon.-Wed.-Fri.; Quaker Oats (Aunt Jemima mix), 2:15-2:30 Thu. . . . Crawford Clothes (clothing chain) Sept. 9 takes sponsorship of *They Stand Accused* on DuMont Network, Sun. 10-11, originating in WGN-TV, Chicago, thru Al Paul Lefton; same sponsor has also bought *Public Prosecutor*, mystery film with studio panel to solve crime, on WABD, New York, starting Sept. 6, Thu. 9:30-10 . . . CBS-TV's *Alan Young Show*, sponsored by Ford Dealers in Los Angeles and on kinescopes for East, resumes Sept. 20 on Eastern network for Esso, Thu. 9-9:30, thru Marschalk & Pratt, and on Midwest network for Kroger grocery chain, thru Ralph H. Jones Co., Cincinnati . . . Bristol-Myers Co. on Sept. 24 switches *Break the Bank* from NBC-TV to ABC-TV, Mon., Wed. & Fri., 11:30-12 noon, thru Doherty, Clifford & Shenfield; Philip Morris takes Tue. & Thu. segment, thru Cecil & Presbrey . . . C. H. Masland & Sons (rugs & hunting-fishing clothes), on Aug. 30 began *Masland at Home Show* on ABC-TV, Thu. 10:30-10:45, thru Anderson & Cairns Inc., N. Y. . . . Peter Paul Co. (candy) from Sept. 13 will sponsor Thu. segment of Mon.-thru-Fri. *Gabby Hayes Show* on NBC-TV, 5:15-5:30, thru Maxon Inc.; Mon. & Fri. shows sponsored by Quaker Oats, which also sponsors it Sun. 5-5:30, thru Sherman & Marquette . . . Time Inc. has purchased one-time on ABC-TV Fri., Sept. 7, 10-11 p.m., for *Your Stake in Japan*, dramatic show timed for eve of signing of peace treaty, placed thru Young & Rubicam.

Station Accounts: National Shoe Stores Inc. is sponsoring 1935 Gene Autry serial *The Phantom Empire* on NBC's WNBT, New York, Sun. 10-10:30 a.m., though all current Gene Autry films are made for CBS-TV; in Los Angeles, Arden Farms (dairy chain) has bought series of Autry pictures, made for CBS-TV, to be carried on ABC's KECA-TV, paying reported $1000 per run . . . Corning Glass Works, for Pyrex, using participations on *Kitchen Fare*, Thu. 11-11:30 a.m. on WABD, thru Young & Rubicam, N. Y. . . . Oakite Products Inc. (cleansers) will use TV with other media in new Sept. 10-Dec. 10 campaign featuring consumer contest, thru Calkins & Holden, Carlock, McClinton & Smith, N. Y. . . . P. Ballantine & Sons (beer & ale) Oct. 4 begins *Intrigue*, mystery series, on WNBT and WNBW, Thu. 10:30-11, thru J. Walter Thompson, N. Y. . . . Stroh Brewing Co. to sponsor home games of Detroit Red Wings hockey team on WWJ-TV and Lansing's WJIM-TV, simulcast while carried on 16-station state radio network . . . Old Gold to sponsor *Queen for a Day* on KECA-TV, Los Angeles, Thu. 8-8:30 starting Sept. 13, thru Lennen & Mitchell, N. Y. . . . New sponsors on WCBS-TV, New York, all using announcements or participations, include *World Telegram & Sun*, thru Donahue & Coe; Stahl-Meyer Inc. (Ferris hams), thru Dowd, Redfield & Johnstone; Murine Co. (eye wash), thru BBDO, Chicago; Ullman Co. (Shelf-N-Edge plastic), thru Posner-Zabin Adv.; Duffy-Mott Co. (Sunsweet prune juice), thru Young & Rubicam; V. LaRosa & Sons Inc. (macaroni products), thru Kiesewetter Associates; Silex Co. (Fresherator), thru H. B. Humphrey, Alley & Richards . . . Among other advertisers reported using or planning to use TV: Minnesota Mining & Mfg. Co. (Underseal), thru BBDO, Chicago; U. S. Industrial Chemicals Inc. (Super-Pyrol anti-freeze), thru Geyer, Newell & Ganger, N. Y.; George D. Roper Corp. (pumps), thru Cummings, Brand & McPherson, Rockford, Ill.; Bowman Biscuit Co. (cookies & crackers), thru Ball & Davidson, Denver; Electric Steam Radiator Corp. (portable steam radiators, vaporizers, bottle warmers, etc.), thru O'Neil, Larson & McMahon, Chicago; Casite Corp. (automobile oil), thru Keeling & Co., Indianapolis; Union Starch & Refining Co. (Pennant Reddi Starch) and Scott Petersen & Co. (meat products), thru H. W. Kastor & Sons, Chicago; Chase Candy Co., thru Glee R. Stocker & Associates, St. Louis; Whirlpool Corp. (Whirlpool washers), thru Beaumont & Hohman, Chicago; Omar Inc. (bakery products), thru Fitzmorris & Miller, Chicago; Drackett Co. (Windex), thru Young & Rubicam, N. Y.; Portland Woolen Mills (blankets, robes & cloth), thru MacWilkins, Cole & Weber, Portland, Ore.; Carnation Co. (evaporated milk), thru Erwin, Wasey & Co., Los Angeles; Wander Co. (Toddy), thru Grant Adv., Chicago; W. P. Fuller & Co. (paints) and Lucky Lager Brewing Co., thru McCann-Erickson, San Francisco.

Edward Y. Flanigan, 59, mgr. of WSPD & WSPD-TV, Toledo, died Aug. 25 of pneumonia. He's survived by wife, 2 daughters and son.

CANADIAN BROADCASTING CORP., which not only operates string of govt.-owned radio stations and a broadcasting network in competition with private enterprisers, but also is charged with regulating Dominion's radio and TV, apparently isn't going to issue any CPs for private TV stations until its own first 2 are completed in Toronto & Montreal sometime next year (Vol. 7:22, -29-30).

Nor will it even disclose who are the private applicants, and for what channels. Indeed, efforts to get list of applicants and channels sought from official sources have met with official avowal that such information isn't releasable!

From private sources, however, we learn these applicants have thus far been heard, decisions on all deferred: CKEY & CFRB, Toronto; CKAC & CFCF, Montreal; CKLW, Windsor; CFRA, Ottawa; CKNW, New Westminster, B. C.; Canadian Famous Players Ltd., theatre chain, for Toronto; Mastervision Ltd., radio manufacturer, also for Toronto. Denied was application by CHML, Hamilton, presumably because CBC wants to build own station on the one vhf channel allocated there. There may be other applications on file, but CBC won't tell who they are. [For list of proposed TV channel allocations in Canada, see pages 59-60, *TV Factbook No. 13.*]

Thus, Canada lags behind even Mexico in TV, and of course far behind U. S., even with our freeze—albeit some 50,000 Canadian homes near border have bought TV sets to receive U. S. stations. Exasperated private broadcasters partially blame U. S. interests for bureaucracy-bound condition in their country. Said one: "Frankly, the galling part of this whole incredible setup, with its all-powerful State-owned CBC at the apex, could not exist without the benevolent support and cooperation of the U. S. networks, who are such ardent supporters of free enterprise at their own meetings. They feed virtually all their best programs to the CBC, thus permitting it to continue and on much better deals than their own affiliates in the U. S., to our knowledge."

———■———

More lenient provisions of new construction controls toward small jobs (Vol. 7:31-33) have resulted in swift go-ahead for some broadcasters who applied under old regulation for permission to begin construction or alterations. They were notified they're exempt under new regulations (M-4A, CMP Reg. 6) because their projects require less than 2 tons of steel, 200 lbs. of copper, no aluminum. NPA's Washington office told these 3 applicants their construction isn't restricted under new controls: WBTV, Charlotte, which had applied to begin alterations to TV studio, valued at $12,064; WOOF, Dothan, Ala., broadcasting building, $28,000; WPAQ, Mt. Airy, N. C., broadcasting station, $11,350. Other applicants whose projects are exempt were notified from field offices where they filed applications.

Week's only application for new TV station was filed by Rib Mountain Radio Inc., seeking Channel 7 for Wausau, Wis., 40% owned by *Wausau Record-Herald*, 60% by the Central Bcstg. Co. (Morgan Murphy-Walter Bridges group) which owns AM stations in Minnesota and Wisconsin, is applicant for Duluth, Hibbing, Madison, Eau Claire *(TV Addenda 13-C)*. Total applications now pending: 436. Reported readying applications are KBOR, Brownsville, Tex., opposite Matamoros, Mexico, where new XELD-TV is testing (Vol. 7:31-33); and Oklahoma Television Corp., planning to apply for Channel 9 in Oklahoma City, prepared to spend $1,500,000 on installation including 200-kw transmitter and 1500-ft. tower. Latter group includes Edgar T. Bell, ex-WKY, former Gov. Roy J. Turner, RCA distributor Luther T. Delaney and others. [For list of all applications pending, see *TV Factbook No. 13* with Addenda 13-A to 13-H.]

Three-man "talent committee" of Salary Stabilization Board began study Aug. 30 of pay policies and problems involving performers in TV, radio, movies and on the stage. Committee, which will advise Salary Board, is headed by Roy Hendrickson, former Agriculture Marketing Administrator. Other members are Philip F. Siff, ex-director of Selznick International and United Artists, and Neal Agnew, ex-Paramount Pictures v.p., now consultant to independent motion picture distributors. William E. Sanborn, member of Salary Board, is serving as committee's executive secretary.

Jerry Fairbanks Productions merger into Isaac L. Levy's Official Films Inc., for which latter was to pay 175,000 of 2,000,000 authorized shares (Vol. 7:22), has been dissolved—and Jerry Fairbanks resumes presidency of Hollywood firm bearing his name, with Sid Rogell as executive v.p. in charge of studio operations. Firm reports it has secured outside financing, but its current series of TV films will be distributed by Official Films Inc. New president of Official Films Inc. is Billy Goodheart Jr., succeeding Aaron Katz, resigned.

Columbia Pictures' TV production subsidiary, Screen Gems, headed by Ralph Cohn, was merged this week with United Productions of America (Stephen Bosustow), to be called Screen Gems Div. of United Productions of America. Specialty will be animated films. Rialto reports also have Columbia Pictures considering establishment of New York studios for TV production.

Snader Telescription Sales Inc. reports it has acquired distribution of 13 first-run Korda films, never before shown in this country, for both movie and TV release, listing 9 of them as follows: *The Wooden Horse, Bonnie Prince Charlie, Flesh and Blood, Small Dark Room, Into the Blue, The Small Voice, The Courtneys of Curzon Street, The Angel with the Trumpet, The Wonder Kid.*

———■———

Deletion of Channel 3 from San Diego, part of tentative U. S.-Mexican agreement, worried San Diego educators, since channel was proposed to be reserved for them. FCC wrote them this week, said U. S. got fair shake in revision, assured them educational interests weren't being neglected, pointed out that they can ask for reservation of another vhf channel in San Diego if they choose. Tentative agreement would move Channel 3 to Mexicali which would lose 7 & 9. Other proposed assignments in area *(TV Factbook No. 13)* would remain unchanged.

Portland-Seattle microwave extension of present San Francisco-Portland coaxial (Vol. 7:33) isn't expected to be ready for phone service until beginning of 1953, meaning Seattle's hookup into transcontinental TV circuits is at least that far away, according to Pacific Tel. & Tel.

FCC's uhf propagation studies have culminated in report TRR 2.4.12, *UHF Propagation Within Line of Sight*, now available from Technical Research Div., Room 1629 Temporary T Bldg., 14th & Constitution, Washington.

With uhf military equipment particularly in mind, RCA has issued *Ultra High Frequency Fundamentals*, manual available for 75¢ from RCA Govt. Service Div.

———■———

Color Television Inc., San Francisco, unsuccessful bidder for FCC approval of its TV color system, is reported to have secured $4,000,000 contract to manufacture airborne radar and other electronic products developed by Tomlinson I. Moseley, president of Dalmo Victor Co., San Carlos, Cal. Existing plant, no longer used for TV since CTI system was rejected along with RCA's in favor of CBS's, will be utilized with additional facilities to be built in San Francisco peninsula area, according to CTI president Arthur S. Matthews.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
September 1, 1951

DEMAND UP, STOCKS DOWN, OUTPUT LOW: Cut-price TV sets are moving -- from factories to distributors, at least, and at an accelerating pace to dealers and the public.

September buying, stimulated by big promotions breaking right after Labor Day, should tell whether there's real justification for trade confidence that new prices, better programs, easier credit terms and a generally prosperous economy will bring about normal equilibrium between supply and demand.

Best news since inventory accumulations began to get dangerously high in early spring came in RTMA's weekly statistical report issued Friday, showing that factory TV inventories had fallen to 666,696 as of Aug. 24 -- down 88,000-plus from preceding week (Vol. 7:34). Though August trend had been slightly downward (768,766 first week to 765,916 second, 754,854 third), this was really first sizeable drop since pileups began in February.

Indicating that manufacturers are holding down production, while getting rid of inventory, was output figure for Aug. 24 week -- only 55,596 units (1801 private label). This is slightly over the 52,748 of week before (Vol. 7:34), but hardly enough to betoken any trend yet. Week's figure compares with 188,000 TVs turned out during comparable week last year. And it certainly doesn't indicate the set makers are pushing the output of their new lines -- not yet, anyhow.

Radios totaled 222,263 (103,885 private label) week of Aug. 24, not much change from level of preceding 3 weeks (Vol. 7:32-34). Inventories of radios went up to 418,304 from 368,280 during preceding week (Vol. 7:34). Week's radios were 112,747 home sets, 29,909 portables, 79,607 auto.

* * * *

First dealer inventory report came from Dun & Bradstreet this week, showed 900,000 to 1,150,000 new TVs in hands of dealers as of Aug. 1 -- 350,000 to 450,000 of them table models, 550,000-700,000 other types. Inventories of home radios were estimated between 1,400,000-1,700,000, plus 375,000-450,000 new battery portables.

There was cold comfort in these figures, albeit they were month old and nice movement of sets has been discernible since mid-August. Dun & Bradstreet estimated, however, that Aug. 1 figures were about 15% under July.

There's no authentic figure on distributor holdings as late as Aug. 1, most recent being RTMA's end-of-June estimate of 633,077. So it's difficult to reconcile weekly manufacturer inventory of Aug. 24 with dealer estimate of Aug. 1 with wholesaler holdings back to June 29. Suffice to say there are still plenty of sets!

* * * *

But trend during August was salutary at all levels, if key industry folk can be believed. Certainly, the way some distributors and dealers are already buying is sign to the good. All trade reports say price-cut models are moving very well.

RCA claims orders for just about all its factory stocks of the 9 models it price-cut by $30 to $115 just 2 weeks ago (Vol. 7:33), setting off current wave of reductions. This despite fact advertising hasn't even started yet in most places, isn't due to break generally until Sept. 6.

At least 100,000 sets are believed involved in RCA's factory unloading, to say nothing of distributor-dealer holdings. "By the end of September," said spokesman, "we'll be out of all our old sets." He said this after report from Pittsburgh that the sets, advertised there ahead of other places, were selling like the proverbial hotcakes -- and that distributor there was clamoring for more.

Bruno-New York, biggest RCA distributor, stated every set offered has been spoken for by its dealers, reported good dealer sales already. Bruno-New York also said dealers have ordered all availabilities of RCA's new line (Vol. 7:34) and added that it "looks like sellout" through end of this year. Similar reports came from RCA distributors in Newark, Philadelphia, Detroit, Chicago.

Gambling on quick disposal of overstock, RCA begins advertising new line of

four 17 & five 21-in. sets Sept. 24. It claims these are "really new" -- with entirely new chassis and 26 & 28 tubes, respectively. Former 16, 17 & 19-in. models were equipped with 21 tubes.

That the industry at large isn't too happy about price warfare, that nobody can make much money on merchandise cut so deeply, that some companies may not be able to stand the gaff -- and, above all, that production henceforth won't be on the hell-in-a-hack scale of 1950 and first-quarter 1951 -- goes almost without saying.

As for defense-induced shortages, read story below.

SHORTAGES OF TVs STILL IN FUTURE: There will be at least 3,000,000 TV sets for sale the rest of this year -- so only a buying spree of the magnitude of last year's post-Korea gold rush could come anywhere near equalizing supply with demand by Christmas.

With stiff curtailment of production for remainder of 1951, and even stiffer cutbacks next year, it's just barely possible a balance will be achieved by mid-1952 -- but only if buying takes a heavy spurt and maintains it.

Simple arithmetic of present inventories, plus anticipated fourth quarter production, shows why NPA materials cuts aren't likely to be felt in terms of set shortages for many months.

It's almost certain that total inventories of TVs are at least 2,000,000 (see story above). Factory inventories (667,000 as of Aug. 24) plus distributor inventories (663,000 June 29) plus retailer inventories (about 1,000,000) total about 2,300,000. But to err on conservative side, in our computations we assumed Sept. 1 inventories are 1,850,000.

Then we made these assumptions: Fourth quarter production to total 940,000 TVs (NPA's figure, based on 60% of first-half 1950 rate), September production to total 200,000 (at rate of 50,000 a week). Added together, these give estimated output of 1,140,000 sets for remainder of 1951.

Totaling inventories and anticipated production, we get a conservative figure of about 3,000,000 sets on the market during remaining 4 months of this year. That's almost exactly number of sets sold during last 4 months of 1950 -- TV's lushest period -- based on NBC "census" figures. But, being more realistic:

If sales should average a healthy 140,000 a week, as they did for all of 1950, supply would catch up with demand in about 20 weeks, or in middle of February (assuming average weekly production of 50,000 sets in 1952).

If sales average 100,000 sets a week, inventories won't be cleared out for at least 40 weeks, or until about mid-1952.

If sales continue to average only 50,000 a week or less, there'll be surplus of TV sets until well into 1953.

Trade Personals: Frank Folsom, RCA president, flying to Europe Sept. 21, will visit France and Spain, may go to Israel . . . Leonard F. Cramer, executive v.p., DuMont Laboratories, resigned Aug. 30, will vacation for month before announcing plans . . . James M. Valentine, who recently resigned as ABC-TV engineering mgr., named asst. division head in charge of TV field engineering, Federal Telecommunications Laboratories Inc. (IT&T) headquartering in Buenos Aires . . . E. P. Vanderwicken, ex-York Corp., succeeds retiring George R. MacDonald as Motorola v.p.-treasurer . . . Ralph H. Snyder named sales mgr., Sentinel distributors, Chicago, succeeding William H. Nelson, resigned to rejoin Appliance Distributors Inc. (Admiral) . . . M. J. Yahr promoted to mgr. of RCA sound products sales . . . George Oliver resigns as adv.-sales promotion director, Packard-Bell . . . Melvin Pollack resigns as sales mgr., Philharmonic Radio, will open Brighton Sporting Goods Store, 608 Brighton Beach Ave., Brooklyn . . . Louis M. Robb named GE tube dept. representative in San Francisco, Robert R. W. Lacy named commercial engineer for western sales region, Los Angeles . . . Joseph B. Elliott, RCA Victor v.p., reappointed chairman of RTMA sports broadcasting committee; he's onetime Georgia Tech grid star . . . Frank M. Mansfield, Sylvania, reappointed chairman of RTMA statistics committee . . . Don Foster, CBS engineer, named asst. to Richard Mahler, director of licensing & contracts for CBS Labs Div. . . . Paul Wexler, national sales mgr., Columbia Records Inc., named v.p.

Draft of proposed trade practice rules for TV-radio industry (Vol. 7:25, 34) was mailed Aug. 30 by Federal Trade Commission to some 12,000 manufacturers and merchandisers. It's designed to serve as "basis for discussion" at second industry-FTC conference Sept. 26 in National Archives Bldg., Washington. Following conference, new draft will be issued. Then public hearing must be held before rules are finalized. Copies of proposed rules are available from FTC, Washington.

Move to boost excise taxes on TV-radio appeared dead as dodo at week's end as Senate Finance Committee followed lead of House in rejecting Administration request to hike levy from 15% to 25% (Vol. 7:6 et seq). Committee also approved section of House-passed tax bill which would exempt from excise taxes "navigation, detection and communication receivers" sold to Govt.

Topics & Trends of TV Trade: Crackdown on down payment violations under Regulation W is in the wind, with Federal Reserve Board expected to issue interpretation soon of trade-in provisions as they apply to TV-radio and other appliances. Board officials met Aug. 29 with Senate-House Defense Production "watchdog" committee, were told that it was intent of Congress in enacting new credit controls that trade-ins must have "bona fide value" and not be used as dodge to escape down payment regulations.

Board members were especially concerned about "no down payment" advertisements and some retailers' practice of hiking prices of appliances to compensate for inflated trade-in allowances. Also under discussion by board is possible ruling restricting types of items which may be traded in. Under present wording of regulation, for instance, an old radio may be traded toward a refrigerator —and one used car dealer has been advertising: "Trade in your pogo stick on a good used car." Board may rule old items may be traded in only toward similar items, but isnt expected to bar radio-for-TV trades.

* * * *

Trade Miscellany: Motorola's Robert W. Galvin, executive v.p., predicted output of 1,400,000 TV units fourth quarter, according to Dallas report; he said that's about 70% of first 1951 quarter (2,198,669, see Vol. 7:17) and "about what the market will bear" . . . Emerson Radio has used profits from plant vending machine to set up kitty for small loans to workers; in 2 years, loss on $15,000 in small loans was $15 . . . RCA has leased part of Sellers Cabinet Co. plant in Elwood, Ind., which is suspending operation, and will use space for cabinet storage . . . Jiji Press of Japan has been granted license under Hogan facsimile patents, plans facsimile to reach newspaper subscribers over telegraph circuits or FM radio . . . Five-week strike of 125 workers at Cleveland Electronics Inc. (components) ended with no settlement after NLRB election resulted in 91-35 vote for decertification of their union, which had asked for merit increases of 5% for all employees . . . Muntz TV Inc. reports August sales running far ahead of the 6966 sold in August 1950, says they will total 11,500 to 12,000 units, with production of 20-in. now running at rate of 9000 a month.

Merchandising Notes: Sylvania got so incensed over article by Philip Wylie in July 3 *Life*, titled "Pop, the Complete Crook," and purporting to tell about gyp radio servicing, that it canceled ad schedule and so notified its service dealers this week; by coincidence, ad was placed opposite article . . . Zenith convention, when new line will be shown, is set for Sept. 14-15 in Chicago's Sheraton Hotel . . . Belmont will show new Raytheon models in Morrison Hotel, Chicago, Sept. 10 . . . GE's 24-in. tube is being used only in receivers made by itself and Stromberg-Carlson, though Hallicrafters, Sylvania and Westinghouse have also announced such models . . . DuMont's fall ad campaign will be keyed to theme: "Look Inside, Then Compare, See Why DuMonts Do More."

Uncle Sam's increased take from TV-radio industry, due to excise tax, is reflected in Internal Revenue Bureau report issued last week showing tax collections were $128,187,344 for year ended June 30, 1951, up $86,102,563 from the $42,084,781 for pre-TV excise year ended June 30, 1950. Included are phonographs and components, but not phono records on which $7,007,075 was collected as against $5,768,520 the preceding year. Refrigerators, freezers, air-conditioners paid $96,319,357 in taxes, up from $64,315,895. During July, Treasury collected $5,859,679 from the industry vs. $3,962,130 in July 1950; $705,319 on phono records vs. $896,556; $6,665,697 on refrigerators, air conditioners etc. vs. $8,475,763.

CBS-Columbia Inc. cut lists on 11 models by $20, $30, $55 & $100 (20% over-all); has also added 4 new ones to line. Only the 4 new models have CBS-Columbia label, old ones continuing as Air King. Only one model, top-of-the-line 20C3, at $469.95, is internally-adapted to get CBS color in black-&-white. According to president David Cogan, each new model henceforth, arriving at intervals of 2 months or less, will have adaptation feature. Other new models are 17-in. metal table in ebony at $190, 20-in. metal table, mahogany finish $280, 20-in. mahogany table $300.

Pilot production of first color set, $500 color-monochrome 10-in. (magnified) console, is going according to schedule, says Mr. Cogan. First deliveries are promised in latter September.

Expansion of distribution organization continues. Among latest appointments is Kaufmann-Washington Co., Washington, formerly Stromberg-Carlson. Distributor has ordered 20 color sets, expects September delivery. Outlet anticipates quick movement of color sets, to those who want to "keep up with the Joneses" if nothing else. Movement of 24-in. Stromberg-Carlson at $975—"we couldn't get enough of them"—is cited as example.

* * * *

Sylvania price cuts ranged from $30 to $90, covering all but 2 of its 23 recently released models. Only sets on which prices were retained were two 16-in. tables at $200 each. The 14-in. table was cut $30 (to $190) and console $40 (to $230). All 17 & 20-in. models were cut, the 20-in. table by $80 to $320, open console by $90 to $380. Halolight models, all 20-in., were cut $50 & $60, and 17-in. combinations $50 each. That Sylvania felt forced to the cuts was indicated in statement by sales chief John K. McDonough that it was being done "to meet current selling conditions."

Philco's 4 new models, announced Sept. 28 concurrently with price cuts on 17 of the 29 other sets in its line, are (all prices rounded out): No. 1804, 17-in. metal table at $230; 2106, 21-in. mahogany table at $300; 2108, 21-in. leatherette table at $320; 2140, TV-only 21-in. mahogany console at $360, equipped with casters. Cuts of $10, $20 & $30 were ordered on some tables, $20 to $50 on some consoles, $20 & $50 on 2 of its 5 combinations.

Trav-Ler this week released 8 new TVs, 3 radios. TVs are 17-in. tables with simulated leather-mahogany finish, $150; mahogany finish, $200; same as consoles, $170 & $230; 19-in. mahogany console $230, blonde $250; 20-in. mahogany console $250, blonde $270. Radios are clock at $30, plastic 5-tube at $18 in walnut, & $20 in ivory, portable with 3-speed record player at $40.

Stewart-Warner's reduced lists cover 17-in. tables cut $30 & $40 to $230, $240 & $280; 17-in. consolettes cut $40 & $30 to $260 & $270; 17-in. consoles cut $30, $40 & $30 to $300, $320 & $370; 20-in. console cut $50 to $370; 20-in. consoles cut $40 to $400 and $50 to $575; 17-in. combination cut from $600 to $500.

Jackson Industries names Trans-Vue, Chicago, as national sales agency for all save its private label & govt. products. Trans-Vue will also sell Jackson-produced TVs under own label—only 4 sets in line being 17-in. mahogany table at $230, console $260, 20-in. mahogany table $270, console $300, all including tax but not $7.50 & $12 parts warranties. Promised also is color TV adapter at $10-$15.

TV set prices now are at lowest levels in industry's history, says DuMont sales chief Walter L. Stickel. He predicts "normal fall pickup" because: (1) "virgin market of better than 50%" still exists in TV areas; (2) replacement market is ripe, with more than 40% of sets-in-use 14-in. and smaller; (3) good market for second sets; (4) transcontinental service adding attractive programs.

Mobilization Notes: Fourth quarter allotments of steel, copper and aluminum under Controlled Materials Plan went out this week to nearly all electronics manufacturers. Electronics Div. processed about 1100 applications. Of these, about 850 were from manufacturers of Class B (standard civilian-type) products, including 60 from home TV-radio manufacturers.

In addition to fourth quarter allotments, some manufacturers are receiving tentative allotment figures for first quarter 1952. NPA stressed that these advance allotments aren't firm allocations, but merely working figures to permit manufacturers to place advance orders for materials for first quarter of next year. Manufacturers who receive advance allotments are still required to apply later for firm allotments for first quarter.

* * * *

Certificates of necessity for rapid amortization of new productive facilities were granted by DPA to these 6 electronics firms during week prior to start of 60-day moratorium on new certificates (Vol. 7:33): **Tung-Sol**, for production of tubes at Washington, N. J., $731,235, of which 75% is to be amortized over 5-year period; **Standard Tool & Mfg. Co.**, Lyndhurst, N. J., tubes, $461,646 at 75%; **Eitel-McCollough**, San Bruno, Cal., power tubes, $90,825 at 80%; **GE**, Schenectady, tubes, $66,838 at 75%; **Gibbs Mfg. & Research Co.**, Janesville, Wis., doppler drift attachment systems, $57,263 at 85%; **Standard Piezo Co.**, Carlisle, Pa., quartz crystal frequency control units, $39,300 at 75%. These applications for certificates were rejected: **Electronic Measurements Inc.**, power supplies, vacuum tube voltmeters, $227,000; **Empire Coil**, transformers, $217,000; **Indiana Steel Products**, alnico magnets, magnetron assemblies, $136,000.

Two new govt. pamphlets to aid manufacturers seeking military contracts: *Converting to Military Production*, published by NPA, available from Commerce Dept. field offices, and *How to Be Cleared for Handling Classified Military Information Within Industry*, by Munitions Board, available from Board at Defense Dept., Washington.

———■———

TV in Latin America: Mexican branch factories are reported planning mass production of TVs, mainly 10 & 12-in., to be sold on popular time payments. Plans to build score or more new TV stations in Mexico (Vol. 7:32) have impelled Emilio Azcarraga, operating Mexico City's XEW-TV, to state that at least 60,000 sets can be sold by July 1952, or "as soon as the TV-bug's bite starts an epidemic of keeping up with the Joneses" . . . **City of Bogota, Colombia**, in cooperation with Municipal Bank of Bogota, installing TV station built by British Marconi to American 525-line standards, ordering consignment of receivers from Ecko (E. K. Cole Co.) of England, which will rent rather than sell them to public . . . Argentina's **first station**, Radio Belgrano, Buenos Aires, due to start in mid-October, using Federal equipment and Harrod's of Buenos Aires Ltd. reporting first shipment of Philcos received.

Note on Cuban market from recent *Foreign Report* of Research Institute of America: "Per capita income is high. Cubans love luxuries and are not niggardly. In the first three months of '51 Cubans bought 12,620 automobiles from the U. S. With television only six months old here, and with only two stations (in Havana) operating on the entire island, it is estimated that there are already 15,000-20,000 TV sets in use. Miami stores advertise sets in Cuban newspapers, Cubans visit Miami to buy them there and bring them home by plane." But American firms have competition from Britain in Cuban market from now on. Cuba last week signed trade pact with United Kingdom granting same tariff concessions on British industrial products, including TV-radio, as it does on American items.

Financial & Trade Notes: Emerson Radio's profits were $5,762,716 before taxes, $3,039,943 ($1.57 a share) after taxes first 39 weeks ended Aug. 4, company announced after Aug. 27 board meeting. This compares with $6,040,120 profit before taxes, $3,559,827 ($1.84) after taxes, for like period ended Aug. 5, 1950. Emerson board decided to submit stock option plan for key employes to stockholders at meeting Feb. 6, making available not more than 100,000 shares of unissued capital stock to be distributed through committee comprising directors Ferdinand Eberstadt, Richard C. Hunt, George Saylor. President Benjamin Abrams and secretary-treasurer Max Abrams will not participate. Board also authorized creation of Emerson Radio Charitable & Educational Foundation, with Chase National Bank as trustee.

Oak Mfg. Co. sales rose to $13,145,806, or 47% ahead of previous year's $8,934,776, in fiscal year ended May 31, 1951—earnings amounting to $1,188,037 ($2.26 per share) vs. $1,179,333 ($2.25). There are now 524,715 shares outstanding owned by 3273 stockholders, and net worth at end of last fiscal year was $5,978,114. Proxy statement for Sept. 27 annual meeting reveals these salaries and bonuses during year: Elof Sandstrom, chairman, $42,000 salary & $17,719 bonus; Robert A. O'Reilly, president, $42,000 & $17,719; Irwin N. Walker, v.p. & gen. counsel, $7500; Edward J. Mastney, v.p., $24,150 & $6006; Harry J. Veitch, v.p., $22,175 & $6006; John A. Rovelstad, treas., $19,250 & $6006. Shareholdings include 12,229 by William Bessey, v.p.; 5511 by Mr. Sandstrom, 2555 by Mr. Rovelstad, 2155 by Mr. O'Reilly, 1755 by Mr. Mastney.

Collins Radio is reported 90% on defense orders, now totaling $100,000,000, as against $45,000,000 in mid-1950, according to Aug. 29 *New York Journal of Commerce*. It's leasing additional plant in Dallas, where it already operates, has financed expansions through $4,000,000 loan from First National Bank, Chicago; $2,000,000, First National, Dallas; $2,000,000, Security First, Los Angeles; $1,000,000 each, Northern Trust, Chicago, and Peoples Bank & Trust, Cedar Rapids, Ia. (headquarters). Firm now employs 3600 in all plants, including 125 at Burbank, Cal. Its broadcast, airlines and amateur equipment sales account for non-defense 10%

Standard Coil Products Co. and its wholly-owned subsidiary, Kollsman Instrument Co., report consolidated net sales of $19,649,678 and net income of $1,151,802 after provision of $1,020,697 for taxes, equivalent to 78¢ a share on 1,470,000 shares outstanding, for 6 months ended June 30. Comparative consolidated figures are unavailable for same 1950 period, but in all 1950 (Vol. 7:12) Standard Coil sales were $35,632,396, profits $5,266,442 ($3.58); in 1949, sales were $16,594,626, profit $2,579,279 ($1.75).

Clarostat Mfg. Co. sales were $3,502,885, profit before taxes $718,261, profit after taxes $273,268 (65¢ a share) during 6 months ended June 30. This compares with $2,413,441 sales, $264,292 profit before taxes, $164,292 (39¢) profit after taxes for same 1950 period.

Pacific Mercury Television Mfg. Corp. reports net income of $72,135, or 14¢ a share, on net sales of $5,740,044 for year to March 31.

———■———

National Scientific Laboratories Inc., 2010 Massachusetts Ave. NW, Washington, electronics research firm, founded in 1948 by Dr. Robert I. Sarbacher, ex-dean of Georgia Tech graduate engineering school, has been sold to Bowser Inc., manufacturer of pumps and other products. It will continue under Dr. Sarbacher as president, with R. Hosken Damon of Bowser firm as chairman, Wallace M. Cohen v.p., Gertrude Priester treasurer, Abba P. Schwartz secretary.

Count of TV Sets-in-Use by Cities

As of August 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

RATE of increase in TV sets-in-use, according to monthly NBC Research "census," receded to lowest ebb in July—and month's additions to national total were more 183,100 units. Thus, as of Aug. 1, total reached 13,271,700, compared with 13,088,600 on July 1 (Vol. 7:29) and 12,769,300 on June 1 (Vol. 7:25). Even in New York area, only 20,000 sets were added during month. July is expected to be lowest month of year, for nice pickup in sales was observed in latter August (see Trade Reports) and everybody expects "normal" sales season to resume after Labor Day. These are the Aug. 1 sets-in-use by areas (consult individual stations for estimates of number of families within respective service ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	61,000
Atlanta	2	122,000
Baltimore	3	308,000
Binghamton	1	41,300
Birmingham	2	59,300
Bloomington, Ind.	1	17,000
Boston	2	754,000
Buffalo	1	210,000
Charlotte	1	84,400
Chicago	4	942,000
Cincinnati	3	263,000
Cleveland	3	486,000
Columbus	3	150,000
Davenport-Rock Island	2	59,500
Dayton	2	132,000
Detroit	3	526,000
Erie	1	50,000
Grand Rapids	1	79,500
Greensboro	1	71,700
Huntington	1	48,000
Indianapolis	1	151,000
Jacksonville	1	35,000
Johnstown	1	104,000
Kalamazoo	1	42,500
Kansas City	1	127,000
Lancaster	1	106,000
Lansing	1	57,000
Louisville	2	94,500
Memphis	1	89,000
Milwaukee	1	251,000
Minneapolis-St. Paul	2	271,000
Nashville	1	35,100
New Haven	1	168,000
New York	7	2,455,000
Norfolk	1	72,800
Omaha	2	80,900
Philadelphia	3	874,000
Pittsburgh	1	312,000
Providence	1	157,000
Richmond	1	85,100
Rochester	1	86,100
Schenectady	1	161,000
St. Louis	1	300,000
Syracuse	2	126,000
Toledo	1	100,000
Utica	1	47,000
Washington	4	278,000
Wilmington	1	74,800
Total Interconnected	81	11,205,500
Non-Interconnected Cities		
Albuquerque	1	9,400
Dallas / Fort Worth	2 / 1	126,000
Houston	1	84,100
Los Angeles	7	1,003,000
Miami	1	75,000
New Orleans	1	59,500

San Francisco	3	210,000
Seattle	1	88,800
Tulsa	1	77,500
Total Non-Interconnected	26	2,066,200
Total Interconnected and Non-Interconnected	107	13,271,700

Flurry of station changes, granted and requested, has followed FCC's authorization of power boosts (Vol. 7:30-34): (1) WBEN-TV, Buffalo, was granted move of station to Colden, N. Y., 22 miles away, to operate from 1196-ft. tower with .88 kw. Then station was given permission to increase ERP to 50 kw when it gets going. (2) WFMY-TV, Greensboro, and WICU, Erie, were allowed to install 5-kw transmitters in lieu of present .5-kw units. (3) KRON-TV, San Francisco, asked permission to concentrate signal directionally to serve city better, eliminate waste of signal over Pacific. (4) KTSL, Los Angeles, asked for authority to get going on Mt. Wilson as soon as reconstruction completed (Vol. 7:34). (5) WOW-TV, Omaha, was permitted to hike ERP to 17.5 kw. The Buffalo type of move may become more common. Over the years, number of stations have applied for tall towers and high power. If they amend to reduce powers, as WBEN-TV did, they're in line for grants to move. Then they can ask for authority to radiate 50 kw. FCC is querying such applicants about plans.

Connecticut Board of Education said Aug. 31 it had applied to FCC for "network" of 4 uhf channels. Gov. Edward N. Allen said he'll ask legislature for $1,200,000 to get project started.

MERGER of ABC and United Paramount Theatres, including CBS's proposed purchase of Chicago's WBKB for $6,000,000 (Vol. 7:21-24, 27, 32), was put on ice this week—nobody will say for how long. FCC threw proposed consolidation and station sale into pot with hearing previously ordered on old Paramount anti-trust case (Vol. 7:32). No date for hearing was set in Aug. 27 action (Public Notice 51-873), Comr. Jones dissenting on procedural grounds. Complexity of issues, holding of hearing, arriving at decision, render it fairly certain big merger deal won't go through by end of this year, if at all.

Since UPT is theatre-owning half of old Paramount company, which was split by Dept. of Justice consent decree, FCC wants to probe its management in relation to anti-trust violations which brought about split. But looming more important is FCC's old question: Should movie interests be allowed to own TV stations?

FCC wants to know what merged companies would do about: (1) "Televising of selected programs in theatres to the exclusion of other outlets." (2) "Restrictions, if any, to be imposed [on] broadcast stations in the use, *inter alia*, of motion picture films or stations [or] talent . . . " FCC also asks whether merger "would substantially lessen competition or tend to monopoly in any line of commerce, in any section of the country."

With ABC now operating in the black (Vol. 7:33), urgency of deal as way to bail it out of fiscal troubles isn't regarded as quite so compelling as before, and there's even talk that certain broadcast interests are opposed to merger for fear of new competition bolstered by big movie capital. Meanwhile, stymied deal has arbitrage speculators, gambling on proposed swap of ABC for UPT stock, holding big blocks of stock and standing to lose large sums if it doesn't go through.

Tests of new transcontinental TV circuits this week, with signals relayed via closed circuits from Washington-New York-San Francisco and back, were reported to have resulted in images "just as clear as the original." This augured well for Sept. 4 opening of Chicago-San Francisco microwave relays (Vol. 7:31-33) on occasion of President Truman's 10:30-11 p.m. (EDT) speech at Japanese treaty-signing conference in San Francisco. First coast-to-coast network TV service will thus be inaugurated, followed by Sept. 5-8 transmissions of pooled network coverage of proceedings, scheduled to start at 1 p.m. (EDT) daily. AT&T is furnishing circuits gratis for this occasion, then plans to revert to original schedule for opening regular service, namely, Oct. 1 for westbound hookups, on or about Nov. 1 for eastbound. Plans for AT&T sponsorship of big premiere Sept. 30 or Oct. 1 have definitely been dropped, AT&T states.

Atlanta TV applicants Georgie Tech (WGST) and E. D. Rivers Jr. (WEAS, Decatur) succeeded this week in securing stay, until Sept. 14, of effective date of FCC's grant authorizing new owners for CP-holding WCON-TV and swap of channels with WSB-TV (Vol. 7:32-33). Charges of concealed interlocking ownership led FCC to hold up its Aug. 8 order consenting to assignment of license while staff studies charges (Public Notice 51-897). Assignees still hope to get station on air commercially (as WLTV) by Oct. 1, though objectors have indicated court action.

Hearings on Sen. Benton's educational TV bills (S. 1579 & S. J. Res. 76) to establish 11-man advisory board (Vol. 7:15, 20-22, 33) will be held Sept. 5-6 by Senate Interstate & Foreign Commerce Committee. To be heard are Benton and co-sponsors Senators Hunt, Bricker and Saltonstall. Other witnesses, from FCC and industry, are scheduled for later date to be announced.

FABULOUS UPSWING IN TV BILLINGS: Sellouts of time on telecasting stations & networks are currently at such an amazing rate that one New York station alone will achieve 1951 billings of close to $8,000,000 after frequency discounts. That would mean gross sales of somewhere around $10,000,000, as ordinarily calculated in the trade.

That's far more than any 50-kw radio station has ever grossed -- most likely is highest for any TV station, albeit many other telecasters have gone into 7-figure grosses and we know several who admit "pushing $5,000,000."

The station is NBC-TV's New York key WNBT, with base hour rate of $3750 as of Aug. 15, one-minute rate of $775. It's possible WCBS-TV, rival key, will do just as well, for its rates are the same and it's also reported to be a sellout.

WNBT's astonishing achievement points up wave of prosperity that is being enjoyed by just about all the 107 TV stations. Most are operating in the black now, and the few that may show losses for year will do so because of deep red-ink starts and because they must yet pay off the huge costs of pioneering.

The WNBT & WCBS-TV rates are highest in country, former's comparing with $1200 on companion WNBC, latter's with $1350 on companion WCBS (latter highest rate in radio). Other New York TV station base hour and one-minute rates are: WJZ-TV, $3100 & $650 (WJZ rate is $1200); WABD, $2200 & $500 (no AM); WOR-TV, $1500 & $300 (WOR $1200); WPIX, $1500 & $281.25 (no AM); WATV, Newark, $800 & $165 (WAAT $264).

* * * *

TV networks as such are still far from the black -- but all owned-&-managed stations are now profitable. Indeed, NBC-TV's 5 outlets will gross some $17,000,000 this year (after discounts). From independent operators of TV with AM stations, most of them reluctant to disclose actual figures, this comment is typical: "Radio is up, but our TV revenue is now more than double our radio."

We estimated $250,000,000 in time sales this year for networks and stations combined, just few weeks ago (Vol. 7:32). That figure now looks conservative!

For network time sales are really zooming. August NBC-TV network sales (not including its own stations) will overtake dollar-volume of AM network's time sales. For September, we're informed, with season in full swing and new rates in effect, NBC-TV network volume will very nearly double NBC-radio network volume!

The other TV networks are going up, too -- but it's the stations they own that offset network losses. ABC-TV's 5 outlets give it fiscal edge over DuMont with 3 and CBS with 2 plus 45% of third. But the hard-runner for second place in network TV billings is CBS-TV (see PIB figures, Vol. 7:34). CBS now seeks more stations, proposing to buy Paramount's WBKB, Chicago, for $6,000,000, and proposing also to get them by way of new-station applications and grants at freeze's end.

* * * *

Same hard-headed facts of TV network life which impelled DuMont to enormous effort of drafting a nation-wide channel allocation plan as alternative to FCC's

Copyright 1951 by Radio News Bureau

SEP 10 1951

(Vol. 7:33,35) have goaded CBS into all-out effort to get more stations allotted to 3 major cities where it wants outlets -- Chicago, Boston, San Francisco.

These facts were clearly spelled out this week by CBS executive v.p. Joseph Ream in statement filed for FCC's "written" allocations hearing. Seeking to persuade Commission that it should provide additional commercial vhf channels in Chicago and San Francisco, and 2 more in Boston, Ream gets right to the point:

"The first and most important [reason] is the matter of dollars and cents. Networking in TV is an exceedingly expensive business and the expenses are continuing to rise. On the other hand, station...operation has in the last year or two turned the corner. Many stations are now operating at a profit and some, particularly in the largest cities, have been operating at a very considerable profit... It follows the radio pattern, in which by far the major portion of Columbia's broadcasting profits have been attributable to our owned stations."

"Clearances" were another serious problem, Ream said. "Inability to clear in one or two key markets, such as the cities involved in our proposals, may sometimes spell the difference between obtaining a network advertiser or losing it...The entire networking operation is likely to be affected, since a weak link in an important market affects the network itself. This is especially true in TV networking. Since it costs no more to produce a program which reaches 10,000,000 people than it costs to produce the same program reaching 5,000,000 people, it is elementary that the sponsor will normally insist on the greatest possible coverage in order to spread his per capita cost."

"Originations" were next networking prerequisite cited by Ream: "There has been an increasing tendency to originate TV network programs in cities other than New York. Owned stations can thus serve as very useful laboratories. Yet because the cost of TV facilities and of the operating organizations are high, it is far more efficient and economical to integrate network and local operations, rather than to have only network facilities in a city."

"Very real dangers of monopoly" were seen in FCC's proposed allocations. While not deprecating future of uhf and its probabilities of bringing reasonable network competition eventually, Ream feared that FCC plan will "permit the development, during the critical formative years, of only two full, nation-wide competing TV networks." This period, he thought, is "perhaps 5 years, perhaps more."

MIGHTY FEW NEW STATIONS BEFORE 1953: If you're counting on a lot of new TV stations "soon" -- even next year -- forget it. Chances for more than merest handful before well into 1953 are extremely slim.

Throughout the long 3 years of freeze -- third anniversary is Sept. 30 -- there's been persistent impression that new stations will blossom almost immediately after a final TV allocation decision is rendered.

Final allocation decision of FCC, when it does eventually arrive, will not mean new stations right off. It will simply mean the "processing" wheels can begin to roll again: New applications will then be accepted, hearings will be held for cities where applicants outnumber channels, CPs will be issued -- then construction can begin. That's the long and short of it.

Let's look at steps to be taken before final decision, then at the processes leading to actual station operation -- with realistic estimates of time involved:

(1) "Written" allocations hearing, now going on, is due to end Nov. 26. Some legal rag-tags inevitably will remain, and FCC will be lucky to clean them up in 2-4 weeks. And if someone takes FCC to court to dispute its procedures (quite likely) that period could stretch. There's no telling what a court will do.

(2) Drafting of final decision may then begin. Some commissioners say: "We've got to do something by January." Others: "February is more realistic."

(3) New applications will then be accepted for a specific period during which no grants will be made. Chairman Coy, in public statements, has never spoken of less than two months. But some commissioners are thinking in terms of one month. As one put it: "Lord knows, everyone has had plenty of time to make up his mind and prepare most of his application." Assume one month -- and you're up to March.

(4) Now comes the big roadblock -- hearings. In every market worth a hoot, applicants will outnumber available vhf channels. There will be scores of hearings inundating FCC examiners & other hearing personnel. Currently, Commission has mere 7 examiners, isn't likely to get many more, because of 10% budget cut by Congress.

Hearings aren't likely to start until summer. From beginning of hearing to final FCC decision, there's 4-6 months' absolute minimum. And some experienced FCC attorneys predict 18 months will elapse before some hot cases are settled. With millions frequently at stake, defeated contestants won't say die quickly, will try everything, including appeals to courts.

(5) Finally, probably early 1953, victors will begin to emerge and start building. Construction will probably be fastest phase of all, assuming no serious materials difficulties. Some stations will get on air in weeks, rather than months.

* * * *

Thus it's first quarter 1953 for first stations in sizeable cities. Some people think it will take that long even in towns as small as 50,000 -- for vhf, at any rate -- for competitive delays and stalling efforts of those who want TV kept out are entirely possible here too.

Exceptions to that painful schedule aren't too promising. In the smaller cities, or where uhf-only is available, grants may come without hearings -- producing stations on air last half 1952.

In wide-open spaces of West, a few moderate-sized cities may have enough vhf to go around. In other cities, applicants may decide to "join 'em if they can't lick 'em" -- merging applications to reduce or eliminate competition.

Another speedup possibility is that of permitting applicants to vie for specific channels, rather than treating both applicants and channels as elements in one big pot. This would reduce competition as applicants jockeyed to choose weakest opponent. But Commission has never permitted this in TV or FM, and at this moment doesn't appear likely to change mind.

FCC may hit on some technique for moving things faster, but it will have to be quite radical to chop more than couple months off current prospective timetable.

EXPANDING TV SPANS THE CONTINENT: Hats off to Bell System for superb technical job this week on first transcontinental TV hookups for pooled telecasts of the Japanese treaty conference. And for moving ahead start of regular coast-to-coast networking, both East-to-West & West-to-East, to Sept. 28 in lieu of later dates previously set.

Thus televiewers in Salt Lake City, San Francisco, Los Angeles, San Diego -- whose 13 stations are actually the only new ones added -- will be able to see East's big shows, including World Series and 4 college football games (see p. 5).

Stars residing in Hollywood -- like Eddie Cantor, Bob Hope, Ed Wynn, et al -- by same token can now avoid commuting to New York for their "live" performances.

AT&T and the networks have given telecasting and the TV trade their biggest boost since limited East-Midwest network service began in January 1949 (Vol. 5:2) -- for the "shows" from San Francisco rivaled the Kefauver and MacArthur telecasts for sheer human interest. Too, as State Dept. figured when it asked AT&T to advance hookup date, they performed great public service in showing up Soviet tactics.

Less than 3 years ago, when first "national hookups" were inaugurated, only 32 stations in 14 cities were linked. Now, 94 stations in 53 cities can be interconnected -- and about this time next year AT&T will also link stations in Miami, New Orleans, Oklahoma City, Tulsa, Dallas (2), Fort Worth, San Antonio (2), Houston. Having beaten its "end-of-1951" schedule for transcontinental, it's a good surmise the conservative AT&T will beat its "second half 1952" schedule for these cities.

Only TV cities with no hookups yet planned: Seattle, Phoenix, Albuquerque.

* * * *

Consider that the relays from San Francisco were, for most part, channeled via microwaves across continent to New York -- and then re-transmitted via coaxial-microwave "lines" by each network to its affiliated stations -- and the marvel of picture quality is the more impressive. There are 106 microwave hops, or repeats,

via 107 relay stations spaced an average of 28.2 miles apart. All but 18 of these stations are unattended, operating automatically.

The stations are designed for phone traffic, too, will be engineered for more TV circuits, both ways, as demand requires. Right now, the 4 TV networks are splitting time on the single 2-way circuit now available.

* * * *

Time breaks were good ones for the networks. President Truman's Sept. 4 speech at 10:30 p.m. EDT (7:30 Pacific Time) was inaugural, came through clearly. Conference's morning sessions started at 1 p.m. EDT, evening sessions 11 p.m. EDT. Afternoon sessions, whose start would have been 6 p.m. EDT and would have run into evening schedules, were omitted for that reason.

Some good material thus was missed, notably John Foster Dulles' important Sept. 5 speech. But so much afternoon and late night time was cleared, unsponsored, that only the most captious could carp over omissions. Moreover, kine-recording, newsreel and radio coverage were able to complete TV's truly fine job.

There weren't many fluffs, though the interpolations of commercial spots at inapropos moments didn't sit well with many. Eagerness of networks to preserve own identities was also too apparent. Indeed, full-page ad in New York newspapers by CBS-TV Sept. 4, followed by similar one next day by NBC-TV, almost seemed designed to give impression those networks "owned the show" -- so intense is rivalry between them now and so eager is each to capture audience loyalty.

* * * *

Editorial comment was uniformly enthusiastic. Washington Post (WTOP-TV) took particular note of clarity of pictures, stated: "For this blessing the whole TV industry deserves thanks [and] the public would be twice blessed if TV's aesthetic quality were to keep pace with its technical progress."

New York Herald Tribune paid tribute to great technical achievement, but observed: "We are still waiting for signs of similar advances in the industry's conception of TV as an entertainment and educational medium. [The] coverage is a prime example of what TV can do. But we can't help wondering what kind of program is going to follow it on the new coast-to-coast hookup."

What followed Mr. Truman's address on NBC-TV's Washington outlet points up pitfalls TV programmers must guard against -- just what the Herald Tribune editorialist probably pondered. Film spot that followed immediately after the President concluded was a particularly noxious ad for a deodorant!

THEATRE TV's NEWEST SPORTS WRINKLE: Movie forces have come forth with new formula for outbidding home TV for rights to sports events -- and first attempt to use it is apparently quite a success. Basic idea is that theatre-TV rights plus rights for special films of the event can total more than any home sponsor is willing to pay.

It worked with Randy Turpin-Ray Robinson fight Sept. 12 in New York, for which some theatres on hookup are charging $2-$2.60, with International Boxing Club reported to be getting 75¢ per seat cut -- as against 40¢ for earlier theatre fight telecasts (Vol. 7:23-26).

Theatre-TV rights were made contingent on RKO's guarantee of $200,000 for film. Then RKO sought to line up exhibitors to show film, with ads in trade press headed: "Exhibitors Attention! Do you want 60,000,000 people at home or going to theatres?" Ad went on: "For the first time, alert and far-seeing showmen have the opportunity of assuring themselves in advance of boxoffice special events which will not be seen or heard elsewhere" (last 8 words were italicized for emphasis).

So confident was IBC of profit opportunities of scheme that it reportedly turned down $325,000 offer from unidentified sponsor for TV-radio rights. RKO and theatre-TV people use same formula for Willie Pep-Sandy Saddler title bout Sept. 26.

High interest in Robinson-Turpin bout may make it success -- Philadelphia's Stanley is already advance sellout at $2.60 -- but public apathy was noted in recent Joe Louis-Jimmy Bivins theatre telecast from Baltimore, with many seats vacant. The TV-radio manufacturers, who footed bill for Ezzard Charles-Joe Walcott home telecast (Vol. 7:28), say they won't be used as pawns in bidding up prices, but are watching

popular reactions closely, may yet be heard from in collaboration with telecasters.

Bidding for fight TV rights may someday become 3-way affair. Arena Managers Assn. is dickering with IBC for eventual exclusive rights to project bouts on big-screen equipment in nation's 250 arenas. Plan is to have live local preliminary matches at arenas, with main event on giant four-sided TV screens.

Theatre telecasts of fights will kill smaller arenas where nation's boxers get their start, and thus can ruin fight game in 5 years, says spokesman Jim Hendy, manager of Cleveland Arena. "Theatres are not the logical place to show fights," says he. "How would they like it if we took in full-length film features?"

SPONSORSHIP of NCAA football schedule, together with promotion of the telecasts, will cost Westinghouse close to $2,000,000 this fall. Under complicated schedule of "experimental" live telecasts, Westinghouse will sponsor 19 games in 9-week period, with 7 on each of the NBC-affiliated stations carrying schedule in East and Midwest.

Schedule includes 3 games to be telecast on full 52-station coast-to-coast network—with West Coast stations carrying total of 4. In addition, all except West Coast stations will carry "regional" games (Eastern games directed to Eastern audiences, Midwestern games sent to Midwest); plus "inter-regional" games (Eastern games sent West, Western games sent East); plus local games transmitted only in localities where they are played. Each locality will be "blacked out" 2 Saturdays during Sept. 29-Nov. 24 period. NCAA, with Westinghouse's aid, will study effects of telecasts on game attendance.

Games themselves are costing Westinghouse $1,250,000, of which something less than $700,000 will go to the colleges, each school getting 2½ times the NBC time charge for one hour of each station carrying the telecast. In addition to cost of programs themselves, Westinghouse foots $500,000-$700,000 bill for newspaper ads plugging telecasts. The full schedule:

Sept. 22.—No games televised because of "technical difficulties." Sept. 29—Duke at Pittsburgh (West to East) and Columbia at Princeton (East to West). Oct. 6—Wisconsin at Illinois (full network). Oct. 13—SMU at Notre Dame (full network). Oct. 20—Cornell at Yale (East to East), Indiana at Ohio State (West to West), Missouri at Iowa State (WOI-TV, Ames, only), Nebraska at Minnesota (KSTP-TV, St. Paul, only). Oct. 27—Dartmouth at Harvard (East to East), Northwestern vs. Wisconsin at Chicago (West to West). Nov. 3—Michigan at Illinois (West to East), Army vs. USC at New York (East to West). Nov. 10—Notre Dame at Michigan State (West to East), Navy vs. Maryland at Baltimore (East to West), Washington & Jefferson vs. Franklin & Marshall at Lancaster, Pa. (WGAL-TV, Lancaster, only). Nov. 17—Columbia vs. Navy at New York (East to East), Colorado at Nebraska (West to West), North Carolina State at Maryland (Southeast only). Nov. 24—Ohio State at Michigan (full network).

PROPOSAL to obtain theatre-TV frequencies without necessity of going through allocations procedures was advanced by 20th Century-Fox in petition to FCC Sept. 6, as motion picture producers and exhibitors prepared for Sept. 11 meeting in New York to map unified strategy for hearings. Big film company asked Commission to enlarge issues in FCC's theatre-TV hearings (now scheduled for Nov. 26) to include question whether, with slight modification of FCC rules, present frequency allocations to industrial radio services can't be used for transmission of TV programs to theatres.

In petition, 20th Century points out that FCC in 1945 allocated industrial frequencies to motion picture industry, to be used while making films on location, etc., on shared basis with other industries. Movie firm says it has experimented with theatre TV on these frequencies since 1949, suggests 6425-6875-mc band, now allocated to movie industry on shared basis with others, could be used to provide nation-wide competitive theatre-TV services. These frequencies, petition says, could still be shared with other industrial users without interference, because very nature of theatre TV requires highly directional transmission.

Idea isn't new one—it's been discussed for years by theatre-TV proponents—but move by 20th Century is first attempt to bring it before Commission. All exhibitor and producer groups, as well as 20th Century, say they'd rather have frequencies allocated exclusively to theatre TV than share their channels with other users—implicit in any move defining theatre TV as industrial radio service.

Twentieth Century's petition will come up for discussion at Sept. 11 meeting, which will be attended by representatives of MPAA, Theatre Owners of America, Allied States Assn. of Motion Picture Exhibitors and National Exhibitors Theatre TV Committee. Meeting was called to seek agreement on "8 basic points" so picture industry can present united front before FCC at hearing.

Telecasting Notes: Only 11 cities with 13 stations remain outside orbit of transcontinental network TV when it gets under way on permanent basis Sept. 28 (see story, p. 3)—but the 53 interconnected cities and their 94 stations (out of 107 total) cover 95 out of every 100 TV homes in U. S. . . . NBC research chief Hugh Beville Jr. estimates that, based on preliminary estimates for Sept. 1, there were 11,360,000 TV sets in present 48-city interconnected area; that Los Angeles, San Francisco, San Diego, Salt Lake add 1,380,000—thus leaving only 710,000 sets not served by direct network facilities . . . Bell System, reporting new southbound TV channel from Detroit to Toledo as of Sept. 5 to supplement present 3 northbound channels, stated its intercity TV links now total 23,500 channel miles, of which 14,500 are radio relay (microwave) and 9000 are coaxial . . . Inside dope from the higher Hollywood sources: TV's impact will "continue to fade as the novelty wears off"; moreover, it's "no menace" to films, which are "picking up tremendously in America," and to radio which is "staging a comeback." Thus movie producer Darryl Zanuck in Paris interview Sept. 4 . . . Falcon Films, headed by John C. Mullins, Tulsa & Phoenix businessman, is name of new $1,000,000 corporation organized to produce western films in Arizona . . . Some smaller movie studios are trimming all new "B" pictures to 54 minutes running time so they can easily be adapted to TV when theatre runs are exhausted, says *Daily Variety*, Hollywood . . . Catholic Men, magazine published by National Council of Catholic Men, Washington, reports plans being studied to set up system of classifying TV programs similar to Legion of Decency's motion picture ratings . . . WFMY-TV, Greensboro, replacing .5-kw transmitter with 5-kw unit under recent FCC grant, plans to achieve tenfold power increase—1.67 kw to 16.27 kw ERP—on Sept. 22, its second anniversary . . . KHJ-TV now call letters (as of Sept. 6) of old KFI-TV, recently purchased by Don Lee Enterprises from Earle C. Anthony (Vol. 7.23, 32) . . . WBNS-TV, Columbus, Sept. 1 raised base hour rate from $450 to $700, one-min. from $100 to $125, changed Class A time to 6:30-11 daily except Sun. (1-11 p.m.) . . . WTTG, Washington, Sept. 10 raises base hour rate from $450 to $600, one-min. from $90 to $100.

COMPATIBLE color showings by RCA in New York's Johnny Victor & Center Theatres resume Sept. 10. Industry groups are scheduled first 2 weeks, public to be invited after shutdown for week or so. Setup is about same as during smash-hit July showings (Vol. 7:28)—10 a.m. program telecast from WNBT, 2 & 4 p.m. programs on closed-circuit. No networking is scheduled first two weeks.

Guests of RCA Victor go to Johnny Victor, NBC's to Center. RCA has this lineup: Sept. 10, distributors, dealers; Sept. 11, station operators, consulting engineers, attorneys; Sept. 12, RCA Service Co., NRDGA, station engineers; Sept. 13, distributors, dealers, parts suppliers; Sept. 14, dept. stores, tube distributors; Sept. 17, distributors of sound, industrial, film and theatre equipment, plus govt. procurement officers; Sept. 18, recording artists; Sept. 19, RCA technical groups; Sept. 20, security analysts; Sept. 21, "postponements"—late comers and overflow from previous groups. NBC guests comprise affiliates, advertisers, station reps, artists, etc.

* * * *

CBS hasn't yet revealed stations or sponsor involved in its proposed 11-station hookup for football colorcasts (Vol. 7:35). But it announced that singer Mel Torme would star in new 4:30-5 daily color show, says it plans to reach 20 hours of color weekly by mid-October. CBS reports enthusiastic reception of color shows in Zurich, Switzerland, Sept. 5, says French manufacturer Radio Industrie will demonstrate color-monochrome sets at Sept. 13-18 Paris demonstrations.

Webster-Chicago, one of few manufacturers planning production of CBS color converters, is still in tooling process, says C. P. Cushway, executive v.p. First production, at least 30 days off, will be wheel assemblies for other manufacturers, presumably including CBS-Columbia. "In terms of actual orders, there's no great demand," says Mr. Cushway. Wheel assemblies may also be offered to "build-it-yourself" customers.

Company plans complete "slave" converters, says Mr. Cushway, but production dates and quantities are still undecided. Price of 10-in. model (magnified) "will be near $350, perhaps even $400," he believes. No adapters are scheduled.

"Frankly, we're feeling our way," says Mr. Cushway. "We don't know what the demand will be. We decided to take the risk and tool up. If we sell a few thousand, that will take care of the tooling costs. Everything we sell after that will be fine. There are a lot of problems—the materials situation, for example. We've got to decide whether we want to take materials from our other production and put it into color. It's a gamble."

* * * *

Paramount's tri-color tube (Vol. 7:22-25) has undergone great improvement recently, said v.p. Paul Raibourn in exclusive interview in Sept. 3 *Broadcasting*. According to article, Paramount plans to demonstrate it within a month, and Mr. Raibourn believes "it looks like all the color problems are solved." He credited latest idea to Dr. Ernest Lawrence, Nobel Prize winner who invented tube.

FCC personnel saw earlier models of tubes many months ago, said it suffered then from extremely coarse line structure, low resolution ("too low even for CBS system"), improper color balance. Tube was first reported May 1950, during color hearing (Vol. 6:18). In June 1951, after Supreme Court decision, Paramount announced plans to build and market set with tube (with AM-FM, for about $1000), said it would be demonstrated following month. Tube hasn't been shown to press or public. This week, Paramount stock jumped to year's high, presumably on strength of reports of new tube developments.

Personal Notes: Haan J. Tyler moved to KFI (AM) as gen. mgr. with Sept. 6 transfer of KFI-TV to Don Lee and change of its call letters to KHJ-TV; he succeeds Kevin Sweeney, resigned. Willet Brown is president of Don Lee (General Tire-O'Neil) and head of KHJ-TV, and George Whitney is sales v.p. . . . Charles H. Phillips, ex-sales chief, NBC-TV spot sales, named asst. gen. mgr. of WNBC & WNBT, New York network keys, under gen. mgr. Ted Cott . . . Gilbert W. Kingsbury promoted from publicity-promotion director to administrative asst. to Robert E. Dunville, president, Crosley Broadcasting Corp. (WLWT, WLWD, WLWC) . . . Ren Kraft, Midwest sales mgr., Fort Industry Co. stations (including WJBK-TV, WSPD-TV, WAGA-TV) designated to supervise newly opened Chicago offices for George Storer group, 230 No. Michigan Ave. . . . John R. Hurley, ex-Don Lee program mgr., joins *TV Time*, Los Angeles fan magazine . . . Bernard M. Kliman, adv. mgr., Gruen watch, resigning to open own agency with headquarters in New York and TV office in Hollywood . . . C. H. Cottington has resigned as TV-radio v.p., Young & Rubicam . . . Joseph H. McConnell, NBC president, and Mrs. McConnell sailed Sept. 6 on *Queen Mary* for London in connection with Talullah Bankhead BBC recordings (Vol. 7:33), then vacations in Paris and Cannes, returns in mid-Oct. . . . Fritz Snyder, ex-Biow, named CBS-TV station relations director and Wm. Schudt named CBS-Radio station relations director . . . Dr. Kenneth H. Baker, NARTB research director since 1946, has resigned to start radio audience-coverage service to be known as Standard Audience Measurement Service, with offices in N. Y. . . . John H. Smith Jr., ex-Bureau of National Affairs, Washington, named director of NARTB's FM dept., succeeding Edward L. Sellers, resigned.

SENATE hearings on Sen. Benton's TV bills to establish national radio-TV program advisory board and encourage "pay-as-you-look" TV (Vol. 7:15, 20-22, 33, 35) sounded rather routine this week—but opponents haven't yet had their innings.

Boiling-mad NARTB-TV sent scathing statement, approved at Sept. 7 board meeting, to Senators Johnson (D-Colo.) and McFarland (D-Ariz.) chairmen, respectively, of Interstate & Foreign Commerce Committee and subcommittee. Said statement in part:

"We consider the Benton proposals potentially more dangerous to free expression than any legislation that has been before the Congress in the 30-year history of American broadcasting."

Sen. Benton and his witnesses testified that 11-man board would be completely advisory, that stations had nothing to fear in way of censorship. Witnesses included: Sen. Hunt (D-Wyo.), co-sponsor of bills, plus representatives of American Library Assn., National Farmers Union, New York Board of Regents, Joint Committee on Educational TV, CIO, Cooperative League of U. S. A., Ohio State U.

Because James Webb, Asst. Secretary of State, testified as to success of advisory boards for UNESCO, Voice of America, etc., NARTB-TV board called attention to Japanese treaty telecasts at behest of State Dept., said "it is inconceivable [that] a State Dept. executive of such high rank should fail so utterly in evaluating the public service contributions of American broadcasting . . . "

Only opposition was that of Sen. Capehart (R-Ind.) who wondered, if board's function is desirable, why Interstate Committee can't do job itself. Date for hearing resumption hasn't been set.

Network Accounts: Gillette will sponsor World Series on exclusive transcontinental NBC-TV hookup, under deal signed this week. Mutual has exclusive radio rights, so the 4 TV outlets owned by its stockholders will thus also carry series (WOR-TV, WNAC-TV, WGN-TV, KHJ-TV). Gillette also will sponsor Rose Bowl grid game Jan. 1 from Pasadena, for which NBC-TV has paid $1,600,000 for 3 years exclusive rights . . . Gillette's Prom Products Div. (Prom home permanent wave) and White Rain Div. (White Rain shampoo) to sponsor *Stop the Music* on ABC-TV, Thu. 8-8:30, starting Nov. 1, replacing Admiral and alternating with Hazel Bishop Inc. (lipstick) starting Nov. 8; agencies are Foote, Cone & Belding and Raymond Spector Co., respectively. Old Gold continues weekly sponsorship of last half hour . . . American Chicle Co. (Clorets Chlorophyll gum) starts *Rocky King, Detective* Sept. 16 on DuMont, Sun. 9-9:30, thru Dancer-Fitzgerald-Sample . . . Grove Laboratories Inc. (drug products) shares alt. week sponsorship with General Mills of *Live Like A Millionaire* on CBS-TV, Fri. 10-10:30, starting Sept. 21 . . . Arthur Murray Inc. (dance studios) resumes *Arthur Murray Party* Sept. 19 on ABC-TV, alt. Wed. 9-9:30, thru Ruthrauff & Ryan . . . Minnesota Mining & Mfg. Co. (Scotch tape) moves *Juvenile Jury* from Tue. 8:30-9 to Sun. 3:30-4 on NBC-TV, starting Sept. 16 . . . Cluett, Peabody & Co. (men's shirts) starting Oct. 11 will sponsor *Herb Shriner* on ABC-TV, Thu. 9-9:30, thru Young & Rubicam . . . Coca-Cola reported readying Sun. afternoon Andre Kostelanetz sponsorship on CBS-TV starting in Oct.

Station Accounts: Chicago National Bank Oct. 1 starts *Austin Kiplinger & the News*, Mon.-Wed.-Fri. 11-11:10 p.m. CST on WENR-TV, thru J. R. Pershall Co. He's son of the noted Washington writer, was former financial columnist of *Chicago Journal of Commerce*. It's third bank schedule on ABC-owned WENR-TV, others being Chicago Title & Trust's weekly *Chicago Symphony Chamber Orchestra* and City National Bank's *Crusade in the Pacific* . . . Lewyt Corp. (vacuum cleaners) will spend $100,000 of its new $800,000 ad campaign to produce series of one & 5-min. films and one-min. radio spots for placement throughout country, thru Hicks & Greist Inc., N. Y. . . . The Tea Council plans use of TV-radio in new campaign starting in October, thru Leo Burnett Co., N. Y. . . . Wildroot Co. (hair tonic) has purchased 15 Screen Gems' *TV Disc Jockey Toons*, films accompanying hit song recordings, for placement in 8 major markets, thru BBDO, N. Y. . . . Old Gold to sponsor half of each of the 117 Madison Square Garden sports events signed by WPIX, New York (Vol. 7:35) . . . American Vitamin Associates (Thyavals & Orvita) buys one-hour *Frosty Frolics* on KTLA, Hollywood, where it's to be kinescoped for placement on 9 other stations, thru Schwimmer & Scott, Los Angeles . . . P. Ballantine & Sons (beer & ale), sponsoring film series titled *Intrigue* on WNBT & WNBW (Vol. 7:35), placing it also in 10 other Eastern markets, thru J. Walter Thompson Co., N. Y. . . . Fed "live" Fri. 1:30-2 p.m. from studios of WPTZ, Philadelphia, to WBAL-TV, Baltimore, and WGAL-TV, Lancaster, *Pietro's Place* is repeated live for WPTZ audience 2:30-3 same day—regional account sponsored by San Giorgio Macaroni Products, Ritter Catsup, Boscul Coffee, thru Lamb & Keen, Philadelphia . . . Among other advertisers reported using or planning to use TV: Bovril of America (beef broth), thru Hilton & Riggio Inc., N. Y. (KTTV); Pharma-Craft Corp. Inc. (Fresh deodorant soap), thru McCann-Erickson, N. Y. (KTTV); Thor Corp. (automatic washer), thru Henri, Hurst & McDonald, Chicago; J. P. Smith Shoe Co., thru Price, Robinson & Frank Inc., Chicago; Copper Brite Inc. (Copper Brite liquid cleaner), thru Davis & Co., Los Angeles; Dean Rose Piano Studios, thru R. T. O'Connell Co., N. Y.

JOB prospects are bright in TV-radio-electronics technical fields, but would-be announcers will find tough competition for employment. That's Govt.'s official size-up in new 575-page edition of Labor Dept.-Veterans Administration's *Occupational Outlook Handbook*, issued for guidance of Federal agencies, schools and others.

Opportunities in TV broadcasting should expand considerably during next 10 years, handbook notes, while "eventual decline in sound broadcasting is probable." New TV stations will probably take on several thousand engineers and technicians in coming decade, "although industry will still be a small one." For announcers, handbook says "job prospects are not good," field will continue to be overcrowded despite anticipated TV expansion. Prospective announcers are advised to try to break into field in small communities, where competition isn't so keen.

Rosy future is predicted in TV-radio servicing field. Book says there were about 100,000 technicians in U. S. in late 1949, and that number should increase with growth of TV, which needs more and better servicing because it's more complicated than radio. "TV repairmen need much more basic training and knowledge of electronic theory than radio repairmen," says the handbook. One of best fields today is electrical engineering, because of "expanding use of electrical and electronic equipment in industry, by the Armed Forces, in homes, on farms and in therapeutic work." This despite soaring number of electrical engineering degrees awarded since World War II. "Large numbers were attracted to the field, owing to their experience in working with radio, radar or other electronic or electrical equipment in the armed services."

Assn. of National Advertisers this week renewed assault on radio rates, because of TV inroads, by issuing third study of evening listening that repeats its thesis that "radio listening in TV homes continues to approach near-elimination during the evening hours." Earlier reports, backed by ANA campaign (Vol. 7:11 et seq), brought storm of radio-station protests, eventually produced network rate cuts. Using Hooper's statistics, ANA study shows that, in 24 of 36 TV cities for which data was available, TV's share of evening audience was over 50% in March-April 1951. For all 36, figure ranges from 25.3% in Tulsa to 74.7% in Philadelphia. Year before, figures were 8.2% and 52.1% for the two cities. ANA calls attention to Nielsen study for *Billboard*, published July 14, showing comparison of AM sets-in-use figures for New York and nation, for March-April 1948 and 1951. AM improved 3.5% for 7-8 a.m. in New York, 6.1% nationally. But it dropped drastically rest of day, with AM taking worst beating 8-9 p.m., declining 56.1% in New York, 35.5% nationally. Study is bound to be counter-attacked vigorously by AM operators. New York's WOR was out immediately with report that its night newscasts have higher ratings than during last 8 years, reached 26% more families than in 1946. Copy of report may be obtained from ANA at 285 Madison Ave., New York.

Idea of televising Congress appalled Senators when broached this week by witness during hearings on Benton bills to set up 11-member TV-radio advisory board (see page 6). Majority Leader McFarland (D-Ariz.) predicted: "Every Senator would want to broadcast himself. Programs would play up showmen in Congress and not give workers a fair chance." Sen. Hunt (D-Wyo.) feared showing Senators in action would "cause big turnover in Senate membership." "It would completely ruin the Senate," said Sen. Benton (D-Conn.).

Joseph M. Nassau, 48, broadcasting pioneer identified many years with Philadelphia stations, latterly president of WAEB, Allentown, died suddenly Sept. 1 of heart attack.

Trade Report
September 8, 1951

HIGH OPTIMISM KEYNOTES THE TV TRADE: "Like old times again," is way some describe current upsurging market for TV sets. Admiral, Motorola & Philco, along with some smaller producers, have added their voices to RCA's (Vol. 7:35) in saying things are vastly better at manufacturing level and looking up nicely at wholesale-retail.

Industry's Big 4 all claim their factory inventory gone or spoken for, say wholesalers are ordering at accelerating rate as dealer stocks are being depleted. Retail trade reports are good, too, though can't be pin-pointed as readily.

It looks now like spring-summer slump is really over, though quickened pace of receiver sales might be attributed to deep price cuts designed to unload inventories, and to generally lower lists on new models.

Everybody's optimistic, convinced trade at long last is seeking a "normal" balance. Some are more so than others. Said Philco spokesman: "Things are really and truly hot, and sets are really moving. We've had an increase each week in last 4 weeks. And radio is especially very healthy."

Admiral spokesman said "business is firming up nicely" and noted "very good distributor-to-dealer movement." He even thought the industry might sell as many as 3,000,000 sets these last 4 months of 1951. But he admitted it was still too early to gauge retail activity very clearly, though this week things began to perk up very well as distributors "dropped in unannounced" to talk trade and place orders.

Both Philco and Admiral indicated plants working at capacity permissible under current materials curtailments. Production now depends very largely on availability of materials (see p. 11). Prices, too, could go up again if components do.

* * * *

September Radio & Television Retailing (Caldwell-Clements) warns: "Look for TV retail prices to firm up between now and Christmas because of expected increase in demand which will put the damper on the wave of price-cutting. In radio, there won't be many small sets around for the Christmas buyer..."

Some smaller producers share optimism, though good many are finding heavy price-cutting advertisements of name brands pretty tough competition right now. John Meck reports his production now at highest rate this year. He observed:

"Orders from the smaller dealers have picked up but are still spotty. Many of the bigger stores, however, apparently have decided that TV business this fall will be normal for those who go after it, and are covering their requirements now while it's possible to get the merchandise they will need." He added that procurement of materials is gradually becoming more difficult.

There's note of caution from the men who can't afford to guess wrong -- the purchasing agents. Last week, National Assn. of Purchasing Agents, in forecasting business in general, warned that fall pickup in business will be slow and noted that any sharp increase in the fourth quarter of either civilian or defense demand "could create a wild scramble for materials." It stated: "The much-talked-of upswing in fall business is not reflected in August purchasing commitments. Buying is conservatively geared to the current trend of slow business, inventory reductions and CMP allocations. Viewing the 6 months of falling orders [and] present pricing confusion, inventory managers are putting extreme pressure on further inventory liquidation."

Also cautious is statement from Capehart-Farnsworth president Fred Wilson:

"We do not believe, as some have preached, that we are going to have a seller's market in the near future. We believe that we are going to have to work hard to sell the civilian merchandise we can manufacture in the next few months. While it is probably true that during the latter months of this year the demand for civilian electronics equipment may be much greater than supply, we are not counting on that condition to keep our plant moving. But we are planning to aggressively push the sale of our merchandise again in the belief that we are not going to have

an all-out war; that for some few months ahead there will be plenty of merchandise available; that we and the other members of the industry will learn how to use materials that are not critical and thereby keep production at a higher rate than we can now actually foresee."

* * * *

Week preceding Labor Day was again one of low TV production, RTMA reporting only 55,273 sets made (2400 private label). Week ended Aug. 31 showed about same as week before (Vol. 7:35), or less than third of comparable 1950 weeks (Vol. 6:37-38).

But factory inventories didn't go down much, only about 11,000 units, to bring total remaining to 655,349 as of Aug. 31 as against preceding week's 666,695. Thus drop of 88,000 between Aug. 17 & 24 (Vol. 7:35) wasn't repeated. It's probable, though, that Labor Day week will show considerably greater drop.

Five-week August output totaled about 255,000 units, compared with 4-week August 1950's 702,287 (Vol. 6:37). Inventory decline during month ran: 768,766, Aug. 3; 765,916, Aug. 10; 754,854, Aug. 17; 666,696, Aug. 24; 655,349, Aug. 31.

Radio output stayed at about same level as preceding weeks -- 226,013 units (112,236 private label) as of Aug. 31, compared with 222,263 week earlier. Factory inventories went down to 383,604 from preceding week's 418,304. Week's radios were: home sets, 110,419; portables, 21,416; auto, 94,178.

Topics & Trends of TV Trade: Trade-in allowance counted against down payment under Regulation W must reflect "a bona fide trade-in or exchange of property having a value that bears a reasonable relationship to the amount credited," Federal Reserve Board said at week's end in mildly-worded interpretation that was scarcely the "crackdown" some people had anticipated. Board rapped knuckles of dealers who advertise that any trade-in will count as full down payment when it observed that practice of making "substantial uniform allowance for all so-called trade-ins irrespective of their make, model or condition" doesn't conform with regulation.

There's no requirement that trade-in allowances be limited to "actual market value of the trade-in or to the amount for which [dealer] expects to be able to sell it," interpretation says, but it stresses that "fictitious" trade-ins aimed at evading down payment rules are banned. Other points made by FRB: (1) Dealer must actually receive and take possession of items traded in. (2) Dealer can't raise price to compensate for trade-in counted as down payment.

* * * *

Agenda of RTMA conference Sept. 18-20 in New York's Roosevelt Hotel includes board and committee reviews of defense requirements, shortage problems, TV freeze, FM promotion campaign, expanding association services. "Small business" manufacturers will hold own session Sept. 18 under president Glen McDaniel and committee chairman A. D. Plamondon Jr. Board meeting concludes conference Sept. 20.

National Electronic Distributors Assn. second annual convention and exhibit in Cleveland Auditorium, Sept. 10-13, will feature addresses by GE's Dr. W. R. G. Baker, International Resistance's Harry A. Ehle, and a manufacturers' open forum including Norman A. Triplett, William J. Barron, J. Earl Templeton, Kenneth C. Meinken, Austin C. Lescaboura.

Dun & Bradstreet's monthly dealer inventory survey (Vol. 7:35) is being financed independently by these companies: Bendix, Corning Glass, Crosley, GE, Hallicrafters, Indiana Steel Products, Motorola, Philco, RCA, Sentinel, Sprague, Stromberg, Sylvania, Westinghouse, Zenith.

Lloyd A. Good, 69, Philco production mgr. for 15 years before retiring in 1940, died Sept. 7 in Philadelphia after long illness.

Trade Miscellany: Federal Trade Commission case against Sylvania and Philco, involving preferential prices on replacement tubes, set for hearing Sept. 17 before Examiner Webster Ballinger . . . RCA's Frank Folsom will arrange for RCA Victor record pressing plant in Israel during his flying trip there in latter Sept.; he'll also confer in Rome with Italian distributor Joe Biondo regarding other expansion plans . . . **Electronic Devices Inc.**, Brooklyn (Herman Weissberger, president), has purchased Precision Rectifier Corp., will operate it as division with Earl Steiker, ex-Federal, engineering director . . . **Super Electric Products Corp.**, Newark (components), goes to hearing Sept. 18 under Chapter XI, offering to pay $350,000 in general claims with 10-year debentures or 25% cash . . . **American Phenolic Corp.** has completed new 80,000-sq. ft. plant in Chicago to produce Teflon coaxial cable and other devices.

Merchandising Notes: Zenith expected to "make it official"—price-cutting of current stocks already advertised by dealers—by following lead of RCA, GE, Philco, et al (Vol. 7:33-35) and reducing lists when it introduces new line at distributor meeting in Chicago's Drake Hotel, Sept. 14-15 . . . **Hoffman Radio's** New York office (D. W. May, mgr.) is 30 Church St., with new warehouse at 163 Avenue A, Bayonne, N. J.; Chicago office and warehouse (Howard L. Bredlow, mgr.) is at 219 E. North Water St. . . . Silavox earphone attachment to TV sets being offered by Skinner & Pelton Inc., Chicago; phones plus installation cost $24.95.

* * * *

Receiving tube sales for July were down to 13,185,567, compared with 27,667,099 in June and 21,128,017 in July, 1950. Yet RTMA report shows that total for first 7 months of 1951 well exceeds same 1950 period—229,087,892 vs. 191,503,938. Sales for all categories have increased, but replacement and export have shown biggest jumps. This year, 54,730,948 have gone into replacement market, compared with 35,912,137 last year. Exports rose from 5,708,880 to 11,581,593. Statistics don't show how many go into new TV or radio sets or military equipment, so trends aren't discernible there.

Round tubes have all but disappeared, as have sizes under 16-in. for new sets. RTMA report for July shows 99% of the 89,144 shipped were rectangular, 16-in. or larger. The 20-in. continues to grow, totaling 12.5% of all units, compared with 10.8% in June, 7.7% in May. Value of picture tubes was $1,858,930.

Trade Personals: Charles A. Hansen, Jensen Mfg. Co., elected president of Radio Parts & Electronic Equipment Shows Inc., whose next Chicago show is set for May 18-21, 1952; he succeeds Standard Transformer's Jerry Kahn. Other officers: Sam L. Baraf, United Transformer, v.p.; W. D. Jenkins, Radio Supply Co., Richmond, secy.; Lew W. Howard, Trad, treas. . . . John W. Craig, Crosley, reappointed chairman, RTMA's FM policy committee . . . John S. Anderson, executive v.p. since 1948, elected president of Aeronautical Radio Inc. . . . Franklin Lamb, vice chairman, Tele King, onetime president of Reynolds Pen Co., on leave to serve as aide to mobilization director Charles E. Wilson . . . E. W. Olson promoted from field man to sales promotion mgr. for component products, Webster-Chicago . . . Home of Robert C. Tait, Stromberg-Carlson president, in Pittsford section of Rochester, suffered $25,000 damages by blaze Sept. 4 . . . Frank A. D. Andrea Jr., graduate of Pennsylvania Military College and Navy veteran, joins engineering staff of father's Andrea Radio Corp. under chief engineer Harold Heindel.

Promotion of Dr. C. B. Jolliffe, executive v.p. in charge of RCA Labs, to newly-created post of v.p. & technical director of RCA was announced Sept. 7, effective immediately. E. W. (Shorty) Engstrom, second in command at Princeton, moves up to become v.p. in charge of Labs. Dr. Jolliffe's new duties are to supervise long-range planning, coordinate technical representation of RCA before govt. agencies and technical groups.

TV-radio industry—manufacturers, wholesalers, telecasters—are expected to be asked to contribute to Crusade for Europe, operating Radio Free Europe and planning Radio Free Asia, privately endowed by group headed by Gen. Lucius Clay, to get America's messages through iron curtain. Gen. Clay last week named RCA's Gen. David Sarnoff New York chairman in drive for 25,000,000 enrollments, $3,500,000 funds.

FIRST TEST of theatre TV as mass training device will be held Sept. 15 under govt. sponsorship when Federal Civil Defense Administration will hold closed-circuit "school" for civil defense workers simultaneously at theatres in Baltimore, Philadelphia, New York & Washington, with combined seating capacity of more than 11,000. One-hour program will originate in Washington studios of WMAL-TV at 9 a.m. Plan was suggested by United Paramount Theatres' Robert H. O'Brien, and the TV-equipped theatres in Baltimore, Philadelphia, Washington were made available by Nathan Halpern's Theatre Network TV Inc.

Unique feature of theatre-TV "classroom" is that spectators in all 4 theatres will be able to ask questions of civil defense instructors in Washington during the program through special telephone circuits. Said Civil Defense Administrator Millard Caldwell in announcing experiment: "The mass training of 15,000,000 civil defense workers is one of the nation's most immediate problems. Through theatre TV the task of preparing not only the civil defense worker for his job but the nation at large to meet an enemy attack can be greatly simplified."

Theatres donated free for test are Paramount in New York, Warner Brothers' Stanley in Philadelphia, Loew's Century in Baltimore and RKO Keith's in Washington. Some 800 seats in the Washington theatre will be reserved for "members of Congress, govt. officials, educators and industrial leaders."

Navy's experiments in training reservists by TV (Vol. 7:8) are recorded in 24-page *Training by Television* (Document PB 104414), Navy-Fordham U report, which concludes that TV has great value in rapid training of large groups. Booklet is available for 75¢ from Office of Technical Services, Commerce Dept., Washington.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for July: Wallace C. Johnson bought 22 Admiral, holds 1500; Dee S. Lenfesty sold 1300 Arvin, holds 2700; James M. Seward bought 100 CBS Class B, holds 200 Class A & 300 Class B; Allen B. DuMont gave 1400 DuMont Class A as gift (June), holds 55,000 Class A & 2000 Class B; Adolphe A. Juviler sold 2200 Olympic (May, July), holds 88,440; Percy L. Schoenen sold 700 Olympic (May, July), holds 24,006; William Balderston gave 20 Philco as gift, holds 7168; Thomas A. Kennally sold 3000 Philco (June, July), holds 19,974; William Gammell Jr. sold 1400 Raytheon, holds 15,570; E. Finley Carter acquired thru profit-sharing plan 64 Sylvania (February), holds 1164; E. F. McDonald Jr. sold 2200 Zenith, holds 31,931.

Short positions in stocks listed on N. Y. Stock Exchange from July 13 to Aug. 15 are reported for following electronics firms: Admiral, from 37,405 as of July 13 to 35,586 as of Aug. 15; Avco, 20,880 to 21,080; Emerson, 5775 to 5848; GE, 13,296 to 10,725; IT&T, 16,704 to 22,714; Motorola, 16,491 to 15,332; Philco, 18,252 to 18,793; RCA, 29,986 to 31,896; Westinghouse, 4817 to 5257; Zenith, 30,383 to 26,197.

Raytheon has $150,000,000 backlog of unfilled orders on books, president Charles Francis Adam Jr. reported to stockholders meeting Sept. 7. Shipments, largely defense, will build up rest of year and reach peak next summer, he stated. Stockholders approved increase in authorized common stock from 2,250,000 to 3,000,000 shares.

I-T-E Circuit Breaker Co. has filed SEC registration statement covering proposed offering of 60,000 shares of convertible preferred stock, par value $50, as approved at Sept. 5 stockholders meeting. Smith, Barney & Co. and C. C. Collings & Co. head underwriters.

Olympic Radio reports net income of $259,206 (70¢ a share) on sales of $8,112,588 for first 6 months of 1951. This compares with net of $479,135 ($1.28) for same 1950 period.

Globe-Union Inc. reports net earnings of $872,826 ($1.30 a share) on sales of $20,239,325 for 6 months ended June 30. This compares with profit of $1,159,286 ($1.81) on sales of $14,346,867 for same 1950 period.

* * * *

Dividends: Wells-Gardner, 15¢ payable Sept. 15 to holders of record Sept. 4; Bendix Aviation, 75¢ payable Sept. 20 to holders Sept. 10; Collins Radio, 66¾¢ pfd. payable Oct. 1 to holders Sept. 21; WJR The Goodwill Station, 10¢ payable Sept. 14 to holders Sept. 7; Muter Co., 15¢ payable Sept. 30 to holders Sept. 15; Arvin Industries, 50¢ payable Sept. 29 to holders Sept. 17; Davega Stores, 25¢ pfd. & 25¢ common, both payable Oct. 1 to holders Sept. 17; Decca Records, 17½¢ payable Sept. 28 to holders Sept. 17; Admiral, 25¢ payable Sept. 28 to holders sept 17; RCA 87½¢ on $3.50 cumulative first pfd., payable Oct. 1 to holders Sept. 17.

———■———

Giant image-correcting lens, over 22 inches in diameter, has been developed by American Optical Co., Southbridge, Mass., offered as newest device for improving theatre TV. Company says several have already been ordered by RCA and General Precision Lab. Lens corrects to "perfect focus" the distortion now caused when projected images are magnified for movie screens up to 15x20-ft.

Self-propelled underwater TV camera, designed for mapping mine fields, examining harbor beds, inspecting ship damage, etc., is undergoing tests in Ottawa by Canada's National Research Council. It can move ahead or astern at one knot. It weighs 250 lbs., was developed under direction of engineer Wm. Torrington.

Mobilization Report
September 8, 1951

MORE METAL CUTS COMING—AND THEN SOME: Less steel in fourth quarter than expected for TV-radio and other consumer durable industries...another slash due in copper... and tube plants facing serious curtailment next month because of nickel shortage.

"The big pinch is here now" on civilian economy, said defense mobilizer Charles E. Wilson this week. But to most TV-radio manufacturers, the "big pinch" is academic -- for their production is now well below the levels permitted by NPA.

It's the sales situation -- not materials -- that's chief worry of the set makers today. But, while manufacturers voluntarily lowered their production goals to conform with demand, they're going to find it difficult or impossible to raise them again when inventories are depleted and demand exceeds supply.

Rumblings on the materials front are ominous -- boding steeper cuts in the supply of metals that are the brain, bone and sinew of TV-radio, threatening ever-lowering ceilings over potential production. Last July, makers of consumer durable goods were told they'd receive, in fourth quarter, steel at 65% of rate they used it in first-half 1950, copper at 54%, aluminum at 48%.

But military and defense-supporting demands on steel for fourth quarter are taking bigger chunk of the pie than anticipated. So NPA did some more chopping. TV-radio manufacturers, in their fourth quarter allotments, are getting CMP tickets for about 60% of the steel they used during average quarter of first-half 1950 vs. 70% this third quarter.

* * * *

Further cuts in copper were virtually assured even before the disastrous strike which shut off 95% of nation's output of that basic electrical metal. As strikers began returning to the pits at week's end, it appeared probable that consumer goods manufacturers might not be able to cash in their CMP paper for the copper that's supposed to be reserved for them.

Copper situation has govt. planners nearly frantic. DPA-NPA boss Manly Fleischmann Sept. 5 called it "desperate," revealed he had ordered copper mills to give "preferential treatment" to military orders -- clear indication he believes there won't be enough copper in bank during fourth quarter to fill all CMP orders.

"Most critical of all large tonnage non-ferrous metals" -- that's description of copper in NPA's newly-revised "List of Basic Materials," compiled before strike. Imports of the red metal have fallen off because foreign price is higher than price ceiling in U.S. DPA indicated Sept. 5 it would seek price relief from OPS to encourage imports, but next day mobilization chief Wilson publicly put his foot down on any such move.

To make matters worse, shortage of copper scrap, which normally comprises about 40% of copper supply, has already forced virtual shutdown of ingot industry.

* * * *

So new and deeper cuts in copper and steel to consumer durable manufacturers -- who are last in line for vital materials -- are certain next quarter, and again in first quarter of 1952 when arms program picks up more speed. But that's not all:

New round is probable by mid-1952. Temper of Congress, pushing for bigger rearmament program, is solid indication. Present mobilization plans are based on 95-group Air Force, 24 Army divisions. But lawmakers are pressing for 150-to-162-group Air Force, 30-division Army, more carriers and bigger anti-submarine fleet for Navy. While this will eventually mean more military orders, raising our sights this way will throw entire materials-control blueprint out the window.

* * * *

If materials shortages are academic today to TV-radio set manufacturers, they're very real in the factories turning out electronics' most basic components -- vacuum tubes. Unless there's quick action by the Govt. at high level, nickel snarl

threatens serious dislocations in electronic tube industry as early as next month.

There's plenty of irony, but scant comfort, in fact that tube industry, now facing heavy cutbacks for lack of nickel, is at same time undergoing $50,000,000 govt.-sponsored expansion program (see Mobilization Notes).

Tube makers need minimum of 188,000 lbs. of nickel a month to keep going at somewhere near present rate of production. Last year they used nearly 300,000 lbs. monthly, but near-miracles of conservation and substitution have shaved requirements way down. NPA last spring promised tube industry special allocation of 180,000 lbs. for May (Vol. 7:18-19). Only part of this allotment was received.

There's been no special NPA allocation of nickel to tube industry since then. Instead, it's been doled out on basis of military requirements, plus small percentage of amount needed for civilian production. So, for last 3 months, tube plants, which in May were devoting scant 10% of their facilities to military output, have been allocated fraction of the amount of nickel they need.

Nearly 30% of tube industry's output is military now -- but tube industry can't be operated on a 30% -- or a 50% -- basis. To avoid major curtailments and loss of highly-skilled workers -- even shutdowns in some plants -- it must continue high production of civilian tubes as military orders steadily increase.

There's a long "lead time" in nickel for electronic tubes -- it takes 3-4 months to process raw nickel into the finished elements that go into tubes. So in recent months, tube makers have been living off earlier allotments, stretching the supply through conservation and substitution. Most tube plants have enough nickel products in sight to last them about a month.

Shutdown of industry's suppliers who make nickel-plated materials for tube elements is threatened this month, unless aid comes soon. Electroplating firms are finding it impossible to obtain nickel anodes, and efforts to get special NPA directives for them have failed so far.

RTMA's tube division will hold special meeting in Washington Sept. 11 to consider possible action in nickel emergency.

Action by Defense Mobilizer Wilson himself may be required to get things rolling. But because whole rearmament program can be bogged if tube industry loses its large production potential, it's reasonable assumption that something will be done. And judging from reports from industry, there's no time to lose.

* * * *

TV-radio industry won't feel bite for some time if production of civilian tubes is curtailed in next few months. Most manufacturers laid in heavy supply of tubes and other vital components during trade lull. Average set maker is believed to have at least 2 "normal" months' backlog -- and at current rate of set production that should last 4 months or more.

Action to avoid straitjacket aspects of CMP as it applies to consumer goods manufacturers is in sight. NPA is drafting order to give manufacturers latitude in use of materials among broad groups of products, as it did during third quarter under Order M-47A (Vol. 7:31).

"In another war, superior electronics would be decisive." So says retired Gen. Carl Spaatz in Aug. 13 *Newsweek* article on air power. Citing the important part played by electronics in World War II air warfare (radar, electronic bombsight, proximity fuse), Spaatz says these achievements "are nothing to what is ahead if there is a third world war." He states the Russians have services of many German electronic scientists and inevitably have made "important strides in electronics" as well as jet construction. "The battle for air supremacy is resolving itself into a battle for electronic superiority," Gen. Spaatz says, pleading for more secrecy about new non-military electronic developments. "Some device that improves TV reception in your home," he maintains, "may be just the thing, when applied to fighting machines, that will give us a decisive edge."

Canadian National Exposition, Toronto, has quite a few TV-radio exhibits—the TVs mostly counterparts of American models. Displaying them are Canadian subsidiaries of Westinghouse, GE, Philco, RCA, Admiral, Stromberg, Sparton; also Canadian Marconi, Addison, Dominion Electrohome. All have radios, too, and in addition there are radios by Rogers Majestic, Northern Electric, Pye Canada Ltd. Prices generally are considerably higher than same models in U. S.; e.g., Admiral 17-in walnut combination with half doors at $730, Westinghouse 20-in. combination at $975, Canadian Marconi 20-in. combination $670.

National Electronics Conference at Chicago's Edgewater Beach Hotel, Oct. 22-24, will feature separate luncheon addresses by CBS Laboratories Div. president Adrian Murphy and GE's Electronics v.p. W. R. G. Baker, discussing color TV.

Mobilization Notes: A $135,000,000 program to expand electronics industry for defense is under way, with tax aid from Uncle Sam.

There'll be more to come, but as of July 31 DPA and its predecessor NSRB had issued certificates of necessity authorizing 5-year tax write-offs for 147 new or expanded electronic plants. These have been reported in this section as issued.

The $135,000,000 for electronics represents only 1.5% of total $8.65 billion in expansion of all military and defense-supporting production authorized since tax aid program began last October. It's in addition to something less than $10,000,000 in DPA-approved direct govt. loans for electronic plant expansion.

Bulk of expansion is for production of military end equipment—radar, communications radio, loran, electronic fire control devices and fuses—and specialized electronic tubes for military equipment.

Here's rough breakdown of certificates granted and dollar value of expansion they represent: End equipment, 44 certificates, $64,246,000; tubes, 33 certificates, $49,439,000; components (resistors, capacitors, transformers, etc.), 39 certificates, $8,418,000; miscellaneous parts, 31 certificates, $12,110,000.

Actually, only about 74% of dollar value of the authorized electronic expansion is subject to rapid amortization. Percentage varies, DPA says, according to "type of facility, post-emergency usefulness of plant to owner and degree of [aid] necessary to encourage expansion."

Biggest electronic expansion programs authorized by DPA are those planned by **Westinghouse** and **General Electric**. Westinghouse got go-ahead for $23,500,000 in new plant facilities—$12,000,000 for Pittsburgh tube plant and $11,500,000 for end equipment production at Baltimore. GE will spend $15,778,000 for plant at Binghamton to manufacture radio compasses, other military end products.

Many firms outside TV-radio industry are among those receiving certificates for expansion of electronic production facilities. Following Westinghouse and GE in cost of programs are: **Cutler-Hammer**, $7,700,000, switches & contacts; **Hughes Aircraft**, $7,200,000, guided missiles; **Arma Corp.**, $6,100,000, radar computers.

These tube firms are among electronic industry's top beneficiaries of tax aid program: **Sylvania**, $5,773,000; **Lansdale (Philco)**, $4,000,000 (for proposed plant in Frederick, Md., plans for which were recently cancelled—see Vol. 7:34); **Hytron**, $3,400,000; **Varian Assoc.**, $2,400,000.

* * * *

"Most complete mobile TV station ever built" was delivered this week to Signal Corps' Ft. Monmouth (N. J.) laboratories by RCA, consists of 4 special 10-ton trucks, each 31 ft. long. Two trucks contain complete TV transmitting and monitoring equipment, 3 field cameras, 10 receivers, large-screen TV projector and radio intercom system. Other 2 trucks contain power generators. "TV caravan" will be used "to explore feasability of TV for field instruction and to develop instructional techniques via TV," according to Signal Corps. One suggested use is refereeing and observing field maneuvers. "Caravan" will use microwave or coaxial cable to pipe pictures to military classrooms or standard TV stations.

Mica substitutes are far more plentiful and satisfactory than they were during World War II, mica industry and NPA jointly have announced. Many high-quality substitutes, however, are still in experimental stage, and industry expressed confidence they'll be usable soon. Manufacturers' inventories of mica, used in capacitors and for other insulating purposes, were reported adequate, but deteriorating quality of imports from India, chief source of supply, is becoming increasingly serious.

New plant construction in fourth quarter will be limited to expansion of metals-producing capacity and important military production, DPA said this week in announcing allotments of structural steel. These firms manufacturing electronic and related items received fourth quarter steel allotments for expansion programs for Armed Forces: **Greeneville Cabinet Co. (Magnavox)**, electronic equipment; **Webster Electric Co.**, telephone, telegraph & electronic equipment; **Arma Corp.**, fire control & electronic equipment; **Amperex Electronic Corp.**, electronic equipment; **Weston Electric Instrument Co.**, precision instruments; **The Baldwin Co.**, electronics; **General Electric**, research electronics; **Bendix Aviation**, aircraft accessories; **General Precision Laboratory Inc.**, electronic equipment; **Northrop Aircraft**, guided missiles; **Hartman Electrical Mfg. Co.**, aircraft electronic controls. Some of these firms have already started construction; much of the expansion is being aided by Govt. through rapid tax amortization.

First TV-radio case before NPA Appeals Board was settled with grant of some additional steel to Packard-Bell. Los Angeles manufacturer asked 17% increase in base period steel quota under consumer durables order M-47A. It claimed this period (first-half 1950) was abnormal one for company, and many employes would have to be laid off if civilian production couldn't be maintained until defense orders pick up. In decision, board concluded: "There was no persuasive showing of improper discrimination or sufficient public interest to warrant a grant, but strict compliance with the order would work an unreasonable hardship." Partial grant—amount undisclosed—was made Aug. 28.

Chicago electronic plants are devoting about 25% of their production to military items, says Sept. 6 *New York Journal of Commerce* which notes that production of electronic equipment other than home TV-radio "is running at a record rate" in Chicago. Article quotes Motorola ex-v.p. Walter H. Stellner as saying 15-20% of firm's output is going into military production, but bulk of Motorola's defense orders won't be in production stage until late this year and first quarter of 1952.

Sperry Corp. reportedly has received $10,000,000 Navy contract for guided missiles, has formed subsidiary, Sperry-Farragut Corp., to fill order in new plant to be built by Govt. on 35-acre tract near Bristol, Tenn., to employ 1500.

Complete listings of 1500 radio-electronics manufacturers, with their products, feature September *Tele-Tech*, published by Caldwell-Clements Inc., 480 Lexington Ave., N. Y. How to get business from Army, Navy & Air Force is also described.

Industrial TV, despite its tremendous possibilities, isn't being fully exploited by industry or by standard TV equipment manufacturers, says article in September *Fortune Magazine*. Govt. agencies, it says, are principal users—in ordnance plants, arsenals, atomic installations, etc. In peacetime industry, *Fortune* states, only electric utilities have any sizeable number—about 100 installations. Only 11 other ITV set-ups are in existence in private industry, according to article—5 in steel industry, 2 each in auto and photographic industries, one each in coal and motion picture industries (Camera Vision Productions Inc., which rents TV-monitored film cameras to movie studios). Article says Diamond Power Specialty Co., Lancaster, O., "has been selling rings around everyone else in the industrial TV business" with its inexpensive "Utiliscope" system developed jointly with Capehart-Farnsworth engineers (Vol. 5:19, 36). The 100 power plant installations, worth some $400,000, were practically all supplied by Diamond Power, says article, which observes that DuMont, RCA, Remington-Rand combined haven't sold that many.

Texas oilmen W. L. Pickens of Dallas, R. L. Wheelock of Corsicana and H. H. Coffield of Rockland, who hit jackpot with their KEYL, San Antonio, recently sold to George Storer interests for $1,050,000 (Vol. 7:30), are applying now for uhf outlets in Dallas (Channel No. 23), Houston (No. 23), San Antonio (No. 35) in name of UHF Television Co. Same group also were principals in KPHO-TV, Phoenix (Vol. 5:26) but pulled out before it was built and sold. They're also associated in pre-freeze vhf applications for Corpus Christi and New Orleans—represented by Dallas law firm of Johnson, Bohannon, Prescott & Abney, whose Ross Bohannon, onetime G-man who won fame in Dillinger capture, handled past successful applications and grants. This week's batch of applications included another for Texas—from KGNC, Amarillo, seeking Channel 4. And Oklahoma City application for Channel 9, specifying 200 kw and 1551-ft. tower, plant to cost $1,350,000 was filed by Oklahoma Television Corp. (Vol. 7:35). Total application now on file: 441. [For details about this week's applications, see *TV Addenda 13-I* herewith; for list of all applicants to date, see *TV Factbook No. 13* plus *Addenda 13-A to 13-I.*]

Progress toward TV code of program standards (Vol. 7:25) was reported at Virginia Beach NARTB-TV board meeting Sept. 6-7, and program standards committee has called full NARTB-TV membership meeting in Chicago Oct. 19 to act on recommendations. Chairman Robert D. Swezey, WDSU-TV, reported that subcommittee on education, culture, children's programs and decency & decorum in production has prepared proposals under chairmanship of Davidson Taylor, NBC-TV; also that subcommittee on news, public events, religion and controversial issues under Harold Hough, WBAP-TV, is ready to report. First draft of advertising practices standards is about ready to be submitted by chairman Walter J. Damm, WTMJ-TV. The 3 subcommittees meet in Washington Oct. 2 to report to full program standards committee. Fourth subcommittee under Paul Raibourn, KTLA, is working on methods of securing standards observance.

NARTB now counts 68 of the 107 TV stations, plus 2 networks (DuMont & NBC) as members, these having joined in recent weeks: WABD, WDTV, WOR-TV, WEWS, WCPO-TV, WJIM-TV, WHBF-TV, KING-TV, KFMB-TV. *Chicago Tribune's* WGN & WGN-TV have also decided to join, WGN having pulled out of old NAB in 1941. At NARTB-TV board meeting this week, director Thad Brown Jr. was authorized to hire executive asst. TV group's income was reported within 95% of budget.

Applications for station construction in first quarter 1952 under NPA building control regulations are due Sept. 20 on form CMP-4C. NPA says it has issued all fourth quarter authorizations and allotments of materials, but hasn't yet released list of approved projects. Only 11% of the steel required by commercial construction applicants—including TV-radio—will be available in fourth quarter. However, those whose fourth quarter applications were rejected were urged to reapply for first quarter authorizations and allotments.

Filings in FCC's TV allocations proceedings have reached total of 252, with 128 of them covering Groups A-F (Maine to Maryland), balance on DuMont plan (Vol. 7:35). Statements, supporting FCC's allocation or offering alternatives, range from perfunctory to exhaustive. Commission staffmen maintain that "every scrap of paper is getting a thorough going over." Said one FCC attorney: "Personally, if I were on the 'outside' and I knew how this is being handled, I'd be satisfied that my client is getting a fairer shake then he would in an oral hearing. This thing has absolute priority."

New XELD-TV, Matamoros, Mexico, opposite Brownsville, Tex. (Vol. 7:31-34) got on air with 6-hour daily test patterns Sept. 4, mostly sponsored by TV distributors-dealers, plans by Sept. 15 to operate minimum of 2 evening & 2 daytime hours plus 2 hours test pattern daily. Manager Monte Kleban reports station's 536-ft. tower (700 ft. above average terrain) on Channel 7 is putting well over 7.5 mv/m into Brownsville, is being seen good 35-mi. radius. FCC has approved its affiliation (for kine-recording service) with CBS-TV, and it's adhering to U. S. standards entirely—for example, won't carry bullfights ("because they are banned in U. S."), hard liquor ads, religious solicitations or per-inquiry accounts. All shows are bi-lingual—none straight English or Spanish. Staff includes Bert Metcalf, program mgr.; Sherrill Edwards, commercial mgr.; Francisco Maza, chief engineer; Hinelda Garcia, traffic mgr.

Buenos Aires' LR3-TV, as first TV station in Argentina will be known, starts Oct. 17, operating on Channel 7 with 5-kw Federal transmitter having 45 kw ERP. Its licensee is Radio Belgrano y Primera Cadena, Argentine dc Broadcasting, S.A. The installation was sold by International Standard Electric Corp. (IT&T), which also sold 5-kw installation to Sao Paulo Radio Televisao, big Brazilian city's second outlet, due to start around Oct. 15 on Channel 5, call letters not yet issued. To participate in opening of Sao Paulo station, DuMont last week shipped its Telecruiser, TV studio on wheels.

Release of recent feature films to TV by Lippert Productions (Vol. 7:17) has prompted Screen Actors Guild to cancel its contract with producer Robert L. Lippert as of Nov. 3. Union charged that Lippert violated pact when he "sold for TV several theatrical feature pictures made after Aug. 1, 1948 without negotiating an agreement with the Guild for additional payment to actors for their TV rights." In pending negotiations for new contract with film industry, Guild is seeking outright ban on release to TV of films made after Aug. 1, 1948 until producers agree to negotiate formula to reimburse employes. Lippert made deal with Petrillo to pay 5% of his gross from TV into AFM royalty fund and to re-record music track on old films for TV. He sold 26 feature films to KTLA last June.

Educators planning State networks are making all-out pitch in effort to get more reserved channels out of FCC. New York was first with 11-station proposal, then Connecticut asked for 4. Now New Jersey is up in arms about fact FCC proposed to reserve no channels in State, says it wants to build 6 stations, is ready to construct "immediately" in New Brunswick. Similar proposals are under consideration in Pennsylvania, Wisconsin, Michigan. No proposal shows that money for construction is available now, though all indicate high hopes based on governors' assurances, etc.

Inspection of uhf station at Bridgeport and luncheon talk by FCC Chairman Coy Sept. 12, are part of Sept. 10-14 TV seminar RCA is conducting for more than 100 station engineers, plus consultants and attorneys; rest of sessions will be at Camden. Engineers will see new 850-856 mc setup for first time (Vol. 7:29). They'll also get special showing of RCA color in New York that evening.

More Sept. 1 sets-in-use reported since NBC Research's "census" of Aug. 1 (Vol. 7:35): Memphis 93,160, up 4160; Dallas-Fort Worth 129,564, up 3564; Omaha 83,928, up 3028; Utica 50,000, up 3000; Norfolk 75,312, up 2512; Greensboro 73,911, up 2211.

TV will be major topic, along with high-speed and color photography, at 70th semi-annual convention of Society of Motion Picture & Television Engineers, Hollywood-Roosevelt Hotel, Oct. 15-19.

NPA APPROVES STATION BUILDING PROJECTS: NPA is allocating materials for construction and alteration of TV and radio stations in fourth quarter, despite extremely tight structural steel situation (Vol. 7:32,36).

The control agency broke its obstinate silence on its attitude toward TV-radio station construction with announcement at week's end that 10 TV projects and 3 radio stations, had received go-ahead and "certified check" for required steel, copper and aluminum. It was only a partial list; more are sure to follow. No list of rejected applications has been issued yet.

NBC was granted materials for 4 projects, to cost total of $652,000 (construction costs only, not including broadcast or studio equipment). Network got NPA blessing for construction of: new studio ($275,000), film projection studio ($108,000), remodeled studio ($40,000), all New York; new studio, Chicago ($229,000).

ABC got permission to build addition to San Francisco TV-radio studio at $600,000; WFIL-TV, Philadelphia, TV-radio facilities at $305,000; and WSYR-TV, Syracuse, TV studio at $26,790.

There's still mystery surrounding NPA's criteria for judging applications. From the first, officials have made clear they'd consider no applications from persons who don't have FCC grants. But on NPA's list was an OK for construction of $125,000 "TV tower near Summit, Pa." by WHUM, Reading, Pa. FCC has announced no grant to WHUM, seeking to build experimental uhf with 1050-ft. tower (see p. 2).

Also on NPA's list was approval of new "radio and TV studios" for KOMA, Oklahoma City, AM licensee which has applied for TV but has no TV grant. NPA also approved construction of uhf station atop Mt. Wilson, Cal., by John H. Poole, who asked FCC permission to move experimental KM2XAZ there from Long Beach (see p. 2).

Radio station approvals went to WMPA, Aberdeen, Miss., $17,784, and WOKE, Oak Ridge, Tenn., $3300, both of which hold CPs, and to WKOK, Sunbury, Pa., for construction of $10,450 tower. Two other broadcasters, Conant Broadcasting Co., Medford, Mass., and WFYC, Alma, Mich., were notified they're exempt under new building control regulations, since they require less than 2 tons of steel (Vol. 7:35).

UHF WINNING CONVERTS, DOUBTS FADING: Uhf stock got another hefty boost this week when more than 150 AM station engineers, consultants and attorneys got good look at its performance in Bridgeport -- and heard FCC chairman Wayne Coy deliver the most fervent affirmation of faith in uhf he has rendered to date.

Occasion was Sept. 12 uhf session of RCA's 5-day seminar, conducted for guests who inspected the RCA-NBC "guinea pig" installations (Vol.7:12,14-16 et seq), watched its operations on 529-535 mc & 850-856 mc. Seminar covered technical aspects of uhf -- transmitters, converters, antennas, propagation.

"You're going to have the surprise of your life," said Coy. "Uhf is not the lemon some people think it is." He pointed to uhf's relative freedom from some types of interference and to FCC's fond care in allocating uhf stations so as to

Copyright 1951 by Radio News Bureau

SEP 17 1951

eliminate or minimize many potential ills -- oscillator radiation, image and intermodulation interference, etc. He drew close attention to fact that primary service areas for uhf stations is expected to be as great as, if not greater than, for vhf.

Coy also favored taking proposed 200-kw ceiling off uhf. It's believed FCC would lift ceiling once it's sure tropospheric interference won't be too severe.

"I'm so sold on uhf," Coy averred, "that I'd like to see all TV go to uhf." This oft-repeated thought of his, which fellow commissioners rejected, stems from the demand of other services for vhf spectrum. These services were given TV's Channel 1, he said, but: "You haven't heard the last from them. They got the short end of the stick."

Session undoubtedly helped sell uhf to many dubious engineers. A number remarked that, while they would always prefer vhf if available, they would not shy away from uhf in markets yet to open, even if vhf & uhf are intermixed. Obviously, though, none relished job of building uhf audience from scratch in markets where pioneers have painfully nurtured vhf audiences to profitable size -- ripe for picking by vhf newcomers.

Much of RCA's big brass, from president Folsom down, was on hand to throw weight behind Coy's exhortation. Folsom foresaw 3000 stations and 50,000,000 sets eventually growing out of vhf-uhf expansion. Spirit of friendliness pervaded sessions -- with Coy and Folsom even joshing each other about their sorest spot, color.

"Our tests have proved," said v.p.-technical director Dr. C. B. Jolliffe, "that TV on uhf can be just as clear and stable as on vhf, and in some instances it is even better."

Results with 850-mc signals to date, to be described at Sept. 17 Philadelphia IRE meeting by RCA's Dr. George Brown, indicate following:

(1) With 40-kw ERP, median field intensity of at least 10,000 uv/m is obtained out to 5 miles.

(2) Tilting antenna downward 1.3 degrees increases signal 10 db out to 5 miles, decreases it beyond that, reduces tropospheric field 12 db at 100 miles.

* * * *

Next manufacturer planning uhf demonstrations in Bridgeport is Sarkes Tarzian, who will show new tuner to set-making customers Oct. 6.

NPA isn't standing in way of uhf experimentation. This week it gave Humboldt Grieg's WHUM, Reading, Pa., go-ahead on 1050-ft. tower to cost $125,000 (Vol. 7:33), even though FCC has not yet granted CP. NPA also granted uhf enthusiast John Poole permission to build on Mt. Wilson, moving his experimental station from Long Beach.

POST-FREEZE, HOW SOON & HOW MANY? Two years after FCC lifts freeze -- or sometime in 1954 -- fewer than 300 vhf & uhf stations on the air, out of potential of 2000?

Five years after end of freeze -- something over 500?

These figures may look conservative, at first blush, but they deserve careful study because they're first estimates from any manufacturer of transmitting and station equipment. They're from GE's Dr. W.R.G. Baker, v.p. in charge of electronics, speaking Sept. 10 before National Electronic Distributors Cleveland convention.

They add emphasis -- and more realism -- to plain facts of TV life we've stressed again and again: that it will take time, and plenty of it, before there's any sizeable number of new TV stations in operation, even if as now hoped formal act of lifting freeze occurs early next year (Vol. 7:36).

(Careful reading, incidentally, of our sizeup captioned "Mighty Few New Stations Before 1953" in last week's issue is urged; even at FCC, they will tell you it's reasonable and realistic appraisal and timetable.)

* * * *

Based on GE market research studies, Dr. Baker forecast that 2 years after freeze-lifting, possibly next spring, there should be minimum of 141 new vhf outlets on air (making total 248) plus minimum of 36 uhf stations. And in Dr. Baker's words:

"At the end of 5 years, I think we can look forward to a minimum of 343 vhf stations and 166 uhf stations or more than 500 stations in the United States. This

doesn't agree with many predictions ranging as high as 1500 transmitters in 5 years and I'll admit the estimates are conservative. If materials, including construction materials, should be in free supply, then these estimates could be quite low.

"You may consider these forecasts to be pessimistic. On the contrary, they are realistic, not based alone on what industry members think can be produced, as many surveys are."

How soon will non-TV areas get stations -- and open up new gold mines for set and parts manufacturers and merchandisers? This rule of thumb, said Dr. Baker, can give very rough idea:

"If a city is a good market area; if it is on the coaxial cable, or relay network, or within one microwave link of the cable; if it has only one applicant for permission to construct and operate the station, then, according to our market research experts, it has pretty good chance of getting on the air in next 2 years. If any one of these items is missing, it may be 5 years." [Editor's Note: Dr. Baker's 5-year prediction appears unduly pessimistic. All these conditions would rarely obtain, e.g., only one applicant in "good" market.]

"Happier side of the picture" is Dr. Baker's forecast that approximately 35,500,000 families will be within range of at least one TV station by end of 1955. "We believe," he said, "there will be 44,500,000 wired homes in 1955 or 14% more than in 1950. We believe that by the end of 1955, nearly 80% of these homes...will be within range... And there is a possibility that 9 out of 10 of those more than 35,000,000 families will own at least one TV receiver."

To parts & components distributors, this will mean gross annual business about $1 billion in 1955 -- more than triple 1950's gross of $320,000,000, and over twice as much as 1951's estimated $475,000,000, Dr. Baker said.

COMPATIBLE COLOR UP ANOTHER NOTCH: "Operation Lovebird," so called because lovebird act is one of most critical tests of a color system, continues to prove smash hit with more people who make TV tick -- the makers & merchandisers of TV receivers and the broadcasters, advertisers & agencies providing the programs for those receivers.

Enthusiasm for RCA's pictures -- and compatibility -- came from all quarters during all-week, thrice-daily showings in Radio City's Johnny Victor and Center theatres. Even those who have no special love for RCA-NBC attested to prime importance of compatibility and the high quality of RCA's images.

Quality of pictures seemed about same as during July showings (Vol. 7:28), with exception that more emphasis was placed on vivid (saturated) colors, presumably in answer to criticisms that colors were too pastel (Vol. 7:28).

Entertainment content of program has been enhanced, but George Burton's extraordinarily well-trained lovebirds, brought in from Coast for demonstrations, and singing & dancing turns by Nanette Fabray, are still top attractions.

To show black-&-white on color tube, extremely clever sequence had a secretary living drab life in monochrome, then flashing into color when she took "a trip to Havana, on one of those cruises," meeting outrageously-dressed Latin dancer.

Remote pickup from Merchant Marine Academy, Kings Point, L.I., some 12 miles away, featuring Marine drill team and cadet color bearers, came through well.

* * * *

From two of nation's biggest TV merchandisers -- Davega Stores' Jules Smith and Vim Stores' Max Kassover (about 40 outlets each) -- came indignant comments. Smith burst out in middle of demonstration: "CBS is still out of step. Somebody ought to show Coy a thing or two." Everyone laughed. Kassover's opinion: "This is the ultimate. I think it's a shame to keep this from the public. It's here now."

"Compatibility is very critical, we've found," said telecaster George Storer, whose WJBK-TV, Detroit, is scheduled to carry CBS's color football schedule (Vol. 7:35). He described how flock of complaints followed an experimental color-cast. "But what troubles some of us, regarding a compatible system," he said, "is the problem of mass producing tri-color tubes." RCA president Frank Folsom replied:

"We think we can mass produce them. When we had Mr. Coy out to Lancaster, a worker showed him a machine that exhausts 12 tubes an hour. Coy thought that

wasn't much. Then we showed him a machine, costing $400,000, which will be able to exhaust 200-300 per hour. It's just like the first RCA '630' model TV receiver. People said only 2 outfits could make a TV set in those days. Today, there must be 150 making them."

Cuba's Goar Mestre, operating CMQ-TV, Havana, and building 4 other stations, stated flatly: "Compatibility is basic. I can't see using a system that would make people buy additional devices."

* * * *

Showings continue next week, close down for a week, then resume with demonstrations for public. Network and large-screen tests are planned, dates undecided.

FCC is sending Wm. Boese, technical research chief, to RCA's Sept. 17 showing for benefit of NTSC's field-test Panel 16. On Sept. 26, RCA will have 4 Commission engineers -- Plummer, Allen, Boese, Chapin -- up to Lancaster for inspection of tri-color tube production. Choice of standards for field tests, as recommended by Panel 13, is expected to be approved by whole NTSC at Sept. 18 New York meeting.

Zenith's experimental colorcasts should offer one of best opportunities for field testing, since it's only vhf station (Channel 2) permitted to operate without restrictions on hours. FCC has limited RCA, Philco and Crosley to colorcasts during periods outside regular programming hours, because they're using commercial stations. DuMont, however, will be able to supply signals any time, when its New York uhf station gets going.

FCC's "open door" to compatible systems is probably more ajar than it has ever been. FCC Chairman Coy's good-natured exchange on color with Folsom, at Bridgeport uhf seminar (see p. 1), is an indication. Coy stood up for FCC's decision, but reiterated Commission would have preferred compatible system if it had been ready.

Congressional backing of compatible system is likely to grow as time for resubmission of system to Commission nears. For example, Rep. Charles Wolverton, ranking Republican on Interstate & Foreign Commerce Committee, attended Sept. 12 showing. He said: "We are now approaching that for which we have all striven. I never did think the RCA system was inferior."

* * * *

CBS-Columbia Inc. announced "mass production" of color sets began Sept. 6. President David Cogan reports $500 color-monochrome unit now coming off line at rate of 30-a-day, and "we expect to go up every week." He's still shooting for 300-a-day production, still "hoping for total of 25,000" by year's end, he says -- despite competitors' doubts company can make more than 2000-3000.

Sample display set is going to all distributors first, Cogan says. Thereafter, production will be channeled to areas with colorcasts. The $250 "slave" unit is due in about 60 days, with $400 color-monochrome set "before year's end."

DuMont announced "DuMatic" switch this week, a $19.95 adapter to get black-&-white from CBS colorcasts, says it can be installed in an hour. And Raytheon is reported planning $14.95 adapter and "slave" units. Other makers of such adapters, notably Philco, say demand has been negligible.

Personal Notes: Thomas H. Dawson returns to CBS-TV from Petry Co., where he has been TV director, to head up new separate CBS-TV Spot Sales, rep for WCBS-TV, WCAU-TV, KTSL, WTOP-TV, WBTV, KSL-TV, WAFM-TV; George R. Dunham Jr. continues as Eastern sales mgr., Sam Cook Digges as Chicago TV sales mgr. . . . Ben Feiner Jr., ex-MGM, returns to CBS Oct. 1 as executive TV producer under v.p. Harry Ackerman, Hollywood . . . James T. Maddigan promoted to ABC-TV news-special events director, succeeded as ABC-radio news director by Donald R. Coe . . . Ernest de la Ossa, NBC personnel director, named member of New York Regional Wage Stabilization Board . . . Frank Cooley, ex-farm program director, WHAS & WHAS-TV, Louisville, now adv.-information director, California Farm Bureau Federation, Berkeley . . . James C. Douglass has resigned as coordinator of TV-radio advertising of Colgate-Palmolive-Peet to become TV-radio v.p., Erwin, Wasey & Co., succeeding C. H. Cottington, resigned . . . Nat Wolff named Young & Rubicam v.p. in charge of TV-radio production under Edward W. Meade, v.p. & TV-radio director . . . David D. Polon named TV-radio v.p., R. T. O'Connell agency . . . Charles Harrell named production supervisor, TV-radio dept., Lennen & Mitchell . . . Sylvania Dowling, ex-Young & Rubicam, now TV copy supervisor, Sullivan, Stauffer, Colwell & Bayles.

Possible successor to Comr. Frieda Hennock is Atlanta lawyer and former Congresswoman Mrs. Helen Douglas Mankin, according to *Billboard's* Washington correspondent Ben Atlas. He says she's being pushed by India Edwards, Democratic National Committee vice chairman. However, consensus is that inside track is still held by Robert Bartley, House Speaker Sam Rayburn's nephew and assistant. Miss Hennock's appointment to New York Federal judgeship (Vol. 7:24 et seq) still hangs fire, no date set for hearing.

FIRST MILLION DOLLAR "TAKE" in history from any non-heavyweight prizefight was assured International Boxing Club as result of theatre TV, fight film royalties, and complete home TV-radio blackout of Sept. 12 Sugar Ray Robinson-Randy Turpin middleweight title match at New York's Polo Grounds (Vol. 7:36). Theatre TV network of 14 theatres in 11 cities enjoyed its biggest success to date, at prices ranging from $1.80 to $2.60. In Chicago, fans rioted and literally tore down the doors of Balaban & Katz' State-Lake theatre. All theatres were jammed to capacity, turned hundreds away. IBC took in $767,630 at Polo Grounds, with well over $250,000 assured from theatre-TV and film rights.

It's not likely that anguished cries of the TV set owners will disturb the honeymooning IBC-theatre couple. Reflecting ire of constituents, House Rules Committee met Sept. 14 to consider resolution (H. Res. 409) by Rep. L. Gary Clemente (D-N. Y.) calling for investigation of sports, specifically including boxing and "whether or not the people of the U. S. are being denied the viewing of boxing matches on TV by unreasonable restraint." Committee members were reported unanimous in their desire for such a probe; official vote is scheduled Tuesday. Senate also received resolution (S. Res. 208) from Sen. Robert C. Hendrickson (D-N. J.) calling on Justice Dept., FCC and FTC to prepare legislation to outlaw "limited telecasting of events of national interest." In Cleveland, the TV Owners and Viewers League, claiming membership of 300, announced "boycott" of local theatre which had shown the bout on its screen.

New taxes may become problem for theatres showing TV. State boxing commissions are eyeing the televised bouts longingly, and New Jersey's commission levied 5% tax on Walter Reade's St. James Theatre in Asbury Park on grounds telecast is similar to regular live fight. Theatre has refused to pay. And Philadelphia city councilman James O. Clark is asking city to levy $1500 annual tax on theatres showing exclusive telecasts.

Nation's theatre owners were urged to equip their theatres with TV equipment and to take leadership in the telecasting field by chairman Mitchell Wolfson, of Theatre Owners of America, whose Wometco circuit owns WTVJ, Miami. He said exclusive theatre telecasts won't be detrimental to home TV, and recommended that all theatre owners "who are qualified by public service and are financially able should apply to FCC for TV station licenses."

Network Accounts: Westinghouse-sponsored NCAA football schedule on NBC-TV (Vol. 7:36), starting Sept. 29, gets added touches with General Tire & Rubber Co. sponsoring *Ted Husing* on film in 15-min. pre-game show discussing outstanding games of day with top coaches, and National Carbon Co. (Prestone anti-freeze) presenting *Jimmy Powers* and other sportscasters in live post-game interviews of sports figures plus late scores. Agencies are D'Arcy Adv. & William Esty Co., respectively . . . General Foods Corp., Post Cereals Div., has signed *Roy Rogers* to 3-year TV-radio contract, and first of half-hour films will be shown Dec. 30 on NBC-TV, Sun. 6-6:30, taking over time being vacated by *Hopalong Cassidy* . . . General Cigar Co. (White Owl cigars) starts *Sports Spot* Oct. 3 on CBS-TV, Wed. for 15 min. following fights, thru Young & Rubicam . . . Longines-Wittnauer Watch Co., starting Sept. 24, presents *Chronoscope* 3 times weekly on CBS-TV, Mon.-Wed.-Fri. 11-11:15 p.m., thru Victor A. Bennett Co., N. Y. . . . B. T. Babbitt Inc. (Bab-O cleanser) completes list of sponsors of *Kate Smith Evening Hour* starting Sept. 19 on NBC-TV, Wed. 8-9; others are Reynolds Metals Co., Congoleum-Nairn and Norge Div., Borg-Warner Corp. . . . Lever Bros. (Surf, Spry, Pepsodent) start daily sponsorship Oct. 1 of *Hawkins Falls—Pop. 6200* on NBC-TV, Mon.-Fri. 5-5:15; heretofore has sponsored show 4 days a week . . . Derby Foods Inc. (Peter Pan peanut butter) starts *Sky King Theatre* Sept. 16 in place of *The Magic Slate* on NBC-TV, alt. Sun. 5:30-6, thru Needham, Louis & Brorby Inc. . . . Jene Sales Corp. (Jene home permanent) starts weekly sponsorship Sept. 27 of Thu. 10-10:30 period on ABC-TV, program to be announced, thru Rogers & Associates, Chicago . . . Old Gold's sponsorship of *Down You Go* starts Oct. 5 on DuMont, Fri. 9-9:30 . . . Premiere of live *Schlitz Playhouse of Stars* on CBS-TV, Fri. 9-10, is Oct. 5 with Helen Hayes and Franchot Tone starring . . . Jack Benny, though he's CBS contract star, will be star of *Gratitude*, play presented on Lucky Strike's *Robert Montgomery Presents* on NBC-TV, November date undecided as yet . . . Richfield Oil sponsored pickups of Japanese peace treaty conference last week on all San Francisco & Los Angeles stations and the one in San Diego, as it did Gen. MacArthur's San Francisco arrival, thru Hixson & Jorgensen Inc., Los Angeles . . . Max Gordon, big legitimate producer, branches into TV as producer of *Frank Sinatra Show* on CBS-TV starting Oct. 9, Tue. 8-9 (no sponsor announced), opposite Milton Berle's *Texaco Star Theatre*.

Station Accounts: Spot testing TV for possible expanded use: Nestle Co. (Nescafe), thru Sherman & Marquette, Chicago; Oil-Eye Corp., for new oil-level indicator for cars, on KSTP-TV & WTCN-TV, thru Firestone-Goodman Adv., Minneapolis; Ford Gum & Machine Co., for candy-coated ball gum sold thru dispensers, on WBEN-TV, thru Baldwin, Bowers & Strachan, Buffalo; Vitamin Corp. of America (Rybutol, Vitamin B complex pill), in Los Angeles & Chicago, thru Harry B. Cohen Adv., N. Y. . . . Major time sales reported by KTTV, Los Angeles: Thrifty Drug Stores (chain), 10½ hours weekly (movies, bowling, variety, etc.), thru Milton Weinberg Adv.; Sears Roebuck, *Dude Martin Show*, Western variety, Wed. 8:30-9, thru Mayers Co.; Land Title Insurance Co., *Melody Time*, musical, Tue. 8-8:30, thru Wm. W. Harvey Inc. . . . Schick of Canada (electric razor), using Detroit & Buffalo stations to reach contiguous Canadian audience, thru Harold F. Stanfield Ltd., Toronto . . . Tea Garden Products Co. (syrups) and Sperry Div. of General Mills (Sperry pancake mix) planning joint campaign via California-Arizona stations, thru BBDO & Knox Reeves Adv., San Francisco . . . Fidelity-Philadelphia Trust Co. again sponsoring *Great Music* on WPTZ, with Guy Marriner, lecturer, and guest artists, Sun. 10:30 . . . Among other advertisers reported using or preparing to use TV: Silver Skillet Brands (Silver Skillet corned beef hash), thru Frederick Asher Inc., Chicago; Donnelly Garment Co. (Nelly Don dresses), thru J. R. Flanagan Adv. Agcy., N. Y.; Simmons Slicing Knife Co. (cutlery products), thru Arthur R. MacDonald Inc., Chicago; California Central Airlines, thru Calkins & Holden, Carlock, McClinton & Smith, Los Angeles; Electric Deodorizer Corp. (Odor-Master electric deodorizer), thru Betteridge & Co., Detroit; Jacqueline Cochran Inc. (cosmetics), thru James P. Sawyer Inc., N. Y.; Sparks Products Co. (mechanical pencils), thru Marfree Adv. Corp., N. Y.; Ronzoni Macaroni Co. Inc. (spaghetti, macaroni), thru Emil Mogul Co., N. Y. (WJZ-TV); Seabrook Farms Co. (frozen foods), thru Hilton & Riggio, N. Y. (WJZ-TV); Eastern Wine Corp. (Chateau Martin wine), thru H. C. Morris & Co., N. Y. (WPIX).

What does public like most on TV? These are 10 top program types for August, rated by The Pulse Inc. for its multi-market Tele-Pulse: drama & mysteries 14.5, feature films 14.1, talent 14, boxing 13.7, comedy-variety 11.5, musical variety 10.6, comedy situation 10.4, westerns 9.7, news 9.7, quiz-audience participation 9.6.

Telecasting Notes: One sponsor buying 17¾ hours weekly on one station—that's report from KTTV, Los Angeles, where Thrifty Drug Stores chain has just added 10½ hours of programs, its budget now running about $16,000 a week (see also Station Accounts) . . . Apace with NBC-TV network plans to expand TV day to past midnight, also to start at 7 a.m. weekdays, its owned-&-managed stations are already widening schedules: WNBQ, Chicago, reports sale of 12-1:15 a.m., Mon.-thru-Fri., to Alan Industries, furniture & radio-appliance group, for feature movies —making station's total TV week 120 hours . . . Pittsburgh's WDTV now signing on at 9 a.m. daily . . . Actual church services in New York Catholic, Jewish & Protestant churches will be telecast Sundays, 10-11 p.m., on rotation basis, in series arranged by WPIX . . . One-hour operas start on NBC-TV Oct. 4, to be carried once monthly 11-12 midnight EST; other dates are Nov. 1, Dec. 6, Jan. 3, Feb. 7, March 6, April 3, May 1. NBC-TV also preparing 10-min. opera segments for Kate Smith shows . . . Shubert show properties, including many dramas, musicals, short sketches, reported up for sale for TV uses . . . Eastman Kodak estimates TV this year will use 300-350,000,000 feet of film, mostly black-&-white 16mm; it says 30% of all TV production is already on film, with proportion steadily increasing . . . NBC's 25th anniversary is celebrated Sept. 20 simultaneously with *New York Herald Tribune's* 75th, with all-star cast on NBC-TV between halves of newspaper's annual Fresh Air Fund football game—New York Giants vs. Los Angeles Rams from Polo Grounds. But game itself is to be carried only on theatre TV . . . Ad-packed special TV section of *Johnstown Tribune* Sept. 10 celebrates second anniversary of its WJAC-TV, notes growth of receivers in area from 22,000 as of July 1, 1950 to 103,000 as of Aug. 1, 1951 . . . Ultra-modern TV-radio center for *Kansas City Star's* WDAF & WDAF-TV will be completed by early spring or summer, floor space in present radio building being trebled to provide for expansion, including 40x60-ft. TV studio . . . San Antonio's KEYL, whose $1,050,000 sale to George Storer interests pends FCC approval (Vol. 7:30), joins CBS-TV Dec. 11 as exclusive affiliate . . . WJAC-TV, Johnstown, Pa., shifts representation to Katz Sept. 26, making it that firm's 17th; former rep was Headley-Reed . . . WCAU-TV, Philadelphia (Rate Card No. 7), raises base hour rate from $1200 to $1500, one-min. from $220 to $300; effective Sept. 16 . . . NBC-TV has leased Colonial Theatre, 1000-seat movie house at Broadway & 62nd St.

THIS ENCOMIUM from one of the keenest and ablest observers of show business, *Variety's* editor Abel Green, merits the attention of everyone concerned with TV. He puts into better words than most editorialists how "almost awesome in its potential" was the TV coverage of the Japanese peace treaty conference (Vol. 7:36). He titles his Sept. 12 editorial "The Eyes of the World." Pertinent portions:

"TV's historical closeup on the Japanese Peace Treaty proceedings from San Francisco this past week make the Kefauver, MacArthur and kindred 'shows' look like road companies. Here was a big-power, parliamentary procedure that was the real thing. It was impressive in its unfolding, and almost awesome in its potentials.

"Video's omnipotent spotlight on public officials or the gimlet eye on suspected criminals in recent months—already remarkable as milestones in the technological progress of the new medium—were quickly capped by the first transcontinental hookup. . . . It put power politics into sharp focus. It made Americans proud of our statesmanship. It spotlighted the hope that a world family of nations may yet be made to work. Just as it pinpointed a defeated aggressor swallowing its medicine, hoping to regain its economic position with dignity. And, above all, the iconoscope exposed the brashness and chicanery of the Soviet bloc for what it was—a dishonest, obstructive but shrewd enemy who knows that we know his game, and also knows that we know that we must go along playing that game until we are better equipped to play the only other game a militant power understands—a superior force of arms.

"All that General Sarnoff predicted about 'entertainment being but one segment of television' was never so fruitfully and dramatically depicted as via the proceedings from the San Francisco Memorial Hall. . . .

"Showfolk, hyper-attuned to the dramatic, are the first to be heard exclaiming that they are 'still amazed by the magic' of modern science development. TV's showcase of life, in all its manifestations, must remain a never-ending marvel. It may be added that TV's progress from the very beginning has been made more palatable under the aegis and flavoring of a show-wise treatment and presentation. . . ."

Next NBC affiliates convention set for Nov. 26 at Boca Raton (Fla.) Hotel & Club.

THEATRE-TV PROPONENTS are expected to ask FCC not to set technical standards for theatre telecasting —just to allocate frequencies. This appeared probable after meeting in New York Sept. 10 at which movie exhibitors and producers thrashed out strategy for hearing scheduled to start Nov. 26. They feel that standards—lines, fields, color systems, etc.—could best be settled among themselves, since no vast number of sets is involved as in home TV.

All are looking toward color as a natural for any theatre-TV system, but they're anxious not to bring current color dispute into FCC hearing. Film and theatre folk have their pro-CBS and pro-RCA factions—20th Century is already embarked on project involving CBS color and Swiss Eidophor projection system (Vol. 7:29). Others favor RCA system, feel that one of FCC's principal objections to it—complexity and high cost of equipment—isn't valid insofar as theatre TV is concerned, whether or not such objections are still valid for home sets.

Movie exhibitors and producers agreed to push for band of frequencies 360-mc wide to accommodate 6 "circuits," each composed of two 30-mc channels which would carry 10-mc video signal. Engineering committee, appointed to make further study and prepare technical testimony for presentation to FCC: Frank McIntosh & Andrew Ingles, representing Motion Picture Assn.; C. M. Jansky & Stuart Bailey, Theatre Owners of America; Earl Sponable, 20th Century-Fox; Paul Raibourn, Paramount; Frank Cahill Jr., Warner Bros.; David W. Atchely Jr., United Paramount Theatres.

Petition by 20th Century-Fox to broaden hearings to include possibility of theatre-TV operations on already-assigned industrial frequencies (Vol. 7:36) wasn't enthusiastically received by others at New York conference, but some expressed private opinions that idea will be good one to fall back on in event FCC refuses to allocate channels for exclusive use of theatres.

Benton bill hearings (Vol. 7:36) remain suspended, no date set for resumption. There's possibility Sen. Benton's proposals to establish 11-man TV-radio program advisory board and to foster subscription TV may not get further hearing this season, since Senate Interstate & Foreign Commerce Committee starts crime-communications hearing Sept. 19-20 and Senate is straining for Oct. 1 recess.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
September 15, 1951

SHORTAGES ARE REAL, HERE FOR LONG RUN: It's a moot question when there will be real shortage of TV-radio receivers -- but there's no doubt about shortages of materials that go into them. And into other appliances.

The shortages are going to hit hard, and soon -- and grow worse through 1952.

With TV trade logjam broken, set manufacturers thinking in terms of higher output are going to bump against the metals ceiling. For it will be availability of metals -- copper wire, steel, aluminum -- rather than any shortages of components, that will limit most set makers' production in fourth quarter.

But components will be big stumbling-block in first quarter 1952 -- with tubes, transformers and coils due to be hardest-to-get items. Component production has been pretty good in third quarter; most set makers stocked up on them. But -- allotments of copper, steel and aluminum to parts makers were cut to the quick for fourth quarter -- and this should show up in form of parts shortages early in 1952.

Sharp drop in civilian tube production is inevitable. There's no pat solution to the nickel crisis (Vol. 7:36), and receiving tube industry will be living from hand to mouth -- depending on NPA spot assistance even for some military orders -- for many, many months to come.

* * * *

Shortage of hook-up wire will plague manufacturers during fourth quarter, may even be limiting factor in set production. NPA gave set makers CMP tickets for fourth-quarter copper at 54% of rate they used it in first-half 1950. This would be enough to make 850,000 sets or more -- if they could get the copper.

Trouble is, nobody expects the copper to be available. Strike took huge nick out of U.S. output, imports have fallen off, scrap copper industry is virtually shut down. With copper production considerably lower than govt. planners anticipated when they worked out the allotments, there's serious doubt whether set makers will be able to get anywhere near the full 54%.

Threatened new cutbacks in steel (chassis, brackets, etc.) before end of fourth quarter also have set makers worried. TV-radio manufacturers have been allotted steel at 60% of their first-half 1950 rate for fourth quarter (consumer durables as a whole got average of 58%). Any new cuts would be on top of this.

Aluminum is rationed to set makers at 48% of first-half 1950 rate. Most will have to use precious steel for items formerly made of aluminum. Inventories of materials left over from third quarter could mitigate situation to some extent -- for all manufacturers obviously haven't been using all the materials earmarked for them this quarter (see p. 9).

* * * *

That's the picture facing set manufacturers last 3 months of this year. How many sets can they make? NPA is sticking to its estimate of 940,000 TVs (Vol. 7:32), but we've heard some educated guesses as low as 700,000 from govt. people.

"Ridiculous" is comment of one NPA official on Drew Pearson's Sept. 9 broadcast prediction that strategic materials may soon be so tight that "all manufacture of TV sets may have to be stopped." Others at NPA pointed to the repeated statements by mobilization boss Charles E. Wilson and DPA-NPA chief Manly Fleischmann that the Govt. is determined to maintain healthy production of civilian goods.

Conservation measures, developed by industry at accelerated pace over last year, will become necessities in months ahead. Many of them are now being incorporated into current production. New Zenith sets use Rauland electrostatic-focus CR tube, said to save 2 lb. of copper per set as well as cobalt, nickel and aluminum. DuMont's self-focusing picture tube (Vol. 7:20-21,33-34) is now being shipped to set manufacturers; it eliminates need for focus magnet, coil and focus control.

"Standardization & simplification" are in discussion stage at policy-making

DPA. On distant horizon is possibility of regulations standardizing TV-radio components and limiting variety of models each set maker may produce. In advance of any such action, NPA officials assure us, set and component makers would be given opportunity to draw up their own set of rules.

* * * *

It will be nip and tuck whether transformers or receiving tubes are scarcest civilian electronic items next year. Transformer production will suffer seriously because of sharp cutbacks in copper allotments. And civilian tube production seems destined to do tailspin because of (1) serious shortage of nickel and (2) steadily increasing military demand for tubes.

There's no magic key to nickel snarl -- that's becoming increasingly apparent. At week's end there were signs that most critical sectors of tube industry would get some spot relief. But by the very nature of NPA's nickel allotment setup and complexity of tube industry itself, there can be no special overall ration of nickel to keep entire industry operating at hefty rate.

Severity of present situation was underscored in letter to NPA from RTMA president Glen McDaniel following special tube division meeting Sept. 11. Tube makers will have to start cutting production by mid-October unless there's special relief, McDaniel said. He made these points:

Receiving tube industry will be operating at "as low as 50% of its present rate of production" by Dec. 1, necessitating layoffs of as many as 15,000-18,000 employes, if there's no "immediate relief from present nickel allocation policies."

"Delays in meeting delivery schedules for military tubes will inevitably result... The lead time for obtaining new nickel is 2-5 months... A fair estimate of delays in military tube deliveries is 4-5 months."

Nickel conservation is paying off, McDaniel said, in production of more tubes from less nickel. Industry turned out "229,000,000 tubes in first 7 months of 1951 with only two-thirds of the nickel used to produce 191,000,000 tubes in the corresponding period of 1950."

When Senate raised its sights on military production this week it was, in effect, chalking up more cutbacks for civilian industry. It added $3 billion to arms bill after being told of "fantastic new weapons" including new electronically-guided pilotless bomber. Every such increase in appropriations for military procurement inevitably results in less material remaining for TV-radio and other consumer goods.

Mobilization Notes: Applications for CMP allotments of steel, copper and aluminum for first quarter 1952 must be filed with NPA by Oct. 1, but spokesmen for NPA's Electronics Div. urged manufacturers not to wait for deadline to submit them. Applicants who file after Oct. 1 deadline are liable to be short-changed on their material rations, since the division expects to base its allocations on the applications on hand shortly after the deadline date. Applications for fourth quarter allocations—as well as some for third quarter—are continuing to pour into Electronics Div., despite fact that deadlines passed long ago and materials have already been allotted.

All manufacturers of Class B (standard civilian-type) items, including TV-radios & appliances, must file form CMP-4B, except those whose requirements are so small they never have been required to file. An NPA official estimated that little more than half the nation's TV-radio manufacturers filed applications for fourth quarter allotments. He could give no explanation for large number of abstentions other than possibility that non-filing firms may have sufficient materials to take care of fourth quarter production.

* * * *

TV and radio broadcasters will get priorities to buy wire and cable under terms of new ruling now being drafted and slated for official NPA approval. Ruling probably will be in form of amendment to CMP Regulation 5, which governs maintenance, repair and operating (MRO) supplies. Much of the wire and cable required by broadcasters doesn't fall within definition of MRO, but is vital to operation of stations.

———■———

Excellent roundup on "Film in the Future, as TV's Horizons Expand," by *Broadcasting Magazine's* Los Angeles correspondent Dave Glickman, is published in Sept. 10 edition—starting with premise: "Cross country microwave relay notwithstanding, film is expected to represent more than 65% of TV's future program total, with Hollywood as the major supply line." It states 75 independent TV production units in Hollywood are filming TV programs, reports on some (with sponsors), tells of plans of bigger movie producers and the TV networks to supply film programs. It quotes tycoon Louis B. Mayer, ex-MGM, as taking attitude that TV and movies must work together and saying: "We'll furnish the entertainment and talent, and TV will distribute it."

Cuban advertisers have greeted TV so enthusiastically, reports Circuito CMQ's Goar Mestre, that his CMQ-TV, Havana, is up to 50% of CMQ's billings, after only 8 months of operation. He expects figure to reach 80% by year's end, TV billings catching up with radio by mid-1952. Mestre says that 4 other stations under construction by his company (at Matanzas, Santa Clara, Camaguey, Santiago) should be on air by year's end, covering 80% of island's population. Plans include microwave relays feeding programs from Havana.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
September 15, 1951

TRADE FACTS & FIGURES LOOK BETTER: Business has picked up so nicely that you even hear talk again of TV shortages -- some brand-named producers forecasting tightened supplies of their product by December.

There's little doubt now that critical materials are getting scarcer, could spell eventual set shortages. But at moment supply is plentiful. And bargains are so great that customers are buying up cut-priced stock at very satisfactory rate now, while wholesalers and retailers are replenishing supplies.

Factory inventories took another nice dip week ending Sept. 7, RTMA reporting drop of some 33,000 to bring total down to 622,436, lowest since last June 8. Thus, downtrend noted since first week in August continues. Inventory figure reached peak of 768,766 as of Aug. 3 (Vol. 7:32).

TV output Sept. 7 week was 52,874 sets (1868 private label), as against the 55,273 week preceding (Vol. 7:36) -- but it should be noted this was Labor Day week, with its one day off and usual absenteeism.

Radio output dropped to 179,872 units (86,878 private label) from preceding week's 226,013, while factory inventory rose to 414,130 as of Sept. 7 from 383,604. The radios were: 105,631 home sets, 13,582 portables, 60,659 auto.

* * * *

It's good guess that accelerating sales during the 7 weeks since July's end have considerably reduced dealer stocks from the 900,000-1,150,000 counted as of Aug. 1 by Dun & Bradstreet (Vol. 7:35), and the 640,393 distributor inventory RTMA reports as of the end of July (vs. 633,077 at end of June).

Buoyant feelings are manifest throughout the trade, nearly everyone reporting public buying again. Only fear now seems to be that public may have lost confidence in prices -- especially now that big brands are officially cut-priced.

More comfortable balance between supply and demand seems well on way, result of (1) resurgence of buying, (2) restocking by wholesalers and retailers, though on more cautious scale than before, (3) controls-induced slowdown of production by the manufacturers, insuring against adding to over-supply (see p. 7).

* * * *

While brand-name manufacturers claim they're producing as many sets as materials will allow, it's evident from production figures that somebody isn't. Third quarter NPA regulations limit set makers to 70% of steel, 60% of copper, 50% of aluminum they used in "average quarter" of first-half 1950.

Taking conservation into consideration, govt. production planners have felt industry could produce TVs in this third quarter at about 70% of first-half 1950's rate. This would be total of 1,089,900 sets this quarter, or close to 85,000 sets a week. Thus, this quarter's first 10 weeks' production of 427,069 TVs is just about one-half the 846,000 sets that could have been produced for this period, in NPA officials' view of materials situation.

These figures are based on production of TVs and radios according to same mix as first-half 1950. Actually, many manufacturers cut down on TV during the trade slump, stepped up radio by using metals originally earmarked for TV.

* * * *

Jump from famine to feast again in matter of few weeks illustrates quick ups and downs of this industry. There's no gorging on the feast this year, though, and the profits aren't same.. Question is, will feast continue after inventories go?

Answer seems to be positive No. Quite aside from tightening supplies of raw materials and components, in which grey market has already reared its head, labor and materials costs aren't going down -- quite the contrary. End of cut prices very likely will be followed by price rises. Said one astute middle-sized manufacturer:

"The problem is to make money at the present prices. It is my opinion that

most manufacturers, once they are in an inventory position to justify it, will raise their prices so they can make money, and that by Oct. 15 we will have a higher price level in our industry on standard brands."

RISE & FALL OF FACTORY PRICES & SALES: Average prices of TVs were trending downward even before RCA and other big makers broke down lists last month (Vol. 7:33 et seq) in out-and-out effort to unload inventories. Best index is factory average. Most authoritative source shows 1949 average factory price per set was $189.55, going down to $181.70 for 1950.

Then, in January, while market still looked good, factory average jumped to $191.21, in February to $205.70. Then downtrend began: March $197.55, April $171.85, May $157.07, June $156.39. No figures for July or August are available yet.

These averages are illusory, in one respect, since they cover all models and it's well known that buyers have turned more and more to lower-priced tables, which would tend to bring average down. July-August cuts should reduce averages more.

It's also interesting to note changes in factory inventories during first 6 months of 1951. Year began, RTMA shows, with about 150,000 sets on hand at factories. In January, RTMA production figure was 645,716, whereas factory sales, according to our report, were 633,708 (valued at $126,908,218 at factory).

In February, output was 679,319, factory sales 612,799 ($126,053,787); March output 874,634, factory sales 718,986 ($142,035,675); April output 469,157, factory sales 285,498 ($49,061,450); May output 339,132, factory sales 241,790 ($39,987,-824); June output 326,542, factory sales 129,287 ($20,220,076).

Thus RTMA's reported 3,334,505 sets produced during first half of 1951 were offset by 2,622,068 sets sold at factories, a differential of 712,437. RTMA's inventory count at end of June was 723,309.

Topics & Trends of TV Trade: Television Shares Management Corp. once again "guesstimates" top TV producers and their probable output in article written by its researchers Edgar N. Greenebaum Jr. and John W. Edgerton for Sept. 17 special supplement to *Retailing Daily*. They pick first 10 companies to produce 3,780,000 sets, rest of industry 1,520,000—for industry total 5,300,000—giving individual figures that are bound once more to arouse the ire of some industry leaders. This time, though, they don't venture dollar volume, as they did for 1949 & 1950 (Vol. 5:45 & Vol. 6:8), nor do they attempt listing as many as 20 leaders, as formerly. Their "guesstimates":

	Estimated Units 1951	1950
RCA	700,000	950,000
Admiral	625,000	875,000
Philco	625,000	875,000
Emerson	400,000	550,000
General Electric	400,000	425,000
Motorola	400,000	660,000
Zenith	300,000	450,000
DuMont	130,000	240,000
Crosley	100,000	140,000
Hallicrafters	100,000	172,000
	3,780,000	5,337,000
Balance of Industry	1,520,000	2,163,000
TOTAL INDUSTRY	5,300,000	7,500,000

Note: The 1950 figures are considerably revised since they were "guesstimated" in advance in February 1950 (Vol 6:8), when rankings were forecast in this order: Admiral, RCA, Philco, Motorola, Zenith, Emerson, GE, DuMont, Tele-tone, Hallicrafters.

* * * *

Western Winter Market set for Feb. 4-8 in San Francisco's Western Merchandise Mart.

Zenith's 19 new TV models, shown distributors at Chicago convention Sept. 14-15, start with six 17-in. tables at (figures rounded) $230, $240, $250, $260, $270, $280. Six 17-in. consoles are $300, $310, $330, $350, $370, $380. Two 17-in. console combinations are $550 & $650. Sole 20-in. table is $300, with 20-in. consoles at $370, $400, $430, $460. Zenith accents radios, with 3 AC-DC models at $30, $32 & $40, each available in 5 colors. AC clock radios in 6 colors are $40 & $42. Portables are same as before—$40, $60, $61, $124.25. AM-FM tables are $55, $65, $85. Table combination is $100, and AM-FM console combinations are $260, $300, $330, $350.

Raytheon's Belmont is out with 4 new table TVs—16-in. at $200, 17-in. at $260, 20-in. at $280 & $290—along with uhf tuner installed at factory for $30, in field $40, and a color adapter costing $15 not installed. At same time, Belmont cut prices of eleven 17 & 20-in. sets in present line by $50 to $120, models now ranging from table at $230 to combination at $750. Prices include tax but not warranty, and slogan of new promotion campaign is "It's futurized."

Without cutting list prices, DuMont this week reduced by 10-15% prices of its TV sets to distributors, extending to entire line price cuts announced for 3 models last month. Currently purchased goods are guaranteed to Nov. 3 at present distributor price levels.

Tele King's new line comprises 14 models, all 17 & 20-in., featuring "Tele-tuner" for better fringe reception. Prices including excise tax range from $180 for 17-in. leatherette table to $420 for 20-in. limed oak console.

* * * *

Elected 1951-52 officers of National Electronic Distributors Assn. at close of Cleveland convention Sept. 13: Aaron Lippman, Newark, chairman; George Wedemeyer, Ann Arbor, Mich., president; W. D. Jenkins, Richmond, first v.p.; Byron C. Deadman, Green Bay, Wis., 2nd v.p.; Harry Stark, Minneapolis, secy.; H. E. Ruble, Dayton, treas.

RCA will cut off cooperative advertising funds from dealers whose ads mislead public about credit terms, says letter to distributors from ad manager Jack M. Williams. They're advised continued false retail ads involving Regulation W "may lead to very drastic regulations," possibly resulting in elimination of trade-in provisions. "At the very least," letter states, "stricter regulations might place a burden on the retailer of keeping meticulous records of every trade-in transaction, which would be available on demand for govt. scrutiny."

Following quickly on heels of Federal Reserve Board's interpretation of trade-in regulations (Vol. 7:36), Williams' letter hit at practice of advertising "no down payment," "no deposit," "no money down." It follows communication to all TV-radio & appliance manufacturers from NARDA president Mort Farr, urging them to monitor retailer ads and cut off co-op funds from dealers whose claims are misleading. "If we don't get together and clean this situation up, the job will be done for us," said Farr, "and many clean, legitimate retailers will be made to suffer for the abuses of which a relatively few are guilty."

* * * *

Trade Miscellany: Sylvania signs with IUE (CIO) for one year covering 4500 workers in 6 plants, contract retroactive to July 30 and providing wage boosts of 9 to 16 cents hourly plus cost-of-living adjustments . . . Capehart-Farnsworth TV division laid off 400 at Ft. Wayne factory Sept. 12 to "balance out inventories and accumulate materials" . . . Magnavox now building new 35,000 sq. ft. addition to plant at Ft. Wayne, costing $400,000 and giving total factory space of 315,000 sq. ft., warehouse 67,000 sq. ft. . . . Trav-Ler has purchased all capital stock of Telegraph Apparatus Co., Chicago, maker of telephone-telegraph and other electronic equipment and holder of about $5,000,000 in govt. contracts.

———■———

Finest thing TV-radio industry does, at highest public relations level, wins well-merited kudos when American Trade Association Executives, at annual meeting in Chicago Sept. 17, presents NARTB & RTMA its Award of Merit for annual *Voice of Democracy* contest for high school students. Contest is underwritten jointly by the 2 associations as a non-commercial public service, has won praise of public officials and educators everywhere for "stimulating appreciation of the youth of America for the meaning of democracy and free speech." It's third they've won, others being that of American Public Relations Assn. in 1947 and Freedom Foundation in 1949. Award was accepted for RTMA by James D. Secrest, secy-gen. mgr., and for NARTB by Robert Richards, public relations chief, who conduct the contest.

Good Use of Good Idea

We're gratified—and we know KSD-TV and the *St. Louis Post-Dispatch* must be, too—that so many stations and newspapers have seen fit to publish localized prototypes of the full-page ad, which we reproduced from Aug. 5 edition of that newspaper with our Vol. 7:33, as a service to subscribers. We pointed it out as a fine example of a TV station's cooperation with local dealers and distributors toward helping them move inventory, and at same time good self-promotion for the station. If you missed this reprint, we have extra copies we'll be glad to furnish on request. It's still a good idea for others to emulate, particularly in special TV sections of newspapers now being prepared for publication.

Trade Personals: Dr. W. R. G. Baker, GE v.p. in charge of electronics div., named recipient of IRE Medal of Honor for his "early technical contributions to the radio transmitter art [and] his long sustained and effective leadership of Institute and industry engineering groups" . . . Ernest A. Marx, mgr., DuMont receiver sales, leaves Oct. 1 for month's tour of South American capitals, during which he will consult prospective distributors . . . Wm. P. Maginnis, ex-RCA Victor, named asst. v.p. in charge of manufacturing, Federal Telephone & Radio Corp. . . . John L. Ward, general mgr., electrical products div., Corning Glass, promoted to asst. controller, succeeded by John L. Hanigan, div. manufacturing mgr., who in turn is succeeded by Norman J. Vang . . . Wm. M. Nave, supt. of metal tube production at Owensboro, Ky., plant, named works mgr. of GE's new 150,000-sq. ft. tube plant in Anniston, Ala., due to open next March . . . Col. Myer Fried, USA retired, specialist in military & aviation electronics, engaged by RCA Service Co. as special advisor to P. B. Reed, v.p. in charge of govt. service div. . . . Ricardo Muniz has resigned as DuMont receiver manufacturing mgr. . . . Coleman London appointed mgr. of Westinghouse electronics service, supervising domestic and foreign field service personnel handling military and commercial equipment . . . Paul A. Hilton promoted to asst. mgr., New York branch, Crosley Distributing Corp . . . James Greer appointed sales training mgr., Motorola . . . John S. Lanahan named asst. Eastern states regional sales mgr., DuMont receiver div., will open office in Washington . . . Robert P. Thompson Jr., ex-Kierulff & Co., Motorola distributors, joins Packard-Bell as adv. mgr., succeeding George Oliver, now with Leo J. Meyberg Co. (RCA). . . . Wm. A. Cox, ex-president, C. M. B. Mfg Co. (TV tables), named v.p., Sentinel Television Sales Corp., Chicago . . . Henry J. Arbeiter, chief engineer, appointed v.p., Jerrold Electronics, Daniel J. McCarthy asst. secy-treas. . . . Fred D. Wilson, DuKane Corp. (formerly Operadio), appointed chairman of RTMA school equipment committee . . . Max W. Burrell, ex-sales mgr., named mgr. of new procurement div., Collins Radio, which consolidates former purchasing, expediting & procurement depts.

* * * *

Lowest sales report by Canadian RTMA thus far this year were July's, with only 323 TVs sold for $167,746, down 170 from June's 493 (Vol. 7:31). Inventory at month's end totaled 14,715. Table models under $400 list totaled 10, over $400 totaled 139. Consoles under $500 totaled 27, over $500 totaled 138. TV-phonos numbered 9. Toronto-Hamilton area took 52% of July sales, Niagara Peninsula 20%, Windsor (Detroit) 18%. First 7 months of 1951 cumulative unit sales were 20,393, valued at $11,174,964. Cumulative TV sales to July 31 were 58,216 valued at $27,451,547—43% in Windsor area, 35% in Toronto-Hamilton, 17% in Niagara Peninsula, 5% in other areas.

There's huge potential for tube replacement and set conversion sales among the more than 4,000,000 TVs two years old or older, in opinion of DuMont's CR tube sales chief Wm. C. Scales. Between 1946-49, some 2,030,000 sets with 10-in. tubes or smaller and 2,404,000 larger sizes (mainly 12½-in.) were sold, he told Cleveland National Electronics Distributors Assn. meeting this week. He noted trend to fewer picture tube types, said this simplification is step toward making replacement and conversion easier for servicemen.

Freak TV reception in TV-less Denver—stemming from troposphere, "sporadic E," etc.—is reported in Sept. 14 *Retailing Daily*. Mel Collier, of Collier Music Co., says he's picked up Detroit, Miami, Milwaukee, Cincinnati, Los Angeles, Kansas City. He once had Kansas City for "full hour," Los Angeles "over a considerable period of time."

TELECASTERS GET EXCESS PROFITS tax relief—all they asked for, possibly more—in Senate Finance Committee's version of House-passed revenue bill (H. R. 4475) which emerged from executive session this week, goes to full committee for final action Sept. 17, should pass Senate by end of week (in opinion of majority leader Sen. McFarland), then goes to conference with House.

Few new major benefits go to TV-radio manufacturers, except corporations that began operation after Jan. 1, 1946; they can now qualify under "growth formula" provisions enacted last year.

Most vital section pertaining to telecasters is provision allowing firms with combined TV-radio station operations to drop TV losses and TV capital investment in figuring EPT credits (Vol. 7:9, 21, 24, 30). Results will vary in individual cases, but over-all relief is expected to be greater than first anticipated by TV tax consultants.

Fort Industry Co.'s John B. Poole, spokesman for TV Broadcasters Tax Committee, said: "The Senators saw our problem, recognized it and have done a most fair and equitable job all around. It is very gratifying." Committee chairman George Storer wired all telecasters Sept. 14 that "substantial relief on matter of EPT has been provided" and credited much of the success to Mr. Poole, tax consultant Lovell B. Parker, CBS v.p. Earl Gammons, NBC v.p. Frank Russell, WGAL-TV president Clair McCollough. He urged wires to Senators to vote for the bill.

Other salient provision of Senate committee bill would allow companies deriving part of income from broadcasting and part from some other business (like newspaper publishing or manufacturing) to treat non-broadcasting businesses separately in computing EPT credits; they may figure the EPT on their TV-radio business as companies engaged solely in broadcasting.

Bill hikes corporate taxes from maximum of 47% to 52%, with ceiling on combined income-EPT taxes lifted from 62% to about 69%, makes EPT amendments effective retroactive to July 1950, thus opening way for refunds to some firms after they deduct TV losses in computing credit base; makes new corporate taxes retroactive to last April instead of House-approved Jan. 1, 1951.

———■———

NBC-TV has bought old Vitaphone studios in Brooklyn from Warner Bros. for reported $500,000; single big stage will be converted to 3 smaller ones. It's second big NBC-TV deal with Warners, other having been purchase of 30-acre lot adjacent movie firm's Burbank, Cal., studios, now being converted for TV. NBC-TV has also leased New Amsterdam Theatre roof, taking over from WOR-TV, about to move into own new home (Vol. 7:35). NBC expansions are part of plan to begin TV day at 7 a.m.

Republic Pictures president Herbert J. Yates is quoted in Hollywood *Variety* as estimating potential profit of $10-$12,000,000 in next 3 years via leases to TV of films from its library, citing onetime use of 175 on KTTV (for $225,000) as starter; films being made available exclude Gene Autry and Roy Rogers items, now involved in litigation. Trade paper notes that, if Yates' estimate is correct, Republic will earn considerably more from TV alone next 3 years than present value of all its outstanding common stock, now totaling 1,818,000 shares selling recently at 4¼.

More details on Telemeter tests (Vol. 7:34), requested by FCC, have been supplied by Paramount Pictures Corp. Response included confidential patent information, said tests with coin-operated system, if authorized, will be conducted midnight-9 a.m. over Paramount's KTLA, Los Angeles, using slides, film, test pattern. Some 6 sets will be employed, all by Paramount personnel, no public showings. Paramount asks for 6 months' authorization; Commission action is expected in couple weeks.

Denver's Broadway Theatre (John Wolfberg), thanks to good offices of Colorado's Senator Johnson, definitely plans to show World Series on large screen in its 890-seat auditorium by tapping transcontinental TV circuit starting regular operation Sept. 28 (Vol. 7:36). Gene O'Fallon's KFEL is also planning closed-circuit showings via RCA chain he has acquired and already demonstrated at recent Hallicrafters distributor meeting; he proposes to use an auditorium. FCC advised Sen. Johnson it would interpose no objection to such showings in Denver, largest city without a TV station, provided arrangements can be made with AT&T and NBC-TV. Latter holds exclusive rights to Gillette-sponsored series, due to start first week in October (Vol. 7:36). Large-screen TV suppliers, notably RCA and General Precision Labs, have been consulting with various Denver theatre interests, presumably intending to be station applicants but stymied by freeze, which are also contacting networks for rights to carry sponsored as well as sustaining shows on regular basis pending end of freeze.

Second coaxial circuit into Birmingham and Atlanta started Sept. 12 with special Red Cross program, regular service beginning Sept. 17. Circuit comes from Memphis, via Jackson, Miss. Present single circuit to the 2 cities comes from Charlotte and Jacksonville. AT&T says no change regarding schedule for New Orleans and Miami—"late 1952" (Vol. 7:36). This week, AT&T applied for CP to build 19-hop relay from Kansas City to Dallas, estimated completion date as February, 1953. Up to now, AT&T has been quoting "second half of 1952" for link, including leg to San Antonio. Estimated cost is $6,200,000.

Even Iowa State College's WOI-TV, Ames (Des Moines) is "doing all right," though it was never designed to be profit maker. First full fiscal year ending June 30 resulted in $162,000 in revenues, while operating expenses ran $85,000. The $77,000 excess was applied to equipment. Station carries no local commercials, took in $6400 between July 1, 1950 and Nov. 1 when it began getting network service. At present rate, gross is indicated as $233,400 for present fiscal year. Station was built in latter 1949, began operating in February 1950 after other Des Moines interests shied away from then profitless TV; it had cooperation of industry, alumni, students—represents fruits of efforts largely of Manager Richard B. Hull.

Three applications for new uhf stations in Dallas, Houston and San Antonio, filed last week on behalf of Texas oilmen who own KEYL, San Antonio (Vol. 7:36), were suddenly withdrawn this week by Dallas counsel for UHF Television Co. without explanation to FCC. It's understood one of reasons was that agreement with George Storer interests for $1,050,000 sale of KEYL, now pending FCC approval (Vol. 7:30), included proviso same interests would not reapply for TV there. Same group also still has long-standing vhf applications still pending for Corpus Christi and New Orleans.

Two new-station applications were filed this week by WHTN, Huntington, W. Va. and KFBC, Cheyenne, Wyo., each seeking Channel 13. Latter is owned by Tracy McCracken interests, including *Wyoming Eagle* and *State Tribune* and other newspapers. [For further details about applicants, see *TV Addenda 13-J* herewith; for complete listing of all applicants to date, see *TV Factbook No. 13* plus *Addenda 13-A to 13-J.*]

TV set-owning families increased from 24% of U. S. total in January to 27% in July, reports Industrial Surveys Co., Chicago, on basis of its national consumer panel of 4200 families. Northeastern section of country has 45% of families TV-equipped, North Central 27%, Pacific Coast 26%, South 13%, Mountain & Southwest 10%. Only 7% of farm families have sets, while 53% of families in cities of 500,000 or more have them.

HEIGHTENING AGITATION OVER THEATRE TV: Will theatre TV's shaky alliance with the prize ring blow up in the faces of movie exhibitors? There were straws in the wind this week in wake of sensationally successful closed-circuit telecasts of Robinson-Turpin middleweight championship bout to 14 theatres in 11 cities (Vol. 7:37).

Resentment of TV set owners went to all-time high. Their letters to FCC, to Congressmen, TV stations and networks -- even to set manufacturers -- were almost without exception bitter and vitriolic. The gist: "We wuz robbed!"

Radio-owning fight fans were indignant, too. They insist blackout of radio in recent fights is unwarranted and unprecedented. Radio wasn't even permitted to broadcast any information on progress of Robinson-Turpin fight until it was over.

FCC received 100 or more particularly nasty letters, although it is without jurisdiction over such use of AT&T cable-microwave circuits.

Three resolutions before Congress call for investigations or legislation to ban or limit exclusive theatre telecasts of "public events". And Justice Dept. confirms that its anti-trust division is looking into the "exclusive" aspects.

Even inside film industry there's open criticism. Film Daily editorialized that TV-equipped theatres drive movie fans into opposition houses or (horrors!) even home to their TV sets on fight nights. Theatres are filled with fight fans, not movie fans, said Film Daily, "with demeanor and conduct in kind." Noisy, raucous crowds generally fled theatres after fight without waiting for film feature.

Authoritative Motion Picture Herald admonished theatre-TV promoters to look to greener fields. With a glance at the $1.80-$2.60 admission theatres had to charge to break even on Robinson-Turpin match, Sept. 22 editorial observed: "Major prize fights are already priced out of the regular theatre-goer's bracket."

Public relations, always important to movie industry, are at critical ebb at particularly bad time. Film folk right now are preparing case for theatre-TV channels before FCC hearing set for Nov. 26 (but likely to be postponed). Some think it was poor policy to stir up opposition which may burst forth at hearing.

As for Congress, suffice to say there's an election next year -- and many more voters own TV sets than movie houses.

Theatre folk may be playing with fire, too, in their romance with International Boxing Club. Movie palaces will be out of fight game if they're jilted by IBC. Sept. 19 Variety reports that IBC is "studying the possibility of feeding fight telecasts into the several stadia under its control."

Any such move, backed by Arena Managers Assn., which has already announced it wants exclusive fight telecasts (Vol. 7:36), would take boxing out of the theatre and into -- of all places -- the boxing arena.

* * * *

Seventeen theatres in 13 cities, largest network yet for exclusive theatre-TV, will carry Sandy Saddler-Willie Pep featherweight title bout from New York Polo Grounds Sept. 26. Theatres on network for first time will be Detroit's Michigan,

Copyright 1951 by Radio News Bureau

Minneapolis' Radio City, Binghamton's Capitol, Pittsburgh's Stanley. As in case of Robinson-Turpin fight, IBC made theatre-TV rights contingent on theatres' guarantee of $200,000 for the fight films.

Theatres have also signed up 13 Eastern colleges for exclusive telecasts of some of their football games: Army, Penn State, North Carolina, Maryland, Colgate, Boston, Navy, Princeton, Pitt, Yale, Columbia, Fordham, Dartmouth. These are apart from NCAA-arranged schedule of telecasts via NBC-TV (Vol. 7:36). And 3 Notre Dame games -- with Indiana, Purdue, Iowa -- have been signed up by United Paramount for its theatres in Chicago, Detroit, Minneapolis. These games will also be made available to the Eastern theatre-TV network.

* * * *

Plan for permanent sports-sponsoring organization of TV set manufacturers is under study by RTMA sports committee under RCA v.p. Joseph Elliott. Committee will consider proposal to set up fund to buy sports events away from theatre TV through voluntary assessments based on set sales -- and already has been offered a 50-50 deal with one of telecasting's biggest sports sponsors.

But it's unlikely RTMA will undertake such a project -- more probable that any such joint-sponsorship setups will be formed outside RTMA, as was group of 8 major set makers who pooled to sponsor Walcott-Charles bout July 18 (Vol. 7:28-29).

ZENITH READY TO START FEE-TV SCRAMBLE: Zenith is about to petition FCC for hearing looking to establishment of Phonevision as regular commercial service. At week's end, word was that it would file for rule-making hearing next week -- thus opening way for first formal official consideration of principle of pay-as-you-look TV.

But keep this in mind: If Phonevision or any other system of fee-TV is ever authorized -- and there's no assurance that it will or will not be -- it's probably years from actuality as day-by-day service. Reasons are simple:

TV freeze is far and away FCC's first concern, and it can scarcely be melted before first of year (Vol. 7:36). Then theatre-TV hearing, set to begin Nov. 26, is going to be killer-diller -- furore following Robinson-Turpin bout is proof of that.

Theatre-TV hearing could generate as much heat as color fracas, even take as much time, though there's talk at Commission of assigning an examiner to that case, rather than hearing it en banc -- unusual for so important & controversial an issue.

If fee-TV hearing starts before mid-1952 it will be surprising. In any event, it shapes up as tug-of-war whose political pulling and hauling -- with movie industry so vitally involved -- may well make color business look like demure afternoon tea. As we pointed out (Vol. 7:34), you don't need a diagram to explain the central issue -- "to pay or not to pay." Engineering complexities can't obscure it, and several commissioners are openly doubtful about it.

At least 3 other projected subscription systems will be in with both feet -- Paramount's Telemeter, Skiatron's Subscriber-Vision, RCA's "mystery" system. And, although he's been quiet for several years, one Thomas E. Corbett, Briarcliff Manor, N.Y., once offered a metered-TV proposal that may turn up again.

What prompted Zenith to choose this moment to file is anyone's guess. Its publicity-wise president E.F. McDonald may have found catalyst in uproar currently generated by set-owning fight lovers enraged over absence of Robinson-Turpin match from their screens. Or it may be part of pitch to hang onto now-precious Channel 2, which he has been licensed to use experimentally for Phonevision for some years.

At any rate, Comdr. McDonald last week wired Congressmen, newspapers, all Zenith distributors, probably others, as follows:

"How can TV, now without a boxoffice, expect to compete for great events against the tremendous boxoffice that will exist when thousands of these theatres are equipped with theatre TV unless TV itself secures a boxoffice?

"Zenith is not opposed to theatre TV, but we are opposed to theatres monopolizing great events. Our only hope to keep great events on the air is some system of subscription TV -- whether or not it is Phonevision -- where the public can pay as they see."

NPA PRIORITIES FOR TV-RADIO PROJECTS: Telecasting and broadcasting are regarded as "indirect defense-supporting" industries -- hence the 13 station and network construction-alteration projects included in last week's first list of fourth quarter approvals by NPA (Vol. 7:37).

Despite extremely tight materials controls -- 83% of fourth quarter applications from all industries were denied -- the TV-radio projects got NPA go-ahead, along with allotments of steel, copper and aluminum. They succeeded because they made strong cases for essentiality in civil defense and as information media.

"Indirect defense-supporting" tag pinned on TV-radio grantees by NPA gave them priority over most other "commercial" construction applicants. Roughly, it put them third-from-top on NPA's 4-rung ladder of priorities. It's not very high, but it's long way from bottom -- and bottom-rung projects are being turned down.

This priority can be applied to any type of station alteration or construction -- from a complete commercial or experimental station to antenna towers, transmitter buildings or studio alterations.

But TV-radio projects can also be rejected, as forthcoming over-all list of some 2000 denials will show. Priority isn't automatic; applicant must prove case.

* * * *

In applying for permission to alter or construct, these are the points to stress -- they carry most weight:

(1) Essentiality of project to civil defense, public safety and welfare. If it's near military training base or big defense plants, make point of importance of station for information, defense and morale in this connection. If you're requesting alterations, explain exactly why they're important. Attach as many pertinent exhibits as possible -- NPA will base its action only on availability of materials and the information in your application.

(2) Reconstruction required as result of fire, flood, disaster or other circumstances beyond your control. Oklahoma City's KOMA (AM), for example, must vacate its present studios, hence got NPA's permission (and materials) to build new studios for both radio and TV.

(3) Amount of basic materials needed -- steel, copper, aluminum; the less the better. It's to your advantage to explain in detail how you propose to conserve building materials, cut corners to use least possible amounts of the 3 metals.

* * * *

You must have CP from FCC if you're applying to build new station or make alterations necessitated by changes in power, transmitter location, antenna height, etc. NPA insists that's No. 1 prerequisite -- despite its admitted error last week in approving construction of TV project which still pends before FCC.

Allotment of 46 tons of structural steel to Humboldt Grieg's WHUM, Reading, Pa., to begin construction of experimental uhf tower, was a mistake, says Stephen Burns, deputy director, NPA Construction Controls Div. (Error, incidentally, is direct result of NPA's rejection of FCC offer to confer on status of individual applicants and general TV-radio station criteria.) "Whoever approved that application evidently thought the station had an FCC license," said Mr. Burns.

Actually, FCC approval of WHUM's application isn't in the bag by any means, and Commission action may be delayed for some time -- Reading's WEEU having filed opposition (see p. 12). As for the 46 tons of steel, it's still allotted to WHUM.

Only other NPA authorization for uhf station went to John H. Poole's experimental KM2XAZ, which has FCC permit to move from Long Beach to Mt. Wilson, Cal.

Of 3784 applications for all types of fourth quarter construction, 2080 were denied, 458 approved, 848 found to be exempt from regulation. Only 152 of the approved projects -- and none of the denials -- have been identified so far. Rejected applicants may re-apply for first quarter construction and allotments.

Through first half of 1952, construction materials will be tight. Barring full-scale war or vastly accelerated rearmament, shortages should ease by time post-freeze TV construction rush is in full swing, probably 1953 (Vol. 7:36).

JOCKEYING FOR POST-FREEZE POSITION: Applicants looking beyond freeze and seeking vantage, as most are, pose a lot of questions -- few of them answerable as yet.

In intermixed vhf-uhf city, for example, how will Commission award channels when hearing victors are chosen -- who will get which? There's no policy yet, but you can be sure of at least two things:

(1) Uhf will be fostered by Commission, which will use the competition for channels to uhf's advantage where possible.

(2) FCC will seek to minimize number and length of hearings in every way it believes to be consistent with law.

Here's how one commissioner thinks about it, putting into words what others have said in part and implied:

"If a man wants a uhf channel, and there's no competition for it, I think he should get it without a hearing, regardless whether there's competition for the vhf channels in the city. I think the rest of the Commission will feel the same. I don't see why vhf and uhf should be thrown into the same pot.

"In competition for vhf, should we hold hearings on individual channels? I don't know. That's a tough one. Aside from legal complications, I wouldn't like to see applicants lining up and, in effect, making a partial determination of who will get the grants. I think we should have complete choice as to which are best.

"Yet you must remember our budget situation. We have only 7 examiners and aren't getting any more. Our staff is very limited. If jockeying for position seems to promise much quicker grants, perhaps that's what we'll have to permit."

We suggested: Perhaps "grass roots" campaign, now, might bring the needed funds from Congress?

"It would be ironic," said the commissioner, "if we should get funds through the efforts of the industry we regulate, when the House has rejected our request for appropriations to conduct monitoring for the defense effort."

Another commissioner favors "specified channel" type of hearing, believes it legal, proper, expeditious. Still others favor almost anything that will hasten growth of uhf -- but manifestly haven't thought deeply about modus operandi.

One more possibility being toyed with: If applicants outnumber channels in particular city, cut loose one or 2 uhf "flexibility" channels -- enough to go around -- and grant everyone. Who would get vhf, who uhf? "I don't know, but we could do it, and I think many applicants would accept what they got, and be glad to avoid a hearing and get a channel." Sounds possible -- in new markets.

Only thing sure: All the commissioners, having heard from Congress and the public, really are eager to end the freeze as quickly as possible, some now openly regretting delays caused by the color imbroglio.

When final decision is rendered, FCC may well call in applicants' attorneys and engineers for conferences to speed up hearing procedures. Commissioners regard last conference, which resulted in the "written hearing" procedures now in progress (Vol. 7:30), as most fruitful effort to end freeze yet undertaken.

TELECASTING COSTS UP, SO IS BUSINESS: Operating costs are mounting -- but business of telecasting is in such "good financial health" that even the conservative NARTB (National Assn. of Radio & Television Broadcasters) echoes our prediction that most TV stations will operate in the black for 1951 (Vol. 7:13,36).

"This would reverse the 1950 picture, when approximately 65% of the TV stations reported red-ink operation for the 12-month period," said NARTB's capable employer-employe relations chief Richard P. Doherty at Chicago meeting Sept. 18.

Until FCC's 1951 audit comes out next spring, no one can say what figures really are -- but fact is that TV time is selling like the proverbial hotcakes, that telecasting is probably the fastest growth industry in the land. Even the smaller-town stations among the 107 pre-freeze "pioneers" now report profitable operation, so it could be that "most" now means "nearly all".

Even in 1950, as matter of fact, 54 stations ended year in black, according to official FCC report (Vol. 7:13), although the industry as whole showed deficit of

$7,900,000 (before Federal taxes) as against $25,300,000 deficit in 1949 -- mainly due to network losses. FCC auditors reported more than half these 54 had net profit of $100,000 or more before taxes, while 8 stations earned more than $400,000 each.

All isn't gravy for the telecasters, however. Mr. Doherty's talk was based on his second annual TV cost study, just sent NARTB members, which covers 1950 operations. It starts by reporting "substantial and even remarkable increases" in individual station revenues. But it also notes total operating expenses per station have risen because of larger staffs, higher wages, added equipment, more hours on air, allocation of certain costs hitherto not charged to TV (presumably to radio).

Biggest expense item was payroll, averaging 50-60% of revenues, says report. Depreciation ran some 16-17% of total expenses. Film & minor unclassified programs averaged 13-14%. Report doesn't identify stations, nor disclose extent of sampling, but breaks stations down into 5 categories of operating costs ranging from $200,000 & below to $800,000 & above. Lower group averages 32 employes (2 part time) and weekly payroll of $2169; latter averages 152 workers (8 part time), payroll $15,875.

NARTB report conflicts with FCC's in that it says only 35% showed profit in 1950, FCC figures being before taxes. NARTB sample stations showed average per-station increase of 60% in revenues in 1950, or an average of $441,000 per station. Average operating cost per station was put at $532,000 -- so that operating ratio was 121% for full year of 1950 as against 197% for 1949.

IS TV LOSING ITS AUDIENCE? *New York Herald Tribune* Syndicate's caustic John Crosby thinks it is, and he blames "the freeze in ideas," which he calls "even more paralyzing than the FCC freeze." In Sept. 19 column he advises telecasters to heed signs of restiveness among set owners, and—yes—even the current wave of anti-TV jokes. Says Crosby:

"Just as did radio, TV is losing—or may already have irrevocably lost—the support of the most intelligent level of the American community, the most influential body of opinion in the country." As a result of stereotyped programming and avoidance of new ideas, "TV has earned for itself, in 5 years, a popular contempt which it took radio 20 years to win—if that's the word for it . . . TV is breaking the hearts of its own most able and imaginative creators—those who got into TV early, those who saw it as the greatest mass communications medium ever devised . . .

"Broadcasting has always been more afflicted with taboos than any other medium. Today the timidity has reached an all-time high. Virtually everything from pregnancy to freedom of religion is considered a controversial subject, leaving almost nothing except homicide as a fit topic to enter our homes. You can't hire a controversial figure, either, meaning anyone whose name has appeared in Red Channels. No one in broadcasting . . . will defend these taboos; all scrupulously observe them."

And *New York Times*' Jack Gould same day takes a swipe at those half-hour filmed commercials which he says are shaping TV into "America's flea circus."

"Fifty percent of the TV industry," he says, "is now ardently embracing the commercial commercial"—those long sales talks, minus entertainment, which advertise vitamin pills, hair oil, etc. These pitchmen, says Gould, "are a breathless and tireless band of recruits from medicine shows, carnivals and auction galleries," and names them as Sid Hassman, Richard Lewellyn, Charles Kasher, Paul Bedell and David Klein. "Their technique is simplicity itself: treat the customer as a consummate dope."

Baltimore ad agency, TV Advertising Associates Inc., is responsible for the epidemic, Gould says, observing that gen. mgr. Allen C. Kaye-Martin is "happily surprised by the advantages that come from the program not subject to the distractions of entertainment . . . Even in one-station towns, he doesn't hesitate to repeat films: 300 showings in 14 months has been one community's fate . . .

"Fifty-five video stations out of a total of 107, as well as 750 radio outlets, are playing host to the medicine men. WOR-TV is in its twentieth month showing the same half-hour commercial 3 times a week. WJZ-TV [is] just beginning. 'Our first network-owned station,' Mr. Kaye-Martin said, with a touch of pride."

———■———

Neither press, radio nor TV has right to be in a courtroom, which "belongs to the litigants trying a case," said ex-Federal Judge Simon H. Rifkin in opposing telecasting of criminal trials and Congressional hearings on American Bar Assn. convention panel in New York Sept. 19. Columnist Marquis Childs was opposed to "hippodroming" as incentive to prosecutors to go all out for prominence rather than justice. But Rudolph Halley, ex-Kefauver committee counsel, backed TV by noting "sobering effect" it had on committee members and counsel during recent hearings. And *New York Times*' Jack Gould said it's better to use TV at real trial where justice is being dispensed than for gang operas and pseudo-crime thrillers.

Electromagnetic radiation bill (Vol. 7:8, et seq) was reported Sept. 19 by House Interstate & Foreign Commerce Committee with only 2 amendments to Senate-passed version (S. 537). First would bring Canal Zone under provisions, second increase punishment to $20,000 and/or 20 years for violations intended to harm U. S. There's little doubt Senate & House will agree quickly on measure, pass it. What bill would do is extend President's power over stations to other devices capable of emitting radiations of navigational use to enemy.

Govt. should buy TV-radio time for candidates for Federal office because of "frightening increase" in campaign costs. Thus Sen. Benton (D-Conn.) testified before Senate Elections subcommittee Sept. 14. Major parties would allocate time to their candidates, but minority parties would have to pay full rates if they poll less than 2% of vote. Sen. Benton would have stations continue offering free time and suggested FCC, in making grants, "give weight" to applicants proposing to offer free time.

Resumption of hearings on Benton bills (Vol. 7:36-37) is still not scheduled, and probability grows that they won't be concluded this session. NARTB says that when its turn comes to oppose bills—which propose setting up 11-man TV-radio program advisory board and encouraging box-office TV—testimony will be offered by station operators as well as headquarters spokesmen.

Personal Notes: Allen L. Haid reported succeeding late Ed Flanagan as mgr., WSPD & WSPD-TV, Toledo, transferring from WSAI, Cincinnati, where he will be replaced by Robert Kern, ex-WMMN, Fairmont, W. Va. . . . Jack Van Volkenburg and Howard S. Meighan, presidents of CBS-TV & Radio divisions, respectively, guests of honor at Washington reception Sept. 17 attended by govt. officials and by CBS chairman Paley, president Stanton & executive v.p. Ream . . . Martin N. Leeds promoted CBS-TV director of business affairs, Hollywood, as Kenneth L. Yourd transfers to New York to become CBS-Radio director of business affairs; Hollywood radio job taken over by John F. Meyers . . . Frank U. Fletcher has resigned as an FM member of NARTB board, having sold his interest in WARL & WARL-FM, Arlington, Va.; he practices law in Washington . . . Les Arries has resigned from DuMont Network executive staff . . . Harvey Marlowe appointed program mgr., WOR-TV, New York . . . Max Jacobson promoted to NBC-TV studio supervisor under operations supervisor R. R. Davis; Herbert DeGroot to newly created post of kinescope recording supervisor and John Schaller to TV training supervisor, both under technical operations supervisor F. A. Wankel . . . David Miller, v.p. & general counsel, Young & Rubicam, named TV-radio operations director; David Levy, v.p., named executive asst. to Everard W. Meade, v.p. & director of TV-radio dept., and Rodney W. Erickson named mgr. of contact service . . . Robert Peyson, ex-Kenyon & Eckhardt and CBS, named TV production supervisor, Grey Adv. . . . Gil Babbitt named TV-radio director, Feigenbaum Adv., Philadelphia . . . Jack Poppele, WOR-TV engineering v.p., named to advisory council, Upsala College, E. Orange, N. J. . . . Howard Lepple, ex-chief engineer of WLWD, Dayton, named engineering administrative asst. under v.p. R. J. Rockwell to coordinate TV plant and operations of 3 Crosley TV stations; he's succeeded at WLWD by Lester Sturgill, while Carl Bopp, WLWT chief engineer, leaves station to work on color TV at Crosley plant. J. M. McDonald named asst. technical director, all Crosley stations . . . Robert E. Kintner, ABC president, replaces Mark Woods, ex-ABC vice chairman, on the Advertising Council . . . Guilford S. Jamieson, former president, FCC Bar Assn., has joined William P. Smith in establishing law firm of Smith & Jamieson, Walker Bldg., Washington.

Dr. Newbern Smith, chief of Bureau of Standards central radio propogation lab, named recipient of IRE's 1952 Harry Diamond Memorial Award for person in govt. service making outstanding contributions. Among 45 new fellows IRE board has named: S. J. Begun, Brush Development Co.; P. S. Christaldi, DuMont; Howard Post Corwith, Western Union; L. A. DeRosa, Federal; D. W. Epstein, R. S. Holmes, Harold B. Law, L. S. Nergaard & Louis Malter, RCA; R. N. Harmon, Westinghouse Radio Stations; John K. Hilliard, Altec Lansing; J. A. Ouimet, Canadian Broadcasting Corp.; Henry W. Parker, Sylvania; D. W. Pugsley, GE; H. H. Scott, Hermon Hosmer Scott Inc.; C. S. Szegho, Rauland; Russell H. Varian, Varian Associates.

Frank J. Elsner, 76, chief electrician at NBC's Center Theatre, died of heart attack while at his post Sept. 16 during *Colgate Comedy Hour*. During 40 minutes of program, show went on while 4 of his grieving electricians handled his light cues—at times reaching over his body to throw switches because it could not be moved until medical examiners arrived.

Second volume of *Best Television Plays of the Year: 1950-51*, edited by William I. Kaufman, NBC-TV casting director, due from Merlin Press in October.

Network Accounts: Block Drug Co. (Amm-i-dent tooth powder & paste) begins *Crime with Father* Oct. 5 on ABC-TV, Fri. 9-9:30; also resumes *Danger* Sept. 25 on CBS-TV, Tue. 10-10:30, thru Cecil & Presbrey, N. Y. . . . Aluminum Co. of America (Alcoa products) will present *See It Now* on CBS-TV, Sun. 5:30-6, starting date unnounced . . . S. C. Johnson & Son Inc. (wax products) starts *Garry Moore Evening Show* Oct. 18 on CBS-TV, alt. Thu. 8-8:30, thru Needham, Louis & Brorby, Chicago . . . Word of Life Fellowship Inc. (religious organization) starts new series of *Word of Life Songtime* Oct. 6 on ABC-TV, Sat. 11-11:30 p.m., thru Walter F. Bennett & Co., Philadelphia . . . Jene Sales Corp. (home permanent) new program starting Sept. 27 on ABC-TV, Thu. 10-10:30 (Vol. 7:37) is *Paul Dixon Show*, originating at WCPO-TV, Cincinnati . . . Grove Laboratories Inc. (Bromo Quinine Cold Tablets) reported readying alt. week sponsorship of *Tales of Tomorrow* on ABC-TV, Fri. 9:30-10, thru Gardner Adv., St. Louis; Jacques Kreisler Mfg. Corp. (men's jewelry) now sponsors alt. weeks . . . General Tire & Rubber Co., which sponsors *Ted Husing* on film before each Westinghouse-sponsored NCAA football game (Vol. 7:37), will also sponsor *Dizzy Dean* interviewing World Series players 15-min. before each series game on NBC-TV; agency is D'Arcy Adv., St. Louis.

Station Accounts: Philips Petroleum Corp. sponsoring film versions of Big 7 grid games on WDAF-TV, Kansas City, and other Midwest stations, Tue. nights . . . Miller Brewing Co. (beer) sponsoring Marty Glickman in *Giant Quarterback Huddle* on WOR-TV, New York, Wed. 7:30-8, thru Matthisson & Associates, Milwaukee . . . Buitoni Macaroni Corp. Oct. 1 resumes sponsoring *Clair Mann's Glamour Show* on WJZ-TV, New York, Mon. 2-2:15, thru Astral Adv., N. Y. . . . Quaker City Chocolate & Confectionery Co. buys *Good & Plenty Western Show*, dude cowboy Dave LaRue as m.c., Fri. 5:30-6 on WNAC-TV, Boston, thru Adrian Bauer Adv., Philadelphia . . . National Brewing Co. signs with WMAR-TV, Baltimore for third year, 52-week contract covering 3 programs, 13½ hours weekly, thru Owen & Chappell, N. Y. . . . Among other advertisers reported using or preparing to use TV: John W. Leavitt Co. (Teddie peanut butter, nuts), thru Chambers & Wiswell, Boston (WNAC-TV); Sunbeam Corp. (electrical appliances), thru Perrin-Paus Co., Chicago (WABD); Ralston Purina Co. (Rice Chex), thru Gardner Adv., N. Y. (WOR-TV); Elmira Filter Tip Corp. (cigarette holder), thru Wesley Associates, N. Y.; Mandee Fabrics Inc. (rayon & rayon acetate fabrics), thru William Wilbur Adv., N. Y.; New Mexico Tourist Bureau.

———■———

Mounting costs of TV talent were pointed up this week when, with announcement that NBC has signed Ezio Pinza to exclusive 3-year contract, *New York Herald Tribune* reported his fee on TV shows built around him will run $5000 a show and his TV-radio guest appearances $2000 per. *Variety* says fees of $5000-$7000 are already being paid in network "battle for ratings"—Dinah Shore and Tony Martin each getting $5000 plus expenses and Margaret Truman $2500 plus expenses for recent appearance on Red Cross Shoes' *America Salutes Irving Berlin* on NBC-TV. Average in TV, says *Variety*, is $3000 for single guest shot. *Ross Reports* estimates over-all TV production costs will run $262,000,000 for 1951-52 year, which means production-talent bill will equal or exceed telecasters' probable time billings (Vol. 7:32, 36).

Novel request by XELD-TV, Matamoros, Mex., asks FCC for temporary use of 5-watt transmitter on 140.02 mc to transmit electrical impulses and voice from Brownsville, Tex., for purpose of synchronizing stations' diesel power generator with Brownsville current.

THE FCC's FIRST LOOK at RCA's latest color pictures may come in early October, since it probably will get invitation soon from RCA. Decision to pipe pictures to Washington—bringing them home to capital's big brass—came after RCA Chairman Sarnoff went to Washington Sept. 20, looked at signals sent from New York via coaxial and microwave, pronounced them "excellent—just as good as in New York."

Transcontinental transmission to Los Angeles and San Francisco is just as feasible, said Gen. Sarnoff. RCA is so satisfied with its New York showings (Vol. 7:36-37) and networking potential of its compatible color system that it plans 2 weeks of demonstrations in Washington, probably starting Oct. 3, carrying thrice-daily shows originated in New York. The 10 a.m. show will be telecast via WNBW, the 2 & 4 p.m. shows via closed circuit.

Invitations to FCC would be informal, not in nature of request for reopening color hearing which RCA and/or NTSC will seek after sufficient field-testing.

* * * *

Biggest color flurry of week came when Sept. 20 *New York Times* ran Wm. Laurence's excited story on tri-color tube built by his friend Dr. Ernest Lawrence. Dr. Lawrence had demonstrated tube in New York labs of Paramount Pictures, 50% owner of Chromatic Television Laboratories Inc., formed to develop and produce the tube. Story by *Times'* eminent science editor was followed by jump in Paramount stock from 27⅜ to 33⅜. It fell back to 30¼ at closing Sept. 21.

Other reporters clamored for look, got it. Consensus was that tube still has quite a ways to go.

Wm. Laurence attended RCA demonstration afternoon of same day, was asked how pictures compared with Lawrence tube results. He said: "The color I see here is far superior." But he believed it unfair to compare the two, since Lawrence tube was hand-made model, actually built in Dr. Lawrence's Berkeley, Cal., garage and flown to New York over weekend.

Wall St. Journal reporter wrote: "Newsmen were of the opinion that the color reproduced with the Paramount tube was not as good as that shown by either CBS or RCA . . . In some instances, the various hues had a 'washed out' look; in others they lacked sharpness and appeared to overrun each other. Flesh tints were unnatural, too." AP reporter's reactions were similar.

But all observers took into account fact that tube was hand-made, hurriedly set up. Actually, tube wasn't even sealed, was on pumps during demonstration. Signals used were closed-circuit, live, fed from field-sequential equipment purchased from DuMont.

Plans to manufacture tube at recently-acquired Stamford, Conn., plant were described by Paramount v.p. Paul Raibourn. He said that capacity will be 75-100,000 yearly; that 16 & 22-in. tubes to be made will run about $5 more than comparable black-&-white if mass-produced; that "limited number" of color-monochrome sets will also be made; that tube licenses will be offered to other manufacturers, some of whom have already approached Paramount.

Tube has single gun, 400 vertical lines of phosphors in glass plate (eventually on face plate), wire grid to direct electron beam to proper line. Paramount officials say brightness is about 15 ft.-lamberts, claim overall performance is "1000%" over early Lawrence tubes. It hasn't been used with RCA signals, but Paramount says it can be.

FCC and industry are being invited to showings of tube in near future.

* * * *

Field tests of compatible signals will get under way on several additional fronts, now that NTSC adopted, at Sept. 18 New York meeting, major recommendations of NTSC Panels 14 & 16—synchonization and standards. These standards include: 3.89-mc color subcarrier, color phase alternation (formerly called oscillating color sequence), constant luminance sampling. Minor, non-controversial standards are still to be set.

Among those to broadcast compatible signals: RCA, in New York and Washington; DuMont, Passaic and New York, latter with new 5-kw ERP 708-714 mc transmitter at WABD's present site and with portion of schedule microwaved from Hazeltine labs; Philco, Philadelphia; GE, Syracuse; Crosley, Cincinnati; Zenith, Chicago. Crosley, like Philco, has protested to FCC against limitation of colorcasts to periods outside regular commercial hours.

NTSC is shooting for completion of field tests by end of year, its chairman Dr. W. R. G. Baker (GE) reported to RTMA board this week.

FCC will join in on field tests, in a way, since it is building sets around 2 RCA tri-color tubes received at Laurel, Md. labs Sept. 14. Plans are to look at both CBS and RCA pictures.

* * * *

Status report on CBS color, delivered at Sept. 18 Washington Ad Club meeting by CBS Labs president Adrian Murphy, stressed this unusual point: CBS color is a stimulant to black-&-white sales now, since manufacturers can assure customers that they can buy now, confident that color "slave" unit may be added any time. CBS has advantage over RCA in that RCA says tri-color tubes won't be mass-produced for 2 years or so. Manufacturers are recognizing that "color can't be uninvented."

Additionally, Murphy reported that: (1) CBS would offer 20 hours of color weekly by October. (2) CBS has 7 color cameras on order. (3) CBS-Columbia has completed tooling, expects to reach production of several hundred color sets daily within next few months. (4) Eidophor-CBS theatre TV is now being tested in Zurich. (5) France appears ready to adopt CBS system. (6) Remington-Rand industrial color has been bought by U of Kansas, U of Chicago, Boston's Jordan-Marsh dept. store. (7) Drum-type color sets are planned for "future."

Nine-game color football schedule beginning Sept. 29 is to be fed to 11 stations, but at least 2—WTOP-TV, Washington, and WMAR-TV, Baltimore—plan to feed programs closed-circuit to receivers in auditoriums or halls rather than clear time on the air for the few color receivers yet available or adapters people might buy. Neither has yet chosen location. Other 9 affiliates CBS reports will carry its color football: WCBS-TV, New York; WCAU-TV, Philadelphia; WNAC-TV, Boston; WBKB, Chicago; WKRC-TV, Cincinnati; WHIO-TV, Dayton; WBNS-TV, Columbus; WJBK-TV, Detroit; WEWS, Cleveland.

CBS Affiliates Advisory Board has reelected I.R. (Ike) Lounsberry, WGR, Buffalo, as chairman. Richard Borel, WBNS, Columbus, was elected secretary, succeeding Arnold Schoen, WPRO, Providence, who continues to represent District 1. Other members: C. T. Lucy, WRVA, Richmond; Glenn Marshall, WMBR & WMBR-TV, Jacksonville; Howard Summerville, WWL, New Orleans; Harry Burke, KFAB, Omaha; Clyde Rembert, KRLD & KRLD-TV, Dallas; Clyde Coombs, KROY, Sacramento.

Acute CBS-TV Chicago dilemma, pending projected $6,000,000 purchase of Paramount's WBKB (Vol. 7:36), as reported by Chicago correspondent of *Billboard* (Sept. 22) after noting 22 programs constituting 17 hours a week now being piped to other networks from Chicago: "Columbia [continues] the big blank in Chi network programming. WBKB, local CBS outlet, is so busy making money on local shows it has no time to think about network originations."

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
September 22, 1951

DEEPER CUTS IN METALS FOR TV-RADIO: Fourth quarter materials allotments completed, NPA Electronics Div. took a look at its books this week and discovered TV-radio set makers' rations will be a little slimmer than they appeared last week (Vol. 7:37).

Here's how they average out on industry-wide basis: Set manufacturers will be limited to 58.5% of steel they used during average quarter of first half 1950 (vs. 60% reported last week), 52.6% copper (vs. 54%), 46.8% aluminum (vs. 48%).

And another copper cutback is due for fourth quarter, may be announced in next few days. Recent strike cost U.S. 30,000 tons -- about same amount used by the entire TV-radio industry in all of 1950. Over-all allotments were determined before walkout; therefore Govt. has allotted much more copper than will be available.

These alternatives face mobilization planners: Dig into stockpile, slash allotments, or both. Copper stockpile is already low, 25,000 lbs. having been withdrawn earlier this year. Burden of new cuts in fourth quarter allotments will be borne heavily by consumer durable industries.

HEALTHY TV TRADE AS INVENTORIES DROP: "Steady and healthy" just about sums up the upsurge in TV-radio trade at all levels -- with inventories going down as production creeps forward. One key dealer calls it "nice normal business," epitomizing what the trade press and other dealers as well as distributors & manufacturers are saying.

Renewed confidence is manifest on all hands that fourth quarter output and sales will be satisfactory, though by no means comparable to last year's.

Extent of dealer-inventory drop can only be conjectured, won't be known (and then only as of Sept. 1) until next Dun & Bradstreet report is issued at end of this month. RTMA's monthly distributor-inventory figure always lags month, too.

But factory inventories are reported weekly -- and latest, covering week after Labor Day, ending Sept. 14, showed drop of more than 61,000 units from preceding week to total of 560,044. On basis of reports how well cut-price sets have been moving from factories, and selling, it's entirely likely this drop will have been equalled or bettered this current week (ending Sept. 21).

The 61,000 drop was biggest since Aug. 24 report of 88,151 drop (Vol. 7:35). It's apparent the downtrend from Aug. 3 peak of 768,766 will continue.

Production of TVs rose to 62,738 (only 487 private label) for week ending Sept. 14, bring to just under 500,000 the total for 11 weeks of third quarter thus far reported -- and about 3,825,000 for year to date.

Third quarter should hit 600,000 or more, compared to roughly 1,850,000 in third quarter 1950. There are those who believe pace can only accelerate -- at least to limit of materials availability -- so that fourth quarter may well achieve NPA's informal estimate of 940,000 (Vol. 7:32) to bring year's total to about 5,000,000.

As against recent level of 50-60,000 sets per week, output ran thrice that rate this time last year.

Radio output for week was 222,406 (101,296 private label), up from 179,872 preceding week (Vol. 7:37). Factory inventory of 381,139 on Sept. 14 compared with 414,130 Sept. 7. Radios were 125,501 home sets, 19,840 portables, 77,065 auto.

ACTION IN MILITARY CONTRACT CRISIS: Military electronic contracts are by-passing most of TV-radio industry (Vol. 6:48-49; 7:3,10) even while materials cutbacks threaten body blow to industry kicked in face by summer buying slump. Serious dislocations have already resulted -- more are inevitable.

With these grim facts in mind, Defense Production Authority Sept. 21 set up joint Govt.-industry-labor electronics task group "to study the possibilities of placing additional defense work in mass production plants of electronics industry."

Employment has dropped 50% in TV-radio plants in Chicago and New York-Philadelphia areas since first half 1950, task group's first meeting was told, on basis

of "preliminary reports." If measured against fall 1950's peak employment, the dip would be far greater.

Where have the military orders gone, meanwhile? For first time, the Govt. reveals this distribution pattern of electronic prime contracts by dollar value:

Manufacturers who make only TV-radio sets have gotten 7%.

Old, established firms which did govt. electronic work in World War II got 65%. (Top 5 contractors then were Bendix, GE, RCA, Western Electric, Westinghouse.)

Old, established firms which are new to electronics industry, notably the aircraft and automotive manufacturers, got 21%.

New electronics firms, most of them especially set up to produce military equipment, got 7%.

Many military electronic items aren't suited to mass production techniques typical of TV-radio industry, task group agreed, because of "high degree of engineering required, fluidity of design, and high proportion of mechanical devices incorporated in the delivered equipment." In addition, large number of samples submitted to the military by TV-radio firms haven't come up to specifications.

Named to task group by DPA chief Manly Fleischmann: Edmund T. Morris Jr., chairman, DPA Electronics Production Board, and director of NPA Electronics Div.; Air Force Col. Leigh Hunt, Munitions Board; Emerson president Benjamin Abrams; Philco president William Balderston; M.F. Darling, IBEW-AFL, Chicago; Daniel Arnold, chairman, radio-TV conference board, IUE-CIO, Camden. They recommended:

(1) Military procurement services request prime contractors to place subcontracts in areas having surplus of facilities and labor for electronics production.

(2) TV-radio manufacturers be more aggressive in seeking subcontracts, working through armed forces regional councils.

(3) Defense agencies study existing contract loads, and spread orders more evenly throughout industry, provide suitable incentives to encourage prime contractors to farm out more of their work to subcontractors.

(4) Component manufacturers submit samples for testing by Armed Services Electronics Standards Agency (ASESA).

Meeting followed by few days RTMA's formation of "clearing house" to match prime contractors' needs with subcontractors' productive facilities (see p. 10).

Task of making accurate employment and production survey of the electronics industry was assigned labor representatives on group, who were also asked to submit fourth quarter estimate and complete list of Chicago & New York-Philadelphia firms.

If group does accomplish objective of spreading contracts throughout the industry, it will be year or more before results are noticeable -- because of time required for engineering and design, field testing, etc.

Trade Personals: John C. Weisert, ex-Scott v.p., special asst. since last February to asst. price stabilizer Edward F. Phelps Jr., has resigned from OPS to open Washington office for Magnavox . . . Ricardo Muniz, ex-mgr., DuMont receiver manufacturing div., named operations v.p., Trad Television Corp. . . . Morton M. Schwartz has resigned as gen. sales mgr., Tele-tone . . . A. Blumenkrantz, General Instrument Corp., succeeds R. E. Laux as a director of RTMA parts div. . . . Paul V. Batt, ex-Graybar, promoted to TV-radio sales mgr., RCA Victor Distribution Corp., Albany . . . Irving M. Sandberg named New York sales mgr., Stewart-Warner TV-radio div. . . . Herbert A. Bell, founder-president, Packard-Bell, honored at testimonial dinner in Santa Monica's Miramar this week, given by 80 company officials and distributors . . . Bendix Radio, Baltimore, reports these appointments: F. Donald Fenhagen, mgr. of adv.-public relations, succeeding Leo G. Sands, transferred to Detroit; Henry B. Yarbrough, mgr. of govt. sales, Walter C. Jager asst. mgr.; J. Walter Colvin, mgr. of Air Force sales; L. H. Jones, asst. mgr. of radio sales; James S. Wells, chief industrial engineer; Wolf Broehm, asst. factory mgr. . . . Dr. Thomas H. Morrin, Stanford Research Institute's electrical engineering chief, becomes head of all SRI engineering in new setup; Wm. E. Evans heads TV Group, Paul G. Bohlke heads Electron Tube Lab . . . Jack Frietsch, ex-mgr. at Dayton, named Crosley zone mgr., Cincinnati.

July TV shipments to dealers totaled 117,862, reports RTMA, making cumulative total of 2,588,816 shipped during 30-week period ending July 27 when distributor inventories were reported at 640,393 units. July shipment figure compares with 160,308 in June. Total production during July was 116,000 sets. Copies of RTMA county-by-county report, showing 7-month shipments to each county where 25 or more sets were sold during period, is available from RTMA, 1317 F St. NW, Washington.

Fair trade practice conference for TV-radio industry goes on Sept. 26-28 before Federal Trade Commission attorney Paul H. Butz, despite request of NARDA president Mort Farr for postponement of 2-4 weeks to give more time to study "dangerous" parts warranties practices which he said have mushroomed in industry last few weeks.

Topics & Trends of TV Trade: Upturn in production at Chicago TV-radio plants reflected by fact only 3000-4000 IBEW-AFL members now unemployed, as against 11,000 in July, reports Local 1031 president M. Frank Darling . . . Depths to which TV sales fell this summer indicated by Washington Electric Institute figures, showing July TV sales only 1663 units vs. 6274 in July 1950; but for first 7 months of this year total was 25,279 vs. 37,632 for same 1950 period . . . In New York, *Herald Tribune* survey of dept. stores showed August TV-radio sales down in 13 out of 16 stores, compared to August 1950; they reported drops ranging from 28% to 84%. Three had gains of 94%, 68% & 17% . . . Muntz hikes prices of 20-in. table from $170 to $200, consoles from $200 to $240 and $220 to $270; Harold W. Brown, executive v.p., reports 12,000 sets sold in August, compared with 7000 same month last year . . . Tech-Master reports 3 new custom-built 24-in. models . . . JFD Mfg. Co. offering "Tele-Plex," new coupler permitting up to 4 TV sets to operate from one antenna . . . Blonder-Tongue Laboratories, 38 N. Second Ave., Mt. Vernon, N. Y., offers new multiple distribution amplifier, says it can feed up to 200 TV sets . . . Another sign of improving times: Zenith's new Washington distributor, Simon Distributing Corp., reports 487 dealers attending preview of new line this week bought 5137 TV sets—exceeding allocation.

* * * *

TV set servicing problems are growing so acute that RTMA board has authorized employment of staff assistant to devote full time to work with distributors and dealers in coordinating activities looking to improved industry practices and policies. Crosley's John W. Craig, chairman of set division, will appoint special committee to study and recommend servicing policies. Latest effort to license servicemen and dealers, in Milwaukee, was defeated this week when NARDA group persuaded city council to kill proposed ordnance.

Emerson's line of 17 TV receivers is led by 17-in. table (Model 696) at $199.95 and 20-in. mahogany ensemble (No. 697) with swivel-action console base at $279.95. Also shown distributors last week end were 23 radios listing from $16.95 to $199.95. President Benjamin Abrams said distributor sales to dealers last few weeks have exceeded production "with the result that, keeping up with demand, distributors have reduced their inventories [and] we can now predict that within 3 weeks Emerson will be unable to fill the intensified demand for most models."

Packard-Bell has 31 models in new line introduced this week, starting with 17-in. table at $240, console $290, and 20-in. walnut console at $340. Also introduced was 24-in. with doors at $550 in mahogany, and $575 in oak, American Colonial or French Colonial. Console combinations are full-door 17-in. with AM-FM-3-speed at $475 in walnut or mahogany, $495 in oak or Provincial; 20-in. at $615 in walnut or mahogany, $640 in oak, American Colonial or French Provincial. Prices are generally lower than preceding line, low-end 17-in. table comparing with former $270 price.

Advertising Notes: Westinghouse's $700,000 budget to advertise its TV sponsorship of NCAA football schedule (Vol. 7:36), will be spent mostly on newspaper space in the 60 major cities where games are played . . . Belmont ad budget for new line of Raytheon TVs (Vol. 7:37) runs nearly $1,000,000, including John Cameron Swayze's radio series (NBC, Sun. 3:45-4 p.m.) and heavy schedules in consumer magazines . . . Majestic sponsoring 7 U of Illinois, 2 Michigan grid games on Chicago's WAAF (radio), with special merchandise tie-ins, including contest to locate oldest Majestic radios . . . NARDA president Mort Farr, dealer in Upper Darby, Pa., is m.c. of *Wit's End*, children's quiz show he sponsors Sun. 12:30-1 on WCAU-TV.

Mobilization Notes: To speed military electronic production and aid small manufacturers, RTMA has set up "clearing house" aimed at bringing prime contractors and potential subcontractors together. Recent survey by RTMA's Small Business Committee headed by Indiana Steel's A. D. Plamondon Jr. (Vol. 7:28, 34) provided master list indicating what prime contractors are in need of particular services and what subcontractors are in position to supply them.

As result of survey, 2 or 3 subcontracts have already been arranged, according to RTMA president Glen McDaniel. "Clearing house" will be especially helpful to the many manufacturers who haven't received govt. contracts and have been badly hit by TV sales slump and materials restrictions. Committee agreed to classify as "small business" all manufacturers who employ 750 or less and are not subsidiaries of firms employing more than 750. Some 72% of RTMA's 329 member companies fall within this definition.

* * * *

Special CMP instruction sheet for electronic equipment manufacturers has been drafted by NPA Electronics Div., to go out in few days to all electronics firms. Letter will give specific directions for filing first quarter CMP-4B forms, was prompted by large number of inadequate and incorrectly filled-out forms for third and fourth quarters. First quarter applications are due by Oct. 1. Late applicants for fourth quarter CMP allotments apparently are out of luck—for Electronics Div. has allotted its full quota of steel, copper and aluminum for last 3 months of this year.

New CMP "Class B" product list for fourth quarter—which is supposed to list all civilian type products and components with appropriate code number and industry divisions—reflects some changes on electronic product classifications. Added to list, assigned to Electronics Div., are color slave units, color adapters and converters, uhf converters and radio hardware. Intercom systems, assigned to Communication Equipment Div. for third quarter, Electronics Div. for fourth quarter, reverts to Communication Div. for first quarter 1952.

GRAY MARKET "has all but cornered" sizable portion of the dwindling free supply of a dozen critically needed materials, says House Small Business subcommittee on gray markets in report on nickel. Group headed by Sen. Blair Moody (D-Mich.) finds that nickel normally priced at 67¢ a pound has been selling for as much as $4.50 on gray market, where 40¢ scrap is selling as high as $2.75.

Report charges that: (1) "Pattern of nickel anode [for plating] distribution has crumbled under the pressure of war-born scarcity." (2) "Nickel anodes have been priced beyond the reach of small business men." (3) "Self-styled brokers, many of whom never saw a nickel anode until a few months ago, with no more than a telephone by way of business equipment . . . have all but taken over control of a substantial portion of those anodes not actually pinned down for specific uses by defense priority ratings." (4) "The value of nickel anodes has enhanced to the point where reports from the Chicago area . . . indicate that since Jan. 1 there have been 30 hijackings or warehouse thefts of nickel anodes by racketeers."

Small users of nickel are bearing disproportionate burden of nickel shortage, report holds, quoting from records of an alleged gray marketeer and testimony by GE small appliance division material manager George A. Williams to indicate that large firms such as GE are getting this nickel—principally because they're the only ones that can afford it. Subcommittee urged immediate "vigorous action" by OPS, NPA, Justice Dept. and Internal Revenue to nip racket in bud.

Financial & Trade Notes: Profits of 10 top TV-radio and electronics firms are subjected to scrutiny of IUE-CIO in officers' report to this week's Buffalo convention, with observation that their "enormous rate of return compares with 5% to 6% a year usual on preferred stocks, 3% on govt. bonds, and 2% on savings accounts." Compared with wages, report said, profits between first quarter 1950 and first quarter 1951 jumped $200,000,000, or 92%, while wages increased $162,000,000, or 39%, most of wage increase due to 25% increase in workers.

Electrical industry ranked 12th in profitability among 24 key industries in 1949, jumped to first by fourth quarter 1950 with return of 25.2%, said report. But in first quarter 1951 stockholders' returns had declined to 18.4%—in second place after rubber. Percentages of stockholders' profits were listed as follows: Admiral 101.9%, Motorola 74.6, RCA 32.2, GE 28.1, Philco 26.9, Emerson 26.7, Remington Rand 22.3, Sperry 19.6, Sylvania 19.1, Westinghouse 17.6.

* * * *

Aerovox sales for 6 months ended June 30 were $11,855,000 compared to $10,828,000 same 1950 period, president Wm. Owen reported to stockholders Sept. 15. Net earnings after all taxes were $500,178, or 70¢ a share on the 700,000 shares of common outstanding. Backlog of govt. orders continues to rise, he stated, and monthly shipments are holding fairly steady despite lack of TV business. TV slump has continued, Mr. Owen states, with "no real pickup as yet [but] some indications that there will be later this fall."

Short interest in TV-radio and related stocks on New York Stock Exchange showed these changes between Aug. 15 & Sept. 14, NYSE reported this week: **Admiral**, 35,586 shares on Aug. 15 to 33,492 on Sept. 14; **Avco**, 21,080 to 23,280; **Emerson**, 5848 to 5692; **GE**, 10,725 to 11,995; **IT&T**, 22,714 to 21,100; **Magnavox**, 15,623 to 13,190; **Motorola**, 15,332 to 15,603; **Philco**, 18,793 to 15,547; **RCA**, 31,896 to 34,860; **United Paramount Theatres**, 7895 to 8815; **Zenith**, 26,197 to 21,336.

Dividends: Motorola, 50¢ payable Oct. 15 to holders of record Sept. 28; Sparks-Withington, 10¢ payable Oct. 10 to holders Sept. 27 (paid 20¢ in Feb., 10¢ in 1950); IT&T, 15¢ payable Oct. 17 to holders Sept. 21; Corning Glass, 25¢ payable Sept. 29 to holders Sept. 22; Cornell-Dubilier, 10¢ (special) payable Sept. 28 to holders Sept. 21; Packard-Bell, 25¢ payable Oct. 25 to holders Oct. 10.

* * * *

Financial Miscellany: Cornell-Dubilier net will run close to $4.50 per share this year, compared with $3.96 last year, according to financial circles quoted in *Wall Street Journal* . . . **Dominion Electrohome Industries Ltd.** (Canada) reports net profit of $93,980 (94¢ a share) for year ended April 30, against $81,912 (82¢) preceding year . . . **I-T-E Circuit Breaker Co.**, says SEC report, earned net of $864,721 ($3.25 a share) first 6 months of 1950 on net sales of $21,149,098 . . . **Additional changes in holdings** of securities of their own corporations (Vol. 7:36) have been reported to N. Y. Stock Exchange as follows under regulations of SEC: D. S. Lenfesty sold 1200 shares Arvin industries, decreasing direct holdings to 1500; Richard E. Laux sold 1500 shares General Instrument Corp. in August, decreasing direct holdings to 100 . . . **Hoffman Radio** obtains regulation V-loan from Bank of America providing credits up to $6,500,000 to finance govt. contracts which president Leslie Hoffman says "presently total $60,000,000."

Britain's Radio Industry Council reports $28,547,000 worth of radio exports first 6 months of this year, 39.4% more than same period last year and 5 times value of highest full pre-war year.

Military recruiting services plan no regular TV sponsorships in fiscal 1952, though they may buy some spots. Pentagon recruiting officers claim "surveys show other media, like radio and newspapers, serve our purposes better than TV because of high TV rates." In recent testimony before Senate Appropriations Committee, Army spokesman Col. W. G. Caldwell reported that Army-Air Force in fiscal 1951 spent $260,000 for TV, $690,000 for radio, out of $5,300,000 ad budget. For each military dollar spent, he said, stations donated $10-$20. Navy-Marines don't buy time. Army-Air Force 1952 ad budget is $2,100,000, with $850,000 earmarked for radio and following already allocated: $434,000, *Frankie Lane Band* (CBS, 37 weeks); $254,000, *Bill Stern Sportscast* (NBC, 26 weeks); $81,000, *Game of the Week* (ABC, 7 college football games); $50,000, *Big Inning* (Liberty, 48 broadcasts).

NBC Spot Sales ad in trade press this week, captioned "Why your next 500-line ad should be on Television," notes that TV set circulation surpasses that of leading newspapers in nation's major markets: New York, 2,455,000 TVs as of Aug. 1 vs. leading paper's 2,197,518 circulation as of March 31; Los Angeles, 1,003,000 vs. 393,595; Chicago, 942,000 vs. 917,000; Philadelphia, 874,000 vs. 711,396; Boston, 754,000 vs. 565,641; Cleveland, 486,000 vs. 304,104; Washington, 278,000 vs. 265,684; Schenectady-Albany-Troy, 161,000 vs. 142,003 (3 papers). Ad also cites Hofstra study (Vol. 7:24), showing average family head, both TV-owners and non-owners, spends 49% more time watching TV than reading newspapers, TV-owning family heads spending 187% more on TV.

Planning to tap transcontinental TV circuit, 9 Denver area theatres have ordered General Precision Laboratory projection equipment, according to National Theatre Supply Co., GPL distributor. First installation is planned in John Wolfberg's Broadway Theatre (Vol. 7:37) in time for World Series. Trad TV has announced new direct projection theatre-TV system to sell for $7500. New unit, called Tradiovision, was used in St. James Theatre, Asbury Park, N. J., to receive last week's Robinson-Turpin bout. Paramount says it's turning out its intermediate-film theatre-TV units at rate of 10 a month, has designated Century Projector Corp. as sole sales agent.

NARTB baseball committee to serve as industry liaison with major and minor leagues was named last week by president Harold E. Fellows and includes these TV members: James Hanrahan, WEWS; Leslie C. Johnson, WHBF-TV; Clair R. McCollough, WGAL-TV & WDEL-TV; Lee B. Wailes, Fort Industry (WJBK-TV, WSPD-TV, WAGA-TV); Carleton D. Smith, NBC-TV; Otto Brandt, KING-TV. Radio members: Merrill Lindsay, WSOY, Decatur, Ill.; Paul Jonas, MBS; R. Sanford Guyer, WBTM, Danville, Va.; Harry McTigue, WINN, Louisville; Wm. B. McGrath, WHDH, Boston; Hugh Boice, WEMP, Milwaukee.

"Is Hollywood Through?" titles article by producer Samuel Goldwyn in current *Collier's*, in which he admits TV has hurt movies and will hurt even more. But he forecasts emergence of stronger, healthier and more profitable movie industry as it meets competition with better products, and sees "no reason whatsoever for hauling out the crying towel for Hollywood." Slump of "close to a quarter of a billion dollars" from the $1.5 billion public paid each year in 1946-47-48, he attributed not solely to TV but also to rising cost of living, too many bad pictures, etc.

More Sept 1 sets-in-use reported since NBC Research's "census" of Aug. 1 (Vol. 7:35): Boston 766, 492, up 12,492; St. Louis 306,000, up 6000; Baltimore 313,889, up 5889; Kansas City 132,784, up 5784; Syracuse 129,276, up 3276; Washington 281,125, up 3125; Johnstown 107,000, up 3000; Ames (Des Moines) 62,903, up 1903; New Orleans 61,231, up 1731; Milwaukee 257,607, up 6607.

Telecasting Notes: Ever-increasing number of top-name shows will be telecast "live" from Hollywood—though nothing like enough to rank that film center anywhere near New York as TV capital—after transcontinental TV circuits open for regular schedules (Vol. 7:35) . . . Coast-to-coast hookup was to be opened up part time Sun., Sept. 23, for Ed Sullivan's noon-to-midnight marathon, with big-name stars, on behalf of Crusade for Freedom—actually the first direct pickups from Hollywood and first use of transcontinental circuits for entertainment . . . Networks have divided time on single circuit available each way, which open at 11 p.m. Fri., Sept. 28, though big shows begin next night—NBC-TV piping its 8-11 p.m. *All-Star Revue, Show of Shows & Hit Parade* all the way . . . ABC-TV's "first" to go transcontinental will be Goodyear's *Paul Whiteman Revue* Sun., Sept. 30 . . . CBS-TV's "first" is Lucky Strike's *This Is Show Business* same night . . . From West to East, *Colgate Comedy Hour* picks up Eddie Cantor Sun., Sept. 30, on NBC-TV; American Vitamin's *Frosty Frolics* starts Wed., Oct. 3, on ABC-TV; Carnation's *Burns & Allen* starts Thu., Oct. 4, on CBS-TV . . . Oldsmobile's *CBS-TV News with Douglas Edwards* goes transcontinental Oct. 1 on Mon.-thru-Fri. basis, his regular 7:30-7:45 show being completely rewritten for 8-8:15 p.m. PST (11-11:15 EST) transmission to Coast . . . First Eastern telecast of West Coast football is scheduled for Dec. 1 when Notre Dame-U of Southern California game in Los Angeles is carried from Los Angeles via NBC-TV; sponsor is Westinghouse, but game is separate from its NCAA schedule (Vol. 7:36). Gillette sponsors Rose Bowl game on NBC-TV Jan. 1 . . . Pan American Television Corp., 127 So. Broadway, Los Angeles, offering some 1000 Spanish-language feature films to Latin American stations—president Frank Fouce, Los Angeles theatreman, estimating after return from trip there will be 36 stations operating in Central & South America within year . . . WTCN & WTCN-TV, Minneapolis, 50% owned by *St. Paul Dispatch* and *Pioneer Press* (Ridder), has purchased 45% interest in WEMP, Milwaukee, with Milwaukee theatreman Andrew Spheeris acquiring 4.5%, new stockholders agreeing to supply up to $200,000 for TV if WEMP gets grant; ex-Sen. Robert M. LaFollette and attorney Glenn D. Roberts remain in control of WEMP . . . UAW-CIO adds its voice to that of Assn. for Advancement of Colored People in protesting *Amos 'n' Andy* show on CBS-TV, wiring Blatz Sept. 20 to stop sponsorship because of alleged unfair portrayals of Negro race . . . WXEL, Cleveland, has leased downtown Esquire Theatre for conversion into studio-theatre . . . WGN-TV, Chicago, has completed new 250-ft. antenna near Roselle, Ill., will have Truscon tower ready for test transmissions Oct. 15 . . . WNHC-TV, New Haven, raises base hour rate as of Oct. 1 from $600 to $660, one-min. from $120 to $132 . . . KEYL, San Antonio, raises base hour rate Oct. 1 from $300 to $400, one-min. from $45 to $65.

"Foot in the door" is how WEEU, Reading, Pa., characterizes application of WHUM, Reading, to build uhf experimental station to radiate 200 kw from 1000-ft. tower (Vol. 7:33). In petitioning FCC Sept. 20 to deny or set application for hearing, WEEU contends that WHUM: (1) Doesn't have, and may not get, the $500,000 it proposes to spend. (2) Won't be doing anything of value to the art. (3) Misrepresented its ownership. (4) Would violate FCC's freeze policy. "Now that we are on the very eve of the 'freeze lifting,'" says WEEU, "it is an insult to one's intelligence to believe that WHUM intends to 'experiment' for the good of the industry at this late date." Last week, NPA created stir by announcing grant of steel for construction of the station (see p. 3).

Comr. Frieda Hennock's nomination to New York Federal judgship finally goes to hearing before closed session of Senate Judiciary Committee Thursday, Sept. 27.

Outlook for excess profits tax relief accorded telecasters (Vol. 7:37) in Senate committee's version of House-passed revenue bill (H.R. 4475) continued good this week. Bill goes to Senate vote next week, then to conference. Though Senators O'Mahoney (D-Wyo.) and Humphrey (D-Minn.) are seeking to boost corporate taxes and EPT, latter says he recognizes TV has special problems, plans no amendments to knock out EPT relief. Sen. O'Mahoney took a few swipes at profits of telecasters this week, but he hasn't yet proposed any amendments, and there's no indication of other opposition. TV Broadcasters Tax Committee sent all stations letter Sept. 21 explaining EPT provisions and probable effects.

Sponsorships of 1952 political conventions in Chicago look certain, though final decisions must yet be made by both Republican and Democratic national committees before networks are given formal go-ahead (Vol. 7:28, 30, 32). It's estimated TV-radio coverage will cost networks anywhere from $5,000,000 to $7,000,000. Publicity departments of parties right now are talking about spending about $1,000,000 each on TV-radio during campaign itself, as against the $700,000 Democrats spent in 1948 (only $15,000 for TV), $650,000 GOP (none for TV). "Code" for sponsorship has been drawn up—"looks good," says Democratic TV-radio director Kenneth Fry—and will be basis on which networks can sell time.

FCC reaffirmed approval of Atlanta deal, authorizing transfer of WSB-TV's Channel 8 to new local group while Gov. Cox's Atlanta Newspapers Inc. *(Journal* and *Constitution)* take over WCON-TV's Channel 2 (Vol. 7:32-33, 35). Comrs. Coy, Hyde & Hennock did not participate in decision (FCC Public Notice 51-949). Georgia's Congressional delegation had asked for hearing. Unless there's court appeal by either WGST or E. D. Rivers Jr. (WEAS, Decatur), who protested grant, new Broadcasting Inc., which paid $525,000 for WCON-TV facilities, plans to put station into commercial operation Oct. 1 as nation's 108th, using call letters WLTV, with William T. Lane as manager.

Sale of WLAV-TV, Grand Rapids, to Harry M. Bitner group (Vol. 7:19) was approved by FCC Sept. 19, and formal transfer takes place within 30 days. Call letters will be changed to WOOD-TV, purchasing group being operator of NBC radio outlet WOOD in same city. Seller Leonard Versluis retains WLAV, local ABC radio outlet. New manager will be Willard Schroeder, who also manages WOOD. New rep will be Katz. Channel 7 station was sold last May for net of $1,382,086.

First requests for oral presentation, in lieu of written, during FCC's continuing "paper" TV allocations hearing, are due Oct. 1. Cornell U (WHCU), Ithaca, N. Y., has already asked for oral presentation to back its proposal to add Channel 3 to Ithaca; it's the first. Most hearing parties are standing by, waiting for FCC's first decision on matter, ready to say "me too" in event of favorable action. To date, 449 statements have been filed in hearing, 102 of them this week. Nov. 26 is last filing date.

Sylvania got experimental uhf grant this week to operate on 509-529 mc and 870-890 mc in Emporium, Pa. with call letters KG2XDU (Vol. 7:9). But FCC denied request to use vhf Channel 7 there and to rebroadcast programs of WJAC-TV, Johnstown. Station will be remotely-controlled, carry test patterns and monoscopes, be used for testing tubes, circuits, propagation.

Two applications for new TV stations this week—by *Quincy* (Ill.) *Herald-Whig's* WGEM for Channel 10 and by KIEM, Eureka, Cal., for Channel 3—brought total pending to 442. [For details about these applications, see *TV Addenda 13-K* herewith; for complete listing of all applicants, see *TV Factbook No. 13* and Addenda to date.]

CROSS-COUNTRY TV—AND 108th STATION: Not much fanfare surrounded formal opening at week's end of 2-way transcontinental network TV circuits on regular day-by-day basis -- partly because edge was taken off news by the Japanese peace treaty telecasts (Vol. 7:36), mainly because so few shows are as yet scheduled to be piped via the new microwave links either westward beyond Omaha or eastward from the Pacific Coast.

Fact is no sponsor ordered circuits for official opening day Sept. 28, and only a few were booked for Sat. & Sun., Sept. 29-30 (Vol. 7:38).

Though 2000-mile "line haul" from Omaha to Los Angeles via San Francisco adds contract cost of only 10¢ per mile per half hour ($200), sponsors are slow to expand their network shows because of added station time costs for Salt Lake City, San Francisco, Los Angeles, San Diego, the only new cities made available; and, more particularly, because 3-hour time differential means top shows staged at 8 or 9 p.m. in East must be seen in West at not-so-favorable 5 or 6 p.m. PST.

But end-of-month is another landmark for TV. It marks recrudescence of set sales everywhere (see p. 11), and the beginning of "national service" coincides with World Series, football, and "at home" season's usual lineup of super-dooper shows.

As if to point up paralyzing effect of FCC's new-station freeze, this Sunday, Sept. 30, is third anniversary of that technically-induced stymie. Freeze intended to last mere few months, now looks like it will go well into its fifth year (1953) before any appreciable number of new stations can be had (Vol. 7:37).

But we get 108th station on Sept. 30, at least. It's day Atlanta's WLTV goes into regular operation, first since Sept. 30, 1950, when Nashville's WSM-TV went on air as last pre-freeze grantee to fulfill terms of construction permit.

That left only one CP outstanding -- for Atlanta Constitution's WCON-TV. That newspaper merged with Atlanta Journal, already operating WSB-TV, so one outlet had to be dropped. Deal with local purchasers got FCC approval (Vol. 7:38), WSB-TV to assume CP holder's Channel 2 and the new WLTV taking over WSB-TV's Channel 8.

WLTV thus is Atlanta's third, nation's 108th station -- unless you count as the 108th XELD-TV, Matamoros, Mexico, opposite Brownsville, Tex. (Vol. 7:31), which got under way a bit earlier and which to all intents and purposes is an American program outlet, covering U.S. audience, operating in traditional American pattern.

THEATRE OWNERS GIRD FOR CHALLENGE OF TV: Theatre owners have big plans for TV -- now convinced, much sooner than were the newspapers after radio hove onto the scene, that "if we can't lick 'em, we must join 'em."

First shock of TV's admitted inroads on boxoffice has been followed by calm resolution to "take the offensive" by way of:

(1) Better pictures -- promised by Hollywood, to draw TV owners out of their living rooms and into the theatres.

(2) Theatre TV -- entertainment and "stage show" features as well as sports and public events to bring to the movie show the timeliness and on-the-spot aspects

Copyright 1951 by Radio News Bureau

of the home TV set. (FCC, incidentally, this week postponed all-important hearing on theatre-TV frequencies from Nov. 26 to Feb. 25, 1952.)

(3) TV stations of their own -- theatre owners, as pillars of their local communities with their experience in "bringing visual entertainment to Main St.," to apply for local outlets.

(4) Use TV for promotion -- as potent ad medium to hypo theatre attendance.

* * * *

TV was omnipotent influence, primary topic of discussion, at this week's New York convention of powerful Theatre Owners of America. In the debates, speeches and reports, it was made clear that rank-and-file theatre owners don't intend to board up their houses and start selling TV sets along with candy, popcorn and soft drinks.

Their determination now is to hold the reins if and when electronics takes over the entertainment field. And importance they attach to TV was evidenced by the election of Mitchell Wolfson as TOA's new president. He's not only head of Florida's Wometco theatre chain but also owns WTVJ, Miami, one of the 3 (out of nation's 108) TV stations owned by theatre people -- others being Utica's WKTV and Chicago's WBKB.

Report of Wolfson's TV committee, officially adopted by convention, urged theatre owners to "embrace" TV, which was described as "just another way of doing what you have always been doing -- presenting live pictures for entertainment." Report stressed that "the 2 media can survive and prosper together," and strongly backed theatre ownership of telecasting stations and advertising of movies via TV.

* * * *

Theatre TV was perhaps liveliest topic at convention and trade show -- where displays by 4 manufacturers were among most popular exhibits. TV committee urged theatre owners to "take a long look at theatre TV, and adopt this splendid medium."

But theatre people realize they have tough public relations problem as result of agitation following exclusive theatre prizefights (Vol. 7:38). Convention delegates were told how to answer the accusations of irate set-owning sport fans.

"We're not taking anything away from anybody," is their argument. Instead, theatre TV is providing "added service" by presenting "events which the American people wouldn't otherwise see."

Discussion came on eve of latest in series of theatre-TV fight triumphs -- lightweight champion Sandy Saddler's massacre of Willie Pep, viewed by capacity crowds in 17 theatres in 13 cities Sept. 26.

But blackout of home TV-radio failed to hypo attendance at Polo Grounds bout. Scant 12,000 fans showed up -- far cry from crowd of more than 60,000 which filled same arena 2 weeks earlier for Robinson-Turpin match.

* * * *

Sporting events are only a starter for theatre TV, president Nathan Halpern of Theatre Network TV Inc. told convention. TNT's preoccupation with the boxing ring, he said, is only because sports are relatively easy to produce and most practical for present limited number of TV-equipped theatres.

TNT will test "various entertainment features" as soon as there are enough theatre installations to make it practical, Halpern promised. Trade press reports say Hollywood's Motion Picture Assn. is mulling proposal by TNT to pipe the annual Academy Award ceremonies to some 150 theatres next March.

Theatres which carried first 5 televised prizefights (up to and including Robinson-Turpin) are "near the break-even point," according to Halpern. Some, he added, actually made profit on fights. Combined theatre attendance for first 5 bouts was 142,616, out of combined capacity of 145,180 seats (Joe Louis-Jimmy Bivins bout being only poor drawing card), with estimated turn-away of 150,000 fans or more.

Some 28 theatres in 17 cities are now TV-equipped, Halpern said, and manufacturers report about 200 firm orders. [For details about theatre-TV equipment, prices, manufacturers, etc., see p. 10.]

* * * *

This formula for theatre-TV success was postulated by TOA board chairman Charles P. Skouras, president of Los Angeles' National Theatres chain: (1) Theatre-

TV proponents must produce own shows, sponsor own sports, etc. (2) All theatre telecasts must be in color. (3) Theatre TV must be regularly scheduled event, and should supplement films in same manner as stage shows and vaudeville.

RCA will show 9x12-ft. color theatre TV in New York soon (see p. 8).

MORE MAGIC ON ELECTRONICS HORIZON: RCA has 3 intriguing new electronics projects among its goals for next 5 years -- 2 in TV, one in home appliance field -- set up by chairman David Sarnoff as he celebrated his 45th year in radio.

Gen. Sarnoff offered the "challenges" to his scientists, engineers and executives during Sept. 27 ceremonies at RCA Princeton Laboratories, rechristened the "David Sarnoff Research Center." The projects:

(1) "Magnalux" -- an amplifier of light. "A true photo-amplifier that could produce bigger and brighter pictures in fine detail would greatly advance TV in the home. It is also needed for theatres and industrial purposes. The presently known optical systems cannot accomplish it. We can, of course, enlarge pictures optically, but in the process light is lost and the pictures become dimmer."

(2) "Videograph" -- TV tape recorder. "Today when a TV program is recorded, the pictures pass from the camera through a major portion of the TV system and first reproduce the picture on the face of a kinescope. Another and special camera placed in front of the kinescope photographs the program on motion picture film. But that technique is costly, time-consuming and limited. The pictures pass through all the possible hazards of the TV system, and then through all the photographic process with its possible degradations...The Videograph would be a new instrument that could reproduce TV programs from tape at any time, in the home or elsewhere, in much the same way as the present phonograph reproduces music..."

(3) "Electronair" -- home air-conditioner. "You have succeeded in throwing away the spinning wheels in TV, and I am sure you will also succeed in discarding the wheels and noise in air-conditioners."

Perfection of these devices would be unquestionable boon. TV industry has been chipping away at first 2 with little success -- early TV's complex magnifying mirrors and lenses for projection pictures having proved a commercial bust. Problem of tape recorder is how to get away from conventional techniques which would require tapes of tremendous widths traveling at fantastic speeds.

An electronic air-conditioner could conceivably give RCA edge in field it entered just this week, after moving towards it for some time under president Frank Folsom, whose forte is merchandising (Vol. 7:27). Through arrangement with Fedders-Quigan Corp., Buffalo, it will offer "RCA Victor" brand air-conditioners beginning January, 1952. Yet unpriced, they'll be window-type, 1/3, 1/2 & 3/4 hp.

Though Gen. Sarnoff mentioned no other home appliance projects in speech, engineers may well come up with host of imaginable new devices -- such as electronic refrigerators, cook stoves, furnaces, etc.

Gen. Sarnoff was also fascinated by electronics in solids -- semi-conductors such as germanium -- now finding exciting employment in the transistor (see p. 4). He anticipated wedding of atomic and electronic sciences: "Your brother scientists working in nuclear physics in our Laboratories have successfully derived electrical voltages from radioactive materials. This achievement -- still in its initial stages -- holds tremendous promise for the future."

Essentiality of electronics to the military was epitomized by Sarnoff's statement that RCA's 4000-tube electronic computer "Typhoon" has saved Govt. $250,-000,000 and years of time by simulating nearly 1000 test runs of guided missiles in last 10 months -- "before the missiles were actually built and flown."

Note: Exactly 45 years ago, Sept. 30, 1906, immigrant boy Sarnoff went to work as messenger for Marconi Wireless. This week, President Truman was among those who sent congratulations "on your 45 years of great achievements in the field of radio, television and electronics." The President's wire continued: "Through your leadership in American industrial life and in science you have contributed immensely to the growth of America and its pre-eminence in communications...I extend to you and your staff of scientists my warm good wishes for continued progress."

TRANSISTOR'S POTENTIAL FOR TV-RADIO? The tiny transistor has titillated imaginations of electronics engineers ever since Bell Labs announced its development 3 years ago -- but prospects of its direct use in TV & radio receivers seem slim for some time.

Yet the amazing substitute for the vacuum tube could find TV-radio use sooner than most think. Says Dr. Ralph Bown, Bell Labs research director: "It now operates at video frequencies. I wouldn't say it won't be used for TV, not at all."

Transistor's potential in electronics seems breath-taking, but TV manufacturers aren't holding their breaths over it. Everyone's excited about it, but most common expression heard is: "It's where vacuum tubes were 20 years ago." And many set makers remember how the great hopes for printed circuits in TV failed to materialize (Vol. 2:46). Printed circuits have scarcely been used in TV sets.

Transistor is a tiny speck of germanium touched by 2 or 3 "catwhisker" wires and imbedded in bead of plastic. It can replace tubes for number of purposes.

August Scientific American gives glowing report on device by Prof. Louis H. Ridenour, dean of U of Illinois' graduate school, currently on leave as chief scientist of Air Force. Conservative Bell Labs finds article a little too glowing, but here are advantages over conventional vacuum tubes cited by Prof. Ridenour:

(1) Power requirements: It may use one-millionth the power required by tube for same job. (2) Size: 2/1000-cu. in., compared with ⅛-cu. in. for the smallest subminiature tube. (3) Reliability: Theoretically, its life should be indefinite; early transistors have run 70,000 hours, several times as long as many vacuum tubes. (4) Lack of heat: Transistor produces almost none. (5) Resistance to shock and acceleration: Being solid unit, transistor stands tremendous impact.

Electronic devices just begging for those characteristics are innumerable: undersea & underground cables with built-in amplifiers which need never be touched; tiny, trouble-free airborne transmitter-receivers; almost infallible new proximity fuses; computers with hundred-times present complexity and a fraction of present breakdowns; and whole communications systems with negligible maintenance problems. Electronics editor Donald Fink envisions hearing aid with entire unit, battery and all, completely concealed in ear -- with battery life increased many fold.

Advantages for TV sets are obvious: smaller, lighter, cheaper, more reliable. And, because of low power drain, truly portable battery set may be near.

Asked if shortage of nickel for tubes might not hasten wider use of transistors, Dr. Bown said: "There are so many forces hastening it now that I don't think that would make any difference." Is supply of germanium adequate? "I know of no shortage in sight," he said. Eagle-Picher Co. produces almost all germanium, as zinc byproduct. Though cost seems very high, 37¢ a gram, speck needed in each transistor is so small that its cost is estimated at 5¢ per transistor. Germanium production in 1951 is estimated at 5-6000 lbs., with 15,000-lb. potential in all-out emergency. NPA says there's no shortage, but no surplus, either. Germanium is listed under materials "in approximate balance with essential demand."

Personal Notes: FCC Comr. Rosel Hyde due back Oct. 6 from vacation in home state of Idaho . . . Leslie Harris, NBC radio program director, joins Colgate-Palmolive-Peet Oct. 15 as director of TV-radio . . . Tom McAvity, ex-Famous Artists, recently CBS, named NBC-TV director of talent-program procurement, succeeding Carl M. Stanton, now director of commercial program planning . . . William B. Lewis, onetime CBS program v.p., wartime radio chief of OWI, elected president, Kenyon & Eckhardt, succeeding Dwight Mills, chairman . . . Louis Ames named program mgr., WPIX, New York, succeeding Warren Wade, resigned; Jack F. A. Flynn named administrative asst. to Ames . . . Van Beuren W. deVries promoted to mgr. of TV production, WMAL-TV, Washington . . . D. L. Provost named v.p. & director, Hearst Radio Inc., succeeding late Tom A. Brooks . . . C. Richard Evans, mgr. of KSL & KSL-TV, Salt Lake City, elected v.p. under executive v.p. Ivor Sharp . . . Robert B. Hanna, mgr. of WGY & WRGB, Schenectady, elected president of local Chamber of Commerce . . . Jack Hill named program-production mgr., WWJ-TV, Detroit, Kirk Knight being promoted to operations mgr. for TV-radio . . . Robert Brunton, ex-NBC, named gen. mgr., P. J. Rotondo Construction Co., designers-builders of TV and stage scenery . . . William G. Tice Jr., ex-American Metals Co., joins NBC Oct. 1 as mgr. of personnel, replacing Theodore M. Thompson, recalled to Army duty . . . Harry R. Lubcke, ex-Don Lee TV chief, announces consulting practice in TV engineering and electronics, 2443 Creston Way, Los Angeles . . . Andrew P. Jaeger, DuMont Network film director, has resigned to become v.p. & gen. mgr., Prockter Syndications International, headed by Paul White and organized to syndicate TV-radio and theatrical film shows.

———■———

San Francisco schools expect no absenteeism during World Series next week, reports AP, for Supt. Herbert Clish has ordered TV sets placed in classrooms and turned on for games.

Count of TV Sets-in-Use by Cities

As of September 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

ONLY some 716,600 TV sets-in-use in 10 areas with 13 stations were still outside the reach of network service when transcontinental relay circuits were first used in early September for coverage of Japanese treaty conference (Vol. 7:36). Though regular day-by-day 2-way transcontinental service didn't start until this week end (Sept. 29), listing below of sets-in-use includes Salt Lake City, San Francisco, Los Angeles, San Diego in "interconnected" table for sake of convenience.

As of Sept. 1, according to NBC Research's monthly "census", total sets-in-use reached 13,556,000, of which 12,839,400 in 52 areas (counting St. Paul-Minneapolis as one) are within network scope.

Sept. 1 figure is 284,300 more than the 13,271,700 of Aug. 1 (Vol. 7:35), which was only 183,100 above July 1 (Vol. 7:29), which was 319,300 above June 1 (Vol. 7:25)—indicating low summer ebb in set sales is gone and resumption of the rise, though not very great yet, began in August. September additions, not compiled until toward end of October, are expected to show bigger increases—very likely will bring national total near 14,000,000.

Increases even in the big cities during August weren't very startling: New York gained 35,000, San Francisco 23,000 (possibly in anticipation of peace conference), Chicago 18,000, Boston 12,000, Los Angeles 9000, Detroit 8000. These are the Sept. 1 figures by areas (consult individual stations for their estimates of number of families within respective service ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	62,900
Atlanta	3*	126,000
Baltimore	3	314,000
Binghamton	1	42,000
Birmingham	2	63,400
Bloomington, Ind.	1	17,400
Boston	2	766,000
Buffalo	1	214,000
Charlotte	1	86,400
Chicago	4	960,000
Cincinnati	3	269,000
Cleveland	3	494,000
Columbus	3	156,000
Davenport-Rock Island	2	62,300
Dayton	2	136,000
Detroit	3	534,000
Erie	1	51,500
Grand Rapids	1	79,600
Greensboro	1	73,900
Huntington	1	50,600
Indianapolis	1	154,000
Jacksonville	1	38,800
Johnstown	1	107,000
Kalamazoo	1	44,500
Kansas City	1	133,000
Lancaster	1	109,000
Lansing	1	60,000
Los Angeles	7	1,012,000
Louisville	2	97,500
Memphis	1	93,200
Milwaukee	1	258,000
Minneapolis-St. Paul	2	273,000
Nashville	1	37,000
New Haven	1	177,000
New York	7	2,490,000
Norfolk	1	75,300
Omaha	2	82,700
Philadelphia	3	883,000
Pittsburgh	1	312,000
Providence	1	162,000
Richmond	1	87,100
Rochester	1	88,100
Salt Lake City	2	51,500
San Diego	1	105,000
San Francisco	3	233,000
Schenectady	1	166,000
St. Louis	1	306,000
Syracuse	2	129,000
Toledo	1	107,000
Utica	1	50,000
Washington	4	281,000
Wilmington	1	77,700
Total Interconnected	95	12,839,400
Non-Interconnected Cities		
Albuquerque	1	9,600
Dallas	2	130,000
Fort Worth	1	
Houston	1	88,400
Miami	1	76,000
New Orleans	1	61,200
Oklahoma City	1	92,300
Phoenix	1	38,600
San Antonio	2	50,400
Seattle	1	92,600
Tulsa	1	77,500
Total Non-Interconnected	13	716,600
Total Interconnected and Non-Interconnected	108	13,556,000

* Third Atlanta station, WLTV, goes on air as of Sept. 30 (see story this issue).

Note: TV sets sold in Canada totaled 58,216 up to July 31, 1951, according to Canadian RTMA (Vol. 7:37). Since Canada has no stations of its own and nearly all of these sets are in border areas, they add appreciably to audiences of stations in nearby U. S. cities. The CRTMA area count as of last July 31; Windsor, 24,768; Toronto-Hamilton, 20,712; Niagara Peninsula, 9644; other areas, 3092.

■

Nielsen gives President Truman's speech at Japanese treaty conference in San Francisco Sept. 4, carried by 94 stations in 52 of nation's 62 TV areas and thus available to 94.7% of audience, a rating of 50.5% or 6,348,000 homes.

Network TV-Radio Billings

August 1951 and January-August 1951

(For July report, see *Television Digest*, Vol. 7:34)

NETWORK TV billings didn't quite catch up to network radio billings in August, despite prediction from NBC sources that they would (Vol. 7:36)—but there's little doubt about trend. August TV gross billings of combined networks totaled $9,302,071, as against not quite $9,000,000 in July (Vol. 7:34) and more than quadruple figure for August 1950. For 8 months Jan.-thru-Aug., total was $73,459,488.

Network radio billings totalled $11,804,161 in August, slightly ahead of July but down from $12,558,825 in August 1950. Cumulative network radio for first 8 months was $119,051,340 vs. $121,790,724 for same 1950 period. NBC & CBS showed increases over July, and only MBS showed increases over August 1950.

The Publishers Information Bureau figures:

NETWORK TELEVISION

	August 1951	August 1950	Jan.-Aug. 1951	Jan.-Aug. 1950
CBS	$ 3,734,551	$ 354,524	$ 24,238,538	$ 5,339,826
NBC	3,359,856	1,242,276	33,577,340	9,684,755
ABC	1,444,593	265,421	11,174,614	2,402,902
DuMont	763,071	*	4,468,996	*
Total	$ 9,302,071	$ 1,862,221	$ 73,459,488	$ 17,427,483

NETWORK RADIO

CBS	$ 4,455,528	$ 4,644,066	$ 48,106,085	$ 45,218,878
NBC	3,808,906	4,566,293	37,537,629	41,931,767
ABC	2,210,352	2,258,244	21,870,502	23,999,013
MBS	1,329,375	1,090,222	11,537,124	10,641,066
Total	$11,804,161	$12,558,825	$119,051,340	$121,790,724

* Figures for 1950 not available.

* * * *

Following are network TV and radio figures for January thru July, asterisks indicating revisions from previously reported PIB figures:

NETWORK TELEVISION

1951	ABC	CBS	DuM	NBC	Total
Jan.	$1,328,719*	$2,601,165*	$ 435,527	$4,187,222	$ 8,552,633
Feb.	1,254,851	2,600,339	406,079	3,949,360	8,210,629
March	1,539,470*	2,993,902	457,811	4,654,063*	9,645,246
April	1,432,319*	2,906,891*	574,025	4,758,309	9,671,544
May	1,385,901	3,066,249	622,646*	4,946,338	10,021,134
June	1,437,593*	2,900,782	564,478	4,244,240	9,147,093
July	1,351,168*	3,434,659	645,359	3,477,952*	8,909,138

NETWORK RADIO

1951	ABC	CBS	MBS	NBC	Total
Jan.	$3,099,418*	$6,849,462*	$1,542,887	$5,215,947	$16,707,714
Feb.	2,702,721*	6,111,346*	1,426,705	4,731,626	14,972,398
March	2,891,339	6,808,938*	1,648,006	5,085,636	16,433,919
April	2,930,183*	6,502,009*	1,539,801	4,897,882	15,919,875
May	2,996,143*	6,760,750*	1,510,818	5,329,752	16,597,463
June	2,720,268	6,216,255*	1,191,691	4,739,193	14,867,407
July	2,270,078*	4,401,797	1,347,841	3,728,687*	11,748,403

Note: These figures do not represent actual revenues to the networks, which do not supply them. They're compiled by PIB on basis of one-time network rates, or before frequency or cash discounts. Therefore, in terms of dollars actually paid to networks they may be inflated by as much as 40%. Figures are accepted by networks themselves, however, and by the industry generally, as a satisfactory index of comparisons and trends.

■

Salary stabilization in telecasting and other entertainment fields will be discussed in closed conferences beginning Oct. 22 in New York by Salary Stabilization Board's 3-man talent committee (Vol. 7:35). The committee—Roy F. Hendrickson, chairman, Philip F. Siff, Neal Agnew—wants witnesses to offer ideas on how entertainers' pay may be stabilized on self-administering basis. Those who want to testify should apply to Joseph D. Cooper, executive director, SSB, room 1042, Federal Security Bldg. South, Washington 25.

NBC-TV now syndicating to stations daily 7½-min. newsreel on 16mm film, also weekly sportsreel, both fully scored with words and sound—thus going into direct competition with recent UP-20th Century-Fox and INS newsreel services. Service is headed by Francis C. McCall, director of TV news and special events.

Network Accounts: Curtis Publishing Co. *(Saturday Evening Post, Ladies Home Journal, Holiday)* Oct. 9 begins Martha Rountree-Larry Spivak *(Meet the Press)* show titled *Keep Posted* on DuMont, Tue. 8:30-9, thru BBDO . . . Penick & Ford (My-T-Fine desserts) and Corn Products Refining Co. (Mazola oil, Karo syrup, Niagara starch) sign for Thu. 12-12:15 and 12:15-12:30 segments, respectively, of *Ruth Lyons 50 Club* on NBC-TV, new Mon.-thru-Fri. show starting Oct. 1; agencies are BBDO and C. L. Miller, respectively . . . Rhodes Pharmacal Co. (pharmaceutical products) starts *The Clock* Oct. 17 on ABC-TV, Wed. 9:30-10, thru O'Neil, Larson & McMahon, Chicago . . . Procter & Gamble (Ivory Snow, Tide, Prell) starts *Red Skelton Show* from Hollywood Sept. 30 on coast-to-coast NBC-TV, Sun. 10-10:30, thru Benton & Bowles . . . Manhattan Soap Co. (Sweetheart soap) shares alt. week sponsorship with Miles Laboratories (Alka-Seltzer) of *One Man's Family* resuming Sept. 22 on NBC-TV, Sat. 7:30-8; agency for Manhattan is new Scheideler, Beck & Werner Inc., N. Y., for Miles it's Wade Adv., Chicago . . . Billy Graham Evangelistic Assn. Inc. will sponsor *Hour of Decision* starting Sept. 30 on ABC-TV, Sun. 10-10:30, thru Walter F. Bennett & Co., Chicago . . . Drugstore TV Productions replaces *Cavalcade of Bands* with *Cosmopolitan Theatre* Oct. 2 on DuMont, Tue. 9-10, thru Product Adv. Corp., N. Y. . . . Bristol-Myers (Ipana) on Oct. 6 starts sponsorship of 11-11:15 segment of *Foodini the Great* on ABC-TV, Sat. 11-11:30 a.m. . . . Chesterfield's sponsorship of *Bob Hope* starts Oct. 14, rotating with other comics on NBC-TV, Sun. 7-7:30.

Station Accounts: Republic Aviation buys 39 one-min. announcements on WABD, New York, to recruit factory personnel, thru Deutsch & Shea, N. Y. . . . Riggs-Warfield-Rolonson Inc., Baltimore insurance firm, sponsoring *Planning for Tomorrow* on WAAM, Tue. 7:15-7:30 p.m., presenting community leaders with college students discussing careers . . . Wildroot (hair oil) sponsoring Los Angeles' first regular female disc jockey, Candy McDowell, in *Musical Nightcap* on KTSL, Tue. & Thu. 11-11:15 p.m., thru BBDO . . . Graybar Electric Co., for Gibson refrigerators, sponsoring Wed. & Fri. *Billie Burke—at Home* on KTTV, Los Angeles, thru Roy S. Durstine Inc. . . . Gaylord Co. (bobby pins) sponsoring *Eva Gabor* on WJZ-TV, Thu. 7:15-7:30, thru Herschel Z. Deutsch . . . Canada Dry buys *Dining Out with Dana* (Robert W. Dana, restaurant editor, *N. Y. World-Telegram*) on WJZ-TV, alt. Tue. 7:15-7:30 . . . Ideal Novelty & Toy Corp. (dolls), thru Atlantic Adv., and Standard Brands (Royal desserts), thru Ted Bates & Co., have purchased partic. in *Magic Cottage* on WABD, Mon.-thru-Fri. 6:30-7 . . . Borden Co., already sponsoring *T-Men in Action* on NBC-TV for its instant coffee, reported planning spot TV, thru Doherty, Clifford & Shenfield, and dropping many local radio shows . . . Stroh Brewing Co.'s sponsoring of 35 Red Wings hockey games on WWJ-TV, Detroit, ran into schedule snag, so only third and final periods will be covered, timed to start 10 p.m., or after network signoffs . . . Market Tire Co. (Fisk tires) on WWJ-TV, Detroit, first local sponsor announced for *Football This Week*, weekly predictions and films by Norman Sper which Station Distributors Inc. reports it has sold to 16 stations . . . Amoco again sponsoring 6 Washington Redskins home games on WMAL-TV . . . Melville Shoe Co. (Thom McAn shoes) sponsoring football highlights films on WPIX, New York . . . Minnesota Mining & Mfg. Co. (Scotch tape) buys Paul Jones' *Football Previews* on WLWT, Cincinnati, 15-min. before each Sat. NCAA game, thru BBDO, Minneapolis . . . Among other advertisers reported using or planning to use TV: Thornton Canning Co. (Lido tomato paste), thru Roy S. Durstine, N. Y.; Norwich Pharmacal Co. (Tcek cherry flavored cough syrup), thru Benton & Bowles, N. Y.; Squire Dingee Co. (Ma Brown preserves), thru L. W. Ramsey Co., Chicago; Proctor Electric Co. (appliances), thru John Falkner Arndt & Co., Philadelphia; Doeskin Products Inc. (tissues, napkins), thru Federal Adv., N. Y.; J. C. Penney Co. (chain department stores), thru Roy S. Durstine Inc., N. Y.; Universal Co., High Point, N. C. (TV tables & bases), thru Corbin Adv., N. Y.; Diamond State Brewery, Wilmington, Del., thru J. Robert Mendte Inc., Philadelphia; Englander Co. (mattresses & foundations), thru Leo Burnett Co., N. Y. (WNBQ); Reddi-Wip Inc. (whipped cream), thru Ruthrauff & Ryan, Chicago; C. B. Drug Co. (C. B. insect spray, aspirin), thru Walter Klein Co., Charlotte.

Back into radio after plunges into TV, national advertisers are seeking "media balance," reports Sept. 24 *Sponsor*. It cites Quaker Oats and Hudson Pulp & Paper Co. as examples. Quaker dropped 4 AM shows last October in favor of 4 TV shows, this season is keeping latter (at estimated $2,500,000) but "balancing" with $1,500,000 worth of radio. Hudson in fall of 1950 was spending 80% of $600,000 ad budget on spot radio, rest in newspapers; in January, it pulled out of most radio stations and newspapers in favor of CBS-TV *Bride & Groom*. Last spring, after promotion over 7 remaining radio stations pulled 400,000 replies in day, Hudson reconsidered, upped budget to $750,000 to include pre-TV spot radio schedule plus TV show. Said Quaker public relations director Charles White: "We haven't lost faith in radio. It's just that we started last year diverting radio money into TV to . . . exploit TV's terrific impact. But currently we've seemingly reached our saturation point in TV spending, and are ploughing into radio again. We think that radio and TV are both good selling media."

March of Time reports these additional sponsors for *Crusade in the Pacific* to those listed in Vol. 7:34: WICU, Erie, & WJAC-TV, Johnstown, Pennsylvania Electric Co.; WJZ-TV, New York, & KECA-TV, Los Angeles, Quality Importers Inc. (Welch's Wine); WHAM-TV, Rochester, Stromberg-Carlson; WBEN-TV, Buffalo, Marine Midland Bank. In addition to 4 stations it previously bought, Miller Brewing Co. (Miller's High Life) is sponsoring *Crusade* on WAGA-TV, Atlanta; WBTV, Charlotte; WFAA-TV, Dallas; WFMY-TV, Greensboro; KMTV, Omaha; KPHO-TV, Phoenix; WHBF-TV, Rock Island; WOAI-TV, San Antonio; KFMB-TV, San Diego. Sold to station, no sponsor yet reported: KGO-TV, San Francisco; KSL-TV, Salt Lake City; WDAF-TV, Kansas City; WJIM-TV, Lansing; WFBM-TV, Indianapolis; WAFM-TV, Birmingham.

Kine-recordings of top network shows are already going out to U. S. armed forces, edited to eliminate commercials. All networks are supplying the 16mm film prints, first of which was American Tobacco Co.'s *Assignment Manhunt*—NBC-TV's Frank Lepore, mgr. of TV film & kinescope operations, on Sept. 14 presenting 50 prints of 3 programs. Other shows to be provided: *Milton Berle's Star Theatre, Your Hit Parade, Faye Emerson's Wonderful Town, Paul Whiteman Revue, Amateur Hour, Amos 'n' Andy, Roberta Quinlan Show, Hollywood Screen Test, Suspense, Man Against Crime, Date with Judy, Blind Date.*

Rates are still going up in publication field, too. *Time*, which on Sept. 10 raised black-&-white page rate from $6200 to $6750, has ordered another hike—to $7350 as of Feb. 2, 1952, which *Tide* says "may well herald a second round of magazine rate increases." *Life* raises rates approximately 6% with issue of March 3, 1952, this coming in wake of 8% boost effective this Sept. 10. *Newsweek* has stated it will increase rates 5-6% from July 7, 1952. And September *Fortune*, reporting declining newspaper profits, higher costs of newsprint, says survival of large daily newspapers depends on "sharply higher" ad rates.

Telecasting Notes: Kate Smith now ties Arthur Godfrey as top "commercial personality" on TV-radio networks, says *Variety;* she represents $12,000,000 in time-talent billings on NBC, her Wed. night TV show alone (opposite Godfrey's on CBS-TV) accounting for $4,000,000. *Variety* doesn't take into account her local participating show on WNBC (radio), Mon.-thru-Fri. 12:05-12:45, which would put her ahead of Godfrey, who's scheduled to add to his revenue when part of his morning radio show is simulcast starting in mid-October . . . **Rumors that** Walter Winchell was leaving ABC were countered by weekend announcement he has signed lifetime contract with that network covering TV-radio, continuing with Warner-Hudnut Inc. as sponsor; he's now said to be highest-paid figure in the field, getting reported $500,000 from sponsor plus 7500 shares of stock vs. $650,000 last year . . . **Louis G.** Cowan has signed *Quiz Kids* with CBS for 10 years for reported total $2,500,000 if sponsored, half if sustaining . . . **CBS has leased** Monroe Theatre, 76th & First Ave., for 5 years; it will be known as TV Studio 61, its stage area of 8100 sq. ft. making it network's largest New York studio . . . **New York's WJZ-TV** (ABC) begins Mon.-thru-Fri. program day at 9:30 a.m. as of Oct. 1 with *Ladies Daily,* Walter Herlihy's "magazine of the air," followed 9:45-10:45 with *Breakfast Theatre,* full-length Hollywood movies; rest of early schedule is *Kitchen Kapers,* 10:45-11:30; *Dennis James Show,* 11:30-noon; *Frances Langford-Don Ameche Show,* 12-1 . . . **Louisville Courier-Journal's** WHAS-TV bills itself as "nation's most powerful TV station" since recent boost to 50 kw (Vol. 7:34), is placing newspaper ads in fringe areas to promote sale of receivers; ad in *Lexington Herald-Leader* (68 mi.) urges U of Kentucky students there to tune in films of its Sat. grid games at 4 p.m. . . . Los Angeles TV stations scored heavily with audience last week in carrying "little Kefauver hearings" as House Un-American Activities Committee probed communism in Hollywood; though turned down at first by committee, TV enterprisers finally got permission to have cameras in hearing room on pool basis, piped pickups to 5 of city's stations (all save KNBH & KLAC-TV) . . . Big opening night for *Family Theatre,* nightly at 11:10 on hookup of WLWT-WLWD-WLWC, to be celebrated in Cincinnati Oct. 1 with Burgess Meredith present for first of first-run pictures to be offered, *Story of G.I. Joe,* in which he played role of Ernie Pyle . . . Underwritten as educational TV project by Alfred P. Sloan Foundation, NBC-TV's *American Inventory* series starts second 13-week cycle Sept. 30 (Sun. 1:30 p.m.) with GE's Dr. Vincent Schaefer on "The Control of Climate" . . . Gillette has agreed with Advertising Council to include one national welfare message in each of its sponsored World Series telecasts (NBC-TV) and broadcasts (MBS), copy by Maxon Inc. . . . WTVJ, Miami, plans an Electronics Museum at base of projected new 500-ft. TV tower to be built on grounds of owner Wometco Theatres' Boulevard Drive-In Theater; trailers in 31 Wometco theatres will invite public to visit facilities . . . King Brothers, big producer of westerns on Monogram lot, reported by *Billboard* to be preparing to make 30-min. TV films with shift of activities shortly to Goldwyn studios . . . Charlotte's WBTV begins local originations as of Sept. 30, including news, weather, sports, homemaking, man-in-the-street shows. WBT theater studio on ground floor of Wilder Bldg. has been rebuilt for TV . . . **WPTZ, Philadelphia,** Oct. 1 raises base hour rate from $1000 to $1500, one-min. from $200 to $300, changes Class A time to 7:30-10:30 p.m. daily except Sun. (7-10:30).

BRITISH ARE GETTING "TV fever," what with TV receivers dominating Aug. 29-Sept. 8 National Radio Show and advent of new stations soon doubling number of people within range of TV.

According to various reports, including one we've received from Marvin Hobbs, electronics advisor to Munitions Board chairman John Small, demand for sets has already caused rationing by manufacturers. During recent flying trip, Mr. Hobbs talked to number of top manufacturers, found their biggest complaint to be that 66⅔% tax on wholesale price keeps them from vastly broadening mass market. Since many set makers build single-channel receivers, they can make 9-in. to sell as low as $100 without tax.

Last govt. report showed 897,000 sets as of June 30, with 71,400 of them sold during previous 2 months.

Manchester outlet, with 40-kw transmitter (51.75 mc video carrier), has been testing during summer, getting greater-than-expected coverage from 750-ft. tower on ground 1750 ft. above sea level; official opening is Oct. 12. Next station due is Scottish outlet at Kirk o'Shotts in Lanarkshire (56.75 mc), scheduled for end-of-year opening. Wenvoe transmitter in Glamorgan (66.75 mc), to serve West England and Wales, is expected to start mid-1952. All 3 use 40-50 kw transmitters, but ERPs aren't indicated. Five smaller stations were planned, but defense demands have delayed construction indefinitely—in Aberdeen, Belfast, Newcastle-on-Tyne, Plymouth, Southampton.

Currently, some 18,000,000 people are in range of operating London (45 mc) and Birmingham (61.75 mc) stations. Three new transmitters should increase number to 30-35,000,000. All stations are being linked with London via coaxial and microwave.

Most common set displayed at Show was 12-in., with price-range $130-$200, excluding tax. Trend is toward more 5-channel sets, rather than single-channel, 15 & 16-in. tubes, aluminized. Most are TV-only, with console combinations still extremely rare. Projections got fair play, with dozen manufacturers showing them. One 17-in. and one 21-in. were displayed.

Particularly interesting to Americans was "spot-wobble" included in 15-in. set by E. K. Cole Ltd. Oscillator moves spot up and down slightly as it crosses tube face. This removes prominence of lines. BBC developed it originally to simplify kine-recording. So many U. S. engineers are intrigued by it that they wouldn't be surprised if some American manufacturer is readying it for market.

British manufacturers, says Mr. Hobbs, claim they've never miscalculated TV supply-demand as we have. They're also making tremendous effort to cover foreign markets, including Latin America, even though such countries are employing 525 and 625-line standards, as opposed to Britain's 405-line. Foreign orders for radio-TV received during show totaled $59,000,000. Biggest TV order was $700,000 worth from Bogota, Colombia. Other TV orders came from Argentina, Brazil, Holland, Germany, Canada.

Color impact was negligible, none being demonstrated at show. BBC says it wants much more study and testing first. Number of manufacturers frown on CBS system because of low resolution (British use 5-mc channels) and other performance factors as well as incompatibility.

Transatlantic TV? In 1928? *London Daily Mail* TV handbook quotes *New York Times'* report of event Feb. 9, 1928: "Baird was the first to achieve television at all over any distance, now . . . the first to . . . flash it across the ocean . . . for American eyes." Of course, system was mechanical, 30-line, sent on low frequencies. Handbook also reports that on July 3, 1928, Baird "demonstrated a colour picture of a kind, and was also experimenting with stereoscopic television, although without any very great success."

COLOR REPORT:

CBS Sets and Grid Schedule—RCA Washington Showings—Paramount's Lawrence Tube

IF CBS BECOMES a major set maker, as result of whole color business, it will have achieved more than it possibly could have hoped for in merely getting its color system adopted. This week, in its distributor showings and ads, it's more apparent than ever that CBS is out to sell sets—black-&-white sets. If a color market grows, it will be gravy.

CBS's main merchandising pitch, it turns out, is exactly same as that of Admiral, Motorola, et al., advertising "add color at any time"—no more "wait for color," a la Arthur Godfrey. Full-page ad in Sept. 28 *New York Times* headlines "CBS-Columbia Color Convertibles." These "convertibles" are black-&-white receivers.

"Traffic builder" is what CBS-Columbia's single color set yet offered is being called by dealers, number of whom are ordering the 10-in. (magnified) color-monochrome sets for display, inviting orders. It lists at $499.95, plus tax, warranty and installation.

New York's big Davega chain (40-odd stores) has 6 sets, heralds them with full-page ad playing up CBS's color football schedule beginning Sept. 29. Davega manager Jules Smith, who castigated CBS and FCC after he'd seen RCA's pictures (Vol. 7:37), puts situation thus:

"It may hurt our other business, but you can't stop progress. We'll run more ads, not full-page. I doubt whether we'll sell very many—at that price, $500. If someone bought one now, we probably wouldn't be able to deliver for a couple weeks."

CBS is reported paying for all or part of the ads. It's also understood to have dropped plans for "slick" magazine ads, concentrating on newspapers in colorcasting areas.

CBS-Columbia sales manager Richard Payne, during Washington distributor's showing this week, carefully emphasized that "black-&-white is not passé, not dead in any respect." All CBS-Columbia sets, beginning Oct. 1, he said, will have built-in adapters, though no such models were among those displayed this week.

Payne is banking on CBS brand name and prestige, plus "pioneer in color," to move whole line. This promotion is apparently producing some returns. Davega's Smith says he has ordered CBS-Columbia black-&-white sets though he didn't carry them (Air King) before.

As for color, Payne feels that CBS-Columbia has head start; that tri-color tube is 3 years away, costing $280 to make as of now; that "we're as far along with a tube [at Hytron] as anyone in the business." He reports color orders way ahead of production.

Color's value as traffic builder was also cited by George Wasserman, owner of George's, Washington chain, who is ordering one set per store. He expects few sales, because of price and because "people will want big tubes."

* * * *

Quality of color we saw at distributor Kaufmann-Washington's showings was considerably below CBS's best. Contrast control wasn't working at one demonstration and picture appeared washed out. Resolution seemed much lower than earlier CBS pictures.

Novel method of getting black-&-white on the color set involves 2 discs. Each disc is half transparent, other half comprising 3 color segments. When color is shown, discs revolve while locked in position with color segments of one disc overlapping transparent portion of other. When black-&-white is on, discs stop with both transparent halves in front of tube.

Work on 14-in disc set, larger drum sets, color slave and $400 color-monochrome set was described by CBS-Columbia engineer. Latter 2 are promised in month or so. President David Cogan says no more production figures will be released. Recently, he reported 30-a-day color production, with expectation of reaching 300 daily.

A lot of old Air King sets are yet to be moved, apparently. Most of CBS-Columbia line has Air King escutcheon, with "CBS-Columbia" decals underneath.

* * * *

We checked with each of the 11 stations CBS reports will carry its 9-game color football schedule starting Sept. 29. Their responses:

WCBS-TV, New York—Carrying all games and daily color programs. WTOP-TV, Washington, and WMAR-TV, Baltimore—Feeding games closed-circuit to large rooms for public viewing, none on air; continuing 10:30-11 a.m. daily color shows. WNAC-TV, Boston—Undecided about football, continuing 10:30-11 daily. WCAU-TV, Philadelphia—Carrying all games, plans no other color. WEWS, Cleveland—Telecasting "several" games, possibly all, no other shows in works. WHIO-TV, Dayton—No football, no other color. WKRC-TV, Cincinnati—Carrying Sept. 29 game only, nothing else. WBNS-TV, Columbus—Scheduling all games, no other color. WBKB, Chicago—Picking up all games after Sept. 29, nothing else. WJBK-TV, Detroit—Carrying "some" games, number undecided, hoping to start Oct. 13, no other color on tap.

Few station managers showed any enthusiasm for football schedule, particularly since color sets are almost non-existent and competitors will have strong NCAA football schedule from NBC-TV (Vol. 7:36). CBS has promised stations 5-10 color sets. Stations are nervous and dubious about whole thing, obviously looking over their shoulders at FCC. WJBK-TV and WEWS report they had to cancel $1000 in weekly billings to make room for color, producing disgruntled sponsors. WEWS is planning announcements and ads informing public that continuance of color beyond football schedule isn't guaranteed.

CBS hasn't yet corraled sponsor for games, is reported seeking to sell games individually, stressing promotional value.

* * * *

RCA's Washington showings, transmitted from New York via coaxial and microwave, will run Oct. 9-13 and Oct. 15-19. FCC is invited to attend at its convenience, no specific date. Invitation lists include Congress, cabinet, FTC, NPA, military, engineers, attorneys, distributors, dealers, civic leaders, etc. Shows will run 10 a.m. from WNBW, 2 & 4 p.m. closed-circuit.

RCA's promised theatre-TV color showing, on 9-by-12 ft. screen, will come in an undisclosed New York theatre within 2-3 weeks. RCA stresses theatre-TV color gear's compatibility with existing black-&-white equpiment, saying latter may be converted. To date, CBS has shown no big-screen color, though it reports work now going on in Zurich with Swiss-developed Eidophor system in conjunction with 20th Century-Fox, which has rights to Eidophor.

* * * *

Excitement over Lawrence tri-color tube (Vol. 7:38), shown in New York by Paramount Pictures last week, simmered down somewhat. Few industry experts have seen it yet, but most expect to soon. Those who have seen it generally have an attitude of "it's too early to tell." FCC's top engineering quadrumvirate—Plummer, Allen, Boese, Chapin—saw it Sept. 28. More conclusive evaluation probably awaits development of finished product, which Paramount says it will make in Stamford, Conn.

Same FCC engineers inspected RCA tri-color tube production processes in Lancaster Sept. 26, weren't given any

figures on output rate. One engineer said difference between black-&-white and color tube production struck him about same as "difference between making an Ingersoll watch and a fine Swiss job."

"RCA's tube gives just as good results as ours," Paramount's v.p. Paul Raibourn is quoted in *Variety*. "No one can expect to get better color than RCA's. However, there's a big economic difference between them. Ours is easy to make and theirs is extremely difficult."

Carried away with its story, Oct. 1 *Time* went off half-cocked: "If the new [Lawrence] tube lives up to its sweeping advance notices, the whole color fight may soon be over." *Time* forgets that the NTSC & RCA compatible system is yet to be resubmitted to FCC, that there's no knowing whether Commission will allow "dual standards" —commercialization of both CBS and compatible systems.

Better evalution was that of Oct. 1 *Newsweek*, which related how news of tube leaked from Inventor Lawrence to friend Wm. Laurence of *New York Times*. It reported that tube works but can stand improvement, and that others have tri-color tubes. It concludes: "The outlook for color was brighter last week, but the only fact that was definitely proved was the impact of a page 1 story in the *Times*."

* * * *

NTSC's field testing of compatible system is under way on several fronts, to apparent satisfaction of most manufacturers. No one knows how much time is needed, nor how and when FCC will be approached, but hopes are still expressed for windup about year's end.

Zenith, which is testing everyone's color, showed 2 color sets in New York this week—14-in. drum model and 10-in. disc unit. But Zenith's attitude is same as virtually everyone else's: "If the public wants them, we have them. But there doesn't seem to be any market." In fact, Zenith ran full-page ad in Sept. 23 *Philadelphia Inquirer* saying: "Color broadcasting, comparable with present black-&-white, is a number of years off [because] (1) the present methods are not perfected; (2) until there are millions of color TV receivers with screens as large as those in present demand, there is not sufficient audience to attract advertising; therefore, (3) programs will be restricted both as to number and quality . . ."

Epitomizing current attitude of manufacturers is opinion of H. L. Hoffman, the Los Angeles set maker, who has been more detached and less involved in color fight than most. After attending recent RTMA board meeting (Vol. 7:38) and seeing RCA's latest pictures, he writes:

"I was very much impressed with the technical progress that RCA has made. I was also apprised of the progress the NTSC has made. It appears quite clearly to me that we now have the technical answers that we did not have at the time of the FCC hearings, that we have a system in the NTSC that will best serve the ultimate consumer and give the industry latitude in which to grow."

Even Tele-tone president S. W. Gross, who has shown some enthusiasm for CBS system, says he has doubts about marketability of color units. He reports "dozen or so" Tele-tone 10-in. (magnified) "slave units" out in the field, with dealers inviting orders. Unit is unpriced, but Gross says $199 is a "very rough guess."

* * * *

Conflicting color claims were rehashed in this week's fair trade practice conference conducted by Federal Trade Commission (see p. 13). CBS attorney Richard Salant insisted most manufacturers can't claim that their sets are "adaptable" to CBS color. Sylvania counsel John Harvey was equally insistent that they can. CBS's competitors asked that ads claiming "convertibility" describe size of screens on converters. Salant called that unfair, saying no one knows what sizes future converters will be.

"THE MANAGEMENT of this paper believes that TV and the newspapers are in no sense competitors in the news field. They are 2 media of information, just as bourbon and water are 2 liquids; and, as many editors know, neither will replace other, but they're fine together." —Phil North, *Fort Worth Star-Telegram* (WBAP-TV).

Foregoing pretty well expresses attitude of most of the 40-odd publishers already in TV (see *TV Factbook No. 13)*, but it was only one of various expressions of opinion on impact of TV on newspapers made public at Sept 27 AP Managing Editors' Assn. meeting in San Francisco.

Consensus was that "TV had sharpened the interest of readers in outstanding news events that had been televised," said AP report, several citing Japanese treaty conference as proof. And *Des Moines Register & Tribune's* Frank Eyerly held there was "no truth whatever" to predictions that widespread ownership of TV sets would spell doom of daily newspaper. However, *New York News'* (WPIX) Richard Clark said:

"If, in the next few years, TV improves in quality as rapidly as in the last 2, I believe it will be increasingly difficult to sell newspapers in New York [where] practically all sales are made at news-stands . . . TV tends to keep people at home."

—■—

Ever cynical about TV programs, Sept. 29 *New York Herald Tribune* observes editorially on RCA chairman David Sarnoff's challenge to his scientists to produce 3 major new inventions (see p. 3): "Considering the generally inferior quality of present-day TV programs, many people will feel indifferent to an invention that would make TV pictures any bigger, and will see no use whatever for any gadget that would record them for future use. But by 1956, when Mr. Sarnoff will celebrate his fiftieth anniversary in radio, the industry perhaps will have met this other and bigger challenge—to give the public better programs. Since that night of April 14, 1912, when as a young Marconi wireless operator Mr. Sarnoff picked up atop the John Wanamaker store the first message of disaster from the *Titanic*, he has seen come to pass far greater miracles than these he now asks for. In fact, Mr. Sarnoff helped greatly to bring them about. We congratulate him on his anniversary."

"Are the British taking over American television?" asks *New York Times'* Jack Gould in Sept. 26 column. They aren't doing badly, he concludes, reporting "conservative estimates" that British movies comprise 20% of feature film TV fare in larger cities, 10% for TV stations nation-wide, while theatres carry "barely measurable" percentage of British imports. Good English product derives about $20,000 yearly from American TV, enjoying "consistently good" ratings except in South and Southwest. "By happy coincidence," Gould says, "what American TV especially wants, the British are most adept at making: films stressing adventure, intrigue and mystery." What complaints there are seem directed at "incomprehensible dialogue and the English propensity for staging climatic scenes in virtual darkness." Hollywood may not yet be worried over "millions of Americans being conditioned to foreign films," he says, "but already there are whispers of producers in France, Spain and South America hoping to get on the video bandwagon."

Some 200 women executives and broadcasters have submitted entries for *McCall's* Awards to Women in Radio & TV contest which closed Sept. 10—one to be for service to community, 3 each for service to women and children, judges to be Sen. Margaret Chase Smith (R-Me.); Dr. Earl J. McGrath, U. S. commissioner of education; Mrs. Dorothy Deemer Doughton, president, General Federation of Women's Clubs; Mrs. Harriet Sabine, board, American Women in Radio & TV; Otis Lee Wiese, publisher of *McCall's*.

Financial & Trade Notes: Magnavox sales were $44,177,645 and net earnings $2,233,237 ($3.01 a share on 723,437 shares outstanding) for year ended June 30, both the largest in its history. They compared with $31,716,630 sales, $2,007,982 net profit ($2.81 on 703,764 shares) for preceding fiscal year. Provision for Federal income tax was $2,590,000, plus $735,000 excess profits tax, as against preceding year's total $1,200,000.

Backlog of military orders totals $35,000,000 reports president Frank Freimann, shipments of war products now running $1,000,000 a month and due to reach $2,000,000 by December. By year's end, $1,000,000 expansion program will be completed, including 40,000 sq. ft. added space in Ft. Wayne and 65,000 sq. ft. in Greeneville, Tenn.

* * * *

Hazeltine, Motorola & Zenith are listed with 36 others as "candidates for stock splits"—or else for large stock dividends—by Sept. 24 *United Business Service*. It adds, however: "There can, of course, be no assurance that such action will follow in the near future, but the logic of the situation suggests it in each case. The stocks have all enjoyed substantial advances in market price, earnings are large, and growth in recent years have been noteworthy."

Allied Electric Products Inc. reports net of $354,733 on sales of $9,585,301 for fiscal year ended June 30, compared to $160,814 net on $4,950,284 gross in preceding fiscal year. President Nathan Chirelstein's report notes that $1,052,956 was spent on new equipment and improvements during year, that company's electron tube output is now 5000 daily, will go to 25,000 a day by November.

Oak Mfg. Co. reports profit for first 3 months of new fiscal year ended Aug. 31 was 46¢ a share based on current tax rates, compared with 61¢ same quarter last year. (For last full fiscal year report, see Vol. 7:35.) Billings first quarter were off 10%, partly due to longer vacation shutdowns and preparation for defense orders. Trend is upward, so that "total shipments for the first half of fiscal year will be well ahead of last year."

Sparks-Withington ended fiscal year June 30 with net earnings of $879,320 (95¢ a share) compared with $458,083 (47¢) for preceding year. Sales were $23,978,292 compared with $17,020,259 preceding year.

Dividends: Emerson, 25¢ payable Oct. 15 to stockholders of record Oct. 5; American Phenolic, 20¢ payable Oct. 26 to holders Oct. 12; Electric & Musical Industries Ltd. (London), 8% stock as of June 30; Technicolor, 50¢ payable Oct. 22 to holders Oct. 10; Clarostat, 10¢ payable Oct. 15 to holders Oct. 10.

Improvement in appliance markets, after soft late spring and summer, is reported by Avco president Victor Emanuel in report for 9-months ended Aug. 31 showing net income of $7,660,372 compared with $7,712,538 for same period last year. This is equal to 84¢ a share, after preferred, on the 8,755,353 shares of common outstanding, as against $1.08 on 6,751,700 shares year ago. Sales totaled $210,947,060 as against $160,330,491.

———■———

Outlays of the 1629 firms which spent $20,000 or more on major media advertising during first 6 months of 1951, as tabulated by Publishers Information Bureau, were as follows: magazines, $225,403,891; network radio, $95,453,605; network TV, $55,055,611; Sunday newspaper supplements, $30,060,063. Total of $405,973,170 covers 93.8% of all advertising in those media and 4443 products.

Even photo-engravers see TV as "serious threat"—their recent AFL union convention in New York was told by J. B. Fisher, chairman of its negotiating committee, that TV money isn't coming out of new ad budgets but is being taken from present advertising, local and national.

BOOM TIMES ARE AHEAD for the infant theatre-TV equipment industry. Initial successes of theatre TV have resulted in backlog of orders estimated at more than 200 (see p. 2)—and many firms, old and new to TV industry, are reported preparing to enter theatre-TV field.

Theatre-TV equipment is priced from about $35,000 for General Precision Laboratory's 16mm inter-film system to $2000 for a portable direct projection system reportedly in works by Katz & Snaider Co., Brooklyn.

If all manufacturers' claims are taken at face value, there should be some 250 equipped theatres by year-end.

RCA has installed more than any other company—some 16-18 out of the 28. RCA's direct projection set sells for $16,500 plus about $2000 for installation. RCA has at least 100 firm orders, hopes to fill them all by end of year.

Paramount's 35mm inter-film system accounts for 6 installations. It costs $25,000 plus $1500-$2000 installation. Film company says 10 are in production, will be delivered in few months.

General Precision Laboratory reportedly has some 30 firm orders for its new Simplex direct projection system, which costs approximately same as RCA's, and 14 orders for its inter-film system. Production of the Simplex begins next month.

Trad TV Corp., manufacturer of projection sets for bars and clubs as well as standard-type private label receivers, says it has materials and capacity to turn out 100 of its new Tradiovision theatre units before Jan. 1. Trad promises 90-day delivery on 2 direct projection models—one with spare receiver for switchover in event of trouble at $7650, single-receiver model at $5850. Installation cost is listed as "under $1000." First Trad unit is in use at Walter Reade's Asbury Park theatre, and Trad says Reade chain has ordered 9 more.

GE plans to manufacture Eidophor projection TV system—using CBS color—for 20th Century-Fox, but no production schedules or costs have been announced.

Other manufacturers reported preparing to make theatre-TV units are Air-Marshal Corp., New York TV set maker, said to have unit for 8x12-ft. screen, to cost less than $5000, and Katz & Snaider Co., Brooklyn, developing $2000 portable. Philadelphia's Royal Theatre has temporary installation of pilot model of new unit of unknown make, which reportedly cost $3500, throws image on 9x12-ft. screen and is said to be one of 4 such units already manufactured, but only one in use. Skiatron Electronics & TV Corp., promoter of Subscriber-Vision, has promised inexpensive set for rental to small theatres.

———■———

Theatre TV will be hot subject at Society of Motion Picture & TV Engineers convention in Hollywood Oct. 15-19. On agenda are reports on development of high-definition theatre-TV system, by RCA tube dept.'s Otto H. Schade; new direct-projection system, by General Precision Laboratory's F. N. Gillett; TV camera for theatre network use, by GPL's Blair Foulds and E. A. Hungerford Jr.; high-speed theatre-TV optical system, by RCA engineering products dept.'s Lawrence Sachtlaben. Papers will also be presented on TV studio lighting, kine recording, TV film scanning equipment.

Theatre TV as mass training device, tested Sept. 15 by Federal Civil Defense Administration (Vol. 7:36), was such "huge success," says Jesse Butcher, director of FCDA audio-visual division, that plans are being made to use it on regular basis. Extent of use depends on appropriations to be voted by Congress, "but we'll do as much as possible with available funds," agency spokesman said. Sept. 15 program originated in studios of WMAL-TV, Washington, was sent to theatres in Baltimore, Philadelphia, New York, Washington.

1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
September 29, 1951

SETS MOVING, SHORTAGES AGAIN FORESEEN: TV business is so much improved that they're talking set shortages again -- estimates of when varying from the end of November to sometime during first half of 1952.

Undoubted fact of materials restrictions as defense production accelerates (Vol. 7:36 et seq), considered along with greater public demand for receivers and steadily reducing inventories, cause very few to scoff now at "cry shortage".

Second Dun & Bradstreet report on dealer inventories shows 800,000-900,000 sets in dealer stocks as of Sept. 1, regarded as "healthy reduction" from 900,000-1,150,000 estimated as of Aug. 1 (Vol. 7:35) and bearing out general trade feeling that things are picking up nicely. And RTMA disclosed this week that end-of-August distributor inventory (Aug. 24) stood at 680,862, up from end-of-July's 640,393 and highest of year. But distributor inventory isn't regarded as having same index importance as monthly dealer figure and weekly factory output figure.

* * * *

Factory inventories took another dive week ending Sept. 21, RTMA reporting 510,100 as against 560,044 preceding week (Vol. 7:38) and 622,436 week before that (Vol. 7:37). This means more than 250,000 inventory has been moved by manufacturers since Aug. 3 peak of 768,766 (Vol. 7:32) -- aside from their current production.

Output went up to 78,548 (1030 private label) for week ending Sept. 21, highest of any week since end of May, up from 62,548 the week before. Thus, 12 of third quarter's 13 weeks have resulted in output of approximately 570,000 sets, as against first quarter's 2,200,000 and second's 1,145,000.

Radios totaled 240,494 (104,726 private), up from 222,406 as of Sept. 14 and highest since the 375,066 reported for week ending July 20 (Vol. 7:30). Factory inventory of radios was 388,919, up from 381,139 on Sept. 14. The radios were: 136,281 home receivers, 81,915 auto, 22,298 portable. Total radios thus far this quarter are approximately 2,500,000 vs. 4,343,600 first quarter, 3,813,046 second.

* * * *

So many predictions have proved wrong -- who, for example, foresaw bottom dropping out of TV market so precipitately last March? -- that most industry leaders have been conspicuously cautious in recent months. A few are speaking out again:

RCA's J.B. Elliott, consumer products v.p., has been making flat statement in speeches and interviews that there will be shortages of "quality receivers" by mid-December. He estimated another 1,500,000 output before end of this year, but only 1,800,000 first half of next year, 3,000,000 second half if materials problems are partly solved. These won't be enough to meet demand, he said.

Philco's Fred Ogilby, TV-radio sales v.p., foresees rationing of at least his company's receivers by end of November. Company reports production and sales now "on consistently good basis."

Admiral president Ross Siragusa said: "Admiral dealers are selling more TV sets than the 5 Admiral electronic plants are producing. Govt. orders, together with reduced allocation to civilian use of strategic materials, have combined to make it necessary for us to keep our 5 plants going night and day, Saturday included, to meet demand occasioned by new models introduced in mid-August.

"Sales are so strongly up in TV & refrigerators that we have no inventories beyond a half-day to a day's need at the factory level. Our field inventories show that we are less than 3 weeks ahead in TV sets and less than 4 weeks ahead in refrigerators. It's keeping us humping to keep ahead of demand. The first of the year will see a shortage of TV sets of the better known brands."

Magnavox's president Frank Freimann, in annual report released this week (see Financial Notes), asserts retail sales "have been on the ascendancy since mid-

August and are accelerating at a rate that points to a probable shortage of merchandise by the end of the year."

* * * *

Wholesalers and retailers, after taking bad beatings for nearly 6 months, are inclined to be somewhat more cautious than manufacturers -- but they generally tell of better sales, unloaded inventories, bright outlook for rest of year. As to shortages, they're not as well versed as the manufacturers, but William Warsaw, who heads Washington's Lacy's chain, calls trade "steady and healthy".

And George Wasserman, who heads George's big Washington chain, and who does not often lean to the optimistic side, now feels so buoyant that he says: "I believe the last quarter of 1951 will surpass last quarter 1950 by 20% at the retail level."

Washington is regarded in trade as far from "typical" -- but echoes of this attitude are manifest in conversations with dealers in other cities and in what they are quoted as saying in the merchandising trade press. There was only one saying he thought October -- despite World Series, football, better programs generally -- might not be so hot. Reason: Three business days lost because of the Jewish high holidays.

STILL MORE COPPER-ALUMINUM CUTS LOOM: NPA is preparing to wield the axe again -- to take another chop at the supply of materials for TV-radio and other consumer durable goods in the fourth quarter.

Allotments of copper and aluminum -- already cut below third quarter's figure (Vol. 7:38) -- are due to be sliced by as much as 10%.

This was publicly confirmed by an NPA official for first time Sept. 27 when Controlled Materials Plan boss Walter C. Skuce said in New York speech that rations of the 2 metals to civilian producers may have to be cut by 10% "unless inventories [at the mills] are adequate to make up the deficit."

Plain fact is that Govt. has issued allotment paper for about 10% more copper and aluminum than it expects to be available in fourth quarter. And when a high NPA official, in a prepared speech, mentions a "possible" cut -- you can interpret that as "probable" or even "virtually certain".

* * * *

TV-radio production for rest of year now appears to hinge almost solely on availability of materials, trade slump having ended and set output figures showing week-by-week rise (see p. 11).

It's difficult and risky to venture a guess on fourth quarter TV-radio output -- even on basis of exact materials allocations figures. Big unknown quantity is the "carry-over" of processed materials and subassemblies from third quarter.

TV-radio industry didn't use up its whole ration of third quarter materials -- simply because there wasn't any market for TV sets. While govt. inventory controls limit carry-over of third quarter materials, as such, to fourth quarter, there is no ceiling on carry-over of "subassemblies" or "processed materials".

When sheet steel is pressed into chassis blanks, it's no longer a "material" -- it's been "processed". Same is true of hookup wire when it's cut into convenient lengths. Fourth quarter TV-radio production depends, to large extent, on size of industry's stock of such processed materials and subassemblies.

* * * *

Conservation, too, will play important part in stretching production. But most spectacular materials-saving measures are still in future. RTMA engineering study just presented to NPA gives results of conservation to date, and notes:

"A great deal of [conservation] work...by the parts, material and end-product manufacturers...requires the use of new materials, new circuit designs and new mechanical arrangements. Much of it will not be reflected into apparatus until 1952, because of design work, the time required to prove out new materials, components and products and the time for tooling and manufacture of the new items."

Some substantial savings in critical materials have already been effected, RTMA report shows. Based on production rate this year of 5,920,000 TVs, 11,600,000 radios -- 20% less than last year's 7,400,000 and 14,500,000 -- RTMA estimates these savings in tons this year over last: Aluminum, 1324 or 21%; cadmium, 66 or 23%;

cobalt, 229 or 36%; copper, 9687 or 24%; lead, 239 or 21%; nickel, 367 or 28%; iron & steel, 54,053 or 24%; tin, 266 or 25%; zinc, 4117 or 26%.

While Govt. regards industry's voluntary conservation program as laudable, there are easily discernible indications that control agencies haven't dropped the idea of compulsory conservation, simplification and standardization.

There are reports Govt. is looking askance at the ever-mushrooming variety of receiving and TV picture tube types. RTMA's tube div. reportedly is investigating possibility of voluntary tube standardization program.

Steel cabinets used on TV sets, radios and juke boxes, too, are being viewed by some high materials control officials with jaundiced eye, best sources indicate. Wood is plentiful, steel is woefully short, these officials say -- wondering why some "new 1952 models" are encased in the precious metal.

EVERYBODY GOT CHANCE to blow off steam, but nothing substantive was decided, at second TV industry conference on proposed trade practice rules held by Federal Trade Commission Sept. 26-28. Discussions were often heated, covered whole gamut of alleged "deceptions," led only to decision to call third conference (probably early in 1952) after which public hearings will be held before FTC issues rules binding on the industry.

Third conference was requested by RTMA president Glen McDaniel and NARDA president Mort Farr. Louis B. Calamaras, v.p., National Electronic Distributors Assn., was named to head interim committee for further work on the 34 rules prepared by FTC staff (Vol. 7:34).

Though some of the 33 industry and Better Business Bureau executives and counsel attending plumped for rules as proposed by FTC, even asking "greater protection" than they afforded consumers and dealers, manufacturers generally opposed them as going beyond govt. jurisdiction. Mr. McDaniel, for example, opposed suggestion by U. A. Sanabria, American Television Inc., that minimum TV receiver performance specifications be written into the definitions—demurring on the grounds that minimum standards should not be set by the Govt. and that "good sense of the public" would drive inferior sets off the market.

Questions of tube-size designations, rebuilt tubes sold as new, "adaptibility" and "convertibility" of sets to color, price and warranty deceptions, tie-in sales, trade-in allowances, private-label representations, price-fixing to suppress competition, etc., were among those which often occasioned acrimonious discussion. TV color issue was rehashed, got so confusing to FTC folk that long and involved explanations ensued. Sanabria even protested use of "CBS-Columbia" brand name as "unfair competition" since it uses govt.-granted facility to plug own product.

Besides spokesmen for trade associations and Better Business Bureaus, those attending included counsel for CBS, Richard Salant; Philco, Henry Weaver; Admiral, Richard Oberly; DuMont, Robert McLaughlin; along with John Harvey, Sylvania; J. M. Wiseman, Belmont; H. F. Guenin Jr., H. Osterling, D. Create, J. Williams, RCA Victor; Matthew Roth, Davega; Samuel Sosenko, Bronx Radio.

TV will overshadow telephone as tool for business executive of future, DuMont's receiver sales manager Walter L. Stickel told Rochester Sales Executives Club Sept. 11. "In the not-too-distant future," he said, "2-way TV communication between various phases of business operations, which will enable executives to see as well as hear their associates, will be a commonplace thing in the business world . . . TV will be the greatest sales tool ever devised for American business."

"We owe TV a vote of thanks for showing, Hollywood to the contrary, that homely people also have some talent"—Burton Hillis, in Sept. *Better Homes & Gardens.*

Trade Personals: George W. Henyan, going on leave as asst. to GE's Dr. W. R. G. Baker, Oct. 1 becomes chief of components branch, NPA Electronics Div., succeeding **Louis H. Niemann**, who returns in mid-October to Sylvania as mgr. of field engineers . . . **Edmund T. Morris Jr.**, chief of DPA Electronics Production Board and NPA Electronics Div., on leave from Westinghouse, will wed Miss Ruth H. Tadde of Washington at Roanoke, Va., Oct. 3. Couple will leave next day for Europe, where Mr. Morris is being sent on govt. mission . . . **Ernest W. Heilmann**, official of A. G. Spalding Bros., named acting director of OPS consumer durable goods div. "until a director is appointed" . . . **Joseph H. Gillies**, Philco operations v.p. for TV-radio div., appointed v.p. & gen. mgr., govt. & industrial div., with **Wm. J. Peltz** named v.p. for TV-radio div. **Robert F. Herr**, v.p., continues to head sales activities of Gillies' division . . . **Palmer M. Craig** promoted to v.p.-engineering, Philco TV-radio div., reporting to president **Larry Hardy** . . . **Raymond S. Perry** promoted from gen. commercial sales mgr. to v.p. & director, Federal . . . **Frank Hogan** named v.p.-sales mgr. of newly created Emerson Radio of Michigan Inc., 1301 W. Lafayette, Detroit (Vol. 7:34), wholly owned subsidiary, under **Harold E. Karlsruher**, president . . . **I. E. Christman**, ex-Goodyear TV-radio buyer, joins CBS-Columbia Inc. as district mgr. for Ohio, Ky., W. Va., western Pa. . . . **Leo J. Galanek**, ex-Regal chief engineer, now president of Gem Radio & Television Corp. . . . **Louis Grodsky** has resigned as controller and asst. treasurer, Tele-tone . . . **Ed Altshuler** named director of adv.-public relations, Kaye-Halbert . . . **W. L. Parkinson**, GE, appointed chairman RTMA service committee, succeeding **E. W. Merriam**, DuMont. . . . **Don Haines**, ex-Sentinel chief engineer, joins Belmont as asst. to William Garstang, administrative dir. of engineering & research . . . **Wm. W. Cone** resigns as sales v.p., Krich-New Jersey Inc. (RCA).

"Don't overlook the possibilities of industrial electronics," said GE's Dr. W. R. G. Baker at NEDA Cleveland convention Sept. 10, echoing report in Sept. *Fortune* (Vol. 7:36). "I know it is hard to look at the electronics picture without being blinded by the reflected glare of TV . . . TV may be many things to many people in addition to being the most dazzling development of present day electronic science. But when some historian of science, a few centuries from now, weighs the various developments in the light of their contributions to the advancement of human society . . . industrial electronics may far outshadow TV in its effect upon standard of living and way of life." Note: Good example of "industrial" use of TV was cited in AP dispatch from London Sept. 13, relating how underwater TV apparatus located sunken submarine *Affray* after 2 months at bottom of English channel. Equipment used by Admiralty was much same as that used for ordinary outdoor telecasting, with camera in watertight container operated by remote control.

Topics & Trends of TV Trade: New York City's drastic measure for licensing TV servicemen, agreed upon in committee of City Council Sept. 27 and due to go before full Council in November, may be bellwether for other communities—outgrowth of this attitude, as expressed in bill itself:

"The business of selling service contracts and servicing television receiving apparatus has become the subject of great abuse, with the result that the public has been and is being victimized by irresponsible sales methods, unethical and financially unstable service organizations and inferior installation, maintenance and repair."

Unsalaried supervisory board of 7 named by Mayor, including experts from industry, will be set up to encourage "self-regulation." Bill provides for annual license fees of $15 for technicians, $5 for apprentices, $25 for service contractors, $25 for service dealers. Violators would be guilty of misdemeanor and punishable by fine not to exceed $500 or 6 months imprisonment, or both.

Companion measure, somewhat along lines of bill defeated in State Legislature recently, proposes to protect TV purchasers from losses through bankruptcies of service contractors by requiring latter to place full service fees in escrow in a bank, drawing out only specified amounts each month, deposits to assure carrying out of contracts in event of failure.

* * * *

DuMont's anticipated TV receiver production is set at 40% of last year's total, "because of needs of raw materials for defense." Accordingly, areas on 2 of E. Paterson plant's 4 conveyor production lines (over 2 miles long) have been reserved for military electronics components manufacture, reports president Allen B. DuMont. Newly named manufacturing operations chief is Paul Eshleman, who was production control manager during World War II and who supervised conversion of the former Wright aero plant for TV. Its 480,000 sq. ft. capacity, DuMont claims, makes it "world's largest TV receiver plant."

False advertising of coin-operated TV sets is charge against Covideo Inc., New York, and its president Sidney I. Horwatt and v.p. Louis Brown, in Sept. 28 Federal Trade Commission complaint. FTC alleges that, contrary to Covideo's advertisements, "the respondents do not own or operate a place where they make TV-radio sets or parts; they do not maintain a staff of competent engineers and technicians with adequate facilities for research in TV . . ." Horwatt and Brown must answer complaint in 20 days and appear at hearing in New York Nov. 5.

Reflecting summer production cutbacks, Treasury Dept. excise tax collection from TV-radio industry dipped to $5,165.031 in August from July's $5,859,679. Uncle Sam took $4,760,964 from industry in August 1950, but that figure doesn't include TV sets, which were untaxed at time. During August, refrigerators, freezers, air conditioners paid $5,664,944 vs. $8,626,740 for August 1950; phonograph records $518,711 vs. $293,880.

* * * *

Merchandising Notes: No TV as yet in Rockford, Ill., 80 miles from Chicago, but 21 of city's retailers and servicemen have banded as Certified TV Installation & Service Assn. Inc., took full-page ads to tell public how it backs up service; Hartford pattern is followed . . . Hallicrafters names Edgar Morris, ex-Zenith, as distributor for Washington area . . . "Unusual is usual" in Los Angeles, says *Wall Street Journal*, noting that gas stations are selling TV sets there . . . Hallicrafters distributor McCollum-Law Co., Denver, announces 50 sets, all 20-in., will be placed in 5 locations to pick up World Series, piped via Denver's AM outlet KFEL by special arrangement whereby it's tapping transcontinental microwave.

Trade Miscellany: Sarkes Tarzian shows new uhf tuner in Bridgeport Oct. 3, stressing that it tunes full 470-890 mc, costs no more than vhf—"less than the cost of adding 2 or 3 channel strips piecemeal" . . . DuMont reports 30-in. tube production now at full capacity of present facilities, selling some to 4 undisclosed "large" manufacturers; company is also experimenting with 27-in. metal-cone rectangular, hasn't decided on its future . . . Esquire Radio Corp., specializing in clock radios, now operating in new plant at 62-01 Fifteenth Ave., Brooklyn; president is A. R. Lieberman, ex-gen. mgr. & chief engineer, Jewel Radio, and a major stockholder is his brother J. P. Lieberman, onetime owner of Air King (now CBS-Columbia) which he sold to Hytron . . . Thomas Electronics Inc., Passaic, N. J., CR tube maker, says it's planning to go into receiving tube manufacture . . . General Fuse Co., South River, N. J., making glass tube fuses for automotive and TV industries, opening new 10,500 sq. ft. plant in Villalba, Puerto Rico . . . Antenna Research Laboratory, Columbus, O., sold to Thompson Products Inc. this week, price undisclosed, plans large-scale antenna production at new plant.

* * * *

Philadelphia TV-radio servicemen have drafted, through joint committee under secretary Paul V. Forte, 50-point operating program aimed at improving service methods. Program includes suggestion that manufacturers standardize tube sizes, mark all parts in legible, permanet manner and offer better distribution of technical information to servicemen. Dealers are urged to eliminate misleading advertising about service possibilities or receiver performance and to establish uniform warranty ticket. Parts distributors are advised to end wholesaling to retail buyers, and all groups encouraged to expand cooperative advertising.

Electronics exports continue way ahead of last year's —7 months' total running $77,930,118 vs. $35,624,177 same 1950 period, according to Census Bureau and RTMA. July figures accentuate increase—$17,857,932 vs. $6,689,189 year ago. Of larger identified categories in July, radio sets were $1,808,833, receiving tubes $1,397,562, parts for transmitting-receiving sets $1,778,501. "Special category," presumably including radar, etc., amounted to $8,-614,955. TV sets won't be reported separately until first of 1952.

Simon Benin, president of Industria Meublera S.A., Mexico City (Industrial Furniture), reports TV is reviving that industry in his country; his company alone will turn out 45,000 TV and radio cabinets valued at $2,500,000, mainly to house chassis imported by GE, RCA, Philco, Zenith. Last year it turned out 47,000 cabinets valued at $500,000, but these were mainly for radio.

TV receiver advertising in newspapers, due largely to eager effort to hypo waning market, went to 37,177,098 lines for Jan. thru June period, up 24.9% over same 1950 period; radio figure was 3,650,116, down 4.5% same period. Media Records report covers 38 TV markets. Of TV total, manufacturers placed 9,353,551 lines, up from 4,711,022.

September *Electrical Merchandising* is devoted mainly to TV, calls industry's present position good, future prospects tremendous. Included are articles on retail sales problems & practices, fringe area selling, community antenna systems, color TV—each article offering examples of successful merchandising techniques.

August receiving tube sales reached 23,761,252, after July's low of 13,185,567. Though year's total to date is well above same period last year—252,849,145 vs. 227,773,-373—RTMA report shows July-August rate of sales under last year's, when July figure was 21,128,017, August 36,-269,435.

Mobilization Notes: Approximately $4,500,000 in electronic plant expansion has been approved by DPA in addition to previously-listed certificates for rapid tax amortization totaling some $135,000,000 (Vol. 7:36). Certificates granted since "moratorium" began Aug. 18 (Vol. 7:33)—emergency cases or cases which required approval before Sept. 23 under federal law: Standard Tool & Mfg. Co., Arlington, N. J., electronic equipment, $666,429, of which 80% is to be amortized over 5-year period; RCA, Camden, military items, $465,000 at 75%; Globe-Union, Milwaukee, electronic parts, $398,700 & $190,789, both at 75%; P. R. Mallory, Indianapolis, military items, $384,561 at 75%; Magnavox, Ft. Wayne, military items, $350,000 at 75%; Federal Telecommunication Labs, Belleville, N. J., military items, $323,000 at 90%; Raytheon, engineering services at Newton, Mass., $87,208 at 75%, electronics equipment at Bedford, Mass., $8000 at 75%; G. H. Leland Inc., Dayton, electronic parts, $70,876 at 85%.

These certificates have been issued over period of time, but haven't been listed in DPA releases (percentage of amortization undisclosed): Sylvania, tube components at Warren, Pa., $361,000, tubes at Salem, Mass., $346,893; Westinghouse, Pittsburgh, radar, $285,000; RCA, Camden, military equipment, $223,912; Oak Mfg. Co., Chicago, components, $155,443; Barry Corp., Watertown, N. Y., vibrators, etc., $76,703; D. S. Kennedy & Co., Cohasset, Mass., radar components, $53,399; Plastic Mfrs. Inc., Stamford, Conn., components, $24,398; Stabie Engineering Inc., Plainfield, N. J., research & development, $14,365; Globe-Union, Milwaukee, printed circuits, $1250.

Thirty-five applications for aid in building electronic plants valued at $7,000,000 were rejected this week. Among them: Cornell-Dubilier, 4 applications totaling $1,013,332; Pacent Engineering Co., New York, $1,000,000; International Resistance, $987,278; Remington-Rand, $900,000; Jefferson Electric Corp., Bellewood, Ill., $818,000; Aerovox, $751,969; Wilcox-Gay, $506,000; Raytheon, 5 applications totaling $351,973.

* * * *

TV-radio-phonos aren't covered by NPA's new consumer durable goods order M-47B, which permits manufacturers of 4 selected groups of civilian products to shift production from one item to another in the same group. Under Controlled Materials Plan, any manufacturer may shift production among any items in same official product class code—hence TV-radio makers may shift between TVs, home, portable & auto radios, combinations, phonos, color slave units, juke boxes, etc. But they can't shift between TV-radio and other appliances such as refrigerators and washing machines, as they could in third quarter under now-revoked M-47A.

Govt. limitation on use of selenium may result from recent copper strike, NPA officials say. A by-product of copper smelting and refining, 1951 output of the chemical will be less than the 1,000,000 lbs. originally anticipated—because of strike and because one prime producer has stopped making selenium. Unavailability of selenium rectifiers is just one more headache for conservation-minded TV-radio manufacturers—since the rectifiers are heart of voltage-doubler circuit which can be used in place of power transformer to save copper and steel.

Threat of severe tungsten shortage seems to have eased. Govt. officials told tungsten and molybdenum wire and rod producers imports and domestic production should about balance consumption during first half 1952, but the amount going into govt. stockpile will create proportionate deficit in industrial supplies. Inventories of tungsten and molybdenum—both used in electronic tubes—are sufficient to meet "current needs," producers say.

Maj. Gen. Harold M. McClelland, ex-director of communications-electronics for Joint Chiefs of Staff who retired from Air Force Sept. 1, named asst. director of Central Intelligence Agency, under Gen. Walter B. Smith. Col. C. J. King promoted from asst. chief to chief, engineering & technical div., Office of Chief Signal Officer, succeeding Col. E. R. Petzing, now commanding Signal Corps Engineering Labs, Ft. Monmouth, N. J.

Melpar Inc., Alexandria, Va., prime military contractor for electronics gear, sold to Westinghouse Air Brake Co.; Thomas Meloy continues as president, heading staff of 150 engineers in Alexandria and Cambridge, Mass.

———■———

DuMont will use World Series as peg for big nationwide receiver promotion, built around formation of dealer-level "World Series Clubs" whose members can watch complete Series on 19-in. sets installed free at place of their choice. "Club" members can get the sets by registering in groups of 5 or more with DuMont dealers. DuMont also plans to install sets in barbershops, stores, hotels, train, bus and plane terminals, restaurants "and any reasonable place for viewing the series within the area where the dealer does business."

National Assn. for Better Radio & Television is new name of Southern California Assn. for Better Radio & Television, headed by Clara S. Logan, 882 Victoria Ave., Los Angeles. This is group that found "horror stuff" dominant on TV, got publicity play on protests last year. Its aim is to raise social and educational standards "without recourse to legal censorship." A new director is Dr. Dallas Smythe, ex-FCC, now U of Illinois communications research professor. Dr. Richard Atkinson is first v.p., Dr. Lee deForest second v.p.

College students aren't yet affected much by TV, reports National Advertising Service, representing college newspapers, after sampling 2201 students at 25 colleges in 21 TV areas. Only 13% owned TV sets at college, only 26% said they look at one or more TV programs regularly while at college. More than half (52.6%) said they spent no time at all on TV, 36.3% spend up to 5 hours weekly, 6% five to 10 hours weekly, 4% more than 10 hours weekly.

Normal room lighting, with no reflections on screen, is again emphasized as most comfortable for good viewing. Advice came recently from Dr. Carl F. Shepard, Northern Illinois College of Optometry, in talk to meeting of New Jersey Optometric Assn. in Atlantic City. Dr. Shepard, TV consultant to American Optometric Assn., reiterated that there's nothing fundamentally harmful in watching TV.

Offer to install community antenna system for unnamed upstate New York entrepreneur was made recently by New York Telephone Co. It's first such offer by a telephone company, would cost local operator $5500 per mile for installation, $80 per-mile-per-month for maintenance. No agreement has been reached. Alternatively, poles are offered on rental basis under stringent conditions, similar to arrangements in other towns (Vol. 7:2 et seq).

FCC denied WABD's request to use 16.7-kw ERP on Empire State Bldg. pending decision on protest by WNHC-TV, New Haven, that 16.7 kw on adjacent channel would reduce latter's coverage. WABD's CP specifies 2.5 kw, but it wants higher power under FCC's temporary power increase ruling (Vol. 7:30 et seq). Installation of WCBS-TV antenna on Empire State began this week.

Another attack on "immoral" TV shows by Boston's Archbishop Cushing (Vol. 7:9), inserted in Sept. 25 *Congressional Record* by Rep. Lane (D-Mass.), advises parents to censor children's viewing, protest to sponsors. His first blast was accompanied by Rep. Lane's request that FCC be given power of censorship.

Rough going for **Comr. Frieda Hennock**, seeking confirmation of appointment to New York Federal judgeship, was indicated after parade of opposition witnesses testified Sept. 27-28 at closed sessions of Senate Judiciary Committee. Hearing resumes Oct. 2 when her supporters appear. Unusually long proceedings for a confirmation were carefully guarded from press—but *New York Times* dispatch Sept. 28 reported: "The belief in some responsible quarters was that if Miss Hennock did not request President Truman to withdraw her name the nomination would be pigeon-holed by [the Committee] or killed by a strong vote on the floor of the Senate." Her qualifications as an attorney, judicial temperament, character—all were attacked by representatives of American Bar Assn., New York State Bar Assn., City Bar Assn. (latter's judiciary committee chairman Louis Loeb being counsel for *New York Times)*. RCA counsel John Cahill was only Hennock supporter to testify so far. Witnesses to appear for her next week are expected to include FCC Chairman Coy, an FCC Bar Assn. representative, and numerous women's bar groups, judges, educators, etc.

Deal whereby **WOW & WOW-TV, Omaha**, were sold for $2,525,000 to Meredith Engineering Co., subsidiary of Meredith Publishing Co., Des Moines *(Better Homes & Gardens, Successful Farming)*, was approved Sept. 27 by FCC. Meredith interests thus acquire second station, having built WHEN, Syracuse. Sale approval came just before one-fourth owner Francis P. Matthews, ex-Secretary of Navy, departed for Ireland as Ambassador. Estate of founder, late John J. Gillin, also held about one-fourth interest. Deal is complex one (Vol. 7:32), in which buyers assume 25-year rental lease from Woodmen of the World at $160,000 a year, 19 years yet to go, and also acquire $20,000 surplus account.

Another case of TV "have" tying up with "have not": WKRC & WKRC-TV, Cincinnati (Taft) buys 20% of Gilmore & Lindsay Nunn's WBIR, Knoxville, TV applicant; WTCN & WTCN-TV, Minneapolis, recently bought "piece" of WEMP, Milwaukee (Vol. 7:38). And WDSU-TV, New Orleans, whose AM affiliates with NBC Oct. 4, has joined with *Mobile Register* and *Press* (WABB) to form Mobile Television Corp., soon to apply for TV there in lieu of newspaper's present Channel 8 application. Chairman is Edgar Stern Jr. (WDSU), president is R. B. Chandler, publisher of newspapers. WDSU's Robert Swezey & Louis Read and newspapers' Wm. J. Hearin and Walter Bellingrath are vice presidents.

Two more radio stations received NPA go-ahead and materials allocations for alterations during fourth quarter under Controlled Materials Plan (Vol. 7:37-38). They are: WQAM, Miami, alterations to tower, to cost $42,050; WFRC, Athens, Ga., antenna tower, $15,500. Bulk of fourth quarter list hasn't been released yet; more TV-radio construction approvals are expected. NPA has prepared list of 71 interpretations of its construction regulations. For copy, write for NPA release No. 1266.

Help Wanted—Newsmen

RADIO NEWS BUREAU, publisher of *Television Digest*, has several openings for additional newsmen —reliable reporters, facile writers, who are intelligent, willing workers. Prefer age 30-35, with Signal Corps, Navy or industry experience who already know TV-radio-electronics rudiments and terminology. This fast-moving, expanding organization moves shortly to new quarters in Washington's new Wyatt Bldg. Reply should give all details, including references and starting salary expected.

New WLTV, Atlanta (see p. 1) goes on air Sept. 30 with nice backlog of commercials, primarily as an affiliate of ABC-TV, plus film schedule at outset. Live local productions are planned by end of year. Station is being hailed with special sections of local newspapers, dealers expecting upsurge of set sales with advent of area's third outlet (others: WSB-TV & WAGA-TV). WLTV operates on Channel 8. Corporate name is Broadcasting Inc., address 15 Forsyth St. S.W. Executive staff comprises William T. Lane, mgr.; Arch Ragan, sales mgr.; Harvey J. Aderhold, technical director; Roger O. Van Duzer, program director; Ann Hucheson, traffic mgr.; Winifred C. Brown, accounting mgr.; Madelin Chace Maddox, public relations.

Petition to commercialize Phonevision still hasn't arrived at FCC from Zenith (Vol. 7:38). Timing may have been affected by fact FCC postponed theatre-TV hearing from Nov. 26 to Feb. 25 (see p. 2), a definite indication Commission can't possibly get into subscription TV question for many months. In meantime, Zenith president E. F. McDonald continues making most of public dissatisfaction over fact Robinson-Turpin bout was carried exclusively on theatre TV (Vol. 7:37-38). In new series of 3 telegrams—to TV-radio stations and manufacturers, sports promoters, sports editors—he insists: "We must have subscription TV if great events are to be kept on the air." He's using almost same words FCC Chairman Coy did in speech before Assn. of National Advertisers last year (Vol. 6:39), when Coy said he favored any experiment "which looks toward the development of a method of keeping everything that is good in America on TV." At that time, Coy went on to say that he would "give just as much encouragement to a union of advertisers . . . paying cost of these events through entrepreneural arrangement."

President's new telecommunications adviser, Haraden Pratt, ex-v.p. of American Cable & Radio Corp., says he expects to have offices in National Security Resources Board headquarters set up within 3 weeks. With no date set yet for officially taking over job, Mr. Pratt says he'll be in and out of Washington, finishing up former job and "getting acquainted" in Washington, after summer business-vacation trip to Europe. As Presidential adviser, he'll act as sort of "one-man FCC" for govt. radio users, largely military (Vol. 7:31).

Telford Taylor, onetime FCC general counsel, who held rank of brigadier general in the Army while prosecuting Nuremburg war trials, was nominated Sept. 28 to be Administrator of the Small Defense Plants Administration, set up to channel more govt. orders to smaller manufacturers and to encourage subcontracting of prime contracts. He's presently a New York lawyer, presumably will relinquish his practice, including representation of the organized educators in quest for TV channels.

McFarland Bill to "streamline" FCC (Vol. 7:4 et seq) this week underwent second week's consideration by House Interstate & Foreign Commerce Committee; meetings resume Oct. 2. Bill's chances of being reported this session are slim, but it's first time House committee has worked towards reporting bill, though Senate has passed it in several sessions.

Excess profits tax relief for telecasters (Vol. 7:37-38) appeared even more probable this week, after Senate approved it on Sept. 28. Little opposition is now anticipated in forthcoming Senate-House conference. Senate rejected all Administration efforts to stiffen tax in any respect.

TV signals came rolling in recently when cold front had troposphere kicking up all along Eastern seaboard. One FCC engineer in Washington picked up pictures on all 12 channels, from Boston on down coast.

URGENCY OF TV DEMAND—CASE HISTORIES: So tremendous is the pent-up demand for TV in non-TV areas that when a small leak occurs in FCC's 3-year-old "dam" -- as it did in Denver this week -- the impact and reaction are truly staggering.

Same pressure of demand, eagerness to get local TV service, is germinating some ingenious techniques -- via the "community antenna" method -- as exemplified in unique application filed with FCC this week.

Police estimated 50,000 Denverites saw World Series during first day alone, on 92 receivers fed closed-circuit signals tapped from transcontinental microwave by promotion-wise Eugene O'Fallon, operator of TV applicant KFEL (MBS). Project got FCC blessing in advance, approval also of network, sponsor and baseball folk.

"TV Comes To Denver," shouted 8-column front-page headline in Denver Post, which ran 4-column pictures and column after column of description. Receivers were in Brown Palace and Cosmopolitan Hotels -- lobbies, dining rooms, balconies, suites. Police blocked off Broadway, were hard put to control crowds which included about 6000 people at a time.

Hallicrafters sets dominated show, with 75 of them supplied by its distributor McCollum-Law Corp., all 17 & 20-in. Four other makes were represented with a few -- Emerson 5, DuMont 3 (two 30-in.), Stromberg-Carlson 5, Motorola 4, no others.

Cost to KFEL was $1350 to NBC, $3000 for phone company contract charge plus $100-per-game hookup charge, and 18¢ a foot for about 7000 ft. of cable. In return, station got $500 from each hotel, plus $30 for each set, and 25¢ per foot of cable. Signals were received atop Brown Palace, piped to all locations.

"We're not making any money on this," said Mr. O'Fallon. "We're promoting the station and TV while getting some TV experience." Station has own camera chain which fed programs before and after games. No commercials were sold. So elated is Mr. O'Fallon that he plans other closed-circuit features in future.

Wolfberg theatre failed to get approval from baseball commissioner Frick, on grounds exception couldn't be made to general ban on theatre TV for Series.

* * * *

Community antennas are another symptom of the long-frustrated TV demand (Vol. 7:2 et seq), and this week's mail brought FCC the most ambitious such project yet proposed. J.E. Belknap & Associates, 317 S. Main St., Poplar Bluff, Mo., partnership of 5 businessmen, asked permission to install common carrier microwave network to feed signals of St. Louis and Memphis stations to 15-20 towns. Local companies would distribute signals to individual homes by wire.

Proposal is first of its kind, definitely requires FCC approval, inasmuch as radio transmissions are involved. Other existing community antenna installations simply pick TV station signals out of air, send them to homes by wire.

Company would set up receiving-transmitting stations 30-40 miles northeast of Memphis and 30-40 miles west of St. Louis. First would kick signals along to

Copyright 1951 by Radio News Bureau

Kennett, Mo., where they'd be relayed to Poplar Bluff, thence eventually to many other towns. Second would send signals to Mt. Vernon, Ill. for further relay.

Initial service would be provided Poplar Bluff and Kennett. Company would operate its own local distribution system in former. Total population to be served eventually would be 265,000 in these additional towns: Malden, Dexter, Cape Girardeau, Jackson, Sikeston, Caruthersville, all Missouri; Paducah, Ky.; Cairo, Carbondale, Marion, Johnston City, W. Frankfort, DuQuoin, Benton, all Illinois.

Frequencies requested are 890-940 mc & 5925-6425 mc, using RCA TTR-1A and BTL-1A equipment, with estimated cost of $25,005 per link. Classification of station asked is Class II experimental.

Cost of service to local entrepreneurs is proposed as follows: $25 per home installation up to 500, $10 each for next 500, nothing additional over 1000. Monthly rate would be $1.75 per installation up to 500, $1 each for next 500, 75¢ each for all over 1000. Finally, $5000 is to be paid when 100 sets are in operation.

Company comprises 29-year-old Belknap, who owns drug store; C.B. Bidewell, hardware store; Wm. L. Cohen, general store; Ernest C. Dunn, hotel; John S. Davis, insurance. Mr. Dunn has principal resources -- worth $100,000 or more.

Group appears confident of system's future, regardless of advent of TV stations. They believe towns too small to support more than one or 2 stations, whereas system can provide multiple services. They've retained McIntosh & Inglis as Washington consultants, conferred with FCC staff which welcomes test case. Construction would start 90 days after CP, be completed in 90 more, according to application.

Materials may prove tough nut to crack, if FCC does give approval. Just this week, for example, NPA announced turndown of request for 12 tons of steel, 1800 lbs. of copper, by Pennwire TV Co. (C.F. Gardner), which proposed to set up community systems in Lewistown, Burnham and Derry township, Pa., at cost of $85,000.

BROADCASTERS HAVE NEW CAUSE CELEBRE: If NBC can make its formulas stick, there will be brand new alignments of radio networks -- to say nothing of an entirely new economic modus operandi -- forced by impact of TV on radio as an advertising medium.

If plan sticks, it could even be pattern for future TV station-network relationships and sales operations, though that isn't suggested in project announced by executive v.p. Charles R. Denny Oct. 5 in 13-page statement. Basic proposals:

(1) Addition of 100 or more station affiliates for "more massive coverage" -- these to be "premium" outlets paying and receiving no pay for carrying sponsored network programs as audience and prestige builders.

(2) More programs to be piped to affiliates for local sponsorships on "pay as you sell" basis -- some 10 hours (40 quarter hours) per week of non-option time.

(3) Network advertisers to select any stations they wish, instead of contracting for minimum groups, as now required -- buying such tailor-made networks on one-time, alternate-week or non-consecutive basis as desired.

(4) Downward revision of sponsor rates charged for and paid to about half the present 171 NBC affiliates, upward revision of others -- not necessarily depending on TV competition (though that seems implicit in idea). This is subject to negotiation with individual stations. Over-all network rates would remain about same.

(5) Changes in network option time to free more evening hours to stations for local sponsorships, but to give network more morning-afternoon time to sell -- also a tacit admission of TV inroads on night audience.

Overtones of TV's impact are manifest throughout whole plan, which NBC stated was endorsed by SPAC, its stations planning & advisory committee at meetings this week under chairman Jack Harris (KPRC & KPRC-TV, Houston). SPAC's "basic economic study committee" is also headed by Mr. Harris and includes: Harold Essex, WSJS, Winston-Salem; Harry Bannister, WWJ & WWJ-TV, Detroit; C. Robert Thompson, WBEN & WBEN-TV, Buffalo.

While NBC indicates it's proceeding with some facets of plan at once, whole project is bound to take time, inevitably will react on other networks and particularly on present system of station sales representation -- and probably will highlight NBC's affiliates convention at Boca Raton, Fla., Nov. 28-Dec. 1.

IMPERATIVE NEED OF SELF-POLICING CODE: By all means read FCC Comr. Paul A. Walker's summary of complaints being received by Commission against certain TV-radio program practices. Salient excerpts from his Oct. 2 speech before churchmen's board are published as a Special Report herewith.

Comr. Walker both praises and damns -- but the crescendo of complaints is something the telecasting fraternity simply cannot afford to ignore.

Visual program content & timing is regarded so delicate a matter, in fact, that station manager we know won't carry any dramatizations, network or otherwise, unless he's supplied with synopsis in advance. He congratulated himself this week because he escaped a lulu -- about an unfaithful wife and a pregnant servant girl, with several shots of latter handled with extreme indelicacy. (Show was "Grace" -- on Tintair's Somerset Maugham Theatre on NBC-TV, Mon., Oct. 1, 9:30-10:30.)

Same manager limits commercials, naturally won't accept the 30-minute-long kind (Vol. 7:38), won't allow crime and horror stuff during children's waking hours.

The home isn't a theatre or a night club, and self-policing of TV demands considerably more severe restrictions than stage or movies -- of that there can be no doubt. Hence, no more serious problem faces TV today than the proposed new code of self-regulation on which NARTB-TV standards committee (Vol. 7:25,31,36) reached unanimous accord at Washington meetings Oct. 2-3.

Text of proposed code isn't being made public until full TV membership (68 of the 108 stations, 2 of the 4 networks) acts on it at Oct. 19 meeting in Chicago's Stevens Hotel. All 12 committeemen were present at Washington sessions, at which drafts by 4 subcommittees -- education & culture; news, public events, religion, controversial issues; advertising practices; standards observance -- were gone over and consolidated into one document expected to win at least informal FCC approval.

NARTB-TV gets off to good start with high-minded project like this, merits support of everybody in telecasting. While NBC-TV has published code of own, and CBS-TV is reported preparing one, whole industry may be expected to adhere to all-industry standards, once they have been adopted by station rank and file.

FEVER MOUNTS IN 'PAPER' FREEZE HEARING: Filing of statements in FCC's "paper allocations hearing" reached total of 736 this week -- indicating they'll number well into 4 figures by Nov. 26 deadline (Vol. 7:30). Nevertheless, feeling is universal that procedure is saving many months, if not years, of time in ending freeze.

Perhaps most significant of this week's filings was one from Sen. Johnson, who strongly reiterates his contentions that:

(1) Educational institutions, in his own Colorado at least, and probably in most other States, can't get funds to build and operate stations.

(2) Commercial stations should be required to set aside time for education.

"There has been some intense drum-beating throughout the country," he said, "designed to stampede the Commission into reserving channels for non-commercial educational purposes. In theory, and at first blush, this proposal shines with great lustre. As a practical matter, after close scrutiny, one observes that the brightness covers little ground and the glitter is only skin deep.

"TV is far too valuable as a national resource and much too intricate and delicate a process to be allowed to waste away through idleness, lack of funds and inexperience. I want this medium to be available to the people of Colorado now. I am positive that neither the University of Denver nor any other educational group will be ready during the next 10 years to apply for a license and state that they are 'fit, willing and able' to operate a TV station. What I want to avoid is creating a 'dog in the manger' situation."

So intent is the Senator on realigning FCC's proposed channel allocations to get more vhf into Denver, that he had consultant Grant Wrathall (who owns radio stations out West) present engineering affidavit & maps showing how it can be done.

With Sen. Johnson's powerful opposition, with prime advocate Comr. Hennock presumably leaving FCC, with educational counsel Telford Taylor going to new govt. post (Vol. 7:39) -- Commission may ease up somewhat on its reservation proposal,

perhaps in direction indicated by Chairman Coy: set time limit to reservation.

Educators are putting up stronger showing than many expected, some of their filings indicating intense study, a few actually claiming financial resources now on hand. Thus, it's considered unlikely FCC will drop reservation in toto.

* * * *

Lawyers and engineers are now exploring ways and means of smoothing post-freeze hearings to cut delays to bone. Communications Bar Assn. committees have been meeting, making suggestions. Final recommendations won't emerge for some time, but these are among topics considered:

(1) Cutoff date, with applications "frozen" for specific period.

(2) Length of time during which applications will be accepted after final freeze decision. Many lawyers and engineers are disturbed by FCC talk that one month may be enough (Vol. 7:36). In addition to flood of new applications to prepare, they expect 50% or more of existing 445 applications will have to be amended as to financial and legal data, virtually all of them as to technical data.

(3) Disposition of cases heard pre-freeze. There's nothing clear on this yet, but applicants who have been heard feel they have priority over others.

At FCC, there are really no decisions on any of these. FCC has yet to decide just how to go about making final decision. Though there's some talk of doing it piecemeal, one area at a time, such procedure is unlikely. "One big package," when it's all over, looks like the ticket.

As for oral presentations, these will be mighty rare, if not non-existent. Only possibility of these is where FCC is sure it will find itself over legal barrel. "Show cause" orders, where Commission proposes to switch channels of existing stations, may precipitate a very few oral hearings. But FCC may choose to avoid these by accepting alternative proposals offered by stations.

But true end of freeze -- stations on air -- is still in mists of future... 1953-54 (Vol. 7:36). One savvy Washington attorney soberly predicts hearings in every one of first 160 markets -- all cities down to 60,000 population -- with final FCC decisions taking up to 18-24 months.

MORE UHF ANSWERS—BY SARKES TARZIAN: That uhf reception problems are well in hand -- amply proved by many manufacturers -- was again emphasized this week when tuner-maker Sarkes Tarzian showed his wares in Bridgeport. And Mr. Tarzian, ever full of enthusiasm for TV, indicated willingness to go into station equipment manufacture in modest way to assist small-town station entrepreneurs like himself.

Builder-operator of WTTV in nation's smallest TV city, Bloomington, Ind. (pop. 28,000), Tarzian is also biggest maker of switch-tuners -- though his output is nowhere near that of giant in field Standard Coil (turret type).

Tarzian showed some 60 engineers from 20-odd companies his answers to uhf and described his approach to problem. To us, after our fifth Bridgeport trip, it appears that his uhf tuners shape up about as well as his successful vhf units and the uhf devices of other manufacturers (Vol. 7:14-23).

Mild-mannered, highly respected Sarkes Tarzian's first pitch is a new vhf tuner, TT16, so designed that uhf tuner can be added by simple plug-in. He urged that set designers build future receivers around tuner in such fashion, with uhf dial and all, that uhf tuner may be added by mere layman.

He decries removing vhf strip and replacing it with uhf -- a la Zenith, Standard Coil, et al -- deploring loss of any vhf channel. Both an all-channel continuous tuner and a single-channel unit are offered. Though principal aim is to get new vhf tuner into sets, company now has uhf tuners for existing sets. For these, vhf & uhf antennas are hooked into the tuner and tuner feeds into sets's antenna terminals. Uhf is tuned on Channel 2 or 3.

If it's self-powered, all-channel unit should retail at $39, single-channel at $22.50, Tarzian said. If set's power is used, price is about $10 less for each.

Engineers seemed satisfied with performance, as demonstrated at Hotel Barnum -- though Giants-Dodgers final playoff game certainly took minds off technicalities

for awhile. As usual, engineers won't rest until they can get their hands on tuners and test them under adverse conditions. But Tarzian isn't sending samples yet, says uhf stations must be more imminent before he'll give others chance to copy.

* * * *

As for uhf's potential, he's quite enthusiastic, saying: "I see no reason why it won't give as good service as vhf. We still don't have the right receiving tubes, but we will. Eventually, we'll have vhf & uhf on the same tuner.

Oscillator radiation problem, once a cause celebre at FCC, with overtones of govt. regulation (Vol. 6:23), has been licked with much less fanfare than feat warrants. For example, Tarzian says his present vhf tuners radiate no more than 25 uv/m at 100 ft. on Channels 2-6 or 50 uv/m on Channels 7-13. This compares with RTMA-recommended 50 & 150 uv/m for respective channel groups. His uhf tuners, says Tarzian, radiate well within RTMA limits. He believes that achievement of uhf via strips may prove serious in this respect.

Roundup on uhf tuners and sets has been written for November Radio-Electronics Magazine by Rudy Frank, promotion manager of WELI, in nearby New Haven, whose home has served as unique testing ground for most units announced to date (Vol. 7:15). December issue will contain his description of uhf antennas.

So successful is his WTTV, Bloomington, which has turned the profit corner, that Tarzian says he's willing to show other small-town aspirants "how to do it." "In fact," he says, "though we aren't looking for business, if someone wants us to, we'll equip such stations completely, at about $150,000, instead of the $250,000-$300,000 it would otherwise cost." He means "the works," he says, including 2-kw transmitter about like WTTV's (Channel 10).

FEW TV-RADIO CONSTRUCTION TURNDOWNS: Surprisingly few TV-radio building projects have been rejected by NPA for fourth quarter -- only 6 (3 TV, 3 radio) out of total of 2195 turndowns handed out by Govt. to all industries.

Fifteen broadcast construction projects, on other hand, have been listed to date as approved by NPA (Vol. 7:37-39) -- out of mere 180 approved construction projects of all types announced so far. More approvals are yet to be announced.

And CBS got govt. OK and allocation of fourth quarter materials for its big $5,330,000 "Television City" studios on Gilmore Stadium site in Los Angeles -- to become 16th broadcast construction approval for this quarter. (NPA erroneously listed CBS project as rejected in tabulation released this weekend.)

Three TV studio projects were turned down for fourth quarter -- no reasons given -- but these may reapply for first quarter 1952. They were DuMont and CBS in New York, scheduled to be built at cost of $1,150,000 and $230,000, respectively, and WJBK-TV, Detroit, $169,200.

The 3 radio station construction bids rejected were: KSOO, Sioux Falls, S.D., $19,000; WJAM, Marion, Ala., $12,000; KABR, Aberdeen, S.D., $4564. KSOO has CP for power boost; neither of latter two is on air, both have CPs.

COMR. FRIEDA HENNOCK'S chances for New York Federal judgeship (Vol. 7:39) didn't seem bright this week—but bulk of her support is yet to come. This week, Comrs. Coy, Walker, Jones and Communications Bar Assn. president Wm. Porter appeared in her behalf before closed sessions of Senate Judiciary Committee. Chairman Pat McCarran (D-Nev.) says it's unlikely that hearings, which adjourned Oct. 3 after 2 days' sessions, will resume before Oct. 15. Miss Hennock became ill, didn't attend Oct. 3 session.

Hearings continued closed, will resume same. Sen. McCarran says he doesn't know whether Miss Hennock will testify in her own behalf. "She hasn't conferred with me about it," he said.

Hearings continue to range entire gamut of Miss Hennock's qualifications. One Senator wondered why commissioners and industry representatives "seemed so eager to get her off the Commission." Another, when told of her single-minded advocacy of educational TV reservation, asked: "Do you think that's a judicial temperament?" There were other even rougher charges.

Opposing Miss Hennock this week were Judges John Mullen and James G. Wallace, of New York City Court of General Sessions. Reportedly due to testify for her are: Justice Agnes Craig, New York City Municipal Court; Jacob Holtzman, New York State Board of Regents; many representatives of women's attorneys' associations; spokesman for Joint Committee on Educational Television. There was speculation that Judiciary Committee wouldn't act this session, due to adjourn by end of month, leaving way for recess appointment, but that possibility didn't appear strong at week's end.

Walter I. Griffith, 73, onetime director of Iowa State College's WOI and ex-president of National Assn. of Educational Broadcasters, died Sept. 29 at home in Ames, Ia.

Personal Notes: Earl I. Sponable, technical director, 20th Century-Fox and pioneer TV technician, to be honored at SMPTE convention in Hollywood Oct. 15-19 with awards of both the Society's Progress Medal and the Samuel L. Warner Memorial Award; he's past president of SMPTE . . . Harry Mason Smith, WLW sales v.p., placed in charge of sales of all Crosley stations (WLW & WINS and TV stations WLWT, WLWD, WLWC) as Crosley promotes John T. Murphy TV operations director and mgr. of WLWT, and Kieran T. Murphy, controller, to vice presidencies . . . Joe Baudino, gen. mgr., Westinghouse Radio Stations, elected v.p. & director; he succeeded Walter E. Benoit July 1, latter having been made gen. mgr. of new Westinghouse Air-Arm Div., Baltimore . . . George Heinemann, TV operations mgr., succeeds Art Jacobson, NBC-TV program mgr., Chicago . . . Frank U. Fletcher and John H. Midlen have dissolved law partnership, will practice independently, both with offices in Munsey Bldg., Washington, former's phone National 5308, latter's Metropolitan 6006 . . . Horace L. Lohnes, veteran Washington radio attorney, elected president of George Washington U Alumni Assn. . . . Betty Forsling, ex-TV-radio editor, *Newsweek*, joins ABC-TV as asst. national director of program dept. . . . Robin D. Compton, ex-NBC, ex-chief engineer of old WOIC, Washington (now WTOP-TV), joins Washington consulting engineering staff of George C. Davis . . . Charles J. Keys named director of newsreel dept., WFIL-TV, Philadelphia, Wm. C. Driscoll resigning to become editor of Telenews Productions Inc., N. Y. . . . Gerry Martin resigns as TV director, Duane Jones Agency, to join Geyer, Newell & Ganger . . . Sam J. Slate, program director for British Broadcasting Corp. New York office since 1945, appointed director of programs & special events, WCBS, New York CBS Radio key . . . Ole G. Morby, ex-asst. sales mgr., CBS Pacific Network and KNX, named CBS West Coast radio station relations director . . . John Bainbridge, ex-KFMB-TV, San Diego, joins Walter McCreery Inc., Los Angeles . . . Jose diDonato, ex-Petry and recently with Robert W. Orr & Associates, joins Harry B. Cohen Adv. Agency Oct. 10 as TV-radio director, Howard Nussbaum becoming special asst. to Mr. Cohen . . . Richard H. Close shifted from Eastern mgr. of radio spot sales to TV spot sales, Robert J. Leder succeeding him . . . Wilmot Losee, gen. mgr. of Crosley's WINS, New York, resigns to open New York rep office for Ralph Atlass radio stations (WMCA, New York; WIND, Chicago; WLOL, Minneapolis; KIOA, Des Moines); his successor at WINS is Harry Foltz, ex-asst. sales mgr., WLW . . . Arnold Wilkes named public service director, WBAL & WBAL-TV, Baltimore, succeeded as program mgr. by Jerre Wyatt . . . Robert Hibbard, operations director of WGN-TV, Chicago, recalled to Army as reserve captain . . . Goar Mestre, president of CMQ & CMQ-TV, Havana, recipient Oct. 5 of Export Advertising Assn. award of merit . . . John W. Pacey, acting, promoted to ABC director of public affairs . . . Arthur F. Monroe resigns from J. M. Mathes Inc. to join Capehart-Farnsworth, succeeded as agency's public relations-publicity director by Warren Cox.

Station Accounts: Reuben H. Donnelley & Sons Co., handling coupon distribution for 28 products (including Old Dutch Cleanser, Wrisley Soaps, Maxwell House Coffee, Waxtex Paper, Glosstex Starch, Wesson Oil, Felso, Libby's Pineapple Juice, Hilex Bleach, Perk Dog Food, Duncan Hines Cakes, Perfex Super Cleaner), testing TV spots in Chicago, Detroit, Cincinnati, Columbus, thru Fulton, Morrissey Co., Chicago . . . Coffee Time Co. (coffee carbonated beverage), whose executive v.p. is Rudy Vallee, plans TV in N. Y. area soon, thru Harry Paul Associates, Boston . . . Greyhound Bus Lines starts campaign of 20-second spots on 66 TV stations in 50 markets, budgeted for $250,000 for Oct.-thru-Dec., thru Beaumont & Hohman, Chicago . . . Philip Morris & Co. testing for Dunhill cigarettes on all 3 Cleveland stations, thru Biow Co., N. Y. . . . United Airlines, sponsoring *Harry Owens Royal Hawaiians* on KTLA, Los Angeles, Fri. 8-8:30 p.m., adds KGO-TV, San Francisco, Sun. 9:30-10 p.m., flying KTLA producer Klaus Landsberg and entire cast to bay city each week in special plane for the repeat performances . . . Arnold Bakers Inc. sponsoring *Arnold Short Story Theater* on WJZ-TV, Wed. 11-11:15 p.m., including two 5-min. capsule dramas produced in Hollywood by Mark Fredericks . . . Swift & Co. buys 5-a-week feature films for 52 weeks on WPIX, New York, 7:15-8:15 p.m., thru J. Walter Thompson . . . Higgins Inc., noted shipbuilder, buys 6:55-7 p.m. weather reports weekdays on WDSU-TV, New Orleans . . . GE making available to dealers-distributors film spots advertising its TV sets, to be placed locally . . . Among other advertisers reported using or preparing to use TV: Domestic Sewing Machine Co., thru Fuller & Smith & Ross, Cleveland; Catalina Inc. (bathing suits, sweaters), thru David S. Hillman Inc., Los Angeles; Wayne County Produce Co. (apple sauce), thru Rose-Martin Inc., N. Y. (WCBS-TV); Cats Paw Rubber Co. (heels & soles), thru S. A. Levyne Co., Baltimore; Kyron Foundation Inc. (dietary aid), thru Simmonds & Simmonds, Chicago; Clopay Corp. (shades, drapes, curtains), thru Farson, Huff & Northlich, Cincinnati; Standard Milling Co. (Ceresota, Hecker's flour), thru John W. Shaw Adv., Chicago; Somnyl Pharmacal Corp. of America (Nu-Pax sedative), thru Emil Mogul Co., N. Y. (WNBT); Dolcin Corp. (Kendrin analgesic tablets), thru Victor van der Linde Co., N. Y. (WJZ-TV); Gorton-Pew Fisheries (Gorton's sea foods), thru H. B. Humphery, Ailey & Richards Inc., Boston (WXYZ-TV); U. S. Envelope Co. (Self-Seal envelopes), thru S. R. Leon Co., N. Y. (WTVJ); Atlantis Sales Corp. (Good Luck pie mix & filling), thru J. Walter Thompson, N. Y. (WTVJ); Arthur Brown & Bros. (art supplies), thru Huber Hoge & Sons, N. Y. (WPTZ); Thomson Porcelite Paint Co. (paints & enamels), thru Wayne Adv. Agency, Philadelphia (WPTZ); Waring Products Corp., subsidiary of Claude Neon Inc. (Waring blendors & steam irons), thru Hicks & Greist Inc., N. Y.

Network Accounts: Chesterfield assumed sponsorship of Giants-Dodgers playoffs on NBC-TV Oct. 2-3, after CBS-TV had televised first game coast-to-coast as public service . . . Gillette, sponsor of World Series and under contract for Rose Bowl game, has signed to sponsor Army-Navy game from Philadelphia Dec. 1, starting at 2 p.m. EST on NBC-TV; Westinghouse, on same network, will sponsor Notre Dame-USC game from Los Angeles same day, starting at 2 p.m. PST (5 p.m. EST) . . . Ekco Products Co. (Ekco kitchenware) starting Oct. 9 sponsors 8-8:15 portion of *Frank Sinatra Show* on CBS-TV, Tue. 8-9, thru Earle Ludgin & Co., Chicago . . . Hudnut Sales Co. Inc. (cosmetics) starting Oct. 8 sponsors Mon.-Wed.-Fri. 12:45-1 segments of *Frances Langford-Don Ameche Show* on ABC-TV, Mon. thru Fri., noon-1, thru Kenyon & Eckhardt, N. Y. . . . Minute Maid Corp. (frozen orange juice concentrate) starting Oct. 31 will sponsor Wed. segment of *Gayelord Hauser Show* on ABC-TV, Wed. & Fri. 1-1:15 p.m., thru Ted Bates & Co., N. Y. . . . General Mills (cereal tray & cake mixes) starting Nov. 3 will sponsor *Betty Crocker Star Time* on ABC-TV, Sat. noon-12:30, thru Dancer-Fitzgerald-Sample, N. Y. . . . Philco Corp. starting Oct. 14 shares alt. week sponsorship with Goodyear of *Television Playhouse* on NBC-TV, Sun. 9-10, thru Hutchins Adv. and Young & Rubicam, respectively.

Argentina's first TV station, LR3-TV in Buenos Aires, now testing and due to go into full commercial operation Oct. 17 (Vol. 7:36), will be followed by 2 more in Buenos Aires, 2 in Rosario and one each in Cordoba and Mendoza, according to Argentine reports. Equipment was purchased by Radio Belgrano y Primera Cadena Argentina de Broadcasting, S.A., from IT&T's International Standard Electric Corp., produced by Federal, and installed by W. J. Andrews, an American engineer. LR3-TV has 2 studios in Alvear Palace Hotel (3 cameras each), plus film studio, and antenna is atop Ministerias de Obras Publicas Bldg. It uses 5-kw FTL-19A transmitter operating on Channel 7 into 8-bay antenna providing ERP of 45 kw. STL links transmitter and studio, 3 kilometers apart.

Three TV networks cooperated in unscheduled first coast-to-coast baseball telecast Oct. 1 of first Giants-Dodgers National League pennant playoff game—in hectic last-minute maneuverings. Game was telecast in New York by WOR-TV, was carried by CBS network. It was put on cable by ABC-TV, which has studios adjoining WOR's. NBC gave up its reserved time on the microwave-cable link to permit the telecast—in exchange for CBS' release of its time Oct. 2 and 3 so NBC could carry last 2 playoff games. First game was sponsored locally by Schaefer Beer, but commercials were cut off the network feed. Last 2 games were telecast by WPIX in New York, NBC elsewhere, with Chesterfield as sponsor.

NBC has closed deal for old Vitagraph film studios in Brooklyn, covering block bounded by Locust & Avenue M and East 13th & 14th Streets, at reported price of $500,000. Negotiations with Warner Bros. were conducted by Joseph V. Heffernan, NBC financial v.p., network taking possession immediately after deal was closed Oct. 3. In one of buildings on site, TV studio 85x185 ft. (15,725 sq. ft.) is being built. NBC also announced plans for new TV studio in Chicago Merchandise Mart headquarters, for which it got NPA approval a few weeks ago (Vol. 7:37).

Oct. 1 sets-in-use, reported since NBC Research's "census" of Sept. 1 (Vol. 7:39): Miami 86,300, up 10,300; Washington 288,650, up 7650; Omaha 89,950, up 7250; Fort Worth-Dallas 135,656, up 5656; Memphis 98,769, up 5569; Greensboro 78,463, up 4563; Utica 53,000, up 3000.

First international TV pickup will be NBC-TV telecast of Oct. 15 welcoming ceremonies for Princess Elizabeth and Duke of Edinburgh at Windsor, Ont., across river from Detroit, program to originate from WWJ-TV's mobile unit.

"Nation's Oldest 8D21 TV Tube Dies in Action at KING-TV, Seattle," headlines RCA press release. Transmitting tube was 9254.8 hours old, "a new longevity record for this type of tube," said obituary.

Comprehensive article on TV boosters, for fringe area reception, is carried in October *Radio & Television News*. Written by Milton S. Kiver, it includes technical description, pictures, prices, list of 26 booster manufacturers.

———■———

Financial Miscellany: Sylvania reported considering additional financing in form of $25,000,000 bonds and $15,000,000 of convertible issue, proceeds to be used partly to refund present bonds, but it's still only in "talking stage," says *Retailing Daily* . . . Hoffman Radio took no dividend action for Oct. 7, though previously has been paying 25¢ quarterly . . . Blaw-Knox earnings this year placed by "street sources" at $2.25 a share compared with $2.27 in 1950, says *Wall Street Journal* . . . Tung-Sol has rearranged common stock dividend dates to Dec. 1, March 1, June 1, Sept. 1 . . . Technicolor Corp. president Dr. Herbert K. Kalmus announces $2,000,000 expansion program, embracing 60,000,000-ft. more capacity by early 1952 with goal of 600,000,000 ft.

Financial & Trade Notes: One of the keener observers of TV in the financial community, Sidney B. Lurie of Paine, Webber, Jackson & Curtis, doesn't see any handwriting on the wall that motion picture industry is doomed by TV. While he concedes attendance may never again reach 1946's high, he thinks movie industry "has passed the peak of its troubles" and sees strong possibility that "a substantial portion of the lost audience can be regained."

Mr. Lurie makes these points in bulletin titled *The Motion Picture Stocks—A Progress Report:*

(1) Not only did trend of motion picture attendance turn upward this summer, but "the upturn has continued through September despite the return of the top TV shows to the air." Film popularity is on upgrade—having hit rock bottom in first half 1951—because of better pictures today and because public now is spending less of its dollar for "hard goods."

(2) TV's "major immediate impact [on boxoffice] already has been witnessed—and measured. The novelty seems to be wearing off—and the talent voraciousness of TV probably means an average level of program quality which can't compete with a really top-notch motion picture." And, when new-station freeze is over and there are new TV areas: "The prospective gain in attendance in presently served TV areas might provide a cushion which easily absorbs any losses later resulting from new stations in new areas." It's Lurie's belief that movies will inevitably find "positive constructive answer to today's competitive threats . . . whether it be subscription TV, theatre TV, or 3-dimensional screens."

(3) Motion picture industry is working to reduce costs to point where profit can be obtained at current attendance levels—with substantially all cost of each picture "written off" in first year of distribution.

(4) Film export picture is bright. "American pictures today are supreme throughout the world [and] with various countries having eased their exchange restrictions and quotas in the past year, 1951 dollar remittances will be among the highest on record."

* * * *

Scott Radio Laboratories Inc., Chicago, and John Meck Industries Inc., Plymouth, Ind., both controlled by John S. Meck, will be merged in plan which Meck stockholders will be asked to ratify Oct. 15, Scott stockholders Oct. 23. Plan is for Scott to absorb Meck by issuance of 1.3 shares of Scott stock for each share of Meck, with John Meck Industries surrendering its holdings of 131,600 shares of Scott. Mr. Meck, president of JMI, has been president of Scott since April 1950.

New RCA board member is Mrs. Douglas Horton, ex-president of Wellesley College, now on NBC board, who as Capt. Mildred McAfee commanded the Waves during World War II. She's first woman member, was elected Oct. 5 to succeed Arthur E. Braun, of Pittsburgh's Mellon Bank, resigned.

Thompson Products Inc., Cleveland, big aircraft parts maker, has acquired Antenna Research Laboratory, Columbus, plans volume production of antennas, including TV; L. W. Reeves, Thompson v.p. who set up its electronics div., has named A. L. Pomeroy acting mgr., antenna div.

Raytheon reports net profit of $110,000 on sales of $16,756,000 for quarter ended Aug. 31 vs. $568,000 on sales of $17,834,000 in same 1950 period—TV accounting for drop, all other divisions up.

Dividends: RCA, 50¢ payable Nov. 26 to stockholders of record Oct. 19; Zenith Radio, 50¢ payable Oct. 31 to holders Oct. 17; Tung-Sol, pfd., 20¢ payable Nov. 1 to holders Oct. 17; Outlet Co. (WJAR & WJAR-TV), $1.25 payable Nov. 1 to holders Oct. 22.

Trade Report
October 6, 1951

FOR 1952—NPA CONSERVATION ORDERS: Conservation...simplification...standardization -- these words are heard more and more around govt. production control agencies.

Constantly discussed are regulations that would tell practically all industries what they can and cannot do with materials doled out to them.

For maximum production from minimum materials by civilian and defense-supporting industries, best information is that NPA is planning series of orders and programs to enforce conservation. Most of these orders won't come until next year -- probably until second quarter. And industry committees will be asked for advice before they are prepared.

Here are examples of restrictions which may be imposed on TV-radio industry -- some are already being considered; others merely have been suggested within NPA:

(1) Ban on metal cabinets and brass, aluminum and stainless steel trim on TV-radio sets and other electronic equipment.

(2) Standardization and elimination of many receiving & picture tube types.

(3) Limitation of number of models each manufacturer may produce. For instance, NPA could standardize on 14, 17 & 20-in. TV sets and limit manufacturers' lines to one console and one table model of each.

(4) Limitation of amount of aluminum in TV and auto radio antennas.

STATISTICS POINT UP FAVORABLE TRENDS: "Still going good," is word from all levels of the TV trade -- well supported by industry statistics.

Final September week, ending Sept. 28, saw production continue to inch up, while factory inventories took another dive of nearly 50,000. It was ninth straight week of declining inventories.

Week's production was 81,946 TV sets (1681 private label), up from 78,548 the week before (Vol. 7:39), bringing September's 5 statistical weeks' total to 331,379 (subject to later revision by RTMA statisticians).

September output figure compares with August's 146,705, July's 152,306. Thus, third quarter total is 630,390, as against second quarter's 1,134,836, first quarter's 2,199,669 -- for 9-month total of just under 4,000,000.

Will year's output go much beyond 5,000,000 with 3 months to go? Prospects are good -- but it all depends on continued demand for sets and availability of materials to set makers. Right now, inventories are being consumed, and nearly everybody feels confident these will be in reasonable balance to output by end of year.

* * * *

Factory inventory of 462,896 as of Sept. 28 compares with peak of 768,766 last Aug. 3 (Vol. 7:32), and is down from 510,100 end of preceding week (Vol. 7:39). It puts factories at about position they were at beginning of last May, when figure was 474,541. But picture isn't nearly so bleak as then, for distributor inventories then were about 650,000 and dealer inventories were unknown quantity but piling up.

Distributor inventory count by RTMA is always month behind factory figures. It stood at about 680,000 at end of August. New Dun & Bradstreet dealer count, also month behind, was estimated at 800-900,000 as of Sept. 1 compared with the 900,000-1,150,000 estimate of month earlier (Vol. 7:35).

Radio production was 222,257 units (98,045 private) for Sept. 28 week, with inventories 381,556. Week before, the figures were 240,494 & 388,919, respectively. Month's radio production thus was 1,091,042, which, added to August's 563,407 and July's 548,495, brings third quarter total to just under 2,203,000. First quarter radios were 4,135,111, second 3,730,219 -- so 9-month total is just over 10,000,000.

Sept. 28 week's radios were 125,373 home, 20,901 portables, 75,983 auto.

It's apparent TV-radio trade is enjoying same upswing as most other appliances still in supply, judging from optimistic reports in business press. "The lift is off the bottom," said report of business survey committee of National Assn. of Purchasing Agents, but it cautions that's "not indicative of a boom in general business the balance of the year."

Near-term outlook is for higher prices for TV sets, once old stock is gone. New lines are generally priced higher, production is subject to ever-tightening materials controls, probable lower output rate, increasing labor costs. If demand continues high, prices have "nowhere to go but up."

Long-term, there's scant doubt about enormous future prospects for TV -- once freeze is lifted, new stations built, new markets opened up. That's assuming that, by then, civilian and defense economies are brought into promised equilibrium.

* * * *

In that connection, it's worth contemplating what GE's Dr. W.R.G. Baker recently listed as 4 principal factors affecting growth of TV after freeze thaws:

(1) Economic: "We will still be in the middle of an expanding economy, with our national gross product reaching a new high of some $310 billion or more a year, due in part to the heavy Federal military expenditures, to the Govt.'s deficit spending and to a dropping, but still fairly adequate, supply of consumer products, and a high level of disposable income."

(2) Political: "We are, and barring an all-out war, will be in 1952 living in a garrison state, a controlled economy, with definite limitations on the amount of civilian production and with controls on profits, wages and prices."

(3) Production: "If the present pattern of mobilization is followed, there will not be available for manufacture of TV sufficient critical materials for industry to produce more than 5,000,000 sets in 1952. It may even be 4,000,000 or less, if proposed restrictions on critical materials are adhered to rigidly. It might even be fewer sets if nickel is unavailable for receiving tubes.

"It takes a long time for many of the military contracts to build up to any volume, and that is particularly true for complicated military electronic equipment requiring a large amount of engineering. The major drain on the supply of critical basic materials will fall most heavily in 1952 and early 1953."

(4) Scientific: "Improved black-and-white receivers for uhf as well as vhf will be available. Picture tube sizes are still increasing. No compatible color receiver of an all-electronic type will have been developed to the point that it will be in quantity production by the time the freeze is unfrozen."

CUTBACKS BITING NOW—TROUBLE AHEAD: Let's not kid ourselves -- there'll be tough times ahead. TV-radio-appliance production is bound to dip further as inventories of materials are used up, metal rations get tighter and component shortages develop.

Some of the optimistic statements by high govt. officials recently do not appear to be borne out by the facts. It's known that these same men -- in off-the-record remarks -- see plenty trouble ahead in production situation.

While NPA was telling industry groups this week that consumer durable goods may get 10% less copper and aluminum during first-quarter 1952, for example, Defense Mobilizer Charles E. Wilson reported to the President and the public that civilian manufacturers may get enough materials during first quarter to allow them to operate "substantially at fourth-quarter levels" (see Mobilization Notes, p. 11). This is a view we haven't heard from any other production control official.

To satisfy total military and civilian demand for metal in first quarter would require: 205% of total available supply of structural steel; 160% of alloy steel; 170% of stainless steel; 166% of copper wire; 177% of aluminum.

Already these shortages have bitten heavily into appliance output. GE and Westinghouse are eliminating from their lines some small appliances such as waffle irons and sandwich grills, and GE is cutting refrigerator output to 50% of first-quarter level. Shortages of nickel, steel, copper and zinc were blamed for shutdown this week of GE's Hotpoint plant in Milwaukee, which idled 600 workers.

That material shortages are going to hurt this quarter, is indicated already

by widespread claims of brand-name TV manufacturers that distributors are demanding all the sets they can now supply. Bendix, for instance, says some of its models are on allocation to distributors "despite the fact that production lines...are moving on regular schedules based on copper allotments."

"Our own CMP allocations would restrict our fourth-quarter production to a fraction of the 1950 period," declared Magnavox president Frank Freimann this week. "Inventories generally are not large enough to compensate for production curtailments in the offing," he said. "The apparent uncertainty that still prevails in relation to the industry is inconsistent with the govt.-enforced production cutbacks that will prevail in the coming months."

* * * *

Another cut in fourth-quarter steel-copper-aluminum was announced Oct. 1 by NPA -- in form of ruling that any unfilled order calling for third-quarter delivery which is not shipped by Oct. 7 must be charged against fourth-quarter CMP allotment. Move was necessary to break log-jam of undelivered orders backed up on mill order boards -- but no matter how you slice it, it's a cut in metals for this quarter.

Fourth-quarter copper crisis has been relieved somewhat by withdrawal of 30,000 tons from govt. stockpile, but there's still strong possibility some users won't get their full fourth-quarter allotments. And stockpile withdrawals must be paid back within year.

Aluminum is now most serious item in fourth-quarter picture -- due to the drought-induced power shortage in Pacific Northwest. Although dry spell apparently is over, much production was lost, and aluminum stockpile is too low to draw on.

Acute aluminum-copper shortage in first and second quarters of 1952 was predicted this week by DPA-NPA chief Manly Fleischmann -- because of rising military "take" of these metals. While govt.-sponsored expansion program should blot out the aluminum shortage by end of next year, he said, "the shortage of copper, like death and taxes, will always be with us."

There's less copper available this year than last, in face of far greater demand, says Frank Hayes, NPA's top copper expert; "and in 1952, and running into 1953, we will be very fortunate if we can maintain our present [copper] production."

Trade Personals: Michael D. Kelly, promoted from asst. to TV sales mgr., Hallicrafters, succeeding Paul H. Eckstein, resigned to form own electronics sales rep firm with offices in Pure Oil Bldg., Chicago . . . John Mahoney, Hallicrafters sales promotion mgr., succeeds Charles J. Nesbitt as adv.-public relations mgr., Mr. Nesbitt joining Critchfield & Co., Chicago ad agency headed by his father . . . Other Hallicrafters executive appointments, mainly promotions, announced this week by Wm. J. Halligan, president: Wm. J. Halligan Jr., communications radio sales mgr., named radio sales mgr.; Wm. S. Wright, works mgr., to operations mgr.; Fred T. Page, ex-Ford, controller; J. C. Matthews, asst., to purchasing director; Rudolph W. Westerfield, director of procurement, to executive staff . . . James C. P. Long, head chief of Navy Dept. material coordination section, joins Washington engineering staff of Sprague Electric Co. as asst. to John P. Sheridan . . . James R. Hill, ex-Herbert H. Horn Co., joins Hoffman Radio in charge of TV parts warranty program, succeeded as gen. service mgr. at Horn by Clarke Latimer . . . Marshall C. Wells named sales promotion mgr., Hoffman Sales Corp., Los Angeles . . . James B. Ferguson named chief engineer, Link Radio, with F. A. Schaner in charge of govt. accounts; Harold Heimark, commercial; J. W. Campbell, engineering coordination . . . Ignatius Volpe, ex-Air King and Jewel Radio, named chief engineer, Steelman Phonograph & Radio . . . George M. Johnson, South-Southeast regional sales mgr., named mgr. of Chicago sales branch, Stewart-Warner TV-radio div. . . . Paul P. Pierson named mgr. of new Crosley Distributing Corp. branch in Omaha; Crosley now operates own branches in New York, St. Louis, Atlanta, Albany, Portland, Ore.

SELF-FOCUSING PICTURE TUBES now comprise DuMont's entire output, and similar tubes are in production or planned by other major manufacturers. DuMont, having discontinued manufacture of conventional magnetic focusing types, is producing new zero-voltage "automatic" electrostatic focus tube (Vol. 7:20-21, 33-34) in 17, 20 & 21-in. sizes, and will put it into new receiver line.

GE is manufacturing its own version of the zero-voltage tube, also in 17, 20 & 21-in., but is still turning out magnetic focusing tubes, too. RCA this week announced new low-voltage electrostatic focus 17-in. similar to DuMont's, but with provision for adjusting focus voltage, although "focus is automatically maintained." Sylvania is known to have similar tube in the works, and Rauland has been making low-voltage tubes for some time (Vol. 7:12).

Although new tube is more difficult to manufacture than old types, it makes possible savings in cost of set manufacture, and—more important—in such strategic materials as cobalt, copper and steel. Tube manufacturers variously estimate use of new tubes will save set makers from 75¢ to $4 per set by eliminating or simplifying focus circuits.

"Ham" radio operators were granted priorities to buy parts and equipment Oct. 4 in NPA Order M-85. Order provides that members of 9 major military and emergency networks can each purchase $200 worth of priority orders on self-certifying basis. Other amateurs will be limited to $100 in rated orders. Regulation permits amateurs to pool their quotas "to meet unusual needs." The "ham" priority action was requested by defense agencies, Amateur Radio Relay League and electronic parts, components distributors.

Topics & Trends of TV Trade: A $2,000,000 promotion—including what is probably biggest giveaway contest in history—is planned by Crosley to push its new line of TVs, radios and appliances. "American Way of Life" essay contest, announced Oct. 3, will feature 5000-6000 merchandise and cash prizes, including national first prize of $10,000. In addition, Crosley will present $500,000 to churches and charities selected by contest winners. Primary purpose of huge promotion, said v.p. William A. Blees, is to counteract the "demoralizing" effect of TV-appliance price cutting. Further production cutbacks were predicted by v.p.-gen. mgr. John W. Craig, but he said this will be offset partially by technological advances.

DuMont's industrial color equipment (Vol. 6:9-10)—field sequential, 18 mc, 180 fields, 12½-in. monitors—will be used to view ramjet engine tests Oct. 9-12 for National Advisory Committee for Aeronautics, Lewis Laboratory, Cleveland. Some 1200 military and aircraft industry visitors are expected to observe demonstrations, to be conducted by DuMont engineer Patrick Gallagher.

RCA Victor's entry into air-conditioner field, selling units under own brand and made to its specifications by Fedders-Quigan Corp., Buffalo (Vol. 7:39), will come under jurisdiction of distribution v.p. Robert Seidel; RCA distributors will handle, for most part. RCA arrangement with Fedders-Quigan, it's said, is much same as that of Philco with York Corp.

RTMA reports only fraction of govt. orders, unknown percentage of total, but that fraction is illustrative of overall increase. Second quarter orders totaled $324,493,087, compared with first quarter's $184,216,795. Radar is biggest single group, amounting to $187,598,079, "communications apparatus" second with $115,500,969.

Picture tube sales by RTMA members in August totaled 210,043, worth $4,327,234, up nicely from July's 89,144, valued at $1,858,930. Figure for first 8 months is 2,851,222, worth $72,714,437. Of August sales, 98% were 16-in. and up, 93% rectangular.

Hoffman Radio ups prices of 7 new models, including $10 more on 17-in. consoles (now $350 & $360), $30 on 17-in. tables (now $260 & $270), $40 on 24-in. consoles (now $635 & $650).

* * * *

Trade Miscellany: New York dept. store sales in Sept., running 8.5% lower than same month of 1950, showed consistent TV-radio declines, according to monthly *Herald Tribune* survey revealing 11 stores with percentage declines ranging from 13 to 83 . . . Kansas City Electric Assn. sponsoring $12,000 campaign of 608 spots on 5 local radio stations to promote TV set sales, theme being "The Richest Man Cannot Buy All the Entertainment Your Family Can Have Free—on TV"; dozen distributors and Kansas City Power & Light Co. have pooled to underwrite campaign . . . August TV set sales in Washington area, according to Electric Institute, totaled 3550 vs. 10,216 in August 1950; cumulative for Jan.-thru-Aug. was 28,829 vs. 47,848 . . . Gimbels N. Y. advertising own-brand TVs (reported made by Regal) at $128 for 17-in. table, $158 console; $148 for 20-in. table, $188 console . . . Zenith shipments during Sept. totaled some $12,000,000, double August's, according to trade reports . . . Crosley reported planning to add room air conditioner and a dishwasher to appliance line . . . Magnavox price guarantee, made June 15 to last to Nov. 1, extended to Dec. 15.

GE reached agreement with IUE-CIO Oct. 4 on pact providing 2½% pay boost for 70,000 workers in 55 plants, with minimum increase of 3½¢ an hour, as well as escalator cost-of-living wage adjustment providing 1% wage increase for each 1% rise in living cost index, adjustments to be made March 15 and Sept. 15.

Mobilization Notes: Good level of civilian production can be maintained in first-quarter 1952, said Defense Mobilizer Charles E. Wilson this week in report to the President. He predicted no cutbacks heavy enough to "force many plants to close completely at a time when the military program does not require the plants nor the manpower." He pledged effort to keep civilian plants operating above "break-even point," and said "actual production levels [in fourth quarter] will probably be higher than the allotment percentages indicate, and close to levels that prevailed prior to 1950 [because of] inventories of materials on hand, substitution of less critical materials, and many ingenious conservation techniques."

As for shortages of consumer goods, Wilson said they may be avoided in 1952 if demand stays low. "In the radio and TV market, for example, consumer demand has not been high enough to eliminate some unemployment in the industry. An inventory of 2,000,000 TV sets and 3,000,000 radios is available to help offset the temporary production decreases that will be necessary as military demands upon the electronics industry increase."

TV-radio production chart, illustrating report, shows estimated future output, using 1949 as base. Production in 1950 (7,400,000 TVs, 14,500,000 radios) was 222% higher than 1949, and 1951 production is shown as about 180% of 1949 (or 6,000,000 TVs, 12,200,000 radios). Chart also forecast 1952 production at 5,000,000 TVs, 9,700,000 radios.

Mobilization program is passing out of "tooling-up" stage into actual production, said report. Third quarter military deliveries were more than $5 billion, and "by a year from now, the rate should have doubled, reaching $10-$11 billion in deliveries per quarter . . . " The defense mobilizer went on:

"In the field of electronics a relatively small number of high-cost complex radar systems account for 60% of the production dollar. Deliveries to date have been relatively low, while the industry expanded its plant and completed its tooling. The delivery rate will triple by next summer. Some of the newly-developed items are already in use. Long-range radar equipment is included in the 'radar fence' now protecting our borders; new electronic-controlled weapons are in use by ground, sea and air forces; lighter and more reliable field radio and telephone sets have proved their value in Korea."

* * * *

Personnel changes this week in mobilization and related establishments: W. W. Watts, deputy DPA administrator, has relinquished part-time duties in Washington to return to his job as engineering products v.p., RCA Victor; he will continue as a consultant to DPA . . . J. A. Milling, chief, end equipment branch, NPA Electronics Div., to head DPA Electronics Production Board while chairman Edmund T. Morris Jr. is in Europe . . . Robert E. Williams, on leave from Automatic Electric Co., named director, NPA Communications Equipment Div., succeeding Luther W. Hill who resumes duties as president of Carolina Telephone & Telegraph Co., Tarboro, N. C. . . . Walter C. Skuce, NPA asst. administrator for production controls, who directed CMP program in World War II and developed present CMP machinery, returns to post with Owens-Corning-Fiberglas, his deputy William C. Truppner taking the NPA job on acting basis . . . Gabriel J. Ticoulat, Crown Zellerbach Paper Co. v.p., named DPA deputy administrator for international problems . . . Ex-newsman Jack O. Gorrie, acting NSRB chairman since April, nominated by President Truman for permanent appointment . . . Dr. Robert M. Page, superintendent of radio division III at Naval Research Laboratory, Washington, has returned from 3-month survey of electronics developments in Germany for State Dept.

ANOTHER TURNING POINT IN COLOR struggle may well come next 2 weeks—Oct. 9-13 and Oct. 15-19—when Washington officialdom, including FCC and Congress, inspects RCA color piped from New York. All commissioners were invited to attend any time they choose, and FCC staff is expected second week.

Sen. Johnson, prime color goad on Capitol Hill, is due at 2:15 p.m. showings Oct. 11. Other Senators and Congressmen are scheduled Oct. 11-12.

In New York, thrice daily shows will be thrown open to public for first time. They were heralded by full-page ads in *New York Times* and *Herald-Tribune*, headlined "Now You Can See RCA Color Television." Demonstrations will be in Center Theater only.

Request to transmit color over RCA-NBC Bridgeport uhf station was filed this week, reason being that WNBT plans shortly to begin commercial programming 7 a.m., leaving no time for on-the-air field tests during working day. Pickups in Bridgeport area are also planned.

* * * *

From Zurich, Switzerland, came excited report from newsmen, as well as from 20th Century-Fox's president Spyros Skouras. They'd just seen CBS system projected on 9x12-ft. screen with Eidophor system (Vol. 7:29, 38). Cabled *New York Times'* correspondent: "Under laboratory conditions . . . pictures were very vivid, all color perfectly natural, all shadings delicate and of exquisite reality." UP reported: "Newsmen and spectators . . . termed the quality of the pictures excellent and many believed they outdid the best color films so far shown in movie theaters."

"A new era of prosperity" for film industry was predicted by Mr. Skouras, who said 150 U. S. theatres should be color-equipped by April 1952. Thereafter, he said, expansion will be at clip of 150 at a time, mounting to total of 2000 or so.

Transmission was by cable from adjoining room, featured an actress, fruit, flowers. Though picture was 9x12 ft., Eidophor engineers say light output of system allows pictures with area 8 times as great.

* * * *

CBS's first football colorcast of California-Pennsylvania game Sept. 29 (Vol. 7:39) apparently didn't create much stir. Stations complained about paucity of color sets, hope to gain public interest as CBS-Columbia provides more receivers later in season. Complaints from viewers, who couldn't figure out incompatible jumble on their screens, was kept at minimum by slides—transmitted at approximately 5-minute intervals via standard black-&-white—informing public what was going on.

Reactions to colorcast football varied enormously. Wrote *New York Times'* Jack Gould: "Colors were very erratic in quality and far from true . . . Different camera angles or different conditions of lighting saw the same color vary badly . . . Toward the end of the game there was an element of fatigue in continued watching, a situation that was not relieved by the patches of red, blue and green that a viewer could still see, every time he looked away from the screen . . . There may be a big difference in watching color TV for 20 minutes and watching it for 160 minutes."

Elmore Bacon, *Cleveland News:* "While color TV is a reality it is still in the novelty class. So don't start throwing away your black-&-white TV sets . . . The green grass background was somewhat too vividly green. The red in the uniforms a violent red. And the green background occasionally took on a red haze. However, in the distant shots the colors identified the two teams more distinctly than black-&-white . . . When bigger and better color broadcasting comes about, it will be fine for many programs. For others the black-&-white will be just as interesting."

Others disagreed. Wrote *Variety's* Joe Cohen: "Color is far superior to black-&-white for football." Harold Brown, *New York Herald Tribune:* "More of the atmosphere . . . made me feel I was right at the game." Mickey Greenman, *Quick:* "The best thing I've seen yet on color TV. The colors were so life-like, I felt I was part of the crowd at the game."

* * * *

Repercussions of Lawrence tube demonstrations (Vol. 7:38-39) continue, stirring up lots of queries. Consensus of those who've seen it, including engineers, continues to be: "Not too good yet, but give them some time. They may have something." Paramount Pictures v.p. Paul Raibourn, speaking this week to New York Society of Security Analysts, said company doesn't intend to go into mass production of tube, will leave that up to tube manufacturers it hopes to license. Present intention is to make enough tubes for public demonstration.

Telecasting Notes: First on TV, then movies—that's plan of actress Rosalind Russell for story she owns, *Never Wave at a Wac*, in which she'll appear on CBS-TV *Schlitz Playhouse* Oct. 18 as sort of test. If it clicks, it will be shot by her producer-husband Frederick Brisson as feature film on location at Fort Lee, Va., budgeted at $750,000, to be released by United Artists . . . Song plugs via TV are very effective, says Charles Sanford, director of *Show of Shows*. Despite music publishers' squawks that TV doesn't allow for a concentrated song drive, he told *Variety*, "a good visual presentation of a new tune can spark enough interest to hypo sheet music and disk sales [and] doesn't require the saturation previously needed in radio" . . . AFM's Jimmy Petrillo, after conferring with Hollywood Local 47 last week, predicted 70% of TV shows will originate in Hollywood within 2-3 years . . . KNXT will be call letters of CBS-Hollywood's KTSL when new Channel 2 transmitter starts operating atop Mt. Wilson about end of this month . . . Henry Christal, ex-Petry partner, forming own rep firm, radio only, is reported to have commitments from WDAF, WTMJ, WBEN, WHAS, KFH . . . New WLTV, Atlanta (Vol. 7:39), names Harrington, Righter & Parsons as national rep . . . Top educational and civic leaders comprise TV Community Council formed by KING-TV, Seattle, headed by Mrs. Raymond B. Allen, wife of U of Washington president, to advise on daily 11:30-noon weekday educational-informational programs aimed primarily at housewives . . . Fort Worth's WBAP-TV celebrated 3 years on air Sept. 28 by holding staff party for 153 employes on 1 p.m. *What's Cooking?* show . . . Miami News (WIOD) editors meet before cameras of WTVJ weekdays 6-6:10 p.m. to discuss day's news in program titled *Meet the News* . . . Successful "how" feature on KTTV, Los Angeles, sponsored by 4 local plant and fertilizer firms, is *Garden Chats with Joe Littlefield* . . . WAGA-TV, Atlanta, raised base hour rate as of Oct. 1 from $500 to $650, one-min. from $80 to $104 . . . WXEL, Cleveland, raised hour rate Oct. 1 from $725 to $800, one-min. from $125 to $160.

Thirteenth application for uhf to be filed with FCC was that of WGBI, Scranton, Pa., CBS outlet owned by Mcgargee family, seeking Channel 22. Two more vhf applications filed this week brought grand total pending to 445—cowboy actor Gene Autry's KOOL, Phoenix, asking for Channel 10, and KIFI, Idaho Falls, Ida., asking for Channel 3. [For further details about these applications, see *TV Addenda 13-M* herewith; for list of all applications pending, see *TV Factbook No. 13* and Addenda to date.]

Urgent Need for TV Code

Commissioner Walker Sounds a Warning

On Program Excesses by Telecasters and Broadcasters

Excerpts from Address before Board of National Council of Churches of Christ in U.S.; New York, Oct. 2, 1951

Editor's Note: *At the very moment an NARTB committee was completing draft of a TV code (see Television Digest, Vol. 7:40), FCC Comr. Paul A. Walker was addressing these severe—and in some instances quite deserved—strictures upon certain telecasting-broadcasting practices. These excerpts are published because we sense a growing undercurrent of reaction against dubious programming, often off-color, more often badly timed; because they reflect the sort of complaints being received by the FCC; and because the venerable Mr. Walker, oldest member of the Commission on which he has sat for 18 years, an elder in the Presbyterian Church, and an ardent TV fan, doesn't often speak out so sharply—but this time felt he had to do so. His remarks emphasize the pressing necessity for standards of self-regulation and for the entire industry's wholehearted cooperation in the NARTB code effort.*

"YE shall know the truth, and the truth shall make you free."

These words of St. John might very well serve as a guide to broadcasters and all those who are interested in the improvement of radio and television service. Unfortunately, there are those who seem to disregard this principle and are more concerned with the financial aspect of broadcasting than they are its cultural and spiritual value.

A recent issue of the *Chicago Daily News* carried an article about a television program over a station in Chicago which featured a game of Russian Roulette. As you know, in this game one bullet is put in a revolver, the chamber is spun, the gun is put to the head and the trigger is pulled. The chances are one to six that the one pulling the trigger will be killed. This particular program was broadcast about 9 o'clock in the evening and among its many viewers were five teen age boys who had a spirit of adventure. One of them shot himself after the third try and died. A writer for the *Chicago Daily News* commented regarding this tragedy:

> This is not an isolated incident. It was merely more dramatic and more immediate in its results. It would be good if American youngsters could take care of themselves. Unfortunately, they can't. They need leading. Leading them to Russian Roulette, to crime, to passion, to horror, as shown on so many television shows is the height of irresponsibility.

This unfortunate incident and the comments of the newspaper man about it deserve our most serious thought. It illustrates most dramatically the impact that this new electronic marvel of television can have upon the thinking and behavior of our people, especially our children. Its use for good or evil will to a large extent, I believe, depend upon the character and sense of public responsibility of those who are licensed to operate stations and the constructive efforts and helpful assistance of individuals and groups such as your own.

Radio and TV Do a Good Job

By and large, I think it may be said that radio and television stations do a good job in this country. We have developed a system of broadcasting in the United States which on the whole far surpasses any other in the world. For example, we were recently thrilled by the first nationwide network telecasts which brought the sessions of the Japanese Peace Treaty Conference into the homes of millions of people throughout the land. The construction and splendid performance of this network are a tribute to the genius of American enterprise. The video transmission of the sessions and the commentaries of experts coming from the meeting rooms constitute a superb achievement in mass communication and education. Many radio stations have demonstrated a high sense of public responsibility and have contributed richly to the well-being of the communities in which they operate. A splendid example of this is the First Radio Parish Church of America, which has been carried by Station WCSH in Portland, Maine, for more than 25 years. Commissioner Sterling recently attended its 25th anniversary and paid high tribute to the station and to Pastor Howard O. Hough who started the church and has faithfully carried it on through the years.

Despite such excellent performances, however, we must honestly recognize that much of what we see and hear on American radio and television has little cultural, educational or spiritual value and some of it is positively harmful.

The correspondence which regularly comes to the Federal Communications Commission is striking evidence of the public reaction against some of this degrading programming. Almost daily we receive substantial quantities of mail from irate citizens who protest the advertising of alcoholic beverages, indecent or profane programs, false or misleading advertising, crime and horror stories, and other types of inferior programs. The other day I received a letter from a distressed woman in Wisconsin pleading for some restraint on TV programs which border on the vulgar and do violence to generally accepted moral standards.

What They Complain About

As I pointed out recently in a speech to the National Education Association, we have many fine radio and television programs but we are still plagued with some that border on cheap burlesque; that dramatize tales of horror that make children scream in their sleep; that contain prolonged disc-jockey shows with repetitious chatter; that dramatize anti-social behavior and make it appear harmless and even respectable.

I think you may be interested in excerpts from some of the letters which have recently been received by the FCC in which complaints have been made regarding radio and television programs. A gentleman from Milwaukee writes: "As a frequent radio listener, it is my conviction that it has become incumbent on your Department to revise that book of 20 years ago 'Twenty Million Guinea Pigs' upward to '50 million'.

"It seems to me there should be a time limit on commer-

cials. Yet, here today we have reducing compounds, hair oils and . . . baby diapers being sold on 15-minute commercials.

"You don't know who makes the stuff, you have nothing but the come on of a 'money back guarantee' wholly without reputation or integrity to go on."

A lady in New York complains of a "phony selling scheme" which has been carried by a station for weeks in which "high pressure sales talks" are used.

A protest comes from a lady in Arkansas. She raises the question, "Has radio reached the point where filth and foul smelling programs can be presented under the name of entertainment?" If so, she says, "then kill the whole radio system. . . ."

Crime Programs and Juvenile Delinquency

An irate gentleman from Louisiana writes: "Why isn't something done to control the number of crime and horror programs broadcast over all but one of the major networks. Some nights on one network we get as much as three and a half hours straight of crime and horror.

"Everyone talks their heads off telling about the constant increase in juvenile delinquency while some networks are permitted to broadcast three to four straight hours of crime and horror at one time.

"Why doesn't someone in authority do something? Or do the ones who could do something care what happens?"

Another distressed woman writes that "My little 5-year-old granddaughter sits in utter absorption oblivious to everything else around her," listening to all the "gruesome murder stories, people shooting and being shot, beating each other up, screaming and dying, etc., etc. These things cannot help but have a bad effect upon the kids."

A woman in Los Angeles writes: "May I as a conscientious citizen appeal to you in regard to the appalling amount of crime-detective programs presented on the radio. Fortunately, I can control the listening habits of my own impressionable-aged children but I shudder to think of the many, many younger boys and girls, teen-agers and even adults who listen and are unfavorably influenced by these dreadful, immoral, overdone, over-emphasized crime stories. If just half such programs were removed and replaced by a higher type of presentation, one to cultivate and strengthen rather than break down the public thinking, there would still be an abundance for the ardent detective story listener." She concludes her letter by saying: "Please give the children something to build on instead of a picture of crime and insanity after which to pattern their lives."

Not long ago a doctor in a large city wrote regarding the program service of two of the three television stations in that city saying they spent the whole afternoon from 3 to 6 o'clock advertising beer and giving race results.

'Vulgarity and Obscenity'

Recently the Commission received a copy of a resolution adopted by a ministers' association in a large city deploring the vulgarity and obscenity which characterize many of the programs broadcast by radio and television stations. This resolution reads in part:

> Through the medium of radio and television, a deluge of burlesque show humor, liquor advertising and barroom vulgarity is forced upon us. Our boys and girls are urged to drink. This is repeated again and again and programs glorify drinking liquor. To us it seems that radio and television are more concerned with revenue and with catering to a minority of people with a love for smut than they are the principle of service.
>
> We believe that the service motive is a sound business principle and that all forms of recreation, including radio and television, should re-create; that is, should be constructive and promote development and growth.
>
> . . . We urge an emphasis upon programs which promote a respect and love for truth, beauty, goodness and the God given sense of humor.

The attitude of some leading citizens with respect to the general quality of radio and television programs is well expressed, I think, by a prominent writer* in these words:

> Radio remains, and increasingly becomes, a technical triumph. But it would not be an exaggeration to say that nine out of ten of the voices that the listener summons when he turns the dial are the voices of mediocrity—and of immaturity: mediocre actors speaking mediocre lines—or actors who deserve better lines trying to inject meaning into the meaningless: mediocre singers singing mediocre songs; mediocre comedians laboring to make old jokes sound new; mediocre commentators sharing the air with their more penetrating and responsible fellows; mediocre quiz masters asking questions and handing out prizes; mediocre advice-givers responding to deep human perplexities with pat mediocre advice. If, from the point of view of man's maturing, the test we must put to radio is that of its *average* influence or its most frequently exerted influence, the answer is not reassuring.

Opposes Government Censorship

Now there are some who have become sufficiently aroused to urge governmental intervention. They honestly believe that the only way to secure the highest quality program service is through government censorship. I, for one, however, do not subscribe to this school of thought. I do not believe that a few officials in Washington should have the power to tell 150,000,000 people what they may hear and see on radio and television. Congress wisely prohibited censorship and limited the authority of the FCC with respect to program service when it passed the Communications Act of 1934 and established the agency.

While the Commission does exercise authority insofar as the law permits, the improvement of broadcast program service must come primarily as a result of effective leadership by responsible citizens and organizations in the community and nation and broadcast licensees who are responsive to that leadership and influence.

Churches and their leaders have contributed immeasurably to the well-being of this country. The words, "In God We Trust," have a real and profound meaning for most Americans. According to a recent survey more than 80,000,000 of our people are affiliated with one church or another and of this number more than 50,000,000 belong to Christian churches, a substantial portion of which are represented by your organization. I understand that the total membership of your group is about 32,000,000. Religion, therefore, is a vitally important aspect of the American way of life. For this reason, the FCC has consistently looked with favor upon the broadcasting of religious programs and has always considered them as an important element of the public interest. In fact, when stations apply for renewal of their licenses, they are required to state what time they have devoted to religious and cultural programs and how much they propose to devote in the future.

Most Stations Generous with Time

By and large, stations have been generous in providing time for such broadcasts and the files of the Commission show that there has been an over-all increase in the granting of time to churches and other religious groups in the past few years. However, there have been some disturbing examples of stations that have discontinued all religious programs to make way for those which are commercially profitable. Your organization and others similar to it can help to improve this situation. Through surveys and studies of your national and local groups you can continue to keep the general public, the government and broadcast licensees informed of the religious and moral needs of the nation and the radio work that is being done to meet these needs . . .

A Nobel prize winner has recently said that science and religion are the answer to the world's problems. The advances in science are giving us new devices and techniques but we know full well that science alone cannot give us a healthy and happy world. The philosophy and faith which motivate the use of these new scientific tools are crucially important. As Jeremiah has said: "Thus saith the Lord: Let not the wise man glory in his wisdom, neither let the mighty man glory in his might, let not the rich man glory in his riches: but let him that glorieth glory in this, that he understandeth and knoweth me, that I am the Lord which exercises loving kindness, judgment and righteousness, in the earth: for in these things I delight, saith the Lord."

NEW TV STATIONS WON'T LACK FINANCING: Plentiful flow of capital into new TV station construction and operation is assured, once FCC lifts freeze and starts granting CPs -- possibly sometime next spring (Vol. 7:36-37).

Eager entrepreneurs, now balked by the freeze and frustrated by unavailing efforts to buy existing stations, are literally straining at the leash to get into the field. Here are some of the current trends:

(1) Just about every existing station has had offers to buy -- even those owned by some of the longest-established and best-heeled interests in radio, like the Chicago Tribune (WGN-TV), Kansas City Star (WDAF-TV), Detroit News (WWJ-TV) and Milwaukee Journal (WTMJ-TV).

Purchase offers for all or part interest have sometimes mounted to fabulous figures, but it's apparent few if any of the 108 stations can now be had that way.

(2) Theatre owners, spurred by recent TOA convention report (Vol. 7:39), will be among the most ardent seekers after channels, once these are available, competing against or joining with other local interests in corporate applications. You can expect scores of such applications from now on, possibly as many from theatre people as from the radio and newspaper interests who comprise the bulk of the 446 applications already on file with FCC.

Only 4 stations, as of now, are owned outright by theatrical interests, as listed on page 31 of our TV Factbook No. 13. Same volume, incidentally, plus weekly Addenda to date, provides complete listing of all applications filed thus far.

(3) Even the slick magazine people are showing intense interest in station ownership -- in possibility of getting hands on a medium that not only threatens advertising competition but is also a "natural" for self-promotion and at same time looks like a profitable business per se.

Time-Life-Fortune, Saturday Evening Post, Collier's, et al, have done considerable research into TV's "impact" -- Time-Life also buying network time now and then, besides producing films for TV, while Post is regular network program sponsor. But though Henry Luce offices admit "multiple applications for franchise may be in the cards," only one such publisher has as yet actually moved into station field: Meredith Publishing Co. (Better Homes & Gardens, Successful Farming), which founded WHEN in Syracuse 3 years ago and recently purchased WOW-TV, Omaha (Vol. 7:32,39).

(4) Several Washington radio attorneys have been instructed by clients to "get stations where you can, vhf or uhf, either through application or purchase."

Most such instructions are from radio station owners who missed the boat only a few years ago, when FCC was literally begging for TV franchisers. Eagerness to get into swim now is epitomized by CBS's proposed purchase of WBKB, Chicago, for $6,000,000 and its v.p. Joseph Ream's recent candid statement to FCC on reasons why networks must own and operate key TV outlets (Vol. 7:36).

(5) Present TV station owners and others hope to expand holdings, evident by their multiple applications and by astute George B. Storer's $1,050,000 purchase of

Copyright 1951 by Radio News Bureau

San Antonio's KEYL (Vol. 7:30) -- approved this week by FCC, making 4 he now owns. In last few weeks, we've also reported how Taft interests (WKRC, WKRC-TV & Cincinnati Star-Times) bought into WBIR, Knoxville, and how owners of WTCN & WTCN-TV, Minneapolis (Ridder newspapers) bought into WEMP, Milwaukee -- both minority stock purchase deals with frankly avowed idea of bolstering future quests for TV (Vol. 7:38-39).

There will be many more such "junctions of interest", possibly conducing to fewer competitive applications and speedier local grants.

(6) Financing won't be hard to swing for well-positioned local interests who win grants. Aside from its intriguing nature, the earnings potential of TV makes it an attractive investment through usual channels (local bankers).

When Variety reports, as it did recently, that New York's big Chemical Bank & Trust Co. is making production loans for TV films, although that syndication field is mere 108 stations, the much-more-profitable prospect of station operation would seem to be bankable indeed. At this moment, a New York financial group is known to be perfecting plans to finance new stations by way of equipment loans -- a project which, if approved by FCC, may help many small operators pay their way in.

* * * *

Foregoing picture could change -- but as of now it's safe to say that many millions in new capital would flow into telecasting readily if FCC would but open the floodgates. And just as certain is fact that "bargain buys" in existing stations aren't available any more.

There have been only a dozen TV station sales to date -- listed on p. 12.

BACK OF MACY-O'NEIL TV-RADIO MERGER: There's much more than meets the eye in vague statement released Oct. 10 that R.H. Macy & Co. (WOR & WOR-TV) and General Tire & Rubber Co. (Thomas S. Lee Enterprises) will merge their radio and TV interests in one operating company in which General Tire will hold "substantial majority."

Details weren't divulged, and it may take 60 days to file requisite applications with FCC. But these are some of the discernible factors:

(1) Merger will give virtual control of Mutual Broadcasting System to new firm, to be headed by Thomas F. O'Neil, who is also chairman of MBS. Only 35, that astute president of big General Tire's TV-radio subsidiary has long envisioned MBS changed from a mutual operation to a corporate entity operating for a corporate profit, like its competitors. At present, his Thomas S. Lee Enterprises Inc. owns 38% of MBS stock, with Macy's owning 19%, Chicago Tribune (WGN & WGN-TV) 19%, and some 7½% each owned by Gimbels of Philadelphia (WIP), Cleveland Plain Dealer (WHK & WHKC) & CKLW of Windsor-Detroit.

Though MBS bylaws preclude one company from voting more than 49%, there's scant doubt about who's in the driver's seat. O'Neil's group owns WNAC-TV, Boston, and KHJ-TV, Los Angeles; and in radio the Yankee Network of New England (owning WNAC, Boston; WEAN, Providence; WONS, Hartford); and Don Lee Network (owning KHJ, Los Angeles; KFRC, San Francisco; KGB, San Diego).

(2) With 3 TV outlets thus so strategically placed, plus Chicago's WGN-TV, young Mr. O'Neil may have ideas of another TV network after freeze lifts and new outlets come into being. But as one company, merged firms (name not yet indicated) can apply for or buy only 2 more stations of own in view of FCC's 5 limit, whereas separately they could seek 5 each. Macy's once owned what's now WTOP-TV, Washington, sold it at nice profit. O'Neil sold KTSL, Los Angeles, to CBS for $3,600,000 when he bought Don Lee group, then bought KFI-TV there (now KHJ-TV) for $2,500,000.

(3) Merger is designed to bolster MBS against inroads of TV and of rival networks, particularly in light of NBC's revolutionary new plan for revising station affiliation and network advertiser relationships (Vol. 7:40) -- albeit merger was cooking for quite awhile before NBC revealed plan last week. One facet of NBC plan is to add some 100 more radio station affiliates on "no pay" basis for sponsored programs that's not unlike present arrangement MBS has with most of its affiliates. This may presage intensified network rivalry in wooing affiliates.

(4) New company may even venture into TV-radio manufacturing, a la CBS, for it's known that O'Neil has been exploring possibilities -- probably encouraged by

big parent manufacturing company, which is headed by his father. It's reasonable guess Macy's and associated stores might like own manufacturing source for private-label TV sets. And that General Tire dealers could become retail outlets for TVs.

(5) Stockholdings of Macy's in new corporation aren't known yet, but they are likely to be much less than half General Tire's by reason of fact latter puts more into pot and WOR-TV has been running deficits since it was founded 2 years ago.

While WOR has always been one of radio's most profitable stations, late-starter WOR-TV (est. Oct. 5, 1949 as last of New York's 7) has only lately been pulling out of the red. Latest Macy's annual report, for fiscal year ending July 28, shows TV-radio and other "non-store" profit of $585,994. But whereas Moody's Manual shows 1950 fiscal year's deficit in this category was $283,509, Macy's report says deficit actually was only $120,989. TV obviously accounts for slide, for profits for pre-TV's fiscal 1949 were $728,905; 1948, $968,526; 1947, $1,045,605; 1946, $1,132,691; 1945, $1,323,449 -- nearly all attributable to WOR.

GOVT. ACTS AGAINST TV SPORTS BLACKOUTS: Restrictive agreements limiting telecasting and broadcasting of sports events will be cracked wide open if Justice Dept. wins its "test case" against National Football League.

Legality of National Collegiate Athletic Assn.'s college football TV "experiment" and International Boxing Club's theatre-TV hookup will be in serious doubt if courts uphold govt.'s "monopoly" contention against NFL.

Baseball's major leagues, apparently seeing handwriting on the wall, this week purged themselves by repealing all restrictions on telecasting and broadcasting of member clubs' games.

Prodded by complaints of TV set owners, Govt.'s anti-trust division Oct. 9 filed suit in Philadelphia against NFL and its 12 member clubs, seeking injunction against league rules restricting telecasts and broadcasts.

This means the long talking and investigating phase of Justice Dept.'s probe of sports-TV is over -- a clear-cut decision is now up to the courts. Said govt.'s ace trust-buster asst. attorney general H. Graham Morison:

"We are filing now what we consider our best case. If this is successful, it is likely that action will be taken in the cases of all other sporting events, including college football, professional baseball and boxing, in which telecasts and broadcasts are restricted."

Obviously anticipating Justice Dept. action, baseball's major leagues met in New York day before Govt. filed football suit, wiped from their books rule governing telecasting and broadcasting. With repeal of rule 1-D, major leagues relinquished all authority over telecasts and broadcasts of member clubs' games -- so that such arrangements now are entirely up to the clubs themselves.

Repealed rule provided that no club could permit telecasts or broadcasts of its home games from any station located within the home territory of another major or minor league club while that club is playing a home game -- almost exactly the same as the NFL rule which prompted govt. suit.

Anti-trust probers have also been looking into NCAA's "controlled TV experiment" -- under which assn. has doled out certain of its member colleges' football games to home TV, kept others off TV screens and encouraged exclusive theatre TV and CBS color telecasts.

Federal grand jury probe of alleged monopoly in professional boxing began this week in New York. Probers will probably delve into International Boxing Club's theatre-TV exclusives and home TV-radio blackouts before they're dismissed.

* * * *

Ticket to sports event is a commodity, said Justice Dept. in action against NFL. This is basic premise of monopoly suit: "If any sport sells a ticket, it is offering a commodity on the market. The public should be able to buy what it wants free of any monopoly and free of any restraint. This is not so now." Said Morison:

"We feel that the American people are entitled to have, free of monopoly, the right to see or hear what they want."

Govt. isn't fighting to guarantee telecasters rights to all sports -- it's

hitting only at what it calls "monopolistic restraint." Justice Dept. feels that authority to sell TV-radio rights should belong to each individual team -- not the leagues and associations. Morison's statement shows govt.'s attitude:

"It is hoped that this action will make broadcasts and telecasts of professional football games more readily available to the public by removing restrictions on the right of each football club to determine for itself whether and on what terms it will sell its broadcast and telecast rights. We consider all restrictions of this type, wherever imposed, to be in violation of the anti-trust laws."

NFL has 20 days to file answer in Philadelphia U.S. District Court. Purpose of suit, said Attorney General J. Howard McGrath, is "to clarify the position of broadcasting and telecasting in relation to the sports world; it involves some of the most often complained of and aggravated restrictions on the dissemination of athletic events to the public."

FCC FEARS 'CENSORSHIP' IN BENTON BILLS: Sen. Benton's bills on TV are neither necessary nor desirable, FCC majority told Senate Interstate & Foreign Commerce Committee in letter released by Committee this week.

Commission turned thumbs down on all facets of bills (S.J. Res. 76 and S. 1579) which would: (a) set up 11-member program advisory board to report to Congress and Commission; (b) require FCC to grant 1-year TV licenses; (c) force FCC to "encourage" subscription TV. With Comrs. Coy and Walker dissenting on advisory-board facet of bills, Commission said:

(1) TV licenses are now for one year only and FCC's discretion in setting license period shouldn't be taken away.

(2) Tests of subscription TV have been authorized. It's unnecessary to tell Commission to encourage it, since Communications Act requires FCC to "encourage the larger and more effective use of radio in the public interest."

(3) Advisory board, as contemplated in the Connecticut Senator's bills, involves "dangers of censorship". Amplifying, Commission warned that while FCC is "expressly precluded from exercising any powers of censorship," new board wouldn't be. FCC was also worried lest board encroach upon Commission's functions, despite fact bill calls it "advisory".

Comrs. Coy and Walker were minority on board idea, believing "worthwhile results may flow from the type of study proposed in the bill." But they didn't go all the way with Sen. Benton, since they said:

"Such a group, if completely separated from the Commission...and having no authority with respect to licenses, could conduct such studies more effectively without arousing fears among broadcast licensees that any recommendations they might make constituted compulsion of any kind...It is not believed that the [board's proposed functions] in any way involve censorship." They suggested that board report only to Congress, and that it should have power to hold hearings.

EXEMPTION of many TV-radio station construction projects from NPA building curbs (Vol. 7:31-33, 35-40) may result from current discussions at high govt. levels. NARTB is pushing hard to have broadcast stations reclassified as "industrial facilities"—which would permit broadcasters to write their own priority orders for controlled materials up to 25 tons of steel, 2000 lb. copper and 1000 lb. aluminum quarterly without applying to NPA for construction go-ahead. Broadcast building presently is classified as "commercial" construction, requiring application to NPA for all materials in excess of 2 tons of steel, 200 lb. copper, any aluminum at all, on quarterly basis.

NPA this week reclassified newspaper and other publishing establishments from "commercial" to "industrial" categories—and NARTB now sees good possibility of similar reclassification of TV-radio stations, since top govt. officials gave assurances months ago that broadcasting stations and newspapers would receive equal treatment under NPA construction regulations.

NARTB says it's satisfied that NPA officials have "leaned over backwards" to give broadcasters a fair break in allocation of building materials for fourth quarter. Score so far is 16 TV-radio projects approved, 6 denied, more approvals to come (Vol. 7:37-40). NARTB says it hasn't received single complaint from broadcasters of unfair treatment by NPA.

Denver's accolades, well-merited, are heaping on KFEL owner Gene O'Fallon, veteran broadcaster who once was strongly anti-TV but who brought World Series to that city via special hookups of receivers into transcontinental relay (Vol. 7:40). "We would like to pin some Colorado columbines [on] O'Fallon and general manager Frank Bishop for the very swell 'production' job they gave Denver in our town's first viewing of TV," wrote *Denver Post's* Jack Carberry Oct. 8. "It was a swell show and it will be nice indeed when Denver and the Rocky Mountain area get TV in the home in 1953 [which] is as soon as anyone can expect it." Newspapers devoted dozens of columns of news and pictures to TV over period of week.

Station Accounts: First early-morning sponsorship of TV news program is claimed by WPTZ, Philadelphia, with sale of 8 a.m. live news-sports strip to Tom Thumb Donut Corp., thru Abner J. Gelula & Associates, Philadelphia; WPTZ says Sept. Telepulse survey gave 8 a.m. news a rating of 2.5 or average of some 22,000 homes . . . New *Kathi Norris Show* on WABD, New York, 11-noon Mon.-thru-Fri., now has these participations: Philadelphia Dairy Products Co. (Dolly Madison ice cream), thru Sheck Adv.; Eastern Div., A & P Tea Co. (Jane Parker bakery products), thru Paris & Peart; Seabrook Farms (frozen foods) & John G. Paton Co. (Golden Blossom Honey), thru Hilton & Riggio; Personal Products Corp. (Co-Ets), thru Young & Rubicam; Louis L. Libby (pre-cooked chicken & onion rings), thru Hicks & Greist; Ulman & Co. (Princess Place Mats), thru Posner-Zabin . . . CBS-TV Spot Sales reports placing these syndicated film features: *Hollywood on the Line*, on WDAF-TV, Kansas City, for Katz Drug Co.; *Strange Adventure*, on KING-TV, Seattle, for Standard Service Tire Co., and on WOW-TV, Omaha, for Max I. Walker Cleaners; *Cases of Eddie Drake*, on KTSL-TV, Los Angeles, for Thrifty Drug Co. (27th station) . . . Pacific Olive Co., Visalia, Cal., plans TV-radio spots Oct.-thru-Feb. to promote California olives, thru Abbott-Kimball Co., Los Angeles . . . Vitamin Corp. of America (Rybutol) now placing its *Lorraine Cugat Show*, kinescoped from live performance on KECA-TV, Los Angeles, on ABC-TV's other 4 stations, thru Milton Weinberg Adv., Los Angeles, and Harry B. Cohen Adv., N. Y. . . . Borden Dairy sponsoring *Ransom Sherman* in weekly Mon. afternoon show on WBKB, Chicago, thru Young & Rubicam . . . Zenith Radio, now buying spot TV-radio, sponsoring *Latin Carnival* on WJZ-TV, New York, Sun. 11-11:30 p.m., cooperatively with Winston Stores, thru Albert Blake Associates . . . Florida Citrus Commission has upped TV-radio ad budget to $407,000 for TV, $253,000 for radio, placed through J. Walter Thompson, N. Y. . . . Among other advertisers reported using or preparing to use TV: American Buslines Inc., thru Hanson & Hanson Inc., Chicago; Old Dutch Coffee Co., thru Elliott Nonas Adv., N. Y.; Dennison's Foods (food products), thru Biow, San Francisco; Jenny Inc. (women's apparel), thru Associated Adv. Agency, Cincinnati; Seal Rite Caulking Co. (caulking compounds), thru Davis-Daniels, Detroit; Industrial Tape Corp. (Texcel cellophane tape), thru Kenyon & Eckhardt, N. Y.; Shell Oil Co., thru J. Walter Thompson, San Francisco (KTLA & KRON-TV); Denver & Rio Grande Western Railroad Co., thru Axelsen Adv., Denver (KSL-TV).

Network Accounts: Chevrolet sponsors *Dinah Shore* from Hollywood starting Nov. 27 on NBC-TV, Tue. & Thu. 7:30-7:45, thru Campbell-Ewald Co., Detroit; time is being vacated by Van Camp's *Little Show* . . . Emerson Drug Co. (Bromo-Seltzer) will present special football roundup show between transcontinentals for Gillette-sponsored *Army-Navy* and Westinghouse-sponsored *Notre Dame-USC* games on NBC-TV, Sat., Dec. 1 (Vol. 7:40) . . . National Carbon Co. (Prestone anti-freeze) Oct. 14 starts sponsorship of 12:30-1 portion of *Take Another Look*, filmed football show, on CBS-TV, Sun. 12:30-1:30, thru William Esty . . . Longines-Wittnauer Watch Co. Nov. 22 sponsors *Thanksgiving Day Festival* on CBS-TV, Thu. 5-6, thru Victor A. Bennet . . . Waring Products Corp., subsidiary of Claude Neon Inc. (Waring blendors & steam irons) starting Oct. 19 buys participation in Fri. segment of *Homemakers Exchange* on CBS-TV, Mon.-Fri. 4-4:30, thru Hicks & Greist Inc., N. Y. . . . Hollywood Candy Co. begins weekly sponsorship Oct. 27 of *Hollywood Junior Circus* on ABC-TV, Sat. 10:30-11, thru Ruthrauff & Ryan, Chicago . . . Chesterfield reported readying sponsorship of *Meet the Press* on NBC-TV, time & date unknown.

Personal Notes: William R. McAndrew, gen. mgr. of NBC's WRC & WNBW, Washington, promoted to director of NBC-TV news & special events, moving to New York Nov. 1; his successor is Gene Juster, program director, with Charles deLozier moving up to asst. gen. mgr. . . . Mark Woods, ex-president of ABC, joins with J. R. Warwick, ex-v.p., Warwick & Legler, to found new ad agency, Woods & Warwick, Chrysler Bldg., N. Y. . . . Noran E. Kersta, ex-NBC-TV operations chief, recently with Wm. H. Weintraub Adv., has established Noran E. Kersta Co., TV consulting-advisory service at 143 Meadow St., Garden City, N. Y., telephone 3-1075 . . . Peter Storer named public service director of WJBK & WJBK-TV, Detroit, controlled by his father George B. Storer . . . Norman H. Sloan, ex-KECA-TV, named coordinator of TV production, ABC Hollywood . . . Don Foley, ex-NBC, joins WCBS as director of advertising-sales promotion, succeeding Robert Patt, now holding similar job with CBS-TV . . . J. A. Hicks, ex-KEOP, El Paso, named film director, KEYL, San Antonio, replacing Robert Dalchau, joining Army . . . Frank Mayer, from RKO-Pathe, named production mgr., Princeton Film Center . . . Albert A. Chesnes named mgr. of Paramount's theatre-TV dept., Jack Hammer named supervisor of theatre-TV film processing . . . Dick Pitts, ex-Council of Motion Picture Organizations, joins Theatre Owners of America as public relations chief . . . Hal Hackett, chief of MCA's TV dept. shifted to TV dept., which has also added Alex March, ex-Wm. Morris. .

Telecasting Notes: Big turnout of both members and non-members of NARTB-TV is assured at final code-formulating meeting in Chicago's Hotel Stevens, Fri., Oct. 19. Intensity of interest in problem of self-control, before either officialdom or the bluenoses step in (Vol. 7:40), is indicated by huge demand for extra reprints of FCC Comr. Walker's recent speech before Federal Council of Churches of Christ in U. S.—a temperate, though critical, appraisal of current faults of telecasters-broadcasters (see Special Report, Oct. 6). Both Comr. Walker and *Television Digest* have had requests for extra copies running into the hundreds . . . Ironically enough, NARTB-TV has thus far been able to persuade only 68 of the 108 stations, only 2 of the 4 networks, to join association—this despite admirable work it has done both on program standards and on excess profits tax relief . . . Another AM joining NBC as result of relationship knitted by TV: WNHC, New Haven, operated by same interests as WNHC-TV; on Oct. 8 New Orleans' WDSU (WDSU-TV) shifted from ABC to NBC . . . WOOD-TV are new call letters of former WLAV-TV, Grand Rapids, effective Oct. 19, in conformity with recently approved purchase of station by Bitner interests (Vol. 7:37); new rep is Katz . . . Dixie Drive-In Theatres president, Harrison Robinson, one of stockholders in new WLTV, Atlanta; holds 12½% . . . Balaban & Katz's WBKB, Chicago, will shortly take over Garrick Theatre, owned by B&K . . . WKY-TV, Oklahoma City, now begins telecast day, weekdays, at 9:30 a.m., moving forward from 1 p.m. as of Oct. 1; Saturday opening is 8:45 a.m. . . . WOR-TV, New York, now signing on at 10 a.m. weekdays with test pattern, followed by *Telefax News*, "newspaper of TV," 10:30 a.m.-12:30 p.m. . . . Educational world watching closely results of televised credit courses for shut-in students of high school age titled *The Living Blackboard* and starting Oct. 15 under auspices of N. Y. Board of Education on WPIX, Mon.-Wed.-Fri. 10:45-11 a.m. . . . Successful contribution to education via TV on Newark's WATV is *Junior Town Meeting*, debates between New Jersey High School students, Wed. 8-9 p.m. . . . WTVN, Columbus, has acquired 3 acres at Harmon & Griggs Sts., will ask NPA for authority to construct TV Center, including one 3000-ft. studio.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Color Report
October 13, 1951

AFTER GLEANING KUDOS on all quarters this week, RCA color was set for another week of thrice-daily New York-Washington showings—including Oct. 16-19 demonstrations of theatre TV in color (on 9x12-ft. screen) in New York's Colonial Theatre.

Those who have seen test projections of RCA's theatre TV in color, picking up same shows being demonstrated via radio and via coaxial, claim it's just as exciting an advance as the home variety. It's called "compatible with existing equipment," uses 3 kinescopes.

RCA's next move toward getting its color system adopted isn't being revealed. But it's apparent the company is so confident now that it's willing to re-approach FCC alone without necessarily waiting for rest of industry (through National Television System Committee).

When RCA and/or NTSC will again petition FCC is unknown, as is time FCC will wait, after petition, before holding new hearing. Only thing certain is that Commission has cleared deck for freeze—and freeze only—for next few months, and has theatre-TV hearing scheduled to start Feb. 25.

* * * *

SENATOR JOHNSON and FCC Comrs. Coy and Walker were among capital VIPs who watched showings this week. Coy couldn't be reached for comment. Walker simply said he saw "an improvement." Sen. Johnson was a little more expansive, saying:

"I've seen many of these demonstrations, and there's been a gradual improvement—all headed toward perfection. It was very good—beyond my expectations." He congratulated and shook hands with RCA chairman Sarnoff, asking several questions about transmissions via closed circuits, microwave and coaxial. Though 10 a.m. showings were switched from time to time between microwave-coaxial, being broadcast, afternoon shows must be closed-circuit under FCC rulings.

Most significant was fact that Sen. Johnson showed up at all, for Congress was in thick of critical legislation and he was leaving next day for South America.

No other members of Senate or House Interstate & Foreign Commerce committees could get to demonstrations this week, though many are expected next week. All other FCC commissioners are also expected next week. FCC staff was urged to attend in memo circulated by chairman Coy early in week, with result they came by dozens. Several contacted indicated they were most favorably impressed.

Even solicitor general Philip Perlman, who lambasted RCA mercilessly during Supreme Court argument (Vol. 7:13), expressed astonishment at quality of pictures.

* * * *

REACTION OF PRESS and laymen was almost universally enthusiastic. Even those reporters who've championed CBS conceded RCA has good pictures, though they still talk of tri-color tube sets being too costly and mass production too far off. Several newsmen who have covered various phases of the Washington controversy, and have seen comparative demonstrations, were outspoken in their convictions that the system cannot be held back.

"They've got it now—no doubt about it," one of these was heard to remark.

First purpose of demonstration was to show network transmissions, over both wide-band microwave and narrow-band coaxial. Both worked perfectly, one just about as good as other. For microwave, signal is simply fed from New York to Washington just as if it were ordinary black-&-white. For coaxial, signal is heterodyned down to 2.4 mc, to fit into 2.7-mc cable, then heterodyned back up in Washington. RCA showed equipment needed for processes; it occupies one rack.

Average man finds it difficult to distinguish between results of the two transmissions, in closeups at least. Slight difference in resolution was sometimes noticed, no change in colors. Though RCA went to great pains to show coaxial transmission, spokesmen pointed out that much of AT&T's facilities is wide-band, most will be.

* * * *

LIVELIEST SHOWING was that for press, 10 a.m., Oct. 9. Dr. Elmer Engstrom, RCA Princeton Labs chief, was kept on his toes answering questions. His responses:

(1) More field-testing will go on before FCC is petitioned to reopen color issue. RCA is continuing work with NTSC. System meets all technical criteria laid down by FCC, but there's "subjective" factor—what one likes another may not. Colors can be reduced or intensified by turn of knob on receiver, according to viewer's taste.

(2) It would take 1-2 years to get into mass production of tri-color tubes. "We don't expect to have it in commercial production until we know what is going to happen to color," said Dr. Engstrom—inference being clear that FCC edict is first awaited.

(3) Principal improvements since showings in Washington last December were: better tube, more stable circuits, more flexible equipment (cameras with turrets, etc.), and equipment now in "pre-production stage" at RCA Victor plant instead of in lab.

(4) "Universal set" to get both compatible and CBS color is possible. "It costs more, but it can be done." He reiterated RCA's pitch for dual standards.

(5) "The tri-color tube will perform well with the CBS system." This refutes interview to contrary quoting CBS's Dr. Goldmark, published recently in *Broadcasting Magazine*. But Dr. Engstrom left no doubt about his opinion of CBS system.

(6) Sampling frequency is still 3.58 mc, but will be 3.89 mc (per NTSC recommendations) shortly.

* * * *

SHOW ITSELF is very much same as recent New York series (Vol. 7:37), most acts repeated, including Nanette Fabray and troupe in vari-colored costumes; also famed "Operation Lovebird," the trained bird act that provides unusually critical test of fringing, blurring, etc. Added was light opera costume scene that gave further opportunity to show off colors.

Engineers' worst moment came, ironically, at 2:15 p.m. Oct. 11 demonstration for Sen. Johnson. One camera went bad, holding up start 20 minutes. It still didn't work too well during show, causing yellowish cast in some scenes. And, capping this, rain washed out plaid-clad bagpipers marching for remote pickup at Palisades, N. J., carried in other demonstrations. But camera quite effectively showed park, wet greensward, color-clad announcer.

Next week's Washington guests include NPA, FTC, engineers, attorneys, RCA dealers and distributors, advertisers, military—along with other govt. folk, plus FCC and members of Congress.

NEW YORK SHOWINGS in Center Theatre were open to public, invited via full-page coupon ads, and they also elicited excited responses. *Herald Tribune's* Joseph Kaselow interviewed number of spectators, found those who had seen CBS color considered RCA's as good if not slightly better. He also wrote:

"There was virtually unanimous agreement that the direct-view RCA system had one advantage over the CBS revolving-disk color method . . . With the direct-view method a viewer could be far to the side and see the picture without distortion, in contrast to receivers using a magnifier."

Kaselow spotted 2 CBS engineers in crowd, saw questionnaires they filled out. He reported they had nothing good to say about RCA color. They refused to sign questionnaires, walked out. RCA had asked that only lay public attend showings, retaining Opinion Research Corp. to survey reactions.

New York Times reporter also gathered enthusiastic quotes. Housewife: "Wonderful, at least 500% better than I had expected." California visitor: "Give me this, I'd like to have one." Diamond merchant, who said he'd seen all color systems: "Give me this kind, it's great."

Long an advocate of compatibility, *Washington Star* (WMAL-TV) joined those who think time is ripe for comparing systems. Said Oct. 10 editorial:

"There has been no side-by-side test of the two systems as yet—but there should be. The FCC has said that it has not closed the door on color TV development. The door should definitely be kept open, for progress plainly is being made in the general field of electronic, compatible color broadcasting."

* * * *

CBS-COLUMBIA COLOR SALES are off to slow start, according to some key dealers, though distributors report more orders than they can fill. In Washington, Philip Keller, manager of George's chain, said: "They came. They looked. They went away. No sales. But I must say we did sell a few CBS black-&-white. Everyone says 'screen's too small.' With that price [$500] and so few programs, you can't expect much."

"They want a big screen," said Charles Hoge, manager of Campbell Music Co., Washington, "We'd be very much surprised if we sell one. You've got to have programs. People just don't come down to the store and buy sets at 10 in the morning, the only time color is on. Now, a football game might sell one."

Jules Smith, bluntly outspoken manager of big Davega chain in New York, made no bones about his feelings. A few weeks ago (Vol. 7:37), he said: "CBS is out of step." Last week, he heralded CBS-Columbia color sets with full-page ads and said: "You can't stop progress." This week, after displaying sets in 6 of firm's 40-odd stores, he said:

"They're staying away by the thousands. Haven't sold any. Oh, we sold a couple, but that's nothing. With tax, warranty, financing, you're over $600. The ads didn't pull. People are used to big screens. The price is too high. The color isn't very good. They don't work half the time. The whole thing is premature. RCA has the right idea about color."

But color gave CBS-Columbia an entree to many stores, such as the above, could help it become major black-&-white producer and seller—if it can get enough materials. NPA has refused its request for more metals for color, but company has appealed, will be heard Oct. 23.

CBS-Columbia contended color TV is new industry, thus rates more materials. NPA thought otherwise, suggested company sub-contract color sets among other companies with more materials, if necessary.

CBS COLOR FOOTBALL schedule, on the handful of stations carrying it (Vol. 7:39-40), still hasn't cut much ice. Headline in *Variety* pretty well sums up reaction: "CBS Tint Grid Comes to Chi; But Strictly a Rumor to Public."

Chicago situation was typical. WBKB reports 861 calls during game, mostly asking where color may be seen, where sets may be bought, how home sets can get color in black-&-white. Station carried 5 aural announcements during game, informing public why home screens merely had lines on them. Color sets were displayed by Sears Roebuck, Lyon & Healy, Muntz and servicing firm called Chicago Engineers for TV.

CBS's expanded color schedule will feature color film for first time, 5-5:30 Mon.-Fri. beginning Oct. 15. CBS also announced first commercial—one-shot General Foods promotion of new pie filling, on WCBS-TV only, 4-4:15, Oct. 16. That station's switchboard was said to be swamped with calls during first gridcast, people wanting to know why their sets went into blur during incompatible colorcasts. Color schedule is up to 12¼ hours weekly.

* * * *

EIDOPHOR-CBS color theatre-TV equipment will be set up in New York about Dec. 1, says 20th Century-Fox TV chief Earl Sponable. Just back from Zurich (Vol. 7:40), he reports: "The results were very good, in fact I might say exceeded my expectations." His company expects 150 color installations by April.

Unusual experiment in color seems to be going on in Phoenix. *Retailing Daily's* Lester Gilbert reports Oct. 11 that KPHO-TV has been conducting closed-circuit tests with system developed by Color TV Associates Inc., Newport Beach, Cal. He reports it has 1800-rpm disc at camera, 900-rpm disc at receiver, uses 30 frames instead of 48, and pictures can be received on unadapted black-&-white sets. He writes: "Except for the inherent flicker, [it] looked good." Engineers here say outfit "appears to be 15-20 years behind the times," using field-sequential system at low field rate, producing "intolerable" flicker or very dim pictures, or both.

* * * *

PARAMOUNT PICTURES issued question-answer release this week on its Lawrence tri-color tube (Vol. 7:38-40), making following claims:

(1) Tube is good for any color system, as well as for black-&-white.

(2) It may be inserted in any existing set, receive CBS color with minor circuit changes and adapter.

(3) New color sets with tube should cost about 15% more than monochrome.

(4) Quantity production of tube can be expected by first of year, same for color-monochrome sets with tube.

(5) Present performance of tube is substantially superior to other color tubes in a similar stage of laboratory development.

———•———

XELD-TV's request for 140-mc transmitter, to synchronize Matamoros, Mexico, transmitter with Brownsville, Tex., power system (Vol. 7:38), was turned down by FCC on grounds Commission hasn't authority to make grant to alien-owned station. But Commission pointed out that common carrier may be able to provide needed service.

FCC this week denied Crosley's request to transmit NTSC color signals over WLWT, Cincinnati, during regular programming hours, same as it did RCA-NBC and Philco requests (Vol. 7:38).

Telecasters' excess profits tax relief (Vol. 7:37-38) was written into Senate-House compromise tax bill, is scheduled to pass both houses and go to White House by Oct. 17.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
October 13, 1951

FIRST QUARTER METAL CUTS—FOREWARNING: Biggest cutback yet in metals for TV-radio and other household consumer durables is virtually certain for first-quarter 1952.

These figures are tentative -- and they're rounded-out averages for all types of household "hard goods" -- but, on basis of DPA's announced first-quarter program determinations, it appears now that manufacturers of TV-radio and other home appliances will receive:

Copper -- 29% less than they receive in fourth-quarter 1951.

Steel -- 11.6% less than they receive in fourth-quarter 1951.

Aluminum -- 16% less than they receive in fourth-quarter 1951.

It's practically impossible to predict first-quarter TV-radio production on basis of these average figures, because of these imponderables:

Conservation: how much scarce materials will it save? Components: how readily will they be available? Inventories: how much materials and subassemblies will manufacturers carry over from the fourth quarter? Supplemental allotments and other changes could alter this picture considerably, move percentages up or down.

Copper will be controlling factor in TV-radio production -- as you can see from foregoing figures. Already in fourth quarter, it's most critical material.

All electronics manufacturers will have rough time getting enough metals for first and second-quarter production -- even producers of the components that go into military and "defense-supporting" equipment.

Aluminum is big bottleneck, too -- and in electronics line this will hit hard at manufacturers of capacitors and TV antennas, as well as assemblers of TV and radio sets. Conservation and substitution is now vital necessity in all lines. For example -- it won't be long before virtually all TV antenna makers switch from aluminum to steel or wood for masts. Said DPA-NPA administrator Manly Fleischmann:

"To the extent possible, steel has been provided for the manufacture of consumer durable goods in first-quarter 1952 to compensate, in part, for the reduced amounts of copper and aluminum that are available to these manufacturers."

To meet fourth-quarter aluminum allotments, Govt. is now diverting aluminum that would normally go to stockpile to help make up deficit resulting from power shortage in Pacific Northwest. And NPA Oct. 12 reduced by 15 days -- from 60 to 45 -- permitted inventories on that metal (CMP Reg. 2, as amended).

* * * *

TV-radio set shortages in first quarter? Despite cuts, Govt. doesn't think so. Fleischmann told Congressional committee Oct. 12: "The outlook is that production of such civilian items as refrigerators, radios, TV sets and home appliances of all kinds will be reduced, but because generally ample supplies are now on dealers' shelves, the supply should be sufficient to meet normal consumer needs."

NPA Electronics Div. was allotted 75,385 tons of steel, 33,760,000 lbs. of copper, 18,000,000 lbs. of aluminum to dole out for all "Class B" (standard) electronic products and components in first quarter. In addition to civilian items, this allotment must cover the tremendously accelerated production of components and end products for military use.

The so-called "non-controlled" materials -- meaning everything except steel, copper, aluminum -- will also cause plenty of headaches to electronics manufacturers in coming months. Nickel situation (Vol. 7:36-37), for example, is still critical, but DPA authorities are cognizant of problem, and presumably will order spot aid to manufacturers in extreme emergencies.

In making over-all industry allotments, Fleischmann gave this warning: "I want to emphasize that in the case of all 3 materials with which we are dealing -- steel, copper products and aluminum -- there are some uncertainties that will affect

first-quarter supply, and that estimates generally are on the optimistic side. We will have to have a lot of good fortune to realize the estimated supply on the basis of the allotments that have been made."

TRADE BRISK—SALES OUTRUNNING OUTPUT: Sets selling nicely at all levels...another 48,000 TV units knocked off factory inventories during first week of year's final quarter...production continuing to crawl upward -- there you have essence of TV business picture as it's now unfolding.

RTMA statistical week ended Oct. 5 was week of pre-series and first World Series baseball games, also first week of regular transcontinental network service. That conduced to good demand, particularly in new network cities -- Salt Lake City, San Francisco, Los Angeles, San Diego, where sales are reported very brisk.

Generally satisfactory business, is report from just about all other TV areas, too. It could be that the trade has leveled off to "normalcy," though the industry isn't old enough yet really to fix on norms.

Oct. 5 week's production report showed 87,919 TVs made (2918 private label) as against 81,946 preceding week, highest 5-day output since mid-May. And factory inventory dropped to 414,625 from preceding week's 462,896, lowest since April.

Radio output for week was 230,385 (102,226 private), not much change from week before. Radio inventory figure of 388,463 compared with 381,566 week preceding. Week's radios were 132,900 home receivers, 21,426 portables, 76,059 auto.

* * * *

Having produced some 4,000,000 TVs first 3 quarters (Vol. 7:40), industry won't make more than 1,000,000-1,250,000 this fourth quarter in view of materials shortages and govt. controls. That was opinion of RTMA president Glen McDaniel, who spoke Oct. 12 before New Orleans meeting of Assn. of Electrical Leagues.

"Material shortages," said he, "are becoming more acute as deliveries of defense orders increase. Govt. allocations of several critical metals have been sharply reduced for the fourth quarter and may be cut again for the first quarter of 1952. Thus, it would appear that the radio-TV manufacturers will be unable to increase their civilian production greatly during the next few months regardless of the extent of consumer demands."

With industry now back at 80,000-a-week rate of production, against low of 8200 this summer, and with retail sales reported running 2½-3 times factory output, Mr. McDaniel said "a rather sudden change from an oversupply to a shortage of the more popular models of both TV & radio sets could occur in the near future, possibly even before the end of the year." He went on:

"From the long-range point of view, there is every reason for the industry to be optimistic. We are on the threshold of a tremendous expansion of TV broadcasting which obviously will be accompanied by a proportionate increase in set sales...

"No one in the industry should have any apprehensions about the adverse effects of uhf and color on present sales of monochrome sets. Technical progress always has been a characteristic of our industry, and the ability of radio-TV manufacturers to adapt themselves quickly to changing circumstances has been responsible not only for their survival but for their success.

"Neither uhf nor color telecasting will be so widespread in the immediate future as to threaten obsolescence of any black-&-white receivers. The integration of these new services into the present system no doubt will be gradual and orderly, with little or no dislocation to the present audience of nearly 14,000,000 sets."

* * * *

Note: We queried heads of top 20-odd TV manufacturing concerns, asking their opinions about shortages and market prospects generally for rest of this year and early next. Most have answered, and with only one exception thus far all seem to agree that demand will continue high and shortages will hit by mid-winter at least. We'll recapitulate their replies later, meanwhile culling from one this confident statement that pretty well epitomizes what several others wrote, too:

"We have no fears at all about next year's demand...If it were not for material shortages, I would expect that next year would be one of the largest..."

Topics & Trends of TV Trade: Biggest picture tube maker RCA admitted this week it was accelerating production of all-glass TV kinescopes, but denied unequivocally trade rumor that it was abandoning the metal-coned variety. Rumor apparently grew out of growing shortages of the particular type of stainless steel RCA uses.

Tube dept. v.p. Richard T. Orth said company "will continue in the foreseeable future its policy of producing both metal and glass types." He added: In view of the uncertainty surrounding the availability of steel, we are contemplating an appreciable acceleration in the production of all-glass kinescopes to insure sufficient supply of tubes for TV receiver manufacturers. We will continue to produce metal tubes in ample quantities to meet the requirements of the replacement market."

RCA recently turned to production, for own sets, of 17 & 21-in. rectangulars exclusively, but still makes the 10, 12, 16 & 19-in. required for replacements.

* * * *

Trade Miscellany: Wage increase of 7¢ an hour, retroactive to June 18, granted to UEW-CIO workers in Philco's Philadelphia and Sandusky TV-radio plants—this in addition to previously granted 2¢ an hour . . . GE now shipping radio apparatus from new plant in Utica, N. Y. . . . Hallicrafters, major "ham" equipment producer, offering equipment and cash awards to novice-class radio amateurs making contact with all States and earning regular licenses between Sept. 8, 1951 & Sept. 7, 1952 . . . Motorola to distribute henceforth through own wholly-owned subsidiary in New York area . . . Primer on trademark "do's and dont's", by RCA attorney Abraham S. Greenberg, is carried in October *Electronics* . . . Admirable TV Supply Corp., New York, ordered in consent judgment to change name as of Nov. 1, Supreme Court Judge Koch upholding complaint of Admiral Corp. . . . Sylvania leases 23,000-sq. ft. plant in Waldoboro, Mass., will employ 200.

RTMA's new full-time service manager is E. W. Merriam, ex-DuMont service chief and ex-chairman of RTMA service committee. He reports Oct. 15, having agreed to take position on temporary basis. Among his projects will be promotion of training courses for service technicians in trade and vocational schools, coordination of industry activities to improve servicing and eliminate servicing abuses. He faces touchy task of spreading oil on troubled waters—following vitriolic attacks on RTMA policy this week by several servicemen's organizations for alleged failure to answer their complaints on such subjects as chassis design, corrective servicing notes, service data, warranties, shortage of servicing personnel.

FCC action against CBS—for labeling its TV sets CBS-Columbia—is unwarranted, Commission advised American TV Inc. (U. A. Sanabria) in letter this week. Sanabria had complained to FCC, as he had to Federal Trade Commission (Vol. 7:39), that CBS gives itself free advertising with every network identification. Commission said such allegations of unfair competition should be thrashed out in private litigation or before FTC.

Canadian RTMA reports 964 TVs sold for $503,098 during August, up from July low of 323 (Vol. 7:37), bringing 8-month cumulative sales to 21,357 valued at $11,678,062 and over-all cumulative (from start of count) as of Aug. 31 to 59,180 valued at $27,954,645. Factory inventories at month's end totaled 16,205.

———■———

Degree of B.S. in Television will be offered by U of Southern California, courses to start with spring semester Feb. 7. New Dept. of Telecommunications is being set up, TV studio built with $100,000 gift from oilman Allan Hancock, chairman of university's trustees.

Trade Personals: Frank M. Folsom, RCA president, returned Oct. 10 from flying trip to Italy, where he had an audience with the Pope; Spain, where he conferred with Generalissimo Franco; and Israel, where he surveyed prospects for recording plant . . . Paul H. Leslie, Detroit mgr., named TV sales mgr., GE receiver dept., Syracuse, succeeding David Davis, promoted to New York district mgr., with Joseph A. Kerr named New Jersey district mgr. headquartering in Newark . . . R. S. Holmes now director of RCA Laboratories Div. contract research lab, with George M. K. Baker transferred to his office as asst. . . . Morton M. Schwartz, ex-Tele-tone, joins Olympic Radio as asst. to Al Friedman, gen. sales mgr. . . . Myron Blackman, ex-Kaye-Halbert, appointed gen. sales mgr., National Electronics Mfg. Co., Los Angeles, maker of Natalie Kalmus and Cinema TV sets, succeeding Jack Richmond, who continues with National and other firms as consultant designer . . . Richard Bambery transferred from advertising to asst. to Paul Dye, in charge of Admiral distribution . . . S. S. Schneider promoted to mgr., engineering dept., Canadian Westinghouse electronics div. . . . James Valladares resigns as plant mgr., Philharmonic Radio, New Brunswick, N. J. . . . Philip S. Beach, ex-Pacific Outdoor Adv., named to newly created post of adv. director, Hoffman Radio . . . Samuel Gross, president, and Sol Gross, secy-treas., have resigned from Emerson-New Jersey Inc., Newark; Irving Sarlin, sales mgr., becomes gen. mgr. . . . Trevor H. Clark, ex-Federal and RCA Labs, named director of military research & development div., Southwest Research Institute, San Antonio . . . Frank B. Rogers Jr., ex-Ampro, named sales v.p., Reeves Soundcraft Corp. . . . Maj. Gen. Douglas A. L. Wade, Royal Corps of Signals, has arrived in Washington to be telecommunications attaché at British Embassy . . . Louis Selsor, ex-DuMont, named jobber sales mgr., National Video Corp. . . . L. E. Septer named sales mgr. for tuner and tube divisions, Sarkes Tarzian Inc. . . . Otto H. Schade, RCA tube dept., gets SMPTE David Sarnoff Gold Medal Award for developing method of rating film and TV systems in objective mathematical terms . . . Henry F. Argento, Raytheon sales mgr., named asst. v.p. and appointed asst. mgr., power tube div.

* * * *

With William Boss shifted from Rochester to Camden to be assistant to RCA consumer products v.p. Joseph B. Elliott in handling of field contacts, RCA Victor home instrument dept. sales v.p. A. B. Mills announced these new field salesmen and territories: Donald E. Roark, Albany & Hartford; Jack K. Sauter, Buffalo, Rochester, Syracuse & Binghamton; Philip E. Cunningham, Nashville, Chattanooga, Knoxville & Birmingham; Robert F. Cage, Detroit, Saginaw, Lansing & Grand Rapids; Daniel Gentile Jr., Kansas City, Des Moines, Sioux Falls & Denver; Bruce S. Durant, Indianapolis, Milwaukee & Peoria.

Dr. Allen V. Astin, govt. career scientist associated with development of proximity fuses in World War II, has been appointed acting director, Bureau of Standards, succeeding Dr. Edward Condon, resigned to becoming research director, Corning Glass. Dr. Astin as associate director of Bureau was responsible for electronics along with other developments.

A. D. Plamondon Jr., president of Indiana Steel Products Co., and chairman of RTMA small business survey committee, was elected chairman of Air Force Small Business Survey Committee, RTMA president Glen McDaniel named secretary, at Oct. 9 meeting at Wright-Patterson Air Base, Dayton.

Dr. Anton Frederik Philips, 77, founder of Europe's big Philips radio and lamp concern at Eindhoven, Holland, died there Oct. 7.

Financial & Trade Notes: Third quarter reports will soon start issuing, are expected to show considerable declines in TV-radio companies' sales and earnings because of (1) sharply reduced TV output and sales during that period, (2) defense orders not yet rolling. But contrary to expectations, major set manufacturers will report they were in the black that quarter, thus should show respectable profits for year as whole.

"I think," said one very competent Wall Street observer, "they will have at least as good, if not better, year in 1952 when govt. work will start contributing to shipments. The big boom, however, is still 2 to 3 years off." He was thinking, primarily, of anticipated opening of new markets when freeze ends and more stations get on the air (Vol. 7:36-37). Even now, though, as United Business Service reported Oct. 8, "the appeal of TV shares lies chiefly in the prospect of expanding present ownership of sets more than twofold."

* * * *

Among officers' and directors' stock transactions reported by SEC for August: **Dee S. Lenfesty** sold 1200 Arvin, holds 1500; **Victor Mucher** bought 500 Clarostat (July), holds 13,100, wife holds 2200; **Frank L. Driver** bought 400 Driver Harris, holds 38,080; **Richard E. Laux** sold 1500 General Instrument, holds 100; **Philip F. La-Follette** bought 50 Hazeltine, holds 800; **Adolphe A. Juviler** sold 2800 Olympic, holds 85,640; **Percy L. Schoenen** sold 700 Olympic, holds 23,306; **Barney Balaban** sold options for 10,000 shares of Paramount, holds 30,000; **R. L. Heberling** gave 155 Philco as gift, holds 23,832 common, 300 pfd.; **John S. Timmons** sold 3000 Philco, holds 10,000; **William Gammell Jr.** sold 1100 Raytheon, holds 14,470; **Robert H. Bishop** sold 209 Sylvania, holds 450; **Don G. Mitchell** sold 100 Sylvania, holds 3074.

These sales of stock by Philco officials were reported to N. Y. Stock Exchange this week: **Fred W. Rombach**, v.p., and **James T. Buckley**, chairman, sold 2162 & 2000 shares, respectively.

* * * *

Dr. Allen B. DuMont predicted his firm's sales for 1952, including defense orders as well as TV receiver, tube and transmitter equipment, will run at least 25% ahead of best previous year in firm's history (1950 gross sales were $76,362,665, up from $45,362,089 in 1949). He spoke Oct. 9 before Robert Morris Associates, an association of bank credit men meeting in New York. He also said industry's biggest problem is still the FCC freeze on new station construction, reiterated his oft-expressed conviction that all-electronic and not "mechanical" color will prevail, forecast TV output this year will be about 5,000,000.

Sylvania stockholders vote Nov. 19 on issuance of 200,000 shares of new convertible preferred stock and an increase in the authorized common stock to satisfy conversion rights. Also planned, when market conditions are favorable, is sale of about $25,000,000 of 20-year sinking fund debentures. Company will use $17,200,000 of proceeds from preferred stock sale to retire all outstanding 3¼% debentures, its entire funded debt now outstanding, and other new money will be used for expansion program, including $18,000,000 in plant.

General Instrument Corp. reports net loss of $625,603 for 6 months ended Aug. 31, compared with net income of $487,167 for corresponding 1950 period—attributed to lack of demand for end product, govt. materials controls, transition to defense production, vacation shutdowns.

Trav-Ler reports net profit of $318,486 on sales of $11,389,744 for year ended June 30. Company reported net of $2,309,275 on sales of $13,892,485 for calendar 1950, first full year its stock was publicly held (Vol. 7:12).

Mobilization Notes: More than 300 out of about 1000 manufacturers of electronic "Class B" (standard) products and components have failed to file CMP applications for first quarter 1952 allotments of steel, copper and aluminum. Deadline date for filing was Oct. 1, and NPA Electronics Div. this week sent telegrams to all who haven't filed. It's probable that applications arriving after Oct. 17 will be held up until all earlier applications have been processed and allotments issued, some NPA staffers say.

DPA-NPA chief Manly Fleischmann warned this week that manufacturers will face serious difficulties in obtaining steel, copper and aluminum if they fail to file applications immediately. "Mills are not required to accept authorized controlled materials orders unless they are placed within the prescribed lead times," he said. "In the case of steel, these vary from 45-120 days, according to type of project. A would-be purchaser, who files his application for an allotment too late to receive his authorization in time to meet these deadlines, is just out of luck."

Electronics Div. officials say CMP-4B applications for first quarter are worst yet with regard to errors and omissions. Average application, they say, takes from one to 2½ hours to interpret and tabulate, because of lack of sufficient information.

———•———

Nippon Television National Network Corp. has been formed in Japan, capitalized at 2 billion yen and backed by leading banking, newspaper, movie and industrial interests, to set up system of stations that Japanese Radio Regulatory Commission this week agreed should operate on American 525-line standards. Tokyo transmitter, first of proposed chain of 22, is expected to be ready by spring of 1952, initial TV receivers of U. S. standard make to be imported tariff-free as "educational media." Project is culmination of survey just completed in Japan by Maj. Henry F. Holthusen, New York attorney; William S. Halstead, Crosby Laboratories engineer; and Dr. Walter Duschinsky, studio planner—operating as Communications Consultants, 25 Vanderbilt Ave., New York. U. S. equipment for the TV and a system of telecommunications stations will be ordered. Project will be first private broadcasting for Japan, permitted under law passed during MacArthur regime in 1950; formerly, govt. operated broadcasting as private monopoly.

Denver got World Series on theatre TV after all. Baseball commissioner Ford Frick Oct. 6 reversed earlier decision (Vol. 7:40), wired John Wolfberg permission to pick up series on his Broadway Theatre big-screen equipment from same closed circuit serving some 90 receivers at Brown Palace and Cosmopolitan Hotels. Hookup was made in time to catch third inning of third game Oct. 6, and theatre filled up rapidly as news spread. No admission was charged for Oct. 6 game or remaining 3 games, also carried by Wolfberg on same super-exclusive theatre basis. World Series ate heavily into audiences of TV-equipped theatres in 5 cities presenting big-screen showings of Navy-Princeton football game Oct. 6 under arrangement with National Collegiate Athletic Assn. None of theatres reported better than fair business, managers blaming poor attendance on availability of series free on home TV sets.

Didn't the Russians invent TV, as blandly claimed by a Soviet diplomat as he departed these shores several years ago carrying "sample" of an American-made receiver? Now comes claim they've "discovered" art of mass production of TV sets, reported in AP dispatch from Budapest. It quotes newspaper *Szabad Nep* as stating Russian-made sets are far superior to those of the West, giving "clear, sharp and perfect picture." But Hungarians, AP adds, have to be content with "promise" that TV will reach their Sovietized paradise "in the near future."

FCC APPROVAL of $1,050,000 sale of KEYL, San Antonio, to Geo. B. Storer's Fort Industry Co. (Vol. 7:30) was last of an even dozen sale deals effected since early 1949—all authorized by FCC—and leaves only Chicago's WBKB still now pending. Storer interests now have 4 TV outlets, having founded WJBK-TV, Detroit; WSPD-TV, Toledo; WAGA-TV, Atlanta. Limit is 5, so it's presumed Storer will drop all but one of his still pending applications for new TV outlets—in Cincinnati, Wheeling, Miami, where he has radio stations.

Other TV station deals to now, exclusive of projected ABC merger with United Paramount Theatres Inc., as part of which deal CBS proposes to acquire latter's WBKB, Chicago, for $6,000,000 (Vol. 7:21):

WLTV, Atlanta (formerly WSB-TV), sold to Broadcasting Inc., local group, for $525,000 in swap of channels with CP holder WCON-TV (Vol. 7:32-34, 38-39).

WOW-TV, Omaha, sold with WOW to Meredith Publishing Co. interests for $2,525,000, purchaser acquiring surplus account of $720,000 (Vol. 7:32, 39).

KHJ-TV, Los Angeles (formerly KFI-TV), sold to General Tire (O'Neil) for $2,500,000 (Vol. 7:23, 32, 36).

WOOD-TV, Grand Rapids (changing from WLAV-TV as of Oct. 19), sold for $1,382,086 to Harry Bitner interests (Vol. 7:19, 38).

KTSL, Los Angeles (to be changed to KNXT), sold to CBS for considerations totaling $3,600,000 (Vol. 6:52).

KFMB-TV, San Diego, sold with KFMB to John A. Kennedy interests for $925,000 plus other considerations (Vol. 6:46 & 7:17).

WTOP-TV, Washington (formerly WOIC), sold 55% to *Washington Post*, 45% CBS for $1,400,000 (Vol. 6:25).

KPRC-TV, Houston (formerly KLEE-TV), sold to *Houston Post* for $740,000 (Vol. 6:13, 21).

WFAA-TV, Dallas (formerly KBTV), sold to *Dallas News* for $575,000 (Vol. 6:4, 11).

KING-TV, Seattle (formerly KRSC-TV), sold to Mrs. A. Scott Bullitt for $375,000 (Vol. 5:20); 25% interest sold to Hearst Radio for $375,000 (Vol. 7:26).

KPHO-TV, Phoenix, went into hands of present owners in several stock transfer deals after three 25% stockholders in grantee corporation (Texas oilmen W. L. Pickens, R. L. Wheelock & H. H. Coffield) decided not to purchase stock (Vol. 5:26 & 6:6, 20). New stockholders provided funds for construction.

———■———

Power increase from .5 kw to 5 kw was granted New Haven's WNHC-TV this week when FCC waived its "Fifth Report" (Vol. 7:30-33). Commission had previously said it wouldn't permit community stations, such as WNHC-TV, to go to 5 kw—considering such move a violation of freeze policy. Station convinced Commission that no one would lose by grant, since it already had 5-kw transmitter installed and no other station would suffer interference. Grant leaves only 2 community stations: WDEL-TV, Wilmington, and WGAL-TV, Lancaster. If they say "me too," presumably they'll have to show similar set of circumstances. On other hand, they may prefer to retain present powers, go all the way—100-200 kw ERP—after end of freeze. Commission also finally granted DuMont's WABD, New York, permission to use 5-kw transmitter on Empire State Bldg., radiate 16.7-kw ERP.

Among least expensive TV station proposals to date is that of KIFI, Idaho Falls, Ida. In application filed last week (Vol. 7:40), station said total construction cost would be $83,061, with much equipment to be built under direction of engineering consultant Grant Wrathall, part-owner. Breakdown: transmitter (1-kw output, 3-kw ERP) $11,500, antenna system $10,000, studio equipment $55,761, modulation monitors $2300, legal and engineering fees, $3500.

Everyone is "experting" Comr. Frieda Hennock's chances of getting Senate confirmation to New York Federal bench (Vol. 7:40), but little of the speculation appears authoritative. Four witnesses testified for her Oct. 11, more on Oct. 13. After Oct. 13 closed session of Judiciary Committee, hearings hadn't officially concluded, presumably could resume later. However, there were some doubts about any action at all before Congress session ends, judging from attitude of some members. Recess appointment is possible but not certain. Drew Pearson Oct. 4 column reported some charges he said were leveled at Miss Hennock during hearings. Column was published in New York, not by *Washington Post* which did, however, carry his Oct. 9 column reporting that former Secretary of War Robert Patterson had withdrawn his support after hearing nature of testimony. Witnesses for her during Oct. 11 session included Justice Agnes Craig, Bronx Municipal Court; Jacob L. Holtzmann, attorney and member of New York Board of Regents; Justice Doris I. Byrne, New York Court of Special Sessions; David Schenker, New York attorney.

Date for hearing on Paramount Pictures (anti-trust violations, etc.) and ABC-United Paramount merger (Vol. 7:32, 35) has finally been set for Jan. 15, to be held before FCC examiner yet unnamed. Comment around Commission is that FCC could spend "years" on case if it chose. Says one attorney: "It would take 12 lawyers and 20 accountants a year to study Justice Dept.'s files alone." ABC is particularly anxious to get final decision quickly, needing added expansion capital and fearing it will soon have to go "house-hunting" without infusion of UPT capital. Its leases with NBC—in New York, San Francisco, Los Angeles—expire March 31, 1952. Permission to intervene in case, filed by Fanchon & Marco theatre chain (Los Angeles, St. Louis), was denied by motions commissioner George Sterling—but chain isn't foreclosed from testifying. This week, F&M petitioned FCC to override Sterling.

FCC granted 90-day test of Telemeter, coin-operated subscription TV system proposed by Paramount Pictures (Vol. 7:34, 37), gave company strict orders not to create impression Commission has approved system—same as it did for tests of Zenith's Phonevision, Skiatron's Subscriber-Vision (Vol. 6:6, 47). Tests will be as Paramount proposed: over Los Angeles' KTLA, midnight-9 a.m., using 6 receivers, no public participation. Skiatron is stepping up activity lately, sending director Rear Adm. Timothy O'Brien to Hollywood, presumably to seek films for home tests. He says that Subscriber-Vision, currently punch-card operated, can also use coinbox.

TV station owner Edward Lamb (WTVN, Columbus, and WICU, Erie) this week bought WHOO and WHOO-FM, Orlando, Fla., from Martin Anderson, publisher of *Orlando Sentinel-Star*. Price was $200,000. It's Mr. Lamb's second AM outlet, other being WTOD, Toledo. ABC outlet operates with 5-kw night and 10-kw day on 990 kc. Lamb takes over WHOO's TV application. This week, also, Grant Ashbacker sold his WKBZ, Muskegon, Mich., for $179,000 to Arch Shawd, ex-WJR, Detroit, and WTOL, Toledo. It's also an ABC outlet, operates with 1-kw on 850 kc. Both deals were handled by Blackburn & Hamilton.

Total TV applications rose to 446, of which 14 are uhf, with filing this week by Tel-A-Ray Enterprises Inc., Henderson, Ky., for uhf Channel No. 50. Firm is made up of group of local business men. [For further details, see *TV Addenda 13-N herewith;* for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Electromagnetic radiation bill (S. 537) was finally passed by Congress this week, Senate concurring in House amendments (Vol. 7:38). Bill gives President control over all radiating devices which enemy could use for navigation.

CBS COLOR SHELVED 'FOR THE DURATION': Looks like you can forget about color TV -- for an unpredictable period.

CBS system goes into mothballs, that's definite. Compatible system developments may also have to be shelved -- next week will tell.

Shocker came at 3 p.m. Friday, Oct. 19, when CBS president Frank Stanton released statement that, at request of mobilization director Charles E. Wilson, CBS would immediately stop all color set production and programming "in the national interest...for the duration of the emergency."

At about same time, Mr. Wilson's office released letter to Stanton, which asked such suspension "in order to conserve critical materials." Press release from his Washington office also stated he would call all TV manufacturers to meeting sometime next week "for the purpose of discussing the desirability of suspending all further development of color TV in order to free highly skilled electronic engineers for important military projects."

[For texts of Wilson letter and Stanton statement, see p. 5.]

Story broke after N.Y. Stock Exchange had closed, so there was little activity in CBS Friday when "A" closed at 28½, "B" at 28¼, off ¾ & ½ respectively in a generally weak market. They opened at 27⅞ & 27⅞ Saturday, closed at 27½ & 27¼.

* * * *

Questions, speculation, cross-allegations -- erupted all over the country, among manufacturers and telecasters especially, when the news broke. "Who done it?" was the common refrain -- and efforts to plumb the facts met some blank walls.

CBS spokesmen were absolutely mum, and FCC officially said "no comment" until it has "more information". One staunch CBS adherent at FCC said: "I see the fine hand of General Sarnoff in this one." But Sarnoff, fresh from the triumphs of RCA's New York-Washington demonstrations (Vol. 7:41), and its remarkable showings of large-screen theatre TV in color this week, said he was nonplussed -- probably would have nothing to say until manufacturers' meeting with Wilson.

Some industry topkicks, while inclined to gloat over what they said was end of CBS's color campaign, were mad as hornets over idea that all color development, even the compatible kind of NTSC & RCA, might have to be frozen.

Several boiled, off the record, and only the ever-blunt Dr. Allen B. DuMont asserted, "Damn right you can quote me." Said he:

"It's a hell of a note. I think they should make CBS make those sets. They would lose their shirts, as I always said they would."

Other industry men spoke in same vein, indicating intensity of feeling that prevails. Said one of foremost: "How much critical materials could this save? CBS wouldn't make enough color sets to put in your eye. Why? Nobody is buying them or would buy them. Who will buy one of those things for 6 or 7 hundred bucks?" (He was referring to fact that CBS's 10-in. magnified receiver, listed at $499.95, actually comes to very nearly $700 with taxes, warranty, installation, service contract.)

"As for saving engineers for military projects," said this spokesman, who is

Copyright 1951 by Radio News Bureau

in no way connected with RCA, but is an enthusiast for NTSC's current color work, "you aren't going to save much by calling them off color. I imagine there are altogether, throughout the industry, 2-300 engineers working on color. If you want to save engineers, take them off new picture tube development, uhf and such stuff.

"But what would you do with them? I don't think there's enough military work to keep them going. But I don't know whether you can tell Wilson that. He says there's a shortage of engineers. The whole thing depends on whether it's materials or engineers that he's worried about. We'll know next week."

* * * *

There you have the thinking of industry leadership -- for from start just about whole electronics and industrial fraternity has been lined up against CBS and FCC in their effort to put over non-compatible color.

Everyone in trade reached, within short time available before going to press, seemed convinced Wilson's request was CBS-inspired -- "a way off the hook" and "a chance to wave the flag" in the process, as one put it.

It's really curious how each camp uses same argument to detect "machinations" of the other. CBS proponents have said CBS sets don't use much materials that couldn't be diverted from black-&-white. Opposition says lack of demand for the CBS sets means they wouldn't use much material anyhow.

Fact is that CBS's request to NPA for extra materials to manufacture color receivers had been rejected -- and CBS had appealed rejection to NPA appeals board and was scheduled for hearing Oct. 23 (Vol. 7:41).

* * * *

Move was really at high level. NPA Electronics Div. was caught flatfooted. DPA administrator Manly Fleischmann had been out of town for last week, got back and lunched with Wilson day of announcement. It's known, definitely, that Fleischmann had a "request" before him for several weeks. No one at DPA will say where request originated, but they'll say they think they know.

Speculation is that pitch may have been from Paley to Symington to Wilson, inasmuch as former 2 are social cronies and Paley spends several days each week in Washington on his job as chairman of President's Materials Policy Commission (Vol. 7:2,4), a post obtained for him by NSRB (now RFC) Chairman Symington.

* * * *

Here are some of the many questions being raised:

(1) Stanton says color is off for "duration of the emergency." And Wilson asked for suspension "until such time as critical materials are in sufficient supply to warrant production." Which comes first? Will CBS resume color if materials noose loosens, though emergency persists?

(2) What will FCC do about it, if anything? Would it consider a petition for compatible standards while DPA-induced color "freeze" is on?

(3) Will CBS be permitted to continue laboratory development, as Stanton says it intends to, if rest of industry's color engineers are "frozen" off color?

(4) Would Wilson extend engineering freeze to uhf, picture tubes, black-&-white redesign and refinement -- or even to station construction, theatre TV, etc.? DPA officials say color action isn't unique, pointing out, for example, that Govt. has limited number of cars with automatic transmissions.

(5) Is Wilson merely "suggesting" or is he "ordering"? If latter, why was same letter not sent to NTSC members, to RCA, to those other firms which, like CBS, have also been advertising availability of color units?

* * * *

Reasons Wilson gave for action -- materials and engineering shortages -- were ignored by FCC when it rendered color decision about year ago in time much more uncertain militarily than the present (Vol. 6:35). Then, the defense agencies were predicting even more dire impact of Korean War demands on electronics industry.

Materials situation was cited by Supreme Court Justice Frankfurter, too (Special Color Report, May 28, 1951), and rejected by CBS when it asked for and got DPA's assurance Govt. didn't intend to interfere with color production (Vol. 7:1).

Whether all color TV development will stop, is probably biggest question pending. Manufacturers who were accused of ganging up against color per se for fear it might hurt their black-&-white business, now are straining to go ahead with RCA and/or NTSC compatible system, and everybody thought it was only a matter of several months before the compatibility proponents would ask FCC to reopen "door ajar".

Some manufacturers also say much color work is "straight down the line" on military projects, closely allied with certain defense plans.

President Richard Hodgson, of Chromatic TV Labs (Paramount Pictures), after hearing news, announced that Lawrence tri-color tube uses no more critical materials than black-&-white tubes, could be put into sets requiring no additional materials. But he admits that it may make little sense to put tube into sets now, inasmuch as there's no more colorcasting and a compatible system may eventually be adopted.

* * * *

Distributors and dealers seem relieved to have color "incubus" off their necks. Now they can tell customers color is out the window for duration -- though lately they've indicated, as one told us, that "color is the least of our troubles so far as sales resistance is concerned."

The few color sets out -- CBS declines to divulge number -- may have served as store traffic builders, but they certainly didn't sell color sets. One big Washington dealer, who displayed color set, was so miffed by Friday's happenings that he asserted: "I'm telling them to take their whole line back. The only reason I took it was because I expected the color set to bring people into the store." He has not sold one color set, he said, nor taken one order.

CBS-Columbia Inc. has been doing good job of building up distribution organization on strength of new name and color promotion. It may wind up with net gain yet -- in developing market for its black-&-white sets. Sales manager Richard Payne said dealer interest in line has increased "hundred-fold" since old Air King days.

Company has straightforward selling job to do now, competing against some 100 other brands. Price-wise, it faces usual handicaps of any small producer facing big and long-entrenched mass producers. It has advantage of CBS name and TV-radio network facilities, can probably still hold onto substantial private-label market in which its precursor Air King once mainly operated (Sears Roebuck, et al).

* * * *

Few think incompatible color will ever be resurrected, not least of these being CBS's own affiliates who have shown conspicuous lack of enthusiasm for system -- and only handful of whom have carried its network colorcasts, now halted.

Whether work on compatible color is stopped or not, every black-&-white set sold becomes so much added weight that an incompatible system would have to lift.

And FCC's greatest hope, new stations in new markets, which some thought might be pressured into color, directly or indirectly, can scarcely be expected now to hop into color when the station freeze is lifted.

THEATRE TV CLIMAXES RCA COLOR SERIES: Before Friday's big color explosion (see p. 1), RCA engineers were elatedly winding up 2 weeks of highly successful color showings, including impressive theatre-TV demonstrations in New York. Next move was to be field-testing of those NTSC-recommended specifications not already in their system -- including 3.89-mc color carrier (in lieu of 3.58), asymmetrical sampling, etc.

Rest of industry has been gearing for Nov. 2 full NTSC meeting in New York to agree on the few remaining system factors to be field tested.

This week's RCA showings were much like last week's, with virtually everyone conceding compatible system is "almost here," if not already "ripe" for standardization. FCC commissioners who attended this week -- Jones, Hyde, Sterling, Webster -- are naturally shy of commitments. But their off-the-record comments make it quite clear they're impressed with what they've seen but are by no means prepared to "buy" the system on basis of one demonstration they've witnessed. Said one:

"They've made progress -- extremely interesting progress. But there are a lot of questions to be answered. One showing like this isn't like a hearing with 10,000 pages of testimony and 200-odd exhibits. This isn't the kind of situation

you can make a judgment on. If they have satisfactory answers to the criteria in our color decision -- that's the thing."

Another remarked: "I was particularly interested in the questions asked when I was there -- cost of sets, convertibility of black-&-white sets, etc. RCA seemed to have a little trouble with them." Others reserved comment, as did chairman Coy last week, or couldn't be reached. All but Hennock have now seen system.

"If you had seen pictures like these during the hearing," we asked one commissioner, "do you think your decision would have been different?" He laughed, said: "Well, the decision would have been less obvious."

Many Washington consulting engineers and radio attorneys attended, left more satisfied than ever that compatibility is basic, and that FCC must eventually accept compatible system. Perhaps best-informed comments were those of engineer Stuart Bailey, who served on famed Condon color committee (Vol. 6:28,30):

"It's a definite improvement. The apparent contrast isn't quite as good as CBS's. But that's probably an interim thing. Registration is better than ever before. It's perfectly satisfactory color.

"Charges of complexity against the RCA system never worried me. Black-&-white is too complex -- but it works. Those things shake down; they always do."

We asked whether Condon Report might have been different had committee seen current RCA pictures. "I don't think so," he said. "If you read it again, and look at the table we prepared, I think you'll find this is the sort of thing we anticipated. But I think CBS has made an important contribution to color. If they hadn't forced the issue, we probably wouldn't be as far along as we are."

* * * *

RCA's theatre-TV showings all week in New York's Colonial Theatre were also tremendous hit with theatre men, press and public. Many said the pictures were even better than those on receivers.

Theatre men appeared truly excited. Typical quotes:

Nathan Halpern, president of Theatre Network TV Inc.: "Very important progress. I think it's acceptable right now. Of course, there's no equipment for sale yet, presumably because there are some problems to work out yet."

Dana Atchley, technical TV chief, United Paramount Theatres: "All of us are extremely enthusiastic. That goes for Mr. Goldenson [president] and Mr. O'Brien [executive v.p.]. We're particularly impressed with compatibility for theatre TV as well as home TV. It's important to be able to install black-&-white now, knowing that you can continue using it when color comes. Certainly, we shouldn't wait until color is available. We'll shortly have 24 [UPT] theatres equipped."

Richard Hodgson, president, Chromatic TV Labs (Paramount Pictures): "Very good. Maybe we should have more bandwidth, but this is acceptable right now."

Bernard Lust, Lust chain (Washington, D.C.): "If they could build one now, I'd take it. Of course, there are a few imperfections, but the average moviegoer wouldn't even see them. It's very much like Technicolor, much better than other color film processes."

* * * *

Most of press reacted much as did theatre men. Variety reported: "Colors... were solid and true, indicating the new tint system can well be that extra fillip needed to get big-screen video over the hump." New York Times: "Theatre men, accustomed to Technicolor and other motion picture color systems, felt that RCA color still had a long way to go before its quality would equal that of existing color systems. All things considered, however, this initial demonstration was judged a marked success." Herald Tribune: "The large-screen color was of high fidelity, but not so sharp as standard motion picture reproduction. However, the colors were softer and easier to look at than movie color."

Our own feeling was that more resolution and brightness would be welcome. Most engineers had same reaction, and RCA v.p. W.W. Watts did remark that "perhaps more bandwidth may prove desirable." Bell Labs' veteran Pierre Mertz suggested that more resolution may make up for less light to some extent -- although RCA's Dr. David Epstein said achievement of greater light output isn't much of a problem.

Equipment uses 3 kinescopes, 7-in., with 60 kv (compared with 80 kv for monochrome). Projector is on floor of theatre, about 30 ft. from screen, giving 9x12-ft. picture.

Basic equipment is very similar to gear RCA used for color theatre TV with simultaneous system in 1947, employs 3 Schmidt optical systems. Projector was developed for RCA labs' auditorium, thus accounting for picture size and length of throw. RCA said equipment would be developed for 18x24-ft. picture, 40-80 ft. throw.

Program was same show, thrice-daily, going to audiences in New York and Washington viewing home-type sets (Vol. 7:41).

Dr. Epstein, who directed the development, was mildly riled because some people considered pictures somewhat under Technicolor quality.

"I'll take on Technicolor any day of the week," said he. "Our system just has more inherent fidelity than Technicolor. And I can prove it." He also pointed out that same studio show was being picked up direct in New York and going over coaxial and microwave to Washington, thus making it difficult to control studio lights, etc. to best advantage for each type of showing.

* * * *

Biggest question in most people's minds is much-publicized Eidophor-CBS theatre TV (Vol. 7:41), due to be demonstrated in New York in month or 2. Most engineers say they're reserving judgment until showings, are particularly concerned about servicing and maintenance of Eidophor.

Pictures should be good, they say, since system employs field-sequential standards superior to those of CBS: 525 lines vs. 405, 180 fields vs. 144, 12 mc vs. 6 mc. These are basically the standards used by DuMont in its industrial color (Vol. 6:10). Trouble, engineers say, is how to get system between cities, since there are no 12-mc networking facilities.

Since no FCC approval is required for closed-circuit theatre TV, way is clear for use of any color system -- assuming Govt. doesn't ask industry to call off projects. But chances are color theatre TV will still be purely experimental when FCC's theatre-TV hearing begins Feb. 25, and there's no knowing whether Commission will permit industry to choose own standards -- as industry would like to do.

STANTON'S PRESS STATEMENT

IN THE national interest, CBS and its manufacturing units will comply immediately with ODM's request to suspend manufacture of color television equipment for the duration of the emergency. CBS television will also suspend its regular schedule of color broadcasts in view of the fact that there will not be a sufficient number of color receivers in the hands of the public to warrant such a broadcast service.

We look forward to the day when we may resume our color production and make this electronic achievement available to the American people. Within the limitations which may be imposed by the Defense Mobilization effort, we intend to continue experimental and developmental work during the period of manufacturing suspension, with particular attention to the development of a tri-color tube in connection with the CBS color television system, which received full commercial authorization by the Federal Communication Commission.

Development of a tri-color tube of CBS design is proceeding rapidly and we expect that such a tube can be demonstrated shortly and will allow simplicity and economy in manufacture.

The CBS laboratories will also concentrate on the development of a simple adapter which may be attached to ordinary black-& white television sets and which will enable those sets to receive color television signals in black and white. Such an adapter made generally available to the public at a reasonable price should remove any significant objection to the CBS color television system on the grounds of incompatibility with present black and white standards.

CBS-Columbia Inc., our manufacturing subsidiary, will continue to manufacture black-&-white television sets and electronic equipment for the defense program.

WILSON'S LETTER TO STANTON

AS YOU know the defense mobilization program in which we are now engaged requires the use of vast quantities of scarce materials in the production of military items and essential industrial expansion. In order to meet the production schedules which have been established it is necessary for us to overcome many bottlenecks and to conserve critical materials for those emergency programs.

We are making strenuous efforts to expand our sources of raw materials. Eventually we should be able to carry forward the military program and at the same time maintain our normal civilian production. In the interim, we are calling upon American industry to minimize the use of scarce materials and to stretch supplies through the use of substitutes. Through this program we believe that the civilian economy will be kept reasonably well supplied with essential goods. We must, however, request industry to suspend plans for mass production of new products which are not absolutely essential and which would require the use of critical materials. After careful study, I have reluctantly concluded that the mass production of color television sets presents such a case.

I am, therefore, requesting the Columbia Broadcasting System to suspend its plans for the manufacture of color television receivers in order to conserve critical materials until such time as these materials are in sufficient supply to warrant production. Your cooperation in this matter would be of great benefit to the defense effort.

TELECASTERS ADOPT SELF-CONTROL CODE: Determined to head off govt. action, America's telecasters this week voted themselves a strict self-censorship code.

Representatives of 65 TV stations & 2 networks, meeting in Chicago Oct. 19, approved Program Standards Code substantially as prepared by committee under Robert Swezey, WDSU-TV (Vol. 7:25,31,36). There were no dissenting votes, 3 abstentions. Code must still be ratified by NARTB-TV board at next meeting, scheduled Dec. 3.

Many telecasters found code tougher than they'd anticipated -- only 2 said it wasn't tough enough. Much of it is borrowed from motion picture code and old radio code, runs gamut of most-complained-about programming excesses and shortcomings -- all the way from "indecent exposure" to length of commercials.

Copies are available from NARTB, 1771 N St. N.W., Washington 6, D.C.

"This code obviously was written for the American people and not for people who own and operate TV stations," said NARTB president Harold Fellows at the Chicago meeting. Copies will be circulated this week to FCC and to Sen. Johnson's powerful Interstate & Foreign Commerce Committee, now considering the Benton Bill to set up 11-man TV-radio "program advisory board" (Vol. 7:22,33,36,41).

Code contains many flat prohibitions -- against profanity, obscenity, the glorification of criminals, religious and racial bias, etc. But when it comes to advertising practices, tone becomes decidedly more placatory.

Commercial time standards are merely "suggested [as] a guide to determination of good telecast advertising practice," with notation that they may be revised "from time to time." Sample suggested lengths of advertising messages: 15-minute news programs, 2¼ minutes; other programs (Class A time), 2½ minutes in 15-minute programs, 3 in 30, 6 in 60; all other hours, 3 minutes in 15, 4¼ in 30, 7 in 60. There's no reference to such practices as double-spotting at station breaks, etc.

"NARTB TV Seal of Approval" goes to stations subscribing to code. It will be on slide or film, for display by stations in same way movie producers use MPAA's "Johnston Office" self-censorship seal. It's suggested seal might be used in background of station identification slide.

TV's "Johnston Office" will be 6-man TV Code Review Board, to be named by NARTB-TV board, with NARTB chairman Justin Miller ex-officio member. First board will serve until 1952 convention; thereafter members will serve for year.

Board's duties, as outlined in the code: (1) Review all TV programming. (2) "Receive, screen and clear" complaints about programming. (3) Define & interpret code. (4) Keep FCC, Congress and other govt. agencies informed of code's operation. (5) Inform code subscribers of complaints & commendations. (6) Make recommendations or prefer charges to TV board concerning violations. (7) Recommend amendments.

'HITCHING THEIR WAGONS TO NEW STAR': Whither Hollywood? Will film industry "meet and conquer the threat of TV" -- or is it to be a knock-down-and-drag-out between home and theatre entertainment -- or are the two media destined to merge?

"Movietime U.S.A.," glittering current bootstrap promotion campaign of film industry, is producing results -- no doubt about that. While they aren't exactly tearing down the doors (except on occasional theatre-TV nights), customers are returning to the movie palaces. And film folk like to stress this point:

Despite return of big TV shows, both film rentals and theatre business have continued summer's upswing through September. They give these reasons: (1) "Movies are better than ever." (2) TV's novelty is wearing off.

But can Hollywood continue to battle TV as a competitor -- or will film and telecasting industries eventually discover they're interdependent? Theatre owners already are laying plans to blend with TV through station ownership, theatre TV, etc. (Vol. 7:39). Movie producers, too, know they have important decisions to make.

Old films in studio vaults -- once written off as virtually worthless -- have taken on new luster. Libraries of 5 leading film producers alone are said to be worth some $280,000,000 for TV use (Vol. 7:18). But the major studios are still withholding them to protect theatre owners.

Public's appetite for the Hollywood product -- on home TV sets -- is unques-

tioned. With hundreds of new stations after freeze, it will increase many fold. A.C. Nielson survey showed every night 1,000,000 TV sets in New York area are tuned to at least one feature film -- with figure rising to 1,500,000 on Friday nights and 1,600,000 Tuesdays. Only films included were those made for theatre release.

Possible forerunner of trend is testimony by Republic Pictures president Herbert J. Yates that his studio has been considering giving up production of films for theatres, devoting entire output to TV features. Statement came out in course of hearing on cowboy star Roy Rogers' precedent-setting suit which succeeded in preventing Republic from selling or leasing his old films to TV (Vol. 7:26-27,30).

Setback to movie companies seeking revenue through release of old films to TV was administered Oct. 18 by Los Angeles Federal court with Judge Hall's grant to Roy Rogers of permanent injunction to keep Republic from offering his films to TV.

Rogers' contract didn't mention TV specifically, but reserved actor's right to control association of his name with sale or advertising of any commercial product. Court ruled this applied to TV programs -- both sponsored and sustaining -- since sustaining programs in effect advertise network or station presenting them.

Decision opens way for other stars with contracts similar to Rogers' to prevent studios from releasing their pictures to TV.

* * * *

Hollywood is at the crossroads, and we think Variety's Oct. 10 sizeup of situation particularly worth reading:

"The next 6 months are expected to be the period of decision for the motion picture industry. Level of the box-office between now and next April is seen as the tell-tale on whether the film biz, as now constituted, can live side-by-side with TV or whether the senior entertainment medium is slated for wholesale merger with its junior competitor.

"In any case, of course, the gap between films and TV is recognized as bound to close somewhat. With video already manufacturing and chewing up miles of film footage every week, with theatres installing large-screen tele as fast as they can get sets, with Paramount and 20th-Fox in heavy TV investments, and United Paramount hankering to merge with American Broadcasting Co., there can be little doubt that the contact between the 2 media is already getting fairly close-knit.

"If the b.o., however, should fail during the coming winter to sustain the gains it has made in recent months, a wholesale realignment of film thinking vis-a-vis tele can be expected. In efforts to bolster profits and/or hedge themselves against further income losses, the majors can be expected to start looking for ways to jump into video with both feet.

"Instead of the tentative eyeing of tele that's now going on, the big producing, distributing and exhibiting firms will undoubtedly be actively on the prowl for quick ways of hitching their wagons to the new star. For the producers that means selling of old -- and not-so-old -- product to TV..."

AZCARRAGA PLANS DOZEN TV STATIONS: Uninhibited by any freeze, content to let U.S. worry about uhf and color and all that, Mexico is proceeding with plans for new TV stations -- and we're now advised that no less an enterpriser than Emilio Azcarraga, country's top TV-radio and movie tycoon has projects for 4 new border stations and 6 others. These would be in addition to the one he already operates in Mexico City (XEW-TV, Channel 2) and second he plans there (XEQ-TV, Channel 9) -- both to function from giant new 25,000,000-peso, 26-studio TV-Radio Center due to be ready Dec. 1.

XEQ-TV still awaits govt. go-ahead for installation at Cortez Pass, some 15,000 ft. above Mexico City. Altitude is so great that DuMont was required to guarantee satisfactory operation of transmitter in such rarified atmosphere. Idea is to throw signal not only over Mexico City but also over vastly wider radius (100 mi. or more) than can normally be attained by TV. (Salt Lake City's KDYL-TV, incidentally, is planning station on Mt. Nelson, 9300 ft. above sea level, 3660 above average terrain, claimed as highest in U.S., expected to give 90-mi. radius with 50-kw ERP.)

Now experimenting on Channel 9 is home-built station operated by Guillermo Gonzales Camarena at XEGC, Saguayo; he was chief engineer for Azcarraga's radio net-

work, and Azcarraga reports: "There is absolutely no difference, so far as quality of image and sound is concerned, between the transmissions of his station and ours."

Azcarraga has applied for border stations at Tijuana, close to San Diego; Jaurez, opposite El Paso; Nuevo Laredo, opposite Laredo, Tex.; Reynosa, about 50 mi. west of Matamoros (opposite Brownsville, Tex.) where Mexico City publisher Romulo O'Farrill's XELD-TV recently went into operation on Channel 7 (Vol. 7:31,36). Senor O'Farrill also owns Mexico City's other existing TV -- XHTV on Channel 4.

Six more outlets are planned at Monterrey, Guadalajara, Tampico, Guanajuato, Veracruz, Torreon. Most of the stations, reports Azcarraga, will be managed by an organization formed by his companies with owners of leading local radio stations. Network plans await Cortez Pass station and, presumably, microwave relays therefrom.

* * * *

Note: Foregoing stations would comprise majority of the "20 or 22" which Mexico's director-general of telecommunications, Miguel Pereyra, while in Washington in early August, told us were in the works, would be built within year. New table of vhf channel allocations to Mexico, considerably revised from one previously set up in FCC table, will be released shortly by State Dept. It gives Mexico more channels, is understood to affect proposed U.S. allocations only in that (a) San Diego loses educational Channel No. 3, which goes to Mexicali, and (b) several changes in channel numbers, though not number or distribution of channels, will be required in proposed U.S. table of allocations (see TV Factbook No. 13).

For news about other Latin American TV station plans, see below.

MORE TV ACTIVITY in Latin America, spurred no doubt by availability of U. S. equipment while freeze persists here:

Dr. Assis Chateaubriand, Brazil's big chain newspaper publisher and radio operator, who already has established TV outlets in Rio de Janiero and Sao Paulo (see *TV Factbook No. 13)*, has ordered RCA equipment for another station in Belo Horizonte, to operate on Channel 4 and be ready in early 1952. Plans are also afoot for Porto Alegre.

Sao Paulo's second station, licensed to Radio Televisao Paulista, is nearing completion and due on air on Channel 5 by Jan. 1. It's also reported that Jao Baptista do Armaral, radio station owner and publisher of *Sao Paulo Recorde*, is planning to build both in that city and in Rio.

This week was inaugural time for Argentine's first, LR3-TV, Buenos Aires, operating on Channel 7, said to be forerunner of 2 more in Buenos Aires, 2 in Rosario, one each in Cordoba and Mendoza (Vol. 7:36, 40).

Uruguay's Servicio Oficial de Difusion Radio Electrica (SODRE), official regulatory agency, has asked "immediate" bids for construction of nation's first TV station in Montevideo, reports Dept. of Commerce's *Foreign Commerce Weekly*. No standards were specified, but govt.-appointed committee has recommended U. S. standard 6-mc channels, using No. 2 to 6, with line and field standards to be adopted after tests.

———■———

FCC can't censor, chairman Wayne Coy told Knights of Columbus in Oct. 17 letter to its Supreme Council secretary. Latter had forwarded resolution, passed at annual meeting Aug. 21-23, demanding that "proper authorities . . . take the necessary action to see that all TV shows are presented in such a way that they will not offend any person." Said Coy: "The law places the responsibility upon the station licensees . . . They are limited in the exercise of their judgment by requirements of law which prohibit the broadcast of obscene, indecent or profane language and information relating to lotteries." He suggested organization "consult with the station operators."

FCC Commissioner George Sterling speaks Oct. 31 to New York Section of Armed Forces Communications Assn., plans to discuss TV in general—freeze, uhf, color, etc.

Personal Notes: Telford Taylor, onetime FCC gen. counsel, recently in private practice, who as an Army brigadier general prosecuted Nuremberg trials, confirmed by Senate this week as administrator, Small Defense Plants Administration . . . James Miles, ex-director of Purdue U's WBAA, named executive director, National Assn. of Educational Broadcasters, newly-established full-time job, with headquarters at U of Illinois . . . Edward Cheyfitz, aide to Eric Johnston, has resigned from Motion Picture Assn. Washington staff, his TV duties to be handled by Taylor Mills of N. Y. office; he plans to open law office in Washington . . . Clarence L. Doty, ex-mgr., WJZ & WJZ-TV, named gen. mgr., Bories Organization Inc., TV-radio packaging-merchandising firm for grocery-drug trades . . . Robert Dressler transfers from TV research for Paramount Pictures to director of research-development of its 50% subsidiary Chromatic Television Laboratories Inc. . . . George Shupert resigns as v.p., Paramount TV Productions, off to Los Angeles Oct. 20 to make plans . . . George W. Harvey, sales mgr., WGN-TV, Chicago, Nov. 5 becomes mgr. of WFLA, Tampa . . . Charles C. Duncan promoted to operating staff mgr., AT&T Long Lines Dept. . . . David J. Jacobson, ex-Young & Rubicam, named CBS-TV director of public relations . . . George B. Storer Jr. transfers from WAGA-TV, Atlanta, to Fort Industry Co.'s newly acquired KEYL, San Antonio (Vol. 7:41) in early November, manager W. D. (Dub) Rogers Jr. going on semi-active status . . . Roger LaReau named commercial mgr., WTVN, Columbus . . . Maury Baker, ex-ABC, named TV-radio chief of BBDO, San Francisco . . . Sidney Nadler, ex-film director, WOR-TV, joins WXEL, Cleveland, as asst. film director . . . Wm. E. Lane, ex-WWJ-TV, joins Video Films, Detroit, in charge of sales . . . Ed Gruskin, recently in Europe for ECA, joins Official Films Inc., N. Y.

TV service in congested area is analyzed by FCC chief engineer Edward Allen in *A Service Study in the Lake Erie Region*, (TRR Report 5.3.2), available from Technical Research Div., Room 1629, Temporary T Bldg., 14th St. & Constitution Ave., Washington.

Walter W. Carruthers, 38, Don Lee engineering v.p., died Oct. 15 after brief illness; surviving are widow and son.

Network Accounts: Gillette shares Oct. 26 sponsorship of Joe Louis-Rocky Marciano fight on its *Cavalcade of Sports* with Admiral, Crosley, GE, Motorola, Philco, RCA & Sylvania on coast-to-coast NBC-TV, Fri. 10-conclusion . . . Lucky Strike starting Nov. 4 presents *Jack Benny* 6 times from Hollywood on CBS-TV, Sun. 7:30-8 during time regularly occupied by *This Is Show Business;* other dates are Dec. 16, Jan. 27, Mar. 9, Apr. 20, June 1 . . . G. F. Heublein & Bros. Inc. (A-1 Sauce & Mustard) Oct. 3 started sponsoring 12:15-12:30 segment alt. Wed. of *Ruth Lyons' 50 Club* on NBC-TV, Mon.-thru-Fri. noon-12:30, thru Scheidler, Beck & Werner, N. Y. . . . General Foods (Swans Down Instant Cake Mix, Minute Rice) starting Jan. 6 will sponsor *Claudia* on NBC-TV, Sun. 6:30-7, thru Young & Rubicam . . . Carter Products Inc. (Nair, Arrid, Rise) starting Nov. 3 sponsors *City Hospital* on ABC-TV, alt. Sat. 12:30-1, thru Ted Bates & Co. and Sullivan, Stauffer, Colwell & Bayles, N. Y. . . . Waring Products Corp. (Waring blendor) starts Fri. participation in *Homemakers' Exchange* Oct. 19 on CBS-TV, Mon.-thru-Fri., 4-4:30, thru Hicks & Greist, N. Y.

Station Accounts: Local political time being sold by TV outlets on ever-increasing scale, auguring huge demand about this time 1952—with national headquarters of major parties planning various aids to State and local candidates; in hot Philadelphia mayoralty race, candidates and spokesmen are buying Class A time . . . WNAC-TV, Boston, reports these among accounts participating in daily 1-1:30 p.m. *Shopping Vues:* Abon Mfg. Co. (glove clips, handbag holders), thru J. J. Coppo Co., N. Y.; Grocery Store Products Co. (Cream of Rice cereal), thru Ted Bates & Co., N. Y.; Metropolitan Ice Co. (frozen food delivery), thru Harry M. Frost Co., Boston; New York & New England Apple Institute Inc., thru Charles W. Hoyt Co., N. Y.; Von Schrader Mfg. Co. (Powderene rug cleaner), thru Reincke, Meyer & Finn, Chicago . . . Food firms using Donald Duck brand name, under Walt Disney licenses, are now engaged in TV-radio-newspaper promotions, thru Russell M. Seeds Co.; among licensees are Atlantic Syrup Refining Co., Philadelphia (chocolate syrup), and Cinderella Foods, Dawson, Ga. (peanut butter) . . . A. C. Gilbert Co. (toy trains) buys 8 *Boys Railroad Club* films on WABD, New York, Fri. 6:45-7, thru Charles W. Hoyt Co., N. Y. . . . Delta Tool Div., Rockwell Mfg. Co. (power tools) buys Sat. 1:15-1:30 *Delta Tool Show,* film, on WTMJ-TV, Milwaukee, thru Marsteller, Gebhardt & Reed, Chicago; other new WTMJ-TV national accounts: Hills Bros. (coffee), thru N. W. Ayer, N. Y.; Blum's of San Francisco (candy), thru BBDO, Minneapolis; Fearn Labs. Inc. (soup mixes), thru Howard H. Monk, Rockford, Ill.; R. Gerber & Co. (corn popping oil), thru Newby & Peron, Chicago . . . Hotpoint Inc. sponsoring *Today's Teens* on WENR-TV, Chicago, panel of 4 teenagers discussing modern problems, thru Maxon Inc. . . . Crosley planning another TV spot drive Nov. 12-Dec. 7, thru Benton & Bowles, N. Y. . . . GE sponsoring films of U of Georgia Sat. grid games Sun. afternoons on WLTV, Georgia Tech games same afternoon on WSB-TV . . . Among other advertisers reported using or preparing to use TV: Sau-Sea Foods (Sau-Sea shrimp cocktail), thru William von Zehle & Co., N. Y.; Top Secret Hosiery Sales Co., thru Pearl Randolph Stanton, San Francisco; Arrestine Sales Agency Inc. (tablets to stop smoking), thru Sparrow Adv., Birmingham, Ala.; Southwestern Bell Telephone Co., thru Gardner Adv., St. Louis (KSD-TV); Caruso Brands Inc. (Caruso foods & macaroni products), thru Bermingham, Castleman & Pierce Inc., N. Y.; Fenton Art Glass Co. (Fenton glassware), thru John Falkner Arndt & Co., Philadelphia; Monogram of California (Add-A-Mite home calculator), thru Sidney Garfield & Associates.

SEVEN TV MANUFACTURERS are joining with Gillette to sponsor Joe Louis-Rocky Marciano heavyweight bout coast-to-coast on NBC-TV, Oct. 26—and together they're paying what may be a record for rights to any prizefight. Gillette, regular TV-radio sponsor of Friday night fights, is paying $230,000, of which $50,000 will be for time charges, $180,000 to International Boxing Club for TV-radio rights. On top of this, set manufacturers will pay $70,000—or $10,000 each—making grand total of $250,000 to IBC and $300,000 for entire telecast, including time charges.

Set makers sponsoring bout are Admiral, Crosley, GE, Motorola, Philco, RCA, Sylvania—all except GE among the 8 which joined to snag July 18 Joe Walcott-Ezzard Charles title bout away from theatre TV, paying $100,000 for TV-radio rights (Vol. 7:28-29). Plugs for TV manufacturers Oct. 26 will be institutional in character, as they were on July 18 telecast. Deal is one-shot action, no permanent organization of TV manufacturers having been set up to sponsor sports events.

Same day sponsorship was announced, Oct. 17, RCA consumer products v.p. J. B. Elliott told Philadelphia bankers convention that theatre TV and home TV "can and should" function as complementary media. Added Elliott: "I should like to end, once and for all, the rumor that home TV interests are currently building up a war chest to do battle with theatre TV."

———■———

Amplification Dept.: "Your Newsletter of Oct. 6 [Vol. 7:40] gave a good picture of the Denver excitement over the World Series presentation on TV," writes John R. Howland, director of products research, Stewart-Warner Corp., "and yet, according to a New York banker with whom I had supper last night and who was in Denver at the time, your story was an understatement. Not only was the World Series on TV the only topic of conversation in Denver, on the street or anywhere during those days, but the theatre showing was accomplished under the auspices of Max Brooks, executive v.p. of the Central Bank & Trust Co. of Denver, who gave away admission tickets to applicants in the order of their requests so as to avoid Commissioner Frick's ban on the sale of tickets for theatre exhibition. Mr. Bromfield, of the Corn Exchange Bank of New York, quotes Mr. Brooks as saying that after the play on Sunday had been rained out and those who had tickets had the privilege of exchanging them for the following day, the lines formed at 2 a.m. and hundreds of people were sleeping in line when the distribution of tickets was begun Monday morning." Editor's Note: Bank reportedly picked up $5000 check for cable charges in return for exclusive distribution of tickets.

Cost figures filed by WKY-TV, Oklahoma City, in brief protesting FCC's proposal to shift it from Channel 4 to 7, show: (1) Investment in facilities is $506,242. (2) Loss in 1949-50 was $269,647. (3) Total cost of shift would be $167,480; depreciated book value of present transmitter is $56,500, presumably partially salvageable; cost of antenna, which has "doubtful" salvage value, was $28,500. Brief includes statements from 41 dealers and servicemen who say it would cost public hundreds of thousands of dollars to adapt or replace receiving antennas. Station proposes alternative allocation to FCC plan, leaving WKY-TV on Channel 4.

RCA has stepped up power of its 20-kw transmitter and amplifier (TT-20BL & TT-20AL) to 25 kw, redesignating them TT-25BL & TT-25AL—for Channels 2-6. Power remains 20 kw for Channels 7-13.

Army is cancelling all advertising contracts, including TV-radio (thru Grant Adv., Chicago), following Congress' removal of entire $3,100,000 recruiting ad appropriation.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
October 20, 1951

CRYSTAL-GAZING THE NEAR FUTURE OF TV: RCA consumer products v.p. Joseph B. Elliott sparked the most lively conversation piece in the industry several weeks ago when he flatly predicted shortages of "quality receivers" by mid-December (Vol. 7:39). So we addressed identical letters to a cross section of TV set manufacturers, asking them:

"What's your thinking on this score, and on TV market prospects generally for the rest of this year and early next?"

Thoughts of most seemed to run in same direction: demand will soon outrun foreseeable supply, material shortages inevitably in offing.

Of the 14 responding, all but 3 gave us permission to quote them by name, and we've digested their responses herewith. But the 3 anonymous respondents are particularly worth noting, because each in own way dissents from majority.

One is a private label manufacturer, who opined that the materials situation will ease up during first 1952 quarter "and therefore production may be greater than is anticipated at this time." Another, a highly reputed medium-sized manufacturer who said his firm's inventories were all absorbed by Sept. 15, saw no shortage until fall of 1952; thinks the industry "ought to get sensible" and plan in terms of 4-5,000,000 sets next year "so they will make as much on this volume of business as they would with 50% more and dumping the extra 50% at a loss."

The third, also medium-sized, pooh-poohed shortage problems, asserted he's "a bit allergic on the subject of material shortages." His reply ran so far counter to others that his quotes are worth special note. All replies were written before DPA administrator Manly Fleischmann's lugubrious report last week on metal supplies (Vol. 7:41). For essential quotes from most of the replies, see opposite page.

TV MARKET UP, INVENTORY CUT IN HALF: "Biz better. Table models short. Conservation measures evident in shipments received this a.m. per long-standing plans."

Foregoing verbatim message from major distributor for one of top receiver manufacturers, in good market, just about epitomizes trend of TV trade as a whole. And the trend of business generally would seem to apply to TV-radio particularly, as nicely summed in Oct. 19 United States News:

"Sales volume, in fact, has never been so high except during scare-buying waves...hard goods are selling better than in any year except 1950 and early 1951."

And National Industrial Conference report this week says liquidation of inventory could be basic fact of fourth quarter -- third quarter having been marked by leveling off. Its sizeup of commodity market in general certainly applies to TV.

* * * *

This week's RTMA figures on production and inventory are all to good, too: TV output for week ending Oct. 12 was 99,877 (1990 private label), up some 12,000 from preceding week (Vol. 7:41) -- and best week since 122,489 of last April 20.

Factory inventory same date fell to 389,894, down about 25,000 from week before -- down, too, to just about half peak inventory figure of 768,766 recorded as of last Aug. 3 (Vol. 7:32). In other words, factory inventory has been reduced some 380,000 in 11 weeks to approximately the figure of mid-April (Vol. 7:16).

Oct. 1 distributor and dealer inventory estimates (always month late) won't be known until early November -- former from RTMA, latter from Dun & Bradstreet -- so it's somewhat too early to gauge flow in those pipelines. However, the recently reported figures for end of August were quite gratifying (Vol. 7:40), and reports from wholesalers and retailers have been consistently good the last 6 weeks.

Radio output fell to 205,014 units (73,929 private label) from 230,385 the preceding week, factory inventory also going down slightly to 362,688 from 388,463. Radios were: 147,574 home receivers, 27,238 portables, 30,202 auto.

What They Say About Demand, Supply and Shortages

(See story on opposite page)

ADMIRAL CORP. (Ross D. Siragusa, president)—"The first of the year will see a shortage of TV sets of the better known brands. As far as prospects for next year are concerned, all I can say is that it pretty much depends on what happens in Korea and in Europe. If the Govt. continues to restrict the use of materials, obviously we are going to feel the effects of it in proportion to the amount of restrictions . . . "

BENDIX RADIO, div. of Bendix Aviation Corp. (R. W. Fordyce, gen. sales mgr.)—"My estimate is that there will be a shortage of good quality low-end merchandise before the end of this year. I do not believe there will be an over-all shortage of medium and higher priced merchandise this year, but I feel that inventories will be brought well in balance at year end. The pinch from a material standpoint will very probably be felt the first quarter of 1952, and will no doubt accelerate from that point on. I have the feeling that during the coming year the market will be able to absorb the merchandise which the industry will be able to produce, and that we will not see a repetition of the price-cutting and dumping which occurred this summer."

CROSLEY DIV., Avco Mfg. Corp. (John W. Craig, v.p. & gen. mgr.)—"There is no question but what the wolf is finally at the door on the materials problem . . . Every indication is that the first [1952] quarter cuts, particularly in copper, aluminum and nickel, will be more severe than for the fourth quarter. I feel that steel will also be cut to some degree in the first quarter as compared to the fourth quarter, although not so drastically as has been the case in the reductions in copper and aluminum. All of this spells less materials and less unit production of TV receivers; however, the industry has done a good job to date in the conservation of materials, and I think much more can be accomplished, particularly in the conservation of copper and aluminum.

"I think we must be realistic about the 1952 market for, as you know, for all practical purposes there will be few if any new stations on the air for the calendar year 1952 due to the freeze situation. [Yet] there is still more than ample inventory in the pipe-lines [and] it is our considered opinion that manufacturers will be able substantially to supply the demand for the remainder of this year and into 1952 insofar as we can predict today from the over-all materials available for the succeeding quarters in 1952. It is my further opinion that prices will increase as we progress in the next few months for, as you know, wage rates are 'tied to the moon', and also unit volume has been reduced due to material shortages, which means higher burden costs."

EMERSON RADIO & PHONOGRAPH CORP. (Benjamin Abrams, president)—"It is my opinion that the demand for TV receivers will exceed the supply no later than December . . . It appears that right now, sales at the consumer level are considerably in excess of production. Likewise, I find that in the case of Emerson, it is also true that sales by distributors to dealers are approximately 100% in excess of our factory's current production. [But] the real shortage can only take place after . . . inventories are disposed of.

"Based upon allocations of material, the manufacturer is not likely to materially increase his production for the rest of this year over the current production rates. It is also well to note that indicated allocations for the first quarter of 1952 will be smaller than the fourth quarter [and] the real shortage panic [should] be felt and fully appreciated right after the first of the year."

GENERAL ELECTRIC CO. (A. A. Brandt, gen. sales mgr., receiver dept., Electronics Div.)—"Long anticipated shortages for manufacturers are now a reality at a time when the industry traditionally moves into peak production. [And] there appears to be no reason to expect an early change in the materials and controls situation, certainly not before the second or third quarter of 1952. It is expected, therefore, that curtailed production coupled with increasing demand will result in an actual shortage of TV at the consumer level either late in 1951 or early in 1952."

MAGNAVOX CO. (Frank Freimann, president)—Though absent when our letter was received, Mr. Freimann was quoted in reports from Dallas to effect that production first quarter 1952 will be "considerably less than half" first quarter 1951 and that there will definitely be shortage of sets by Christmas. He described certain markets as "runaway," notably San Francisco, and stated: "There's no question but what prices will have to rise, not only because of supply and demand but because of the continued upward pressure of material and labor costs."

MOTOROLA INC. (Robert W. Galvin, executive v.p.)—"There is a shortage of Motorola TV receivers now. Although we are manufacturing at the maximum rate permitted by govt. regulations, we are still required to allocate each set. It is anticipated that this condition will continue through the first quarter of 1952. Depending on future govt. regulations and the expanding market for TV, a more serious shortage could develop in the last half of 1952."

PACKARD-BELL CO. (Robert S. Bell, executive v.p.)—"The NPA [has] allotted materials which, in their estimation, will allow the industry to produce 1,000,000 TV and 2,000,000 radio sets during the fourth quarter, which is, of course, the peak sales period. This should result in the clearing of almost all inventory on the market, plus the sale of current production. The result should be a shortage of at least some lines, if not all, by Dec. 1.

"We are sold out through Dec. 31, which is as far ahead as we take orders. The first quarter of 1952 should see substantial sales [and] I find it hard to believe that the production of less than 1,000,000 TV sets [in first quarter] will satisfy the demand, although it should not create any actual acute shortage. [It appears] that there will be a rather good balance between supply and demand so far as keeping the business profitable for dealers, distributors and manufacturers during the first quarter of 1952 [and] there will be a continuing large demand for TV even without new stations. We just don't believe in the bogey of saturation any more than the automotive industry has during these past 30 years."

SENTINEL RADIO CORP. (Ernest Alschuler, president)—"Unless there is a complete change in the present quite apparent pattern of increasing volume of sales and a decreasing ability to manufacture, our thinking here is that the filled pipe-lines will be emptied somewhat after the first of the year. We continue to be confident that the

demand for TV will be more than healthy, but it is unfortunate that a way eannot be found to more moderately gear production with demand."

STROMBERG-CARLSON (S. R. Curtis, v.p. & gen. mgr.)—"It is my thinking [that] by the end of 1951 the overstock of TV sets hanging over the market will have been pretty well disposed of at all levels, the manufacturer, distributor and dealer. [And] I believe that the present CMP regulations [will] eontinue to hold a ceiling on the amount of production possible, and that by the first of the year, most manufacturers will be pressing production to the eeiling.

"Furthermore, I gather [that] the amount of raw materials to be allocated for the first quarter will be even less [than during fourth quarter]. If these assumptions prove to be correct, then the market after the first of the year should be reasonably firm, and I believe the production will tend again to the use of larger and larger tubes, since the unit output will be restricted, and since the differential in tube prices has become less and less."

SYLVANIA ELECTRIC PRODUCTS INC. (A. L. Chapman, v.p., Radio & TV Div.)—"I believe there will be a shortage of TV receivers in the first quarter of 1952 due to the shortages of materials, and also due to demands for plant capacities for military equipment . . . We have no fears at all about next year's demand, because it is evident that at long last the FCC should be very close to the time when the freeze should be lifted and UHF stations are going to take TV into the byways of the nation. If it were not for material shortages, I would expect that next year would be one of the largest in TV volume."

TELE KING CORP. (Louis I. Pokrass, chairman)—"There definitely will be shortages of materials which will curtail production of TV receivers during 1952, which shortages will really start the latter part of this year and will steadily increase—becoming worse by the end of 1951."

NAME WITHHELD ON REQUEST—"Like most manufacturers in our industry, we opened the production valves wide during the first quarter of 1951 and built to the limit of our capacity in the belief that we could not receive materials later this year. Of course, we know that there's no evidence of real shortages in our industry at this moment. Our production is now being stepped up again, and we have no difficulty procuring all items needed.

"We are being advised again that there will be severe shortages of materials and some components early in 1952. Just last week two receiving tube manufacturers told me that the real bottleneck would be the shortage of nickel which would definitely limit the quantity of circuit tubes that can be covered in the first quarter. In my files there are letters and memoranda dated just about a year ago which cover the subject of a nickel shortage that was developing in the tube industry and which was going to not only slow us down but probably stop us in 1951 . . .

"Personally, I do not believe that the shortage of materials will be a handicap to manufaeturers next year. I think the industry will be able to manufacture as many sets as it ean sell. Material shortages will probably develop, but I think that our industry is extremely resourceful and that it will be successful in developing the substitutes and designing changes necessary to get around any 'real' material shortages that develop.

"We are not stocking up any materials in anticipation of shortages . . . We are gambling on the side of enough materials to support our sales program. If we lose this gamble, there will be a severe shortage of our merchandise, which to me is a much 'higher class problem' than having a surplus of merchandise . . ."

Topics & Trends of TV Trade: Not much doubt about parts shortages—in minds of GE electronics executives, at least. Syracuse plant laid off 2000 employes Oct. 18, shut down TV plant for week, blaming shortages of "certain eomponents." Released workers were told to report back Oct. 24, and it was indicated that during shutdown company will begin converting some of its TV plant space to military production. During early phases of recent trade slump, GE workers generally fared better than most other TV-radio plant personnel beeause company continued relativcly high production while others trimmed output.

* * * *

New, lower price ceilings for TV-radio are being explored, OPS offieials told representatives of set manufacturing industry at Washington meeting Oct. 18. A special price control order for TV-radio industry was suggested by OPS to put ceilings "at a more realistic price level," since sets currently are selling well below levels established by OPS' general ceiling priee regulation (GCPR). Industry spokesmen said set manufacturers currently are operating on small profit margins as result of trade slump. Possible priee ceilings on warranties also were discussed. Subcommittee of 5 will be named to look into possibilities of tailored pricing order for TV-radio.

Members of OPS TV-radio manufacturers industry committee: C. P. Baxter, asst. gen. mgr., RCA-Victor home instrument dept.; A. B. Chambers, DuMont; Arthur L. Chapman, TV-radio v.p., Sylvania; Richard A. Graver, v.p., Admiral; W. J. Halligan, president, Hallicrafters; Larry F. Hardy, president, Philco TV-radio div.; Gerald Light, adv. mgr., Emerson; Glenn W. Thompson, president, Arvin; I. W. Wyckoff, secy.-treas., Pilot.

Trade Miscellany: Crosley starts construction of new $5,500,000 plant for defense production on 73-acre tract on Glendale-Milford Road, Cincinnati, to provide 360,000 sq. ft., employ 1500-2000, be partially ready by June 1952 . . . Because DuMont's W2XCD, in Passaic, N. J. (now WABD), began regularly scheduled telecasts in 1930, and firm's first receiver was turned out there in 1938, that city has adopted slogan "Passaie, Birthplace of Telcvision"—and Chamber of Commeree plans dinner Nov. 14 honoring Dr. Allen B. DuMont . . . Olympic Radio's 3-week jurisdietional strike ended with return of about 450 IBEW (AFL) workers Oct. 15, issue with IUE to be resolved under NLRB eleetion to be set . . . Argentina's new TV station in Buenos Aires (see p. 8), supported if not eontrolled by Peron regime, signaled order by Ministry of Eeonomy issuing certificates of neeessity for 30,000 TV sets, expected mainly from U. S.

Merchandising Notes: Trade-in sales account for 40-60% of current Los Angeles retail TV business, Oct. 19 *Retailing Daily* reports—unnamed executive of "largest volume chain" quoted as saying private and off-brand promotional sets still represent 75% of his total sales . . . RTMA has published eounty-by-eounty figures on estimated 2,744,831 TVs shipped to dealers during first 8 months of 1951, available on request . . . Report on Muntz TV Inc. by O. B. Motter & Associates, N. Y., notes these TV unit sales: April 11,589, May 7491, June 6890, July 6574, August 11,046, Sept. (estimated) 10,000—total of 53,590 valued at $14,926,300, as against 41,434 valued at $10,786,600 for same 6 months of 1950 . . . Muntz reported now turning out 24-in. eonsole to list at $360 plus tax . . . Arvin 8½-in. table model offered by *Chicago Sun-Times* free to anyone procuring twelve 6-month subscriptions.

Mobilization Notes: Tougher policy on tax amortization benefits for plant expansion was announced by DPA chief Manly Fleischmann Oct. 18 as 60-day "moratorium" ended (Vol. 7:33). Principal changes, designed to cut down number of govt.-aided expansion projects:

(1) After Nov. 1, no company can begin expansion without DPA approval. Formerly, firms could postpone application until 6 months after they had started building.

(2) Ten-band priority system will be set up to govern processing of applications, with machine tools getting top place on list. Most electronic plants would fall under priority No. 5, "military end items and supporting projects urgently needed by the armed services."

During "moratorium," DPA actually handed out more authorizations for fast tax write-off than any comparable period—including certificates of necessity for some $20,000,000 in expansion of electronic and related companies. In addition to those listed in Vol. 7:33, DPA okayed these projects since moratorium began Aug. 18 (amortization at 75% of project cost except where otherwise noted):

Crosley, Evendale, Ohio, fire control units, $4,697,500; Corning Glass Works, Danville, Ky., glass bulbs for electronic tubes & lamps, $3,605,750 (50%), and lead glass tubing & rod for tubes & lamps, $2,228,450 (50%); Emerson, Jersey City, fuzes, $1,960,160; Allen-Bradley Co., Milwaukee, resistors, $1,316,088; Sonotone Corp., Elmsford, N. Y., military items, $347,553.

Certificates granted in cases where expansion had already begun before Sept. 23, were listed by DPA without dollar value, which will be established later. The following cases came under that heading, and are listed with dollar value applied for, rather than amount granted—which is often considerably less:

Brown & Sharpe Mfg. Co., Greystone, R. I., military items, $1,442,258; Sylvania, electrical products at Warren, Pa., $822,610, and tubes at Emporium, Pa., $314,000; Motorola, Phoenix, research, $528,840; Raytheon, electronic tubes at Newton, Mass., $427,428, and magnetron tubes at Waltham, Mass., $353,581; Jeffers Electronics Inc., DuBois, Pa., capacitors & choke coils, $371,154; Hycon Mfg. Co., Pasadena, Cal., electronic equipment, $306,152; RCA, Lancaster, tubes, $127,000; Raymond Rosen Engr. Products Inc., Philadelphia, electronic equipment, $76,417; Resistoflex Corp., Belleville, N. J., aircraft electronic equipment, $69,617 (80%); Federal Enterprises Inc., Chicago, transmitter & receiver assembly cases, $25,725; Lear Inc., Los Angeles, control systems, $10,616.

* * * *

Two new defense electronics groups were set up this week by Defense Dept. Research & Development Board under chairman Donald A. Quarles of RDB's electronics committee. Most important move is establishment of clearing house to collect and disseminate information on reliability of electronic equipment, headed by M. Barry Carlton of RDB secretariat and Dr. Albert F. Murray, RDB TV-radio consultant. Represented will be Munitions Board, Joint Chiefs of Staff, the 3 armed services.

Also formed was group on transitors (Vol. 7:39), composed of top men in the field, to assist electronics committee "to establish sound policies for the development and functional application of transistors by the armed services." Transistor group's membership: Dr. J. W. McRae, Bell Labs, chairman; E. Finley Carter, Sylvania; Dr. E. W. Engstrom, RCA; Dr. I. A. Getting, Raytheon; Dr. A. G. Hill, MIT; G. F. Metcalf, GE; Col. Cary J. King, Office of Chief Signal Officer; Col. George F. Moynahan, office of Army asst. chief of staff; James M. Bridges, Ordnance; Charles L. Stec, Navy Bureau of Ships; H. V. Noble, Wright Air Development Center, Dayton; Dr. E. W. Samson, Air Force Cambridge Research Center.

Financial & Trade Notes: Despite lower income from theatres, Monogram Pictures reports over-all revenue from film rentals went up because of income from TV—and president Steve Broidy said company is organizing unit to produce films expressly for TV. Monogram showed consolidated net profit of $1,061,648 ($1.40 a share) on gross of $9,311,900 for fiscal year ended June 30, compared with loss of $668,342 on $9,225,800 in fiscal 1950.

No evidence of "recession" in United Paramount Theatres Inc. report for 9 months ended Sept. 30, showing consolidated net earnings of $9,537,000 (including $3,483,000 of capital gains) or equivalent of $2.93 a share. This compares with $7,963,000 (including $1,456,000 capital gains) or $2.44 a share for same 1950 period. For third quarter, earnings were $4,688,000 ($1.44 a share), including $2,297,000 capital gains, vs. $2,528,000 (78¢ a share), of which $414,000 were capital gains, same quarter last year. "Firming of theatre attendance" due to improved product and more spending on recreation and entertainment, was reported by president Leonard Goldenson. He also informed stockholders that FCC has set Jan. 15 date for hearing before examiner on UPT proposal to merge ABC (Vol. 7:32, 35, 41).

Indicative of tax-hit balance sheets of most firms in electronics fields, GE third quarter report shows net earnings of $15,610,819 compared with $35,474,467 in third quarter 1950. Provision for Federal taxes, including $13,000,000 for excess profits tax, was $59,000,000 compared with $38,500,000 same 1950 quarter. For 9 months of this year, net earnings were $85,936,435, compared with $112,919,454 preceding year—after provision of $201,000,000 for Federal taxes vs. $98,000,000. Sales for 9 months were up to $1,694,084,373 from $1,354,483,215.

Short interest in TV-radio and related stocks on New York Stock Exchange showed these changes between Sept. 14 & Oct. 15, NYSE reported this week: Admiral, 33,492 shares on Sept. 14 to 26,035 Oct. 15; Avco, 23,280 to 20,480; GE, 11,995 to 9526; Magnavox, 13,190 to 13,213; Motorola, 15,603 to 15,565; Philco, 15,547 to 10,236; RCA, 34,860 to 37,204; United Paramount Theatres, 8815 to 8080; Westinghouse, 4497 to 6417; Zenith, 21,336 to 23,990.

Trade Personals: Leonard F. Cramer, for 16 years with DuMont, until recently executive v.p. of manufacturing operations, Nov. 15 joins Crosley div., Avco, as asst. gen. mgr. under John W. Craig . . . Rear Adm. Stanley F. Patten, USN ret., elected v.p. of Allen B. DuMont Laboratories Inc.; since 1947 he has been asst. to Dr. DuMont, lately was director of mobilization planning . . . Martin L. Scher, ex-Motorola-New York, named national sales mgr., Emerson . . . Arthur Richenthal, N. Y. attorney, named secretary, Standard Coil Products Co. . . . Jonathan A. Brown, ex-Sprague Electric, named director of research & statistics dept., N. Y. Stock Exchange . . . D. S. Beldon, radio sales mgr., named national account sales mgr., GE receiver dept., with D. E. Weston Jr. upped to radio sales mgr. and R. V. Buivid named asst. . . . E. G. Shower, ex-Bell Labs, named chief engineer of new germanium div., Radio Receptor Co., Brooklyn, in charge of development and production of germanium devices . . . Stanley C. Skoog named mgr. of GE's Illinois Cabinet Works, Rockford, Ill., making company's TV-radio cabinets . . . Edwin L. Liberg named supervisor of custom engineering, Audio & Video Products Corp. . . . M. A. Polak, ex-Andrea, Fada & Air King, named sales chief of Tele King Distributors Inc. of New York, succeeding Duke Wellington, now with Tele King . . . RCA tube dept. promotes 4 field salesmen to new posts as district managers: W. H. Garrett, Central district; Victor Williams, Southeastern; C. A. Brokaw, Western; W. H. Allen, Eastern.

Telecasting Notes: Screen Actors Guild warns 69 producers of TV films that it won't permit their products to be shown in theatres, unless the actors receive additional pay; it served notice it will cancel its contract with any producer releasing TV films for theatre exhibition . . . NBC-TV's new 7-9 a.m. show starting sometime this winter will have Dave Garroway as m.c., probably use same format as old *Garroway at Large* show . . . Transmitter of CBS's KTSL, Hollywood, starts from new Mt. Wilson site Oct. 28, with 25-kw ERP on Channel 2 radiated from 2837 ft. above average terrain; call letters change same day to KNXT . . . Mexico City's XEW-TV (Azcarraga) has increased operating schedule from 25 to 35 hours per week, expects as of Dec. 1 to go to 60 hours . . . Major TV advertisers in Cuba, reports *Tide*, are Frigidaire, Canada Dry, Colgate, Phillips Milk of Magnesia and 9 top TV set manufacturers . . . BMI, now licensor of 2800 radio and TV stations, reports net profit of $135,257 after taxes on gross revenue of $4,700,000 for fiscal year ended Sept. 30; Carl Haverlin reelected president . . . New York State WCTU resolves this week against beer sponsorship rights to next year's telecasts of major political conventions . . . DuMont's WABD, New York, moves to Empire State Bldg. Oct. 26, having received FCC permission to employ full 5-kw transmitter (16.7-kw ERP) . . . NARTB-TV membership went up to 69 stations this week, Baltimore's WBAL-TV joining up in time to vote on program code (see p. 6); DuMont and NBC are only network members.

GE Advanced Electronics Center at Cornell U, announced this week as joint GE-Cornell project, will be established on Ithaca campus "to carry out advanced study and development in the field of electronics and at the same time provide scientists and engineers with teaching and educational opportunities of a type never previously achieved." During present emergency, projects may include development of control systems for guided missiles, electronics counter-measurers, infra-red systems. Four-man management team will be headed by Brig. Gen. Tom C. Rives (ret.) of GE's engineering dept. H. R. Oldfield Jr., GE electronics dept. govt. sales mgr., will be resident manager. Dr. Charles R. Burrows, Cornell electrical engineering school director, will be associate principal scientist, and name of principal scientist will be announced later. Center will employ 80 first year, half of them scientists. Modernized lab is due for completion in February.

RTMA Transmitter Division, at one-day general membership meeting in Washington's Wardman Park Hotel Nov. 1, will hold panel discussion on "What I See for the Electronics Industry in the Year 1952" with these participants: Fred R. Lack, Western Electric, for industry; E. T. Morris Jr., director, NPA Electronics Div.; Col. C. A. Poutre, director, Munitions Board Office of Electronic Programs; Curtis B. Plummer, chief, FCC Broadcast Bureau. Dinner will be addressed by Adm. John R. Redman, director, communications-electronics, Joint Chiefs of Staff.

McFarland Bill to change some FCC procedures (Vol. 7:39) again proved too much for House Interstate & Foreign Commerce Committee to wade through. This week, it gave up its consideration of Senate-passed bill—after whole month's discussion—said it would make bill first order of business when Congress reconvenes.

More Oct. 1 sets-in-use reported since NBC Research's "census" of Sept. 1 (Vol. 7:39): Cleveland 510,922, up 16,922; St. Louis 317,000, up 11,000; Kansas City 143,558, up 10,558; Norfolk 81,556, up 6256; Boston 786,790, up 20,790; Tulsa 89,263, up 11,763; Baltimore 324,993, up 10,993; Johnstown 112,300, up 5300; New Orleans 63,548, up 2348; Milwaukee 266,965, up 8965; Providence 165,000, up 3000.

Whether Comr. Hennock will remain on FCC, now that Senate Judiciary Committee has failed to act on her appointment to New York Federal judgeship, was subject of much conjecture in Washington circles this week. She remained away from office, would make no comment. Though she informed committee Chairman McCarran she has no desire for recess appointment, and President Truman told press conference Oct. 18 that he doesn't intend to withdraw appointment, chances of getting judgeship now look very slim. Reason for Miss Hennock's rejection of recess appointment, presumably, is that she would run risk of winding up with neither position. She would have to resign commissionership, which runs until 1955, then face probability Senate would fail to confirm her when it returns next session. Hence most guessing now is that she will stay at FCC.

Ambitious community antenna proposal of J. E. Belknap & Associates—microwave facilities to feed numerous Illinois and Missouri towns (Vol. 7:40)—brought quick adverse reaction from KSD-TV, St. Louis. Station, one of those whose signals would be used, protested to FCC that Belknap: (1) Could select programs "without regard to the efforts of [KSD-TV] to maintain a balanced program structure." (2) Might "appropriate literary and artistic property without authorization and for profit." (3) Raises questions of "an unauthorized rebroadcast contrary to law." Station wants a hearing "or similar administrative procedure" on subject. It's first station to object to FCC about community antenna idea. Some have even encouraged the service with free plugs.

Actors in motion pictures made by TV networks must be in separate collective bargaining units from live TV actors, NLRB ruled Oct. 16 in dispute between Screen Actors Guild and TV Authority over rights to representation of actors in CBS's filmed *Amos 'n Andy* show. TVA had argued that actors in filmed show should be included in same bargaining unit as actors in live CBS shows, SAG insisting on separate units for films made by networks. NLRB on Oct. 16 also called for representation election within 30 days for all entertainers in live TV programs originating in New York, Chicago and Los Angeles, as well as election among *Amos 'n Andy* cast.

Supreme Court will hear transit FM argument, having decided this week to accept appeal from U. S. Court of Appeals (District of Columbia) ruling that transit FM deprives people of liberty, is therefore unconstitutional (Vol. 7:22). Court of Appeals ruled only on commercials; opponents of transit FM want whole service banned, including music. Proponents say that lower court decision jeopardizes broadcasting commercials in general. Argument should come this fall or winter, decision next spring.

Telecasters won excess profits tax relief Oct. 19 when House reversed its surprising rejection of compromise tax bill, passed slightly revised measure, sent it to White House. Section applying to telecasters is substantially same as original Senate measure (Vol. 7:37-38), permits firms with combined TV-radio station operations to drop TV losses and TV assets in figuring EPT credits.

Two uhf applications filed with FCC this week were from WOKY, Milwaukee, asking for Channel No. 19, and WVVW, Fairmount, W. Va., seeking No. 35. Total on file is now 448, of which 16 are uhf. [For further details, see *TV Addenda 13-0* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Despite reducing radio time sales (Vol. 7:39), NBC's over-all sales for 1951 are expected to be considerably higher than 1949's $72,867,000 and 1950's $92,373,000, which represented 18.3% & 15.8%, respectively, of RCA's consolidated income—the increase due entirely to TV.

NETWORK TV BILLINGS SURGE PAST RADIO: Gross time billings of the 4 TV networks went ahead of those of the 4 radio networks for first time in September -- hitting record total of $11,920,131 as against radio's $11,860,646.

There you have another eloquent facet of "fabulous upswing in TV billings" reported statistically in these columns each month, last analyzed in our Vol. 7:36.

If you will study the breakdowns supplied by Publishers Information Bureau (see p. 14), particularly in relation to previous months' figures, you'll observe complete substantiation of our predictions that network TV billings would soon overtake network radio.

If this is true of network TV, it's reasonable to assume it will eventually be true of TV spot and local -- what with their ready saleability and TV's vastly higher station time rates -- albeit fact remains there are merely 108 TV stations in operation as against very nearly 2400 authorized AM and 680 FM stations.

Significant in PIB figures, too, is fact NBC's forecast that its September TV revenues would nearly double its radio (Vol. 7:36) very likely came to fruition. Though figures for NBC's 5 prosperous owned-&-managed stations aren't available, its network figures are $5,380,538 for TV vs. $3,713,235 for radio -- TV ahead by 45%.

September total network TV ran well over threefold that for September 1950, or $11,920,131 vs. $3,502,682. September radio was $11,860,646 vs. $13,930,996.

All save DuMont TV billings were up from preceding month, all save Mutual AM billings were down from preceding month.

For first 9 months of this year, network TV totaled $85,379,619, compared with $30,930,165 for same period last year. Network radio was $130,904,666, nearly $5,000,000 under same 9 months of 1950.

Final tote on all TV -- time billings of the 4 networks and 108 stations -- will stand at $250,000,000 or more for year when over-all figures are made known by FCC in early 1952. That's still our prediction (Vol. 7:32,36).

TOWARD FREEZE-END; BORDER REALLOCATION: FCC is gradually clearing underbrush with idea of getting directly at heart of end-of-freeze problems the minute the last comment is filed in "paper" hearing on Nov. 26 -- now that it has assurance that defense effort doesn't affect freeze in any way (see p. 3).

Actual final decision before first quarter of next year is still unlikely, and sizeable number of stations actually on air before well into 1953 is still seen as virtual impossibility. Nevertheless, Commission is trying to do everything it can to anticipate Nov. 26 without prejudging filings yet to come. To date, there are 1220 papers in the docket.

Several exploratory FCC sessions have already been held -- no decisions made -- with commissioners beginning to line up their philosophies for "Der Tag".

"Flexibility" is word often heard at Commission, lending support to belief rock-bottom co-channel separation may be reduced from 180 miles to 165 or so -- in

Copyright 1951 by Radio News Bureau

"exceptional" cases. At same time, there's every reason to believe that FCC intends to maintain high average separation.

A common misconception about separations, it's pointed out at FCC, is that proposed 180-mi. minimum is the "norm". If you take FCC's proposal and draw circles based on it you'll find average separation is nearer 220 miles. Commission may try to maintain this average, or close to it, even if minimum is lowered.

That oral presentations will be mighty rare -- as everyone expected and most hoped -- was made clear by FCC this week when it issued first order on first such request. It told Cornell U (Vol. 7:38) that it had no problems that Commission couldn't decide on basis of written comments. Presumption is that most, if not all, such requests will get same treatment.

* * * *

Nettlesome Mexican border allocation has finally been nailed down, to the intense relief of Commission, with State Dept.'s announcement this week that executive agreement has been reached. After literally years of dickering, FCC feels U.S. wound up with best deal it could hope to make.

Allocations to cities affected should now read as follows (vhf only being involved): U.S.: Flagstaff, 9,13; Phoenix, 3,5,8*,10; Tucson, 4,6*,9,13; San Diego, 8,10; El Paso, 4,7*,9,13; Laredo, 8,13. Mexico: Mexicali, 3; Nogales, 2,7,11; Hermosillo, 6,8,10,12; Ciudad Juarez, 2,5,11; Monterrey, 2,6,10; Nuevo Laredo, 3,11; Reynosa, 9,12. [Note: pp. 54-60 of TV Factbook 13 should be corrected accordingly.]

In U.S., San Diego loses one channel, Tucson gains one. In Mexico, Mexicali and Monterrey lose one each, while Hermosillo and Reynosa gain one each. (For plans for additional Mexican border station construction, see Vol. 7:42.)

Agreement on powers stipulates that Mexico will not exceed U.S. proposed maximum: 100 kw for Channels 2-6, 200 kw for Channels 7-13. Also agreed upon was plan to assign stations so as to permit use of offset carrier.

CURBS ON STATION ALTERATIONS EASED: Many more TV-radio station alteration projects and considerable new radio station building will be exempt from govt. construction controls as result of this week's NPA action reclassifying TV-radio broadcasting facilities into the "industrial" category.

Broadcasters may now "self-authorize" orders -- write their own priority tickets -- for controlled materials up to 25 tons of steel, 2000 lbs. of copper and 1000 lbs. of aluminum per quarter, without application to NPA. Broadcasting facilities formerly were classed as "commercial", and as such were entitled only to self-authorization up to 2 tons of steel, 200 lbs. copper per quarter, and no aluminum.

Change will probably be most helpful to broadcasters planning relatively small remodeling and alteration jobs, as well as some builders of modest new radio stations. Some broadcasters whose fourth-quarter applications were turned down by NPA (Vol. 7:31-41) may now go ahead and build -- if their requirements don't exceed the new self-authorization limits.

Even new TV stations can be built under self-authorization procedure, if the construction can be stretched over 12-month period (builder self-authorizing up to his full quota for 4 quarters), using existing structures to provide studio space.

This week's action was victory for NARTB, which for many months had pushed for the move. Similar reclassification of newspaper and publishing industry 2 weeks ago (Vol. 7:41) set precedent for change in status of broadcasting.

Final batch of fourth-quarter construction approvals and denials, released by NPA at week's end, listed no TV-radio station approvals, one denial -- to KVNC, Winslow, Ariz., CP-holder which had applied to build AM station costing $37,700. (Despite rejection, station can be built during fourth quarter, since it is known to require less material than it is now permitted to self-authorize.)

Also denied was application by Tele Service Co., Wilkes-Barre, Pa., to build community antenna system -- second such project rejected by NPA (Vol. 7:40).

TV-radio broadcasters fared well under construction controls during fourth quarter. Final score: 16 projects approved, 7 denied. First-quarter applications are now being processed.

GRAND CLIMAX OF THE COLOR FIASCO: No "freeze of the freeze" on station construction ...No change in black-&-white receiver production...No stoppage of either uhf, color or theatre-TV developmental work.

But no "mass production" of color sets.

That's the upshot of 1½-hour meeting of defense mobilizer Charles E. Wilson, DPA-NPA administrator Manly Fleischmann, and a representative group of TV manufacturers in Washington Oct. 25. To put whole striking development in simplest terms:

CBS had asked for materials to build 250,000 color sets in 1952. Wilson said: "Can't spare the copper." So CBS decided it couldn't get anywhere using its small quota of black-&-white materials for color. And since no one else was making color sets, there was no sense in trying to make them or to continue colorcasting.

Mr. Wilson freely admitted he was misinformed in his idea that color was tying up too many engineers, interfering with military projects -- and so he readily dropped hasty proposal to curtail all color developmental work (Vol. 7:42).

* * * *

Industry was delighted, of course, and manufacturers emerged from meeting singing Wilson's praises, lauding his "statesmanship". Wilson himself was pleased as punch as he left session early -- "to put out another fire somewhere," as he told group. And CBS president Frank Stanton told us:

"I'll take Charley Wilson at his word anytime. I'm satisfied that the final decision was fairly arrived at."

Most of CBS's competitors still think whole thing was maneuvered by CBS to get it off the hook -- if not through direct approach, then by putting Wilson in position where he could do little else.

"CBS asked for the moon," as one put it, "knowing it would never get materials for 250,000 sets, and used the denial as an excuse to quit." On the other hand, Stanton said: "People in the industry will tell you we couldn't sell 250,000 sets but, by God, I intended to try. I wanted the chance."

Sen. Johnson is plenty suspicious, but won't say whom he suspects. "I don't think the action was warranted at all," he said. "It looks like a phoney to me. I don't know what's back of it, but it looks phoney."

We asked if he plans to take any action. "No", he replied, "you can't do anything when they spring the national defense angle on you. You just have to click your heels and salute -- so I'll just click my heels and salute like the rest."

Role FCC Chairman Coy played in move is unknown. Wilson conferred with him, but Coy will say nothing about it. Rest of commissioners didn't have slightest inkling of what was in the wind.

* * * *

Amplifying reasons for color ban, Fleischmann stated at press conference: (1) Policy is to discourage production of radically new products which tend to consume more materials. (2) Mass production of a new product consumes engineers at far greater rate than does pre-production development of new products.

Competition has manufacturers constantly improving and refining, Fleischmann said, giving obvious accolade to electronics folk.

Net effect is that CBS color in the home is done for, for the duration at the very least -- probably permanently, in opinion of most of the industry.

* * * *

Meeting was cordiality itself. Reporters should have been permitted, since no one was under wraps and everyone spoke freely afterwards.

Wilson started out by outlining defense aims, said electronics procurement was coming along nicely except for some reports of delays in aircraft gear.

Then Wilson said action was his alone. "If there are any hidden motives involved in this, I want to hear about them." What startled him, he said, was request for "additional" materials for 250,000 sets -- "and motors" -- with all that meant in critical materials, particularly copper. He just couldn't see this additional drain of materials, hence his action of preceding Friday (Vol. 7:42).

But Wilson's thought of stopping color development, to save engineering man-

power, was changed, he said, because "within the last 48 hours I've had entirely new information." What he had learned, and what was reiterated by manufacturers during meeting, was that color was taking very small fraction of engineering talent and that military was benefitting directly and indirectly from color work.

Industry men spoke up, one by one, told Wilson major engineering effort was on defense work -- up to 80-90% in some cases -- that color was taking only 5-7%.

All pledged dropping plans, if any, for mass production of color sets; all stood ready to provide more engineers for defense output as needed -- and if the defense contracts warranted, not now apparent since many plants still have men and capacity to spare. All urged continuance of color development.

Same general tone characterized statements of Philco's William Balderston, Dr. Allen B. DuMont, GE's Dr. W.R.G. Baker, Motorola's Paul Galvin, Emerson's Ben Abrams, RCA's David Sarnoff, Admiral's Richard Graver, Westinghouse's Tod Sloan, Crosley's Louis Clement, Hallicrafters' R.J. Sherwood. [For complete list of those from industry attending, see p. 7.]

Some expected Dr. DuMont to tee off, since he had sent Wilson hot wire of protest last week. But Dr. DuMont simply made these points:

(1) Opposed restrictions on experimentation on general principle. (2) Saw no mass production of color in prospect anyhow; CBS-Columbia plant (Air King) had never made more than 50,000 sets annually, so how could it possibly "leap into" production of 250,000? (3) Color experimentation is related to military work.

Gen. Sarnoff wanted assurances field tests could continue, said RCA would not go into production of color sets "until standards are approved." He added, amid laughter, that RCA wouldn't use "phonograph motors" in its color sets.

Mr. Abrams said he was 100% behind restriction, but suggested "limited production" of color sets "if CBS will promise to continue some color broadcasting."

CBS president Frank Stanton said: "We entered this in greatest good faith, expecting to mass produce -- but from what's been said here by all other members this morning I can see that I may have been going up a blind alley anyway."

Webster-Chicago's purchasing chief H.A. Gumz said action was severe blow to his company, which had spent heavily tooling up for color (making disc assemblies).

Paramount president Barney Balaban was quite satisfied that his company can still make modest number of Lawrence tubes. He said it uses no "quartz and no plastics like other tubes," would give good black-&-white picture. After meeting, both he and subsidiary Chromatic TV Labs president Richard Hodgson declared they expect no interruption at all in their plans to make tubes at plant in Stamford, Conn., since they did not expect to make any "great numbers".

They may even put color on Paramount Pictures' KTLA, Los Angeles, Balaban said, and place a few sets around town -- "all in the spirit of Mr. Wilson's statement" -- and have offered to buy CBS's color cameras, etc. but haven't yet had reply.

The outfit that got lost in color shuffle, Color TV Inc., San Francisco, was represented by president Arthur Matthews, who told Wilson that CTI has no men on color now, and expressed hope small fellows like himself will be helped with govt. orders. People at meeting assumed CTI was counting itself completely out of color.

* * * *

Obviously, CBS's request for materials precipitated action. Many people wonder whether Wilson would have moved if other manufacturers, with sizeable black-&-white allotments, had decided to divert portion to color.

Here's how Wilson put it, as we caught him leaving meeting:

"Nobody's hurt. I couldn't give these materials to color when many small manufacturers are really desperate for materials. This action doesn't affect anything else -- like uhf, theatre TV, etc. It's the first such thing I've uncovered.

"They told me color development doesn't affect their defense work -- and that's all I want to know."

Stanton explained development of color ban as follows, when reached after meeting: He had met with DPA-NPA administrator Manly Fleischmann Oct. 2 to discuss

CBS's request for more materials, then with Wilson Oct. 9, again Oct. 12. "Wilson told me I didn't have a Chinaman's chance of getting the copper." At 12:40 Oct. 19, after a cabinet meeting, Wilson told him final decision. "I then decided what to do, and issued the statement which was released at 3:00 p.m.

"We asked for enough materials to make 250,000 sets in 1952," he continued. "We were going to come out with a $149 'slave'. I felt there just wasn't any sense to try to continue if we couldn't make a dent in the market. If there were new markets, or no television at all, it would be all right to start gradually. But new markets are still a long way off.

"What happens now? Who knows? Wilson indicated the situation will stand one or 2 years. A compatible system may come before the FCC again before then. I've always preferred a compatible system, if it worked, said so during the hearing. But I wanted to get going before incompatibility beat us to death. I'm completely in the dark about the compatible system's status. There are so many factors that it's impossible to guess what will happen.

"We'll make color tubes, continue development. I've seen color pictures on our tube just as good as those on anybody's tube. We'll show it. We'll continue industrial work, theatre TV, etc."

* * * *

Though CBS's appeal for color materials is out, CBS-Columbia's president David Cogan is still looking for more black-&-white materials from appeal, hearing date of which was postponed from Oct. 23 to Oct. 30. Says Mr. Cogan:

"We didn't even have enough materials for black-&-white. They gave us an allocation good for only 1/3 of what we made last year. The reason our base period was low was because we were changing models at the time and our production was low.

"A color set takes over twice the materials of a black-&-white set. We couldn't produce much of either. We had made about 500 color sets and were just finishing our pilot run, ready for regular production.

"We want to continue experimentation. What would Wilson have us do with our engineers? Fire them? I wish Mr. Wilson would tell us where to get some military contracts. We're trying to get them.

"We got pretty badly shellacked in this. We had many very costly commitments. We had lumber cut to size. We had components on the way. We have lucite discs -- what can you do with lucite discs?"

* * * *

So now industry goes back to the laboratories to perfect compatible system for submission to FCC. The more cautious members still don't count CBS completely out of picture. They conjecture, for example, that CBS might get back in the running with a good tri-color tube. Others consider possibility far-fetched, believing incompatibility has long had the Goldmark system licked.

Attitude at FCC is one of bewilderment. According to New York Times, Commission officials "conceded the possibility that Mr. Wilson's action...might nullify the long, bitter controversy."

There's heightened FCC interest in compatible system, at any rate. People there are trying to learn more about it. They say no one points out that system RCA now uses is different from one it asked Commission to adopt last year. FCC folk say: "Notice how they don't call it 'dot-sequential' any more; it's 'color-subcarrier'."

RCA insists it's same system, with minor changes which have been described. Research v.p. Dr. Elmer Engstrom says it's still dot-sequential, still uses mixed-highs; he asserts first color sets demonstrated would operate on today's signals with slight circuit changes to "recognize" the oscillating color sequence.

Other NSTC members also say system is basically same. One estimates it's 85% RCA, 15% others -- principally Hazeltine. And reason for different terminology, they say, is better understanding of system.

Behind skepticism at the Commission is probably one or both of two reasons: (1) Attempt to show that RCA advocated adoption of a system which is already passe;

(2) Preparation to look at system with new eyes "because it's different". This could be with view to "face saving".

There'll be plenty of color activity in any event. Besides work on compatible system aimed at eventual request for adoption by FCC, there will be activity in industrial, theatre-TV, military color fields.

And competition in tri-color tubes will get fiercer. Even this week, RCA showed off 5 types while CBS and Paramount reported progress. And you can be sure that such companies as GE, Philco, DuMont, Sylvania and Rauland aren't asleep.

Look for the inevitable patent litigation, too. From appearance of monumental October issue of Proceedings of IRE, RCA claims patents on all sorts of tri-color tube approaches -- including what looks like Lawrence tube.

That issue of the Proceedings may prove landmark in color TV. It contains papers by best-informed color TV scientists in the country, prefaced by a truly distinguished piece of work by Electronics editor Donald Fink -- a crystal clear comparison of field-sequential and compatible systems in language laymen can understand.

THE COLOR DENOUEMENT—AN EDITORIAL: We've never made any bones, probably have been more outspoken than most, about our complete lack of faith -- economic and technical -- in the color TV system adopted by the FCC. We felt it was doomed from the start, if only because it was incompatible with millions of sets already in use. It carried within it the seeds of failure, regardless of Mr. Wilson's action.

We were willing to accept, moreover, the judgment -- now confirmed -- of the industry's top scientists and electronic industrialists whose knowledge, experience and vision told them that a superior system was being developed -- one that would get twice as much out of the limited radio spectrum, with none of the defects of the field-sequential system.

Our readers know we've depended not merely on our own predilections but on the best intelligence in the industry -- factory heads, engineers and laboratory scientists, distributors, retailers, telecasters -- for the facts and synthesis of opinions presented in these columns during the long years of the color imbroglio. Many of CBS's own affiliates were among our best sources of news and opinion.

Aside from a few (very few) CBS and FCC sources, our outspoken reports have met with singularly little adverse criticism. We have repeatedly offered our columns to CBS for statements, have bent over backwards to give its color publicity a fair break. And as for FCC, as our subscribers know, we have assiduously reported its proceedings, reasoning, etc., and of course issued any number of Special Reports & Supplements with full texts of orders, court judgments, speeches, etc.

* * * *

Now the denouement of a grand fiasco. The public's mind, and the trade's, may have been set at rest by Mr. Wilson's edict, so far as the confusion over color for the home is concerned. But stripped of all claims & counter-claims, the simple fact is that the public, like the industry, just wouldn't "buy" incompatible color merely because CBS had it "now" and FCC ordered it "in a hurry".

"Excessive conservatism" is the charitable expression editor Donald Fink uses to characterize FCC's action, in his paper in current Proceedings of the IRE. Whether FCC can live down its incredible decision, or becomes just another liability of the harrassed Truman Administration, time will tell. But it's a fact that, from the start, its majority fiat offended the scientific and common sense of the whole electronics fraternity; and the recriminations at both top and staff levels made clear that it evokes fear rather than admiration with its enormous powers.

If any proof were needed, the incredible and abortive "brackets standards" proposal is on the record -- the precious scheme, you'll remember, virtually giving manufacturers (whom it does not regulate) an ultimatum to "make one overcoat that could fit my little daughter as well as myself" in a matter of weeks, in words of Judge Rifkind's Court of Appeals argument. FCC demanded a physical impossibility -- or else; or else it would adopt the CBS system forthwith, which it did.

That was sheer ignorance of the scientific and industrial process. But beyond that, beyond even the compatibility issue, the decision came while Korea was

ablaze, and admittedly without any consultation with the defense authorities. It came in the face of much-publicized warnings from the military of just such demands on industry as Mr. Wilson finally pointed up.

* * * *

The hell-in-a-hack quest for color, in our opinion, was the gravest mistake in the history of the broadcasting business, of electronics and of Federal radio regulation. When color does come, which is inevitable, it must come scientifically, economically and gradually. As for the prospect, we think Mr. Fink's appraisal of the long-and-short of the CBS and the RCA-NTSC systems makes sense:

Mr. Fink sees CBS's principal advantage in its present simpler receivers. For the compatible system, he cites one principal technical question remaining to be answered by field tests, which happily will go on -- the effects of "severe conditions of multipath transmission." He concludes:

"Whatever the future trends in cost, at present the color-subcarrier system is demonstrably more complicated than the field-sequential system. In return for this additional complication, higher quality of transmission is achieved. To this long-term advantage must be added the overwhelming short-term advantage of compatibility. The eventual decision between the color systems, if made on rational grounds, will depend on the relative importance attached to the quality and cost factors. In a few months, sufficient data should be at hand to permit rational conclusions to be reached by engineers, by FCC, and by the master of both, the public."

PRESS PUZZLED over color ban, agreed at least on one fact: CBS color is down, if not out, and field is wide open for compatible system. Beyond that, speculation took all kinds of turns.

Most serious question was raised by *New York Times'* Jack Gould and *Wall Street Journal* editorial. Said Gould: "But where Mr. Wilson's 'request' to CBS transcends purely TV matters is in its apparent assumption that the Govt. shall determine the end product which private industry [can produce] for civilian use." Said *Wall Street Journal:* "To decree what a manufacturer may or may not make with the materials allocated to him seems to us to be carrying govt. control of business pretty far."

Gould saw action as "a decided break" for compatible system. "If the suspension of color TV lasts a year or two, common sense will require an examination of all the latest improvements." And he gives CBS this due: "Without their energy, color TV undoubtedly would have been delayed many more years. Whatever the final outcome . . . they have made a genuine contribution."

Seeking reason for action, *Wall Street Journal* reporter said some officials reasoned this way: Industry hasn't squawked much about cutbacks, because sales were slack. But they thought consumers might grab at color sets. "The manufacturers' business would perk up. The cutbacks would become more onerous." Other comments:

Time Magazine: "Since color sets use the same materials as black-&-white sets, which are not affected by the order, Washington observers found it hard to follow Mobilizer Wilson's reasoning. A later announcement seemed to make it clear that the order was aimed at men rather than metals . . . CBS President Frank Stanton, already plagued by costs, technical problems and the public's standoffish attitude toward color, seemed relieved to get off the hook."

Newsweek: "CBS was able to climb off the expensive limb it had been sitting on while transmitting colorcasts that few people could see and making sets that few people wanted."

Billboard: "Wilson's deep-freeze call for Columbia color sets production is figured to have shaken CBS's last chance to gain a foothold before RCA gets a chance to seek a favorable nod from the FCC . . . "

Variety: "CBS, whether intentionally or not, might have sounded the death knell for its own color TV system, via its decision last week to abandon all further color activity for the duration of the national emergency. That's the consensus of trade reaction . . . Industryites point out that [CBS] is also shelving the chief advantage it held [over RCA and others]—that of gaining a toehold on the public . . . before other systems are ready."

———■———

Color Miscellany: CBS's total investment in its color system said to run well over $5,000,000 . . . CBS may "convert" to black-&-white the major hour-long shows previously scheduled to start in color Nov. 11, 1:30-2:30. Top showmen on tap included Max Gordon, Leland Hayward, S. Hurok, Richard Kraukeur, Arthur Lesser, Herman Levin, Otto Preminger, John Shubert—even Metropolitan Opera presentations . . . FCC granted RCA-NBC authority this week to experiment with color over Brdigeport uhf station, extended Philco's authorization for colorcasts over WPTZ . . . "The Bright Side of Color's Ban" headlines *Billboard* story telling how Hollywood is relieved to know its vaults of black-&-white film won't deteriorate in value quickly . . . Paramount joins color theatre-TV act by announcing that its delayed system, employing either a special "lenticular" film or an old type of film employing subtractive dye process, will be demonstrated in a few months . . . Mexican broadcaster Guillermo Gonzales Camarena, ex-chief engineer for Emilio Azcarraga, last week demonstrated color at U of Mexico.

Attending color session Oct. 25 with defense mobilizer Charles E. Wilson and DPA-NPA administrator Manly Fleischmann were: Curtis B. Plummer & Edward Allen, FCC; Richard A. Graver, Admiral; Barney Balaban, Richard Hodgson, Louis A. Movins & Paul Porter, Paramount Pictures; Arthur Matthews & C. J. Burnside, Color Television Inc.; Frank Stanton, CBS; Louis Clement, Crosley; Dr. Allen B. DuMont & W. A. Roberts, DuMont; Benjamin Abrams, Emerson; Fred Gluck, Fada; Dr. W. R. G. Baker & Robert M. Estes, GE; W. A. MacDonald, Hazeltine; John A. Rankin, Magnavox; W. L. Viergever, John Meck Industries; Paul Galvin, Motorola; William Balderston, Philco; David Sarnoff & Frank M. Folsom, RCA; J. Friedman, Trav-Ler; H. A. Gumz, Webster-Chicago; Robert S. Alexander, Wells-Gardner; R. J. Sherwood & Ernest Kohler, Hallicrafters; F. M. Sloan, Westinghouse.

Telecasting Notes: Paramount Pictures, whose KTLA, Los Angeles, is leader in use of feature films on TV (but not Paramount's) expanding its subsidiary Paramount Television Productions' activities from merely syndicating kine-recordings to production, distribution & merchandising of films for TV; **Burt Balaban**, son of president Barney Balaban, named program-production mgr., **John Howell** sales mgr., under Paul Raibourn . . . **United World Films**, wholly owned subsidiary of Universal Pictures, also going into TV picture production, will use Universal lot, but not contract players, for low-cost films designed (a) to win its foothold in TV, (b) to help defray overhead, (c) to build new talent . . . **United Press-Movietone News** is name of new collaborative service started by those 2 organizations, providing TV stations daily news films along with news bulletins on events covered; UP managing editor Phil Newsom is in charge . . . **Milton Blink**, of United Television Programs Inc., formed last year to syndicate TV films, tells *Billboard* firm grossed $750,000 first 9 months, will do $1,000,000 this year, sees film rental prices coming down after freeze is lifted; firm was formed by Mr. Blink & Gerald King (Standard Radio), Edward Petry and Richard Dorso (see *TV Factbook No. 13)* . . . **Congress' own recording studio** (Robert Coar) gets $100,000 appropriation to buy cameras and equipment, so members can film strips to send to home stations just as they now make recordings . . . **Lutheran Church, Missouri Synod**, which sponsors *Lutheran Hour* on MBS, underwriting 26 film dramas being shot by **Family Films**, Hollywood, at reported $20,000 each, planning to place them on TV . . . **G. Ralph Branton**, who recently bought into Monogram Pictures, assumes charge of its TV film unit (Vol. 7:42) . . . **Reeves Soundcraft** reports quick, inexpensive method of putting magnetic sound tracks on 16mm or 35mm films; method also enables old sound tracks to be erased and new ones substituted . . . **NLRB** this week held against "arbitrary segment" of production employes of Baltimore's WBAL-TV seeking to organize as IBEW-AFL union, calling unit "inappropriate" . . . **Iowa dairy industry** reported up in arms over 20-second spots for Jelke's Good Luck Margarine carried on Iowa State College's WOI-TV . . . **Toscanini** and *NBC Symphony Orchestra* will be simulcast, first concert of season, on NBC-TV, Sat., Nov. 3, 6:30 . . . **WOI-TV**, Ames (Des Moines), raised base hour rate Oct. 1 from $300 to $400, one-min. from $50 to $80 . . . **Milwaukee Journal** (WTMJ & WTMJ-TV) has sold its AM local WSAU, Wausau, Wis., for $160,000 to John R. Tomak & Charles Lemke, of Wausau.

Personal Notes: S. Whitney Landon, since 1937 gen. atty., AT&T Long Lines Dept., promoted to asst. v.p. & asst. secy., AT&T, succeeded by **Ernest D. North** . . . **Frank Stanton**, CBS president, to be guest of honor Nov. 1, along with Sen. Ives (R-N. Y.), at dinner by joint defense appeal of American Jewish Committee and B'nai B'rith Anti-Defamation League for CBS's "distinguished public service effort" . . . **Wm. McCluskey**, sales mgr. of WLWT, Cincinnati, promoted to administrative asst. to **John T. Murphy**, v.p. in charge of Crosley TV operations; **George P. Moore Jr.**, ex-Ziv, succeeds him . . . **Joe Herold**, ex-chief engineer, WOW & WOW-TV, Omaha, who installed Union Radio's TV station in Havana, now installing station for Televisao Paulista, Sao Paulo, Brazil . . . **Kevin B. Sweeney**, ex-Don Lee sales mgr., joins BAB as national promotion director . . . **George T. Laboda**, adv. research chief, promoted to asst. to **Leslie Harris**, recently named TV-radio director, Colgate-Palmolive-Peet . . . **Ted Weber** named sales mgr., WGN-TV, Chicago, succeeding **George Harvey**, resigned to become mgr. of WFLA, Tampa . . . **Robert Simpson**, ex-Geyer, Newell & Ganger, joins Erwin, Wasey & Co. as director of TV production . . . **Tom Maguire**, ex-CBS, joins Maxon Inc. Nov. 15 as business mgr., TV-radio dept. . . . **Gerald W. Tasker**, handling Cunningham & Walsh's *Videotown* studies (Vol. 7:35), named v.p. of that agency . . . **Joe Donohue** new head of Famous Artists, TV-radio packaging firm, succeeding **Tom Greenhow**, now with Ziv . . . **Bob Evans** promoted from sports editor and production mgr. to program director of WSPD & WSPD-TV, Toledo, under new mgr. **Allen Haid** . . . **Don Buck** named mgr. of ABC-TV station clearance, **Stewart Barthelmess** named for radio, in separation of TV-radio depts. under **Alfred R. Beckman**, sales-traffic operations director . . . **Robert M. Purcell**, program director, promoted to operations director, KTTV, Los Angeles, with **Dude Martin** heading program dept., **Robert W. Breckner** asst., **Alberta Hackett** mgr. of program operations . . . **Robert S. Salk**, ex-CBS, and **Bernard H. Pelzer Jr.**, ex-NBC, join Katz Agency, station reps. . . . **Fred M. Thrower**, ABC-TV sales v.p., resigned Oct. 26.

Station Accounts: Real estate sponsors are "naturals" for TV—evidenced by growing use. New York agencies named this week for such TV campaigns: C. J. Herrick Co., for **Wave Crest Gardens**, apartment development in Far Rockaway; Marfree Adv. Corp., for **Plantation Estates**, Florida development . . . **Hutzler Brothers**, big Baltimore dept. store, limits itself to sponsor identification only in buying *Paul's Puppets*, Tue. & Thu. 6-6:15 p.m., now in third year on WBAL-TV . . . **Montgomery Coffee Co.** (Montco Coffee) sponsoring news strip 7:30-7:35 a.m. each weekday on WPTZ, Philadelphia, thru Aitkin-Kynett Co., Philadelphia; it's second such early-morning sponsorship, **Tom Thumb Donut Co.** buying 8-8:05 a.m. news (Vol. 7:41) . . . "Do you remember" motif runs through *Live It Again*, including film clips of bygone days, sponsored by **Red Top Brewing Co.** for half hour weekly on hookup of Crosley's WLWT, WLWD, WLWC, thru Cecil & Presbrey . . . **Best Foods** (H.O. Quick Oats & Farina, Presto self-rising cake flour) sponsoring Sun. 4-6 p.m. feature films on WABD, New York, thru Benton & Bowles . . . **DuPont** using 624 TV spots on 35 stations in big drive behind Zerone & Zerex anti-freezes, thru BBDO . . . **Zippo Mfg. Co.** (lighters) includes TV in new pre-Xmas campaign, thru Geyer, Newell & Ganger, N. Y. . . . Among other advertisers reported using or preparing to use TV: **Narragansett Brewing Co.**, thru Cunningham & Walsh, N. Y. (formerly handled by Standish Inc.); **Remington Rand** ("60" electric shaver), thru Leeford Agency, N. Y. (WOR-TV); **Coro Inc.** (costume jewelry), thru Charles Jay & Co., N. Y. (WABD); **Consolidated Cosmetics Inc.** (Lanolin Plus cleansing lotion), thru Van Hecker, Chicago (WTMJ-TV); **Viz-Zan-De Cosmetics** (lipstick), thru Mervin & Jesse Levine, N. Y. (WOR-TV).

Network Accounts: Pearson Chemical Co.'s purchase of 204-station CBS radio network for *My Friend Irma* to advertise Ennds tablets means that firm's $2,000,000 for TV-radio is heaviest of all drug budgets, says *Sponsor;* Ennds has dropped all other media, sponsors *Hollywood Opening Night* on CBS-TV, Gabriel Heatter on 321 MBS stations, plus TV-radio spots, thru Harry B. Cohen Adv. . . . **RCA Victor** (TV, radio, records) has bought Fri. 8-8:30 p.m. on NBC-TV for unannounced show to begin next month, temporarily is filling in with public service features, first having been *Lifeline*, documentary film on need for blood donors . . . **Johns-Manville Corp.** (building materials) starts sponsorship Nov. 4 of *Fair Meadows, U.S.A.*, family drama serial, on NBC-TV, Sun. 3-3:30, thru J. Walter Thompson . . . **Aluminum Co. of America** (Alcoa products) sponsorship of *See It Now* (Vol. 7:38) starts Nov. 18 on CBS-TV, Sun. 5:30-6 . . . **Procter & Gamble** (Tide, Camay, Drene) starting Nov. 26 will sponsor *Those Two* on NBC-TV, Mon.-Wed.-Fri. 7:30-7:45.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
October 27, 1951

MILLION TVs IN FIRST-QUARTER 1952? Production of TV receivers in first-quarter 1952 will depend on these 4 basic factors:

(1) Allocations of controlled materials to TV-radio manufacturers.

(2) Conservation.

(3) Manufacturers' "mix" of TV, radio and combinations.

(4) Availability of tubes and other components.

On basis of material allocation plans for first quarter -- and given optimum conditions with respect to other 3 factors -- production experts see a strong possibility industry can turn out 1,000,000 TVs in first 3 months of 1952, or just about what many hope they'll make during current quarter.

There's confidence in industry and govt. production agencies that if demand continues brisk, nation's TV manufacturers may actually be able to produce more sets next quarter than this -- with considerably less materials.

TV-radio-appliance producers will have to work with about half the steel they chewed up during average quarter of first-half 1950 base period -- and somewhat more than one-third the aluminum and copper. TV-radio's base period for metal allocations saw production at quarterly rate of 1,560,000 TVs, 2,120,000 radios.

If manufacturers maintained same mix as during base period, and continued to turn out "1950 model" TV-radios -- without material conservation -- they'd get about enough steel during first-quarter 1952 to put into 780,000 TVs, 1,000,000 radios, enough copper and aluminum for 545,000 TVs, 740,000 radios.

* * * *

Conservation will be No. 1 production-booster in first quarter. Materials-saving measures, developed and engineered by industry over past year, are now beginning to find their way into production runs. Conservation is still a luxury, but by January it will be a necessity -- when all-out incorporation of new methods and substitutes becomes matter of industrial life or death.

Million-set production depends on another factor -- consumer demand and its implications in manufacturers' assortment of sets and models. If TV market is good, it's likely radio production will dip and TV will be emphasized. There may also be continuance of present lower output of TV combinations in favor of TV-only models -- which sell faster and use less critical materials.

Tubes and other components, such as transformers and coils, may be bottleneck in first quarter -- but there's no sure way of telling now. Tube makers say output of civilian tubes is still high, but lower than last summer. And there's some evidence of more demand now than plants can supply -- but much of this may be due to scare buying by set manufacturers.

Tube manufacturers still face an uncertain future. They say there's enough nickel in pipelines to last 6 weeks to 3-4 months. What happens after that depends on Govt. At govt. levels we learn nickel situation is just as scary as it ever was.

TRADE GOING GOOD, HAPPY ABOUT COLOR: Any retailer will tell you he's as delighted as the manufacturers and distributors that the "color chimera" no longer hovers over his business -- and at the instance of the defense authorities, at that.

Comeback market of recent weeks hasn't been disturbed much by color, for public seems to have wised up to basic factor of compatibility. Moreover, customers weren't beating down doors to buy $700 installations of 10-in. magnified receivers incapable of getting black-&-white and capable of picking up only occasional color shows from the handful of stations carrying them (Vol. 7:41).

Fact is, the few dealers carrying "traffic-builder" models are now shipping them back -- assured by CBS-Columbia Inc., anxious to maintain retail outlets for

its black-&-white receivers, that they will be rebated. CBS-Columbia says it made only 500 color sts.

Dealers-distributors feel that out of Washington this week came good, in that they now have clear-cut story to tell their customers: That mass production of color apparatus for public is out for duration, that experiments can go on, that compatible color is well on way out of laboratory but several years away from home -- so look what you're missing meanwhile if you don't buy black-&-white now. Even CBS is now expected to join that refrain.

That color some day will offer great new merchandising appeal, goes without saying. But with audience now of 14,000,000 sets (see p. 13), with market still far from saturation, it's also manifest ultimate color will have to be compatible.

* * * *

Another "nice" output week was reported by RTMA for 5 days ending Oct. 19. TVs totaled 98,620 (2426 private brand), little change from preceding week's 99,877 (Vol. 7:42). Factory inventory went down some 26,000 to 363,551, continuing steady reduction of last 12 weeks.

Week's radios totaled 228,160 (99,908 private), up from 205,014 week before and inventory was 366,866. Radios were 124,972 home, 28,097 portable, 75,091 auto.

RTMA's revised figures for first 9 months are 3,970,857 TVs and 10,077,478 radios. Three weeks thus far reported this first month of new quarter show 87,919 TVs first week, 99,877 second, 98,620 third -- but tightening materials still cast doubt whether final 10 weeks can bring total for year to predicted 5,000,000.

Topics & Trends of TV Trade: Tailored ceiling price regulation for TV-radio industry—setting ceilings for manufacturers, wholesalers and retailers in one package—appeared virtually certain this week as 6-man industry subcommittee (Vol. 7:42) met with OPS officials. Probability is that new order—not expected before January—will fix ceilings at highest prices at which each manufacturer's sets were sold during a "recent base period," with "automatic adjustment factor" to remedy inequities in hardship cases.

Industry group members generally approved this proposal, but some felt dollars-&-cents ceilings wouldn't fit TV-radio industry, and suggested formula method be used by wholesalers and retailers to compute ceilings. OPS officials made it clear they feel TV warranties should be included in regulation, but assured industry they don't want to impose uniform warranty policies. OPS position is that wherever warranty is sold separately—not included in price of set—it must be treated as separate commodity with its own price ceiling.

Meeting was conducted by Lee McCanne, chief of OPS home furnishings branch, and Earl R. Smith, chief of electronics & musical instruments section of that branch. Subcommittee members: Arnold Nelson, Admiral; A. Vogel, Emerson; John R. Grayson, Magnavox; Ernst E. Bareuther, Philco; George Bryant, RCA; Arthur L. Chapman, Sylvania.

* * * *

Price increases may not be very far off, judging from action of Sylvania this week in raising prices $10 to $20 on recently announced new line (Vol. 7:29)—only few months after it had cut prices on same sets (Vol. 7:35). Rising costs of labor and materials were given as reason.

Straws in wind also are zeal with which everybody's showing off uhf tuners, some anticipating FCC will "unfreeze" these channels ahead of others, opening brand new territory. Motorola uhf converter was shown to eastern distributors at New Haven's Taft Hotel Oct. 20-21, with Hartford distributor Post & Lester acting as host. Bridgeport uhf signals were compared, quite favorably, with vhf from New Haven and New York.

Trade Miscellany: RTMA hiring Wm. F. E. Long, ex-director of statistics, National Paint, Varnish & Lacquer Assn., to be new director of statistics with offices at Washington headquarters starting Nov. 5—taking over all statistical work now handled by Haskins & Sells, Philadelphia, as of next Jan. 1 . . . No summer slump in exports of radio apparatus: August shipments were valued at $22,036,653 as against $8,113,015 in August 1950; practically all categories were up, notably condensers, resistors, receiving tubes . . . Crosley Radio & Television Ltd. formed in Canada for TV-radio manufacture, with Avco's acquisition this week of Brand & Millen Ltd., including plant and personnel at Long Beach, Ont. . . . Tele-tone's new contract with UEW calls for 10¢ general wage increase for about 500 workers, plus other benefits.

* * * *

All sorts of rumor and conjecture grew out of sudden shelving of CBS color, not least interesting of which resulted from apparently well-grounded reports CBS was casting about to buy additional plant to get more materials quotas for its CBS-Columbia Inc. Story was that CBS was contemplating sale of its profitable subsidiary Columbia Records to finance purchase of Hazeltine. CBS president Frank Stanton and Hazeltine president Jack Binns promptly denied report, latter stating only way CBS could get control would be to buy up company's widely held stock. Latest Hazeltine report shows only one class of stock, of which 600,000 shares are authorized, 350,000 issued and outstanding, all directors owning total of about 15,000. Stock is traded on N. Y. Curb Exchange, has enjoyed exceptional rises during last year.

Capehart's new line, featuring unique 20-in. corner cabinet called Cortland, at $650, includes 7 new, 19 holdovers. Other new sets: Clermont, 17-in. table, $250; Jamestown, 17-in. mahogany console, $280; Amherst, 20-in. table, $300; Shenandoah, 20-in. console, $390; Cordovan, 20-in. fruitwood console, doors, $470; Bennington, same in maple, $470. Most of holdovers are 17-in. ranging from mahogany table at $300 to AM-FM-3-speed combination at $750; also included in holdovers are 16-in. blonde table at $320, 20-in. mahogany table at $360, 19-in. combination console at $1000.

Merchandising Notes: Stromberg-Carlson out with 3 new 20-in. consoles: Cavalier, open face, mahogany, $420; Futura, with doors, mahogany $460, oak $480; French Provincial, with doors, cherry wood, $495 . . . **Big Philco promotion** for TV-radio during "Philco TV Week" starting Nov. 4 will include mailing of 8,000,000 circulars by Reuben H. Donnelly Corp., backed by newspaper and network TV advertising . . . **Philco** also pushing "check-up" promotion campaign for servicemen, offering cards, letters, mailing pieces, ad mats; plan follows pattern of "motor tune up" idea offered by gas stations—like checking, adjusting and lubricating jobs at single price . . . **DuMont** offers trade-in allowance on old TV tuner, towards new Inputuner, promoting addition of FM to TV sets. "Several thousand" are being offered for "limited period only" . . . **Brightman Distributing Co.** (Harry P. Brightman, ex-Mid-Atlantic, Washington, D. C., pres.) replaces Stanley Distributing Co. as Admiral distributors in St. Louis area.

National Electronics Mfg. Co., 314 W. 58th St., Los Angeles, established about 3 months ago to take over plant and assets of firm formerly making Natalie Kalmus TV receivers, is now offering 2 lines of TVs—one under "Natalie Kalmus" brand name with modern designing for sale in higher price brackets, other under "Cinema" brand being table models and open consoles at $200 to $300. Firm is headed by Herman Krissman, with Myron Blackman as sales mgr.

More than 30 research reports presenting possibilities for new products, processes and manufacturing techniques for electronic and electrical industries are listed in October *Bibliography of Technical Reports*, available for 50¢ from Office of Technical Services, Commerce Dept., Washington. Included are reports on characteristics of cesium electron tubes, electrical breakdown in a slot antenna, pulse-length discriminator, magnetized ferrites, metallized paper capacitors, synthetic mica, printed circuits.

Trade Personals: Reginald H. Brophy, president of Rogers Majestic Electronics Ltd., onetime executive of NBC, named coordinator of production branch, Canadian Dept. of Defense Production, Canadian counterpart of DPA . . . **Frederic J. Robinson**, sales mgr. for Latin America, named director, Sylvania international sales div. . . . **Tom R. Talmadge** promoted to asst. sales mgr., Packard-Bell, under gen. sales mgr. **Kenneth R. Johnson** . . . **Joel Axe**, ex-Hoffman Radio, appointed engineer in charge of govt. contracts, Pacific Mercury Television Corp. . . . **Herman N. Lubet**, ex-Fada, named adv. & export mgr., Jewel Radio . . . **Lawrence O. Paul**, ex-Armour Research Foundation, appointed operating mgr., engineering dept., Oak Mfg. Co.

New officers and board members of Society of Motion Picture & TV Engineers named at convention Oct. 18 for 2-year terms starting Jan. 1: Frank E. Cahill Jr., Warner Bros. Theatres, financial v.p.; Barton Kreuzer, RCA, treas.; Fred T. Bowditch, National Carbon, engineering v.p. New board members: Axel G. Jensen, Bell Labs; Joseph E. Aiken, Naval Photographic Center; George W. Colburn, G. W. Colburn Laboratories, Chicago; Ellis W. D'Arcy, DeVry Corp.; John K. Hilliard, Altec-Lansing; Fred G. Albin, ABC, Hollywood. Peter Mole continues as president.

Franklin Lamb, vice chairman of Tele King, onetime president of Reynolds Pen Co., resigns from ODM chief Charles E. Wilson's office as of Nov. 1 after 2 months duty on special liaison with small business.

Allen D. Cardwell, 63, retired electronics inventor and former head of manufacturing company bearing his name, died Oct. 21.

HERE'S HOW ONE newspaper polices its TV-radio-appliance advertising: The *Milwaukee Journal*, which own WTMJ & WTMJ-TV, is censoring ads which it believes don't "conform to a single code—clear truth." The *Journal* Sept. 5 announced new ad policy rejecting "copy which in any way stretches the truth and goes beyond the bounds of reasonableness and fair play, or which may mislead or confuse the reader." It says these factors are "carefully considered" in judging advertising:

(1) "Broad statement headlines, qualified by semi-hidden small-type phrases." (2) Misleading or false illustrations of sale items. (3) Unwarranted promotion of lightly-stocked merchandise. (4) "Sales terms and prices neither clear nor complete." (5) "Failure to identify obsolete, discontinued or used models." (6) Questionable "contests." (7) "Unwarranted display of 'free' or combination offers of only minor importance." (8) "General 'borax' appeal of heavy type and reverse plates." (9) All reference to color facilities in present TV sets must be accompanied by this standard statement: "Note to readers—no set referred to in this advertisement will receive TV programs in color without the addition of special equipment at extra cost." (10) "No down payment" and similar phrases are banned, as are flat trade-in offers. (11) "At least temporarily, advertised prices . . . must express in dollars the amount of warranty, service or tax charges to be required."

Milwaukee Better Business Bureau is cooperating by shopping all TV-radio-appliance advertisers and reporting to censor on truth of advertising claims. Advertisers' reaction is reported generally favorable. While code was aimed primarily at local retailers and distributors, some ads reportedly were held up because national advertisers' policy didn't conform with code.

TV commercials are more effective than radio's, according to survey by *Good Housekeeping Magazine* of 1403 subscribers in 22 TV cities. Replies showed 64% of TV viewers pay more attention to commercials on TV than on radio, 28% said there's no difference, 5% pay less attention to TV plugs. Survey also showed 70% of set owners have cut down on moviegoing, 82% on radio listening, 47% "going out", 47% reading books, 35% reading newspapers, 35% reading magazines, 9% home entertaining. Of TV owners who have had sets 1-2 years, 20% now do more entertaining and 65% do the same amount, 75% go to fewer movies, 38% read less magazine fiction, 20% read less magazine advertising than before they had TV.

Biggest get-together of educational TV aspirants to date is due Nov. 2-5 at annual meeting of National Assn. of Educational Broadcasters in Hotel Buena Vista, Biloxi, Miss. Group hopes to have FCC chairman Wayne Coy as speaker, along with Sen. Sparkman (D-Ala.), NYU's Prof. Charles Siepmann, Brig. Gen. Telford Taylor (former JCET counsel). Among participants in TV seminar will be WOI-TV's Richard Hull, Syracuse's Kenneth Bartlett.

"The TV Revolution" is title of September issue of *Platform*, published by *Newsweek Magazine* for club leaders, educators, etc., which neatly sums up principal viewpoints on TV's impact. Included in volume are sections on TV's impact on movies, radio, books and magazines; pro & con discussions of programming; TV's effect on children, politics, educational potential, etc. Sample copies are available from Newsweek Club Bureau, 152 W. 42nd St., N. Y.

Klystron tube, one of uhf's most important developments to date, is described in October *Electronics* by Varian Associates, San Carlos, Cal. Tube has done much to enhance attractiveness of uhf, since it permits station powers high enough (200 kw) to give satisfactory coverage in many areas (Vol. 7:9, 12, 15, 16, 18, 23).

Mobilization Notes: To guarantee TV-radio replacement parts, NPA this week told electronic parts & components distributors (for advisory committee membership, see Vol. 7:10) it's considering an order which would require manufacturers to set aside a portion of their output to make replacement parts. These parts, said NPA, would be placed on "direct allocation based on historical use and geographic situation." Under proposal, parts distributors and retailers would be permitted to assign themselves priorities (by "self-certification") to purchase these parts for inventory—the amount to be "based on either the dollar value of such material or a percentage of materials used by the retailer in 1950," said NPA.

Distributors asked for time to think over the proposed new regulation. One aspect of the plan they don't like is proposal for limitation of their inventories "based on the historical sales pattern during a basing period." In discussion on parts availability, distributors said their survey showed TV antennas, wire & cable, solder fuses, hand tools and soldering irons in shortest supply. NPA representatives said TV antennas will become more scarce because of tight aluminum supplies, and test equipment will be very short because military and defense-supporting industries will require up to 90% of all produced in 1952. Nearly all types of tubes are available, they said, and tube industry is in "good condition."

* * * *

Electronics must not become roadblock to successful mobilization in fields of military production, training and servicing. GE electronics v.p. Dr. W. R. G. Baker so warned National Electronics Conference in Chicago this week, saying:

"When electronic equipment becomes so complex that we must use trained engineers to do the manufacturing job, highly trained specialists to operate the equipment, and more engineers to service it, we have, to some extent, defeated our original purpose." Manufacturers must increase reliability of electronic equipment, he added, and still satisfy military demands for "miniaturization, ruggedization, standardization and unitization."

Dr. Baker said that of the top 50 companies in electronics contracts "only about half normally are considered electronic manufacturing concerns." Quoting a warning from the military, he said "every electronic company must plan for a certain percentage of military business, if it hopes to survive." Pointing to the $7 billion backlog of military electronics contracts, and an expected $4 billion annual military electronic production rate (Vol. 7:34), Dr. Baker said military men feel "electronics is so important to the national defense effort [that] nothing must be allowed to interfere with development and production of electronic military equipment [so that] consumer radio and TV production probably [will] be hard hit."

He called on Govt. to tell "the truth about our weapons, whether atomic or electronic [to the extent] consistent with national security," to prevent giving the public "a false concept of invincibility" through reference to "fantastic new weapons" and predictions of future developments.

* * * *

Obligations of defense manufacturers under Walsh-Healey labor standards act are outlined in new NPA Office of Small Business pamphlet, *How the Walsh-Healey Public Contracts Act Affects Govt. Supply Contractors*, available from Commerce Dept. and field offices.

Orders for steel, copper and aluminum must be adjusted or cancelled by Oct. 31 where they exceed authorized fourth-quarter CMP allotments, according to this week's NPA amendments to Dir. 7 to CMP Reg. 1 and Dir. 3 to CMP Reg. 6.

Years of materials shortages and high prices were predicted this week by govt.'s top purchaser of raw materials. Jess Larson, head of new Defense Minerals Procurement Agency, told American Mining Congress in Los Angeles that some shortages may never be licked and "inordinately high prices are going to be with us as long as shortages exist." He said DPMA has found in study of 90 metals and minerals that "well over one-half of these may be in short supply, in the near future at least, if current military and civilian requirements are a gauge." He warned of prolonged shortages of such materials as copper, tungsten, lead, columbite and manganese—shortages which will be critical "even after 3 years of development on the basis of all assistance programs now approved."

New inventory limitations on many metals and chemicals used in TV-radio manufacture have been added to NPA Reg. 1. Included is 60-day limitation on components and parts for electronic tubes and limit of "practicable minimum working inventory" on such materials as converted aluminum foil, selenium, mica, molybdenum, lead, plywood, polyethylene, phenol. Materials such as cobalt, copper, tungsten, steel, aluminum, have been under inventory limitation since September 1950.

List of scarce and plentiful materials has been revised second time by NPA. Issue No. 3 of *List of Basic Materials & Alternates*, which also contains bibliography of up-to-date articles on conservation of metals, is available at Commerce Dept. and field offices.

———■———

TV-radio rights comprise more than 10% of the revenue of major league baseball clubs. This was indicated in figures compiled by staff of N.Y. Rep. Celler's special House subcommittee investigating charges of monopoly in baseball. Statistics showed major leagues took in $4,462,000 from sale of games to TV-radio in 1951. The 8 National League teams got $1,598,900 from TV-radio, American League $1,778,412. In addition, rights to World Series brought in $1,075,000, All-Star game $10,000. Total grosses of leagues and clubs for 1951 aren't available yet, but in 1950 American League teams grossed $16,338,919, of which $1,656,989 was from sale of TV-radio rights.

Cure for one type of microwave interference—ground reflections—has been developed by H. E. Bussey, Bureau of Standards. He reports that a rectangular structure of hardware cloth on poles 40 ft. high can eliminate most such interference when placed about midway in a 4000-mc path 20-30 mi. long.

Improved Vidicon industrial TV camera tube, as described by RCA's Dr. B. H. Vine at this week's National Electronics Conference in Chicago, has greater life and wider operating-temperature range than earlier model, is more faithful in reproducing tonal values of colored objects.

New uhf receiver test equipment—a "sweep-marker generator"—was described at this week's National Electronics Conference in Chicago's Edgewater Beach Hotel by RCA engineer J. F. Sterner. Gear was designed as factory production instrument.

International GE contract with Emissorias Unidas, Brazil (Jao Baptista do Armaral, president), calls for $1,800,000 expenditure for 3 TV transmitters in Rio de Janiero and Sao Paulo.

Dominican Republic's first TV station will be 5-kw RCA unit in Ciudad Trujillo, ordered with associated studio and mobile equipment by Col. J. Arismendi Trujillo Molina, operator of La Voz Dominicana.

Television Authority, big performer union, holds convention in New York Dec. 7-9.

Financial & Trade Notes: Admiral's third quarter report reflects the sharp summer drop that prevailed throughout entire TV business, though it states sales and profits for September were up sharply from combined July-August. For quarter ended Sept. 30, net profit was $1,306,735, or 68¢ a share, on sales of $31,331,832, compared with profit of $5,253,685 ($2.63) on sales of $63,629,-146 for same 3 months of 1950. In 9 months ended Sept. 30, net profit was $5,400,156 ($2.80) on sales of $134,919,-187 vs. $13,176,417 ($6.83) on $166,924,994 in same period 1950. Report calls 1950 "an abnormal year," compares 1951 results with "normal" 1949 to show that sales were up 75%, profit 17% for the 3 quarters.

Merger of John Meck Industries Inc., Plymouth, Ind., with Scott Radio Laboratories Inc., Chicago, into one corporation bearing latter name (Vol. 7:40) has been approved by both Meck and Scott stockholders. Merger agreement contemplates increase of Scott shares from 500,000 to 1,500,000 shares of which 1,006,185 will be outstanding, as against 419,080 now outstanding. Plan calls for exchange of 1.3 shares of Scott for each of the 552,580 shares of Meck currently outstanding, or for surrender of 131,000 shares of Scott held by Meck Industries.

Packard-Bell sales hit new high of more than $18,000,-000 in year ended Sept. 30, 1951 (vs. $13,894,000 preceding year), executive v.p. Robert S. Bell reported Oct. 15. He estimated profits for fiscal 1951 at more than $2,800,000 before taxes of about $1,800,000, leaving more than $1,-000,000, or $1.70 per share, profit after taxes (vs. $1,308,-510, or $2.61 per share, after $860,000 in taxes last year). Mr. Bell said Packard-Bell will produce $9,000,000 worth of defense orders in fiscal 1952, already has backlog totaling more than $12,000,000.

Stewart-Warner reports net earnings of $3,056,754, or $2.37 a share, on sales of $63,781,084 for first 9 months of 1951, after provision of $5,879,859 for taxes. This compares with net profit of $3,030,694 ($2.35) on sales of $53,739,447 same period last year, after $2,633,459 taxes. Third quarter profit was $847,501 (66¢) on sales of $22,-370,928, vs. $1,279,715 (99¢) on $21,090,408 third quarter 1950. TV-radio is small part of Stewart-Warner's business, and isn't itemized separately in statement.

Muter Co. reports sales of $9,810,441, net profit of $523,632 (80¢ a share) after $613,260 in Federal income taxes, for 9 months ended Sept. 30. This compares with $9,899,891 sales, $546,737 taxes, $774,480 ($1.19) profit for same 1950 period. Earnings figure is based on 651,200 shares of capital stock outstanding after 100% stock split in May 1950 and 10% stock dividend in December 1950.

IT&T has been authorized by N. Y. Stock Exchange to list an additional 82,645 shares of capital stock, to be issued to Gibson Refrigerator Co., from which IT&T (which also owns Capehart-Farnsworth) purchased all preferred and common stock of Coolerator Co. last July (Vol. 7:29-30). Purchase involved payment of $2,000,000 in cash and 82,645 shares of stock.

Fedders-Quiggan Corp., which recently made deal to supply RCA Victor brand home air conditioning units (Vol. 7:39), has registered 62,041 shares of $50 par preferred stock with SEC, offering it to Nov. 8 stockholders in ratio of one for each 20 common held. Allen & Co., underwriter, will buy any unsubscribed shares.

Collins Radio net profit for year to July 31 was $737,-682, equal to $2.23 a common share, compared to $553,964 ($1.63) for preceding fiscal year.

American Phenolic Corp. reports net of $742,165 ($1.85 a share) on sales of $18,045,760 for 9 months to Sept. 30 vs. $722,710 ($1.80) on $8,857,700 same 1950 period.

Count of TV Sets-in-Use by Cities

As of October 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

THAT "109th station" in Matamoros, Mexico, just across the Rio Grande from Brownsville, Tex. (Vol. 7:31 et seq) was accredited 9500 TV receivers on U. S. side of border alone—with result NBC Research's monthly "census" of TV sets-in-use went just over the 14,000,000 mark as of Oct. 1. Reflecting September's heavy unloading of inventory in improved market, 447,500 sets were added to nation's audience during month, as against 284,300 in August (Vol. 7:35), 183,100 in July (Vol. 7:29).

Major market areas showed considerable gains—New York given 60,000 more, Chicago 35,000, Boston 21,000, Philadelphia 20,000, San Francisco 17,000, Los Angeles 13,000, Baltimore 11,000, Kansas City 10,000. Following are the Oct. 1 figures by areas (consult individual stations for their estimates of number of families within respective service ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	64,000
Atlanta	3	130,000
Baltimore	3	325,000
Binghamton	1	43,100
Birmingham	2	69,700
Bloomington, Ind.	1	17,500
Boston	2	787,000
Buffalo	1	222,000
Charlotte	1	89,100
Chicago	4	995,000
Cincinnati	3	278,000
Cleveland	3	511,000
Columbus	3	164,000
Davenport-Rock Island	2	67,800
Dayton	2	142,000
Detroit	3	542,000
Erie	1	53,100
Grand Rapids	1	79,700
Greensboro	1	74,500
Huntington	1	55,400
Indianapolis	1	158,000
Jacksonville	1	40,000
Johnstown	1	112,000
Kalamazoo	1	49,500
Kansas City	1	144,000
Lancaster	1	113,000
Lansing	1	65,000
Los Angeles	7	1,025,000
Louisville	2	104,000
Memphis	1	98,800
Milwaukee	1	267,000
Minneapolis-St. Paul	2	276,000
Nashville	1	40,100
New Haven	1	188,000
New York	7	2,550,000
Norfolk	1	81,600
Omaha	2	88,000
Philadelphia	3	903,000
Pittsburgh	1	320,000
Providence	1	165,000
Richmond	1	89,300
Rochester	1	91,000
Salt Lake City	2	55,300
San Diego	1	106,000
San Francisco	3	250,000
Schenectady	1	173,000
St. Louis	1	317,000
Syracuse	2	136,000
Toledo	1	116,000
Utica	1	53,000
Washington	4	289,000
Wilmington	1	80,900
Total Interconnected	95	13,254,400
Non-Interconnected Cities		
Albuquerque	1	10,400
Brownsville (Matamoros, Mexico)	1*	9,500
Dallas	2	136,000
Fort Worth	1	
Houston	1	92,900
Miami	1	77,000
New Orleans	1	63,500
Oklahoma City	1	92,300
Phoenix	1	38,700
San Antonio	2	52,300
Seattle	1	99,000
Tulsa	1	77,500
Total Non-Interconnected	14	749,100
Total Interconnected and Non-Interconnected	109	14,003,500

* Preliminary estimate, U. S. sets only.

Note: TV sets sold in Canada totaled 59,180 up to Aug. 31, 1951, according to Canadian RTMA (Vol. 7:41). Since Canada has no stations of its own and nearly all of these sets are in border areas, they add appreciably to audiences of stations in nearby U.S. cities. The CRTMA area count as of last Aug. 31: Windsor 24,883, Toronto-Hamilton 21,292, Niagara Peninsula 9835, other areas 3170.

The Outlet Co., Providence dept. store which owns and operates WJAR & WJAR-TV, reports net profit of $248,735 ($2.50 a share) for 6 months ended July 31, $727,548 ($7.32) for 12 months ended July 31. Latter figure compares with $606,310 ($6.10) preceding year, $510,798 ($5.13) in 1949. Contribution of TV-radio income to balance sheet isn't disclosed, but is believed to be very substantial.

Dividends: Olympic Radio, 3% stock dividend payable Oct. 31 to holders of record Oct. 26; Stewart-Warner, 35¢ payable Dec. 8 to holders Nov. 16; Remington Rand, 5% stock dividend Jan. 29 to holders Dec. 12 and 25¢ payable Dec. 27 to holders Nov. 7; Howard W. Sams Co., special 10¢ payable Oct. 26 to holders Oct. 20; Avco, 15¢ payable Dec. 20 to holders Nov. 28.

Network TV-Radio Billings

September 1951 and January-September 1951
(For August report, see *Television Digest*, Vol. 7:39)

NETWORK TELEVISION

	September 1951	September 1950	Jan.-Sept. 1951	Jan.-Sept. 1950

Note: These figures do not represent actual revenues to the networks, which do not supply them. They're compiled by PIB on basis of one-time network rates, or before frequency or cash discounts. Therefore, in terms of dollars actually paid to networks they may be inflated by as much as 40%. Figures are accepted by networks themselves, however, and by the industry generally, as a satisfactory index of comparisons and trends.

■

FCC Chairman Coy is making point of his interest in station programming and FCC's authority by releasing letters to the press. Last week, he told Knights of Columbus that FCC can't censor, that complaints should be taken to station operators (Vol. 7:42). This week, he released copy of letter he wrote to Rep. Morano (R-Conn.), accompanied by copy of complaint latter had received from Bernard Yudain, managing editor of *Greenwich Time*, and Rep. Morano's forwarding letter. Yudain said that WMCA disc jockey Barry Gray had delivered "vicious attack on me personally," that he had been unable to get from station a recording to find out exactly what was said. Coy reiterated that FCC can't censor, but said that responsibility of the station licensee was involved, that "we will take up further with [WMCA] the subject matter of your complaint."

Add "industrial" uses of TV: Houston police testing TV "eye" which enables them, on receivers at their desks, to keep such close watch on inmates of city jail that, as one dispatch reports, prisoner in cell won't even be able to swat a mosquito without being seen and heard.

COWBOY STAR Gene Autry says he'll sue Republic Pictures to ban use of his movies on TV. He'll base action on precedent set by Federal Court's decision last week forbidding televising of Roy Rogers' Republic movies (Vol. 7:42). Republic, with millions in potential profits at stake, says it will appeal Rogers case to Supreme Court if necessary, is expected to file in Appeals Court next month.

Meanwhile, show business and TV attorneys, after scrutinizing Judge Peirson M. Hall's opinion in Rogers case, say more test cases may be necessary to determine whether actors generally can prevent TV release of old films. They point out judge pinned his decision on fact that Rogers' contract specifically reserved to the actor the right to control use of his name in advertising commercial products—aimed originally at royalties from sale of cowboy suits, cap pistols, endorsement of breakfast foods, etc. While Autry's contract is said to be similar, very few film actors' pacts make this type of reservation. Standard Screen Actors Guild contract awards all rights—including TV—to producer.

■

Defending its uhf experimental application (Vol. 7:33, 38), WHUM, Reading, Pa., this week filed with FCC an opposition to WEEU's petition for hearing or denial, saying: (1) Application is no "foot in the door" to future commercial operation, since FCC policy has been consistently against such efforts. "WHUM fully realizes that it may never receive a commercial uhf grant . . . How can there be a foot-in-the-door advantage unless the Commission recognizes it? . . . WEEU appears unwilling to accept the Commission's statement of policy on the subject." (2) Station would be adequately financed [for $500,000 project]. (3) WEEU has no right to object, since uhf station would subject it to neither electrical interference nor economic injury. (4) Experimentation is welcomed by industry. (5) WEEU's effort "is a deliberate attempt to prevent anyone from conducting uhf experimentation in Reading which it itself is unable or unwilling to do."

Second East-West microwave route across Midwest is proposed by AT&T in filing plans with FCC for new relay system between Pittsburgh and St. Louis that will utilize present Columbus-Dayton-Indianapolis route as its central section. It will comprise 24 stations, averaging 28 mi. apart, will cost $9,000,000, should be ready for phone service by mid-1953, could provide several TV channels. One westbound, 3 eastbound TV channels are now in use between Dayton-Columbus and 2 westbound between Dayton-Indianapolis. These are now connected to nation-wide TV networks via coaxial between Toledo-Dayton.

Two applications filed with FCC this week were from KXOB, Stockton, Cal. (Lincoln Dellar), asking for Channel 13, and Capital City Television Co., Austin, Tex., seeking uhf Channel 18. Latter firm is 100% owned by Charles H. Coffield, oilman, son of H. H. Coffield, formerly one-third owner of KEYL, San Antonio, recently sold (Vol. 7:30, 41) to George B. Storer interests. Applications on file now total 450, of which 17 are uhf. [For further details, see *TV Addenda 13-P* herewith; for listing of all applicants, see *TV Factbook No. 13* and Addenda to date.]

Paris-London direct TV exchanges are being planned, to begin in fall of 1952, says London report in Commerce Dept.'s *Foreign Trade Weekly*.

NOTE TO SUBSCRIBERS: After putting this issue to bed, we move to expanded quarters in downtown Washington's new Wyatt Bldg., 14th Street & New York Ave., new telephone number STerling 1755. You will also note the change in masthead to embrace the legend "Electronics Reports"—obviously more descriptive of the field we cover. Our AM-FM directories and weekly Addenda will continue to be published as before, as will of course our semi-annual TV Factbook and weekly TV Addenda designed to keep basic data on stations and applications current. We will appreciate changing of your records of our address and telephone number.

November 3, 1951

In this Issue:

Things Are Quieter Along the Potomac, *page 1.*
Marketeers Argue, TV Goes Merrily Up, *page 2.*
End-of-Freeze—Some Clearer Glimpses, *page 3.*
Where Does Color Go From Here? *page 6.*
Dun & Bradstreet and Other Barometers, *page 7.*
NPA Sees 3½-4 Million TV Sets in '52, *page 7.*

THINGS ARE QUIETER ALONG THE POTOMAC: What the radio fraternity are talking about, mostly, over the Washington teacups these days:

(a) Will FCC really concentrate on ending the freeze speedily, now that the troublesome color mess has been more or less resolved?

Definitely, it will -- how to hasten freeze-end dominates the thinking of most commissioners, pressured from every quarter, particularly Congress. Staff is now intent on concluding "paper" hearings by Nov. 26 deadline, and working hard on revised allocation tables -- palpably eager to "do a job" (see p. 3).

(b) Will there be changes at FCC top-level? Chances are there will, not too far off, certainly by time freeze is really thawed. But Comr. Hennock is staying on (see p. 10), may again be Big Noise on educational TV front.

Commission's big problem, at moment, is how best to deploy curtailed staff in line with reduced budget. That should mean less chances of bogging down in dead-end probes, needless hearings, futile litigation, "made work". Talk of radio patent investigation by FCC may be discounted.

(c) What next in the way of causes celebres? Re color, see story on p. 6. Theatre TV goes to hearing Feb. 26 (Vol. 7:37). Subscription TV will be set for hearing, not just Zenith's Phonevision but all other systems (Vol. 7:38), sometime thereafter -- with Zenith expected to file formal application soon (see p. 10). Then there's question whether Congress and/or FCC will accept telecasters' self-imposed program code or demand stiffer controls a la the Benton Bill (see p. 10).

* * * *

Another big issue will be ABC-Paramount Theatres merger (Vol. 7:41), set for hearing next Jan. 15, which some of Commission's legalists would like to see blown up into big "anti-trust" procedure on ground movie people should be kept out of TV. But chances are practical facts will prevail, for --

(1) Anti-trust aspects were presumably settled by Dept. of Justice when Paramount production and theatre businesses were separated by consent decree.

(2) Only Congress has authority to legislate that a theatreman or a newspaper publisher or a hod-carrier or any other kind of person shall be excluded from holding radio licenses -- and action by Congress along this line is unlikely. FCC could delay and drag out, as it once did newspaper grants under mask of an "investigation" into newspaper ownership of radio stations. But that one fell flat, too.

(3) Everybody stands to gain by merger -- ABC, which badly needs fiscal and managerial shot in arm; ABC employes, who have been deserting it in droves; ABC affiliates, who don't relish poor third-place TV-AM positions (Vol. 7:43).

Then there's public, of course -- promised preservation of ABC's declining AM network, assured better TV-radio program structures by reason of intensified competition via big theatre company's resources, personnel and know-how.

* * * *

Also very much a conversation piece this week was fact Frank E. McKinney, Indianapolis lawyer and substantial stockholder in 4 Indiana radio stations, is new

Copyright 1951 by Radio News Bureau

chairman of Democratic National Committee. Does it mean anything so far as TV-radio regulation is concerned? Probably not, for the FCC in recent years has kept itself singularly free from that kind of partisan politics.

Like Chairman Coy, also an Indianan, Mr. McKinney is a protege of Indiana national committeeman Frank McHale. He's a onetime business associate of ABC v.p. Robert Hinckley, under whom he also served as asst. director of govt.'s big Office of Contract Settlements during war. Only WISH, Indianapolis, among the stations in which he and family own about 24%, is yet TV applicant; others are WANE, Ft. Wayne; WHBU, Anderson; WHOT, South Bend.

It's recalled Secretary of Commerce Sawyer owns 2 radio stations in Ohio (WING, Dayton, and WIZE, Springfield), but he must go to hearing Dec. 7 on application to purchase third (WCOL, Columbus). Sen. Kerr (D-Okla.) controls WEEK, Peoria, owns part of KRMG, Tulsa, & wife of Sen. Lyndon Johnson (D-Tex.) owns KTBC, Austin.

Sen. Robert A. Taft (R-Ohio) has family interest in Cincinnati Times-Star and its TV-radio stations (WKRC & WKRC-TV). And several Congressmen, notably Reps. Ellsworth (R-Ore.) and O'Konski (R-Wis.) own hometown radio stations.

These were business investments, never subjected to charges of political pressures; nor have they ever been charged with abusing their licenses in any way.

MARKETEERS ARGUE, TV GOES MERRILY UP: It's still a field day for the researchers, expanding and expounding on TV's impact on other advertising media -- but not even the most ardent "true believer" in the destiny of TV will join Firestone ad chief A.J. McGinness in his bombshell letter to Sponsor Magazine, stating:

"There is no longer any room for AM radio stations within the metropolitan area of TV stations and this trend will continue...once the freeze is lifted on the erection of new TV outlets...However much you and the networks want to feel that radio and TV are 2 separate media and that there is room for both, it seems apparent that people who own TV sets don't agree with you."

There was immediate outcry, naturally, and even Assn. of National Advertisers, on whose TV-radio steering committee McGinness served, disclaims agreement or responsibility. In fact, Mr. McGinness has resigned from the committee.

* * * *

If any further proof is needed of TV advertising's meteoric rise than fact that network TV billings now outstrip network radio (Vol. 7:43), Rorabaugh Report on third quarter 1951 sponsorships provides cogent clincher:

Total of 5807 different advertisers were using TV's 4 networks and the 101 reporting stations (out of total 107) at end of Sept.: 242 on networks, 1372 spot, 4427 local-retail. This compares with 126 network, 801 spot, 2903 local-retail reported by 100 stations just one year earlier. Note: Rorabaugh monthly reports list all the network and spot accounts and their agencies by names.

* * * *

Where's all that money for TV time coming from? So far as network advertisers are concerned, says report by Magazine Advertising Bureau, it's new money -- not slashed from other media. In study of all advertisers spending $25,000 or more on network TV during first half of this year, it notes their TV expenditures are up some $38,000,000 from same period last year. But it concludes:

"The TV advertising of these companies continues to represent additional appropriations; the money has not come from cuts in other media budgets. Of the 3 media for which dollar expenditures are available -- magazines, network radio, Sunday newspaper supplements -- only the last named showed a loss compared with the first 6 months of 1950 [5.3%].

"Up to the present time, therefore, TV has been regarded as an additional medium by most of the advertisers who use it. They have not cut their dollar appropriations in other media; most of them have continued their use of such other media, as shown by the following: Of the 163 companies using network TV in the first 6 months of 1951 -- 136 used magazines (up from 132 users in the first 6 months of 1950); 83 used Sunday newspaper supplements (down from 90 users in 1950); 69 used network radio (down from 71 users in 1950)."

END-OF-FREEZE—SOME CLEARER GLIMPSES: FCC is finally getting some realism into its predictions on the freeze end. Chairman Coy, Comr. Sterling and Broadcast Bureau chief Curtis Plummer all looked into crystal balls this week. All came up with something more nearly down to earth than Coy's previous rosy hopes.

But Coy has gone the other extreme now. He told Southern broadcasters, during Nov. 1 meeting in St. Petersburg: "I doubt if the new TV stations put into operation in 1952 will exceed the fingers on both your hands." What's more, he thought 1953 would bring no more than an additional 10.

Plummer gave no "on the air" estimate, but he opined some 80 grants could be pounded out by July 1, 1952, if no legal snarl develops in allocations hearing. His guesstimate came during Nov. 1 RTMA Transmitter Div. meeting in Washington. At same meeting, NPA Electronics Div. chief Edmund Morris lent hope that most of those 80 could get materials to put them on the air by mid-1953.

A final decision on freeze by Feb.-March is "what we're striving for," said Comr. Sterling. But he warned: "I hope that there will be no illusions...as to the rapidity with which TV service will expand once the freeze is lifted." Shortages of materials and delays inherent in competition for channels are the bugaboos, he said.

Plummer's analysis was best to come out of FCC to date. Here's his guess on timetable from here on out:

(1) After windup of "paper hearing" Nov. 26, about 60 days is "reasonable" time within which FCC can write final decision. This brings situation to Feb. 1.

(2) Then 60 days will be given for filing of new applications, amending of old, before any grants will be made. That means April 1.

(3) CPs may then be authorized -- and Plummer believes that 80 or so in small uncontested markets, "probably 50,000 or less population," could be rolled out by July 1. "As a wild guess," he said, vhf-uhf proportion would be "50-50".

"This is the most optimistic schedule," he said. "Just one petition for reconsideration of the decision would probably take an additional 90 days."

* * * *

But these 80 grants won't expand TV much, and Plummer recognized that when he cited San Luis Obispo, Cal., as typical. Town of 15-20,000 has one applicant, is unlikely to attract another -- thus could qualify for immediate grant.

The real growth of TV -- in Denver, Portland, Ft. Wayne, El Paso, etc. -- is a long way off. Analysis of the first 150 markets, over 50,000 population, said Plummer, shows as of now 1/3 already have more applicants than channels, 1/3 are about even-Stephen, remainder have enough channels to go around. But, he said, flood of perhaps 500 new applications after freeze-end will probably tip second 1/3 into "scarcity" group. Thus, at least 100 hearings are in prospect right off the bat.

What next? Commission manpower is the bottleneck. FCC has merely 7 examiners and is losing engineers left and right. Plummer outlined the sad facts of Commission's financial life. In next year's budget, FCC is asking for $600,000 to move the TV mass. Among other employes, FCC would add 7 more examiners. History shows, he said, that an examiner can move about 15-20 applications a year. If the $600,000 isn't authorized, "I would expect no more than 20 grants per quarter." And he ventured that TV will move slower than AM because of fiercer competition.

Mused one industry man after session: "I wonder whether a little industry lobbying might do some good there." Commission obviously feels it can't come out and ask for just that -- but you can be sure it would be overjoyed. It's recalled that ICC's motor carrier division had similar bottleneck at one time, whereupon that industry went to work on Congress, got the needed $300,000 for ICC.

* * * *

NPA's Morris took over where Plummer left off. He assumed average station would take 10 months to get on air. Therefore, "very few, if any, new stations will be on the air by Jan. 1, 1953. They should begin operating during the first quarter of 1953, with perhaps the first 80 on the air by the middle of 1953."

Assuming 40 stations built per quarter, Morris figured they'd need 2000 tons

of structural steel, 3400 tons of other types of steel, 400,000 lbs. of copper and 85,000 lbs. of aluminum.

Though he said he couldn't commit NPA as to availability of these metals, he pointed out that it's expected that metals for civilian use should be in reasonably good supply by July 1952. What's more, he said, a good deal of station equipment has been produced and is being produced right now.

Morris was supported by his boss, DPA-NPA administrator Manly Fleischmann, who told Nov. 2 press conference.

"The most important parts of the metals expansion program will be out of the way the first half or three-quarters of 1952. Structural steel shortage will continue, but it will be due to deferred demand, as a result of postponement of construction during the military buildup period.

"By the first part of 1953, we can have a more liberal policy toward construction. Perhaps the situation may be such that we can take steel out of CMP by that time. I'm not predicting that. It's unlikely, but it's a possibility."

Asked the direct question about those 80 stations, Fleischmann said he felt sure at least "some" of the 80 stations can be built.

* * * *

Present or imminent availability of transmitters in good numbers was virtually confirmed by RTMA's TV committee chairman Dr. W.R.G. Baker (GE) who says that "many industry representatives believe there are sufficient transmitters now under construction or already completed and held in warehouses to satisfy the demand through 1952."

This is directly in line with our own survey of transmitter makers who estimated that some 60 transmitters may be ready by mid-1952, up to 100 by end of 1952 -- including vhf and uhf (Vol. 7:34).

Setting up of RTMA transmitter task force was the occasion of Dr. Baker's statement. Its job is to determine how many transmitters will be built and impact on industry of lifting or continuing freeze. Members: Wm. Chaffee, Philco, chairman; Keeton Arnett, DuMont; Adm. Edwin Foster, RCA; C.W. Michaels, GE.

* * * *

FCC staff seem quite pleased with way allocations hearing is going. Though total filings have reached 1302, attorneys and engineers feel they're on top of the situation. Paul Dobin, chief of Rules & Standards Div., is convinced paper hearing is taking at least a year off length of freeze.

Commission's tough policy on oral presentations continues. This week, it rejected State of New Jersey's request for an oral hearing on its demand for educational channels, saying issues can be decided on basis of written comments.

Commission also appears adamant in its ruling that current comments must stick to proposals originally made in this proceeding. It refused to accept in evidence new proposal by Connecticut State Board of Education to reserve specific channels. Originally, Board had merely asked that some flexibility channels be made available for educational use.

* * * *

Comr. Sterling's speech was delivered Oct. 31 before New York joint meeting of Armed Forces Communications Assn. and the Institute of Navigation.

Ears perked when he said he thought FCC could give uhf a lift by relaxing its 5-station limit, permitting networks "to acquire 2 or 3 uhf stations widely distributed in top market areas as a means of developing the uhf band." Presumably, relaxation would go for any multiple owner.

Sterling wasn't merely musing. Others at Commission have same idea, but it's anyone's guess whether proposal will muster FCC majority. In any event, FCC isn't likely to face the question until end of freeze.

Commission is considering multiple ownership rules, however. Next week, there's likelihood it will vote to limit station ownership by any single entity to: 5 TV, 7 FM (up from proposed 6), 7 AM.

Also in Sterling's speech was revival of "satellite" idea once broached by former chairman Charles Denny. Said Sterling:

"I have always felt that there should be a way whereby TV programs...should be made available to the homes in the communities which are out of the range of TV service and because of economic reasons could not support a full-fledged commercial station. This could be done by tapping off the coaxial cable and feeding the programs by a closed circuit into the homes of subscribers.

"Also it could be done by small-powered, perhaps unattended, transmitters. In this way, the signal could be picked up for rebroadcasting to another close-by small community having no TV service. Taking into consideration the importance of the program and economy of the community, the need to have local studios and camera chains could be waived in these cases.

"The Commission might find it in the public interest to authorize a licensee of a regular commercial station to operate one or more low-powered secondary stations to serve isolated communities...Other methods of responsible ownership and management of the secondary stations are possible."

There's no indication others at FCC have given as much thought to satellites. But if it eventually approves principle, question resolves itself into one of economics: How small a market justifies construction of satellite?

Judging from the "bootleg" transmitters FCC has been ferreting out lately, dozen or so, chances are answer is: "Pretty small."

Personal Notes: George T. Shupert, ex-Paramount TV Productions, now v.p. of Peerless Television Productions Inc., in charge of New York headquarters at 729 Seventh Ave.; firm formed in Los Angeles by Edward Small and Sol Lesser is initially offering group of 26 feature films . . . Charles R. Denny Jr., NBC executive v.p., ex-chairman FCC, elected to executive committee, Amherst Alumni Council . . . George Adair, Washington consulting engineer, left Nov. 1 with Mrs. Adair on special govt. mission to survey communications needs in French Indo-China . . . Edwin S. Friendly Jr., ABC-TV Eastern sales mgr., promoted to national sales director, succeeding v.p. Fred M. Thrower, resigned . . . Charles B. Crutchfield, v.p. & gen. mgr., WBT & WBTV, Charlotte, back from special mission to Greece for State Dept.'s Voice of America . . . John F. Hardesty resigns as NARTB director of station relations to become BAB director of local promotion Nov. 12 . . . Edward J. McCrossin, ex-DuMont & NBC, joins legal staff of ABC under v.p. & gen. attorney Joseph A. McDonald . . . Freeman W. Cardall, chief accountant, named business mgr. of WBAL & WBAL-TV, Baltimore . . . W. E. Dacosta promoted to WOR-TV technical operations supervisor . . . Robert Hibbard, operations director, WGN-TV, Chicago, recalled to Army duty . . . G. P. Fitzpatrick, ex-Falstaff Brewing Corp., joins Free & Peters as director of radio sales promotion & research, succeeding J. C. Amaturo, now with MCA . . . Stanley H. Pulver, ex-Dancer-Fitzgerald-Sample, joins Lever Bros. as TV-radio media mgr. . . . Rush Hughes named TV-radio director, Lynn Baker Inc. . . . D. R. Benkhart, handling Local Chevrolet Dealers account, named business mgr. of TV dept., Campbell-Ewald New York office . . . Bernard I. Paulson, an ABC-TV film editor, promoted to program operations mgr., WJZ-TV . . . Elmore B. Lyford, ex-NBC-TV supervisor of station relations, becomes director of station relations for DuMont Network Nov. 19, succeeding Norman W. Drescher, appointed to other administrative duties.

Judge Ira E. Robinson, 82, chairman of old Federal Radio Commission, on which he served from 1928 to 1932, died Oct. 28 at his home in Philippi, W. Va. He was former justice of W. Va. Supreme Court, was Republican candidate for governor in 1916. He had recently remarried, and had sold his famous mansion Adaland.

Station Accounts: V. La Rosa & Sons, Brooklyn (macaroni & spaghetti) starts first all-Italian program in TV Nov. 24 on WOR-TV, New York, Sat. 2-3:30 p.m., the 2-2:30 portion being live dramatic show titled *Teatro-Televisione La Rosa Rossa* (Red Rose TV Theatre) followed by hour-long *Italian Movie Matinee;* La Rosa also starts Mon.-thru-Fri. *La Rosa Movie Matinee* Nov. 5 on same station from 3:30-4:30. Agency is Kiesewetter Associates, N. Y. . . . Inglewood Park Cemetery Assn., Los Angeles, sponsoring *Great Churches of the Golden West* on KTTV, with Rev. Clifton Moore of Hollywood's First Presbyterian Church as narrator, Sun. 11-noon; program acquaints viewers with different religious denominations each week, provides services for elderly folk and shut-ins . . . John Meck Industries (TV sets) sponsoring *The Red-Head,* with guitarist Wendell Hall, on WBKB, Chicago, Mon.-thru-Fri. 10:45-11 a.m. . . . Hamilton Watch Co. will again place its 5-min. film series titled *To Peg & To Jim* on stations in 52 markets, thru BBDO . . . Zenith Radio plans campaign for new Royal and Super-Royal hearing aids on 60 TV stations . . . Chin & Lee Inc. (Chinese foods) buys 13 weeks participation in *Recipe for Happiness* on WABD, thru Tracy, Kent & Co. . . . Among other advertisers reported using or preparing to use TV: American School (home courses), thru Olian Adv. Co., Chicago; Anatole Robbins Inc. (cosmetics), thru Hutchinson-Hadlock Co., Hollywood; RaBar Plastics Inc., N. Y. (tree ornaments), direct; Alliance Mfg. Co. (TV antennas & boosters), thru Foster & Davies, Cleveland; Haggar Co. (slacks), thru Tracy-Locke Co. Inc., Dallas; Aquashield (shower accessory), thru Kent Goodman Adv., Los Angeles; J. Wiss & Sons (scissors & shears), thru Ellington & Co., N. Y.; J. W. Beardsley & Sons (shredded codfish), thru Tracy, Kent & Co., N. Y.; California Prune & Apricot Growers' Assn. (Sunsweet prunes), thru Long Adv. Service, San Jose, Cal.; By-Chemical Products Co. (Sur-Grip waxes & Thompson's water seal), thru Wyckoff Adv. Agency, San Francisco; Glyco-Mist Inc. (household deodorant), thru Leche & Leche Adv., St. Louis; Northbrook Plastic Card Co., subsidiary of G. S. Carrington Co. (Lifetime playing cards), thru Robertson & Buckley, Chicago; Trion Inc. (Trionized Air electrostatic precipitators), thru Walker & Downing, Pittsburgh.

WHERE DOES COLOR GO from here? With CBS system widely considered "kaput" after mobilization director Charles Wilson's ban on "mass production" (Vol. 7:42-43), compatible system seems to have clear road.

Sigh of relief that went through industry has even brought discreet echoes from many at FCC. There's little question that many Commission folk are happy that Wilson took matter out of their hands.

Next question concerns time element—when will FCC consider compatible color? That matter undoubtedly awaits formal petition by RCA and/or NTSC or other individual manufacturers. But scheduling of hearing, after receipt of petition, is totally up in air.

Freeze must be gotten out of way, possibly by spring. Then, theatre-TV hearing appears next on agenda. If that's concluded before summer it will be surprising. Next, subscription TV may dominate FCC's time. A lot of other subjects could come up.

Commission isn't disposed to rush into color again now, at any rate. There's possibility "paper" hearing for color, like that of current allocations proceedings, could be sandwiched in somewhere. People at FCC have mentioned that possibility, perhaps with idea of feeling out industry. In any event, there's little enthusiasm for getting into color again immediately—probably simple weariness with the whole business.

* * * *

A typical Commission evaluation of color situation was that of Comr. George E. Sterling during Oct. 31 speech at New York meeting of Armed Forces Communications Assn. and Institute of Navigation:

"While the CBS sequential color system may have been rendered a staggering blow at the moment, I do not believe you can count it out. However, it does look like the compatibility factor will be enlarged . . . I believe that, unless CBS throws in the towel, in the final analysis the showdown in color will come when the compatible proponents demonstrate their system side by side with the CBS system on direct-view large-size trichromatic tubes."

* * * *

No relaxation of engineering effort has appeared in industry, despite removal of CBS from scene. Full NTSC met Nov. 2, adopted recommendations of field-testing specifications submitted by Panels 13 & 14. Way is now wide open to full-scale testing.

Though RCA is going along fully with NTSC, chances are it will ask for comparative demonstrations vis-a-vis CBS or any other system early next year. Neither RCA nor NTSC seems likely to insist on single color standard, appearing perfectly willing to take "dual standards" if FCC insists on keeping its choice of CBS system on the books as the law of the land.

* * * *

Talk about Paramount picking up CBS color ball and running with it is largely discounted by industry. Most speculation revolves around Lawrence tri-color tube, since Paramount claims it's good for both color and black-&-white and uses no more materials than standard monochrome tube. Engineers point out, however, that:

(1) Under best of conditions, there would be long gap between the home-made continuously-pumped tube demonstrated and a production item. Further, "mass production" is out for the duration.

(2) Monochrome reception on tube is yet to be shown.

(3) Compatible color reception on tube presents serious power problems. Eventual adoption of compatible system could mean obsolescence of any sets with tube.

Evaluation of Lawrence tube by John Battison, in November *Tele-Tech*, concludes: "As demonstrated, the tube was not impressive in performance. Only the factors of extreme simplicity of manufacture and the new principles involved gave it promise of being a valuable contribution to the color TV field."

Another analysis, by Donald Fink in November *Electronics*, notes: "It will work on the CBS system readily, on the RCA-plus-industry system only if considerable power is available for color deflection. The results are at the moment not impressive in themselves, but improvement is to be expected."

* * * *

CBS's shutdown of colorcasting appears to have caused few disruptions in operations, was welcomed by the few affiliates carrying its schedule (Vol. 7:41). Only 4 minor employes have been let go; all color shows are being tailored for black-&-white, although proposed *Broadway's Best* extravaganzas (Vol. 7:43) are still uncertain—and CBS is now in position to offer estimated $1,000,000 worth of new time to clients.

CBS's emphasis on industrial, military and theatre-TV color is bound to increase. Most engineers have no serious quarrel with field-sequential system for uses where bandwidth is unlimited—where number of fields and lines may be increased to any desired number to increase flicker threshold and resolution, though they still don't like spinning disc. Some have reservations about Eidophor system itself, for theatre TV, but are waiting to see it demonstrated at showings promised next month (Vol. 7:41-42).

CBS-Columbia's appeal for more materials, originally scheduled by NPA for Oct. 23 and postponed to Oct. 30, was again postponed "tentatively" for 3 more weeks at request of CBS-Columbia.

* * * *

Our information on status of Color TV Inc. (Vol. 7:43) was erroneous, president Arthur Matthews informs us. He says he told Wilson his company has 20 engineers and technicians solely on color; also that he would reduce the number, per Wilson's request, and that he would like assistance of Wilson's office in obtaining govt. color TV contracts. Further, says Mr. Matthews: "We are still very much in the color picture and never have been out of it."

Trade Personals: Sir Ernest Fisk, managing director of EMI Ltd., London, has resigned effective Dec. 31, expiration date of his 7-year contract . . . Louis Martin, ex-General Instrument Corp., named gen. sales mgr., Standard Coil Products Co. under sales v.p. Robert E. Peterson . . . James L. Brown, ex-GE, named sales mgr., Carl F. Miller named mgr. of tube development and design engineering, of new Westinghouse electronic tube div., Bath, N. Y. . . . Dr. David C. Miller, ex-consultant to NSRB, appointed asst. research director, Philips Laboratories Inc., and administrative asst. to president Dr. O. S. Duffendack . . . Bernard J. Chubet, executive v.p., elected president of Air Marshal Corp., succeeding Frederick D. Gearhart, who returns to investment firm he heads . . . Julian Tuteur named mgr. of TV-radio marketing, Canadian Westinghouse Co. . . . B. F. Seahill named TV-radio sales mgr., Westinghouse Electric Supply Co. . . . Keeton Arnett, ex-Fred Eldean Org., named gen. asst. to Allen B. DuMont . . . John Hunt promoted to mgr. of DuMont's new New Jersey factory distributorship . . . Frederic M. Comins promoted to sales v.p., Krich-New Jersey Inc., succeeding William W. Cone, now sales v.p., Motorola-New York . . . Charles Roberts, formerly with GE & Zenith distributors in New York, succeeds Herman Lubet as adv. & sales promotion mgr., Fada . . . Edward Uecke promoted to chief engineer, electronics & recording div., Capitol Records, Hollywood . . . Walter Birdsall Brown, ex-NAM, new sales mgr., Transmitter Equipment Mfg. Co. . . . Homer Hosmer Scott, president of firm bearing his name, won John H. Potts Memorial Award of Audio Engineering Society for outstanding achievements, including new method of mass-producing phonograph records.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5. D. C. • TELEPHONE STERLING 1755
Trade Report
November 3, 1951

DUN & BRADSTREET AND OTHER BAROMETERS: "Business is good. Twice as many TV sets are being sold as are being produced. By the first of the year, we'll be wishing we had that inventory back again."

Thus Emerson's astute Benj. Abrams -- reflecting pretty much the sentiment of most other manufacturers. He foresees materials shortages, thinks current rate of production (see below) may be too much to hope to sustain through this quarter.

Another top manufacturer, contemplating latest weekly RTMA output figures, said he thinks there may be a few more 100,000-plus weeks, then an inevitable diminution due to govt. demands, with first quarter prospects "in the lap of the gods."

"There's no problem securing components," said he. "Problem is selling our mix, and selling it evenly. Our 20-in. sales, though higher in proportion, aren't going as fast as we'd like -- and we all know 20-in. will be No. 1 by end of year."

* * * *

Dun & Bradstreet monthly retail survey is now by way of becoming the trade's most important index, though figures are necessarily whole month late. Oct. 1 report released to subscribing manufacturers this week shows that during September 613,000 TVs were sold by dealers -- 236,000 table models, 377,000 others -- and that retail sales for whole of third quarter were 1,100,000.

Thus September accounted for far more than half quarter's sales -- and, it would seem, most of these moved during last 2 weeks in September. October report doubtless will be even better.

Retail inventory at end of September was 300,000-350,000 table models plus 500,000-650,000 other types -- in other words, total of 800,000-1,000,000. This is up somewhat (statisticians calculate about 15,000) from the 800,000-900,000 reported at end of August (Vol. 7:39) but down from the 900,000-1,000,000 at end of July (Vol. 7:35). Latter were first Dun & Bradstreet figures to be reported.

Among distributors, RTMA reports inventory of 652,749 TVs at end of September, down from 680,862 at end of August, comparing with 363,488 at end of last year. Radio inventory was 1,048,666, of which 841,832 were home sets.

* * * *

Production figures are more up-to-date. TV output was 108,257 sets (2536 private label) for week ending Oct. 26, up nearly 10,000 from preceding week and bringing October's grand total to 394,873 (subject to revision). This compares with 838,300 in October 1950. It can be added to previous 9 months' 3,970,857 to make 10-month total of nearly 4,366,000 -- creeping close to year's predicted 5,000,000.

Factory inventory of TVs was 354,456, not much change from preceding week's 363,551 -- but at least continuing downward trend shown 13 straight weeks since Aug. 3 peak of 768,766 (Vol. 7:32).

Radio output was 221,774 (95,753 private), not much change from preceding week (Vol. 7:24). Radio inventory was 335,742, down about 30,000. Total radios for month were 885,333 vs. 1,229,900 same 1950 month, making about 11,300,000 for year to date. Week's radios were 123,659 home sets, 25,282 portables, 72,833 auto.

NPA SEES 3½-4 MILLION TV SETS IN '52: After predicting that just a little fewer than 1,000,000 TV receivers would be produced in fourth quarter (Vol. 7:32), and some 5,000,000 in all 1951, NPA came up this week with highly educated guess for 1952.

DPA-NPA electronics chief Edmund T. Morris told RTMA transmitter div. meeting in Washington Nov. 1 that NPA feels industry will produce 3,500,000-4,000,000 TVs next year. But he hedged forecast with this warning:

"There are many factors which could affect this estimate. For instance, there is still much to be accomplished by material conservation. Conversely, the shortage of one critical tube type or component could curtail production.

"When this figure is coupled with the expanded and increasing military pro-

gram," he added, "the outlook for the electronics industry is bright in comparison with other industries in the consumer durable goods field."

On a quarterly basis, NPA people feel pattern of 1952 production will run something like this: First quarter, up to 1,000,000 sets, depending on extent of materials conservation (Vol. 7:43); second quarter, probably slightly less than the first quarter due to somewhat reduced materials allocations; third and fourth, slow increase in output as availability of steel and aluminum begin to ease.

Admittedly, these are precarious estimates based on a timetable subject to any number of changes. But if materials are governing factor in 1952 production -- and there's every indication they will be -- none are better qualified to go out on the limb than NPA's experts, many of whom are from the ranks of TV-radio industry.

Most TV-radio manufacturers have received their CMP allotment tickets for first-quarter 1952. On the average, TV-radio industry's materials were cut about same as other major consumer durable industries: steel 50%, copper & aluminum 35% of rate of use during first-half 1950 base period. That's the way it averages out; some manufacturers got more than that, some less.

First-quarter levels will be close to rock-bottom; no drastic cuts are now planned for second quarter. There may be slightly less materials available, but the drop won't be steep. DPA-NPA boss Manly Fleischmann said Nov. 2 that first-quarter consumer durables quotas are "pretty close to the minimum; you can't get much lower and expect manufacturers to keep going." First signs of easing materials supply are expected to appear in third-quarter 1952.

And if TV-radio shortages develop in meantime, as expected (Vol. 7:42), the Govt. will be ready to slap strict limitations on the amount of inventory suppliers and jobbers of TV-radios will be permitted to stock (see below).

Topics & Trends of TV Trade: Anticipating shortages of TV-radio and other consumer goods, mobilization agencies are working on new order to assure normal patterns of wholesale distribution. It's understood regulation won't be applied until definite shortages develop, but DPA and NPA plan to have it ready to clamp down the minute such scarcities become apparent. Tentative drafts provide for limitation of supply of consumer hard goods any supplier or jobber may hold in inventory—possibly to 60-day supply. Order would also allocate products to distributors on basis of dollar value of historical distribution and geographical location.

"Local sports committee," to operate as subcommittee of RTMA's sports broadcasting committee headed by RCA's J. B. Elliott, was named by RTMA this week and scheduled to hold first meeting during Nov. 14-16 RTMA industry conference at Chicago's Stevens Hotel. Idea is to accelerate local distributor sports committee activities. Membership of RTMA sports subcommittee on promotion, all TV sales managers: Dan D. Halpin, RCA, chairman; Stanley M. Abrams, Emerson; A. A. Brandt, GE; Emerson Dikeman, Capehart-Farnsworth; William L. Dunn, Belmont; Clifford J. Hunt, Stromberg-Carlson; W. H. Kelley, Motorola; W. A. Mara, Bendix; E. G. May, Sentinel; J. K. McDonough, Sylvania; R. J. McNeely, Hoffman; John M. Otter, Philco; Stewart Roberts, Magnavox; R. J. Sherwood, Hallicrafters; R. P. Spellman, Arvin; Walker L. Stickel, DuMont; E. L. Taylor, Stewart-Warner; L. C. Truesdell, Zenith; J. F. Walsh, Westinghouse.

First TV-radio casualties of mobilization program have been some "makers" of brand-name receivers whose "manufacturing" consists of putting already-wired chassis into cabinets. Several of these assemblers are known to have discontinued operations in last few months when materials shortages cut off their supplies of wired TV chassis. Since they had neither base period materials quota nor manufacturing facilities, several of these operators have been forced to go out of business.

Merchandising Notes: Commodore Television Corp., 18 Clinton St., Brooklyn, new sales organization set up by Robert I. Erlichman, ex-Commander Television Corp., to market line of 17, 20 & 24-in. sets made by Atlantic Video Corp., same address . . . Emerson has added three 17-in. sets to 1952 line (Vol. 7:38): 2 table models at $250 in mahogany, $260 blonde; console at $300 . . . Crosley, same as RCA Victor (Vol. 7:39), is going into room air-conditioning field, using own distributors; sets will also be made for its brand name by Fedders-Quigan Corp. . . . Transvision announces 3-lb. picture tube "reactivator," at $14.95, designed to rejuvenate tube in the home, without removal from set . . . Concourse Music Co., major dealer, with headquarters at 134 Center St., Mt. Vernon, N. Y., has filed petition in bankruptcy . . . Gough Industries, Philco distributor in Los Angeles, becomes factory-owned Philco Distributors Inc. in January, with staff unchanged and Phil Gough as president.

Million-dollar jump in excise tax collections from TV-radio industry in September over August's low, gives clue to extent of trade pick-up that month. Industry paid $6,227,593 in September, $1,062,562 more than August's $5,165,031, and $2,985,383 more than the $3,242,210 it paid in September 1950, when TV sets weren't subject to tax. Refrigerators, freezers, air conditioners took big seasonal drop, from $5,664,944 in August to $3,293,847 in September, down $2,371,097. September figure is $4,938,872 below $8,232,719 for last September. Phonograph records were $388,443 in Sept. vs. $518,711 in Aug., $375,440 in Sept. '50.

Denying govt. charges of false advertising of coin-operated TV sets (Vol. 7:39), Covideo Inc. and its president Sidney I. Horwatt and v.p. Louis Brown filed answer to Federal Trade Commission complaint that they don't own a TV plant as advertised. They say that, while Covideo buys certain parts from contractors, it assembles finished product by attaching coin-receiving devices. Firm also denied claiming it maintains staff of electronic engineers. Hearing has been set for Nov. 5 in New York.

Financial & Trade Notes: Sylvania sales rose 36% to $144,202,340 during first 9 months of this year, from $105,778,320 same 1950 period, prompting president Don G. Mitchell to forecast record year of close to $200,000,000 to compare with 1950 peak of $162,514,814 (Vol. 7:11, 30). Profits rose to $6,169,504, or $3.16 per share on 1,856,550 shares outstanding, from $5,129,080, or $3.31 per share on 1,456,650 shares. The 1951 nine-month net was after $13,200,000 reserve for Federal taxes. September quarter sales were $40,379,761, net $1,107,834 (54¢) on 1,856,550 shares vs. $44,692,219 sales, $2,869,627 ($1.90) net on 1,456,550 shares same quarter last year.

Sylvania filed registration with SEC this week covering $25,000,000 of sinking fund debentures and 200,000 shares of no par $4.25 convertible preferred stocks. Debentures, due in 1971, will be underwritten by Halsey, Stuart & Co. and Paine, Weber, Jackson & Curtis, who will also head underwriting group for stock. Company will use $17,372,000 of proceeds from preferred stock sales to retire $17,200,000 of debentures due in 1963—other funds to be used for expansion and working capital.

* * * *

Zenith Radio's consolidated net profit for 9 months ended Sept. 30 amounted to $2,689,630 ($5.46 a common share) after all charges, including estimated Federal taxes of $3,313,697. For 3 months ended Sept. 30 net profits were $309,833 (63¢), after providing $702,094 for taxes. Consolidated sales for 9-month period were $75,123,518, for quarter $22,115,879. Since company last year changed fiscal period to end on Dec. 31 instead of April 30, no comparable figures are available. Quarterly report says TV sales turned up sharply in September, since which there has been practically no factory inventory and all sets went on allocation. NOTE: For Zenith's 6-month and 1950 fiscal year reports, see Vol. 7:30.

RCA consolidated sales rose to record high of $421,281,782 for first 9 months of 1951, but net income after taxes fell to $18,356,841 ($1.15 a share), compared with $395,741,391 sales and $59,332,637 ($2.24) net earnings in same 1950 period. In September quarter, sales dropped to $118,948,849 from $146,957,033 in third quarter 1950, due largely to reduced TV trade, with net profit going down to $2,653,480 (13¢) from $12,422,994 (84¢). Federal taxes in first 9 months of 1951 were $19,495,000 compared with $25,948,000 in same 1950 period; in September quarter, they were $2,887,000 vs. $11,808,000.

Stromberg-Carlson net sales were $20,612,381 and profit after $173,000 taxes was $158,921 for first 9 months of year, due to slump in TV that was offset by increased sales and earnings of telephone, sound equipment and broadcasting (WHAM & WHAM-TV) departments. Sales were 12% under the $23,454,575 for same 1950 months, net profit 7% under the $170,863.

Hoffman Radio shows net loss of $126,957 on sales of $12,750,221 for first 9 months of this year, contrasted with net profit of $1,713,477 ($3 a share) on sales of $21,031,765 same period last year.

Magnavox reports net profit of $20,000 (2¢ a share) on sales of $5,011,000 for September quarter, compared with $781,000 ($1.09) on $10,214,000 sales same 1950 quarter.

———■———

Robert H. Marriott, 72, radio pioneer credited with having been first to put the telephone and detector method of radio reception in use, died at his home in Brooklyn Oct. 31. He was a consultant to original Federal Radio Commission and first president of IRE.

Ernest H. Scott, pioneer in custom-built radio field, who sold E. H. Scott Laboratories Inc. in 1944, died Oct. 27 in Vancouver, B. C., where he had resided for several years.

Mobilization Notes: Electronic components and parts are plentiful in Europe, says Edmund T. Morris, chief of DPA Electronics Production Board and NPA Electronics Div., just returned from European component-hunting expedition. He says his party sought "specific electronic items" hard to get in U. S., "found everything we were looking for without necessity of exchanging materials." Many parts and components whose production in this country is restricted by materials supply are readily available for civilian products in Europe, he said. As specific example, he said Germans and Italians "have resistors coming out of their ears—and good ones."

Morris said he would soon make report on foreign parts situation available to RTMA "and anyone else who is interested"—as guide to manufacturers seeking to supplement their shrinking parts supply. That foreign parts are available won't be news to many electronics manufacturers who have long been importing components, he pointed out (Vol. 6:48).

* * * *

Govt. has obligated some $3.7 billion for electronics-communications equipment during first 15 months of Korean war, including about $780,000,000 during July-Aug.-Sept. 1950. Estimate is according to general pattern of 10% of dollar value of govt. hard goods procurement representing electronics-communications. Defense Dept. announced it let contracts for $7.8 billion in hard goods first 3 months of current fiscal year, $37.3 billion for 15-month period following Korean attack. Military electronic production is expected to reach $4 billion-a-year rate. Col. C. A. Poutre, director of Munitions Board office of electronics programs, told RTMA transmitter div. Nov. 1 that by mid-1952, electronics industry will have expanded "to point where it can simultaneously support the military program and a high level of civilian production." He said some 20% of the military electronics procurement dollar goes for radio and related items, not including radar, which currently accounts for about 60% of military electronics procurement.

* * * *

DPA modified one of its new rules on tax amortization (Vol. 7:42) this week, announced that companies which began construction of new industrial facilities before Jan. 1, 1952 will be permitted to apply for tax aid without having obtained prior DPA approval of their projects. Precertification system was to have taken effect Nov. 1. DPA this week announced these additional certificates of necessity for expansion of electronics and related industrial capacity, granted during 60-day moratorium which ended Oct. 18 (amortized at 75%, except as noted):

Daystrom Inc., Archbald Borough, Pa., gunfire control systems, $3,974,750; Johnson Service Co., Milwaukee, radiosonde equipment, $907,000; Laboratory for Electronics Inc., Natick, Mass., military items, $828,100; Emerson Radio, Jersey City, fuses, $626,250; Sigma Instruments Corp., South Braintree, Mass., relays, $324,506; American Measuring Instrument Corp., Long Island City, aircraft parts, $227,109 (80%); Graflex Inc., Rochester, N. Y., fire control instruments, $196,714 (80%); Midland Mfg. Co., Kansas City, Kan., radio control crystals, $165,000; Empire State Labs, Bellmore, L. I., military items, $101,216 (80%).

Certificate was also granted to Sylvania, for expansion of tube-producing facilities at Altoona, Pa., with dollar value of amortization undecided. Sylvania had estimated cost of project at $959,000.

———■———

Brig. Gen. Victor A. Conrad, chief, Signal Corps Army communications service div., has been named acting chief, procurement & distribution div., succeeding Brig. Gen. Eugene V. Elder, ill.

Telecasting Notes: More station rep changes in the wind, with up-&-coming Harrington, Righter & Parsons, exclusively TV, taking on Louisville's WHAS-TV as of next March (adding to its WAAM, WBEN-TV, WTMJ-TV, WFMY-TV, WDAF-TV, WTTG, WLTV) and ex-Petry partner Henry I. Christal forming firm for exclusive radio representation, which will have WHAS, WTMJ & WDAF on list . . . Edward Petry has wired his list to deny reports he has lost radio representation of WBEN, KFI, KFH . . . Sarkes Tarzian says his WTTV, Bloomington, Ind., now operating with 12.5 kw ERP from new tower 707 ft. above average terrain, 1520 ft. above sea level, is "probably the highest structure in the Middle West," reports reception at 75-mi. radius, with line-of-sight path into Indianapolis . . . Technicians' strike at KSTP-TV, St. Paul, now in second year, prevented Oct. 20 U of Minnesota-Nebraska grid telecast pickup for NCAA-Westinghouse on NBC-TV, so instead network carried Indiana-Ohio State; under network contract with NCAA, game couldn't be handled by rival WTCN-TV, though latter carries films of Minnesota games every Monday night . . . Industrial films are subject of roundup article in Oct. 30 *Wall Street Journal*, which says rent-free movies, plugging sponsors' products, will amount to $60,000,000 business this year, notes that General Motors' 56 subjects made up 269 different TV programs last year . . . Odyssey Pictures Corp., formed recently by Sol Lesser and Douglas Fairbanks Jr., reports plans to make 26 TV films based on Milton Caniff's *Terry & the Pirates* . . . RKO has made 15-min. trailer for TV to plug new film *The Big Sky*, titling it *Making a Picture on Location* . . . CBS-TV signs *Quiz Kids* to exclusive contract . . . Ford Foundation's first TV series (Vol. 7:32) will be weekly film report of U.N. General Assembly in Paris, narrated by Harvard historian Arthur M. Schlesinger, over NBC-TV, 7-7:30 p.m., beginning Nov. 10 . . .U of Miami and WTVJ begin second series of semi-weekly "Telecourses," opening with 12-week course in conversational Spanish and 6-week session on Civil Defense, to be followed by 11-week music appreciation course . . . WHAS-TV to televise classroom sessions from Louisville area schools morning and afternoon daily during National Education Week, Nov. 11-17 .

———•———

White House made public letter Nov. 1 from Comr. Frieda Hennock, whose nomination for Federal district judgeship was pigeonholed by Senate Judiciary Committee, asking President not to consider her for recess appointment and stating she prefers to remain on FCC in order "to follow to a conclusion the pending issues which so vitally concern the national interest in the coming years." President Truman picked another candidate for the New York judicial post, wrote Miss Hennock that he considered her "highly qualified" to be a Federal judge and expressing regrets the Senate had not acted on her confirmation.

Continued gearing for theatre-TV hearing Feb. 26 goes on in movie industry. Motion Picture Assn. of America this week announced appointment of former FCC chairman James Lawrence Fly (New York) and Vincent B. Welch (Washington) as counsel. MPAA will carry main burden of film producers' case, while Theatre Owners of America (Marcus Cohn, counsel) will make prime pitch for exhibitors. It's expected hearing will run into months.

Zenith still hasn't filed petition asking FCC to commercialize Phonevision (Vol. 7:38), but stockholders' report issued this week says: "The company will shortly file its petition . . . It expects that the matter will be set for hearing in the near future." Few people at FCC, however, see how Commission can get around to subject soon. After end of freeze, expected during first quarter 1952, theatre-TV appears to be next.

Gene Autry filed suit in Federal Court in Los Angeles this week to restrain Republic Pictures from releasing any of his 65 features to TV—but no trial is expected until Appeals Court rules on Republic's appeal of Roy Rogers case (Vol. 7:42-43). Autry's suit is similar to Rogers'—both reportedly have similar advertising clauses in their contracts—but Autry is also charging Republic with violation of anti-trust laws, Lanham Act prohibiting sale of old merchandise disguised as new, and California State Labor Code. Meanwhile, Screen Actors Guild agreed to postpone for 90 days action on threatened cancellation of its contract with producer Robert L. Lippert for alleged unauthorized release of theatrical pictures made after Aug. 1, 1948 (Vol. 7:36). Postponement followed SAG's agreement with Independent Film Producers Assn., of which Lippert is a member, that no members would release to TV within next 90 days any films made by members since that date.

To keep its shows from going stale, NBC is "going into the vaudeville business, opening a 2-a-day house on Broadway this fall," reports Oct. 31 *Variety*, which gives these details: Theatre will be used as testing ground for TV personalities, materials, sets and properties. Low admission scale will attract all economic brackets—representative of potential TV viewers. "Network's complete stable of stars will play the house in readying their TV material, but basically it's designed [to test] potentially promising talent . . . Joe Bigelow, who has been supervising the scripting on the *Jackie Gleason* show on DuMont, has bowed out and has moved into NBC as coordinator of the entire comedy development project. Meanwhile, negotiations are now on to acquire a suitable theatre."

National Football League, through its attorney, ex-Senator Francis J. Myers, this week petitioned Federal Court to quash govt.'s anti-trust case against it for restricting TV-radio rights to games (Vol. 7:41). Petition contends NFL has never denied the public opportunity to see and hear games on TV-radio, called govt. charges "so vague and ambiguous that it is impossible" for NFL to prepare a defense. Court scheduled hearing on petition Dec. 17 in Philadelphia.

DuMont should have best-seller in new TV booklet *Station Planning*, shortly to be issued. Company says it's "a complete step-by-step outline for management and station engineers . . . fully explains the facilities and function of all equipment [with] complete breakdown for each equipment complement explaining the actual equipment pieces and approximate costs of the various units incorporated in that group." Theme: "Start Small, Grow Big." Heavy ad campaign is being built around booklet.

March of Time's next will be filmed ballet, sports and story-behind-the-news shows, each half-hour series to be syndicated for local sponsorship same as current *Crusade in the Pacific* series (Vol. 7:34). Ballet, now in production, will be out first. Sports series will feature histories of U. S. games, designed to precede seasonal sports events like football, baseball, basketball, etc. News series will be documentaries.

Only application filed with FCC this week was from WLBC, Muncie, Ind. (Donald A. Burton) seeking uhf Channel No. 49. Total on file is now 451, of which 18 are uhf. [For further details, see *TV Addenda 13-Q* herewith; for listing of all applicants, see *TV Factbook No. 13* and Addenda to date.]

TV-radio programming improprieties still very much on his mind, FCC Chairman Coy told NARTB Nov. 1 district meeting in St. Petersburg, Fla.: "I'm going to support the Benton bill until this industry does something itself." Unless industry cleans up improper programs, he said, expect something to be done "in a legislative way."

TELEVISION 'WINS' SOME ELECTIONS: "The real winner in this week's elections was TV," to quote radio commentator Elmer Davis.

Not much doubt now that TV's role in 1952 national campaign will be very, very big indeed -- vastly bigger than in 1948, if only because: (1) there are more stations covering more cities; (2) there are far wider networks -- all the way across the continent now; (3) there are considerably more TV homes.

Presidential candidates may not have to take to the "whistle stops," as did Mr. Truman in 1948, for now there are 108 stations covering 63 areas embracing some 60% of populace (as against mere 42 stations in Nov. 1948). And by this time next year there should be at least 17,500,000 TV homes (against about 1,000,000 then).

Rudolph Halley's political star, said New York Times, was "jet-propelled by TV and his service as chief counsel of the Kefauver crime committee." Elected to New York City's No. 2 job, president of city council, after using TV liberally in campaign, the 38-year-old "owlish-looking, adept attorney and prosecutor was little known until he was projected into millions of homes by TV during the open hearings conducted by the Senate committee in New York," Times related.

Columnist Thomas L. Stokes observed: "A new invention, far removed from the squirrel rifle and coonskin cap -- television -- let millions of people see just who the hoodlums and racketeers were who were exploiting their civic inertia and how these elements were operating with the acquiescence, if not actual connivance, of their own elected officials. Incidentally, this new-fangled picture show made a national character out of the Tennessee Senator."

TV figured in the electioneering in Philadelphia, too, where newly elected Mayor Joseph F. Clark Jr., handsome and telegenic, won on "throw the rascals out" issue, albeit faced by Republican reform candidate Dr. Daniel A. Poling, noted Baptist minister. City's 3 TV stations were much used, leading the Inquirer's WFIL-TV manager Roger Clipp to remark: "Clark's personality appealed to a lot of people who had never seen him. I think the next presidential elections will be won via TV."

It's estimated about $85-$90,000 was spent on TV-radio time (60% for TV) in Philadelphia. Expenditures in New York were doubtless higher, and Halley has been featured regularly as commentator on Schick's "Crime Syndicated" on CBS-TV. There are no figures for other TV election areas like Detroit, Boston, Indianapolis, Columbus, Louisville, Erie.

* * * *

Political pundit Arthur Krock, dilating on New York-Philadelphia elections, put it this way in his New York Times column: "Undoubtedly the issue [crime] was emphasized to the voters by the dramatic agency of TV, with penetrating effects that could not be attained before the arrival of this scientific miracle. But TV is here; it will be employed in political campaigns and investigations from now on..."

What the national politicos seem to overlook, though, are some simple but basic facts, namely: (a) Even in the 63 TV areas, up to half the homes are still

Copyright 1951 by Radio News Bureau

without TV sets. (b) Some 40% of the voters aren't within range of TV pictures yet. (c) In 39 of the 63 TV areas there are only single stations.

But the importance that members of Congress attach to potentialities of TV campaigning is manifest from fact that Senate & House office building "sound rooms", where they make recordings to be sent their home radio stations, are being expanded into "sight-&-sound" studios.

Director Robert J. Coar's self-supporting operation, in fact, has just been authorized by Congress to purchase more cameras and otherwise enlarge facilities to produce "film strips" that can be sent to home stations. Members and their parties' national committee headquarters here pay approximately $25 per 5 minutes of filming.

Senators and Congressmen with constituencies outside TV areas, like so many dealers & distributors shut out of lucrative TV trade by reason of freeze, are sure to have their appetites whetted by seeing what their colleagues can do via TV. This may translate itself, during 1952 session, into intensified interest in hastening end of freeze, now in 38th month and unlikely to thaw in time to bring forth many (if any) new stations or TV areas in time for November 1952 elections (Vol. 7:44).

NO 'ERSATZ' TVs NOW OR IN NEAR FUTURE: You can buy a TV receiver today with full confidence that in your standard-brand "1952 model" you're getting undiminished quality in product, performance and durability.

But what of next year? Will conservation and substitution -- dictated by necessities of the mobilization program -- take their toll in degradation of quality of the TV-radio industry's product?

Looking ahead 6 months, it now seems virtually certain that there will be no significant changes -- no new "conservation circuits" -- in TV sets displayed by dealers during first-half 1952.

Choice of models and brands may be more limited, for there definitely will be fewer receivers available. Conservation will be very much in evidence, but it shouldn't affect picture quality, since the actual circuitry will be virtually unchanged from today's. Nor are conservation measures likely to affect sets' durability, in opinion of industry engineers.

"I wouldn't hesitate to buy a new TV set anytime in the next 6 months," says E.W. Glacy, chief of conservation section of NPA's Electronics Div. And he's one man who ought to know.

One reason why there'll be no skimping on quality in next half year: The TV industry has trimmed its sales; it's thinking now in terms of 4,000,000 sets in 1952 -- 5,000,000 at most. It's not even trying to stretch available materials into more -- but poorer quality -- sets. Materials shortages, of course, get full blame for lowered sights. But TV industry, having burned its fingers once on over-production, would probably be equally cautious were materials plentiful.

* * * *

Materials rations haven't yet conflicted with production goals to noticeable extent; inventories are still high, though they're being sliced steadily by a reawakened buying public (see p. 7).

This doesn't mean TV industry is ignoring conservation. Far from it; from top to bottom, every conceivable materials-saving step is being explored, tested in laboratories. Some of it has been incorporated into current production. But the industry's conservation efforts for present and near-future sets have this aim:

Cutting down on use of strategic materials in non-functional applications that require no major changes in circuitry. Healthy progress has been made.

Immediate aim of component manufacturers is to reduce the scarce materials in their products -- and yet leave them interchangeable with their predecessors. Research toward high-quality mica substitutes exemplifies component conservation progress which degrades neither component nor the set in which it's used. New-type capacitors eventually will save vast quantities of that precious mica, require no changes in wiring or circuitry of TV sets.

Conservation in receiving tubes has perhaps been most outstanding. Aluminum and steel substitutes for nickel are now standard. From all reports, they work just

as well -- and tube industry probably will never go back to pure nickel in applications where these other metals have proven so satisfactory.

Thanks to conservation, it's now unlikely that there'll be any shortage of receiving tubes in first-half 1952, in opinion of industry and govt. executives who should know. There may be spot shortages of one tube type or another, but there are many who think even this could largely be avoided by standardizing tube types.

Industry is leary of doing its own standardizing -- because of the possible anti-trust angles -- but Govt. has no such hesitancy, and its experts are now gathering data for such a project. Govt. would consult electronics industry before it ordered compulsory standardization.

Picture tubes may be due for standardization treatment, too. But first-half 1952 should see continued trend toward larger sizes. And they'll be plentiful.

* * * *

Go to any TV dealer today, and you can see evidence of conservation in new-model TVs, without even removing back from set. Composition board and plastic have replaced rear steel plate and picture tube cup. Knobs are plastic. Metal cabinets are disappearing. Stainless steel is no longer widely used for trim.

Look inside the sets and you'll see very few aluminum or copper-plated chassis. Picture tubes are held in place by cloth webbing. There are fewer metal-coned CR tubes. Hook-up wire is finer gauge, resistor and capacitor leads are shorter.

There are some changes that may not come without govt. orders (Vol. 7:40). Sets still have plenty of metal trim. This is a competitive situation; no set maker wants to take the lead by making his set less attractive -- but it's doubtful if any would be loathe to go along if his competitors untrimmed their sets at same time.

Standardization of lines presents similar problem. There's some sentiment in NPA for limiting number of models any manufacturer may make. For example, Govt. may hold each manufacturer to one table model and one console in 14, 17 & 20-in. sizes only, perhaps coupled with outright ban on TV-phono combinations. NPA assures that no such move is imminent, and that it will get the industry's ideas before it decides on any standardization orders.

* * * *

So-called "new model ban" announced this week by NPA won't bar changeovers in TV industry, despite generalizations to contrary in daily press. Order actually reserves new machine tools almost solely for military and defense-supporting production, doesn't ban use of new dies in existing machines (see Mobilization Notes).

Some materials-saving changes are actually improvements over old designs. Many industry engineers -- and, of course, manufacturers -- hail the new low-voltage electrostatically-focusing picture tubes (Vol. 7:20-21,33-34,40) as such a step. They save copper, cobalt, steel, aluminum, cut manufacturers' costs and are said to produce picture that stays in focus without adjustment.

Some current models use new picture tube, and most TV set manufacturers are expected to come out with it before mid-1952.

Concept of a "utility model" TV with simplified conservation circuits has not been thrown out the window. For discussion of long-range conservation planning and details of TV-radio materials-saving measures, see page 7.

FEE-TV FORCES TALK IT UP & MARK TIME: Subscription TV agitation continues -- though prospects of its coming to head at the FCC are still long way off -- with Paramount Pictures' (Telemeter) promotional activity currently outdistancing that of Zenith.

A 9-page brochure issued by International Telemeter Corp. (50% Paramount-owned), dated Sept. 10, really stirred up the cats among exhibitors. It was later reported withdrawn -- "because it doesn't represent Paramount's views."

Brochure was titled "The Story of Telemeter," described system, said that TV's technical progress has been great, whereas "on the economic side the road has been less rosy"; added that it will be good for movie business; that it will help sports; that it won't eliminate free TV; that it will lower cost of entertainment, etc. Also, that "it will eliminate many of the secondary costs that now go into the

overall cost of entertainment, such as parking, expensive real estate, etc."

That last reason is what got the exhibitors. Film Daily's Chester Bahn editorialized: "What expensive real estate?" Then he told of one important circuit operator who wondered "if perchance theatre real estate was meant."

"He was extremely serious, too," wrote Bahn.

Same exhibitor mused, according to Bahn: "Must be we're not in the motion picture business; only the producers and Telemeter appear to be."

Brochure also anticipated struggle with other subscription TV systems, said that Telemeter is simpler, has no end-of-the-month billing problems, is "the only pay-as-you-see method of subscription TV."

Theatre TV is also talked down. "It calls for substitute products...fights, ball games, etc. on the theatre screen. Theatre TV must pass on to the public the present high overhead of operation..."

That Telemeter folk are working hard is evidenced by fact it has appointed Dr. Louis H. Ridenour, ex-chief scientist of the Air Force, director of engineering. Its Washington counsel is firm of Arnold, Fortas & Porter.

* * * *

Zenith's Phonevision appears to face tough technical hurdles -- perhaps tougher than those of other systems, since it requires phone line to subscriber's home. Illinois Bell System officials have never been too happy about getting mixed up with system -- fearing interference with phone service, worrying about jammed switchboards, wondering about billing and collecting, etc.

Zenith may also expect competitors to claim that Phonevision discriminates against people without phones.

* * * *

Skiatron hasn't yet asked FCC for permission to test its punchcard-operated system in homes, though officials have been to Hollywood recently, presumably seeking top films. In meantime, it has an FCC authorization to conduct technical tests over WOR-TV, New York, for 60-day period started Oct. 16.

RCA remains complete dark horse. Some time back, it announced it had a system -- then said no more about it. Whatever RCA's plans, you can be sure it will seek inside track on anything which could conceivably become important to TV.

* * * *

Others interested in subscription TV include such disparate individuals as retired ad tycoon Raymond Rubicam and James L. Wick, co-publisher of the Niles (O.) Times, Roanoke Rapids (N.C.) Herald, Bogulusa (La.) News, New Iberia (La.) Iberian.

Former supports Sen. Benton, another ex-advertising mogul, by writing in Nov. 3 Saturday Review of Literature: "Radio...has come nowhere near serving the American people as well as it ought to have served them. I am convinced that a large part of the reason lies in the domination of radio by the advertisers." The cure, he says, lies in subscription TV and channels reserved for education.

Publisher Wick isn't concerned with sociology -- just competition. He warned Oct. 16 meeting of Inland Daily Press Assn. in Chicago that "today, there is little local TV advertising," but when proper techniques are worked out, "you can imagine the volume of local advertising that will develop." He urged newspapers to lobby for subscription and theatre TV to forestall "the horrible punishment inflicted by TV upon some motion picture theatres in TV cities."

* * * *

When FCC begins theatre hearing, scheduled for Feb. 26, subscription TV could possibly be consolidated with it. One commissioner thinks theatre TV "might be cleaned up in a week." Others say "months -- it's another color TV hearing."

First Sylvania Awards in TV fields (bronze and crystal plaques designed by Norman Bel Geddes) omitted "grand award" because judges found no program measuring up to its concept of "truly outstanding entertainment" —but other grants went to: WPIX, New York, for coordinating pool carrying Kefauver hearing telecasts; WDSU-TV, New Orleans, first to carry Kefauver telecasts; *Meet the Press*, best public service program; *Zoo Parade*, best program suitable for children; *Your Show of Shows*, best revue, along with Max Liebman as best director, and Sid Caesar & Imogene Coca as best actor and actress; John Daly, for excellence as moderator; *Fireside Theatre*, best use of film on TV, along with its director Frank Wisbar and writer Arnold Belgard.

Personal Notes: William Phillipson, who went from ABC legal staff to asst. director of TV programming and operations, named director of ABC-TV Western Div., succeeding Frank Samuels, in shakeup announced by president Robert Kintner this week; Gayle Grubb, KGO & KGO-TV gen. mgr., upped to v.p.; Amos Baron named mgr. of KECA; Philip G. Hoffman, ex-KOB & KOB-TV, named mgr. of KECA-TV . . . Charles G. Mortimer III, ex-CBS-TV, joins ABC-TV as asst. to Charles Underhill, TV program director . . . Mary Alice Connell, ex-DuMont, succeeds Emily Clark, resigned, as mgr. of ABC-TV spot sales service dept. . . . Sylvester (Pat) Weaver, NBC-TV v.p., elected to board of directors . . . Ludwig Simmel, ex-ABC, joins NBC to head new dept. handling cooperative programs . . . Norman E. Cash resigns as NBC station relations director to join Crosley Broadcasting Corp. Nov. 19 . . . Hugh Higgins, ex-BAB, joins CBS radio as marketing counsel, replacing Ed Shurick, who moves into TV sales . . . William Dozier, Hollywood film man who joined CBS-TV last month, named head of new dept. to search for new talent and program ideas . . . John Bradley promoted to sales mgr., KHJ-TV, Los Angeles, succeeding Kevin Sweeney, now with BAB . . . Fay Day promoted to research mgr., CBS-TV spot sales . . . Hal James, TV-radio director, Ellington & Co., named v.p. . . . Norman S. Livingston, ex-Roy Durstine Inc., joins Serutan Co. as TV-radio director . . . Mrs. Fanney N. Litvin, FCC examiner, who recently lost her husband, Dr. Philip Litvin, in a Montana drowning accident (Vol. 7:34), taking 2-month leave of absence starting in December . . . Wm. T. Stubblefield, ex-Associated Program Service, appointed NARTB station relations dept. director, taking over Dec. 1 . . . Douglas MacLatchie promoted to Eastern sales mgr., TV div., Petry, which has also added to N. Y. sales staff Herbert C. Watson, ex-ABC; James C. Richdale Jr., ex-WNAC-TV; LeGrand S. Redfield; to Chicago staff, Charles Pratt, ex-WOR-TV; St. Louis, Richard W. Hughes, ex-WHAS-TV.

Station Accounts: Best of kind for TV commercial staffs are capsule case histories under heading "TV Results" in *Sponsor Magazine*, whose current issue relates success stories for these accounts: Circus Foods Inc. (peanuts), *Food for Thought* on KNBH, Hollywood, thru BBDO; Bosco Co. (milk amplifier), *Uncle Jake's House* on WEWS, Cleveland, thru Robert W. Orr; Prior Tire Co., *Hopalong Cassidy* films Sat. afternoons on WSB-TV, Atlanta, direct; Dolly Adams Syrup Punch, partic. in *Cooks' Corner* on KFI-TV, Los Angeles, thru Barton A. Stebbins; Royal Crest Sales Co. (dinnerware), films when ball games rained out, on WPIX, thru Product Services Inc.; Olin's Inc. (used cars), boxing on WTVJ, Miami, direct; Ready-to-Paint Furniture Store (unpainted furniture), partic. on *Fix It Shop* on WFMY-TV, Greensboro, direct . . . Among accounts reported by WFIL-TV, Philadelphia: Bonne Bell Inc. (cosmetics), thru John Yezbak & Co., Cleveland; Golden Guernsey Inc. (dairy products), thru Badger & Browning & Parcher, Boston; Helbros Watch Co., thru Ray-Hirsch Co., N. Y.; Medusa Portland Cement Co. (cement paint), thru Will Inc., Cleveland; National Selected Products Inc. (7-Minit pie mix), thru Duane Jones, N. Y.; Pennsylvania Greyhound Lines, thru Beaumont & Hohman, Cleveland; Tasty Baking Co. (Tastykake & Tastypie), thru Parkside Adv., Philadelphia . . . WCAU-TV, Philadelphia, reports following accounts: Joanna-Western Mills Co. (window shades), thru George H. Hartman Co., Chicago; Maltex Co. (cereals), thru Samuel Croot Co., N. Y.; Mrs. Schlorer's Inc. (mayonnaise), thru Lavenson Bureau of Adv., Philadelphia; Mrs. Smith's Pie Co., thru Everling Associates, Philadelphia; Soil-Off Co. (paint cleaner), thru McCann-Erickson, San Francisco . . . Singer Sewing Machine Co., using TV for first time on NBC-TV *Kate Smith Show* Tue. 5:45-6, likes on-the-air advertising so well it's also going into radio heavily in non-TV areas, thru Young & Rubicam . . . Chicago's WBKB has Ernie Simon, who has handled man-on-the-street telecasts, readying 10-10:30 a.m. participating show, a la Tom Breneman's famed radio show, from Isbell's Restaurant, on North Side, to be extended to 9:30 a.m. if sponsorships warrant . . . Atlas Brewing Co. sponsoring *Michigan Outdoors*, sports newsreel, on State stations, thru McCann-Erickson, Detroit . . . Among other advertisers reported using or preparing to use TV: Tidy House Products Co. (Perfex cleaners, starches, bleaches), thru Buchanan-Thomas, Omaha; Liquinet Corp. (Liquid hair net), thru A. Martin Rothbardt Inc., Chicago; I. J. Grass Noodle Co. (noodles, soup mix), thru Charles Silver & Co., Chicago (WPTZ); Seeck & Kade Inc. (Pertussin cough remedy), thru Erwin, Wasey & Co., N. Y. (WPTZ); Mystik Adhesive Products (Mystik tape), thru George H. Hartman Co., Chicago; Cedergreen Frozen Pack Corp. (Cedergreen frozen foods), thru Bozell & Jacobs, Seattle; Arnold Schwinn & Co. (bicycles), thru J. Walter Thompson, Chicago; Christmas Club, A Corporation, thru Brooke, Smith, French & Dorrance, N. Y. (WTVJ); Schneider-Lorscheider Co. (Big Stinky outdoor fly trap), thru Barnes Adv. Agency, Milwaukee.

Network Accounts: Only network "repeat" for West Coast yet is Oldsmobile's *Douglas Edwards & The News* on CBS-TV, Mon.-thru-Fri. 7:15-7:30 p.m., done again live for Pacific audience at 11-11:15 EST so it can be carried in West 8-8:15 PST; extra cost said to run $5000 a week, mainly talent, added to regular budget of $10,000 . . . M & M Ltd. (candy) reported readying sponsorship Jan. 6 of *Candy Carnival* on CBS-TV, Sun. 12:30-1 p.m., thru Wm. Esty . . . Kaiser-Frazer Nov. 4 moved from DuMont to ABC-TV, Sun. 7:30-8; show titled *Adventures in Mystery* will fill-in until *Ellery Queen* starts again Dec. 9, thru Wm. H. Weintraub, N. Y. . . . Rosefield Packing Co. (Skippy peanut butter) Dec. 10 starts sponsorship of West Coast show *You Asked for It* on ABC-TV, Mon. 9-9:30 EST, thru Guild, Bascom & Bonfigli, San Francisco . . . Holeproof Hosiery Co. sponsors finals of *Miss U. S. Television* contest Dec. 5 on DuMont, Wed. 10-11 p.m., thru Weiss & Geller, Chicago . . . Larus & Brother Co. (Holiday cigarettes) sponsors Thanksgiving Day *Detroit Lions-Green Bay Packers* football game on DuMont, Thu. Nov. 22, beginning at noon . . . Motorola sponsors *Shrine East-West* football game from San Francisco Dec. 29 on DuMont, Sat. 4:30 p.m. EST, thru Ruthrauff & Ryan . . . Industrial Tape Corp. (Texcel cellophane tape) shares sponsorship of *Rocky King, Detective*, with American Chicle Co. starting Nov. 18 on DuMont, Sun. 9-9:30, thru Kenyon & Eckhardt . . . Frigidaire reported readying sponsorship of *Pulitzer Prize Playhouse* on ABC-TV, alt. Wed. 9-10, starting Dec. 19; dramatic show will alternate with *Celanese Theatre*.

Return of concept of specialized broadcasting stations is indicated by formation of new joint sales organization to be known as "Good Music Broadcasters" sparked by Norman S. McGee, sales v.p., WQXR, New York, and Raymond D. Green, WFLN, Philadelphia. Other stations in group: WXHR, Boston; WWIN, Baltimore; WGMS, Washington; WEAW, Chicago; WEW, St. Louis; KIXL, Dallas; KFAC, Los Angeles; KSMO, San Francisco. New firm will also represent Rural Radio Network, mainly New York and Pennsylvania FM stations, plus WFMZ, Allentown, Pa.; WBIB, New Haven, Conn.; WSNJ, Bridgeton, N. J.

FCC engineering personnel losses in recent months include quite a few from Safety & Special Radio Services Bureau: Wm. Dulin & George Ikelman, to NPA; George Boardman, Frank Cook, A. Albert Mantwilla & Edward McDermott, to military services; Robert Crain, to Lear Radio; Frank W. Cook, to Civil Defense Administration.

ENORMOUS EFFORT being expended by NTSC on compatible color standards is very well known among those doing the work, but group has yet to make industry and public in general fully understand its activities.

Perhaps it's preoccupation with research; perhaps it's supercaution with regard to FCC; perhaps it's simple lack of time.

For the technician, October *Proceedings of the IRE* (Vol. 7:43) was a monumental, probably adequate effort. For the layman, an excellent start has been made with 7-page description of compatible system prepared by NTSC Panel 12 (system analysis).

[Note: Copies of former are available from IRE, 1 E. 79th St., New York, latter from Dr. W. R. G. Baker, chairman, NTSC, c/o General Electric Co., Electronics Park, Syracuse, N. Y.]

But some unheralded work going on is truly remarkable. For example:

(1) One manufacturer has shown color set, "with excellent pictures," using less than 40 tubes, compared with 54 in sets shown by RCA.

(2) Under severe interference conditions, with very weak signals, color pictures have held sync even better than black-&-white sets alongside.

(3) Myth of the "1/11,000,000 second," which worried FCC so much when it turned down RCA system, has been completely blasted—largely by color phase alternation, formerly called oscillating color sequence or flip-flop.

RCA, incidentally, is now colorcasting with NTSC standards, including 3.89-mc color carrier. Company points out that switchover took only matter of hours.

* * * *

Dual standards were again suggested by RCA's chairman David Sarnoff in interview in Nov. 9 *U. S. News & World Report*. "While we don't think that having dual standards is the ideal solution," he said, "we do think that letting the public choose which is the best standard is the ideal solution."

"Universal receiver," which could receive both CBS and compatible systems, has been made experimentally, he said, "and I am confident it can be made commercially." Gen. Sarnoff thought it might cost 15% more than single-standard set.

"This additional cost . . . would not be justified normally. But, in this situation, you have a condition where there's controversy and doubt—let me assume sincere doubt —so why not let the public see both and decide?"

* * * *

FCC Chairman Coy hasn't changed his mind much about the industry, apparently. In Nov. 4 talk to National Assn. of Educational Broadcasters in Biloxi, Miss., he said:

"The growth of color has been delayed by the request of the director of the ODM to CBS to suspend its plan for the mass production of TV receivers in order to conserve critical materials.

"Significantly, Mr. Wilson did not need to address his letters to other manufacturers inasmuch as they, by a common pattern of ridicule and lack of selling efforts and promotion of color in television, had decided that the American public should not have opportunity to enjoy color TV except on a basis and at a time to be determined by the industry. It is now clear that we will have color in TV.

"Color can no longer be kept underground as it has been for many years by the recalcitrance of those who put their private interests ahead of public interests. The director told an industry conference that his request was in no way designed to discourage research and development of color TV."

Telecasting Notes: Higher daytime radio rates, to offset losses in revenues caused by TV inroads and by recent network rate cuts, are reported as "definite national trend" by Nov. 10 *Billboard*, which says trend "is beginning to snowball, particularly in areas where TV has hurt nighttime business" and lists dozen AM stations which in recent weeks have hiked morning or afternoon time charges, or both . . . NBC radio affiliates have received complete prospectus of Economic Study proposals (Vol. 7:40), is understood to be conferring now with individual stations regarding network rate adjustments, time clearances, etc.—with nobody very happy about radical departures, to be main topic of NBC affiliates convention at Boca Raton, Fla., Nov. 28-Dec. 1 . . . Proof that AM isn't losing ground, at least among rural audience, is cited by Crosley v.p. Robert Dunville in survey showing farmers in WLW area have increased listening 8% over 1950 and 10% over 1949 . . . Salt Lake City's KSL-TV, owned by Mormon Church, which has rule against beer advertising, reported to have been persuaded by CBS to clear time for Pabst's *Amos 'n' Andy*, Schlitz's *Playhouse of the Stars*, Budweiser's *Ken Murray Show* . . . KING-TV, Seattle, sending news editor Charles Herring, with cameraman Wallace Hamilton, on month's tour of European Military Air Transport Service bases, his *Overseas Report*, sponsored by National Bank of Commerce, to be shown every Tue. 7:45-8 p.m. . . . NBC-TV signs Ralph Edwards, creator-owner of *Truth or Consequences*, to new 5-year contract, said to total $6,500,000, for new *Ralph Edwards Show* starting Mon.-thru-Fri. 12:30-1 p.m. . . . Good reading for those who remember Paul Porter as one of the superior chairman of FCC: Article titled "Arnold, Fortas, Porter and Prosperity" in November *Harper's* . . . WMAR-TV, Baltimore, Dec. 1 raises base hour rate from $700 to $800, one-min. $125 to $150.

IN JARGON of show business, which it chronicles so well, *Variety* Oct. 31 carries this characteristic but significant observation: "Thousands of Hollywoodites are rapidly recovering from pernicious economic anemia as a result of a steady dose of televitamins over the last year. The cure has benefited the patients to the tune of a $10,000,000 payroll and has been so effective that the ailment's chief symptoms — large-scale unemployment — have largely disappeared."

In other words, TV is taking up the slack in movie payrolls, providing lots of jobs, according to *Variety*. And the $10,000,000 payroll is just a starter, for more big producers (it names Monogram, Universal, Republic) are going into films-for-TV. Meanwhile, guild-union employment rolls are up 15-60% from last year, and there's even a shortage of cameramen and cameras.

Then, in leading article in Nov. 7 *Variety*, this novel bit of reasoning on movies vs. TV argument: "Hollywood will have nothing to fear from TV 'for easily 4 or 5 years,' says Metro [M-G-M] production veepee Dore Schary. 'That's how far away large-screen TV is for home consumption.'" Mr. Schary says majority of sets in hands of public are 10 & 12-in., therefore: "As long as there's such a preponderance of small screens in the home, TV will never be able to approach the scope of Hollywood." He expects it will take 5 years for 16-in. or larger sets to outnumber smaller screens.

What seems amazing is not so much that Mr. Schary's information on screen sizes is completely wrong in the first place, but that he hinges so much on picture size. He also puts comparison on basis of money spent, saying a TV network is putting out $1,000,000 weekly, whereas Hollywood spends $6,000,000 weekly—and a TV show may run $100,000, compared with $5,500,000 movie "blockbuster."

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
November 10, 1951

PRICE HIKES NEXT? TRADE HOLDING FIRM: Lots of talk about TV set price increases in the air -- now that inventories are moving nicely and current production is limited by materials restrictions. But only Sylvania has formally posted price hikes as yet, very slight (Vol. 7:43), which it says haven't slowed retail sales a bit.

"Level of normalcy" apparently has come to the TV trade, though it isn't an old enough business yet to know what's really normal -- and certainly comparisons with last year's "feast" or the recent spring & summer "famine" aren't fair.

What's happening is aptly put by RCA Victor's home instrument dept. v.p.-general manager Henry P. Baker: "Business is conservatively strong," said he, "just where it should be to be most effective -- at the consumer level. As far as we're concerned, it's exceedingly strong. We're shipping all we can make."

That's about what the other major producers will tell you, too. The recent cries of distress among wholesaler-retailers have all but subsided.

Trade statistics continue favorable. Week ending Nov. 2 saw 107,361 TVs produced (only 427 private label), about same number as preceding week (Vol. 7:44). That brings total for first 5 weeks of fourth quarter to just over 500,000. Factory inventories fell about 17,000 units to 337,499, nice drop from Aug. peak of 768,766.

Week's radio output was 203,777 (8628 private), about 18,000 down from the preceding week, with factory inventories totaling 331,688, only 4000 down. Radios were 117,574 home receivers, 19,687 portables, 66,516 auto.

NEW RULES PERMIT PRICE CEILING BOOSTS: TV-radio and other electronic equipment and parts manufacturers can get higher price ceilings -- along with manufacturers in many other industries -- as result of this week's revision of 2 OPS regulations.

Don't expect big price hikes soon stemming from new price rule. But it does clear way for substantial increases when materials pinch forces costs up, slashes profit margin per set (see story above). Many TV-radio manufacturers' list prices, incidentally, are still below the old price ceiling levels.

Manufacturers may now adjust ceiling prices to reflect cost increases from pre-Korea to July 26, 1951, as voted by Congress when it approved Capehart Amendment to Defense Production Act. TV-radio and most components manufacturers are covered by CPR 22; transmitters, industrial electronics, etc. come under CPR 30.

All manufacturers who haven't yet computed ceilings under CPR 22 or 30 must do so by Dec. 19 under new rules. Those who already have filed under those orders may calculate their ceiling price adjustments now or at any time in future, and use the new ceilings as soon as OPS has received their applications.

Any price increases resulting from new ceilings will be passed along to the public, since Herlong Amendment to Defense Production Act guarantees wholesalers and retailers their customary percentage markups.

Capehart and Herlong ceiling hikes will also be reflected in the tailored ceiling regulations for TV-radio industry (Vol. 7:43), now in the mill, to replace CPR 22. Special regulations permitting ceiling price boosts for such services as TV-radio repair shops are now in preparation.

CONSERVATION—SOME LONG-RANGE FACTORS: No "ersatz" TVs now or in near future -- as we note in article on page 2 -- but beyond mid-1952, what? Prospects are that:

If materials squeeze stiffens -- and there's no convincing reason to believe it won't -- and if demand for TV sets is high, mobilization factors may dictate real changes in concept of TV design.

Some stern voices in govt. production agencies warn the TV-radio industry: Prepare for the worst, or you may get stuck.

"They'd better start planning on making radical changes," one of them told

us this week. He conceded that many big manufacturers have new super-conservation circuits and designs on the testing bench, and added:

"Planning, designing and testing major changes takes 6 months to a year or more. The day may come when an 'ultra-conservation' model may be a life-or-death matter. Now's the time to begin working on those 'impossible' jobs. It's better to have one ready and not have to use it than face the choice of shutdown or putting an untested hurry-up model on the market."

Obviously, major companies are constantly readying standby models as a sort of "insurance"; a real TV set shortage could spur these into production. Looming large in their designing plans are these facts about critical metals:

Aluminum and steel will be seriously short for at least another year. But copper will remain desperately tight for 2-5 years, and will pose tough shortage problem as far ahead as anyone can now foresee.

* * * *

Industry's big challenge is to lessen substantially its heavy dependence on copper -- permanently. No magically interchangeable material has been discovered, but aluminum holds most promise of relieving some drain on nation's copper supply. Said DPA-NPA boss Manly Fleischmann:

"If I were a manufacturer using great amounts of copper, I'd have my design people looking into aluminum."

And that's what electronics design people are doing. Transformer engineers are working with success to improve wartime German technique of using square aluminum wire for windings. Aluminum hook-up wire is being tested. Biggest obstacles: aluminum wire has 50% more resistance than copper, is more brittle in some forms, is hard to solder. But these problems are all being overcome.

A few other measures now being used or planned by electronics industry to save copper and other strategic materials:

Power transformers can practically be eliminated by use of selenium rectifiers in voltage-doubler circuits. Unfortunately, selenium is scarce, too, but NPA is planning to put it under 100% allocation, reserving some for TV-radio industry.

Every pound of selenium used in TV manufacture saves average of 185 lbs. of silicon steel (transformer core), 35 lbs. of copper (winding).

Power transformers that operate at higher temperatures are being developed. They're smaller, use less copper, less steel.

Power cords made from copper-clad steel are in the works, would save up to two-thirds the copper formerly used for this purpose. One problem here, as in some other copper-saving plans, is getting Underwriters Laboratory to approve changes.

* * * *

Conservation clearing house for electronics industry is the NPA Electronics Division's conservation section, headed by E.W. Glacy. Section wants to hear manufacturers' materials problems. Aside from supplying a shoulder to cry on, Glacy's section gives advice on conservation, substitutes, design problems.

These NPA experts are equipped to supply answer to this chicken-or-the-egg question about substitution: If I switch to a substitute material, is the substitute likely to become short in a few months and leave me worse off than before?

Section wants information from manufacturers on their conservation measures. It will be kept confidential if requested, but NPA would rather pass it on to others who may benefit from it.

NPA keeps track of major conservation moves by checking manufacturers' controlled materials requirements as stated in their quarterly CMP applications.

If a manufacturer's stated requirements for a certain material take sudden unexplained drop from one quarter to next, Electronics Div. engineer hops on phone, asks him: "How did you do it?" Manufacturer is usually glad to reveal technique, and NPA people pass the good word along to others.

Likewise, if a manufacturer's requirements for any material are way out of line with rest of industry, NPA suggests substitutes or conservation techniques with this clincher: "We know it can be done, because XYZ Corp. does it."

Financial & Trade Notes: Despite lowered radio time rates and its costly color campaign, CBS consolidated income statement released Nov. 7 shows that gross income for the 39 weeks ended Sept. 29 rose to $119,731,379 from $85,946,982 for same 1950 period. Net earnings were $3,532,666 ($1.81 per share) vs. $2,670,783 ($1.56) in same 1950 period. Provision for Federal income taxes was $5,250,000 vs. $3,630,000.

Good business of subsidiary Columbia Records Inc., plus growing TV revenues, account in part for improved CBS showing. Figures for the 39 weeks of 1951 include operations of Hytron group (tube and receiving set subsidiaries) since acquired June 15. Thus earnings per share of 1950 period were calculated on the 1,717,352 shares outstanding of Sept. 30, 1950, while for the 1951 period they were calculated on 1,956,003 shares, being average number outstanding for the 39 weeks ended Sept. 29, 1951. Actual number outstanding on such date was 2,337,844, which includes 620,492 issued on acquiring Hytron.

* * * *

Financial Miscellany: Arvin Industries net profit was $2,262,941 ($2.54) for first 9 months of this year vs. $2,587,417 ($2.90) same period last year; September quarter profit was $549,466 (62¢) vs. $932,564 ($1.05) . . . Decca Records reports $401,793 profit (52¢) for 9 months vs. $553,814 (71¢) . . . Gabriel Co. profit for 9 months was $353,625 (63¢) vs. $611,513 ($1.79); September quarter was $62,155 (11¢) vs. $248,384 (73¢) . . . Belden Mfg. Co. 9-month profit was $891,298 ($2.78) vs. $1,121,043 ($3.49) . . . Globe-Union 9-month net profit was $1,105,967 ($1.65 a share) on sales of $29,438,070 vs. $1,984,747 ($3.10) on $27,184,041 year ago . . . Corning Glass net income was $7,899,163 ($2.88 a share) on sales of $88,165,104 for 3 quarters to Oct. 7 vs. $12,298,352 profit ($4.58) on $80,334,313 sales for corresponding 1950 period . . . Capitol Records net was $477,737 (88¢ a share) on sales of $13,243,844 for 12 months ended Sept. 30 vs. $280,023 (42¢) on $12,660,372 for preceding year . . . General Precision Equipment Corp. net was $124,048 (21¢ a share) on sales of $6,950,481 during Sept. quarter vs. $299,438 (50¢) on sales of $7,408,149 same period last year.

Motorola's net sales for 9 months ended Sept. 29 fell to $100,194,572 from $124,707,267 for same 1950 period, due to decreased TV demand and third quarter's "sizable liquidation of excessive inventories in dealers' hands [now] practically accomplished," according to president Paul V. Galvin's report to stockholders. Profit was $5,327,442, or $6.06 per share on 879,605 shares outstanding, compared to $8,063,093 ($9.17) same period last year. Taxes were $5,499,087 for 1951 period, $8,021,274 for 1950 period. Third quarter sales were $26,744,728, down from $54,142,879 same 1950 quarter; profit before taxes was $1,808,592, compared to $7,587,989.

Dividends: Magnavox, 37½¢ payable Dec. 15 to stockholders of record Nov. 24, 25¢ quarterly pfd. payable Dec. 1 to holders Nov. 15; Standard Coil Products Co., 25¢ payable Nov. 15 to holders of Nov. 5; Westinghouse, 50¢ payable Dec. 1 to holders Nov. 9; Aircraft Radio Corp., 10¢ payable Nov. 19 to holders Nov. 8; Belden Mfg. Co., 40¢ payable Dec. 1 to holders Dec. 17; Tung-Sol, quarterly 25¢ and extra 25¢ payable Dec. 1 to holders Nov. 19; CBS "A" & "B," 40¢ payable Dec. 7 to holders Nov. 23; International Resistance, 10¢ payable Dec. 1 to holders Nov. 15; Television Electronics Fund Inc., 15¢ payable from income, 45¢ from capital gains, payable Nov. 27 to holders Nov. 16.

The $150,000 sale of WCOP (AM & FM), Boston, to T. D. Baker Jr. & A. G. Beaman, partners who own WKDA, Nashville, was announced by Cowles Broadcasting Co. this week. Station is on 1150 kc, 5000 watts. Deal was handled for Cowles by New York broker Howard E. Stark.

UNLIKE VICTOR and Columbia Records, which enjoy intimate corporate ties with NBC and CBS, big rival Decca has no "in" on fast-moving TV, nor even on the transcription side of radio—which may have been one of impelling reasons why it bought into Universal Pictures Co. this week. Purchase of 271,900 out of 960,048 outstanding shares of Universal, about 28%, makes it largest stockholder in film firm.

Trade ties up Decca's TV ambitions with Universal's recent announcement that it was going into film production for TV in big way through its United World Films.

Whatever the virtual "merger" may betoken in way of trends, fact is that Decca-Universal tieup is bound to be important in recording and entertainment worlds. Second largest Universal stockholder is J. Arthur Rank, who has never had any qualms about releasing films to TV. Decca people are said to be seeking to buy his 134,375 shares, also hold 32,500 warrants for added stock purchases.

Decca's subsidiaries are Brunswick Radio Corp., Coral Records Inc., Compo Co., and Decca Distributing Corp. (48 branches). Its capitalization consists of 1,500,000 shares of common, of which 776,650 are outstanding, and its president is Milton R. Rackmil. Last year it grossed about $21,500,000, showed net profit of slightly over $1,000,000; first 9 months of this year its net was $401,793 after $414,030 taxes.

Universal's 1950 fiscal year showed net profit of $1,300,000 on gross of $55,590,000; for the 39 weeks ended July 28, net was $1,127,182 after taxes of $1,675,000 on $44,033,789 sales. Nate Blumberg is Universal president.

Note: Columbia Pictures, reporting net of $1,497,814 for fiscal year ended last June 30 vs. $1,981,488 preceding year, tells trade press TV represents "a challenge which can only result in a more dynamic film industry that should produce more than ever the kind of pictures that will enhance the moviegoing habit." Columbia is in TV via its Screen Gems Div. (Vol. 7:35).

Monogram this week announced new TV subsidiary will be known as Interstate Television Corp., headed by Ralph Branton, formerly with A. H. Blank's big Tri-State theatre chain, promised first TV series starring George Brent in *Raffles*. Republic, remodeling Hollywood studios for TV production, has earmarked budget of $1,000,000 for more stage space and to finance first TV films, including series *Commando Cody, Sky Marshal of the Universe.*

* * * *

"Unless the majors suddenly open their vaults," states *Variety*, "there are few more old features in prospect for TV. It has pretty much chewed up the independent U. S. and British product. Result is that the time now filled by films dredged out of the vaults will gradually be taken over by pix specially made for video. They will almost all be of half-hour length, however, rather than full features. Latter are still much too expensive to make for tele." Top average income for a feature released to TV is said to be $50,000 gross, a few reaching $75,000 (though new stations "post-freeze" may make future rentals all velvet). "There are very few additional [feature] pictures of any merit left—even on TV standards," says *Variety*.

Nationwide theatre-TV network is reported aim of new Theatre TV Authority, incorporated in Sacramento, Cal., with capitalization of $100,000. Managing director Kenneth E. Wright says his firm hopes to start local theatre-TV network, eventually expand to regional and national service. He says company wants to help theatres get TV equipment, even if it means direct financing.

Biggest hotel TV installation job yet is Waldorf-Astoria's 2500-receiver setup just completed by Master Video Systems Inc. Equipment is RCA's Antennaplex, may also be used for closed-circuit programs within hotel.

Topics & Trends of TV Trade: A "small business" in TV-radio industry is one employing 750 or less. That's govt.'s new definition for official use in its small business programs, military procurement policy, etc., as outlined in new definitive listing of 452 industries. The 750-employe limit is same one applied to industry by RTMA small business committee (Vol. 7:38).

Until Commerce Dept. released list this week, Govt. had arbitrarily classed all firms with 500 workers or less as small business. In new listing, definition of small business ranges from 100 to 2500, depending on pattern within each industry. These small business classifications are among those listed in "electrical machinery" category: Electrical appliances, 500; communication equipment, 400; electrical measuring instruments, 750; phonograph records, 300; telephone & telegraph equipment, 2500; transformers, 1000; electronic tubes, 750.

Note: Small Business Conference at 10 a.m., Wednesday, Nov. 14, will be one of highlights of RTMA's 3-day industry conference in Chicago's Hotel Stevens, Nov. 14-16. RTMA president Glen McDaniel and small business committee chairman A. D. Plamondon Jr. (Indiana Steel Products) will report on program to increase subcontracting of large military orders. Meanwhile, in Washington, new Small Defense Plants Administration is shaping up under direction of Telford Taylor who this week appointed John E. Horne deputy administrator and James M. McHaney general counsel. Horne has been assistant to Sen. Sparkman (D-Ala.), chairman of Senate Small Business Committee; McHaney is Little Rock, Ark. attorney who served under Gen. Taylor during Nuremberg war crimes trials.

* * * *

Motorola adds 14-in. "portable" at $199.95 to line, in wood cabinet covered with tan simulated leather and equipped with dipole antenna. Other new sets: 20-in. mahogany table $279.95, blonde $299.95; 20-in. mahogany console $339.95, blonde $359.95; 17-in. mahogany combination $399.95. All prices include excise tax, all sets available with built-in uhf tuner unit at $40 added, or uhf channel adapter can be purchased as accessory for $49.95.

TV "$1 sales" came under Federal Trade Commission scrutiny this week. FTC charges newspaper ads of Electrical Center, Washington retailer, falsely state that any purchase of TV, radio or appliance at regular price entitles customer to buy another article "of same kind and value" for an additional dollar. FTC says the $1 articles were of "much less value and price than the ones purchased at regular price." Hearing is scheduled Dec. 18 in Washington.

Philadelphia Electrical Assn. reports that, in area covered by Philadelphia TV stations, 141,200 TVs (18 major brands) were sold at $46,817,270 retail value (not including installation) during first 9 months of 1951 vs. 265,885 valued at $73,858,067 same 1950 period, down 37%. Average 1950 price was $347 per set, 1951 price $331. Improvement in sales was indicated by fact they were down 47% in September from same month last year, whereas they were down 78% in August, 82% in July.

Canadian RTMA reports 24,643 TVs sold for $13,035,118 during first 9 months of 1951, inventories totaling 17,936 units as of Sept. 30. Toronto-Hamilton area took 38% of nine months sales, Windsor 37%. September sales jumped sharply, with 3286 units sold for $1,726,977, compared with 964 in August (Vol. 7:41); Toronto-Hamilton area took 51% of Sept. sales, Niagara Peninsula 22%. Over-all cumulative total (from start of count) came to 62,466 valued at $29,311,701.

Mallory offers all-channel uhf converter, built around continuous "Inductuner," in ads playing up fact that it "can be connected to *any* TV receiver—by the owner, easily, in a matter of minutes."

Trade Personals: Lt. Gen. Harold L. George, ex-chief of Air Transport Command, now v.p. & gen. mgr., Hughes Aircraft Co., major electronics contractor which recently joined RTMA, has been invited to sit in with RTMA board at meeting Nov. 16, windup of Nov. 14-16 industry conference at Hotel Stevens, Chicago . . . L. E. Osborne, Westinghouse v.p. in charge of manufacturing, named to new post of executive v.p. in charge of defense products; Tom Turner, labor relations v.p., adds Mr. Osborne's former manufacturing duties . . . Robert T. Pennoyer, mgr. of GE's Buffalo tube works, named mgr. of new tube dept. advanced manufacturing section in Schenectady, succeeded at Buffalo by Harry R. Hemmings, CR purchasing supervisor at Syracuse . . . Samuel Olchak, onetime Tele-tone sales v.p., joins Tele King as asst. sales mgr., quitting similar post at CBS-Columbia Inc. . . . Herbert F. Koether, ex-Chicago regional and zone mgr. for Crosley, named to newly created post of mgr., radio sales section, Cincinnati, succeeded by R. L. Baker; Harry E. McCullough continues as mgr., TV sales section . . . Lawrence O. Paul, ex-Armour Research Foundation, named to newly created post of operating mgr., engineering dept., Oak Mfg. Co. . . . T. R. Meyer, from Vineland (N. J.) plant, promoted to director of quality control dept., Kimble Glass Div., Owens-Illinois, Toledo . . . David Gnessin, Ohio field man, promoted to sales mgr., Transvision Inc. . . . C. J. Luten named editor of *Sylvania News*, succeeding Robert A. Penfield, promoted to adv. & sales promotion supervisor . . . Robert Hertzberg, prominent in technical magazine field, has opened public relations offices at 2512 Eighty-fourth St., Jackson Heights, N. Y., initial clients being Insuline Corp., Hudson Radio, Transmitter Equipment Mfg. Co. . . . Milton Klein named mgr. of operations dept., KLAC-TV, Los Angeles, handling all commercial traffic, Jack Miller becoming promotion-merchandising director.

IRE 1951-52 election results: Dr. Donald B. Sinclair, chief engineer of General Radio Co. and guided missles expert, president; Harold L. Kirke, BBC asst. chief engineer, v.p.; and directors John D. Raymond, head of electrical engineering dept., U of Illinois; Ernst Weber, head of electrical engineering dept., Brooklyn Polytechnic Institute; Glenn L. Browning, president, Browning Laboratories; Irving G. Wolff, RCA Laboratories; Karl Spangenberg, Stanford U; Alois W. Graf, Chicago patent attorney. The 1952 Zworykin TV prize goes to B. D. Loughlin, Hazeltine, and Morris Liebmann Memorial Award to Dr. William Shockley, Bell Labs, to be presented at annual dinner March 5 in New York's Waldorf-Astoria.

NEDA president George Wedemeyer names following committee chairmen: W. D. Jenkins, Radio Supply Co., Richmond, tube div.; L. W. Hatry, Hatry & Co., Hartford, capacitors, resistors, vibrators, volume controls; V. N. Zachariah, Zach Radio Supply Co., San Francisco, transformers, reactors & coils; Anthony Dybowski, Dymac Inc., Buffalo, replacement speakers, microphones, sound equipment accessories; Al Steinberg, Albert Steinberg & Co., Philadelphia, wire, antennas & accessories; Byron C. Deadman, Northern Radio & Television Co., Green Bay, Wis., tools, metals, chemicals & plastics; Floyd Reason, Electric Product Sales Co., Lansing, Mich., batteries.

CBS-Columbia Inc. announces these new distributors: Callander-Lane Co., Columbus; Lack's Wholesale Distributors, Houston; Maletio Electric Supply Co., Dallas; General Radio & Electronics Co., Wilkes-Barre; Appliance Distributors, Denver; Montana Electric Supply, Billings, Mont.; Electric Supply Co., Albuquerque.

Budelman Radio Corp. formed by Frederic T. Budelman and William Fingerle Jr., ex-Link Radio, to manufacture radio & electronic equipment in association with French-VanBreems, 375 Fairfield Ave., Stamford, Conn.

Mobilization Notes: If you think TV-radio was hit hard by first-quarter materials allocations, consider plight of "less essential" members of civilian electronics industry. Five of the 7 manufacturers of jukeboxes, meeting with NPA, were told Nov. 8 they'll get copper at about 14% of their base period rate, aluminum at 20%, steel at 50%. This compares with about 35%, 35% & 50% for TV-radio. NPA has placed jukebox makers in an essentiality category about equal to manufacturers of advertising signs, pinball machine and venetian blinds.

Jukebox makers said their military orders are few and far between, and they now employ some 2500 workers. Conservation, they maintained, has resulted in "satisfactory rate of production" during fourth quarter, though demand outstrips sales. They estimated 1951 production at 45,000 units vs. 99,000 in 1947 (when there were 13 manufacturers) and 30,000 during 1948's post-war slump. Biggest part of industry's business, they explained, is replacement—there are 400,000 units operating today, requiring replacement at rate of 60,000 a year. Average jukebox lasts 7 years.

Attending meeting with NPA were: Rex Shriver, H. C. Evans & Co.; David C. Rockola, Rockola Mfg. Co.; C. T. McKelvey, J. P. Seeburg Co.; Morris C. Bristol, Rudolph Wurlitzer Co., all of Chicago, and John W. Haddock, AMI Inc., Grand Rapids.

* * * *

"Industry assistance clinics," aimed at lessening impact of material cuts on small manufacturers during first-quarter 1952, will be held soon in "a score of cities" under auspices of Munitions Board and DPA. Govt. announcement says these clinics will bring together "small business specialists of the military services, purchasing officials of other govt. procurement agencies, holders of govt. prime contracts and large civilian producers [with] producers of less essential goods whose first-quarter 1952 allotments of copper and aluminum are 20% or less of their base period consumption or whose rate of production will be 50% or less of their former rate."

First mobilization-induced shortage to show definite signs of easing is in plastics. Nov. 7 *Wall Street Journal* survey reveals current oversupply of some types that were once very tight. Easing is attributed to "huge increase in supplies of most types [and] some demand drops, brought on in part by the slowdown in consumer goods sales." Polystyrene, most seriously short plastic just after Korean war broke out, is now in relatively plentiful supply. It's used in TV sets and cabinets, refrigerators, other appliances hit by market doldrums. American Phenolic Corp. v.p. C. V. Wisner is quoted that "he's now getting deliveries in 3 weeks of recently precious polystyrene. He opines that much of the easing is due to the TV set sales slump. TV sets use important amounts of styrenes."

Dutch electronics industry is ready to handle allied defense orders, says New York *Journal of Commerce* in Nov. 7 Hague-dated story. Article states Netherlands in 1952 will have capacity to produce more than $500,000,000 worth of military goods for western defense, sizes up electronics picture thus: "The Dutch electronics industry, concentrated in 2 of the world's most modern firms, is already producing for defense. What proportion of its output potential is being used cannot be reported. However, it was said, Holland could even now take orders for 'tens of millions of guilders' [guilder equals about 26¢] worth of electronic equipment and deliver very quickly."

Scores of materials and products were added this week to list of items covered by anti-hoarding legislation (Vol. 6:52). NPA Notice 1 was amended to include electronic tube components, selenium, silicon, shipping containers and many chemicals and other items.

Electronics Miscellany: Sylvania's president Don G. Mitchell reported unfilled orders of about $80,000,000 in address this week before Boston Ad Club, saying October billings on govt. orders ran 25% of total and rate is likely to go up to 50% by year's end . . . **Collins Radio,** of Cedar Rapids, Ia., now producing electronics gear in new 25,000 sq. ft. plant in Dallas, has another 50,000 sq. ft. plant there due to be ready in about 6 months . . . **Sierra Electronics Mfg. Co.** completes construction Dec. 15 on $70,000 addition (9600 sq. ft.) to plant at San Carlos, Cal., handling $2,000,000 govt. contract . . . **Air Research Mfg. Co.,** making electronics controls for military aircraft, planning $700,000 addition to plant at Phoenix, Ariz. . . . **Allis-Chalmers** sets up new power dept. to include electronics production, puts R. M. Casper, ex-head of its electrical dept., in charge . . . **GE** electronics div. announces it will use 2 buildings and part of third at Bridgeport (150,000 sq. ft.) for military electronics work, employment at 3 locations to reach 1000 by next fall.

Gist of NPA's new machine tool orders (M-41 & M-41A) as they apply to TV-radio industry: No manufacturer who has lower rate of production than he had in first-quarter 1951 may buy new machine tools, except to replace worn-out units. Companies operating at govt.-authorized production rate higher than first-quarter 1951 are eligible for priority ratings to buy machine tools.

Dr. Gaylord P. Harnwell, chairman, U of Pennsylvania physics dept. and World War II director of U of California division of war research, Navy radio & sound laboratory, named chairman of committee on ordnance of Defense Dept.'s Research & Development Board.

———■———

Material shortages plague British TV-radio industry, too. Commerce Dept's *Foreign Commerce Weekly* reports potential TV shortage there as "material shortages make it unlikely that [1951] production will exceed last year's 600,000," far short of British manufacturers' goal of 900,000. Article notes that "many dealers have waiting lists for the most popular brands despite the 66⅔% purchase tax." Same publication says BBC collected £1,527,884 in £2 TV licenses, £11,546,925 in £1 radio licenses year ending March 31. There were 897,000 TV sets in use in Britain as of June 30 (Vol. 7:39).

Four leading Chicago TV-radio parts makers—Matt Little, Quam-Nichols; Asher Cole, National Video; Robert O'Reilly, Oak Mfg.; Seymour Rothschild, Edwin I. Guthman Co.—are quoted in Nov. 8 *Retailing Daily* interviews as indicating that materials shortages have not depressed their production and that shortages will not be greatly felt until after the first quarter of 1952, if then.

Picture and receiving tube sales continued up in September, RTMA reports. Former totaled 294,951, virtually all rectangular 16-in. or larger, valued at $6,138,517—compared with 210,043 in August. Year's total to Oct. 1 was 3,146,173, worth $78,852,954. Receiving tubes numbered 27,946,193 in September, compared with 23,761,253 in August, bringing year's total to 280,795,338. Of September sales, 16,176,604 were for new sets, 7,363,721 replacement, 2,836,988 export, 1,568,880 govt.

Gates Radio's plans for TV transmitters includes what company believes to be "hot" uhf developments, apparently involving klystron or similar tube. Both vhf & uhf transmitters, plus associated equipment (cameras to come from other manufacturers), will be offered, no orders being taken yet.

Another community antenna in works is one for Laconia, N. H., 100 miles from Boston. Newly-formed New Hampshire TV Corp. is backed by local businessmen, including Arthur H. Rogow, former Eversharp president now operating local appliance and bottled gas business.

NO DELAY IN freeze-end, despite this week's extension of "paper" allocation hearing from Nov. 26 to Dec. 17 as result of Mexican border agreement (Vol. 7:43). That's what FCC members insist. Commission issued notice (FCC 51-1109) which gives parties opportunity to comment on Nov. 21, counter-comment Dec. 5, file briefs Dec. 17.

Reason no hold-up is expected, commissioners say, is that: (1) Relatively few comments are expected. (2) FCC will take up other parts of country first in its deliberations on final freeze decision.

Parties aren't precluded from recommending changes in allocation, fixed as result of executive agreement between U. S. and Mexico, but commissioners shudder at thought of trying to renegotiate second agreement, fearing another months-long talkfest. Border allocation is final, but it isn't expected Mexico would object to intra-U. S. changes which would clearly not affect Mexican stations.

Only place U. S. is hurt, though it gains elsewhere, is in loss of Channel 3 from San Diego. And there, it affects educators primarily, since they lose vhf channel FCC proposed to reserve for them.

Some attorneys are irate, however, asserting agreement doesn't take into account "paper" hearing comments laboriously and expensively prepared. Further, they say, FCC invites more comments now all right, but gives almost no assurance comments will mean anything—since agreement is "final."

FCC's notice includes table of allocations for cities 250 miles each side of border, repeating State Dept's list. Note: All cities undergoing changes were listed in Vol. 7:43. Pages 54-60 of *TV Factbook No. 13* should be corrected accordingly, bringing entire table up to date.

—■—

Objection to ABC-United Paramount merger and petition to intervene in hearing starting Jan. 15 (Vol. 7:21, 44) was filed this week by Gordon Brown, owner of WSAY, Rochester, and perennial gadfly of the networks. "To allow the consolidation of the Paramount Pictures Inc. [sic] with the American Broadcasting Co.," he says, "would seriously affect the ability of WSAY and hundreds of other stations to compete with such a combination in the field of television much less the field of radio broadcasting . . . The petitioner has documentary evidence to prove the above statements . . ." Brown says ABC has restrained WSAY from doing business with national advertisers, depriving station of "several millions of dollars in revenue and has caused WSAY well over $100,000 in out of pocket losses." He says he has spent some $30,000 in prosecuting ABC for violations of anti-trust statutes. Brown's station was onetime affiliate of ABC and MBS, now is independent. Whether FCC will permit him to intervene is problematical. Last week it assigned veteran examiner Leo Resnick to conduct Paramount hearing, and Hearing Div. chief Fred Ford will probably be FCC counsel.

Battle over uhf between Humboldt Greig's WHUM & *Eagle-Times*' WEEU, Reading, Pa., continues (Vol. 7:33, 38, 43). Latter this week filed supplement to its petition asking that WHUM's application for experimental uhf station be denied or set for hearing. Latest brief says: (1) WHUM is still either negligent or deceitful regarding ownership and financing. (2) Since WHUM's uhf transmitter wouldn't be delivered until second quarter 1952, freeze will probably be over by then and commercial uhf stations could supply data WHUM proposes to gather.

Total TV applications rose to 453, of which 20 are uhf, with filing this week by Tarrant County TV Co., Ft. Worth, Tex., for uhf Channel No. 20; WOSH, Oshkosh, Wis., for uhf Channel No. 48; Booth Radio for Lansing, Mich., seeking Channel No. 10. [For further details, see *TV Addenda 13-R* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

College football attendance increased 5% during first half of 1951 season, Associated Press reported Nov. 6 on basis of 89-school survey, crediting NCAA's controlled TV experiment and good weather. AP said same schools surveyed showed 2% decline at same time last season, "with TV catching the blame." Survey showed Eastern schools registering 14% increase, South and Far West 6% each, Midwest same as last year, Southwest down 3%. NCAA yielded to public pressure this week, permitted big Nov. 10 Notre Dame-Michigan State game to be televised in 2 cities not scheduled to receive it—Detroit and Washington. Washington was to have been blacked out Nov. 10, but since no games were being played that date in Capital area, NCAA heeded howls of fans, moved blackout date up to Nov. 17. Washington protest campaign, incidentally, was led by *Washington Post*, which with CBS owns WTOP-TV. Success of this drive resulted in game's being shown on NBC's WNBW. Rebellious U of Pennsylvania coach Francis Murray, who went along with NCAA plan reluctantly and under pressure (Vol. 7:23, 29), let loose blast Nov. 9, called whole program "a ban," said that Detroit incident proves it's doomed, that NCAA had no authority to do it and "even if it were legal it's unwise."

Judge Justin Miller, NARTB chairman and general counsel, was appointed chairman of the Salary Stabilization Board Nov. 8, sworn in next day, succeeding Dr. Raymond B. Allen, who returns to presidency of U of Washington. Judge Miller was "drafted" on part-time basis by economic stabilizer Eric Johnston, continues his NARTB duties. He presides over 5-member board with jurisdiction over pay of executive, administrative, professional and outside sales employes under stabilization program.

Baptist FCC chairman Wayne Coy addresses Radio Commission of Southern Baptist Convention during conference on TV's possibilities for religious programming scheduled for Nov. 27 at Washington Baptist headquarters, 1628 Sixteenth St. NW. Also on tap for all-day session: CBS's Dr. George B. Crothers, NBC's Davidson Taylor, DuMont's James Caddigan, AT&T's W. H. Harrington, RCA's Julius Renhard, Dr. Percy Crawford, director of ABC-TV's *Youth on the March*.

W. L. Gleeson's Broadcasting Corp. of America, operator of KPRO, Riverside, Cal., and 3 other California AMs, subject of petition in bankruptcy filed in Los Angeles Federal court last week as result of foreclosures forced by noteholders. Financial troubles were said to be due to costs incurred by Gleeson in prosecuting application for TV, its Channel 1 grant having been deleted when that channel was taken away from TV. Gleeson is still applicant in Riverside (Channel 6) and San Jose (Channel 13).

Buffalo-Toronto microwave link will go into service in 1952, "to coincide with the opening of Toronto's first TV station," according to AT&T, which this week received FCC authority to add Canada-beamed antennas to its Buffalo station. Canadian Bell is now building microwave station at Fonthill, Ont., 23 miles from Buffalo, 41 miles from Toronto, plans 12 more eastward from Toronto to link Montreal in 1953.

Easing of TV-FM-AM station operating requirements regarding indicating instruments was proposed by FCC this week in Public Notice 51-1100. Proposal would amend FCC standards to permit stations to operate up to 60 days without monitoring or indicating equipment, without obtaining prior permission from Commission. Extensions may be obtained by informal request of FCC engineer in charge of district. Comments may be filed until Dec. 3, counter-comments and briefs until Dec. 18.

Canada's govt.-owned CBC ran defiicit of $1,271,874 for 1950-51 fiscal year just reported. Preceding year's deficit was $243,746.

THE TV FLEDGLING IS GROWING UP FAST: Multi-million dollar stature of infant telecasting industry, which with TV manufacturing really didn't begin to bloom until several years after VJ-Day, is pointed up by deal closed this week for merger of Stations WOR & WOR-TV into General Tire's expanding TV-radio empire (see below).

Also indicative of growing value of TV, we can now report on best authority that network TV will turn the profit corner this year; that, as if in celebration of NBC's 25th birthday which came this week, it can be revealed NBC-TV as a network will show slight profit margin for 1951 -- this despite belief prevailing in many quarters that network TV, per se, can't be made to pay off. NBC-TV network profit will be entirely apart from its own 5-station operation, very profitable (Vol.7:36).

It's clear now that TV is moving inevitably to No. 1 place among American advertising media; in fact, as Variety spells it out this week (with cautionary note on high cost of time & talent) NBC-TV alone will account for more than $125,000,000 in time-plus-program expenditures by advertisers this year -- thus putting it well ahead of Life Magazine's acknowledged media leadership with nearly $95,000,000.

And CBS-TV can't be far behind, evidenced to a degree in latest financial report (Vol. 7:45) which reflects sizeable TV revenues, if not profits yet.

All that's to the good -- but there's also "the larger picture," the really more vital importance of TV industry as a whole in the economy, the defense & the social-political future of America. For observations of 2 of the industry's great pioneers and industrial leaders, Dr. DuMont and Gen. Sarnoff, we commend your attention to stores on pages 3 & 7, respectively. Truly, "we ain't seen nothing yet."

WOR-O'NEIL STATION DEAL BIGGEST EVER: R.H. Macy's WOR & WOR-TV will be merged into General Tire's expanding TV-radio subsidiary, Thomas S. Lee Enterprises Inc., in the biggest station deal on record.

Actually, the big dept. store firm is disposing of its pioneer New York TV and radio stations for $4,500,000 in cash or other assets -- plus 25-year lease on their studio-transmitter properties at $315,000 a year -- plus 10% stock interest in Thomas S. Lee Enterprises Inc.

Details were being worked out by principals this week, preparatory to filing with FCC next week for transfer authority. These are the basic facts:

(1) The $4,500,000 price includes estimated $650,000 in net quick assets, along with WOR Program Service Inc. (recordings, talent, etc.) valued at $1,200,000. Lease of physical properties embraces 2 transmitter sites (including WOR-TV's tall "Eiffel Tower" transmitter overlooking New York area from Hudson Palisades and built at cost of about $250,000) -- plus new studio building between Broadway & Columbus and 66th & 67th Sts., recently completed and costing about $2,500,000. In lease are purchase options starting at $4,600,000, reducing progressively over 25 years.

(2) Sparkplug and boss of burgeoning new TV network project -- and of likely concomitant revamp of Mutual Broadcasting System -- is 36-year-old Tom O'Neil, son of

Copyright 1951 by Radio News Bureau

president of General Tire and head of Thomas S. Lee Enterprises Inc. Its operating divisions now are Yankee Network (operating a regional radio network in New England and owning Boston's WNAC-TV and 4 radio stations) and Don Lee Division (operating Pacific Coast network and owning Los Angeles' KHJ-TV & 3 California radio stations). WOR & WOR-TV will probably comprise new New York Division, headed by present president Theodore F. Streibert and retaining present personnel.

(3) Upon Tom O'Neil also rests the destiny of Mutual Broadcasting System, of which he's board chairman and for which he has long envisioned change to "less mutual" type of corporate setup (see Vol. 7:41). In still-unresolved O'Neil TV network plans, he might want to make it adjunct of MBS; he starts out with nucleus of 3 well-placed outlets plus reasonably certain affiliation of Chicago Tribune's WGN-TV.

* * * *

Though Macy's president Jack I. Straus told stockholders this week that capital gain, after taxes, amounts to more than $1.50 per share of Macy's stock (of which 265,600 shares of preferred & 1,719,354 shares of common were outstanding as of fiscal year ending last July 28), it's plain that 10% partnership with General Tire is the most valuable asset acquired.

Value of the 10% is impossible to calculate as yet, hinging on destiny of TV and radio, but all of General Tire's radio stations are money makers, its Boston WNAC-TV is profitable, its Los Angeles KHJ-TV is reducing its losses steadily, and WOR-TV is supposed to be emerging from the red. WOR-AM has always been good earner. Certainly, total deal involves far more than record $6,000,000 CBS purchase price for Chicago's WBKB involved in pending ABC-United Paramount merger (Vol. 7:21).

Mr. Straus and Macy v.p.-treasurer Edwin F. Chinlund go on board of Thomas S. Lee Enterprises Inc., whose name probably will be changed.

It's second TV station Macy's radio subsidiary founded and sold, the first having been Washington's WOIC (now WTOP-TV), which Washington Post with 55% and CBS with 45% of stock bought for $1,400,000 cash (Vol. 6:25). Reputed profit was somewhere between $400,000 & $500,000.

General Tire bought Yankee Network from John Shepard interests, then bought Don Lee Network from estate but sold Don Lee's TV station KTSL (now KNXT) to CBS for total considerations of $3,600,000 (Vol. 6:52). Early this year it bought KFI-TV (now KHJ-TV) for $2,500,000 (Vol. 7:23,32,36).

Since O'Neil group already owns 7 AM stations, limit permitted by FCC, it will dispose of one of them in order to be able to take over big WOR. To be sold is WICC, Bridgeport, which operates with 1000 watts day, 500 night on choice 600-kc channel. Purchaser is Philip Merryman, now operating Bridgeport daytimer WLIZ, who will pay $200,000 for the Yankee outlet.

TV TAPE RECORDING DREAM MATERIALIZING? A TV program on tape -- long-sought goal of entire TV industry -- apparently took long step toward reality this week. Engineers of Bing Crosby Enterprises actually showed such pictures, albeit of very low definition, to press in Hollywood Nov. 11.

Industry engineers voiced usual caution, but everyone's hoping day may not be far off when today's clumsy, low-quality, expensive kinescopes will be thing of the past, and tape does for TV what recordings did for radio -- enhancing program quality and giving networks much-needed flexibility.

Indicative of importance of such development is fact that RCA's chairman David Sarnoff, only a few weeks back (Vol. 7:39), made it one of 3 major projects he wanted his labs to perfect in next 5 years.

* * * *

Feat was accomplished by chief engineer John T. Mullin and assistant Wayne Johnson, got big play on the news wires. Reached by phone, Mr. Mullin said he wasn't free to release many technical details, but he did say this much:

(1) Definition is ½-mc, compared with the standard 4-mc TV picture. This would mean only about 40 lines of horizontal definition, compared with normal 320 or so. United Press reporter wrote that images were "blurred and indistinct." But

some 6 months' development should bring picture up to acceptable quality, certainly surpassing kinescopes, Mr. Mullin said.

(2) Ordinary ¼-in. audio tape is used, running at 100-in. per second instead of normal 15-in. per second for sound only. For greater definition, approximately 1-in. tape will be employed.

(3) "Multiplexing" is key to technique. Mr. Mullin wouldn't elaborate, added that patents have been filed.

(4) Transient and linearity characteristics are already superior to those of kinescopes. "Gradations between black and white are better," says Mr. Mullin.

(5) Recording and playback equipment will be cheaper, simpler, more flexible than film and kinescope gear.

(6) All electronic equipment is housed in single 6-ft. panel that "sorts, weighs and classifies" the TV signal.

(7) Showings in East aren't planned until greater quality is achieved.

* * * *

Potential of tape in improving pictures was put this way by Gen. Sarnoff:

"Today when a TV program is recorded, the pictures pass from the camera through a major portion of the TV system and first reproduce the picture on the face of a kinescope. Another and special camera placed in front of the kinescope photographs the program on motion picture film. But that technique is costly, time-consuming and limited. The pictures pass through all the possible hazards of the TV system, then through all the photographic process with its possible degradations."

Whether Mr. Mullin's 6 months estimate is accurate or not, everyone says "more power to him." RCA's research v.p. Dr. Elmer Engstrom said: "This is news to me. I have no idea what they have there. This has been the sort of development that I've felt might be expected in 2 or 3 years."

Perhaps those first 40 lines of resolution will look like a snap when compared with next 280. But even if the resolution produced is no greater than that of kinescopes, tape will have tremendous advantages over kines.

Tape recording isn't first non-film TV recording, historically. England's famed TV pioneer, J.L. Baird, put pictures on phonograph records in late 1920's, was followed by many American TV engineers, including GE's Ray Kell (now RCA), Jenkins' Albert Murray. Pictures were little more than outlines, of course, being made from images composed of 30-50 vertical lines.

Mr. Mullin is 1936 graduate of U of Santa Clara, worked for Pacific Telephone & Telegraph Co. in San Francisco 1937-41, served as Signal Corps major, became chief engineer of W.A. Palmer Co., San Francisco (industrial & training films) -- before joining Bing Crosby's outfit.

FREEZE-END—'IF WE DON'T GET FOULED UP': The one man in the TV manufacturing and telecasting industry who has never feared to speak out plainly and sometimes sharply -- Allen B. DuMont -- let loose a few more broadsides this week at community dinner celebrating 20th birthday of his company and adoption of slogan "Passaic, Birthplace of Television" because of Dr. DeForest's and Dr. DuMont's pioneering work there.

Hater of sham, impatient with govt. bureaucracy, fearless of reprisal from Washington, Dr. DuMont began by pointing out that the "fledgling TV" as yet has only 108 stations in 63 cities serving less than half the nation's area; in 40 cities, he pointed out, there's no freedom of program choice because only one station exists.

"This limitation of TV's opportunity to grow, expand and serve the whole country and all its people," said Dr. DuMont, "is the product of a 'freeze' imposed by the FCC. There is no longer any justification for continuation of the freeze. There has been more than ample time for establishment of engineering standards and proper station spacings." Then, having in mind no doubt the specious color issue that's responsible for good 2 years of the now 38-month-old freeze:

"There are indications now that, if we don't get fouled up in more bureaucratic red tape and delays, the freeze may be lifted within a few months.

"When the thaw comes, TV will be started in earnest on its road of destiny;

within the next 20 years, we shall see hundreds of TV stations spread all over the country with millions more receivers in a large percentage of the homes of every community, large and small."

* * * *

Then Dr. DuMont ventured on some political observations, expressing publicly what good part of TV industry says and thinks privately. He thinks potential of TV as "great force to serve America and mankind" must yet be realized. Already, he noted, in crime hearings and political campaigns, it has displayed "an unerring ability to sift insincerity and demagoguery.

"Already the politicians -- high and low, at the local level and at national level -- are wondering and planning. They are planning to avoid or make use of its unerring ability to distinguish the demagogue from the statesman.

"During the past 20 years we have witnessed a rapid encroachment by our Federal government on the rights of the individual, the community, the state. We have seen controls piled on controls as bureaus were piled on bureaus.

"Phony economic theories have been projected for the sake of political expediency to lead people to beliefs that the world owes them a living and they can collect it from the Govt., or that we can have more by producing less...

"We hear much about a manpower shortage these days, and of measures to conserve. But in Washington the needless bureaus are still employing people by the hundreds of thousands to twiddle thumbs or perform unnecessary duties. Back here on the industrial front, we are forced to consume an unnecessarily high percentage of our time, efforts and manpower on red tape and paper work for the Govt., which Govt. in turn uses as justification for employment of more manpower.

"I cannot help but wonder how much longer TV would have been getting here if those of us who worked on its development had been compelled in those early days to pay as much paper work tribute to bureaucracy as we do now...[I] wonder whether TV would not have weeded out for the voters those who have imposed this creeping socialism on us [and I] wonder what's in store for us next year and in succeeding years when the honesty of TV is put to work in earnest in the cause of good, clean, honest govt. and a return to the fundamentals of the American enterprise system.

"TV at its efficient best could fill our halls of Congress with statesmen, and our state & local offices with men whose greatest desire is to serve the public interest and welfare...The real big role that TV is to play in our lives is in the making...Do not make the mistake of putting it in a fixed category of entertainment. I do not mean to disparage it as an entertainment medium. Entertainment is important and necessary [but] just a part of TV's function and place in our lives."

Personal Notes: Michael R. Hanna, mgr. of Cornell U's commercial radio stations WHCU & WHCU-FM, Ithaca, N. Y., elected FM member of NARTB board of directors, succeeding Frank U. Fletcher, who resigned when he sold his WARL & WARL-FM, Arlington, Va. . . . Hal Hough, ex-program director, WJBK, Detroit, named program director, WJZ-TV, New York, succeeding James Pollak, now ABC-TV Midwest program director . . . Neale V. Bakke promoted to sales mgr., WTMJ & WTMJ-TV, Milwaukee . . . Bert Lown resigns as v.p. of Muzak Corp. and gen. mgr. of its Associated Program Service, to join CBS-TV station relations . . . Charlotte F. Stern resigns as DuMont Network adv.-promotion director . . . James C. McDowell, recent Harvard graduate, former Florida radio announcer, joins Washington law firm of Arthur W. Scharfeld . . . Elaine H. Samuels named TV-radio director, C. J. Herrick Associates . . . Charles R. Abry promoted to Eastern sales mgr., ABC-TV network; Rupert Lucas to mgr. of ABC-TV program sales . . . Samuel F. Jackson, ex-WPIX, joins Avery-Knodel Inc. TV dept. . . . James A. Ward, v.p. & gen. mgr., Crossley Inc., research, has established own research firm, J. A. Ward Inc., 8 W. 40th St., N. Y. . . . Howard H. Ball, ex-WMAL & WMAL-TV, named executive asst. to Thad H. Brown Jr., TV director, NARTB.

FCC Chairman Wayne Coy as successor to Eric Johnston, resigning head of Economic Stabilization Agency, was rumor that had many Washington newsmen buzzing at week's end. Story was first published in Scripps-Howard newspapers Nov. 17. Coy's comment to us: "If there's a rumor of that kind, identify the source of it and print it and do whatever you want with it—that's my comment." At defense mobilizer Charles E. Wilson's office, under which ESA functions, it was stated Coy's name had not come up, and that at least one nationally known business man was still considering taking job which Johnston quits Dec. 1 to return to presidency of Motion Picture Assn. Appointment must be made by the President, confirmed by Senate. Recurring rumors of Coy's departure from FCC are predicated mostly on his known desire to go into private business, though he has turned down several offers—among them one to handle TV-radio for Ford Foundation under Paul G. Hoffman. That came last spring while he was being considered for reappointment as FCC chairman, which he chose to accept because (he told friends) it meant "vindication" of his policies, particularly during heat of color imbroglio. Of course, if Democrats go out of power in national elections next year, new FCC chairman will be named—though Coy's 7-year term would permit him to stay on Commission as member.

EIDOPHOR-CBS color theatre TV, sponsored by 20th Century-Fox, underwent another inspection in Zurich Nov. 12 (Vol. 7:41). This time, 20th's president Spyros Skouras took along group of VIPs, including his theatre-operating brothers Charles and George, GE's Dr. W. R. G. Baker, CBS's Dr. Peter Goldmark, Paramount TV executives and operators of U. S. and foreign theatre chains.

Thus, color-TV competition shifts from home-TV to theatre-TV front for the moment—with RCA's color theatre TV having been favorably received (Vol. 7:41) and Paramount announcing it has color version of its delayed-film theatre-TV system in the works (Vol. 7:43).

"A real technical advancement," was Dr. Baker's comment, according to AP. "Probably the most outstanding theatre-TV system in the world [because] there is no limit on the light that can be pumped through the unit." GE is scheduled to make studio equipment, perhaps all equipment, for the system.

Charles Skouras reacted by rushing out and sending following wire to all Theatre Owners of America members:

"With inspired enthusiasm and a profound pride in our industry I want you to know that the 20th Century Eidophor with CBS color which I saw tonight surpassed in definition and life-like portrayal anything that I have ever seen before on the screen. Tonight's presentation was an epic in my life and I know it was an historic moment in our industry. Eidophor can be projected on any size screen with any length of throw. The color is real, actual with all the delicate shadings of life and sparkles with animation. Its magnetic radiance and dimensional depth will recapture the patrons we have lost and bring millions of new theatre-goers to our showhouses.

"An audience of scientists, press and industry members stood triumphant to shower what seemed endless applause when demonstration concluded. Am certain 20th Century Eidophor with CBS color opens new vistas in entertainment as vast as the advent of the first talking picture."

First U. S. demonstration is still scheduled in New York sometime in December, said Spyros Skouras, but his hopes for 150 color-equipped theatres by April (Vol. 7:41) appear to be fading. He says that material shortages make previously-planned Feb.-March production dates doubtful.

Some TV engineers have fingers crossed on Eidophor, believing it too complex for day-to-day operations out of the laboratory. They also point out that pictures shown in Zurich are wide-band, will lose considerable definition in network transmission. One engineer says he has experimented with system, and goes so far as to predict: "I'll bet they don't make another unit." Others, like Dr. Baker, are greatly impressed by system's potential for almost unlimited amounts of light, since its light source is an arc rather than phosphors.

Network Accounts: Major one-shot sponsorships reported by NBC-TV: Reynolds Metals Co. (aluminum), simulcast of *Arturo Toscanini & NBC Symphony* Dec. 29, Sat. 6:30-7:30; Allis Chalmers Mfg. Co. (farm equipment), annual *International Livestock Exposition* from Chicago Nov. 27, Tue. 3-4; F. W. Woolworth Co. (5-&-10 chain), using TV first time, *Tournament of Roses Parade* from Pasadena Jan. 1, just preceding Rose Bowl game sponsored by Gillette . . . Johnson & Johnson (surgical products), planning one-hour Christmas Day show, on TV network to be announced, featuring Walt Disney films . . . Burlington Mills (Cameo hosiery) after Jan. 1 to sponsor twice weekly 15-min. *The Continentals*, featuring Renzo Cesana, on network to be selected, thru Morey, Humm & Johnstone . . . Goodyear Tire & Rubber Co., on Dec. 2 & 23, will present *The Greatest Story Ever Told* on ABC-TV, Sun. 7-7:30; stories will be on film and will be sponsored as public service, with identification of sponsor only . . . General Tire & Rubber Co., pleased with results during last World Series, has signed to sponsor *Dizzy Dean* interviewing series stars 15-min. before each game during 1952 & 1953 World Series on NBC-TV; agency is D'Arcy Adv., St. Louis . . . Lever Bros. (Rinso) starts simulcast on CBS-TV Jan. 7 of 10:15-10:30 segment of *Arthur Godfrey's* morning radio show on CBS radio network, Mon.-thru-Fri., 10-11:30 a.m. . . . Reynolds Metals Co. (aluminum products) now sponsors half-hour weekly of *Kate Smith Evening Hour* on NBC-TV, Wed. 8-9, buying time dropped by Congoleum-Nairn after initial 13-week sponsorship . . . Bendix Home Appliances, Div. of Avco Mfg. Corp., starting Dec. 5 will share alt. week sponsorship with C. A. Swanson & Sons (frozen poultry) of *The Name's the Thing* on ABC-TV, Wed. 7:30-8, both thru Tatham-Laird Inc., Chicago . . . R. J. Reynolds Tobacco Co. (Cavalier cigarettes) reported readying sponsorship of *My Friend Irma* to start Dec. 15 on CBS-TV, Sat. 9:30-10, during time being vacated Dec. 8 by American Safety Razor Co.'s *The Show Goes On;* agency for Cavalier is Wm. Esty Co. . . . RCA Victor will present *Ezio Pinza* on its yet unnamed new show (Vol. 7:43) on NBC-TV, Fri. 8-8:30 starting Nov. 23; after New Year, *Dennis Day* will alternate weekly with Pinza in his own show from Hollywood.

Station Accounts: Kroehler Mfg. Co., world's largest furniture maker, ventures into TV for first time with *Clifton Utley & the News* on WNBQ, Chicago—its adv. mgr. Larry Keller announcing that "if this test comes up to our expectations we will extend TV advertising to other important markets." First product plugged is "Sleep-or-Lounge" sofa bed. Agency: Henri, Hurst & McDonald, Chicago . . . Remington Rand buys *John Wingate* news program Mon. 9-9:05 p.m. and Wed. preceding boxing bouts on WOR-TV, New York, thru Leeford Agency . . . Spiegel Inc., large Chicago mail-order house, makes TV debut with *Test Lab* on WGN-TV, Chicago; show simulates testing lab and offers advice on judging and buying of products . . . General Baking Corp. has bought *Hopalong Cassidy* films from NBC-TV for spot placement in 18 markets, starting in January when General Foods drops its NBC-TV network sponsorship, Sun. 6-7, and moves Roy Rogers into that spot . . . Packard Motor Car Co. planning to use TV again in early 1952, thru Maxon Inc., which takes over account Dec. 15; meanwhile, new 1952 models being introduced in big space campaign that started Nov. 14, plus CBS Radio *Red Skelton Show* . . . Utica Club Beer buys weekly *Old American Barn Dance* films from United Television Programs for placement on all upstate New York stations . . . Gillette will sponsor Orange Bowl game on WTVJ, Miami, non-interconnected . . . Among other advertisers reported using or preparing to use TV: E. R. Wagner Mfg. Co. (Wagner Komb-Kleaned carpet sweeper), thru Klau-Van Pietersom-Dunlap Associates, Milwaukee; Colgate-Palmolive-Peet Co. (Lustre-Color hair coloring), thru Lennen & Mitchell, N. Y.; Freihofer Baking Co, (Sonny Boy bread), thru Tri-State Adv., Philadelphia; Interstate Bakeries Corp. (Butternut & Webers bread), thru R. J. Potts-Calkins & Holden, Kansas City, and Dan B. Miner Co., Los Angeles, respectively; Cleveland Welding Co. (Roadmaster bicycles), thru Will Inc., Cleveland (WTMJ-TV); Caryl Richards (Rocket Wave permanent), thru Emerson-Rodgers Inc., N. Y. (WTMJ-TV); Roman Meal Co. (Roman Meal pie crust), thru Guild, Bascom & Bonfigli, San Francisco (KSL-TV); Fratex Fashions, division of Plastic Film Products Corp., thru Buehl & Associates, Akron; Dusorb Sales Corp., Shenandoah, Ia. ("Dusorb" & "For" Cleaner), thru Allen & Reynolds, Omaha.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5. D. C. • TELEPHONE STERLING 1755
Trade Report
November 17, 1951

INDUSTRY CONTEMPLATES 1952 OUTLOOK: Caution is today's byword in the battle-scarred TV trade. Certainly that was prevailing mood among TV and parts manufacturing top-kicks gathered in Chicago this week for RTMA November meetings.

Supplanting last winter's reckless production spree -- and the spring-summer hangover -- is sober realization that, despite fall trade pickup and steady inventory reduction, real prosperity probably isn't just around the corner.

There's still undercurrent of worriment lest current sales stimulation turn out to be purely seasonal and nothing more. If so, what will the traditionally slow first quarter bring?

There certainly aren't enough military orders to fill the gap. Nor are there prospects that, without all-out war, defense production will ever take over any sizeable portion of TV-radio industry's total productive facilities.

As for materials shortages -- that's next year's worry. By and large, the industry hasn't felt them yet. Of course, there are some exceptions -- notably tube and antenna makers, who are feeling various degrees of pinch -- but set makers and most component manufacturers aren't terribly concerned about materials as of now.

* * * *

Consensus of TV-radio manufacturers on RTMA board of directors, informally polled Nov. 16, was that industry will produce 4,440,000 TVs, 10,900,000 radios in 1952. Individual "guesstimates" ranged from 3-5,000,000 TVs, some 25% predicting 5,000,000 sets. For radio, range was 7,500,000 to 12,500,000.

Most of these estimates ran considerably higher than NPA's semi-official prognostication of 3,500,000-4,000,000 TVs next year (Vol. 7:44). Queried about this divergence, one NPA electronics official replied: "Maybe we know something they don't know," taking dimmer view of materials outlook than industry does.

But many rank-and-file TV manufacturers in Chicago had feeling that materials won't be limiting factor until well into first, or even second quarter. "Later than that, maybe, if buying lets down after Christmas," was wry comment of one.

Scarcity of materials isn't "clear and present danger" to most set and parts makers because they're still carrying good-sized inventories of materials (as well as finished parts) from third quarter. During first quarter 1952, many expect to have some of their fourth quarter quota left over.

* * * *

Certainly allocations of materials to TV-radio-phono manufacturers for first quarter -- as announced this week by NPA -- gave nobody cause to jump for joy. They're substantially as we reported exclusively several weeks ago (Vol. 7:43-44).

Nearly all manufacturers have now received their allotments, and here's how they average out: All types of steel, 50% of base period use; copper brass mill products, 35%; copper wire mill products, 40%; copper foundry products, 20%; and aluminum, 35%. (For comparison with base period and fourth quarter, see p. 11.)

Base period use was only criterion used in making allotments for TV-radio and other consumer durables. Manufacturers' stated requirements weren't considered.

For component manufacturers, there are no exact percentage figures. Amount of materials they'll get depends on amount of military production. They'll receive 100% of requirements for military items, plus allocation for civilian components commensurate with that received by TV-radio makers.

But most component people, like the set makers, have yet to face the hard facts of real materials shortages. Even more than the TV manufacturers, many of them are more concerned about costly inventories of materials and finished parts, as well as scarcity of orders. This comment we heard in Chicago from a small manufacturer was typical:

"They tell us there'll be materials shortages next quarter. Of course we've heard that story before, and it gets harder to believe each time, but I guess we can't go on living off our fat forever."

* * * *

Outlook for large-scale military production is gloomy. Most electronics manufacturers have found the pattern of defense orders vastly different from that of World War II. Generally, there's been little heavy mass production -- and probably won't be under stand-by mobilization program.

One parts maker told RTMA's Small Business Conference that items the Signal corps bought from him in "tens of thousands" during World War II, now are purchased in "dribs and drabs." Another said he's turning out a small electronic component at rate of 500 a day for the military. During last war he produced 25,000 a day.

Military electronic production should level off by July, said RTMA chairman Robert C. Sprague, but level won't be high. He said orders for electronic equipment, except fuses and guided missiles -- and not counting related non-electronic items such as wire, radar trucks, etc. -- are now being delivered at rate of $400,000,000 a quarter. By July, they're expected to reach quarterly rate of $600,000,000.

Increase will be about 50% -- no great upsurge from today's level. As one component manufacturer put it: "No matter how you figure it, 150% of nothing is still nothing."

* * * *

Another well-over-100,000 output week was recorded by RTMA statisticians for week ending Nov. 9. Total of 113,264 TVs (2988 private label) was highest since April 20 week (Vol. 7:18), compares with 107,361 week preceding, brings total for first 6 weeks of fourth quarter to slightly over 615,000 -- augurs easy 1,000,000 quarter to add to approximately 4,000,000 first 3 quarters.

Factory inventory was 335,439, down mere 2000 from preceding week.

Radio output fell to 186,996 (79,775 private label) from preceding week's 203,777. Factory inventory was 338,832, up about 7000 units. Week's radios were 110,755 home receivers, 22,067 portables, 54,174 auto.

ELECTRICAL AGE INTO ELECTRONIC AGE: Editors of David Lawrence's U.S. News & World Report got RCA chairman David Sarnoff off on his favorite subjects in one of their famed "staff interviews" published Nov. 9 under caption "What's Next in Television?" Gen. Sarnoff got in some licks on color TV and programs, of course, but real meat of interview came when he was asked, What do you see ahead as the possibility of invention in the line of electronics?

The man who called the turn on the "music box" that became radio and on the TV that is the electronic industry's prodigy, really liked that one. Quoth he:

"I think there's no limit to the possibility of electronics for the future. I think that just as we had a Steam Age, followed by an Electrical Age, we are now on the threshold of an Electronic Age. I think we've crossed the threshold, and many things that are electrified can be electronized."

He went on to suggest electronic household appliances -- that electronic air conditioner, for example, which would eliminate pumps and fans and noise and be cheaper and simpler to operate (Vol. 7:39). He spoke of RCA's Ultrafax, capable of transmitting, via TV-facsimile methods, a whole book in matter of minutes. But most significant, currently, in view of electronics' basic role in defense and industry, were his answers to, What do you see for TV as a military aid?

"I see a great deal...Already the experiments and the tests which have been made indicate that you can see what is going on on the battlefield and what is going on at sea, and you can increase your control of your combat units. And I think that the combination of atomic energy, radar, TV and electronics will revolutionize warfare -- has already done so -- because aviation itself has much use for TV. Electronics represents now a large part of our military machine. In fact, I don't know any part of a military machine that hasn't got some electronics. Even a tank...

"I think electronics opens up a new field applicable to all industry, and there is another important development on the horizon in that field. We have always

thought of electronics in terms of a vacuum tube. It started out first as a detector, then as an amplifier, and finally as an oscillator or generator. Everything that we have done in radio has been built around the vacuum tube. That has been the greatest single invention of the electronic age.

"Lately scientists have discovered that you can get electronics to work in solids as well as in a vacuum tube. We always thought we had to heat a filament and create heat inside a vacuum in order to put the electrons to work. In other words, we had to boil these electrons out of the things that existed inside the vacuum tube before they would do their job.

"Now what the scientists call electronics in solids -- that is, electrons in solid materials -- can also do the job. A crystal called germanium, which you may have read about [see Transistor's Potential for TV-Radio? Vol. 7:39], is able to do what the vacuum tube does as a detector or as an amplifier -- it doesn't yet do it as well -- it's still in the experimental stage but it is being steadily improved.

"Well, now, when you have these electrons working in solids, you don't have to boil them out -- they remain there, and a piece of metal or crystal the size of a shoe button will be able to do what vacuum tubes are doing. Here you have the possibility, despite all the things that we know about tubes and electrons, of even obsoleting the tube itself for some of its present uses.

"You add this discovery...to the possibility of atomic energy in getting radiation from certain materials, and then you open up a field to the imagination which we could never cover in this interview."

Trade Personals: Dr. Vladimir K. Zworykin, RCA Labs v.p. and noted TV inventor, was married in Burlington, N. J., Nov. 15 to Dr. Katherine A. Polevitzky, also Russian-born; she's a bacteriologist with Thomas W. Evans Institute . . . Wm. J. Morlock, ex-OSRD, appointed gen. mgr. of GE's commercial & govt. equipment dept., including TV-radio transmitters and station equipment, etc., headquartering at Syracuse . . . Patrick E. Sullivan promoted to asst. mgr., GE Buffalo tube works . . . Wm. H. Kelley promoted from sales mgr. to president of Motorola Inc., New York, Allan G. Williams being named operations v.p.; Mr. Williams is the son of onetime RMA president, the late Fred D. Williams . . . R. M. Brown named Detroit district sales mgr., GE receiver sales, David Goodhart being assigned to Minneapolis, Francis Haulon to Syracuse . . . Ernest A. Marx, gen. mgr., DuMont receiver sales div., left Nov. 15 for South America to set up distributorships and survey TV situation . . . Wm. Carlin promoted to manufacturing mgr., DuMont CR tube div., succeeding Frank Beldowski . . . Emanuel Weintraub, ex-Garod (Majestic), named commercial service mgr., CBS-Columbia Inc., and aide to sales mgr. R. D. Payne . . . Leo J. Sands, ex-Bendix Radio, named gen. sales mgr., Bogue Electric Mfg. Co., Paterson, N. J. . . . William H. Jarvis named sales mgr. of new N. J. DuMont factory distributorship under mgr. John Hunt . . . O. S. Gerstman, ex-Kaye-Halbert, has formed Gerstman Distributing Co., 414 S. Western Ave., Los Angeles, handling Natalie Kalmus, Cinema and Jackson TVs . . . Ray J. Yeranko, Magnavox TV-radio service mgr., named chairman of RTMA service committee, succeeding DuMont's E. W. Merriam, now on temporary duty as RTMA service mgr. . . . Leigh A. Brite, ex-chief electronics engineer, U. S. Air Force Security Service, named director of research & development, Transmitter Equipment Mfg. Co. . . . Richard H. Schneberger named general service mgr., Crosley, succeeding H. A. Newell, resigned . . . Adolph Ullman, president of Northeastern Distributors, Boston (Zenith) elected a trustee of Brandeis University.

Symposium on "Improved Quality Components" has been scheduled by RTMA-IRE-AIEE May 6-8, 1952, in Washington.

RCA-NBC is showing off uhf Nov. 28-Dec. 1, during NBC affiliates' convention in Boca Raton, Fla., under authorization granted by FCC this week. RCA is installing 100-watt transmitter, 524-530 mc, using tilted directional antenna giving about 6-kw ERP. RCA's Dr. George Brown feels tilted antenna (Vol. 7:19, 37) may prove valuable in providing coverage with small transmitters until high power is available. He says that transmitter with few hundred watts and tilted directional antenna can provide equivalent of several hundred kilowatts over city itself, but that rural coverage naturally suffers. Long-distance tropospheric interference is markedly reduced, he says.

To combat interference problems, notably those involving amateurs and TV, George Turner, chief of FCC's field engineering division, instructed all regional managers to encourage formation of local groups. He cited "The Dallas Plan for TVI" in June *QST*, showing how local group investigated amateurs' interference to TV sets, found RCA receivers among most severely troubled, got quick action by going directly to RCA chairman David Sarnoff. In Dallas, RCA Service Co. engineers promised to correct every RCA set gratis, carried out commitment.

Nov. 1 sets-in-use reported since NBC Research's "census" of Oct. 1 (Vol. 7:43): Greensboro 84,049, up 9549; Memphis 104,129, up 5329; Dallas-Ft. Worth 140,808, up 4808; Utica 56,200, up 3200; Miami 89,300, up 2300; Norfolk 85,742, up 4142; New Orleans 67,817, up 4317; Washington 301,000, up 12,000; St. Louis 327,000, up 10,000; Baltimore 337,687, up 12,687; Cleveland 529,548, up 18,548; Kansas City 157,251, up 13,251; Johnstown 120,000, up 8000; Houston 98,092, up 5192; Syracuse 143,494, up 7494; Boston 803,989, up 16,989.

Use of higher-gain antenna to take advantage of FCC's rule permitting temporary power increases (Vol. 7:30 et seq) is quite rare, most stations electing to wait for end of freeze before making changes. WJAR-TV, Providence, and WBZ-TV, Boston, are first to hike power via new-antenna route. Former is moving from 30 to 50-kw ERP by replacing 6-bay unit with 12; latter is jumping from 15.6 to 25 kw by substituting 6-bay antenna for 3-bay.

Topics & Trends of TV Trade: Belmont has upped prices of 12 of its Raytheon TV models $5 to $32.50, cut prices on 3 others $2.50 to $45—but these are announced as "adjustments designed to eliminate the industry's current practice of marking up parts warranty charges in order to compensate for extremely close or loss prices on receivers." Sales & engineering v.p. W. L. Dunn stated:

"Belmont became the first company in the industry to include the Federal excise tax and parts warranty charge in the suggested retail price of its Raytheon TV line. In the third quarter of this year, many manufacturers instituted the practice of artificially marking up the parts warranty charges to several times its actual cost . . . The practice penalized many dealers because their advertised retail prices could then include only a partial markup.

"Belmont now feels that the public has not been fooled by the industry's current pricing system, which has resulted in confusion and drawn criticism from the OPS." Raytheon distributors have option of advertising suggested retail price either with or without the Federal excise tax and parts warranty included.

* * * *

TV servicemen's licensing bill (Vol. 7:39) was passed by 19-4 vote of New York city council Nov. 13. Measure requires licensing of all technicians, service dealers and contractors at fees ranging from $5 to $25, establishes 8-member commission to administer bill and regulate licensing qualifications. Bill's proclaimed aim is to curb abuses in TV servicing "which have victimized the public." Meanwhile, RTMA announced it has engaged RCA Institutes Inc. to write 3-year vocational high school course on TV-radio and 10-12 month syllabus for adult educational institutions, to increase number of qualified servicemen. Courses are being edited by Gilbert Weaver, training director of New York State Board of Education.

Big trade upturn at wholesale level, very little at retail, are registered in Census Bureau's statistics for September. Its *Monthly Wholesale Trade Report* shows TV-radio-appliance distributors' sales increased 41% over August, while their inventories declined 3%. September's wholesale sales, however, were 27% below September 1950, inventories 61% greater than year before. *Monthly Retail Trade Report* indicates TV-radio stores' sales in September were 7% above August, but 23% below September 1950. Appliance retailers' sales inched up 2% from August to September, but were 29% less than same month last year.

TV set dealers and manufacturers during September placed equivalent of 3105 pages of daily and Sunday newspaper advertising of TV sets, reports Advertising Checking Bureau Inc., which adds that since such advertising was checked in only 49 of the TV cities total for U. S. should be "considerably higher" than this average of 2 pages per day per city. For first 9 months of this year, ACB reports 52,741,806 lines, equal to 23,973 pages, devoted to TV set advertising; radio set advertising in same cities ran about 10% of the TV.

* * * *

RTMA reports 626,793 TV sets shipped to dealers during September, as against 156,015 in August. Total shipments for first 9 months of year were 3,371,624. Figures are for industry as whole, including non-members; complete report showing 9-month shipments by counties is available from RTMA on request.

Asked to take stand on subscription TV, RTMA board responded to request of its TV committee Nov. 16, named subcommittee headed by president Glen McDaniel to study situation and make recommendation to next RTMA meeting in New York Feb. 5-7.

Gen. Lawrence H. Whiting, president of American Furniture Mart, sees 1952 Winter Mart (Jan. 7-18) more nearly "normal" than any other similar showing since end of World War II; last winter's was "runaway" and last summer's "abnormal," he says. Now, the typical retail store buyer will purchase his actual needs—"and he's going to need goods" because "inventory has been worked down." Now, too, he won't do any "scare buying." Even so, in Gen. Whiting's opinion, "1951 will wind up close to 1950 in dollar sales in furniture and bedding manufacturing, retail and wholesale fields [though] profits for 1951 will be lower . . . occasioned mainly by sacrifices made to get out from under an over-inventoried position, the constantly rising cost of doing business, and higher tax burdens."

A 16rpm record is about to go on market, Nov. 15 *Retailing Daily* reports. Manufacturer is Wagner Research Corp., 150 W. 56th St., New York. First offering is a reading of the Bible by actor Alexander Scourby. President Robert Wagner says company is producing attachment to fit any 33⅓rpm player to sell for $12—including two $1 records. Mr. Wagner says he originally intended to make 14rpm records, but Zenith persuaded him to use 16rpm, since its record players are continuously variable from 16 to 85rpm. He added that Zenith offered aid in exploiting records, but *Retailing's* check with Zenith got only a denial. Mr. Wagner plans to sell 16rpm recorder at $275, with Audio & Video Corp., New York, exclusive sales agents. Note: Ever since Zenith put 16rpm into its player, there has been talk about its going into record manufacturing business itself—talk recurringly heard during this week's RTMA conference in Chicago.

* * * *

Trade Miscellany: Erie Resistor Corp.'s month-old strike of 1300 employes ended this week, with granting of 7½¢-an-hour across-the-board wage increase and IUE union shop . . . Argos Products Co., Genoa, Ill., announces new line of leatherette table TV cabinets being ready-cut for Radio Craftsmen, Tech-Master, Philmore and Mattison 16 & 17-in. chassis, also Radio Craftsmen 20 & 21-in.; blank model for other 16 to 21-in. . . . RCA has added "Covington," Model 17T-172, to line—console with half doors, 17-in. rectangular tube, listing at $379.50 in mahogany or walnut, $389.50 in limed oak . . . Muntz TV indicates intention of distributing "closer to the manufacturing center" (Chicago) due to production limitations, so is reported to have halted sales in New York, northern New Jersey and Boston.

Description of transistor, promising vacuum tube substitute (Vol. 7:39), is accompanied by this evaluation in November *Electronics:* "For the first time in half a century the electron tube has a real competitor, with sharp spurs and a disposition to take over. It promises to establish whole new areas of electronic engineering, from computers to telephone switching systems, and it will probably make real inroads in many existing applications, particularly military ones."

Dick Hooper, RCA's peripatetic "ambassador of TV," who has conducted closed circuit demonstrations in Rome, the Vatican, Berlin, Madrid and other foreign points, suggests U. S. leadership in TV gives it one propaganda weapon our enemies don't have. "If we ever occupy another country," he told Philadelphia meeting of American Public Relations Assn. Nov. 14, "the tubes of the TV receivers should be warmed up before the guns cool down."

FM promotion campaign will be conducted in 3 test areas—North Carolina, Wisconsin, Washington, D. C., maybe others—as decided by RTMA advertising committee, set div., at Chicago meeting. Program is joint venture with NARTB and local FM stations, will place heavy emphasis on sports broadcasts available only on FM.

Financial & Trade Notes: DuMont showed loss of $2,062,547, reduced to net loss of $319,547 as result of Federal income tax credit of $1,743,000, for 40-week period ended Oct. 7. Sales fell to $37,537,000 from $52,273,000 for corresponding 1950 period, for which net earnings were $5,018,000 ($2.08 a share). Poor showing for this year was due to decline in TV market, involving heavy losses on sales of excess inventory; losses were practically all in receiver and tube divisions, inasmuch as instrument, transmitter and broadcasting sales were all substantially up.

"At this stage," stated Dr. DuMont in Nov. 9 message to stockholders, "we appear to have the dark picture behind us. Insofar as receiver and tube sales are concerned, they are definitely on the upgrade. Credit restrictions have been eased; the public did not accept the approved color system and the Office of Defense Mobilization halted mass production of color receivers 'for the duration,' thereby dispelling confusion; a thaw of the 'freeze' appears imminent, and we are ready for uhf reception.

"Government contracts on which we are already at work, plus others on which 'letters of intent,' 'notices of award' and 'assignments' have been issued, amount to more than $60,000,000, and negotiations for other products are well advanced . . . We are contemplating substantial improvement in the closing weeks of the year, and expecting a 1952 business volume at least 25% in excess of our high year, 1950. This increase in volume, however, will be at a lower percentage of net profit to sales than in 1950 because of the large proportion of govt. orders."

* * * *

Philco sales for first 9 months of 1951 totaled $228,431,000 compared with $229,205,000 for same 1950 period. Net profit after provision of $7,835,000 for Federal and State income taxes was $7,963,000 ($2.18 per share after preferred requirements), vs. $9,877,000 ($2.72) for corresponding period last year when taxes were $9,692,000. Third quarter sales were $57,408,000, net $2,222,000 (60¢), compared with $82,193,000 and net of $4,068,000 ($1.13) for same 1950 quarter. Summer's high factory-distributor inventories have now been depleted, states president Wm. Balderston, and demand for 1952 models is so great that production now is on an allocation basis.

Admiral sales fell to $134,919,187 for 9 months ended Sept. 30 from $166,924,994 for same 1950 period. Net profit was $5,400,158 ($2.80 a share) vs. $13,176,417 ($6.83). Third quarter sales were $31,331,832, net earnings $1,306,735 (68¢). Fourth quarter prospects, said report, appear favorable and satisfactory earnings are anticipated for balance of year.

Muntz TV Inc. reports net earnings of $185,034 on sales of $14,803,243 for 6 months ended Sept. 30. This compares with profit of $446,445 on sales of $10,786,600 in same 1950 period. Quarter ended June 30 showed loss of $7282, so that whole profit came in September quarter. Prospects for second half of fiscal year, said report, "are considerably brighter as a result of a general firming of the TV market."

Davega Stores report sales for 6 months ended Sept. 30 were $13,074,000, compared with $13,095,463 same period last year. Net profit fell to $12,713 from $241,254 in 1950 period. Liquidation of excessive inventories was given as main reason for decline by president H. M. Stein, who added that inventory was reduced by $3,250,000 during the period, loans from banks reduced currently to $650,000 from $2,500,000 on March 31.

Webster-Chicago reports net profit of $368,739 (82¢ a share) on net sales of $13,439,247 for 9 months ended Sept. 30, compared with $1,019,983 ($2.27) profit on $12,980,230 sales in same 1950 period.

Among officers' and directors' stock transactions reported by SEC for September: Dee S. Lenfesty sold 500 Arvin, holds 1000; M. P. Ferguson bought 200 Bendix (August), holds 900; Samuel Paley received 200 CBS "A" as gift, holds 6800 "A," 15,000 "B"; I. James Youngblood sold 800 Clarostat, holds 300; Leo J. Doyle sold 1024 Hallicrafters in September, 600 in August, received 1624 in distribution in May, holds 1463; John S. Timmons sold 4500 Philco, holds 5500; Fred W. Rombach sold 2162 Philco, holds 3166; James T. Buckley sold 2000 Philco, holds 19,987; R. L. Heberling gave 32 Philco as gift, holds 23,800 common, 300 pfd.; Robert H. I. Goddard sold 1100 Raytheon, holds 10,500; Percy I. Spender sold 1000 Raytheon, holds 3; William Gammell Jr. sold 412 Raytheon, holds 14,053. Stanley P. Lovell bought 100 Raytheon (June), holds 500; John J. Smith bought 1000 Sparks-Withington (Aug.), holds 3900; I. M. Olsen bought 300 Sparks-Withington (Oct. 1950), holds 400.

Paramount Pictures Corp. and consolidated subsidiaries report net earnings of $4,205,000, or $1.83 on 2,302,125 shares outstanding, for 9 months ended Sept. 29, vs. $4,571,000 ($1.75 on 2,615,619 shares) same period last year. Third quarter earnings are estimated at $1,373,000 (60¢ per share) vs. $1,745,000 (67¢) for third quarter 1950. Figures include earnings of Paramount's KTLA, Los Angeles. Paramount's revenues from its interest in DuMont and other investments are included in separate statement of net undistributed earnings of partially-owned non-consolidated subsidiaries. This amounts to $170,000 for first 9 months of 1951 vs. $1,127,000 last year, $183,000 for third quarter 1951 vs. $298,000 third quarter 1950.

Westinghouse sales hit record $901,042,000 first 9 months of 1951, increase of 23% over $731,054,000 in same 1950 period, but profits fell to $42,757,000 ($2.67 a share) from $49,079,000 ($3.37). Increased taxes were largely responsible for decline, 9-month tax bill totaling $76,822,000, more than double last year's $37,885,000. During third quarter, sales were $310,480,000, profits $11,193,000 (69¢) after taxes of $31,858,000 vs. third-quarter 1950's $269,323,000 & $21,873,000 ($1.52), taxes of $19,554,000.

Merger of John Meck Industries Inc. into Scott Radio Laboratories Inc. (Vol. 7:40, 43) became effective Nov. 16, each Meck stockholder to receive 1.3 shares of Scott for each share of Meck and Scott's capitalization to be increased to 1,500,000 shares, of which 1,006,185 will be outstanding after completion of exchange.

Standard Coil Products Co., pursuant to underwriting agreement of last July 21 relating to 367,500 shares of common stock, released statement Nov. 15 showing that net sales were $38,324,991 for 12 months ended Sept. 30, net profit $3,388,025 after providing estimated $3,332,127 for Federal income taxes.

Dividends: Hazeltine, year end of $1, payable Dec. 15 to stockholders of record Dec. 1; Indiana Steel Products Co., year-end of 40¢, quarterly 25¢, payable Dec. 12 to holders Nov. 10; Webster-Chicago, 25¢ payable Dec. 20 to holders Dec. 10; GE, 75¢ payable Jan. 25 to holders Dec. 21; Gabriel Co., passed dividend at Nov. 8 meeting (though paid 15¢ each of 3 previous quarters this year).

General Precision Instrument Corp. elects to directorships Howard K. Halligan, partner in Cyrus J. Lawrence & Sons, and Norbert A. McKenna, partner in Reynolds & Co.

———•———

Pre-doctoral fellowship in electrical engineering, valued at $2700 annually, has been established at New York U by RCA to be known as "David Sarnoff Fellowship." This is in addition to resident fellowships it has also made available to graduate students at Princeton, California Tech, Illinois, Columbia, Cornell.

ONE BANKER who takes dim view of prospect of making money out of renting feature films to TV—even when there are many more stations—is George T. Yousling, v.p. of Los Angeles' Security-First National Bank. It's "telepix" or "vidpix", as the theatrical trade press calls those pictures made specially for TV, that will eventually pay off, he thinks. At least, so far as banks are concerned which have underwritten costly feature picture productions.

In foreclosing on 8 independent films, banker Yousling looked deeply into TV potential, found he could realize only about $20-25,000 out of rentals, decided there was more money in them from theatrical runs, even on reissue basis. He came to belief, too, that old pictures aren't good TV entertainment, therefore stress should be on films made expressly for TV. He said:

"Today there are only 14 or 15 video markets where you can get pretty good money for motion pictures. Pittsburgh, for example, is on the [coaxial] cable, and the station there isn't apt to pay high prices for pictures . . . buying [only] for filler programs and consequently they won't pay much. What do you think [a film distributor] could get out of Albuquerque? Probably $50.

"If the major studios should reverse themselves and decide to dump their old pictures into TV, the market will be surfeited, and prices will go way down.

"Telepix are the real answer, the way it looks today. Until now the motion pictures have been the biggest segment in Hollywood, overshadowing radio and TV. I think that with the growth of TV [it] will be a terrific factor, but it will be a healthy change, one which will increase the prosperity of Hollywood and of everyone in the entertainment industry. Look at your TV programs today—it's poverty row. But as time goes on, and with more and more able producers entering the telepix field, it's inevitable that TV will give new life to the entire industry."

The "join 'em" attitude is well demonstrated down Long Beach way, where Pacific Drive-In Theatres chain's open air Lakewood Theatre played one Tuesday night to 900 autos instead of usual 350. Reason: Personal appearance of TV star Harry Babbitt on "TV Star Night" during which there was also a drawing for a TV set, orchids for ladies, cigars for men. Star is going to play the circuit, while theatre firm tells public:

"We realize it is nice to sit in a comfortable home 4 or 5 nights a week and watch TV programs. But on that one or 2 nights a week when you have the urge to get out of the house with the family and see a fine, big-screen picture in a festive surrounding, we want your patronage at a Pacific Drive-In."

Hollywood's independent TV outlets, with exception of Dorothy Schiff's KLAC-TV, are "in the red or close to it," says *Hollywood Daily Variety*, citing Paramount's KTLA, *Times'* KTTV and General Tire's KHJ-TV (formerly KFI-TV) as "staggering under a heavy burden of high budgeted programs and overhead, hard put to find angels who will pick up the tab on local shows selling for as high as from $5000 to $6000". Network-owned KNBH (NBC), KNXT (CBS) and KECA-TV (ABC) are reputed to be comfortably in the black.

DuMont had unusually clever publicity release accompanying move of WABD to Empire State Bldg. It comprises copy of memo from allocations engineer Robert Wakeman to research v.p Dr. Thomas Goldsmith. Wakeman reports that "4 chronic troubles" will be alleviated by move: "Westchester Ghost (known in Manhattan as the Park Avenue Ghost), Irvington Shadow, Hackensack Ghost, Inadequate Fringe Area Signal." Hackensack Ghost and Irvington Shadow, incidentally, were due to shadows and reflections caused by RCA Bldg.

Mobilization Notes: RTMA small business committee reports further success in increasing subcontracting of military orders. Chairman A. D. Plamondon Jr. (Indiana Steel Products) told Small Business Conference in Chicago Nov. 14 that some 54 potential subcontractors have registered with RTMA headquarters—about 23% of RTMA's 236 small business members. Of this number, 17 have been requested to submit brochures to prime contractors, and 11 are in line to receive subcontracts. Plamondon said 8-10 additional subcontractors should receive order through the program within next 3-6 months. Small business members of RTMA (750 employes or less) can get information on program by writing Ralph Haarlander, RTMA.

CBS-Columbia's appeal for more materials to make black-&-white TV sets (Vol. 7:43-44), twice postponed, has been set for Nov. 20 before NPA Appeals Board, Dr. T. Munford Boyd, chairman. Since original turndown was appealed, NPA issued new Regulation 6 which spells out conditions under which a company's priority ratings and materials quotas may be transferred when it is sold. In a nutshell, order provides: (1) When purchaser of going concern continues to operate it as "substantially the same business" at same location, he acquires all privileges and limitations granted by NPA to former owner. (2) If new owner discontinues operation, or operates business "for a substantially different purpose," or in different location, he can't continue to use its ratings and quotas without special NPA permission. CBS is seeking higher metals quotas than Air King, which it acquired.

Uncle Sam is being more conservative in his program to aid industrial expansion. That's indicated by DPA's latest list of certificates of necessity for rapid tax write-offs. On previous lists, most electronic industry expansion was granted 5-year amortization on 75% of construction costs. This week's list shows 65% is now the rule. Listed were certificates for these electronic and related projects (at 65%, except as noted): Victor Adding Machine Co., Chicago, fire control systems, $1,258,183; Machlett Labs Inc., Springdale, Conn., tubes, $247,400; Packard-Bell, Los Angeles, ordnance, $239,609; Standard Electrical Products Co., Dayton, aircraft equipment, $80,999. Kenyon Gyro Electronics Corp., Halesite, L. I., $52,191 (70%).

First-quarter allotment of materials for production of TV-radio-phonos, as released by NPA (see story, p. 6): Carbon steel, 19,775 tons (vs. 22,299 in fourth-quarter 1951 & 39,550 in average base period quarter); alloy steel, 18 tons (vs. 52 & 36); stainless steel, 31,004 lbs. (vs. 29,036 & 62,003); copper brass mill products, 506,297 lbs. (vs. 515,301 & 1,477,490); copper wire mill products, 1,577,904 lbs. (vs. 1,696,533 & 3,976,780); copper foundry products, 6380 lbs. (vs. 18,772 & 31,900); aluminum, 756,703 lbs. (vs. 1,200,632 & 2,367,795).

TV-radar combination is to be tried at London airport in effort to speed traffic, particularly since jets are scheduled for regular operations next year. Idea is to transmit maps, radar displays, etc., to TV screens in strategic spots around airport.

Telecasts of Paris UN meetings over CBS-TV just one day late are made possible through use of Paramount's theatre-TV equipment which puts sessions on film in matter of seconds; film is flown to U. S. immediately. Paramount flew 10 tons of equipment to Paris at request of State Dept.

Reynold R. Kraft, 56, Midwest sales mgr. for Fort Industry Co. (Storer), died suddenly last week in his Chicago office. He joined Storer group in July, after serving as Raymer v.p. and before that for 20 years with NBC radio sales. He was a 1917 graduate of U of Illinois, captain of its football team that year, and is survived by wife and son.

Telecasting Notes: Revolt of network affiliates against NBC's Economic Study proposals (Vol. 7:40), or any similar plan by other radio networks, seems to be growing—emphasized by edict of all-industry affiliates' committee, formed during recent fight against network radio rate cuts, that it will vigorously oppose "any arbitrary formula which bases radio rates on the growth of TV circulation rather than on radio's own efficiency" . . . NBC proposals, says committee headed by Paul Morency, WTIC, Hartford (non-TV area), would lead to "destruction of radio" and "radio rates should be based on actual circulation values delivered by radio . . . we resoundingly reject the theory that the installation of a TV set in a radio home eliminates the use of radio in that home" . . . Hats off to CBS for its Nov. 15 round-the-clock blood donor appeals, with so many lively and original plugs in each and every program—very effective for Red Cross and very effective proof of efficacy of "saturation" radio . . . *Saturday Evening Post* shortly to release series of 3 articles on TV by Milton Mackaye, with particular emphasis on its impact on movies . . . *Chicago Tribune* has reduced radio program listings to make way for radio editor Larry Wolters' daily TV column . . . Ontario Motion Picture Theatre Assn. study shows that, though Canada has no TV stations as yet, boxoffice has declined average 6% in Windsor area, opposite Detroit, where every other home has TV set . . . Albert Zugsmith, onetime partner of newspaper-radio broker Smith Davis, now president of American Pictures Corp., Hollywood, reported heading up "Lincoln Network," formed to apply for TV stations in smaller communities in Western states . . . Construction of 1017-ft. tower for Milwaukee's WTMJ-TV has been started, with completion expected mid-1952; job is being handled by International Derrick, which built 1057-ft. tower for Atlanta's WSB-TV and is erecting 1000-ft. structure for WBEN-TV, Buffalo . . . NBC commentator Dick Harkness only network newsman on junket of writers leaving Washington by plane Nov. 16 for London, Paris, Rome and Army installations in Germany, Yugoslavia, Turkey, Greece . . . WBKB, Chicago, Oct. 15 raised base hour rate from $1100 to $1300, dropped old $200 Class A one-min. announcement, set 20-sec. rate at $325 . . . Two-year rights to All-Star Pro Bowl Game in Los Angeles Memorial Stadium, between grid teams of National and American conferences, have been signed by NBC-TV; first is next Jan. 12 at 4:30 p.m. PST (1:30 EST), Los Angeles telecasts excluded, sponsored by L. A. Newspaper Publishers Assn. in behalf of local charities . . . Ethel Barrymore signed by Monogram's new TV subsidiary, Interstate Television Corp., for series of half-hour films dramas titled *Ethel Barrymore Theater of the Air.*

———■———

Chances for NPA approval of large TV-radio construction and alteration projects during first quarter are about same as they were for fourth quarter (Vol. 7:31-41). DPA announced this week that allotments of structural steel next quarter "will be substantially the same" as they have been this quarter, and that demand is about the same. Broadcasters may write their own priority tickets for up to 25 tons of steel, 2000 lbs. of copper and 1000 lbs. of aluminum per quarter (Vol. 7:43). If their projects require more than that amount, they must apply to NPA.

Elliott Roosevelt revealed in Atlanta this week that he's joining E. D. Rivers Jr., son of former governor of Georgia, in a company seeking TV outlets in Atlanta, Savannah and Valdosta; young Rivers owns radio stations in latter cities (WJIV & WGOV), as well as in Decatur, Ga., and E. Memphis, Ark. (WEAS & KWEM), and his father owns radio stations WLBS, Birmingham, and WOBS, Jackson, Miss. Roosevelt also said young Rivers will be partner in firm syndicating programs to small TV stations.

NCAA's restrictive football rules appeared to be disintegrating this week following relaxation of regulations Nov. 10 to permit Michigan State-Notre-Dame game to be televised in Detroit, Lansing and Washington (Vol. 7:45). First wilful violation was by WKZO-TV, Kalamazoo, which "pirated" game after NCAA denied station's request to show game. WKZO-TV president John Fetzer said his action was dictated by "compelling public interest," and indicated he's prepared to put up stiff legal fight against any action NCAA may aim at him. "At the proper time," he declared, "we'll be ready to say plenty." Notre Dame athletic director Edward Krause announced this week he'll fight renewal of the policy at NCAA convention next January. "We want to televise our football games and intend to fight for the right," he said, adding his voice to last week's blast by U of Pennsylvania's Francis Murray (Vol. 7:45). University of Southern California athletic director Willis Hunter, a member of NCAA's 4-man TV committee, this week reportedly was trying to sell TV rights to Nov. 24 USC-UCLA game in apparent violation of rules his own committee is supposed to enforce.

Sponsorship of presidential nominating conventions in Chicago next summer still requires assent of Democratic and Republican national committees—decision awaiting agreement with all networks on "code" for handling of broadcasts and telecasts, expected within week or so. It's definite, though, that political parties cannot share sponsor revenues under Corrupt Practices Act, and spokesman says they don't intend to charge networks any rental fees, etc. TV-radio industry estimates conventions, sustaining, would run at least $5,000,000 in cancelled time and talent, network facilities, etc. Shift in conventions' locale from Chicago Stadium to International Amphitheatre has been interpreted as dictated primarily by better TV facilities at latter, but spokesmen say "economy" was deciding factor—Amphitheatre was cheaper. However, it's estimated shift saves industry from constructing up to $250,000 in facilities.

Sidelight on educational TV: In Nashville, board of education president Dan May and school supt. W. A. Bass told Mayor Ben West they didn't see how schools could afford to build and operate TV station—therefore rejected reservation of channel. Bass also instructed Joint Committee on Educational TV to withdraw his recommendation that channel be reserved. JCET executive director Ralph Steetle then contacted heads of Vanderbilt U, Peabody College, Scarritt College, found them still strong for reservation—so he informed FCC that JCET would continue to support setting aside channel in Nashville.

Suit for $15,000 against WXEL, Cleveland, by couple owning house 265 ft. from tower, was decided in station's favor by Common Pleas Judge Joseph A. Artl Nov. 9. Couple had brought suit March 1950, charging that house had depreciated $15,000 because of tower's presence, that house became smeared during tower-painting, that falling ice endangered and disturbed them. Insurance company took care of paint and ice damages, but station chose to have "depreciation" claim adjudicated to set precedent for itself and other stations.

Paramount hearing, including ABC-United Paramount merger issue (Vol. 7:21, 44-45), is subject of pre-trial conference to be held at FCC Nov. 21 for purpose of "simplification, clarification, amplification, limitation," etc. Idea is to try to eliminate rehashing things already completely settled by Supreme Court decisions, etc. Hearing itself is scheduled for Jan. 15, with Leo Resnick as examiner, Fred Ford, Max Paglin and James Juntilla as FCC counsel.

No weekly Addenda to *TV Factbook No. 13* accompanies this issue of *Television Digest*, for reason that there were no applications, grants or changes to report this week.

REASONING BEHIND AM STATION SALES: Why are so many radio stations being sold lately?

Multi-million-dollar magnitude of WOR & WOR-TV "merger" into General Tire TV-radio combine (Tom O'Neil), proposed last week (Vol. 7:46), led us to ask that question of the leading radio station brokers.

Their consensus: TV...taxes...age. To which several radio station people added: Too many AM outlets for future economic comfort. Here's the reasoning:

(1) "Threat of TV" is worrying some AM operators -- first lest radio face an uncertain economic future, second lest they be frozen out when inevitable scramble for the scarce TV channels begins. They fear there may not be enough such channels to go around; they also fear competition from "the big money" for such channels.

When an AM property is appraised these days, said broker Howard Stark, the first consideration of buyer is "TV potential". There's a good market for good radio properties, he said, but "good" now means how good is possibility of getting TV?

(2) Taxes now take such big bites out of both corporate and personal incomes that there's little incentive among some radio owners to expand, to go into TV, if making money is the prime aim. Hence, says James Blackburn, of Blackburn-Hamilton, there's incentive for owners to sell and take capital gains, and for buyers to buy and secure new depreciation bases.

(3) Age of owners is a definite factor. Some want to retire, taking capital gains out of projects they founded in the '20s & '30s. If they're well on in years, especially if they have no heirs or successors properly intrigued by the challenge of TV and radio's future, their impulse is to quit. Their reasoning is: Why start out all over again in a new and costly risk enterprise?

(4) Number of radio stations continues to mount. Most are doing middling-to-well, despite TV, especially if they enjoy good facilities in good markets and have favorable network affiliations. But conviction is growing that today's 2392 AM stations (to say nothing of 676 FM) cannot possibly survive the changing times.

Actually, FCC has licensed 2289 AM stations to date, issued CPs for 103 more -- or more than twice number before VJ-Day. There are 550 FM licenses, 126 CPs.

* * * *

Whereas there were exactly dozen deals involving changes of TV ownerships (Vol. 7:41) up to time of WOR project, hardly a day goes by without applications to FCC for transfers of control or assignments of licenses of radio stations. FCC says there were 401 such during its fiscal year ended last July 1 and 127 between July 1 and Sept. 1. Not all of these were sales, of course -- but they do point a trend.

Current big AM deal is proposed purchase of Crosley's WINS, New York, with 50-kw daytime and 10-kw night on 1010 kc, by group headed by Elliott Roosevelt and reputed to include Henry Morgenthau III. Price is around $600,000, but Crosley's James Shouse said deal wasn't closed at week's end. It's supposed to be separate

Copyright 1951 by Radio News Bureau

from Roosevelt's reported TV projects in association with Georgia station owner E.D. Rivers Jr., son of the former governor (Vol. 7:46).

Roosevelt's TV plans embrace (1) applying for stations in Southern towns; (2) helping to finance new TV grantees by way of leasing them studio & transmitting equipment; (3) producing low-cost TV programs, including films "in color" because, he's quoted as saying, that's the way TV will be in 2 or 3 years.

SPEED OF FREEZE-END NOW UP TO FCC: Industry's part of "bargain" with FCC to hasten end of freeze -- namely, to confine its comments on allocation plan to paper, in lieu of oral hearings -- is about fulfilled.

It will be up to FCC, shortly, to come forth with final freeze decision with all possible speed -- based on comments which reached total of 1446 as 16 more were filed this week. It's believed just about all comments are now in, and Commission personnel has been "digesting" them as fast as received.

Official deadline in "paper" hearing is now Dec. 17, but everyone had been thinking in terms of original Nov. 26 until 3 weeks ago, when FCC gave more time for comments on U.S.-Mexican border channel changes (Vol. 7:45). Commissioners maintain that extension to Dec. 17 won't lengthen freeze beyond any previous estimates.

Commission isn't actually free to evolve final decision until it has ruled on all petitions filed during paper hearing, particularly those requesting oral presentation. So far, it has denied several such petitions, leaving little doubt balance of requests will get turndown.

But...no matter how fast Commission acts, real end of freeze -- numerous stations on the air -- won't come until well into 1953; in fact, you can expect no heavy flow of new stations until 1954 (Vol. 7:36 et seq).

* * * *

With deliberations on final decision about to begin -- though its issuance still isn't expected before spring -- these questions appear uppermost:

(1) Will educational reservations stick?

(2) Will station spacing be reduced?

(3) Will vhf and uhf applicants be segregated in vhf-uhf cities?

(4) What happens to applicants who went through hearings pre-freeze?

(5) What will be general post-freeze hearing and granting procedure?

* * * *

No pat answers are available on any of these, and Commission hasn't even given much thought to some. But following is "good" speculation, based on current FCC attitudes, past actions:

(1) Educational reservations will stick, in large part -- probably for next year or two. Synthesis of FCC thinking is this:

Reservations were put there for everyone to shoot at, and everyone has had a crack at them. Let's see what the record shows.

Educators' showings have ranged from weak to strong; but same goes for industry. For "strong" showing, an educator doesn't have to prove financial ability to build "tomorrow". Many uhf educational reservations are unopposed; therefore, there's no reason for deleting these -- even if they're poorly supported.

Strong cases have been made by educators in some places where FCC proposed no reservation, e.g., State of New Jersey. State is likely to get educational channels, even if they have to come from FCC's uhf "flexibility" stockpile.

Here's how one commissioner puts it: "We'll make this decision on the record. We did it in color. We'll do it here. We can do nothing else."

Educators' chances are improved, too, by fact Comr. Hennock is remaining on Commission. Presumably, she may be counted as one guaranteed vote for every reservation -- plus. Nor will educators' prospects be hurt by fact Joint Committee on Educational TV chose another "big name", James M. Landis, as legal counsel in absence of Gen. Telford Taylor, now chief of Small Defense Plants Administration.

Mr. Landis has been, among other things, dean of Harvard Law School, member of Federal Trade and Securities & Exchange commissions, chairman of Civil Aeronautics Board -- one of the paladins of President Roosevelt's New Deal.

(2) Station spacing is very likely to be reduced. Great preponderance of comments favor that. Reduction from 180-mile minimum to 165-170 is probable, though Gulf and West Coast spacings are almost certain to be greater -- perhaps 190-200 miles or more -- because of more severe tropospheric interference.

(3) Segregation of vhf and uhf applications is real stickler. On the one hand, FCC is straining every nerve to promote uhf. On other, it fears that if it handles vhf and uhf separately in each city, poorly-qualified applicants may snap up uhf while higher-grade entrepreneurs are locked in battle for vhf. Losers in vhf hearings would then be foreclosed from TV -- even though FCC might like to see them on uhf. Today, the "one pot" philosophy seems to have edge -- all applicants to be thrown into one hearing in each vhf-uhf city, best-qualified to get vhf.

(4) Applicants who sweated out hearings before freeze, some of them long and costly, can't get slightest inkling about their status. Do they have legal rights FCC can't afford to ignore? Can Commission keep them happy, yet satisfy post-freeze applicants? No one has yet riddled that one out.

(5) After final decision, applicants have been virtually guaranteed 60 days in which to file new applications, amend the old. Then, FCC is free to grant uncontested applications and schedule hearings. There will be very few uncontested grants, none in any sizable city -- no vhf at all, one industry attorney thinks.

Hearings will be the bottleneck. Commission hopes to augment its 7 examiners and hearing staff with $600,000 appropriation it's requesting from Congress -- on top of regular budget for year starting July 1952.

* * * *

Though FCC hasn't expected much delay to arise from U.S.-Mexican border allocation, comments on it may give Commission cause for pause. DuMont, for one, proposes changes in 22 border cities, only one of them Mexican. DuMont manages, among other things, to add a channel to both Mexicali and San Diego. But FCC dreads starting another time-consuming round of horse-trading with the Mexicans. For list of proposed changes, see page 12.

NCAA FUMBLES BALL, PUBLIC MAY RECOVER: NCAA's battered college grid TV "experiment" of 1951 ended this week in a sour climax. And the Justice Dept., State officials, Congressmen and the TV broadcasting & manufacturing fraternity -- all supported by the sports-loving public -- were closing in to prevent a recurrence in 1952.

There seemed little doubt that the public, which usually gets what it goes after, would be the winner -- next season. It's unlikely now that the "experiment" -- with its blackouts, bans and surveys -- will be renewed for a second year's run.

"NCAA some time ago was warned that its so-called TV research experiment violated anti-trust laws. They were warned again later and will be informed again today." So Justice Dept.'s litigation chief Victor Kramer told Neville Miller, attorney for Louisville's WHAS-TV Nov. 23 -- thereby resolving all speculation as to whether Govt. was also pointing its finger at NCAA when it filed anti-trust suit against National Football League Oct. 9 (Vol. 7:41).

This week's furore started with request by WHAS-TV and Nashville's WSM-TV for permission to telecast Nov. 24 Kentucky-Tennessee classic at Lexington. Game had been sold out in advance, and NCAA's relaxation of ban on the Nov. 10 Michigan State-Notre Dame clash (Vol. 7:45-46) was cited as precedent.

NCAA rejected request, and fireworks began in earnest. Kentucky's Gov. Wetherby wired Attorney General McGrath to break up NCAA's "illegal conspiracy". Sen. Clements (D-Ky.) followed suit. Then came Justice's "third warning" to NCAA.

Thereupon NCAA re-polled its 9-man TV committee, and -- as if in answer to the Justice Dept., the politicians and the public -- gave its final "no".

Question of renewing TV restrictions will be decided at NCAA convention next January and at regional collegiate athletic association meetings before then. It's no secret that many colleges -- led by Notre Dame and U of Pennsylvania -- are

strongly opposed to renewal, and their ranks are being swelled by others suffering from the unpleasant aftertaste of poor public relations.

Blasting "fallacy of NCAA policy," RTMA sport broadcasting committee chairman J.B. Elliott, RCA v.p. and onetime Georgia Tech grid star, promised nation's TV manufacturers and distributors will work to promote attendance at college football games next fall -- but only "if colleges agree to unrestricted TV in 1952."

"College football has enjoyed phenomenal progress with the development of TV," said Elliott. He also pointed to increased gate at boxing and other sporting events, said TV deserves some of the credit. He cited Walcott-Charles and Louis-Marciano bouts sponsored by TV manufacturers (Vol. 7:28,42) as creating "widespread goodwill [toward manufacturers] among set owners."

COLOR BAN IS EXTENDED TO THEATRE TV: Commercial production of color theatre-TV equipment is now banned -- along with home color sets, converters, adapters, special color parts & subassemblies and closed-circuit "department store" color systems.

NPA order M-90 issued Nov. 20 appears at first glance to be simple "formalization" of TV manufacturers' Oct. 25 no-color-production agreement with defense mobilizer Charles Wilson (Vol. 7:42-43). Actually, it goes further than set makers' pledge to Mr. Wilson as interpreted by industry members who attended that meeting.

Whereas general belief was that the "Wilson agreement" applied only to mass production of home color sets, the formal order, unless changed, puts the kibosh on 20th Century-Fox's plans to make and sell Eidophor with CBS color (Vol. 7:42,45,46). It also puts quietus on any color theatre-TV production by Paramount, RCA, et al.

Order M-90 does not ban commercial production of black-&-white equipment, however -- either for theatre TV or home receivers.

There's always possibility of successful appeal to NPA on grounds theatre color doesn't use much more materials than black-&-white, since it's not a mass production operation like home TV set manufacture. And there's also angle that theatre TV manufacturers weren't consulted before order was issued. When we talked to CBS and 20th Century officials this week they said they hadn't studied order yet, had made no decision on future action.

"The only thing to do is get the order changed," said a 20th Century attorney, "and that's what we're going to try to do as soon as we get figures showing the small amount of materials required to make color theatre equipment as opposed to black-&-white." Film company has been negotiating with GE for manufacture of Eidophor equipment. Another theatre-TV proponent is known to have visited NPA seeking clarification of color order.

* * * *

Inclusion of theatre equipment in order was no accident. NPA officials, technicians and lawyers who drafted M-90 say intention is to ban all types of "commercial" color TV -- and that includes theatre and "non-industrial" closed-circuit color gear. While not specifically mentioned in order, they say both theatre and department store equipment were discussed during the drafting, and it's the "meaning and intent" of order that production of both items be outlawed.

NPA said purpose of order is to avoid any anti-trust implications in manufacturers' agreement with Mr. Wilson. It spells out what can and can't be done in the field of color TV.

Prohibited is commercial manufacture or assembly of "any TV set designed to receive or capable of receiving color TV" -- as well as "any product, attachment or part designed solely to permit or facilitate, or capable only of permitting or facilitating, the reception of color TV."

Specifically exempted from ban is "color TV equipment for use on a closed circuit for industrial [factory] purposes, or by hospitals or educational institutions for instructional purposes."

There's no ban on color-TV research and development, or on color production for defense agencies. Manufacturers and laboratories, in fact, may apply for special allocations of controlled materials (steel, copper, aluminum) and priorities on other materials for this research -- under NPA's long-standing laboratory order M-71 (Vol. 7:27,34). But M-71 puts this brake on "commercialization" of research:

"No person may use any of the materials or products obtained under...this order for the manufacture of experimental models which are to be distributed for the purpose of promoting sales or creating a consumer demand for the article. However, provisions of this order may be used to get materials or products for the production of experimental models which are intended to be used only for scientific or technological investigation, testing, development or experimentation.

"Such experimental models may be made only in the minimum number and the minimum size required to determine the suitability of the article for commercial production and use."

* * * *

Excitement about color Eidophor remains high among 20th Century-Fox, CBS and GE people. Earl Sponable, 20th Century's technical TV chief, arriving from Zurich Nov. 20, pooh-poohed fears of engineers who think system may be difficult to make, ticklish to maintain. "We've had 2-3 months' experience with it and think it's very reliable. We wouldn't have bought into it if we had such fears," he said.

"Very convincing show -- better than anyone else's," is way Sponable characterized recent Zurich demonstrations (Vol. 7:46). "Better illusion than movies."

CBS's Dr. Peter Goldmark, also just returned, is likewise confident -- and miffed about criticisms, particularly those we quoted last week (Vol. 7:46).

"Do you think," he demanded, "that 20th Century and we would play around with it if we thought it had such troubles?" System shown was 525 lines, 150 fields, 8-mc video bandwidth.

"We can use 4 mc, 12 mc, any bandwidth we desire," said Dr. Goldmark. "The field rate will probably be 144 when we bring it here." Asked about horizontal resolution, he said: "That's meaningless. I can produce a better picture with 4 mc than others can with 12. Just read my testimony [in the color hearing]." He was referring to "crispening," etc., he said. Equipment will be changed to operate on 60-cycle current, from European 50-cycle.

Then GE's Dr. Baker got back, told us: "I've never seen any color like it. It's brighter than any movie, and the beauty of it is that you can go to any brightness. Of course, if you go too high, you run into flicker -- but there was none with these pictures. I've no qualms at all about its manufacture. There will be problems, sure, but I have no worries at all. The laboratory work is done; now it's a job of production engineering."

* * * *

NTSC remains focal point regarding color TV for the home, now that the CBS system is out of the picture indefinitely, probably permanently. But NTSC appears to be deliberately quiet about its accomplishments, despite fact it has agreed unanimously and enthusiastically on field-testing specifications of compatible system, and major members are gearing to telecast color signals next month.

NTSC's quiescence is attributed primarily to two principal attitudes:

(1) Simple engineering prudence. As one informed engineer puts it: "This is field testing, and field testing is for the purpose of discovering bugs, if any. Should we make a lot of fuss about these specifications now, only to find that some may have to be changed -- giving some people the notion we're backtracking?"

(2) Fear or caution regarding FCC, particularly Chairman Coy. Number of industry men appear to be so anxious to avoid ruffling Coy's feathers -- despite his relentlessly bitter and condemnatory attitude (Vol. 7:45), and despite fact Coy does not control Commission -- that they have just got around to releasing field-testing specifications for publication next week. There seems to be trepidation lest misinterpretation of field-testing purposes by popular press rile the Commission.

FISCAL REPORT ON A TV STATION: Here's another pertinent testimonial to the up-and-coming telecasting prodigy. It comes from Edward Lamb, the Toledo labor lawyer who founded and operates TV stations WICU in Erie and WTVN in Columbus, and who also publishes Erie Dispatch, owns WTOD(AM) & WTRT(FM), Toledo, and awaits FCC approval of his recent purchase of WHOO (AM & FM), Orlando, Fla. (Vol. 7:41).

Never one to hide his fiscal lights under a bushel, an attitude not shared by his TV confreres, Lamb was one of very first to proclaim the profitability of TV

-- asserting back in 1949 (Vol. 5:42) that his Erie station, which began operating on March 15 of that year as the nation's 57th outlet, was already in the black. This much more he told the Erie Ad Club this week about his now 32-month-old project:

WICU represented initial investment of $350,000, has made money practically from start, had gross billings of $240,000 in 1949, $600,000 in 1950 -- and will go above $1,000,000 this year, very likely some 30% more in 1952.

Revenues derive 30% from the 4 networks (WICU gets programs from all, since Erie, pop. 130,125, is one-station town, thanks to the "freeze"); 28% from local programs; 18% from national spot; 12% from national programs; 12% from local spot. Original staff was 16-18 persons, now is twice that, the average age only 24 years! Original payroll was $1000 a week, now is $3000. Hours on air, due largely to upsurge in daytime programming, have risen from average of 50 per week in 1949 to 80 in 1950 to more than 100 now -- may go up another 15% next year.

Original base rate of $100 an hour is now $500. Cost of operation now runs more than $200 an hour -- high technical overhead illustrated by fact one iconoscope tube may last as little as 500 hours yet costs $1200.

Mr. Lamb didn't reveal his profit figures, though he indicated his Columbus station is also in the black -- albeit it costs more to "vie for a Hooperating" in a competitive town like that (3 stations) than it does in single-station Erie.

"It is not difficult from these figures," he told his Erie audience, "to determine our operating profits or losses. For those persons who may be casting glances in this direction, it is well to remember that TV stations were started at a most unfortunate time tax-wise, and Uncle Sam has taken a very great majority of the profits which accrued.

"The telecaster who begins business under the illusion of making profits from the beginning is in for a shock. Instead, he will see others -- set distributors, servicemen and competing advertising media -- all making the money out of his efforts to furnish a video service."

Note: Mr. Lamb said 95% of TV stations are now operating in the black -- about right. To which we'd add that all but handful are grossing at least $1,000,000 and some, notably network keys, well over $5,000,000 -- one of them due to achieve $8,000,000 this year (Vol. 7:36). Profit figures, of course, aren't being divulged.

Telecasting Notes: Apropos skyrocketing costs of TV talent, caustic *New York Herald Tribune Syndicate* columnist John Crosby sees situation resembling the movie lots back in the old lush days, and observes: "This is just the beginning. With salaries inflating so rapidly, with taxes the way they are, the entertainer can afford to have 2 artist representatives, to have 3 or 4 press agents each with a pretty assistant P.A.; just possibly he can afford to have 2 or 3 mothers. The only fly in this opulent ointment is the National Production Authority, which is getting awfully stingy with its metals. It looks as though there won't be enough Cadillacs to go around" . . . Time costs are mounting, too, evidenced in new rate cards being issued by stations, to be digested in next issue of *TV Factbook (No. 14)* now in preparation for early January publication; whether networks will order another increase next year is problematical, but NBC-TV has rate committee studying idea . . . If you bought one 20-second spot on all the 109 stations now operating (including XELD-TV, Matamoros, Mexico, across from Brownsville, Tex.), it would cost $15,149, according to analysis based on Nov. 1 Class A time rates for film in study by Weed & Co.'s Peter B. James; rates are up, he finds, 10-20% over 1950 average . . . Ginger Rogers signed by CBS-TV to 5-year contract involving "more than $1,000,000," described in *Herald Tribune* as "another wedge in the wall of opposition Hollywood has been putting up against the appearance on TV of its top boxoffice names" . . . NBC-TV's 7-9 a.m. "enlightened disc jockey show" is definite now; titled *Today*, it starts Jan. 7, runs every weekday with Dave Garroway as m.c., news briefs every 20 minutes, day's new recordings—whole show pitched so it can be heard without being watched, though hearers will be urged to "come see this" every now and then; several sponsors in prospect, but rate hasn't been fixed yet . . . NBC-TV daily sign-on is now 10:30 a.m., and for a while it will let 9-10:30 a.m. stay "dark" . . . KNBH, Hollywood, has moved daily sign-on time from 12:30 to 10:30 a.m. . . . Denver's KLZ has no TV yet, but its staff and local agencies and sponsors are being briefed in series of "TV Preparation Clinics"; first speaker Nov. 20 was George L. Moscovics, KNXT, Hollywood, next will be Edward Codel, of Katz rep firm . . . Hal Roach Studios and Official Films Inc. have concluded production-sales tieup, William Morris Agency to handle national sales . . . Bing Crosby will time his TV debut next fall with introduction of his firm's TV tape recording system (Vol. 7:46), according to Nov. 24 *Billboard;* his engineers believe they'll have tape up to adequate quality 6 months from now.

Use of helicopter for field-strength survey of WJZ-TV's new antenna on Empire State Bldg. Nov. 18 appeared to be successful, according to station's consultants Kear & Kennedy. Measurements were taken as craft circled antenna at 2000-foot radius, 1200-1400 feet above ground. First such use of helicopter was with WATV Aug. 1948.

WTTV, Bloomington, this week filed application to replace 2-kw transmitter with 5-kw, increase ERP from 10.8 to 27.1 kw; RCA is supplying Channel 10 transmitter, will rework it for Channel 4 if and when FCC go-ahead is received following final allocations decision.

Personal Notes: Joseph A. McDonald, ABC gen. attorney, has resigned effective Dec. 31 to join NBC administrative staff from which he resigned as asst. gen. counsel in 1945; he's expected to be named treasurer. New acting ABC gen. attorney will be his asst. Mrs. Geraldine B. Zorbaugh . . . Irwin Schneiderman, from New York law offices of Cahill, Gordon, Zachry & Reindel, RCA-NBC counsel, transferred to Washington office, replacing Robert G. Zeller, now stationed in New York . . . Eugene S. Thomas has left staff of WOR-TV, where he has been operations mgr. since Macy's sold WOIC, Washington (now WTOP-TV), which he managed . . . Ward Dorrell, ex-C. E. Hooper v.p., joins John Blair & Co. as research & program consultant Jan. 1 . . . Ralph E. McKinnie, Raymer radio sales mgr., New York, named TV sales mgr. . . . Charles A. Batson, ex-TV director of NAB, named TV director of Broadcasting Co. of the South (G. Richard Shafto), operating radio stations WIS, Columbia, S. C.; WSPA, Spartanburg, S. C.; WIST, Charlotte, with TV applications pending for Columbia & Charlotte . . . Mary Alice Connell named mgr., ABC-TV spot sales service, succeeding Emily Clark, resigned . . . Philip G. Caldwell, engineering director, ABC Western Div., named chairman of broadcast transmission group, auxiliary of IRE, Southern California group being third of kind (others: New York, Boston) . . . Oliver Treyz, ex-ABC, has joined Wm. H. Weintraub agency . . . Richard Fisher, ex-WSAI, Cincinnati, named program director of WJBK & WJBK-TV, Detroit . . . Davis Kees, ex-KPIX, San Francisco, named CBS-TV director of special events, succeeding Robert Bendick, resigned to join Mike Todd Productions . . . Hal Kemp, ex-William Morris Agency, has joined NBC-TV, Hollywood . . . Maurice Morton, ex-William Morris Agency, named asst. to Martin Leeds, CBS-TV director of business affairs, Hollywood . . . Halsey V. Barrett, ex-CBS-TV and DuMont, named Eastern sales mgr., Consolidated Television Sales Inc., program syndicator, setting up offices at 45 W. 56th St., N. Y. . . . Robert O'Brian promoted to western representative, United Artists TV dept., with headquarters in Chicago . . . Jonny Graff, ex-WBKB, Chicago, named sales v.p., Snader Transcriptions . . . Donald Stewart, ex-mgr. WDTV, Pittsburgh, named mgr. of new DuMont Network film dept.

Station Accounts: American Vitamin Associates, which filed bankruptcy petition in Los Angeles Federal Court earlier this month, is being taken over by group of Seattle businessmen, including radio station operators Archie Taft and J. Elroy McCaw; will be recapitalized and renamed Thyavals Inc., confining distribution to Western states, placing ads thru Craig Maudsley Adv., Seattle, including *Dude Ranch* on KLAC-TV, Los Angeles . . . Regens Lighter Corp. (automatic lighters) Nov. 20 started *Solo Drama* on WJZ-TV, New York, Tue. 7:15-7:30 p.m., thru Alfred J. Silberstein-Bert Goldsmith Inc., N. Y. . . . Vim Stores, 42-store New York appliance chain, sponsoring 12 news shows on WPIX, planning for 1952 to double this year's $500,000 TV ad budget . . . Packard buys 26 half-hour films, with option for 39 more to be shot over 3 years, from Bing Crosby Enterprises; titled *Rebound*, first 13 to be placed in Feb., thru Maxon Inc. . . . Picadilly Tobacco Co. for new Picadilly cigarettes, sponsors filmed *Story Theatre* on WABD, New York, Sun. 11-11:30 p.m. starting Nov. 25, thru Hilton & Riggio, N. Y. . . . Sears, Roebuck & Co., for its Coldspot home freezers, Nov. 15 started *Sears Family Showtime*, film show, on WENR-TV, Chicago, 10-10:30 p.m., thru J. Walter Thompson . . . Chick-N-Rich dog food in new campaign, including TV-radio (WOOD-TV, Grand Rapids), thru Arnold Isaak Adv., Chicago . . . Grand Union Co. (chain stores) Nov. 28 starts *Starring the Editor* on WABD, New York, with editor Erwin D. Canham of *Christian Science Monitor* heading panel of metropolitan newsmen in discussions of public affairs, Wed. 9:30-10 p.m., thru Badger & Browning & Hersey, N. Y. . . . Among other advertisers reported using or preparing to use TV: Eastco Inc. (Clearasil proprietary), thru Ruthrauff & Ryan, N. Y.; Allen Products Co. (Alpo dog food), thru Weightman Inc., Philadelphia; Meyercord Co. (Fabri-cals, decals for ironing on fabric), thru Buchanan & Co., Chicago; Clorox Chemical Co. (Clorox household bleach), thru Honig-Cooper Co., San Francisco.

Network Accounts: Network TV's new hit is Aluminum Co. of America's *See It Now*, current-news documentary with Edward R. Murrow on CBS-TV, Sun. 3:30-4 EST, which this week won acclaim of critics. Highly telegenic himself, Mr. Murrow is televised as he sits in control room, discusses events, calls in live scenes or persons on monitors, asks for film shots (Churchill, Eden, Taft, Korea), "talks" with CBS foreign correspondents via films shot few days before. Show looks like one of TV's hottest if Nov. 18 starting pace can be maintained . . . Amoco will sponsor Edward Murrow's Jan. 1 CBS-TV news roundup of year, *Year of Crisis: Challenge of the '50's* Tue. 3-4 p.m., thru Joseph Katz Co., N. Y. . . . Owens-Corning Fiberglas Co. (Fiberglas) starting Feb. 5 sponsors Tue. 1:45-2 segments of *Garry Moore Show* on CBS-TV, Mon.-thru-Fri., 1:30-2:30, thru Fuller & Smith & Ross, N. Y. . . . Kaufmann Bros. & Bondy Inc. (Kaywoodie pipes) Dec. 9 sponsors unnamed show one time from Hollywood on CBS-TV, Sun. 5-6, thru Grey Adv., N. Y. . . . Pabst Beer and Brunswick-Balke-Collender Co., bowling equipment manufacturer, join to sponsor finals of *All-Star Bowling Tournament* from Chicago Coliseum on NBC-TV, Dec. 16, Sun. 10-10:30 CST; preliminaries are being carried on WGN-TV, Chicago . . . Emerson Drug Co. (Bromo-Seltzer) will sponsor first half-hour, Shulton Inc. (Old Spice toiletries) second half-hour of Herman Hickman's *All-American Preview* on NBC-TV, Sat. Dec. 1, after telecast of *Army-Navy* game; agencies are BBDO and Wesley Associates, respectively . . . Christmas Day one-shot by Johnson & Johnson (surgical & baby products) will be *Walt Disney Christmas Show* on CBS-TV, Tue. 3-4 p.m. . . . NBC-TV's *Kukla, Fran & Ollie* Nov. 26 cuts to 7-7:15 p.m., Mon.-thru-Fri., dropping 7:15-7:30 period which is being taken by Bob Elliott & Ray Goulding, radio satirists (sustaining); National Biscuit Co. remains as only *Kuka, Fran & Ollie* sponsor, Wed. segment only, with Tue. & Fri. offered cooperatively, Mon. & Thu. sustaining.

Top college basketball games and other events from Madison Square Garden will be available to TV-equipped theatres as result of deal between Nathan Halpern's Theatre Network TV and Garden Corp. Halpern said he expects Garden events will be distributed to theatres "on the basis of local and regional attraction." TNT will wind up winter sports season with National Invitation Tournament and Olympic Games playoffs. Denver saw its first live theatre-TV football game Nov. 17 when John Wolfberg's Broadway theatre showed Colorado-Nebraska NCAA telecast. All 1000 seats were sold out 24 hours in advance at $2.40.

Transradio Press Service, founded in 1934 primarily to serve radio stations, ceases operations Dec. 1 because, as stated by president Robert E. Moore, of "conviction that the transitions taking place in the whole field of radio and TV no longer encourage the belief that profitable operations are possible for 4 wire news services."

W. Albert Lee, millionaire Houston hotelman, who owns KLEE and sold KLEE-TV (now KPRC-TV) to *Houston Post* last year for $740,000, was found shot to death in his home Nov. 23.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
November 24, 1951

TRADE EVOLVING TO 'NORMAL' LEVELS: Another 26,500 TV sets were lopped off factory inventories last week (ending Nov. 18). At same time, the industry upped production to 115,722 units, highest since mid-April. Fact that week included Armistice Day, holiday in many cities, though Chicago factories worked as usual, may add some significance to both figures.

"Good business" is what the major producers report, echoed by wholesalers and to lesser extent at retail levels. "Nice steady pre-Christmas trade" is evident generally -- but there are still plenty of sets, and it's hard to believe there will be those predicted shortages, over-all, by end of year.

That a "normal" pattern is coming to the business is indicated by fact some manufacturers are again planning distributor conventions during period of Chicago furniture marts (Jan. 7-18), where quite a few will again show their wares.

Both Admiral and Philco plan Chicago conventions, times and places unstated -- and each will have new TV & radio models, though presumably their accent will be on white goods, as usual mid-winter. Motorola will show "short" new line in early January, holding regional meetings first, then calling distributors to Chicago for big parley after they've seen new merchandise. Hallicrafters is only one to announce definite convention plans -- Jan. 7 at Edgewater Beach Hotel.

"Fill-in" models are all that most manufacturers will admit they're going to introduce this winter, though a few privately say lines will be "all new" if you take into account conservation changes, furniture changes, etc. Prices are still an indeterminate factor; only thing sure is that they're not going down.

* * * *

Nov. 18 week's output of 115,722 TV sets (2995 private label) compares with 113,267 preceding week (Vol. 7:46), brings total for first 7 weeks of fourth quarter to slightly over 730,000. Of the 6 more weeks to go, one can be virtually counted out because of holidays. Official output for first 3 quarters was 3,970,857.

Factory inventories went down to 308,897 as of Nov. 18 from 335,439 at the preceding week's end. That figure is about same as first week in April (Vol. 7:16), or just before the big spring-summer inventory pileup and sales recession began.

Week's radio output was 218,908 sets (89,913 private), up about 30,000 from preceding week. Total radios for the 7 weeks was about 2,462,000; for preceding 3 quarters, 10,077,478. Factory radio inventory as of Nov. 18 was 338,336, unchanged. Week's radios were 133,791 home receivers, 18,570 portables, 66,544 auto.

PICTURE TUBES WITH A 'NEW FACE': Next thing in kinescopes appears to be cylindrical face that minimizes reflections from room lights. Among manufacturers, Philco seems to be prime mover, is now shipping a few sets with such tubes, 21-in. Industry in general is trying to gauge whether all 17 & 21-in., perhaps even larger sizes, will evolve to the cylindrical.

Idea is quite simple, though it provided headaches for glass-blank makers:

New face is portion of gently-curved cylinder -- curved in horizontal plane, straight in vertical -- whereas up to now faces have all been portion of a sphere.

Tube is tipped downward in cabinet about 3 degrees, same for accompanying safety glass. This effects substantial reduction in reflections from ambient light. Some manufacturers have already tipped safety glass, e.g., Motorola, with some success. Tipping tube itself and making face cylindrical hikes improvement markedly.

New faces are in all-glass tubes only. American Structural Products Co. (Owens-Illinois) is shipping both 17 & 21-in. Corning has been shipping 21-in. for few months, has just started sending out 17-in. Neither expects really heavy output before first of year. In fact, design isn't considered completely frozen yet. Changes may yet occur before production becomes routine.

Cylindrical face is thicker than spherical, thus heavier, unfortunately -- has to be, since spherical shape is optimum in strength. Inside of face is spherical, however, though ASPC says it had actually made some cylindrical on both sides. Latter was some 25% better in glare-reduction, says ASPC, but it introduced "pincushioning," a distorted picture demanding expensive correction, added components.

How big a boon new face will be provides nice industry argument. Technical men are inclined to think ad-writers will make more of it than warranted. Some say it cuts down viewing angle and makes picture appear somewhat "flatter" than with old face. It provides more square inches than standard 21-in. metal-coned -- 242 total, about 14% increase -- an additional selling point.

* * * *

Only new size in prospect soon is the 27-in. Though Corning displayed all-glass 27-in. rectangular at IRE convention last spring, considerable work on metal-coned rectangular is going on. Its emergence isn't imminent. Engineers say it's a tough one, likely to absorb several months of additional development.

GE is still major maker of 24-in. -- metal-coned, round. But DuMont is now shipping them, too. DuMont is only 30-in. producer. No other major manufacturer has put 30-in. into sets yet, though Hallicrafters plans to show one at Jan. 7 Chicago distributors meeting and number of custom builders intend to make them.

Most work on really big tubes is in metal-coned versions. Yet the glass makers, such as ASPC's Stanley McGiveran, say all present sizes, even larger ones, are "completely do-able" in glass -- and cheaper.

* * * *

Despite these new developments, great bulk of sets, for quite a few months, will be conventional 17 & 21-in. In fact, instead of the traditional rush to bigger tubes, there's something of a re-emphasis on 17-in. currently. This is attributed almost solely to price spread between 17-in. & the 20 & 21-in. sets.

At RTMA Chicago meeting last week, it seemed generally agreed that trend to larger tubes would be accentuated if sales are brisk and if materials shortages pinch during 1952 -- because of greater profit in big-tube sets.

Metal-coned tubes appear to be on wane -- not because steel is so tight but because manufacturers want to be ready if it really gets scarce. Automatic focus and other low-voltage electrostatic types are expected to form large percentage of production during first quarter 1952.

All tube makers report recent upswing in business -- ranging from "it's better, but could be a lot better" to "I wish we could only make more."

MORE MATERIALS FOR SMALL BUSINESSES: New, liberalized CMP ruling should prove boon to hundreds of small electronics manufacturers, beginning in second quarter.

NPA brought some 15,000 additional firms into its "small user" category this week by increasing amounts of materials they may buy without filing CMP applications (Direction 1 to CMP Regulation 1).

This means more small makers of consumer items will receive full amount of their required metals, with no percentage cuts, regardless of the amount they used during the base period.

Small manufacturers may now self-certify orders -- write their own priority tickets -- for materials, if the quarterly requirements for each govt.-classified product they make don't exceed: 30 tons of carbon steel (up from 5); 8 tons alloy steel (up from ½); 3000 lbs. copper (up from 500 lbs.); 1500 lbs. stainless steel (up from none); 2000 lbs. aluminum (up from 500 lbs.).

For example, small TV manufacturer will be able to make about 20,000 sets a year using self-certification system, provided he buys all his parts ready-made. Under old "small user" limits, only TV manufacturers to benefit were those turning out less than about 4000 a year.

NPA set Dec. 22 deadline for other manufacturers to file their second-quarter CMP applications. Many whose applications previously have been processed in Washington will be instructed to file at Commerce Dept. field offices this time.

Topics & Trends of TV Trade: Undaunted by color setback and "making long-range plans," CBS-Columbia Inc. this week announced purchase of new Long Island City plant as part of $5,000,000 expansion program. Plant is 275,000 sq. ft. factory at 48th Ave. & 34th St., now being vacated by Mack Motor Truck Corp. CBS-Columbia hopes to be producing both civilian and military electronic goods in new plant by spring—in addition to present Brooklyn plant.

New assembly lines will be capable of 2000 TV-radio sets daily on top of present 1500-daily capacity, said president David Cogan.

Presumably, production expansion will have to be primarily military for present, since company's request for color materials was turned down by NPA (Vol. 7:42-43), and hearing on its appeal for more materials in general has been postponed repeatedly—again this week, this time indefinitely.

"We're not thinking in terms of 90 days or so," said Cogan. "We're looking beyond the present situation."

Plant will be completely modern, lines "conveyorized," effecting "great savings in production costs," Cogan said. Integrated into new operation will be cabinet production now handled by subsidiary Royal Wood Products Mfg. Co.

Additional types of electronic equipment, other than TV-radio sets and military, will be made by company, according to Cogan. But he said company isn't yet ready to indicate nature of equipment.

* * * *

Most TV manufacturers are dissatisfied with industry's hodge-podge parts warranty policies, said RTMA service mgr. E. W. Merriam to Chicago convention of National Alliance of TV & Electronic Service Assns. Nov. 19. However, he said RTMA "cannot enter into a uniform TV warranty," and suggested NATESA write to each manufacturer "telling him exactly what you want [and] you will see advantageous changes in service policies in not too long a period."

Merchandising Notes: Muntz TV closing 6 stores in Los Angeles, one in Santa Ana, maintaining sales operations in Hollywood and Long Beach, as follow-up to East Coast "consolidation" last week (Vol. 7:46) . . . Regal introducing new 24-in. console at $499.95 . . . Muntz planning both 24 & 27-in. sizes shortly . . . "Sylvania Week" celebrated by Oklahoma distributors-dealers Nov. 24-30 as firm formally opens new 35,000-sq. ft. tube plant in Shawnee, with home office brass on hand.

Voluntary code of ethics to eliminate misleading TV receiver advertising is being formulated by committee comprising New York City's Dept. of Markets, Better Business Bureau and executives of 3 biggest chains: Abram Davega, v.p. Davega Stores (chairman); Jack Winer, president, Dynamic Stores; Leo Mesnick, adv. mgr., Vim. Naming of committee has already resulted in dropping of summons against Vim and its president Max Kassover, charging "untrue and misleading advertising."

Employment in TV-radio industry has increased since midsummer, but still falls far short of level of year ago, despite increasing military production. That's nub of report made this week by DPA task group appointed in September to study possibilities of placing additional defense work in TV-radio plants in Chicago and New York-Philadelphia areas (Vol. 7:38). Group estimated as many as 50% of TV-radio workers in those areas were unemployed last summer, and made these reports on present conditions in the industry: Chicago area—36 firms employed 26,493 workers Nov. 1, 1951, vs. 29,112 July 1, 1950, net decrease of 2619; of these, 17 firms had 1687 more employes on Nov. 1 than on July 1, 1950, and the remaining 19 had 4306 fewer. New York-Philadelphia—14 companies employed 5615 Oct. 1, 1951 vs. 9820 Oct. 1, 1950, decrease of 4205; of these, only one reported increase—100 employes—over 1950 employment.

"Grass roots" reaction to recent clampdown on color production is manifested in unique black-bordered postcard notice captioned "Deaths" circulated by Commonwealth Appliance Co., Allston, Mass. "Obituary notice" reads: "Color TV—died suddenly Oct. 20 of natural causes. Premature birth—incompatibility—overprice. Patrons are invited to "memorial services" at store, where "black-&-white TV will carry on for your pleasure . . . "

Regulation to exempt TV-radio manufacturers and some others from new ceiling price regulations (Vol. 7:45) is under consideration by price administrator Michael DiSalle. This would save them trouble of computing ceilings twice—once before Dec. 19, and again shortly after first of year when tailored price regulations for TV-radio industry are scheduled to be announced. Decision whether exemption order will be issued is expected next week.

Possible vacuum tube substitute, like transistor, is barium titanate, according to Signal Corps scientists who found that compound can amplify and has "memory" characteristics. A 36-page report is available at $2.50 microfilm, $5 photostat, from Library of Congress Photoduplication Service, Publication Board Project, Washington, D. C.

Trade Personals: J. R. (Russ) Little, RCA Victor eastern regional mgr. in New York, resigning to become president of Golden State Co. Ltd., big Califonia dairy products firm, with headquarters in San Francisco. Successor is Wm. L. Rothenberger, sales mgr., tube dept. . . . Charles Penk, v.p., elected president of Allied Electric Products Inc. (Sheldon tubes), succeeding Nathan Chirelstein, elected chairman . . . Harold S. Stamm promoted to adv. mgr., RCA tube dept., succeeding Lawrence LeKashman, resigned . . . Mervin Marcus named operations mgr., TV-radio dept., Krich-New Jersey Inc. (RCA) . . . Warren W. Frebel promoted to v.p. in charge of purchasing, Majestic Radio . . . Edward Barrett, ex-Craigmore Sales, Crosley distributors before formation of factory-owned Crosley Radio & Television Ltd., Toronto, has been named to head sales and distribution . . . Correction: Wm. H. Kelley is acting president of Motorola-New York Inc., retaining post of general sales mgr., Motorola Inc., Chicago.

Dr. Irving Wolff, uhf & radar specialist, promoted from director of tube research to director of research, RCA Laboratories, in series of appointments announced by Dr. E. W. Engstrom, v.p. in charge. Dr. D. H. Ewing, ex-development director, U. S. Air Navigation Board, appointed director of research services; E. W. Herold promoted to director of radio tube research lab; G. H. Brown, director of systems research lab; R. S. Holmes, director of contract research lab.

Percy M. Stewart, partner of Kuhn, Loeb & Co., elected to DuMont board.

To bolster uhf experimental application, and to counter opposition of WEEU (Vol. 7: 33, 38, 43, 45), WHUM, Reading, Pa., told FCC that check of GE and other transmitter manufacturers showed station would have the only high-power uhf transmitter available in country before late 1952. Station says it would get first 10-kw GE unit in second quarter, thus be able to supply valuable propagation data before any commercial stations could get going.

Uhf enthusiast WELI, New Haven, Conn., offers to demonstrate uhf reception to all comers, upon request. in New Haven's Taft Hotel, 18 miles from RCA-NBC's Bridgeport experimental station, with tuners supplied by Crosley, GE, RCA, Zenith.

Financial & Trade Notes: ABC reports net profit of $77,000 (4¢ a share) for 9 months ended Sept. 30, comparing with loss of $877,000 for same 1950 period. Third quarter ran to substantial loss, for ABC had reported net income of $472,000 (28¢ a share) on first 6 months' operations (Vol. 7:33) and $221,858 on first quarter (Vol. 7:26). During 1950, ABC earned $84,605 on sales of nearly $46,000,000. In 1949, it lost $519,085 on sales of $40,000,000, and in 1948 it earned $468,488 on sales of $37,000,000.

Sylvania stockholders this week approved issuance of 200,000 shares of new no par $4.40 cumulative preferred stock, voting also to change no par common to $7.50 par and to issue 550,000 additional common shares to be held for conversion of the preferred. Plan is in accordance with SEC registration filed recently (Vol. 7:44), part of financing program including issuance of $25,000,000 of debentures, $17,200,000 to be used to retire like amount of debentures now outstanding, rest for working capital.

American Phenolic Co.'s sales rose to $18,045,760 during first 9 months of this year from $8,857,700 same 1950 period. Profit was $742,165 ($1.85 a share) after taxes of $1,565,000, compared with $722,710 ($1.80) profit & $540,000 taxes. September quarter sales were $6,936,498, profit $260,239 (65¢) after $765,000 taxes.

RKO Pictures Corp. showed net loss of $1,086,365 for first quarter of this year, net profit of $351,645 second quarter, net profit of $588,816 third quarter, making net loss after all charges $145,903 for first 9 months on total income of $39,417,393. No comparison is available with last year since firm began operations last Jan. 1 when it acquired picture producing and distributing assets of Radio-Keith-Orpheum Corp. in reorganization separating theatre and production-distribution operations.

Dividends: Philco, 40¢ payable Dec. 12 to stockholders of record Dec. 1; United Paramount Theatres, 50¢ payable Dec. 18 to holders Nov. 30; 20th Century-Fox, 50¢ payable Dec. 21 to holders Dec. 5; Loew's, 37½¢ payable Dec. 21 to holders Dec. 11; Sperry Corp., 50¢ payable Dec. 17 to holders Dec. 3; Cornell-Dubilier, 30¢ payable Dec. 27 to holders Dec. 10; I-T-E Circuit Breaker Co., 45¢ payable Dec. 1 to holders Nov. 23; Globe-Union, 25¢ payable Dec. 10 to holders Dec. 1; Driver-Harris, 50¢ quarterly and 25¢ extra, payable Dec. 12 to holders Nov. 30; P. R. Mallory, 30¢ quarterly plus 30¢ year-end, payable Dec. 10 to holders Nov. 26; Oak Mfg. Co., 35¢ payable Dec. 20 to holders Dec. 5; Sprague Electric Co., 50¢ payable Dec. 14 to holders Nov. 29.

* * * *

Hallicrafters earned $678,946, or 82¢ per share on 825,000 shares outstanding, on sales of $35,382,718 for fiscal year ended Aug. 31, 1951. This compares with $1,127,405 ($1.67 on 675,000 shares) on sales of $28,188,220 for corresponding 1950 period. Taxes for this year were $565,000, for last year $750,500. Sales of TVs, says annual report issued this week, accounted for $23,593,317, or 60% of total volume, up 10% from preceding year. Amateur or "ham" equipment totaled $5,144,502, or 14%, up 40% over 1950. Communications equipment on govt. contract totaled $6,645,000, or 19%, up 117%. Military orders received during year totaled $26,137,000.

In proxy statement for shareholders meeting in Chicago Dec. 10, Hallicrafters discloses president Wm. J. Halligan as beneficial holder of 35,900 shares of the 850,000 common outstanding, executive v.p. Raymond W. Durst 34,400 shares, director James R. Cardwell (chairman, Cardwell Westinghouse Co.) 1100 shares, director Leo J. Doyle (Doyle, O'Connor & Co., securities) 1463 shares. Salaries were shown as: Mr. Halligan, $50,000; Mr. Durst, $45,000; sales v.p. Roland J. Sherwood, $35,693.

Mobilization Notes: Conservation will be No. 1 item on agenda Nov. 27 when TV-radio industry has its first industry advisory committee meeting with NPA. Govt. wants to know how manufacturers plan to stretch their slim first-quarter allocations into maximum number of sets. Industry will also be asked to present any ideas on how NPA can improve its allocation service. Other topics to be discussed: interchange of conservation methods among TV-radio manufacturers; importance of properly filling out CMP forms. NPA Electronics Div. chief Edmund T. Morris will discuss outlook for 1952. These executives have been invited: Dorman Israel, Emerson; Jack Marks, Fada; Frank Freimann, Magnavox; John Meck, Scott Radio Labs; Robert Galvin, Motorola; William H. Chaffee, Philco; Robert S. Bell, Packard-Bell; John H. Cashman, Radio Craftsmen; J. Friedman, Trav-Ler; Gordon G. Brittan, Warwick; L. C. Truesdell, Zenith.

Retailers who sell insulated copper wire and other controlled materials to general public may now self-certify controlled material orders to replace depleted inventories. NPA order M-89 sets up formula for orders by retailers dealing directly in controlled materials. In case of copper wire, for example, retailer may order up to $50 worth or 60% of his quarterly base period purchases each quarter. M-89 doesn't apply to installers of equipment such as TV antennas, appliances, etc., but to those who sell actual controlled materials rather than products.

Deal with Britain for 22,045,000 lbs. of Canadian aluminum in next 5 months "unquestionably means the difference between survival and disaster for thousands of small business firms," said DPA chief Manly Fleischmann Nov. 22. U. S. will swap 25,000 tons of finished steel products, 46,000 tons of premium-price steel ingots and 28,500 tons of iron and steel scrap for the aluminum. Said Fleischmann: "Were it not for this added supply, we would have had to reduce the minimum aluminum allotments for the first quarter from the present 20% to 10% of base period use."

———■———

Perfection of underwater TV camera, after 3 years' research, was announced by Navy this week. It comprises remotely controlled unit good for depths of 400 ft. or more. According to Rear Adm. Homer N. Wallin, Bureau of Ships chief, principal advantages are: (1) Great savings in time, e.g., human diver spends much more time descending and ascending than he does on bottom; with camera, operation may be planned in advance. (2) Camera doesn't stir up silt. (3) Various lenses, switchable from ship, give much better view. Gear was developed by Navy scientists J. R. R. Harter and Marvin Lasky. First experiment with underwater TV was during 1946 Bikini atomic bomb tests. This summer, British used such equipment to locate sunken sub *Affray* (Vol. 7:39).

Deception-of-enemy tests with 400 AM stations in 18 northeastern states Nov. 17 were "highly successful," according to first reports received by FCC. TV and FM are not yet being used in setup designed to prevent enemy from using stations' signals as aircraft and guided missile homing beams; during emergency, they'd simply go off air if military deems it necessary. Whole plan is gradually being declassified, virtually everyone to be told how system works before long.

Short interest in TV-radio and related stocks on New York Stock Exchange showed these changes between Oct. 15 & Nov. 15: Admiral, 26,035 shares Oct. 15, to 21,370 Nov. 15; Avco, 20,480 to 20,180; Emerson, 4969 to 5044; GE, 9526 to 10,098; Magnavox, 13,213 to 14,751; Motorola, 15,565 to 14,890; Paramount Pictures, 2755 to 540; RCA, 37,204 to 34,605; United Paramount Theatres, 8080 to 8535; Westinghouse, 6417 to 6332; Zenith, 23,990 to 21,130.

Count of TV Sets-in-Use by Cities

As of November 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

GAIN of 552,300 sets-in-use during October is tallied in NBC Research's monthly "census" for Nov. 1, when total reached 14,555,800—indicating figure will go well over 15,000,000 by end of year. Reflecting improved TV-set sales, this gain compares with 447,500 in September (Vol. 7:43), 284,300 in August (Vol. 7:35), 183,100 in July (Vol. 7:29). All but 29,000 of the October gain were in the 54 network interconnected cities (52 areas). Chicago went up 25,000, now exceeds million mark; New York gained 80,000, Philadelphia 37,000. Again included among the 12 non-interconnected cities (11 areas) is XELD-TV, Mexican-licensed station opposite Brownsville, Tex., with 9900 receivers credited to the U. S. side of the Rio Grande. Following is the Nov. 1 count (consult individual stations for their estimates of number of families within respective service ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	66,000
Atlanta	3	134,000
Baltimore	3	338,000
Binghamton	1	44,800
Birmingham	2	75,200
Bloomington, Ind.	1	17,600
Boston	2	809,000
Buffalo	1	232,000
Charlotte	1	97,300
Chicago	4	1,020,000
Cincinnati	3	290,000
Cleveland	3	530,000
Columbus	3	175,000
Davenport-Rock Island	2	74,000
Dayton	2	152,000
Detroit	3	560,000
Erie	1	55,200
Grand Rapids	1	79,800
Greensboro	1	75,000
Huntington	1	59,400
Indianapolis	1	170,000
Jacksonville	1	42,000
Johnstown	1	120,000

Oklahoma City	1	92,300
Phoenix	1	38,800
San Antonio	2	55,700
Seattle	1	107,000
Tulsa	1	77,500
Total Non-Interconnected	14	778,100
Total Interconnected and Non Interconnected	109	14,555,800

* Preliminary estimate, U. S. sets only.

Note: TV sets sold in Canada totaled 62,466 up to Sept. 30, 1951, according to Canadian RTMA (Vol. 7:45). Since Canada has no stations of its own and nearly all of these sets are in border areas, they add appreciably to audiences of stations in nearby U.S. cities. The CRTMA area count as of last Sept. 30: Windsor 25,447, Toronto-Hamilton 22,993, Niagara Peninsula 10,581, other areas 3445.

Wonderful reading: *Show Biz: From Vaude to Video*, by Abel Green and Joe Laurie Jr., published this week by Henry Holt & Co. ($5). It's a rewrite, in the Broadway vernacular, of the "disa and data" reported in *Variety* over the last 50 years. The chapter headings of Part VII titled "Video Era (1946-5—)" pretty well indicate that phase of its coverage: Veni, Vidi, Video, Vaudeo; Upheaval in Radio; Disc Jocks and LP Versus 45s; The 'Monster'.

Applicants for NPA construction authorization must file form CMP-4C applications by Dec. 15, NPA announced this week. Broadcasters planning construction or alterations which require more than 25 tons of steel, 2000 lbs. of copper and 1000 lbs. of aluminum per quarter must apply for allotments.

DuMont's plan for U. S.-Mexican border vhf allocations (see p. 3), differs in 22 cities from channels specified in international agreement (Vol. 7:45). To avoid disturbing Mexican side of border, DuMont engineers say, they touched only Mexicali—and then only to add a channel. They've made no co-channel assignment less than 180 miles, no adjacent-channel under 70—same as FCC's proposal for U. S. Also, they believe they've moved no more U. S. channels closer to border than they've moved farther away. These are DuMont's proposals for the 22 cities, with channels specified in recent executive agreement in parentheses: Mexico—Mexicali 2, 5 (3). Arizona—Yuma 9, 11, 13 (11, 13); Winslow 7, 11 (none). California—Bakersfield 12 (10); San Diego 3, 8, 10 (8, 10). Nevada—Boulder City 9 (4); Henderson 4 (2); Las Vegas 2, 5, 7 (8, 10, 13). New Mexico—Alamagordo 10 (none); Albuquerque 2, 4, 5, 7 (4, 5, 7, 13); Carlsbad 12 (6); Clovis 7 (12); Roswell 3, 6, 8 (3, 8, 10); Silver City 8 (12). Texas—Alpine 7 (12); Austin 13 (7); Big Spring 11 (4); Midland 9 (2); Monahans 13 (5); Odessa 5 (7); San Angelo 2, 12 (6, 8); Sweetwater 7 (12).

Quick final decision in Paramount hearing—complex affair involving anti-trust histories, movies vs. TV philosophies, ABC-United Paramount merger etc. (Vol. 7:21, 44-45)—just isn't in cards. That much is clear from Nov. 20 pre-trial conference of attorneys conducted by examiner Leo Resnick, preparatory to Jan. 15 hearing. FCC counsel Fred Ford said he hopes hearing will take no more than 3 weeks. Resnick said he has 4 weeks for it, then 7-10 days for another case, after which he'll again be available; he also said he wants parties to file proposed findings. What with all legal contingencies, final decision can't come much before fall or winter 1952. DuMont counsel William Roberts argued for, and got, permission to present his case first—largely one of bringing up to date hoary issue of whether Paramount Pictures controls DuMont. Ford's main efforts were to save time by having parties submit all non-controversial evidence on paper, to which all agreed. Illustrating importance of case, and FCC's eagerness to conclude it, is fact that it's now fulltime assignment for Ford and his assistants Max Paglin, James Juntilla.

Romulo O'Farrill, owner of XHTV, Mexico's first TV station, now 15 months old, also owner of new XELD-TV, Matamoros, opposite Brownsville, Tex., has announced plans to build new $1,500,000 radio-newspaper building to house his station and his newspaper *Novedades*. He's quoted in Mexico City dispatches as saying TV "will put radio completely in the shade in 10 years." His optimism is bulwarked by fact TV set sales now run 1000 a month in Mexico City, and his station's sponsor list includes such names as Ford, General Motors, RCA, Packard, Gillette, Westinghouse, Goodrich, Goodyear, Nash. Rival Emilio Azcarraga's big 26-studio new Televicentro, housing his XEW & XEW-TV, is due to be inaugurated this winter.

"Ground rules" for TV code administration are being prepared by NARTB's TV staffers for submission to TV board when it meets in Washington Dec. 5-7 to act on code itself (Vol. 7:42). Proposed appendix to code will contain additional procedures such as right to representation by counsel at hearings on alleged code violations, swearing of witnesses, right of cross-examination, issue of cease-&-desist orders and other details not included in original draft of code. Many provisions of proposed appendix, suggested by Washington radio attorneys at recent meeting with NARTB TV officials, are designed to answer some lawyers' objections to code draft.

New 1951-52 directory of TV personnel, listing addresses and phone numbers of station, agency and film production personnel, has been issued by *Ross Reports on Television*, 551 Fifth Ave., N. Y. ($7.50).

THE 'HAVE NOTS' NOW WILLING TO LISTEN: As this true believer in the TV destiny sensed things at NBC's affiliates convention at Boca Raton this week, main conclusion emerging from the miasma of facts, figures and forecasts set forth was this:

The relatively few TV "haves" are sitting pretty, the "have nots" living in hopes -- cherished hopes that their still-flourishing radio broadcasting businesses won't go to pot; that the TV freeze will end very soon; and that they will be among lucky ones to latch onto TV channels they spurned only a few years back.

For the simple fact is that, though NBC may have TV affiliates in all 63 TV markets (mostly non-exclusive because most are in one-station areas), mere 34 of NBC's 182 AM affiliates have local TV outlets. And 5 of these are NBC-owned.

In other words, very few heeded the advice urged upon them at NBC's convention in Atlantic City just 4 years ago: "Get into TV."

Among the AM affiliates, indeed, were several major ones who now frankly rue the day they actually turned in TV construction permits they once held!

"I told you so" recriminations weren't the order of the day at Boca Raton, of course, but NBC president Joseph McConnell did take occasion to recall Atlantic City and did advise:

"For those of you who haven't made up your minds yet, this is the time of decision. Maybe some of you think TV is too big for you, or that it is not economically possible in your market. Don't take that for granted. Look into the facts closely and carefully. Weigh the risks and consider the rewards if you do go in, and the results if you stay out.

"If there is a prospect for developing a profitable TV operation in your market, find out about it and make the right decision. It will probably be the most important decision you will ever have to make."

* * * *

Of NBC's 150-odd "have nots", it's now fair to assume that all, or nearly all, will be applicants for TV channels, if they're not already. And to encourage their serious consideration of uhf, where vhf may not be available, an RCA-NBC crew had a working uhf transmitter installed a mile or so from convention hotel, with eight 21-in. RCA sets equipped with external converters yielding excellent pictures.

Chief questions asked, of course, were: (1) How effective is uhf? (2) How much will it cost me to go into TV? There were many ifs & buts, of course, but the answers in simplest terms were:

(1) Uhf works like a charm, particularly over certain kinds of favorable terrain. For details, read the chapter titled "Television's New Horizons" in new RCA booklet just off the press, titled "The Story of Television".

(2) Basic transmission equipment for a new TV station, either vhf or uhf, costs anywhere from $150,000 upward. Other factors, such as studio equipment and real estate, are as variable as in radio -- though generally much more costly.

Copyright 1951 by Radio News Bureau

And to get ideas how to get going, what it costs, etc., RCA-NBC placed their operating and research experience at affiliates' disposal -- and of course there's the obvious advice that they consult existing stations in comparable markets.

* * * *

"Are all those bullish stories about skyrocketing grosses, neat profits and tremendous advertising impact really true or merely ballyhoo?" a group of "have nots" asked one of NBC's top vice presidents, "or is the press, particularly Television Digest, just whooping things up to build TV at expense of our radio business?"

Before the 3-day convention ended Friday, there were plenty of statistical and other answers to add to the many we've published over the last few years. The answers came not only from a super-confident NBC hierarchy, exuding all the cockiness of a winning team, but from still more testimony of the "haves". For example:

McConnell told a newsman that by 1955 the telecasting industry as a whole will enjoy billings, including programs and production, of a cool $1 billion -- making it by all odds the No. 1 medium.

This year alone, he said, national TV network & national TV spot time, plus program sales, will run $325,000,000. That doesn't count local.

Compare that with the $350,000,000 in AM network & national spot (plus programs) as estimated by McConnell for this year. He further frankly told the convention that NBC-radio last year earned a profit of $3,500,000, but this year will lose $500,000 and next year is expected to lose $1,000,000.

Not that he or anyone else at NBC wants to sell radio short; indeed, much of convention was devoted to pep talks about radio's future, including plans for spending $500,000 to "merchandise" network radio and to hold hard-won gains of 25 years.

Proposed readjustments of station rates was a major topic, but that's another long story -- involving many ramifications too thoroughly treated in your radio trade press to require space here.

* * * *

McConnell verified our recent report that the NBC-TV network, quite aside from its own nicely profitable stations, is now slightly in the operating black (Vol. 7:46). But he said the margin is still much too narrow to reduce the 24 hours of so-called "free time" per month now required of affiliates. Those 24 hours still don't pay off the high cost of interconnection and kinescope services, he said.

NBC's youthful president is the one topkick in the RCA army, let alone the whole field, who has consistently insisted that network TV can be made to pay -- though he's quick to say, as did CBS-TV vice president Joseph Ream not long ago (Vol. 7:36), that real profits in TV as in radio must come from owned stations.

It's well known now that only a handful of stations among the 108 on the air are still in the red, and it's now a fact that any with gross revenues under $1,000,000 are exceptions. There are several "pushing" $5,000,000 grosses, and NBC's New York key WNBT is reliably said to be enjoying current billings in excess of an $8,000,000 rate (Vol. 7:36).

* * * *

TV stations are becoming increasingly reluctant, quite understandably, to divulge their gross and net figures -- but enough of these are being disclosed to give a pretty good idea of the trend. McConnell himself, for example, cited the case of a TV station "north of Chicago" which he told the convention reaped sales of about $2,000,000 during 10 months of this year, thus probably earned profit before taxes of at least $850,000. Year's gross profit, he calculated, should about equal the station's original investment.

Reference obviously was to Milwaukee's WTMJ-TV, one of first to hit the black -- and there was much conjecture why McConnell singled out this one for such publicity, albeit in closed session. It's understood Milwaukee Journal and WTMJ are subject of article in forthcoming Fortune, citing these and other statistics.

Another pioneer station, which we're not free to name, admitted in corridor conversation that its gross will go well over $2,000,000 this third year of operations; it's alone in a major Midwest market. Another, in a very much smaller market

and as yet non-interconnected, boasted that it's currently operating at a gross rate of $1,800,000, will actually do $1,500,000 this year, expects to achieve $3,000,000 within 2 years.

Exactly what TV stations did financially in 1950 will be known in about two weeks when FCC issues official report, with breakdowns on the 93 non-network-owned stations. Commission will do for TV what it has long done for AM & FM (which report will include) -- analyzing operations in terms of: (1) Capital and operating costs. (2) Revenues -- national, local, network. (3) Profits before taxes.

As for mounting valuations on TV franchises, auguring what will turn out to be a mad scramble for such golden facilities when freeze ends, there's case of an AM-TV combination in a major Midwest market (not Chicago) whose chief owner said he had recently turned down an offer of $9,000,000!

FCC SETTLING DOWN TO FREEZE PARLEYS: FCC mounts first full-scale attack on freeze next week, having set aside 2 full days for job. Where freeze goes from there, and how fast, depends very considerably upon whether FCC "buys" staff's work to date.

Discussions will cover gamut of issues, from general principles to specific allocations. Target date for final decision is Feb. 1, with grants to start April 1, according to Chairman Coy, who gave those dates to Baptist convention in Washington this week. Some at FCC agree dates are "targets", but consider them optimistic. Next week should produce better basis for guesstimates.

Though Commission is preoccupied with decision-making process, it has had "open door" for suggestions on handling applications post-freeze. Last week, Communications Bar Assn. came across with first industry recommendations:

(1) Adopt the "one pot" theory in mixed vhf-uhf cities and consider all applications and channels together -- unless applicant stipulates vhf or uhf only.

(2) Give 60 days for filing new applications and amending those on file.

(3) Provide "cut-off" date at end of those 60 days -- no applications filed thereafter to be allowed into hearings with those already on file.

(4) Extend from 20 to 40 days the "protection" afforded applicants set for hearing. Present rules permit applicant to join hearing any time up to 20 days before start of hearing.

Bar Assn. made no recommendation on how to handle those applications which went through hearings before freeze. Commission sources don't even speculate about chances for special consideration for these, but one particularly well-informed industry attorney says: "Not a chance. They'll start from scratch with everyone else. Those hearings are 3-4 years old. In some cases, the channels they were seeking won't be there; people die; finances change; engineering is brand new; programming is entirely different. What else can the Commission do?"

* * * *

Question of adequate materials for station construction was raised during Baptist convention, and RCA's A.R. Hopkins ventured there would be some shortages in late 1952, early 1953. But he said he was figuring on some 200 TV grants during first full year after end of freeze -- an unusually optimistic forecast.

Coy foresaw no greater materials bottleneck than the delays caused at FCC by numerous hearings, limited manpower. He expected 1000-1200 stations to be built by end of 1956 -- assuming no worsening of materials situation.

* * * *

The "satellite" idea has piqued imaginations of more people since Comr. Sterling commented favorably on them in recent speech (Vol. 7:44). Satellites are simply stations serving small or sparsely populated areas -- programmed solely by network or big-station feeds. Asked about such stations by Baptist group, Coy's answer was definitely negative:

"You can't get local expression that way. That is more important than merely adding a lot of people to the service area of some big-city station. We must first see whether channels are taken up by regular stations in these small towns. What would happen if we parceled out these channels now, only to find later that people are ready to build regular stations in these towns?"

NETWORK EXTENSIONS ACCELERATING: When new TV markets open, will AT&T be far behind? As new stations go on air, will they be able to tap immediately into TV's microwave-coaxial arteries for infusion of network programs? What's more, when can existing non-interconnected stations expect boost network service always brings?

There are no blanket answers to those, naturally, but there's reason to believe AT&T may make somewhat better time than it has officially indicated so far. Ever-conservative AT&T is last one to stick out its neck, always beats completion dates by weeks or months -- as it did with Omaha-San Francisco link (Vol. 7:36).

Three main extensions to existing markets are currently in works: (1) Kansas City to Oklahoma City, Tulsa, Ft. Worth, Dallas, San Antonio and Houston. (2) Jackson, Miss., to New Orleans. (3) Jacksonville to Miami.

"Second half of 1952" has been AT&T's official estimate for completion of those links. But this week, Carl Wideberg, eastern mgr., Long Lines Div., told Nov. 27 meeting of Southern Baptist Convention in Washington that he hoped extensions would be completed in 6 months. Queried after meeting, he said target is actually Oct. 1, but "we hope to do it in 6-8 months. We'd like to have them operating by time of the political conventions next year [July]."

Some AT&T engineers are very dubious about the "6 months" estimate, saying Oct. 1 still looks like the date. FCC's common carrier experts venture that Miami could be linked "in very short order -- about 2 months" since coaxial is now in; that October may or may not be good guess for other 2 extensions. There's this exception: Dallas could conceivably be fed via coaxial from Jackson "in couple months" if AT&T released channel currently used for telephone maintenance.

Sometimes forgotten in considering new links is fact some are going through sizable non-TV cities. Virtually everyone knows microwave hits Denver, but not so well known is fact it also passes through Sacramento, or that extension from Kansas City will hit Wichita and Austin.

It isn't mere flip of the wrist, however, to tie in even these new cities. According to AT&T engineers, company must have adequate prior notice for time to install terminal equipment and local loops.

* * * *

How fast AT&T can get to other markets not on its announced agenda depends primarily on these criteria, according to AT&T spokesman:

(1) Prior notice. "The minute a station operator has any idea when he'll want service, he should come to us. Only then can we plan."

(2) Equipment availability. "There's no limitless stockpile of microwave and coaxial equipment. It has to be built. We have to know how much to build."

(3) Distance and "density". Lonely station, hundreds of miles from existing network facilities, undoubtedly has long wait. On other hand, group of big-city stations within 50-100 miles of each other are bound to get snappy action. But AT&T insists "a 3-hop microwave relay may very well take no longer than a single hop."

Privately owned microwave relays, operated by stations themselves, are another possibility. FCC will still grant them, but warns stations they must be prepared to amortize them quickly by time AT&T brings service to town. Operating such links today are: WTTV, Bloomington; WJIM-TV, Lansing; WKZO-TV, Kalamazoo; WSM-TV, Nashville; WSAZ-TV, Huntington.

Another technique for "anticipating" AT&T is that of picking neighboring station's signal off air -- as do San Diego's KFMB-TV and Grand Rapids' WOOD-TV.

TV MONEY LURING MORE 'A' PICTURES: Top-Hollywood-films-to-TV issue continued toward climax this week with disclosure that one of most important independent producers of "A" pictures -- David O. Selznick -- is offering some of his best and not-too-old properties for showing on TV screens (Vol. 7:31).

Other first-grade pictures were finding their way to TV, meanwhile, via the bank foreclosure route -- some at prices hitherto regarded as fantastic. Big movie studios, still withholding their old films, were watching heavy coin change hands, possibly mulling this $64,000 question: Can TV pay the price?

And cries of anguish, predictions of impending doom were emanating from the theatre owners, who would suffer most from any large-scale release of films to TV.

Most significant film deal to date -- if it comes off -- will be release of 12 big Selznick films to TV for $2,000,000 for 4 showings in 2 years in 63 markets. If Selznick gets what he wants, more producers undoubtedly will be convinced that TV income is worth "making the break."

Deal includes "Third Man," "Since You Went Away," "A Bill of Divorcement," "Intermezzo," "Rebecca," "Portrait of Jennie," "I'll Be Seeing You," "Spellbound."

Selznick has granted 90-day option on films to Bruce Eells & Associates, transcription firm, according to Nov. 28 Variety. Eells, says Variety, "is tied in the deal with some of the biggest men in the radio-tele station field. They include Tom O'Neil, head of Yankee Network; Frank Schreiber, WGN & WGN-TV, Chicago, and George Storer [owner of 4 TV stations]."

This group is trying to set up organization of TV stations to finance purchase of the 12 films, and possibly also some films-for-TV to be made by Selznick. Says Variety: "Difficulty is...that the sum is far beyond what the best of features now available for tele are bringing. The $2,000,000 would average about $166,000 per film. With 63 markets available...the average cost per station would be about $2650. Since even the big New York stations pay only about $2000 per picture, Selznick's demand is considered high."

* * * *

More "A" features are coming to TV from the banks, which aren't particularly concerned with problems of producer-exhibitor relationships and movies-vs.-TV. What they're interested in is recouping their losses, and TV sponsors' money is just as good as anyone else's. Matter of fact, there are some who feel it's natural for banks to look to new medium to help recover their investments in big films that did not pay their way at the boxoffice.

Highest priced film-to-TV deal to date resulted from recent bank auction. Charles Weintraub's Quality Films, of Hollywood, this fall bought TV rights to some 58 pictures from New York's Chemical Bank & Trust Co. Quality recently leased 26 of them to DuMont for 3 runs in 20 markets at whopping price of $1,800,000.

A top feature film can net about $64,000 on TV if it's shown in 64 markets and proper sales methods are used, Weintraub estimates -- taking issue with George T. Yousling, v.p. of Los Angeles' Security-First National Bank, who holds that the most a film can reap from TV is $20-25,000 (Vol. 7:46).

Evidently plenty others disagree with Yousling. Bank of America is putting up some 25 high-budget theatre films for auction to TV. Some were produced as late as 1947 and feature James Stewart, Jane Wyman, Charles Boyer, John Garfield.

* * * *

Strongest opponents of feature-films-to-TV, of course, are the theatre owners. Unanimously, they see disaster lurking in any such move. The authoritative Motion Picture Herald put this question to several hundred exhibitors, large and small, rural and urban:

"What would happen to your business if the producers were to sell motion pictures made for theatres for use on TV (either regular or subscriber-fee TV)?" Here are some typical replies:

"Ruinous." "It would close our doors." "A crusher -- to both producers and exhibitors." "Theatre business would be destroyed." "Mediocre TV programs have been responsible for our inability to operate at a profit. Improvement of these programs would be even more disastrous." "Pictures should be at least 3 years old before being shown on TV." "If [TV stations] ever get quality pictures, even as old as 3 years -- brother, we are in trouble!"

From 25% to 90% of theatres would be shut down if Hollywood pictures were sold freely to TV, exhibitors variously estimated.

Theatre owners themselves -- especially big chains -- have grandiose plans for TV -- theatre TV, that is. Oft-expressed wish of the exhibition magnates is to

revive the "2-a-day" on nationwide basis, with "stage shows" via big-screen TV to supplement film fare simultaneously in hundreds of cities.

This idea may get 2 tests before Christmas. Fabian chain hopes to pipe Judy Garland's hit stage show from New York's Palace to theatres in the hinterlands via closed circuit. And Nathan Halpern's Theatre Network TV is known to be working on similar plan involving Radio City Music Hall's annual Christmas pageant. One of the biggest obstacles in both cases is negotiating pay scales with talent unions.

FCC CHAIRMAN WAYNE COY commended efforts of telecasters "who have initiated the movement for a realistic and effective code for TV," speaking at Nov. 27 meeting of Radio Comission of Southern Baptist Convention in Washington. Code is scheduled to be formally adopted at NARTB TV board meeting in Washington Dec. 5, which will be followed Dec. 6-7 by meetings of full board.

Mr. Coy told Baptists that Commission received 448 complaints regarding TV & radio last month. "In TV," he said, "chief cause of complaint pertained to indecency, obscenity or profanity. This elicited 76 complaints out of a total of 149, or 51%." Advertising of alcoholic beverages led all radio complaints, totaling 240 out of 299, or 83%, but for TV these complaints totaled only 48 out of 149, or 32%. Only 5 of the TV complaints alleged refusal to grant broadcast time for expression of particular points of view (vs. 9 radio complaints), none charged attacks on religious faiths (vs. 4 on radio). "I believe," FCC chairman declared, "that a conscientious effort on the part of the industry would be sufficient to clear up 99% of the offensive material on the air."

In response to question from floor, Mr. Coy said telecasters are sensitive to public protests, expressed hope that TV code will "achieve better results" than radio code. "There are only 108 TV stations, compared with some 2500 radio stations. Therefore, these relatively few TV stations may be able to set a standard which new stations will be able to follow," he said. "It's a lot different from trying to get agreement among 2500 stations."

Patent No. 2,571,386, granted RCA chairman David Sarnoff and described in October *Official Gazette* of U. S. Patent Office, covers an "automatic early warning system" for national defense. System, says RCA, "combines the principles of TV, radar, microwave relay and the latest methods of detection and direction-finding." Patent involves string of planes relaying information to a central headquarters, includes: (1) Method of dispatching fighter aircraft, directing them to enemy planes, etc. (2) Method of intercepting control signals of enemy guided missiles and jamming them or "counter-controlling" the missiles. (3) "An improved radar fence with a greater depth of protected area." For peacetime service, system is designed to transmit TV, Ultrafax, etc., overseas. Gen. Sarnoff first mentioned possibility of using chain-of-planes for transoceanic TV during unveiling of Ultrafax (Vol. 4:43).

New appointments in FCC's Broadcast Bureau, which have been in effect for months, were announced officially this week: Broadcast Bureau—Lavelle W. Hughes, administrative asst. TV Facilities Div.—Joseph N. Nelson, chief, applications branch; Hart S. Cowperthwait, chief, technical branch. Aural Facilities Div.—David S. Stevens, chief, new & changed facilities branch; Wallace E. Johnson, chief, existing facilities branch; Bruce S. Longfellow, chief, allocations branch. Renewal & Transfer Div.—Walter R. Powell, chief, transfer branch; Sol Schildhause, chief, renewal branch; LeRoy Schaaff, chief, compliance branch. Hearing Div.—Robert J. Rawson, asst. chief. Rules & Standards Div.—Arthur Scheiner, asst. chief.

SWEEPING PATENT-DISCLOSURE rule proposed by FCC this week is designed to enable Commission to fulfill its anti-trust duties under Communications Act, according to Commission sources. Proposal is undoubtedly aftermath of lengthy grilling FCC gave RCA, concerning its patent pool and licensing procedures, during color hearing (Vol. 6:18-19), but there's serious question whether Commission is equipped to give subject kind of attention it presumably wants to. It has but one attorney, William Bauer, with lengthy patent experience.

Just how extensive rule would be is apparent from reading of proposal (Public Notice 51-1151, Doc. 10090), which covers just about everyone and every patent concerned with any service under Commission's jurisdiction. On each patent, FCC would require lists of uses, licensees, agreements and statement of licensing policies.

Comments and briefs on proposed rule will be accepted until Jan. 5, after which Commission will consider whether to conduct oral argument.

Exclusive use of TV Channels 5 & 6 (76-88 mc) and FM Channels 251 to 300 (98-108 mc) by Mutual Telephone Co. of Hawaii is contemplated in notice of proposed rule-making (Public Notice 51-1166, Doc. 10094) issued by FCC this week. Phone company had petitioned Commission on June 8, 1951, claiming that cables couldn't be used and that it achieved unsatisfactory results in tests of 30-50 mc, 460 mc, 2000 mc, 3700 mc and above. Company says new allocation would leave plenty of TV and FM channels for "full and ultimate development" of the services in Hawaii. FCC's proposed allocation plan (see *TV Factbook No. 13)* includes no assignments on Channels 5 or 6; no FM stations are operating or applied for in Hawaii. FCC will accept comments on proposal until Jan. 11, replies 20 days later.

Famed, bitter Richards case (Vol. 7:22, 24) came to close this week, with FCC's renewal of licenses of 3 stations owned by late G. A. (Dick) Richards—KMPC, Hollywood; WJR, Detroit; WGAR, Cleveland. Commission ruled that Richards' death, May 28, 1951, rendered moot the question of whether he directed that newscasts be slanted, and accepted statement of Richards' widow to effect stations would adhere to "an exemplary code" in future operations. Comrs. Coy and Hennock concurred, but said they wanted it made clear they frowned on "conduct which manifests a disregard of the goal of objectivity in news presentation . . ." Comr. Walker dissented on grounds hearing examiner should have issued findings and conclusions before Commission decided whether to dismiss case.

NTSC compatible color field test specifications, which NTSC hopes will prove satisfactory for submission to FCC in shape of proposed standards early next year, are reprinted and included herewith *(Supplement No. 75)* in handy form for use of technical staffs.

How FCC's technical "detectives", in Monitoring Division, track down outlaw stations is subject of 2-part article by Robert M. Yoder, starting in Dec. 1 *Saturday Evening Post.*

To test FM pulling power, Zenith's national hearing aid spot campaign employs identical transcriptions for AM and FM stations, but asks listeners to write to different box numbers.

NTSC Color Field Test Specifications

Technical Details of Signal to Be Tested During Forthcoming Months

Released for Publication Nov. 26, 1951, by Dr. W. R. G. Baker, Chairman, National Television System Committee

NATIONAL Television System Committee (NTSC) this week released detailed technical specifications of the signal to be used in field tests of compatible color TV. Among stations to broadcast the test signals during forthcoming months are:

RCA-NBC's WNBT, New York, using experimental call letters KE2XJV on Channel 4; DuMont's KE2XDR (708-714 mc), New York, employing signals originated by station and signals microwaved to station from Little Neck, L. I., by Hazeltine Electronics Corp.; Crosley's WLWT (KQ2XBO), Cincinnati, Channel 4; GE's KE2XHX, Syracuse, using any desired vhf or uhf channel; RCA-NBC's WNBW (KG2XDE), Washington, Channel 4; RCA-NBC's KG2XAK (529-535 mc) and KG2XCY (850-856 mc), Bridgeport; Philco's WPTZ (KG2XDU), Philadelphia, Channel 3; Zenith's KS2XBS (Channel 4) and KS2XBR (512-528 mc), Chicago.

In releasing the information, NTSC chairman Dr. W. R. G. Baker stated that the specifications were unanimously adopted by the Committee, which consists of technical experts of the industry. The specifications will serve as the basis of tests to investigate field performance of compatible color TV.

The purpose of publishing the specifications in the technical press is to permit all segments of the radio-television industry, manufacturers, consulting engineers, broadcasters, servicemen, amateurs and experimenters to participate in the tests. Reports of such participation are solicited and should be sent to Dr. Baker, care of the General Electric Co., Electronics Park, Syracuse.

The test specifications are divided into 2 groups—first comprising the FCC standards now authorized for black-and-white TV service; second consisting of supplementary specifications relating to the transmission of color values.

The full text of the specifications follows:

TEST SPECIFICATIONS—GROUP I
(Summary of FCC Standards)

(1) The image is scanned at uniform velocities from left to right and from top to bottom at 525 lines per frame, 60 fields per second, interlaced 2-to-1.

(2) The aspect ratio of the image is 4 units horizontally and 3 units vertically.

(3) The black level is fixed at 75% (± 2.5%) of the peak amplitude of the carrier envelope. The maximum white (brightness) level is not more than 15% of the peak carrier amplitude.

(4) The horizontal and vertical synchronizing pulses are those specified in Appendix I of the *FCC Standards of Good Engineering Practice Concerning Television Broadcasting Stations* (for black-and-white transmissions, dated Dec. 19, 1945, as amended Oct. 19, 1950), modified to provide the color synchronizing signal described in Specification 21 (Group II).

(5) An increase in initial light intensity corresponds to a decrease in the amplitude of the carrier envelope (negative modulation).

(6) The television channel occupies a total width of 6 mc. Vestigial-sideband amplitude-modulation transmission is used for the picture signal in accordance with Appendix II of the *FCC Standards of Good Engineering Practice.*

(7) The sound transmission is by frequency modulation, with maximum deviation ± 25 kilocycles, and with pre-emphasis in accordance with a 75-micro-second time constant.

(8) The radiated signals are horizontally polarized.

(9) The power of the aural-signal transmitter is not less than 50% nor more than 150% of the peak power of the visual-signal transmitter.

TEST SPECIFICATIONS—GROUP II
(Supplementary)

(10) The color signal has the following composition

$$E_m = E'_y + \frac{1}{1.14}\left\{\frac{1}{1.78}(E'_B - E'_y)\sin\omega t + (E'_R - E'_y)\sin(\omega t \pm 90°)\right\}$$

where

$$E'_y = 0.59\,E'_G + 0.30\,E'_R + 0.11\,E'_B$$

Notes: In this expression the symbols have the following significance:

E_m is the total video voltage, corresponding to the scanning of a particular picture element, applied to the modulator of the picture transmitter.

E'_y is the gamma-corrected voltage of the monochrome (black-and-white) portion of the color signal, corresponding to the given picture element. This signal carries all of the luminance information.

E'_G, E'_R, and E'_B are the gamma-corrected voltages corresponding to the green, red and blue signals intended for the color picture tube, during the scanning of the given picture element.

ω is 2 π times the frequency of the color carrier. The phase reference of this frequency is such that the color synchronizing signal (See Specification 21 below) corresponds to an amplitude modulated signal of the form cos ωt. t is the time.

The plus or minus sign (±) near the end of the expression indicates that the phase of this component is alternately advanced and retarded by 90 degrees on successive scanning fields with respect to the stationary color phase alternation axis (see Specification 20 below).

The portion of the expression between brackets represents the color subcarrier signal which carries the chromatic information.

It is recommended that field-test receivers incorporate a reserve of 10 db gain in the chromatic channel over the gain required by the above expression.

(11) The primary colors referred to by E'_R, E'_G, and E'_B have the following chromaticities in the I. C. I. system of specification:

	x	y
Red (R)	0.67	0.33
Green (G)	0.21	0.71
Blue (B)	0.14	0.08

(12) The color signal is so proportioned that when the color subcarrier vanishes, the chromaticity reproduced corresponds to illuminant C (x = 0.310, y = 0.316).

(13) Gamma correction is such that the desired pictorial result is obtained on a display device having a transfer gradient (gamma exponent) of 2.75. However, the equipment used is capable of an overall transfer gradient of unity. The voltages E'_y, E'_R, E'_G and E'_B in the expression in Specification 10, above, refer to the gamma-corrected signals.

(14) The color subcarrier frequency is 3.898125 mc ±0.001%, with a maximum rate of change not to exceed 1/3 cycle per second per second.

(15) The horizontal scanning frequency is 2/495 times the color subcarrier frequency. This corresponds to 15,750 cycles per second.

(16) The bandwidth assigned to the monochrome signal E'_y is in accordance with the FCC standard for black-and-white transmissions, as noted in Specification 6 above.

(17) The bandwidth assigned prior to modulation to the chromatic signals $(E'_B-E'_y)$ and $(E'_R-E'_y)$ is not less than 1 mc at 6 db attenuation. A gradual cutoff characteristic is used.

(18) The bandwidth assigned to the modulated color subcarrier extends to at least 1 mc at 6 db attenuation below the color subcarrier frequency and to at least 0.4 mc at 6 db attenuation above the color subcarrier frequency.

(19) To assure that all the components of the color signal shall coincide in time at the second detector of the receiver, delay compensation is used such that a sinewave, introduced at the transmitter color-signal input terminals, produces a radiated envelope having a relative time delay vs. frequency characteristic within +30% and 0% of that specified in Fig. 13 of RMA report TS 1.2-3005-A (Figure I herewith), except that the ordinate scale may be multiplied by a factor of 1.0 to 1.5.

(20) The color phase alternation implied by the (±) sign in Specification 10 is such that the color subcarrier phasor representing $(E'_R-E'_y)$ shall lead the phasor representing $(E'_B-E'_y)$ during the scanning field following the vertical sync pulse in diagram (1) of Appendix I of the *FCC Standards of Good Engineering Practice Concerning Television Broadcasting Stations*, Dec. 19, 1945, and shall lag following the vertical sync pulse shown in diagram (2) of that Appendix. The stationary axis of the color phase alternation corresponds to the $(E'_B-E'_y)$ phasor.

(21) The color synchronizing signal is that shown in Fig. II. This signal corresponds to amplitude modulation of a continuous sinewave of frequency $\omega/2\pi$.

(22) Signals outside the assigned channel shall be attenuated at least 60 db below the peak visual signal amplitude.

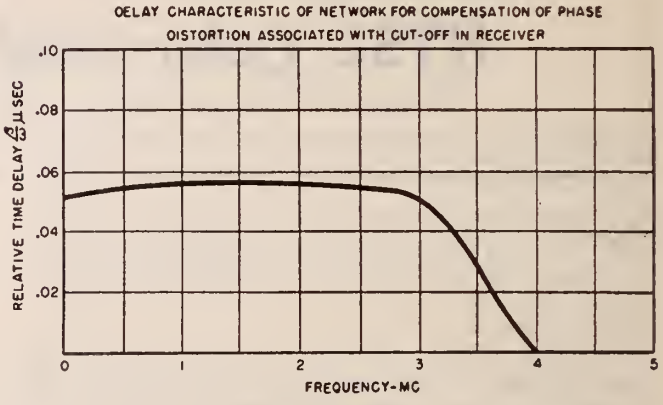

Fig. I

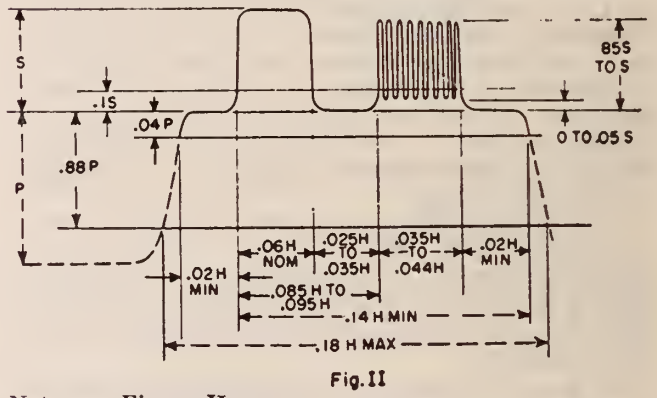

Fig. II

Notes on Figure II:

(1) This waveform is that which exists at the studio before transmission over limited bandwidth circuits.

(2) The burst frequency shall be 3.898125 mc ± 0.001% with a maximum rate of change not to exceed ⅓ cycle per second per second. The horizontal scanning frequency shall be $\frac{2}{495}$ times the burst frequency.

(3) The burst follows each H. pulse. It is omitted following the equalizing pulse and during the broad vertical pulse.

(4) Vertical blanking 0.07 to 0.08V.

Telecasting Notes: One of radio's most venerable programs, 21-year-old *Carnation Contented Hour* on NBC, ends in January, dropout attributed to TV since Carnation is making *Burns & Allen* show weekly instead of bi-weekly; another top-rated program, General Food's (Maxwell House) *Father Knows Best*, on CBS for 2½ years, also leaves air first of year, its budget going to bolster *Mama* on CBS-TV . . . Gian-Carlo Menotti's 50-min. religious opera *Amahl and the Night Visitors*, commissioned by NBC 2 years ago, will be premiered by NBC-TV during Christmas holidays. Menotti is now casting for 10-year-old Amahl . . . CBS-TV is promoting summer time sales with 50-page presentation titled *It Takes Four Quarters to Make a Dollar*, pointing out that all major CBS-TV advertisers remained on air this July and August, retained large audiences—"in many cases larger than the average for the October-April season"—while getting 10% annual discount by buying 52 weeks. Discount means advertiser gets 5.2 weeks free out of 8 during summer, says CBS . . . WGN-TV, Chicago, signs to carry certain CBS-TV shows for which WBKB can't clear time; *Chicago Tribune* station remains basic DuMont outlet, however . . . Good example of TV as against radio personnel (and cost) requirements: Gulf's *We the People* needed staff of only 45 for radio version, now uses up to 194 for TV . . . Western Reserve U courses in psychology and literature over WEWS, Cleveland, have attracted audience of some 50,000 on 27,500 sets, according to Dean John P. Barden, who announced new series will begin Dec. 17 and March 17 . . . Radio Televisao Paulista, second outlet in Sao Paulo, Brazil, licensed to publisher Jao Baptista of *Sao Paulo Recorde* on Channel 9 (Vol. 7:42), began air tests Nov. 22, with "excellent reception," plans start of regular programming Dec. 24, reports consulting engineer Joe Herold . . . KNXT, Los Angeles, Dec. 1 raised base hour rate from $1200 to $1500, one-min. from $225 to $300 . . . WBTV, Charlotte, effective Jan. 1, raises base hour rate from $400 to $500, one-min. from $65 to $110.

Personal Notes: Fred M. Thrower, ex-ABC v.p. in charge of TV sales, named v.p. in charge of CBS-TV sales, succeeding David V. Sutton, resigned; Arthur E. Duram, CBS-TV sales mgr., joins Fuller & Smith & Ross Inc. as TV-radio director . . . Harold Burke Dec. 31 resigns as mgr., WBAL & WBAL-TV, Baltimore, and Victor F. Campbell has been named program director, Hearst Radio Inc., under v.p. D. L. Provost . . . D. Lennox Murdoch promoted to mgr. KSL-TV, Eugene M. Halliday to mgr. KSL, Frank B. McLatchy to mgr. regional network being formed by KSL . . . Harry R. Lipson promoted to new post of general sales mgr., WJBK & WJBK-TV, Detroit . . . Sylvester L. (Pat) Weaver, NBC-TV v.p., subject of "Business and Finance Leaders" sketch in Nov. 26 *New York Herald Tribune* . . . James M. Orchard, ex-program director, KOTV, Tulsa, joins Paramount Television Productions Inc. . . . Arthur B. Donegan named mgr., ABC publicity dept. . . . Paul Huth, acting mgr. of media dept., Procter & Gamble, named director of media as of Dec. 1 . . . James Neu, ex-CBS attorney in New York and Washington, joins Marshall F. Kiser in new law firm of Kiser & Neu, Plymouth, Ind. . . . Samuel Northcross promoted to v.p. & business mgr., TV dept., William Esty Co. . . . Robert C. Wood, ex-TV-radio director, Victor Van der Linde Co., N. Y. agency, named Chicago national sales rep, Fort Industry Co. (Storer) stations, succeeding the late Reynold Kraft . . . Dr. Max Jordan, ex-NBC foreign correspondent, to be ordained Catholic priest Dec. 8 in Wurtemberg, Germany.

Elias I. Godofsky, 39, owner WHLI, Hempstead, L. I., former operator of WLIB, New York, died Nov. 27 of heart attack while driving car.

Station Accounts: Electric Companies Advertising Program (group of electric light & power companies) buys new film series of half-hour dramatic shows for presentation on 31 TV stations starting last week in Jan., thru N. W. Ayer & Son, N. Y. . . . J. Wiss & Sons Co. (shears, scissors) sponsoring DuMont network show *Hands of Destiny* on WABD, N. Y., Tue. 10-10:30, thru Ellington & Co., N. Y. . . . Heet Div. of Demert & Dougherty, Chicago, planning campaign for its Ice Breaker (windshield de-icer) & Cleeron (plastic spray for ignition systems), thru Ruthrauff & Ryan, Chicago . . . Cribben & Sexton for its 1952 Universal Gas Range, signs Sarra Inc. to produce 20-sec. and one-min. spots . . . Eastside beer sponsoring *Boxing from the Olympic* on KTLA, Hollywood, alt. Tue. 10 p.m. to finish . . . Among other advertisers reported using or preparing to use TV: Beam Products Co. Inc. (Silver Polish'n Plate & Beam Crystals), thru Ritter, Sanford & Price Inc., N. Y.; Rustaway Corp. (Metalure polish & cleaner), thru Blackstone Co., N. Y.; Shave-Less Products Corp. (Shave-Less talc-cream), thru Harry Paul & Associates Adv. Agency, Boston; Fisk-Gillette Tires, Div. of U. S. Rubber Co. (Fisk tires), thru Fletcher D. Richards Inc. and Robert Otto & Associates, both N. Y.; Fisher Brewing Co. (beer), thru Gillham Adv. Agency, Salt Lake City; Lennox Furnace Co. (gas, oil, coal heating systems), thru Henri, Hurst & McDonald, Chicago; SOS Co. (Tuffy dishwashing aid), thru McCann-Erickson, San Francisco; Beloit Dairy (Old Fashioned ice cream), thru Cruttenden & Eger Adv. Agency, Chicago; Hershel California Fruit Products Co. (Contadina tomato paste), thru Brisacher, Wheeler & Staff, Los Angeles; Durkee-Mower Inc. (Marshmallow Fluff), thru Harry M. Frost Co., Boston; Pan American Coffee Bureau (coffee), thru Cunningham & Walsh, N. Y.; Dearborn Stove Co. (stoves & coolers), thru Rogers & Smith, Dallas (WDSU-TV).

Network Accounts: S. C. Johnson & Son Inc. (Johnson's wax products) starts alt. week sponsorship of *Robert Montgomery Presents* Jan. 7 when show goes weekly on NBC-TV, Mon. 9:30-10:30; time is being vacated Dec. 10 by Tintair's *Somerset Maugham Theatre* . . . Susquehanna Waist Co. (Ship'n Shore blouses) Dec. 18 takes 8:15-8:30 portion of *Frank Sinatra Show* one time on CBS-TV, Tue. 8-9, thru Mervin & Jesse Levine Inc., N. Y. . . . Longines-Wittnauer Watch Co. joins one-shot Christmas Day sponsorships with holiday variety show on CBS-TV, Tue. 5:30-6, thru Victor A. Bennett Co. . . . Fred W. Amend Co. (Chuckles candy) Dec. 22 expands Midwest show *Hail the Champ* to 7 more stations on ABC-TV, Sat. 6-6:30, thru Henri, Hurst & McDonald, Chicago . . . R. J. Reynolds Tobacco Co. (Cavalier cigarettes) starts *My Friend Irma* Jan. 8 on CBS-TV, Tue. 10:30-11, thru Wm. Esty Co., N. Y. . . . Lucky Strike reported readying *Stop the Champ* on ABC-TV, Thu. 9:30-10, thru BBDO, N. Y.; show will originate from Army & Navy bases and feature amateur service boxers . . . Gruen Watch Co. moving *Gruen Guild Theatre* from ABC-TV, Thu. 9:30-10 to DuMont, time & date unannounced . . . Nash-Kelvinator Corp. (kitchen appliances) Dec. 8 cuts *Paul Whiteman TV Teen Club* to half-hour on ABC-TV, Sat. 8-8:30 . . . Kaufmann Bros. & Bondy Inc. (Kaywoodie pipes) has canceled plans for Dec. 9 one-shot from Hollywood on CBS-TV, Sun. 5-6.

"Aural radio will be a very great factor during the lives of all of us here." That was FCC Chairman Coy's response to query at Nov. 27 Washington TV conference of Radio Commission of the Southern Baptist Convention. "At one time," he added, "I thought aural radio was doomed. I've changed my mind. TV just isn't needed for such programs as news and good music—with the exception of Toscanini." He also looked for increased importance of FM.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
December 1, 1951

PUZZLING ASPECTS OF TV TRADE PICKUP: TV industry's ablest minds are still baffled by these unanswered questions: How big is current trade upsurge? How good is today's "good business"? What happens after New Year's Day?

Production continues at relatively high levels. Factory inventory has been sliced, industry-wide, to less than 3 weeks' supply. Big brand-name manufacturers tell us their inventories are now insignificant. Philco, for example, says it has only 2-3 days' supply on hand at plant.

Yet industry leaders admit market has no real "zing". This feeling was evident at Nov. 27 meeting of representative TV-radio manufacturers' group with NPA.

There were few complaints about the slim allocations of materials for first quarter 1952 (Vol. 7:46). Indeed, some smaller manufacturers said they had good-size materials carry-overs from third to fourth quarter, and will carry some fourth-quarter materials and parts into 1952. One said he needs customers, not materials.

Big manufacturers, by and large, have depleted most of their inventories of materials, as well as finished sets. But they have plenty of tubes and components in stock -- no shortages. And those at NPA parley didn't seem very worried about materials for first half 1952. Their concern was directed at third quarter.

They asked NPA to try to shake loose more materials in third quarter, because of seasonal nature of TV-radio industry. NPA people replied there's strong possibility more steel and aluminum will be available then, but copper will be as seriously short as ever. (For other highlights of NPA meeting, see p. 11).

For first and second quarters, manufacturers seem resigned that there will still be selling job to do, despite stringent production cutbacks. As to present situation, one big manufacturer told us this week:

"Sure, factory inventories are going down, but they're not as meaningful as what's in the pipelines. If there's more than a million sets in wholesale-retail channels -- that's dangerous." Forthcoming Dun & Bradstreet October retail survey should provide some clues.

* * * *

TV factory inventories showed big 41,985 drop in RTMA statistics for week ended Nov. 24 -- down from previous week's 308,897 to 266,912, lowest since March 23 week (Vol. 7:13). Production of 100,103 TVs (4879 private label) was remarkably good for 4-day Thanksgiving week with its usual Friday absenteeism. Previous week saw 115,722 TVs produced.

Radio output went down to 171,563 (57,809 private label) from preceding week's 218,905. Factory inventory was 346,183, up about 8000 units. Week's radios were 117,823 home receivers, 12,873 portables, 40,867 auto.

RTMA's revised figures for first 10 months are 4,382,724 TVs and 10,953,201 radios. October TV output was revised upward to 411,867, radio downward to 874,723. These compare with 838,300 & 1,229,900 respectively for same 1950 month.

FACTS IN ADMIRAL-NORGE NEGOTIATIONS: Disclosure that Admiral Corp. is dickering to buy Norge Div. of Borg-Warner Corp. points up trend of TV-radio manufacturers to go deeper into lucrative white goods field as hedge against TV's seasonal nature.

All that's admitted by the principals is that negotiations are "under way".

Admiral isn't first TV manufacturer to cast sheep's eyes at Norge, one of "big 6" of home appliance field. RCA had been dickering for purchase of Norge with its ready-made line of quality white goods. And recently Addison Industries Ltd., Canadian TV-radio-appliance manufacturing and merchandising firm, tried to buy it but gave up because it felt price was too steep.

Norge is estimated to be sixth-ranking firm in home appliance industry, once turned out 10% of nation's household refrigerators, slipped to 6%. Admiral sells about 3½%. Norge is third in gas ranges, sixth in electric ranges.

These are most valuable assets Admiral would acquire, in opinion of source long familiar with appliance field and close to Norge operations:

(1) Top-notch distribution setup, with 72 independent distributors, serving 14,000 dealers. One of stipulations of sale, if it's consummated, will be that "Norge manufacturing and sales organizations be maintained as a separate division" by Admiral, Borg-Warner announced in statement confirming rumors of negotiations.

(2) Four plants, including modern range and washing machine factories in Eppingham and Heron, Ill., old refrigerator plant and service factory in Muskegon, Mich. Even with its new Galesburg, Ill. plant, Admiral reportedly makes but half its own refrigerators (buying balance from Seeger Refrigerator Co.), makes none of its own ranges.

(3) Entree into home laundry market via Norge's fast-selling new low-priced automatic washer. Norge also makes home freezers and electric water heaters.

(4) Valuable tools, dies, good NPA materials base for home appliances, many basic appliance patents. Frigidaire, which holds license from Norge to manufacture "Rollator" refrigerator motors, would become licensee of Admiral.

Topics & Trends of TV Trade: "Get tough" policy toward TV ad abuses has been adopted by Washington Better Business Bureau following complete collapse of BBB-newspaper-retailer self-censorship pact (Vol. 7:14). BBB told dealers, distributors, ad agencies and newspaper ad departments it plans to prepare evidence of unfair TV-radio-appliance advertising and turn it over to local and federal authorities for prosecution. BBB said many TV-appliance chains have violated last April's voluntary standards agreement or refused to make pre-publication corrections suggested by BBB, and consumers' complaints have increased steadily since last summer. "TV," said a BBB official, "is by far the worst offender." Meanwhile, Hartford, Conn., BBB issued code for TV-radio-appliance dealers and service men, developed with cooperation of local dealers. It covers such long-standing trouble spots as free offers, "floor samples," extra charges, guarantees & warranties, "bait offers," tube sizes, performance claims.

First factory-run service center handling all major appliances as well as TV-radio will be opened Dec. 3 by Westinghouse in Cleveland. Some 250 dealers will be served by 19,000 sq. ft. center at 4505 Euclid Ave. Consumers may call center direct or place service call through dealers. Big advantage of centralized servicing, says Westinghouse service mgr. L. K. Baxter, is that "it places responsibility for fast and satisfactory service in the hands of Westinghouse and frees dealers of this work, permitting the dealer to concentrate on doing a selling job."

TV-radio-phono manufacturers needn't compute new price ceilings under CPR 22 (Vol. 7:45). New amendment 4 to Supplementary Regulation 12 exempts most electronic end products makers from necessity of filing Capehart ceilings "so that [they] may avoid the double burden of computing ceiling prices under CPR 22 and later under a tailored regulation." Tailored regulation for TV-radio industry (Vol. 7:43) is expected early next year.

NARDA convention Jan. 13-15 at Chicago's Conrad Hilton (Stevens) Hotel, coinciding with Winter Furniture Market, will hear talks by RTMA president Glen McDaniel, Dr. Allen B. DuMont, Philco TV-radio sales v.p. Fred D. Ogilvy and Thomas F. Joyce, v.p. of Raymond Rosen & Co., Philadelphia RCA distributor.

Hoffman adds 2 new 20-in. sets to line, mahogany table at $299.95, blonde $309.95, and mahogany console, half doors, $399.95, blonde & maple $409.95. Slightly changed and repriced is 20-in. open-face console, $369.95 in mahogany, $379.95 in blonde. Rest of line is unchanged, except for "minor escutcheon alterations."

Trade Miscellany: Some 200 manufacturers' representatives expected to be present for space drawing in New York Dec. 14 for 1952 Electronic Parts Show, scheduled May 19-22 in Chicago's Conrad Hilton (Stevens) Hotel . . . John Meck Industries now becomes John Meck Industries Div. of Scott Radio Laboratories Inc. under recent merger (Vol. 7:46) . . . Trans-Vue Corp., sales agency for Jackson Industries Inc., has purchased inventories and tools of Tele-Tune booster antenna from City Tool Accessories Corp., Chicago, expects to turn out 300,000-350,000 booster antennas in next year . . . J. H. Keeney & Co., coin-machine firm, 2600 W. 50th St., Chicago, reported planning to manufacture home and coin-operated TV sets, with sample run of 25 sets, 30-in., scheduled in "few weeks" . . . Scott adding 2 blonde combinations to line, 17-in. Stuart at $695 and 20-in. Selkirk, $725 . . . RCA has added Caldwell, Model 17-T-162, to line—open-face console, 17-in. rectangular, $349.50 in mahogany or walnut, $359.50 in limed oak.

* * * *

Canadian RTMA reports 29,825 TVs sold for $15,573,898 in first 10 months 1951. Inventory total Oct. 31 was 17,289, compared to 17,936 as of Sept. 30 (Vol. 7:45). Toronto-Hamilton area took 39% of 10 months' sales, Windsor 35%, Niagara Peninsula 20%. October sales rose substantially, with 5182 sets sold for $2,538,780, compared with 3286 in September; Toronto-Hamilton area took 40% of Oct. sales, Windsor 29%, Niagara Peninsula 23%. Overall total (from start of count) came to 67,648 valued at $31,850,481.

Pandora's box of TV headaches has been designed by GE to demonstrate service troubles to distributors, dealers. Demonstrator duplicates 33 types of TV-set troubles and simulates special local problems. Lecturer can dim, shrink, ripple, or compress picture at flick of switch, while chart shows cause of each trouble. Twenty demonstrators are in use across country. GE also has a new *TV Receiver Service Guide* available at $1.

Merchandising Notes: Hoffmann Radio budgets $1,000,000 for 1952 advertising, thru new agency, Foote, Cone & Belding . . . Eleven TV distributors in Richmond, Va., area cooperatively sponsoring 8 pre-Christmas full-page newspaper ads plugging "a TV set under every roof" . . . Arvin cuts two 21-in. table models by $20 each, mahogany now $350, blonde $380, including tax but not warranty.

Four more hotel TV installations—Dallas' Adolphus, Baker & Stonleigh and Charlotte's Barringer—are scheduled by Master Video Systems Inc., New York, using RCA's Antenaplex. Company recently completed Waldorf-Astoria setup (Vol. 7:45).

Trade Personals: H. Brainard Fancher promoted to mgr. of engineering for commercial equipment products, GE commercial dept.; Clare C. Lasher named mgr. of manufacturing, GE govt. equipment dept. . . . E. W. Merriam, RTMA service mgr., ex-DuMont, appointed Sylvania TV-radio service mgr. . . . R. M. Macrae, RCA Victor N. Y. asst. regional mgr., to head new Northeastern region, including upstate New York and New England, starts Jan. 1 . . . Fred H. Garcelon, ex-Westinghouse, appointed Eastern sales mgr. of CBS's Hytron Div. . . . Murray Fiebert, ex-v.p. of Lanagan & Hoke, test equipment firm, and one-time govt. procurement official, named mgr. CBS-Columbia government contract division . . . H. A. Williams, sales mgr., promoted to mgr., electronic components div., Stackpole Carbon Co. . . . Milton R. Benjamin, Majestic sales v.p., has resigned, will disclose plans after short vacation . . . Frank H. Edelman appointed technical director in charge of resistor div., Electronic Devices Inc., Brooklyn . . . John A. Wortmann, since 1931 with Borden Co., named RCA trade-mark attorney, succeeding late Abe Greenberg . . . Brig. Gen Tom C. Rives (ret.) appointed manager of GE's new Advanced Electronics Center at Cornell U (Vol. 7:42).

Benjamin Singer, 45, manager of special engineering products, Emerson Radio, former Tele-tone and Air King chief engineer and 25-year veteran of electronics industry, died Nov. 28 at Memorial Hospital, New York.

———■———

Dividends: Sylvania, 50¢ payable Dec. 20 to holders of record Dec. 10, quarterly $1 on $4 pfd., 42.8¢ on new $4.40 pfd., payable Jan. 2 to holders Dec. 19; Bendix, 75¢ payable Dec. 27 to holders Dec. 10; Arvin, 50¢ payable Dec. 27 to holders Dec. 10; Stromberg-Carlson, 35¢ payable Dec. 28 to holders Dec. 10, 50¢ quarterly pfd., payable Jan. 1 to holders Dec. 10; Wells-Gardner, 15¢ payable Dec. 15 to holders Dec. 4; Muntz, special 10% stock, payable Dec. 24 to holders Dec. 15; Aerovox, 15¢ payable Dec. 15 to holders Dec. 10; Canadian GE, quarterly $2 and extra $4 payable Jan. 1 to holders Dec. 14; Aircraft Radio, 30¢ payable Dec. 18 to holders Dec. 7; Avco, 56¼¢ on $2.25 pfd. payable Feb. 1 to holders Jan. 16; Capitol Records, 25¢ payable Dec. 20 to holders Dec. 10, 65¢ quarterly pfd. payable Jan. 1 to holders Dec. 15; Republic Pictures, 25¢ pfd. payable Jan. 2 to holders Dec. 14.

Motorola Inc. has increased borrowing from Prudential from $1,335,000 to $7,500,000 in form of 15-year 3¾% note; proceeds were used to prepay existing indebtedness to Prudential, with $6,165,000 added to working capital.

Financial & Trade Notes: Westinghouse, in one of biggest private loans on record, has arranged to borrow $250,000,000 with option for additional $50,000,000. Loan will finance company's $296,000,000 expansion program and provide working capital for increased business volume. Electronics will represent "substantial portion" but considerably less than 50% of expansion program, a company official said. Included will be 97 projects to increase Westinghouse capacity 50%. Among electronics plants—all of which have been announced previously—are new Baltimore aircraft electronics plant, TV-electronics plant at Raritan Township, N. J., electronic tube plants at Elmira & Bath, N. Y. Biggest project is Columbus, O., jet engine plant.

Loan is subject to approval by stockholders, at special meeting in Pittsburgh Dec. 14, of proposal to increase authorized indebtedness from $150,000,000 to $500,000,000 Borrowing will be in installments as funds are needed. Against these advances, company will issue 3½% debentures due 1981, redeemable beginning in 1956. Acting for Westinghouse are investment firms of Kuhn, Loeb & Co., First Boston Corp. and Drexel & Co., largest institutional buyers being Metropolitan Life Insurance Co., Equitable Assurance Society and New York Life Insurance Co. Other buyers include pension funds, savings banks and universities.

* * * *

Tung-Sol Electric's sales are expected to top $30,000,000 in 1951, up from $29,425,022 in 1950, but earnings will be about $4.50 a common share vs. $6.61 last year. H. M. Darling, v.p.-treas., makes that estimate, with observation that "taxes will make the difference in earnings this year, but they are less onerous than would be the case if we did not come under the growth company formula owing to our position in the growing TV field." Mr. Darling said govt. work rose from 10% of Tung-Sol's output prior to Oct. 1 to 30% shortly thereafter.

National Coin TV System, formed 6 months ago, has been incorporated with 100,000 shares of common stock, par value $1; president J. Matt Thompson says firm will install 4000 coin-operated TVs in next 12 months.

American Television Mfg. Co. is new firm headed by U. A. Sanabria, president American Television Inc., to "carry govt. contracts," has 100,000 shares of no par stock; charter says firm will "deal in cathode ray tubes, radio, TV, & electrical devices, merchandise, etc."

Muntz TV reports sales of $2,634,648 for October, 12% increase over same month last year. For 7 months to Oct. 31, Muntz reports profits of 33¢ a share vs. 60¢ in 1950.

TELEVISION-ELECTRONICS Fund Inc., in statement accompanying annual report for fiscal year ended Oct. 31, disclosed that total net assets reached $10,000,000 mark Nov. 14. Annual report shows total assets at cost were $9,125,551, at value $9,792,619 ($12.91 per share) as of Oct. 31. Net assets at value compare to $5,560,022 ($12.01) for 1950 fiscal year, $2,780,796 ($9.32) for 1949, $274,983 ($9.11) for 1948, $112,500 ($9) as of first report, June 1948.

First open-end investment trust in TV-electronics field added several new shareholdings to portfolio, listing following investments as of last Oct. 31 (new-company holdings in italics):

TV & Electronics (38.79%)—Acrovox 7000 shares, ABC 6000, American Phenolic 4000, AT&T 2500, Bendix 5000, CBS "A" 4000, Cornell-Dubilier 4000, Erie Resistor 2000, Fansteel 3000, GE 5000, General Instrument 5000, Hazeltine 4000, International Resistance 3000, LaPointe Plascomold 5000, Muter 4000, Oak Mfg. 6000, RCA 19,000, Raytheon 7000, Sprague Electric 4000, Sylvania 10,000, Tung-Sol 2000, Westinghouse 10,000.

Electronics Other Than TV (26.57%)—*Aircraft Radio Corp.* 8000, American Bosch 20,000, Clark Controller 4000 common & 1000 pfd., Consolidated Engineering 2000, *Consolidated Vultee* 3000, *Eureka Williams* 6000, Fairchild Camera 2000, Hammond Instrument 1000, IBM 1000, Minneapolis-Honeywell 5000, *Northrup Aircraft* 5300, Remington Rand 7000, Sperry 5000, Telecomputing Corp. 3000, *Thompson Products* 2000, Tracerlab 2000, Webster-Chicago 9000, *Westinghouse Air Brake* 12,000.

Primarily TV (19.59%)—Admiral 10,500, DuMont 6000, Emerson 23,000, Motorola 8000, Philco 14,000, Zenith 3000.

Miscellaneous (12.52%)—Eastman Kodak 6000, Federal Enterprises 5000, General Controls 2100, Haloid 2500, I-T-E Circuit Breaker 1000 pfd., *Kellogg Switchboard* 4000, Otis Elevator 4000, United Specialties 2100, Walt Disney Productions 6500, *Western Union* 5000.

Affiliated Companies (2.53%)—Conrac 9000, *Indiana Steel Products* 12,000, Television Associates 2400. Govt. securities cost value is given as $1,296,648.

Mobilization Notes: No compulsory conservation, standardization or simplification orders for TV-radio industry are imminent (Vol. 7:45), NPA spokesman told radio & TV manufacturers industry advisory committee meeting Nov. 27 (see story, p. 8). Other highlights of meeting: (1) Committee recommended NPA survey TV-radio manufacturers to determine "mix" of TVs, radios, combinations, etc., as guide to allocation of materials for components. Following meeting, Electronics Div. began preparing form to solicit this information. (2) NPA said copper, nickel, tungsten, cobalt, selenium will remain scarce through 1952.

There was detailed discussion on preparation and filing of CMP forms, NPA obviously disssatisfied with results to date. Manufacturers were urged to submit second-quarter applications before Dec. 22 deadline. NPA officials said only 30 first-quarter applications were in hands of Electronics Div. by Oct. 1 deadline; 576 were in by Oct. 12; 870 Oct. 21; 991 Nov. 26. Also stressed was importance of giving full information on applications, including estimated requirements for third and fourth as well as second quarter. Lee Golder, chief of NPA radio-TV-receiver section, presided at meeting, attended by:

Dorman Israel, Emerson; Jack Marks, Fada; John Meck, Scott Radio; Robert W. Galvin, Motorola; William H. Chaffee, Philco; John H. Cashman, Radio Craftsmen; J. Friedman, Trav-Ler; L. C. Truesdell, Zenith.

* * * *

Certificates of necessity for tax-aided expansion were granted by DPA to these electronic and related firms from Nov. 6-16 (5-year amortization on 65% of project cost except as noted): **Westinghouse**, electronic tubes at Pittsburgh, $5,668,840; aircraft parts at Metuchen, N. J., $4,540,735; high-temperature alloys at Newton, Pa., $137,090; **GE**, Ashland, Mass., aircraft parts, $222,000; **Grant Pulley & Hardware Co.**, Flushing, N. Y., electronics, $183,138 (70%); **Sigmund Cohn Corp.**, Mt. Vernon, N. Y., aircraft instruments, $125,000; **Clifton Precision Products Co.**, Berwin, Pa., electrical control mechanisms, $38,296 (70%); **Westbrook Welding Co.**, Westbrook, Conn., electronics, $30,679.

Third major Signal Corps training center will be established Dec. 15 at San Luis Obispo, Cal., under command of Brig. Gen. Harry Reichelderfer, now commanding general of Ft. Monmouth, N. J. Maj. Gen. K. B. Lawton, Deputy Chief Signal Officer since 1948, will take over command of Ft. Monmouth. Brig. Gen. James D. O'Connell, signal officer of Second Army, becomes Deputy Chief Signal Officer. Camp San Luis Obispo will employ some 450 civilians, including electronics and communications instructors. Other Signal Corps training centers are at Ft. Monmouth and Camp Gordon, Ga.

Materials relief for TV servicemen is forthcoming in form of amendment to CMP Regulation 7 repairmen's order (Vol. 7:28). Order, as written, permits repairmen to self-certify controlled materials and parts for repair purposes, but none for installation. TV repairmen's principal use of controlled materials is in lead-in wire for antenna installations. New amendment will permit self-certification of installation materials.

Subcontracting opportunities have been compiled by General Motors in booklet listing principal products made by each of its 39 manufacturing divisions. *Selling to GM* is available from GM procurement & schedules dept., Room 14-262, General Motors Bldg., Detroit 2.

Continental Can Co. will make control elements for guided missiles being developed by Bell Telephone Labs and produced by Western Electric. About 300 persons will be employed in new Chicago plant.

Small Defense Plants Administration, under Telford Taylor, moves Dec. 3 to old Washington Post Bldg., 1337 E St. N.W.

"Dangerous lag" in production of military electronics, guided missiles, planes and tanks was reported Nov. 29 by Senate Preparedness Subcommittee under Sen. Lyndon B. Johnson (D-Tex.). Highly critical of mobilization progress, report said dollar deliveries of guided missiles from April through June fell 70% below expectations, other electronics items 30% short of goal. Aircraft and tank deliveries were 34 and 40% behind target, subcommittee said. Report blamed big materials allocations for "nonessential civilian goods" and "our failure to make immediate defense hard-goods production the top claimant upon our industrial capacity." It recommended creation of defense production and procurement czar, suggested Munitions Board chairman John Small. It also urged: (1) Elimination of bottlenecks in military production at all costs. (2) Use of all new machine-tool production for military output. (3) Greater use of small business in military program.

———■———

Lawrence color tubes can be produced despite ban on color production (Vol. 7:47)—so long as they're not placed in sets capable of receiving color. That's NPA's interpretation of its order M-90, officials pointing out that tube's backers say it will work equally well with black-&-white. Order bans products or parts "designed *solely* to permit or facilitate, or capable *only* of permitting or facilitating, reception of color TV" (italics ours). Chromatic TV Labs president Richard Hodgson said he's inquired at NPA, is awaiting clarification. Chromatic has received NPA materials allocations to make picture tubes and TV sets, "but we certainly have no intention of making black-&-white sets," Hodgson declared. He said tube is now in prototype production and "very close" to full production stage.

Uhf has great future, untroubled by most vhf interference problems, according to Wells Chapin, chief engineer of WIL, St. Louis, who writes in Nov. 26 *Broadcasting:* "The FCC was exactly right in establishing the now famous TV freeze. The only objection is that it should have been put on before so many sets had been built for the present channels." Anticipating great competition for vhf channels after freeze, he says: "In the meantime, other hardy souls will pioneer the new band and be on the air years before those desiring Channels 2 to 13. In the new TV towns, or those with 1 or 2 stations, this pioneering should not be any more difficult than opening up the very first station. It probably will be much easier because the viewers, their appetites whetted by some good shows, will be anxious to receive new stations . . ."

Govt. has never ruled on legality of NCAA college grid TV restrictions, Yale athletic director Bob Hall, member of NCAA TV committee, told press Nov. 30. Furthermore, said Hall, NCAA hasn't heard word from Govt. since April when Justice Dept. anti-trust div. began study of NCAA plan. He thus directly denied govt. statement last week that NCAA was warned 3 times of illegality of its TV restrictions (Vol. 7:47). Meanwhile, Philadelphia Federal court set Dec. 17 for argument on motion to dismiss anti-trust suit against National Football League (Vol. 7:41), which Govt. hopes will establish illegality of all sports leagues' anti-TV rules.

Subscription TV for sports events is OK with at least half of Minnesota's set owners, according to *Minneapolis Tribune* (Cowles) Minnesota Poll. TV owners were asked if they'd be willing to pay to see "football games, boxing, basketball and other sports" on their home sets. Of those interviewed, 50% said yes; 5% yes, if it didn't cost too much; 43% no; 2% undecided. Those polled showed greatest interest in football, boxing and baseball on pay-as-you-look basis, least in wrestling. Nearly two-thirds of men interviewed—but less than half of women—said they'd be willing to pay to see their sports.

Network TV-Radio Billings

October 1951 and January-October 1951
(For September report, see *Television Digest*, Vol. 7:43)

THOUGH NETWORK TV billings in October continued steep rise—going to $14,469,284 from September's $11,925,516—they failed to duplicate feat of surpassing month's radio billings, first accomplished in September (Vol. 7:43). Ten months' TV billings of the 4 networks were just shy of $100,000,000—$99,854,288—compared with $27,371,607 same 1950 period.

Radio billings also showed sharp increase in October, rising to $14,966,436 from September's $11,849,246, though down from $16,169,808 in October 1950. Worth noting is fact that all networks' combined TV-radio billings in October was $29,435,720, considerably over the $22,611,250 year ago, while networks' grand TV-radio total for first 10 months of 1951 reached $245,595,466 vs. $179,263,135 same 1950 period.

The Publishers Information Bureau figures:

NETWORK TELEVISION

	October 1951	October 1950	Jan.-Oct. 1951	Jan.-Oct. 1950
NBC	$ 7,165,225	$ 3,007,771	$ 46,147,808	$ 14,840,925
CBS	4,704,775	2,211,898	33,102,526	8,444,185
ABC	1,846,408	1,221,773	14,643,504	4,086,497

Sept.	2,165,971	4,645,979*	1,324,061	3,713,235	11,849,246
Oct.	3,180,514	5,615,074	1,759,468	4,411,380	14,966,436

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by PIB on basis of one-time network rates, or before frequency or cash discounts. Therefore, in terms of dollars actually paid to networks they may be inflated by as much as 40%. Figures are accepted by networks themselves, however, and by the industry generally, as a satisfactory index of comparisons and trends.

Slated primarily for TV chores at Motion Picture Assn., though "no firm decision on the appointment has been reached yet," is Edward Cooper, currently assistant to Senate Majority Leader McFarland. He would take over about Jan. 1. Newsman Cooper first came to Senate from Montana in 1939 with Sen. Burton K. Wheeler, served as communications staff assistant to Interstate & Foreign Commerce Committee from then until he joined Sen. McFarland last January (Vol. 7:3). Eric Johnston is strengthening staff in preparation for return to job as MPA head after serving as ESA administrator, recently added Cecil Dickson, former coordinator of information of House.

BASEBALL IS still little affected by TV, concluded researcher Jerry Jordan in third annual survey, reiterating his findings in previous studies (Vol. 6:19). In fact, report says regularly telecast major-league teams fared better than those restricting TV; 9 clubs maintaining regular TV had total attendance increase of 234,169 last season (though 5 showed decreases); 7 teams restricting or banning TV showed 1,485,070 decline (5 showing losses).

"These figures would offer substantial evidence of TV's promotion value," Mr. Jordan said, "except for the fact that the clubs televising consistently had a better performance record as a group. And performance . . . is usually the major factor at the gate . . . Regular TV did not hurt the teams that were putting on an exciting performance, and eliminating or reducing it did not help the others."

TV cannot be major factor in continued sharp decline in minor-league attendance (20% from last year), he said, because less than 10% of the 400-odd teams are near enough to TV areas to be affected. He cited case of Wilkes-Barre club (non-TV area), which lost 50% in attendance while winning 2 straight pennants.

He also pointed out that major-league clubs received $4,562,312 for TV rights (including World Series and All-Star game) in 1951, nearly equal to total National League gate receipts in biggest pre-war year (1940), and forecast much more TV income for baseball as new stations are built and theatre TV spreads.

* * * *

Spectacular new remote-telecasting devices now being developed in RCA labs may some day make TV nearly as mobile and flexible as radio. NBC-TV technical operations v.p. Robert E. Shelby gave NBC affiliates convention at Boca Raton, Fla., glimpse into the future when he revealed work on: (1) Disaster mobile unit, with no external wire connections, carrying film developer, microwave and projection equipment. (2) Flying boxcar, to carry "mini-mobile" TV transmitter near site of any event. Mobile unit would drive from plane to scene, relay picture directly to studio or to relay in plane. (3) Helicopter-borne TV camera and microwave for disasters, floods, sports events, etc. (4) Remote-controlled camera, operated electronically "like robot plane," controlled from studio or theatre. Shelby said RCA laboratories are engaged in active developmental work on 2 new projects assigned by chairman David Sarnoff to his scientists (Vol. 7:39). "Magnalux," electronic light amplifier, he said, would "provide comfortable, effortless viewing outdoors, even in sunlight." "Videograph," TV tape recorder, would permit storing of programs for re-use, with no deterioration in quality.

Flurry of 7 TV Applications this week brought total pending to 460 of which 21 are uhf. Only uhf filed was from Texas oil man W. W. Lechner for Channel No. 35 in San Antonio. Other 6 were: WKYB, No. 6 in Paducah, Ky.; KEYD, No. 9, Minneapolis; KROC, No. 10, Rochester, Minn.; KECK, No. 7, Odessa, Tex.; KGBX, No. 3, Springfield, Mo.; KOPR, No. 4, Butte, Mont. [For further details, see *TV Addenda 13-T* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Stations can't censor political speeches, regardless of State libel laws or anything else. Such was FCC's pronouncement in renewing license of WDSU, New Orleans, this week. Action was prompted by Jan. 26, 1950 complaint of Alvin A. Cobb, mayoralty candidate whose speech station refused to carry unless certain "libelous and defamatory" portions were deleted. Commission said it was renewing WDSU's license because action wasn't "willful violation," but from now on "we will not accept the plea of doubt and uncertainty in the state of the law . . ."

Full Text of New Television Code Published with This Issue

TV PROGRAM CODE BECOMES REALITY: Telecasters at long last got their code of program standards this week -- strict enough to satisfy most would-be censors, but lenient enough to allow plenty of flexibility in programming. [For full text of code, see Supplement No. 76, sent herewith to all full-service subscribers; extra copies $1.]

Newly drafted addenda to the code (Appendix A) include enough legal safeguards to assure the most finicky legalists that its enforcement provisions won't be applied arbitrarily or capriciously.

NARTB-TV board's promulgation of code substantially as approved by 64 telecasters in Chicago Oct. 19 (Vol. 7:42) came as surprise to few in industry. Changes in wording were minor. Self-imposed rules become "official" Mar. 1, 1952 after NARTB president Fellows chooses 5 "representative" telecasters to serve as Review Board.

Any telecaster, whether or not member of NARTB, may subscribe to code upon payment of fee to defray administration costs. In return, he's given privilege of displaying seal of approval. Seal, now being designed, is in form of laurel wreath, with legend "Seal of Good Practice," and words "entertainment, education, culture, information," together with NARTB initials.

Enforcement of code is Review Board's job. It's empowered to withdraw seal from offending subscriber in cases of "gross, willful and continued violation" -- but only after full-dress hearings.

Drawn up to meet objections expressed by some radio attorneys, new addenda guarantee such legal safeguards as right to representation by counsel at hearings, right to cross-examine witnesses, requests for rehearing, etc.

To supplement code, board has list of words and phrases "considered unsuitable for use on TV." It will be sent to all code subscribers.

One TV board member, asked whether TV stations are now conforming with all provisions of the code, said: "I doubt if any of them now conforms with every section. I know mine doesn't. I think everyone will have to make changes."

FCC TESTS 'ANTI-FREEZE' IN NEW ENGLAND: Outlook for quicker freeze-end brightened at week's end when, after solid Dec. 6-7 meetings, FCC pounded out "tentative" New England allocations and instructed staff to allocate rest of country.

Since New England is tightest, toughest area of all, Feb. 1 target date for final decision looks better than it has for some time.

Though FCC won't release results of this week's deliberations, inasmuch as it plans to issue whole decision in one final package, treatment of New England may be augury for rest of country:

(1) Educational reservations are holding their own -- neither increasing nor decreasing. This week, much discussion centered on educational reservations and use of flexibility channels in each city. Comr. Hennock is still plumping assiduously

Copyright 1951 by Radio News Bureau

for pet project she put across, still feeling educators aren't getting enough.

(2) Number of vhf channels currently stands about same -- though there's still talk of reducing co-channel separations from 180 to 165 miles. Uhf may be narrowed from 165 to 155 miles. Whatever minima are chosen for New England, the Gulf and West Coast allocations will undoubtedly have greater separations. Consideration is area-by-area, and blanket minima may well go by the boards. Watch Pittsburgh.

Commission's 8 staff teams -- one for each area -- now go to work in earnest. Some general principles may be formulated now, others to be laid down after whole allocation has been made.

Everyone at FCC appeared heartened by week's progress, with eagerness to "get on with the decision" manifest. For present, speed is up to staff, and commissioners are pleased with its work under Paul Dobin, chief of Rules & Standards Div.

Chairman Coy apparently feels free enough, in fact, to take off Dec. 20 for St. Petersburg, Fla., for vacation with family until Jan. 3 or 7, and Comr. Sterling will be gone, to New Orleans and Houston, for inspection and hearing Dec. 10-18.

* * * *

Post-freeze handling of applications, as recommended by Communications Bar Assn. (Vol. 7:48), has met with some criticism from a few members. They contend:

(1) Acceptance of FCC's principle of allocation by rule-making is an "abdication" of Assn.'s stand previously taken (Vol. 7:26).

(2) Delays may be inherent in conducting hearings with all applicants, vhf and uhf, consolidated in one hearing. Say critics: "Although an applicant might propose a channel in the vhf band and an appropriate site therefor, such applicant might be found eligible for a grant on some other channel concerning which he had submitted no engineering proof at the hearing, with the result that other applicants would not have opportunity to cross-examine with respect thereto."

To get all members' views, in light of objections, bar group has asked all members to comment by Dec. 21.

* * * *

Arguments for pre-freeze applicants involved in hearings (Vol. 7:48) have been summarized by WFOX, Milwaukee, through brief filed by attorneys Haley, McKenna & Wilkinson. Brief analyzes the 9 cities concerned, involving 26 applicants in Milwaukee, San Francisco, Detroit, Philadelphia, San Diego, Atlantic City, Reading, Harrisburg, Easton-Allentown-Bethlehem. Applicant points to:

(1) "Huge investment in time, effort and money by the applicants [and FCC]."

(2) Time element "is of particular significance...with the Commission forced to operate on a reduced budget and faced with a hearing calendar beyond equal as soon as the freeze is lifted. And the public at large also has very substantial stake in the proceedings, since scuttling of the hearing records and opening of the proceedings to 'johnnies-come-lately' undoubtedly would delay by a year or more the commencement of broadcasting by the successful applicants, not to mention further possible delays resulting from court litigation."

(3) "New applicants have no grounds for complaint, inasmuch as the channels would have been assigned heretofore but for the freeze and since uhf channels, a service not allocated at the time of hearings, will not be involved."

WHITHER TIME SALES? AN EXPERT'S VIEWS: Looking ahead to the post-freeze day when there are enough stations so that TV networks can really operate full-blown, instead of being the wide-gapped makeshifts they now are, will TV advertising, already very expensive, price itself out of business?

Can ever-increasing rates and fabulous costs of programs be maintained when there are more markets served by more stations? Are the networks justified in contemplating another rate hike? Where's this fantastic business of telecasting heading, revenue-wise?

Everyone likes to forecast, though in TV very few have guessed right thus far about the remarkable time-selling achievements of TV's scant handful of stations -- now frozen at 108. But when the crystal-gazing is done by an authority like

NBC-TV sales v.p. Edward D. Madden, the observations are worth hearing. These are some of things he said in closed session at NBC's Boca Raton convention last week:

"Our 1951 gross sales for the NBC-TV network, including package programs, production facilities and film syndication, will total approximately $75,000,000 -- three times our 1950 volume...

"Total national advertising volume in 1951 will be $1,775,000,000 for magazines, newspapers, radio and TV, including time, talent, art and mechanical costs.

"National advertising volume in TV for 1951 will total about $325,000.000, including time and talent for network and national spot...Radio will attain a volume of approximately $350,000.000, including time and talent for network and national spots. Magazines and newspapers will each attain a volume of about $550,000,000...

"By 1955, we estimate national advertising volume in TV, network & national spot, time and talent, will total $775,000,000 and that TV will be the indisputable No. 1 choice of advertisers. By 1955, it is estimated total national advertising volume in all 4 media -- TV, radio, magazines & newspapers -- will be $2.5 billion.

* * * *

"While this is pleasant to report, it also calls for sober reflection as to what is happening to total time and talent costs for individual advertisers and what our future planning must encompass...Sales results must keep pace with rising TV advertising costs. Suppose we take a look at TV costs as they are today, and where it appears they are going:

"Time and talent for the hour-long 'All Star Revue' costs $100,000 per week or $4,400,000 for 44 weeks. This bill is shared by 3 advertisers. An alternating half hour of the Kate Smith night-time show is $50,000 a week or $1,000,000 for 20 weeks for one advertiser; 4 advertisers split the total bill of $4,000,000. A half hour of 'Show of Shows' costs $56,000 a week or $2,200,000 for 39 weeks. Six advertisers split the bill of $6,000,000...

"The average time & talent cost of NBC half-hour night-time shows today is $29,000, and by 1955 this unit will cost $56,000. This means $2,200,000 for only 39 weeks for the 50 largest markets. But the cost of daytime TV will also rise sharply.

"The average cost of time & talent for daytime half hours will rise from $12,000 today to $19,500, or $1,014,000 for 52 weeks in 1955 for the 50 largest markets. A 15-minute daytime strip, Class C time, and talent, costs today $35,000 a week, and will rise to $68,000, or $3,536,000 for 52 weeks for 50 largest markets.

* * * *

"I know that we can justify rates in terms of cost-per-thousand potential and actual circulation in TV homes. I know that as TV homes increase and rates rise we will justify these increases by the same yardstick of cost-per-thousand...

"But total TV costs are already straining the seams of total advertising budgets of relatively large budget advertisers. And if we look ahead 5 years, we will see that the country's largest advertisers cannot support TV schedules even approaching those they have for years used in radio...

"During the radio broadcasting season of 1948-49, just 13 large advertisers accounted for 66% of the combined NBC-CBS time billing on 165 stations for a total of $84,000,000, including time & talent. If these same 13 advertisers, several years from now, bought TV to the same extent, that is, 66% of the NBC-CBS time billing, it would cost them $237,000,000 a year. This is considerably more money than the total of their present combined advertising budgets for all media..."

The answer? Partly this, in Madden's view: "More multiple sponsorship programs to attract moderate budget advertisers" and "exchange of commercial time by alternating week advertisers."

* * * *

There you have the thinking of one of network TV's key executives, anticipating network of 126 stations by 1955, assuming too, presumably, that it costs no more to program for that many stations than for today's 50 or so interconnected. He didn't discuss spot and local, which in radio far exceed network dollar volume, and probably will do so eventually in TV too.

Whether contemplating network, spot or local, however, Madden's excellent

discourse pointed up the problem, could serve as a warning against hell-in-a-hack rate-pace. And he certainly spoke a mouthful when he added:

"I believe we must bridle, to some extent, the unrestrained enthusiasm for piling rate increase upon rate increase, or face the possibility of pricing ourselves out of the market."

Personal Notes: Sen. Edwin Johnson (D-Colo.), chairman of Senate Interstate & Foreign Commerce Committee, has accepted another 3-year term as president of Western Baseball League; he had intended not to, in fact had resigned, but League named an executive v.p. to take burden of details . . . Parker D. (Bud) Hancock, chief of FCC's Office of Formal Hearing Assistants, joins Washington law firm of Hogan & Hartson . . . Donald Manson, asst. gen. mgr. since 1944, promoted to gen. mgr., Canadian Broadcasting Corp., succeeding Dr. Augustin Frigon, retiring due to ill health; J. Alphone Ouimet, chief engineer & coordinator of TV, named asst. gen. mgr. . . . Leslie H. Peard, asst. to mgr., promoted to mgr. of WBAL & WBAL-TV, succeeding Harold C. Burke, resigned . . . David Lasley, ex-NBC Chicago, named DuMont Central div. sales mgr. . . . Robt. L. Werner, RCA gen. attorney since April, elected v.p. & gen. attorney, Ernest B. Gorin, treas. since Sept. 1949, elected v.p. & treas., at RCA board meeting Dec. 7 . . . . . Harrison M. Dunham, ex-mgr. of KTTV, Los Angeles, joins with Maurice H. Hindin to form law firm at 111 W. 7th St., Los Angeles . . . John K. Herbert, NBC-radio sales v.p., named head of Brand Names Foundation conference set for next April 16 in New York's Waldorf-Astoria . . . Read Hamilton Wight, TV-radio director, elected v.p., J. M. Mathes Inc. . . . Edward H. Benedict, ex-asst. ABC-TV sales mgr., joins J. M. Mathes Inc. as contact man on Canada Dry account . . . Norman Grant, NBC-TV mgr. of staging services, Chicago, joins N. Y. staff Dec. 10 as art director, handling set & costume designing, titles, graphics, etc. . . . Don G. Hallmann, ex-WXYZ-TV & CBS-TV, joins WWJ-TV, Detroit, as director . . . Robert Hayward, ex-TV-radio director, Bank of America, named director of program development, KTTV, Los Angeles . . . Kevin B. Sweeney, ex-KFI & KFI-TV (now KHJ-TV), named BAB v.p. in charge of radio promotion & sales . . . Ralph T. Braun promoted to promotion mgr., WMAR-TV, Baltimore.

———■———

First FM station shifted from non-commercial to commercial status is Indiana U's WFIU, Bloomington, granted change from 90.9 mc to 103.7 mc for novel reason: Bloomington residents had been squawking at length because strong FM signals interfered with weak TV signals from Indianapolis' WFMB-TV on Channel 6 (82-88 mc), leading university to close down station at 6 p.m. daily. No higher non-commercial FM channel was satisfactory, therefore school decided to move to commercial channel, but indicated no desire to operate commercially.

Defense Dept. hasn't abandoned use of TV-radio advertising in Armed Forces recruiting campaigns, asst. Defense Secretary Anna Rosenberg told NARTB in statement Dec. 7. She refuted assertion last week by Defense Dept. deputy general counsel Fred Korth that funds earmarked for TV-radio advertising for remainder of fiscal year had been withdrawn. NARTB board earlier had asked Secretary Lovett to rescind this discriminatory action.

Dec. 1 sets-in-use reported since NBC Research's census of Nov. 1 (Vol. 7:47): Miami 93,800, up 15,800; Omaha 105,843, up 8843; Richmond 98,820, up 6520; Memphis 108,780, up 4780; Dallas-Ft. Worth 145,412, up 4412; Utica 60,000, up 3800; Washington 312,000, up 11,000; Norfolk 91,191, up 5491; Greensboro 89,138, up 4138.

WBAL, Baltimore, sister of WBAL-TV, goes on 24-hour-a-day basis as of Dec. 10.

Telecasting Notes: "Wave of the future" may see more and more AM network affiliations following TV. When New Haven's WNHC (sister of WNHC-TV) joined NBC radio network Dec. 1, it was year's third such new affiliation by radio station operated by same interests as TV. Others: WDSU, New Orleans (WDSU-TV), from ABC to NBC; WJIM, Lansing (WJIM-TV), ditto, along with WGFG, Grand Rapids, owned by same interests . . . New Haven affiliation on NBC-AM caused some concern to 50-kw WTIC, Hartford, longtime NBC affiliate which always claimed that area . . . Elliott Roosevelt deal for purchase of Crosley's WINS, New York (Vol. 7:47) fell through this week—"for time being, at least"; price of around $600,000 wasn't stumbling block . . . In addition to 7-9 a.m. *Today*, Mon.-thru-Fri., starting Jan. 7 with Dave Garroway—frankly experimental effort on part of TV v.p. "Pat" Weaver to win early morning audience over to programs that can be either heard or seen (Vol. 7:47)—NBC-TV is adding some 25 hours per week to its network schedule as of that date to fill up all time to 1 p.m., starting 10 a.m.; left to stations for local sponsor is 9-10 a.m., though schedule allows for plenty of local spots and adjacenies . . . Know-how pays off: CBS's KNXT, Hollywood, acquired for $3,600,000 last year (Vol. 6:52), which switched to CBS-TV as of April 1 and moved to new Mt. Wilson site Oct. 28, increased national spot billings more than 300% between April & October, reports gen. mgr. Wilbur S. Edwards, citing also improved ratings . . . Some TV shows "going AM": Kellogg (for Pep) to sponsor *Tom Corbett, Space Cadet* on ABC radio network Tue. & Thu., 5:30-5:55, starting Jan. 1; *Howdy Doody* goes on NBC radio starting Dec. 15, Sat. 8:30-9:30 a.m. Both staying on TV, but no simulcasts . . . Bank of America reported to have foreclosed on some 20 movies, costing $25,000,000, of which 40% came from bank loans, and to be probing TV potential. Among features from defunct Enterprise Pictures are *Arch of Triumph*, with Charles Boyer & Ingrid Bergman; *Ramrod*, Joel McCrae & Veronica Lake; *The Other Love*, David Niven & Barbara Stanwyck; *Body and Soul*, John Garfield & Lilli Palmer; *Four Faces West*, Joel McCrea, Frances Dee, Charles Bickford . . . Lee Newspapers' WTAD, Quincy, Ill., longtime TV applicant, hires DuMont closed-circuit setup for Dec. 5-9 celebration of its 25th anniversary.

Chicago TV originations—"a young Goliath"—have been "clubbed insensible" by networks, particularly NBC-TV, according to J. Hugh E. Davis, executive v.p. of Foote, Cone & Belding. In Nov. 28 talk to joint meeting of Chicago's Radio Management Club and TV Council, he insisted that Chicago originations have produced and would produce cheaper and better shows—with higher ratings. He cited *Zoo Parade, Kukla, Fran & Ollie, Hawkins Falls;* then told how Dave Garroway was dropped because network moved him to spot where only 9 stations could be cleared. Enlarging on what Chicago could do better than New York, Davis said: "For my money, there is no argument that the people composing the cast of *Down You Go* represent much more a variety of American types of people than do *Leave It to the Girls* group of metropolitan mesdames whose claim to fame rests on a certain degree of mammarial magnificence plus a group of acid tongues nurtured on the gossip of plush booze parlors. But in this case I don't even have to base it on my own opinion. The ratings prove it."

Station Accounts: Movie producers and exhibitors are showing more and more inclination to utilize TV as major exploitation medium, Hollywood reports indicating they're not only willing now to permit contract stars to appear on TV but also inclined to buy more local spots and trailers to plug individual films . . . RKO is buying TV time for Walt Disney's *Snow White;* Lippert has just spent $5200 for Los Angeles TV spots to exploit new film *FBI Girl*, as it did for *Steel Helmet* earlier in year—indicating movies may become prime sponsors on TV outlets . . . Standard Oil of California to sponsor *Chevron Theatre*, weekly half-hour drama films being made for MCA by its subsidiary Revue Productions, Hollywood, at Eagle Lion studios, somewhat similar in format to famed *Fireside Theatre;* budgeted at reported $15,000-$25,000 per film. California Esso has Western rights, will place shows for at least 26 weeks in all Western TV markets, thru BBDO. Sears Roebuck is sponsor in Chicago (WENR-TV), may tie up Midwest rights . . . Arvin (TVs & radios), Gates Motors (DeSoto-Plymouth) and Gibson Co. (appliances) jointly sponsoring 7 *Indianapolis Symphony Orchestra* concerts on WFBM-TV, starting Dec. 18 . . . Buick Dealers of So. Calif. buy 21 USC & UCLA basketball games on KHJ-TV, for which station paid reported $33,000; Farmers Insurance Co. sponsors the half hour preceding each game, with plenty of spots and adjacencies being sold . . . Chinchilla rancher E. J. Donovan has bought Sun. 4:15-4:30 for film series titled *Fur Fun* on KNXT, Los Angeles, designed to sell the animals at $1650 a pair . . . Special sum has been set aside out of Florida Citrus Commission's ad budget to promote Florida temples via TV starting in January, thru J. Walter Thompson Co. . . . Hudson Motor Car Co. sponsoring UP-Movietone News films 4 nights weekly on WXYZ-TV, Detroit . . . Among other advertisers reported using or preparing to use TV: Martin Motors, Div., National Pressure Cooker Co. (outboard motors), thru Melamed-Hobbs Inc., Minneapolis; Charles of the Ritz Distributing Corp. (cosmetics), thru Peck Adv., N. Y.; Bostwick Laboratories Inc. (fire extinguishers, plastic spray), thru Grey Adv., N. Y.; Sea Breeze Laboratories Inc. (antiseptic), thru BBDO, Pittsburgh; Giuseppi's Frozen Pizza Pie (frozen pizza), thru Weightman Inc., Philadelphia; William Horn & Co. (Sea Feast salmon), thru Ted Workman Agency, Dallas; Moeller Mfg. Co. (bottle stoppers), thru Jacobson & Tonne Adv., Chicago; Frosty Creme Products Inc. (Cemi-Curl home permanent wave), thru Roman Adv. Agency, St. Louis; Loma Linda Food Co. (Gravy Quik), thru Elwood J. Robinson Adv., Los Angeles.

Network Accounts: Pitchman Sid Stone leaving *Texaco Star Theatre* after Xmas Day show, and Milton Berle will vacation from Jan. 8 & 15 shows . . . Chesterfield starts *Dragnet* Jan. 3 or 10 on NBC-TV, Thu. 9-9:30 when *Ford Festival* cuts to half-hour; show will be previewed Dec. 16 on NBC-TV, Sun. 7-7:30 during time being vacated by Chesterfield's comedy show, *Sound Off Time* . . R. J. Reynolds Tobacco Co. (Cavalier cigarettes) Dec. 5 started *Cavalier Theatre* on NBC-TV, Wed. 10:30-11, thru Wm. Esty Co., N. Y.; show will run 4 weeks only . . . Stokely-Van Camp Inc. (food products) Jan. 4 starts sponsorship of 2:15-2:30 Fri. portion of *Garry Moore Show* on CBS-TV, Mon.-thru-Fri. 1:30-2:30, thru Calkins & Holden, Carlock, McClinton & Smith, N. Y. . . . Hall Brothers Inc. (Hallmark greeting cards) sponsors Christmas Eve premiere of Gian-Carlo Menotti's opera *Amahl and the Night Visitors* on NBC-TV, Mon. 9:30-10:30; work was commissioned especially for TV 2 years ago by NBC . . . Crosley Div., Avco Mfg. Corp., starting Jan. 7, shares alt. week sponsorship with Speidel of *What's My Name?* on NBC-TV, Mon. 8-8:30, thru Benton & Bowles, N. Y. . . . Rosefield Packing Co. (Skippy peanut butter) Dec. 10 expands sponsorship of its West Coast show *You Asked for It* to ABC-TV, Mon. 9-9:30, thru Guild, Bascom & Bonfigli, San Francisco . . . General Electric cuts *Fred Waring Show* Jan. 13 to half-hour on CBS-TV, Sun. 9-9:30 . . . Gruen Watch Co. moves *Gruen Theatre* from ABC-TV to DuMont, alt. Thu. 9-9:30, effective Jan. 17 . . . California Fruit Growers Exchange (Sunkist citrus fruits) reported readying sponsorship of *Corliss Archer* on CBS-TV, Thu. 8-8:30, thru Foote, Cone & Belding, Los Angeles.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for October: Irving B. Babcock sold 2000 Avco options for common in October, 7500 in September, holds 68,750 options, 797 common, 25 pfd.; James Bruce bought 800 Avco (Jan.), holds 1000; I. James Youngblood sold 200 Clarostat, holds 100; Frank L. Driver bought 100 Driver-Harris, holds 38,180; John H. Briggs gave 150 Gabriel Co. as gift, holds 14,788 common, 2750 pfd.; Sidney J. Weinberg bought 100 GE, holds 300; Adolphe A. Juviler sold 100 Olympic (Sept.), holds 85,540; Harold W. Butler gave 30 Philco as gift, holds 11,215; John S. Timmins gave 40 Philco as gift, holds 5460; William Gammell Jr. gave 100 Raytheon as gift, holds 13,958; James O. Burke gave 5400 Standard Coil as gift, holds 341,660; Robert E. Peterson gave 400 Standard Coil as gift, holds 200,680; Arthur Richenthal received gift of 1000 Standard Coil, holds 1000; Glen E. Swanson gave 800 Standard Coil as gift, holds 419,410; Curtis A. Haines sold 100 Sylvania, holds 43; Frank A. Poor sold 300 Sylvania, holds 6900.

National Union Radio Corp., planning to seek $5,000,000 in equity or loan capital shortly in connection with expansion program, reports sales for 10 months ended Oct. 30 at $11,243,343 vs. $11,327,293 for same 1950 period. Estimated profit was under $400,000, compared with $823,085 in the 1950 period. Company has purchased 44-acre tract in Philadelphia for projected 145,000 sq. ft. plant, mainly to produce tubes for military, reports military backlog now $6,000,000.

Electronics & Nucleonics Inc. is offering 1,998,000 shares of 1¢ par common stock at 15¢ a share, underwritten by Israel & Co. New firm has acquired assets of Kinetic Electronics Corp. and Kinetic Radio Corp. at 503 W. 33rd St., New York, plans to make military electronics equipment, including TV "cameras, transmitters, receivers . . . color or black-&-white," and develop and build color theatre-TV system invented by John M. Cage. Delaware corporation is capitalized at 10,000,000 shares, of which 2,000,000 are outstanding, having been issued to officers and directors. Directors are: Irving F. Kornfeld and Hyman Zarett, former sole owners of Kinetic, president and v.p. respectively; Edward B. Randolph, secy.; John B. Milliken. Consultants are Mr. Cage, inventor and engineer, and Emil J. Simon, inventor of Simon Radio Guide, electronic aircraft locator.

Dividends: Admiral, 25¢ payable Dec. 28 to stockholders of record Dec. 17; Zenith, 50¢ payable Dec. 31 to holders Dec. 14; Collins, 68¾¢ payable Jan. 2 to holders Dec. 21; Paramount Pictures, 50¢ payable Dec. 24 to holders Dec. 14; Raytheon, 60¢ payable Jan. 2 to holders Dec. 15; Muter Co., 15¢ payable Dec. 31 to holders Dec. 15; Arvin, 50¢ payable Dec. 27 to holders Dec. 10; Corning Glass, 25¢ regular plus $1 extra payable Dec. 26 to holders Dec. 13; Davega, 25¢ payable Jan. 2 to holders Dec. 17; Decca, 17½¢ payable Dec. 28 to holders Dec. 17; Erie Resistor, 20¢ payable Dec. 15 to holders Dec. 7; Electrical & Musical Industries Ltd., 6¢ payable Dec. 21 to holders Dec. 12; WJR The Goodwill Station Inc., 40¢ payable Dec. 20.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
December 8, 1951

LATEST 'BALANCE OF TRADE' FIGURES: This year's TV production will go well over the 5,000,000 mark -- very likely will hit 5,200,000 or better.

Final November week's output of 125,745 units (8000 private label) brought month's total to 562,198 and total for 48 weeks thus far to 4,944,922, subject to RTMA statisticians' later revisions.

Of remaining 4 weeks of 1951 to be counted, Xmas week won't be very productive but other 3 should bring year's total beyond most predictions.

Factory inventories continued downward, were 255,867 as of Nov. 30, about 11,000 less than preceding week. It was 18th consecutive week of reducing inventory from peak of 768,766 as of last Aug. 3. In other words, during that span of time the manufacturers curtailed holdings about 513,000 units.

Radio output for week ended Nov. 30 totaled 196,222 (71,694 private), about 25,000 more than preceding week (Vol. 7:48). Radio inventory went down to 312,218 from preceding week's 346,183. Month's radio output was 977,463, so that year's to Nov. 30 was 11,930,664. Week's radios: 122,773 home, 16,129 portable, 57,320 auto.

* * * *

Just about everyone in the trade agrees wholesale & retail movements of TVs and radios were good during November, but it will be whole month before statistical confirmation is forthcoming. Meanwhile, RTMA's end-of-October distributor inventory figures were released, as was Dun & Bradstreet survey of October retail sales and inventories. This is the story they tell:

Distributor inventories of TVs were 645,312 as of Oct. 26, not much change from the 652,742 at end of September. Radio inventories were 1,038,990 -- 843,260 home sets, 195,730 battery portables -- as against 1,048,666 at end of September.

* * * *

Retail TV sales totaled 505,000 during October, home radios 538,000, portables 94,000. For the 4 months of Dun & Bradstreet surveys, July-thru-October, they indicate 1,702,000 TVs sold, 1,773,000 home radios, 440,000 battery radios.

Dun & Bradstreet-estimated inventories at dealers went up slightly -- some 24,000 more table models, 16,000 additional other types -- from end of September. At end of October, it calculated there were 300,000-350,000 table TVs in dealer hands, 500,000-600,000 other models.

Home radios in dealers' hands were estimated at 1,250,000-1,500,000, battery radios 250,000-300,000, as of end of October -- very little change in month.

Reason October retail inventories stayed high is said to be that dealers were stocking up for pre-Xmas trade. Big drop is forecast when November is reported.

* * * *

Admiral's Ross Siragusa, speaking before American Bankers Assn. national credit conference Dec. 3, estimated that total TV inventories of all manufacturers, distributors and retailers are now 1,500,000 as compared with peak of 2,500,000. He obviously had made his own projection for end-of-November result, for at October's end the sum of factory (255,000), distributor (645,000), dealer (800,000-950,000) inventories was somewhat nearer 2,000,000.

"The industry's readjustment has been pretty well completed," he declared, "and TV prices are now at an irreducible minimum, especially since costs are again pointing upward." He estimated industry's capacity at about 400,000 sets a month under present materials restrictions, and predicted post-Xmas production "will be adequate to maintain a reasonably even balance with sales for the next 3-6 months."

CIVILIAN OUTPUT PINCH—TIGHTER & LONGER: Future trends in controls, shortages and military orders are geared to today's headlines -- expansion of aircraft and atomic programs...progress toward Korean truce...and this "great debate":

Is rearmament program going too slow, too fast or just right?

As gleaned from discussions with govt. production people on both policy and operations levels -- and subject always to change by Congress, the military, the bureaucrats, fortunes-of-war and public pressure -- here's today's best sizeup:

Civilian production will be cut again in second quarter, despite earlier assurances that first quarter's slice would be "the limit". Cuts won't exceed 10% -- may be half that -- but you can count on one thing: No matter what some politicians and military men demand, civilian production won't be snuffed out -- unless U.S. goes to war or reaches brink of total war.

How's mobilization program going? Answer depends on which Congressional Committee report you read. Senate Preparedness "Watchdog" Subcommittee, under Sen. Lyndon Johnson (D-Tex.), says military production is far behind schedule, blames the high level of civilian output (Vol. 7:48). The Defense Dept. concurs, singling out radar, jets, tanks, bombsights among items lagging.

Opposite view is taken by Joint Senate-House Defense Production Committee, led by Sen. Burnet Maybank (D-S.C.), which praises job done by mobilizer Charles E. Wilson & DPA-NPA chief Manly Fleischmann, and adds: "There is no need to be alarmed at the unconfirmed reports of failures to maintain a minimum of national safety."

As debate rages, mobilizers are quietly pushing full-military-strength target date further into future to meet new higher goals set by Congress and military. Program's maximum impact was originally to have come early in 1952. Now they're talking late 1952. Target for maximum strength has been shoved from '53 to '54.

Air Force and atomic energy sights are being aimed higher. This will mean longer and more severe shortages of copper and the alloying metals -- nickel, tungsten, cobalt -- less for TV-radio, other civilian hard goods. Joint Chiefs of Staff approved 143-wing Air Force by late 1954, vs. now-authorized 95 wings and actual current force of 90. AEC is looking toward third expansion program, to cover step-up in tactical atomic weapons production.

* * * *

"Guns and margarine" is phrase now used by defense mobilizer Wilson -- a variation of "guns and butter" shibboleth. And civilian producers are expected to be told early next year they'll have to make "margarine", not "butter" -- by means of compulsory conservation, standardization and simplification orders (Vol. 7:45).

Opinion within control agencies is divided on this subject. One school of thought says: "Why should we tell manufacturers how to run their businesses? Just give them the material and let them use it as they wish." Others reply: "It's our duty to get maximum production from minimum materials, thereby prevent shortages of civilian goods and help hold down inflation and unemployment.

As for TV-radio, such orders may be forthcoming -- but they're still only a gleam in the eyes of high DPA policymakers. It's known that no such orders are as yet under active consideration within NPA's Electronics Division.

NPA compliance investigations will be stepped up. Some tire companies are already being disciplined -- through reduced rations -- for alleged deliberate miscalculations of rubber quotas.

Reorganization of mobilization setup is also in wind. Wilson is reported favoring naming of production & procurement czar -- either Munitions Board chairman John Small or new Defense Undersecretary.

* * * *

Charge that defense program is moving too fast, first such public criticism by a leading industrialist, came from GE chairman Philip D. Reed. He says "peak of rearmament program is too high...and it comes too soon," asks Govt. to consider if it should be "re-phased, the peak taken off and spread over 2-4 additional years."

Now that someone has broken the ice (notably an industrial colleague of Wilson's!), you'll hear more of this type criticism, based on view that "inflation

and misery which lie along the road [of too-rapid mobilization] are no less formidable enemies than the rulers of Russia." Reed says military has been overstating its needs and Congress playing politics by approving blindly everything Pentagon asks.

If Korean fighting stops, advocates of more gradual mobilization program may gain influence. But as of today, military plans are being expanded -- toward a higher-level rearmament, to be achieved over longer period, with consequent tighter and longer pinch on civilian production.

Mobilization Notes: Top 100 defense contractors of fiscal 1951 include 17 electronics and related firms which received 10% of dollar value of all military contracts. Newly revised tabulation by Munitions Board is more accurate and includes more companies than earlier estimates given Senate Small Business Committee July 18 (Vol. 7:29). The 100 companies listed received 61.5% of all military prime contracts during fiscal year—or $18 billion out of total of nearly $30 billion.

General Motors leads list with $2 billion, or 8% of year's contract placement dollar volume. Only firm generally regarded as "electronics" in first 10 is GE, fifth with $654,200,000, or 2% of total. Other 8 make aircraft.

It should be noted that many aircraft and other "non-electronic" firms make some electronic equipment and many "electronic" companies make some non-electronic equipment. Much of the orders on list were subcontracted to other firms. Following are electronics and related firms in list of first 100, their position on list, dollar value of their prime contracts in fiscal 1951 and their percentage of year's total military contracts:

GE, fifth, see above; AT&T, 14th, $400,700,000 or 1.3%; Bendix, 16th, $368,700,000 or 1.2%; Sperry, 17th, $343,300,000 or 1.2%; Westinghouse, 18th, $324,400,000 or 1.1%; IT&T, 23rd, $179,300,000 or .6%; Avco, 29th, $153,600,000 or .5%; RCA, 31st, $144,600,000 or .5%; Collins Radio, 39th, $102,100,000 or .3%; Philco, 42nd, $94,500,000 or .3%; Raytheon, 49th, $79,800,000 or .3%; Hazeltine, 63rd, $55,500,000 or .2%; Gilfillan Bros., 63rd, $55,500,000 or .2%; American Bosch, 70th, $48,500,000 or .2%; Stewart-Warner, 77th, $41,500,000 or .1%; Sylvania, 91st, $31,500,000 or .1%; Radioplane Co., 95th, $29,500,000 or .1%.

During first 4 months of fiscal 1952, Defense Dept. obligated $10.5 billion for "hard goods." Using general 10% rule-of-thumb, it's good guess that $1 billion of this was for electronics-communications. Military "hard goods" obligations for 16-month period following Korean outbreak total $40.6 billion.

* * * *

Home TV-radios may be "blacked out" unless more selenium, nickel and aluminum are made available to meet replacement rectifier needs, selenium rectifier manufacturers warned NPA at recent meeting. They said production will be cut 50% as current materials inventories are used up, and most of this output will be required for defense production. They added shortage could be relieved by diverting more selenium from such users as glass industry, which uses it for coloring. Rectifier makers estimated about 30,000,000 are now in use and 1,500,000 replacements are needed annually to keep home TV-radios working.

Multi-million dollar reliability program for military tubes was outlined to Pentagon electronics experts by GE officials in Washington Dec. 5. GE tube dept. sales mgr. E. F. Peterson told defense electronics personnel GE will be able to turn out 20,000,000 high-reliability tubes annually by end of 1953, with full support of armed forces. He said company has already increased capacity for turning out reliable tubes from less than 500,000 a year at time of Korean outbreak to 5,000,000 annually now. Earlier, Electronics Production Board member J. A. (Shine) Milling, chief, NPA electronics end equipment branch, told meeting of RTMA-NEMA Joint Electron Tube Engineering Council (JETEC): "I don't know of a single problem at the present time that is more urgent or which holds more promise for a real contribution to the defense effort than a realistic program of standardization for reliable or ruggedized tubes."

Trade Personals: Lee McCanne, ex-Stromberg-Carlson v.p., resigns Dec. 21 as asst. director OPS Consumer Durable Goods Div., to become general secretary of Rochester Chamber of Commerce; he'll continue on Stromberg-Carlson board . . . Lloyd Dopkins, Crosley direct dealer sales mgr., named gen. mgr. of New York branch, W. J. O'Brien being appointed appliance div. mgr. and Paul A. Hilton electronics div. mgr. . . . Michael Kory elected president, Emerson-New Jersey Inc., succeeding Samuel Gross, retired . . . Edward L. Pincus, ex-v.p. & gen. mgr., named president, Motorola-Philadelphia Inc. . . . Thomson A. Moore, ex-sales mgr., Ford Motor Co. export operations in U. S., appointed asst. to F. R. Deakins, president, RCA Victor Co. Ltd., Montreal . . . Herman S. Sacks, ex-Hudson-Ross, Chicago, joins Bendix Radio Jan. 1 as asst. gen. sales mgr., newly created post . . . Brooks Kafka named GE purchasing supervisor for CR tubes . . . Martin L. Scher, Emerson national sales mgr., appointed gen. mgr., Emerson-New York Inc. . . . Paul Hines, ex-Raytheon, named director of engineering, Workshop Associates div. of Gabriel Co., in charge of new lab being built at Natick, Mass. . . . Charles H. Griffin, radio sales div. mgr., appointed gen. sales mgr., International Resistance Co. . . . David Kapp, ex-Decca v.p., appointed director of popular artists & repertoire, RCA Victor record dept. . . . Anthony H. Lamb named v.p. manufacturing, Weston Electrical Instrument Corp. . . . Milton R. Benjamin, ex-Majestic, named gen. sales mgr., Jewel Radio Corp., now expanding into TV field . . . Remhold W. Schmidt promoted to asst. manufacturing mgr., DuMont CR tube div., take place of William Carlin, now manufacturing mgr.; Ellsworth S. Doe named supervisor, mechanical & electrical maintenance.

Trade Miscellany: Norge-Admiral deal (Vol. 7:48) "still cooking" this week, should reach climax within next few weeks . . . Admiral convention at Chicago's Drake Hotel Jan. 3-5 will feature refrigerators, include junket to Galesburg (Ill.) plant . . . Philco convention now definitely scheduled for Fri. & Sat., Jan. 4-5, in Chicago's Palmer House . . . Crosley broke ground Dec. 1 for new $5,500,000 defense plant in Cincinnati's Evandale section, one-story structure on 73-acre tract including 360,000 sq. ft. of space and expected to employ 2000 "as early in 1952 as possible" on Air Force & Navy equipment . . . DuMont's 8¢ general pay increase goes into effect Dec. 10, maximum allowed, plans to ask Wage Stabilization Board to permit additional 2¢; some 3500 employes in E. Paterson, Clifton & Passaic plants affected . . . Imperial Television Mfg. Co., Los Angeles, introducing its first 21-in. open-face console with new cylindrical tube face (Vol. 7:47) . . . Motorola completes $1,000,000 order for 1400-mi. Chicago-to-Hungerford, Tex. microwave-relay system for Texas-Illinois Natural Gas Pipeline Co.

Topics & Trends of TV Trade: General Electric Supply Corp., looking to market for appliances, TVs, radios and supplies that by 1954 will be 50% ahead of 1950's record sales (industry total: 7,500,000 TVs, 14,500,000 radios), is being reorganized by establishing 11 new sales districts, more than 70 new places of business. GE Supply's volume this year will exceed $500,000,000, or 5½ times that of 1940.

Plan sets up 4 market areas, each under a v.p. as follows: Northeast region, headquarters at Bridgeport, under Charles T. Shropshire, ex-v.p. & asst. to president; North Central, Chicago, Donald B. White, ex-mgr., Buffalo district; Southeast-Southwest, Atlanta, Robert A. Clark, ex-Atlanta district mgr.; Western, Los Angeles, Harry C. Gerster, ex-Los Angeles district mgr.

Sales districts will be increased to 47 through subdivision of existing districts. New districts: Memphis, Jacksonville, Bridgeport, San Antonio, Lubbock, Tex., Rockford, Ill., Grand Rapids, Wichita, Phoenix, Little Rock, Sacramento. New branch houses will be opened in New York, Boston, Philadelphia, Pittsburgh, Detroit, Cleveland, Chicago, Los Angeles, Newport News, Va.; Greenville, S. C.; Albany, Ga.; Tyler, Tex.; Burlington, Vt.

Said president Charles R. Pritchard: "We are enlarging our organization in order to serve [GE & Hotpoint] more aggressively, efficiently and economically, as well as to improve our service . . ."

* * * *

Merchandising Notes: November TV-radio sales in 5 New York City dept. stores surveyed by *Herald Tribune* went up 18, 36, 69, 77 & 89% in dollar volume, compared with same 1950 month; went down in 6 other stores 12, 12, 23, 40, 41 & 51% . . . Philco establishing factory branch, to be known as Philco Los Angeles, as of Jan. 1 under temporary presidency of Phil Gough, president of Gough Industries Inc., who was feted at party in Pasadena Civic Auditorium Dec. 9 attended by more than 3000 State dealers and families . . . DuMont offering new CR tube guarantee to manufacturers, effective for 6 months from date of actual installation of receiver in home . . . Majestic out this week with 3 new models—17-in. table in cordovan leatherette cabinet, $200; 20-in. Regency console, mahogany, two-third doors, $340; same 20-in. oak, $360 . . . Masterpiece TV Manufacturing Co., 725 Sutter Ave., Brooklyn, N. Y. (R. R. Marantz, president) offering "custom" cabinets for 20-in. picture tubes, 30-tube chassis, so that customer can virtually design own receiver from choice of dozen woods, 6 color schemes, varying accoutrements.

October 10% excise tax collections on TVs, radios, phonographs & components jumped to $7,611,859 from $6,227,593 in September, and compared with $5,892,095 in October 1950. Phonograph records excises totaled $1,018,711, up from $388,442 in September, $568,002 in October 1950. Refrigerators, air conditioners etc. paid $4,338,270, up from $3,293,847 in September, down considerably from the $6,484,099 of October 1950.

October receiving tube sales of 34,137,519 brought total for first 10 months of 1951 to 314,932,875—of which 211,273,000 were shipped for use in new sets, 78,940,247 sold for replacements, 5,681,734 sold to govt. agencies, 19,037,876 exported. In October 1950, RTMA reports, sales were 40,105,611 units, and for first 10 months of 1950 they were 304,910,357.

Annual RTMA membership list and trade directory, listing association's officers, directors, committees and detailing companies, products they make, trade names, came off the press this week for distribution to members.

LOTS OF TALK about CBS-Columbia Inc. plans to increase TV set production, launch big advertising-merchandising drive, buy up other companies with aim of taking one of top places in TV-radio manufacturing industry. But rumors that it's acquiring Majestic, Muntz, Meck, Philharmonic, et al., are discounted by principals. Said CBS-Columbia president David Cogan:

"There have been at least a dozen companies offered to us, and we've talked to them but have made no decisions. Why do you think they want to sell? Are they in such bad way? Another thing—we're having our lawyers try to get a clearer interpretation of NPA's rules on purchase of plants—whether we could move facilities to new plants, etc. If we bought any, we'd probably temporarily produce at the existing plant."

CBS-Columbia several weeks ago acquired old Mack Motors plant in Long Island City, 275,000 sq. ft. (Vol. 6:47). Its appeal for more materials from NPA, indefinitely postponed, is now being held in abeyance at own request. "After all," said Cogan, "we may not have the new plant in production for 8 months or so, and the materials situation may be different by then. But we're selling all the sets we can make now and, of course, we'd like to make more. As I've said before, our plans are long-range."

Private-label business is being kept at "exactly the same percentage of our production it has always been," Cogan said. "In fact," he went on, "we've even cut CBS-Columbia brand production to keep it up. It's very valuable to us, and I think it's only fair to our customers.

"Private-label business has given us a good 'flat' production. In the summer, we maintain a high production curve and warehouse sets for such organizations as Sears. That has given us an advantage, compared with companies of similar size which have an extremely rough time in the summer.

"Furthermore, such large private-label customers give us an excellent field-testing organization. One of the big reasons for keeping our present plant is because of private-label business."

Zenith paid $50,000 to James P. Finnegan, St. Louis Collector of Internal Revenue now under indictment for bribery, solely for purpose of getting feature films for Jan.-March 1951 Phonevision tests—not because of any tax difficulties. So stated Zenith president Eugene McDonald after *St. Louis Globe-Democrat* this week broke story of fee. McDonald said number of people, including Finnegan, had approached him when it was apparent film producers wouldn't provide films, assuring him they could get them. He retained Finnegan, and producers offered films shortly afterwards. McDonald said he didn't know what, if anything, Finnegan did to shake pictures loose. It's been generally assumed that word from Justice Dept., hinting "conspiracy," had much to do with film producers' release of films; speculation is that Finnegan sparked interest of Justice Dept. In Los Angeles this week, meanwhile, H. C. Bonfig, Zenith v.p., plumped for Phonevision in talk to Sales Executives Club, saying FCC petition will be filed soon and that NCAA and outstanding universities have offered support for subscription TV.

New 8½-in. portable scheduled for production in 2 weeks under Gotham trade name by Harold Shevers Inc., New York, weighs 29 lbs., lists at $199.95 in airplane cloth, also available in leather.

Though Hazelton, Pa. has estimated 2500 sets in use, Mountain City TV Corp. (Tristram F. Lucian, president) hopes to double number by installing community antenna system. City Council recently gave company go-ahead.

Testimonial to uhf potential is fact Westinghouse Radio Stations Inc., operating WBZ-TV, Boston, and pre-freeze applicant for vhf in Pittsburgh, Ft. Wayne & Portland, Ore., where it has AM stations, will shortly file for uhf in Philadelphia. Of 5 applications filed with FCC this week, 3 were for uhf: WCHA, Chambersburg, Pa., seeking Channel No. 46; WHKP, Hendersonville, N. C., No. 27; Grace S. & C. W. Rogers, theatre owners of Carbondale, Ill., No. 34. Two sought vhf: WCSC, Charleston, S. C., No. 5; WLOS, Asheville, N. C., No. 13. That makes 465 applications now pending, of which 24 are for uhf. [For further details about foregoing applications, see *TV Addenda 13-U* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Eighteen TV stations in Mexico are envisaged in plans of Romulo O'Farrill, Mexico City industrialist who owns XHTV there and XELD-TV, Matamoros, in addition to AM station XEX, the *Mexico City Novedades*, *Mexico City News* (English-language newspaper) and country's Packard Motor Co. assembly and distribution organization. His third TV is already under construction at Cortez Pass, a fourth is planned at Tiajuana, and he has just set up Inter-American TV to produce and distribute kinescope and film shows and promote interchange of programs with U. S. Placed in charge is Monte Kleban, ex-KTRH, Houston, and WOAI, San Antonio, presently mgr. of XELD-TV, who will have offices at Alfonso Herrera 67, Mexico City, D. F.

First paid transcontinental color TV transmission came Dec. 7, when CBS leased lines to transmit delicate heart operation from Los Angeles County General Hospital to U of Chicago Medical Center and CBS New York headquarters. Doctors at New York receiving point carried on conversation with surgeon who had microphone in mask. AT&T says that transmission is first paid cross-country color TV event, but that experimental transcontinental (and equivalent, in loops) transmissions of both RCA and CBS color have been accomplished by AT&T engineers many times. This includes tests during RCA's Oct. 16-18 New York theatre-TV showings (Vol. 7:41-42).

FCC turned thumbs down on uhf experimental application of WHUM, Reading, Pa., this week (Vol. 7:33, 38, 43, 45, 47) after mulling series of caustic petitions filed by WHUM and WEEU, Reading—latter opposing grant. Commission wrote letter to WHUM, saying station probably wouldn't be built before end of freeze, and since it would have "all the characteristics of a commercial TV station," grant would be "contrary to the spirit and purposes" of freeze. WHUM had proposed to build station with 200-kw ERP, 1000-ft. tower. It has 20 days to ask for hearing.

Following FCC's ruling on political broadcasts (Vol. 7:48), wherein Commission said stations can't censor candidates' talks, regardless of state libel laws, NARTB board this week passed resolution endorsing Horan bill (H.R. 5470) which would exempt stations from liability for candidates' utterances.

Softer, more human TV pictures, as well as glare reduction, are claimed by Bausch & Lomb Optical Co. for new "TV eyeglasses" developed after year of research.

———■———

Bit-of-brag dept.: "Your Dec. 1 issue is very interesting," writes gen. mgr. Philip G. Lasky, KPIX, San Francisco, "particularly the 'Have Not' story on page 1 & 2. Not only have you been a True Believer, but a Prophet as well; I recall how earnestly you begged broadcasters to get into TV. The year now closing has been very satisfactory for KPIX, and during the month Dec. 15 to Jan. 15 we will be moving into our new building on Van Ness Ave., truly the last word in TV plants, according to the many visitors we have had."

Eidophor color theatre-TV (Vol. 7:42, 45-46) will be installed in 73 to 100 Southern California theatres within year, said National Theatres president Charles P. Skouras in Hollywood this week. He also revealed he plans to produce own shows for Swiss-developed theatre-TV system, GE making all equipment from cameras to projectors. But National Theatres and 20th Century-Fox, which jointly own Eidophor, still have hurdles to overcome, not least being NPA's order M-90, which bans commercial production of color TV equipment, including color theatre TV (Vol. 7:47-48). One suggestion under consideration is that the CBS-type color components used in Eidophor could be made in Switzerland or elsewhere overseas, rest of equipment in U.S., without violating M-90. Joint meeting of theatre-TV proponents in New York Dec. 7—including Motion Picture Assn., Theatre Owners of America, Allied, Theatre Network TV, National Exhibitors Theatre-TV Committee—took up question of M-90, referred it to legal committee for study and clarification.

Petition to enlarge issues in Feb. 25 theatre-TV hearing will be filed with FCC—probably next week—by theatre-TV exponents, including National Exhibitors Theatre-TV Committee, MPAA, TOA, Allied. FCC will be asked to consider whether, with slight modification of FCC rules, present frequency allocations to motion picture industrial radio services can be used for transmission of TV programs to theatres. Petition backing this idea was filed Sept. 11 by 20th-Century-Fox (Vol. 7:36), but it's believed industry-wide petition won't ask assignment of the frequencies, but will merely request that hearing be broadened to include the issue. Fox is expected to modify its petition to conform with industry proposal.

FCC sustained Comr. Sterling this week, in his ruling as motions commissioner, by refusing to permit intervention of Fanchon & Marco theatre chain (St. Louis, Los Angeles) in Paramount hearing (Vol. 7:41, 47). Chain is protesting proposed ABC-United Paramount Theatres merger (Vol. 7:21), alleging it's victim of monopoly practices by old Paramount company, and fearing results of merger. Commission will permit F&M to offer testimony, even though denying it intervention. Comr. Jones dissented, saying that since Justice Dept. hasn't offered to intervene, FCC can use help from such organizations as F&M. Chain came right back Dec. 7, asked for reconsideration of decision.

Sharply curtailing TV-radio broadcasts of its baseball games, New York Yankees Dec. 5 bowed to plea by minor league chief George M. Trautman. He told minor league convention in Columbus that small clubs are folding up because of TV-radio broadcasts of major league games in minors' territory. Of TV, he said: "Its impact upon professional and other sports already has generated a chilling fear in the hearts of most club officials." Yankees announced they'll abandon all network broadcasts, including game-of-the-day radio coverage. Home games will continue to be telecast on WPIX. Minor league convention wound up Dec. 7 after passing resolution demanding 50% of proceeds from major league TV-radio rights.

Additional data on Lawrence tri-color tube (Vol. 7:48) is supplied by December *Electronics*, which indicates that new 3-gun version provides an answer to use of tube with compatible color system. Engineers had been wondering how one-gun tube, which handles field-sequential system, could be made to work with high color subcarrier frequency (3.89 mc) of compatible system.

U. S.-Mexican border allocations (Vol. 7:45) are none too pleasing to number of southwestern applicants. As result, NARTB board this week decided to ask for reopening of negotiations and future participation in negotiations—through FCC hearings.

Code of Practices for Television Broadcasters

Adopted Dec. 6, 1951 by Television Board of National Assn. of Radio & Television Broadcasters *

Including Procedures Relating to Administration, Hearings and Decisions

PREAMBLE

TELEVISION is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting, and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obligated to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television, and all who participate in it, are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

In order that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

ADVANCEMENT OF EDUCATION AND CULTURE

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. In furthering this realization, the television broadcaster:

(a) Should be thoroughly conversant with the educational and cultural needs and desires of the community served.

(b) Should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

(c) Should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

ACCEPTABILITY OF PROGRAM MATERIAL

Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. Furthermore:

(a) (i) Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable acquire undesirable meanings, and telecasters should be alert to eliminate such words.

(ii) The Television Code Review Board (see V, Section 3) shall maintain and issue to subscribers, from time to time, a continuing list of specific words and phrases, the use of which should not be used in keeping with this subsection. This list, however, shall not be considered as all-inclusive.

* **Membership of Board:** Eugene S. Thomas, WOR-TV, New York, chairman; Robert D. Swezey, WDSU-TV, New Orleans, vice chairman; Campbell Arnoux, WTAR-TV, Norfolk; Harry Bannister, WWJ-TV, Detroit; Harold Hough, WBAP-TV, Fort Worth; Clair R. McCollough, WGAL-TV, Lancaster, and WDEL-TV, Wilmington, Del.; Paul Raibourn, KTLA, Los Angeles; W. D. Rogers Jr., KEYL, San Antonio; George B. Storer, Fort Industry Co. (WJBK-TV, Detroit; WSPD-TV, Toledo; WAGA-TV, Atlanta; KEYL, San Antonio); Frank M. Russell, NBC, Washington; C. J. Witting, DuMont.

Members of Code Committee: Directors Swezey (chairman), McCollough, Raibourn, Hough, Bannister. Also, Davidson Taylor, NBC; James L. Caddigan, DuMont; Donald W. Thornburgh, WCAU-TV, Philadelphia; Leonard Reinsch, WSB-TV, Atlanta, and WHIO-TV, Dayton; Walter J. Damm, WTMJ-TV, Milwaukee; Henry W. Slavick, WMCT, Memphis; James D. Hanrahan, WEWS, Cleveland; Thad H. Brown Jr., NARTB director of TV and counsel to TV board.

(b) (i) Attacks on religion and religious faiths are not allowed.

(ii) Reverence is to mark any mention of the name of God, His attributes and powers.

(iii) When religious rites are included in other than religious programs, the rites are accurately presented, and the ministers, priests and rabbis portrayed in their callings are vested with the dignity of their office and under no circumstances are to be held up to ridicule.

(c) (i) Contests may not constitute a lottery.

(ii) Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward, rather than for the quality of the program, should be avoided. (Reference, Contests)

(d) Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually nor justified as a solution for marital problems.

(e) Illicit sex relations are not treated as commendable.

(f) Sex crimes and abnormalities are generally unacceptable as program material.

(g) Drunkenness and narcotic addiction are never presented as desirable or prevalent.

(h) The administration of illegal drugs will not be displayed.

(i) The use of liquor in program content shall be deemphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

(j) The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with Federal, state and local laws, and should concentrate on the subject as a public sporting event.

(k) In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

(l) Exhibitions of fortune-telling, astrology, phrenology, palm-reading, and numerology are acceptable only when required by a plot or the theme of a program, and then the presentation should be developed in a manner designed not to foster superstition or excite interest or belief in these subjects.

(m) Televised drama shall not simulate news or special events in such a way as to mislead or alarm. Reference is made to the section of the Code on News.

(n) Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

(o) The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

(p) Unfair exploitation of others for personal gain shall not be presented as praiseworthy.

(q) Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

(r) The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

(s) The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

(t) Law enforcement shall be upheld, and the officers of the law are to be portrayed with respect and dignity.

(u) The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

(v) Suicide as an acceptable solution for human problems is prohibited.

(w) The exposition of sex crimes will be avoided.

(x) The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

RESPONSIBILITY TOWARD CHILDREN

1. The education of children involves giving them a sense of the world at large. Crime, violence and sex are a part of the world they will be called upon to meet, and a certain amount of proper presentation of such is helpful in orienting the child to his social surroundings. However, violence and illicit sex shall not be presented in an attractive manner, nor to an extent such as will lead a child to believe that they play a greater part in life than they do. They should not be presented without indications of the resultant retribution and punishment.

2. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. (Attention is called to the general items listed under "Acceptability of Program Materials.") Television is responsible for insuring that programs of all sorts which occur during the times of day when children may normally be expected to have the opportunity of viewing television shall exercise care in the following regards:

(a) In affording opportunities for cultural growth as well as for wholesome entertainment.

(b) In developing programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

(c) In reflecting respect for parents, for honorable behavior, and for the constituted authorities of the American community.

(d) In eliminating reference to kidnaping of children or threats of kidnaping.

(e) In avoiding material which is excessively violent or would create morbid suspense, or other undesirable reactions in children.

(f) In exercising particular restraint and care in crime or mystery episodes involving children or minors.

DECENCY AND DECORUM IN PRODUCTION

1. The costuming of all performers shall be within the bounds of propriety, and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

2. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

3. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

4. Racial or nationality types shall not be shown on television in such a manner as to ridicule the race or nationality.

5. The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

COMMUNITY RESPONSIBILITY

A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

TREATMENT OF NEWS AND PUBLIC EVENTS

News

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. Commentary and analysis should be clearly identified as such.

4. Good taste should prevail in the selection and handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

5. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

6. Pictorial material should be chosen with care and not presented in a misleading manner.

7. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station; and in his selection of newscasters, commentators, and analysts.

8. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

9. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . . " should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a news release.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. Because of the nature of events open to the public, the treatment of such events by a television broadcaster should be effected in a manner to provide for adequate and informed coverage as well as good taste in presentation.

CONTROVERSIAL PUBLIC ISSUES

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. In keeping therewith the television broadcaster should seek out and develop, with accountable individuals, groups and organizations, programs relating to controversial public issues of import to its fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. The provision of time for this purpose should be guided by the following principles:

a. Requests of individuals, groups or organizations for time to discuss their views on controversial public issues should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

b. Programs devoted to the discussion of controversial public issues should be identified as such, and should not be presented in a manner which would mislead listeners or viewers to believe that the program is purely of an entertainment, news, or other character.

POLITICAL TELECASTS

Political telecasts should be clearly identified as such, and should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

RELIGIOUS PROGRAMS

1. It is the responsibility of a television broadcaster to make available to the community as part of a well-balanced program schedule adequate opportunity for religious presentations.

2. The following principles should be followed in the treatment of such programs:

a. Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

b. Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

c. Religious programs should be presented by responsible individuals, groups, and organizations.

d. Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

3. In the allocation of time for telecasts of religious programs it is recommended that the television station use its best efforts to apportion such time fairly among the representative faith groups of its community.

PRESENTATION OF ADVERTISING

1. Ever mindful of the role of television as a guest in the home, a television broadcaster should exercise unceasing care to supervise the form in which advertising material is presented over his facilities. Since television is a developing medium, involving methods and techniques distinct from those of radio, it may be desirable, from time to time, to review and revise the presently suggested practices.

(a) Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

(b) A sponsor's advertising message should be confined within the framework of the sponsor's program structure. A television broadcaster should seek to avoid the use of commercial announcements which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called "trailer" announcements). To this end, the program itself should be announced and clearly identified before the sponsor's advertising material is first used, and should be signed off after the sponsor's advertising material is last used.

(c) Advertising copy should contain no claims intended to disparage competitors, competing products, or other industries, professions or institutions.

(d) Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

(e) Television broadcasters should exercise the utmost care and discrimination with regard to advertising material, including content, placement and presentation, near or adjacent to programs designed for children. No considerations of expediency should be permitted to impinge upon the vital responsibility towards children and adolescents, which is inherent in television, and which must be recognized and accepted by all advertisers employing television.

(f) Television advertisers should be encouraged to devote portions of their allotted advertising messages

and program time to the support of worthy causes in the public interest in keeping with the highest ideals of the free competitive system.

(g) A charge for television time to churches and religious bodies is not recommended.

ACCEPTABILITY OF ADVERTISERS AND PRODUCTS—GENERAL

1. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility, taking into consideration the characteristics of the medium and the form and content of the particular presentation. In general, because television broadcast is designed for the home and the family, including children, the following principles should govern the business classifications listed below:

(a) The advertising of hard liquor should not be accepted.

(b) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to federal and local laws.

(c) Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

(d) The advertising of firearms and fireworks is acceptable only subject to federal and local laws.

(e) The advertising of fortune-telling, occultism, spiritualism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is not acceptable.

(f) Because all products of a personal nature create special problems, such products, when accepted, should be treated with especial emphasis on ethics and the canons of good taste; however, the advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups is unacceptable.

(g) The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

2. Diligence should be exercised to the end that advertising copy accepted for telecasting complies with pertinent federal, state and local laws.

3. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

ADVERTISING OF MEDICAL PRODUCTS

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer, and the following principles and procedures should apply in the advertising thereof.

(a) A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

(b) Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe", "without risk", "harmless", or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

CONTESTS

1. Contests should offer the opportunity to all contestants to win on the basis of ability and skill, rather than chance.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof should be made acceptable.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (See Time Standards for Advertising Copy.)

PREMIUMS AND OFFERS

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of the listeners.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

TIME STANDARDS FOR ADVERTISING COPY

1. As a guide to the determination of good telecast advertising practice, the time standards for advertising copy, presently suggested, are as follows:

Length of Program	Length of Advertising Message (minutes and seconds)		
	News Programs	All Other Programs	
(minutes)	Day and Night	Class "A" Time	All Other Hrs.
5	1:00	1:00	1:15
10	1:45	2:00	2:10
15	2:15	2:30	3:00
25		2:50	4:00
30		3:00	4:15
45		4:30	5:45
60		6:00	7:00

2. The times set forth above do not affect the established practice of reserving for the station's use the last 30 seconds of each program for station break and spot announcements.

3. Announcement programs are designed to accommodate a designated number of individual live or recorded announcements, generally one minute in length, which are carried within the body of the program and are available for sale to individual advertisers. Normally not more than 3 one-minute announcements (which should not exceed approximately 125 words if presented live) should be scheduled within a 15-minute period and not more than six such announcements should be scheduled within a 30-minute period in local announcement programs; however, fewer announcements of greater individual length may be scheduled provided that the aggregate length of the announcements approximates three minutes in a 15-minute program or six minutes in a 30-minute program. In announcement programs other than 15 minutes or 30 minutes in length, the proportion of one minute of announcement within every five minutes of programming is normally applied. The announcements must be presented within the framework of the program period designated for their use and kept in harmony with the content of the program in which they are placed.

4. Programs presenting women's services, features, shopping guides, market information, and similar material, provide a special service to the listening and viewing public in which advertising material is an informative and integral part of the program content. Because of these special characteristics the time standards set forth above may be waived to a reasonable extent. In the present state of experimentation in programming and advertising techniques in television programs of this type no definite limitations to these exceptions are set forth at this time.

5. Any casual reference in a program to another's product or service under any trade name or language sufficiently descriptive to identify it should, except for normal guest identifications, be condemned and discouraged.

6. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade mark or slogan may be used only incidentally. They should not obtrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

DRAMATIZED APPEALS AND ADVERTISING

Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience or it should be made apparent from the presentation itself that the portrayal is dramatized.

SPONSOR IDENTIFICATION

Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934 and the Rules and Regulations of the Federal Communications Commission.

Regulations and Procedures

THE following Regulations and Procedures shall obtain as an integral part of the Television Code of the National Association of Radio and Television Broadcasters:

I—NAME

The Name of this Code shall be the Television Code of the National Association of Radio and Television Broadcasters.*

II—PURPOSE OF THE CODE

The purpose of this Code is cooperatively to maintain a level of television programming which gives full consideration to the educational, informational, cultural, economic, moral and entertainment needs of the American public to the end that more and more people will be better served.

III—SUBSCRIBERS

Section 1, Eligibility: Any individual, firm or corporation which is engaged in the operation of a television broadcast station or network, or which holds a construction permit for a television broadcast station within the United States or its dependencies, shall, subject to the approval of the Television Board of Directors as hereinafter provided, be eligible to subscribe to the Television Code of the NARTB to the extent of one subscription for each such station and/or network which it operates or for which it holds a construction permit; provided, that a non-television member of NARTB shall not become eligible via code subscription to receive any of the member services or to exercise any of the voting privileges of a member.

Sec. 2, Certification of Subscription: Upon subscribing to the Code, subject to the approval of the Television Board of Directors, there shall be granted forthwith to each such subscribing station authority to use the "NARTB Television Seal of Approval", a copyrighted and registered seal to be provided in the form of a certificate, a slide and/or a film, signifying that the recipient thereof is a subscriber in good standing to the Television Code of the NARTB. The seal and its significance shall be appropriately publicized by the NARTB.

Sec. 3, Duration of Subscription: Subscription shall continue in full force and effect until thirty days after the first of the month following receipt of notice of written resignation. Subscription to the Code shall be effective from the date of application subject to the approval of the Television Board of Directors; provided, that the subscription of a television station going on the air for the first time shall, for the first six months of such subscription, be probationary, during which time its subscription can be summarily revoked by an affirmative two-thirds vote of the Television Board of Directors without the usual processes specified below.

Sec. 4, Suspension of Subscription: Any subscription, and/or the authority to utilize and show the above-noted seal, may be voided, revoked or temporarily suspended for television programming including commercial copy which, by theme, treatment or incident, in the judgment of the Television Board constitutes a continuing, willful or gross violation of any of the provisions of the Television Code, by an affirmative two-thirds vote of the Television Board of Directors, at a regular or special meeting; provided, however, that the following conditions precedent shall apply: (1) The subscriber shall be advised in writing by Registered Mail of the charges preferred; (2) Such subscriber shall have a right to a hearing and may exercise same by filing an answer within 10 days of the date of such notification; (3) Failure to request a hearing shall be deemed a waiver of the subscriber's right thereto; (4) If hearing is requested by the subscriber, it shall be designated as promptly as possible and at such time and place as the Television Board may specify. Oral and written evidence may be introduced by the subscriber and by the Television Code Review Board (hereinafter provided for).

* "Television Board. The Television Board is hereby authorized: . . . (4) to enact, amend and promulgate standards of practice or codes for its Television members, and to establish such methods to secure observance thereof as it may deem advisable; . . .". *By-Laws of The National Association of Radio and Television Broadcasters, Article VII Section 2.B.(4).*

Oral argument may be had at the hearing and written memoranda or briefs may be submitted by the subscriber and by the Television Code Review Board. The Television Board of Directors may admit such evidence as it deems relevant, material, and competent and may determine the nature and length of the oral argument and the written argument or briefs to be submitted. The Television Board of Directors shall decide the case as expeditiously as possible and shall notify the subscriber and the Television Code Review Board in writing of the decision. Such decision shall be final.

Sec. 5, **Additional Procedures:** The Television Board of Directors shall, from time to time, establish such additional rules of procedure as, in its opinion, may be necessary for the proper administration of the Code; provided, that special considerations shall be given to the procedures for receipt and processing of complaints and to necessary rules to be adopted from time to time, taking into account the source and nature of such complaints; such rules to include precautionary measures such as the posting of bonds to cover costs and expenses of processing same; and further provided, that the Board of Directors shall take the steps necessary to insure the confidential status of any proceedings before it.

Sec. 6, **Amendment and Review:** Because of the new and dynamic aspects inherent in television broadcast, the Television Code, as a living, flexible and continuing document, may be amended from time to time by the Television Board of Directors; provided that said Board is specifically charged with review and reconsideration of the entire Code, its appendices and procedures, at least once each year.

Sec. 7, **Termination of Contracts:** All subscribers on the air at the time of subscription to the Code shall be permitted that period prior to and including the earliest legal cancellation date to terminate any contracts, then outstanding, calling for program presentations which would not be in conformity with the Television Code, provided, however, that in no event shall such period be longer than fifty-two weeks.

IV—RATES

Each subscriber shall pay "administrative" rates in accordance with such schedule at such time, and under such conditions as may be determined from time to time by the Television Board (see Article VII Section 2.B (3) and (4), By-Laws of the NARTB); provided, that appropriate credit shall be afforded to a television member of the NARTB against the regular dues which he or it pays to NARTB-TV.

V—THE TELEVISION CODE REVIEW BOARD

Section 1, **Composition:** The Television Board of Directors shall establish a continuing committee entitled the Television Code Review Board, upon the promulgation of the television code. The Review Board shall be composed of five members, all of whom shall be from the Television membership of NARTB. Members of the Television Board of Directors shall not be eligible to serve on the above specified Review Board. Members of the Review Board shall be appointed by the President of the NARTB, subject to confirmation by the Television Board of Directors. Due consideration shall be given, in making such appointments, to factors of diversification, of geographical location, company representation and network affiliation. Those members appointed, following promulgation of the Code, shall serve until immediately following the annual NARTB Convention of 1952. Thereafter a term shall be for one year.

A. **Limitation of Service:** A person shall not serve consecutively as a member of the Review Board for more than two years.

Sec. 2, **Quorum:** A majority of the membership of the Television Code Review Board shall constitute a quorum for all purposes unless herein otherwise provided.

Sec. 3, **Authority and Responsibilities:** The Television Code Review Board is authorized and directed:

(1) To maintain a continuing review of all television programming, especially that of subscribers to the television code of the NARTB; (2) to receive, screen and clear complaints concerning television programming; (3) to define and interpret words and phrases in the Television Code; (4) to develop and maintain appropriate liaison with governmental agencies and with responsible and accountable organizations and institutions; (5) to inform, expeditiously and properly, a subscriber to the Television Code of complaints or commendations, as well as to advise all subscribers concerning the attitude and desires programwise of accountable organizations and institutions, and of the American public in general; (6) to review and monitor, if necessary, any certain series of programs, daily programming, or any other program presentations of a subscriber, as well as to request recordings, aural or kinescope, or script and copy, with regard to any certain program presented by a subscriber; (7) to reach conclusions, and to make recommendations or prefer charges to the Television Board of Directors concerning violations and breaches of the Television Code by a subscriber; (8) to recommend to the Television Board of Directors, amendments to the Television Code.

A. **Delegation of Powers and Responsibilities:** The Television Code Review Board may delegate, from time to time, such of its above-specified responsibilities, as it may deem necessary and desirable, to a Staff Group of the NARTB-TV.

B. **Meetings:** The Television Code Review Board shall meet regularly at least four times a year at a date to be determined by it in the months of January, March, June and September. The chairman of the Review Board may at any time on at least five days' written notice call a special meeting of the Board.

Appendix A

ADDITIONAL PROCEDURES RELATING TO ADMINISTRATION, HEARINGS AND DECISIONS*

THE TELEVISION CODE REVIEW BOARD AUTHORITY AND RESPONSIBILITIES

[Reference: *Television Code, Regulations & Procedures,* V, Sec. 3]

Section 1, **Preferring of Charges—Conditions Precedent:** Prior to the preferring of charges to the Television Board of Directors concerning violation of the Code by a subscriber, the Television Code Review Board (1) shall have appropriately, and in good time, informed and advised such subscriber of any and all complaints and information coming to the attention of the Television Code Review Board and relating to the programming of said subscriber, (2), shall have reported to, and advised, said subscriber by analysis, interpretation, recommendation or otherwise, of the possibility of a violation or breach of the Television Code by the subscriber and (3) shall have served upon the subscriber by Registered Mail a Notice of intent to prefer charges, at least twenty days prior to the filing of any such charges with the Television Board of Directors. During this period the Television Code Review Board may, within its sole discretion, reconsider its proposed action, based upon such written reply as the subscriber may care

* Reference: By-Laws of the National Association of Radio and Television Broadcasters, Article VII, section 2, B (4); Television Code, Regulations and Procedures, III, section 5.

to make, or upon such action as the subscriber may care to take programwise in conformance with the analysis, interpretation, or recommendation of the Television Code Review Board.

A. Notice of Intent: The Notice of Intent shall include a statement of the grounds and reasons for the proposed charges, including appropriate references to the Television Code.

B. Time: In the event that the nature of the program in question is such that time is of the essence, the Television Code Review Board may prefer charges within less than the twenty days above specified, provided that a time certain in which reply may be made is included in its Notice of Intent, and provided that its reasons therefore must be specified in its statement of charges preferred.

Sec. 2, Confidential Status: Hearings shall be closed; and all correspondence between a subscriber and the Television Code Review Board and/or the Television Board of Directors concerning specific programming shall be confidential; provided, however, that the confidential status of these procedures may be waived by a subscriber.

Sec. 3, The Charges: The charges preferred by the Television Code Review Board to the Television Board of Directors shall include the grounds and reasons therefore together with specific reference to the Television Code. The charges shall contain a statement that the conditions precedent, hereinbefore described, have been met.

HEARINGS AND DECISIONS—TELEVISION BOARD OF DIRECTORS

[Reference: *Television Code, Regulations & Procedures,* III, Sec. 4]

The following additional rules and procedures shall obtain in such hearings as may be held pursuant to the *Television Code, Regulations and Procedures,* III, section 4:

Section 1. A subscriber shall be advised in writing by Registered Mail of the charges preferred, which notice shall include a statement of the grounds and reasons for such charges, together with appropriate reference to the *Television Code.*

Sec. 2. A subscriber against whom charges have been preferred, and who has exercised his right to a hearing, shall be entitled to effect presentation of his case personally, by agent, by attorney, or by deposition and interrogatory.

Sec. 3. Upon request by the subscriber-respondent or the Television Code Review Board, the Television Board of Directors, in its discretion, may permit the intervention of one or more other subscribers as parties-in-interest.

Sec. 4. A stenographic transcript record shall be taken and shall be certified by the Chairman of the Television Board of Directors to the office of the Secretary of the National Association of Radio and Television Broadcasters, where it shall be maintained. The transcript shall not be open to inspection unless otherwise provided by the party respondent in the proceeding.

Sec. 5. The Television Code Review Board may, at its discretion, utilize the services of an attorney from the staff of the NARTB for the purpose of effecting its presentation in a hearing matter.

Sec. 6. At hearings, the Television Code Review Board shall open and close.

Sec. 7. The right of cross-examination shall specifically obtain. Where procedure has been by deposition or interrogatory, the use of cross-interrogatories shall satisfy this right.

Sec. 8. The Presiding Officer shall rule upon all interlocutory matters, such as, but not limited to, the admissibility of evidence, the qualifications of witnesses, etc. On all other matters, authority to act shall be vested in a majority of the Television Board unless otherwise provided. (Reference: *Television Code, Regulations and Procedures,* III, section 4).

Sec. 9. Films, kinescopes, records, transcriptions, or other mechanical reproductions of television programs, properly identified, shall be accepted into evidence when relevant.

Sec. 10. Continuance and extension of any proceeding or for the time of filing or performing any act required or allowed to be done within a specific time may be granted upon request, for a good cause shown. The Board or the Presiding Officer may recess or adjourn a hearing for such time as may be deemed necessary, and may change the place thereof.

Sec. 11. The decision of the Television Board of Directors shall contain findings of fact with conclusions, as well as the reasons or bases therefor. Findings of fact shall set out in detail and with particularity all basic evidentiary facts developed on the record (with appropriate citations to the transcript of record or exhibit relied on for each evidentiary fact) supporting the conclusions reached.

Sec. 12. A request for reconsideration or rehearing may be filed by parties to the hearing. Requests for reconsideration or rehearing shall state with particularity in what respect the decision or any matter determined therein is claimed to be unjust, unwarranted, or erroneous, and with respect to any finding of fact shall specify the pages of record relied on. If the existence of any newly discovered evidence is claimed, the request shall be accompanied by a verified statement of the facts together with the facts relied on to show that the party, with due diligence, could not have known or discovered such facts at the time of the hearing. The request for rehearing may seek:

a. Reconsideration
b. Additional oral argument
c. Reopening of the proceedings
d. Amendment of any findings, or
e. Other relief.

Sec. 13. Requests for reconsideration or rehearing shall be filed within ten (10) days after receipt by the respondent of the decision. Opposition thereto may be filed within five (5) days after the filing of the request.

Sec. 14. At the discretion of the Television Board, application of any penalty provided for in the decision may be suspended until the Board makes final disposition of the request for reconsideration or rehearing.

Sec. 15. Any member of the Television Board may disqualify himself, or upon good cause shown by any interested party, may be disqualified by a majority vote of the Television Board.

UP-TO-DATE DIRECTORY OF THE FCC: Our new directory of FCC personnel, sent to all full-service subscribers herewith (Supplement No. 56-C), should help you orient yourself in light of the considerable reorganization the Commission has undergone since our last compilation. Moreover, FCC itself hasn't issued any recent listing.

An important aspect of the directory is the organization and composition of the 3 major bureaus -- Broadcast, Common Carrier, Safety & Special Radio Services. Names, titles, etc. are as supplied by heads of bureaus and offices.

You may notice, incidentally, the relative stability of commissionership tenures -- no changes since Comr. Hennock's appointment in 1948. But rumors persist, some well-founded, some baseless, that changes are imminent. Matter of fact, you hear plenty of emphatic opinions that several commissioners, if not majority, will leave during the 1952 election year.

Appended to FCC directory, we've added listing of Senators and Congressmen, with staffs, of Congressional committees handling radio legislation.

Note: Shortly after New Year's Day, we'll have ready for all subscribers an Index to Contents of 1951 Newsletters; and full-service subscribers will receive our TV Factbook No. 14 and our 1952 AM-FM Directory. Orders for extra copies of Factbook ($2.50) and AM-FM Directory ($7.50) should be placed by subscribers now.

UHF—SILVER LINING OF THE TV FREEZE: There was reason for imposition of the freeze, but no one has found any good in the way it has dragged on -- for more than 3 years. Yet there's one worthwhile byproduct that can't be blinked:

Uhf has risen from little more than theory to a proven art.

Manufacturers have seized upon the hiatus, unwelcome as it has been, and made uhf work. Had it not been for freeze, 400-500 vhf stations in 200-300 markets might have been on air by now -- and uhf would be facing almost insuperable odds. Upshot of uhf's 3-year "break":

(1) RCA-NBC's experimental Bridgeport station has been on air for 2 solid years, rebroadcasting excellent signals (from New York's WNBT) day in and day out with fewer "outages" (breakdowns), if anything, than some vhf stations.

(2) GE has produced prototype klystron-powered transmitter and helical antenna good for full 200-kw ERP proposed by FCC, and others won't be far behind.

(3) Virtually all tuner makers and set builders have designed units with good performance, at reasonable cost -- and are champing at the bit for uhf stations.

(4) FCC has amassed enough uhf propagation and interference information to fashion uhf standards and allocations with which few engineers find serious fault.

Freeze's effect on station economics has also worked to sweeten uhf. With receivers concentrated in relatively few markets, there has been a quick answer to question of whether TV can be profitable. It's hard to believe, but TV losses were a fearsome thing mere 3 years ago. Today, TV station of any kind looks good.

Copyright 1951 by Radio News Bureau

Reason why uhf should succeed is simple, now that most technical bogies have been laid low:

No TV service, or very limited service, will be available to large portion of population if uhf isn't put to work.

A glance at FCC's proposed allocation table (TV Factbook No. 13) confirms that. While table may be changed somewhat in final decision, note that following cities of first 50 markets have no vhf at all: Hartford, Worcester, Youngstown, Bridgeport, Springfield-Holyoke, Allentown-Bethlehem, Wilkes-Barre-Hazleton, Fall River-New Bedford. Then consider the scores of cities where uhf will outnumber vhf. It's 3-to-1, for example, in Montgomery, San Jose, Flint and Austin.

Result is that dam is breaking. Of 466 applications on file, 23 are uhf -- and proportion will increase rapidly. Westinghouse is willing to try uhf in such an "old" vhf town as Philadelphia. Dr. DuMont hankers for uhf in some areas. The multiple owners, such as RCA-NBC, eagerly hope FCC follows through on suggestion 2 or 3 uhf may be added to string of 5 vhf. Even for Denver, largest city without TV and earmarked for 4 vhf & 2 uhf channels, big interests will soon ask for uhf.

Everyone would prefer vhf, sure. It's the bird in the hand. But the stark facts are that:

Only 557 vhf stations in 342 cities are possible on the 12 vhf channels under FCC's proposed plan -- 108 of these already operating in 65 cities. On other hand, literally thousands of uhf may be built on the 70 uhf channels -- everywhere. Final decision will probably squeeze in a few more vhf, but increase will be minor.

TV CONSTRUCTION COSTS—NARTB's TALLY: A comprehensive analysis of TV station costs, one of industry's urgent needs, has finally emerged. It comes from logical source -- NARTB. It was prepared by Neal McNaughten, director of engineering, is based on data and prices of major manufacturers, has been checked and approved by them and by representative TV station operators.

"Television Construction Costs, December, 1951" is title of booklet which goes to printer about first of year, to be distributed to NARTB members.

Study is no complete substitute for individual station analyses; NARTB doesn't pretend that it is, but the basic costs are there. Full attention is called to many variables -- legal & engineering fees (including hearings), cost of land, construction of new buildings and towers or alteration of old, different tower requirements due to climate, terrain, etc. And NARTB says that certain figures are subject to slight revision, based on data to come.

Dollar figures cover both minimum and maximum powers contemplated by FCC. Where building construction is involved, NARTB warns: "Based upon $1 to $1.50 per cubic ft., it is obvious that this study doesn't contemplate a plush nickel-plated layout." Here are the figures for vhf:

* * * *

(1) In cities under 50,000 (1-kw ERP, 300-ft., minimum): (a) $135,000 for station with no studios, programmed by network and/or film originations; (b) $159.-000 if building or alterations needed; (c) $219,000 if studio with dual-camera chain added. If 300-ft. self-supporting tower is used instead of guyed structure, add $12,500 to foregoing estimates.

(2) In cities 50,000-250,000 (2 kw, 500 ft.), figures for same 3 groups as above are: (a) $184,750, (b) $211,750, (c) $274,000.

(3) In cities 250,000-1,000,000 (10 kw, 500 ft.), the estimated costs are: (a) $200,000, (b) $237,500, (c) $299,750. If remote pickup truck (without its own camera) is added, total is $332,250.

(4) In cities over 1,000,000 (50 kw, 500 ft.), figures are: (a) $244,500, (b) $292,000, (c) $356,250. If complete remote truck (with camera) is included, the figure would be $438,250.

In last 3 groups, if 500-ft. self-supporting tower is employed in lieu of guyed, add $38,500 to each figure.

But few applicants want minimum powers. In fact, McNaughten is now analyzing recent applications from our summaries in weekly (blue) addenda to TV Factbook

No. 13, finds most requesting powers nearer maximum. Therefore, for "the works" in station power, cost is $593,500 for 100 kw (Channels 2-6) and $587,500 for 200 kw (Channels 7-13) -- including remote truck, double-hop microwave, other refinements.

* * * *

Uhf costs "are not altogether reliable at this time," report says, pointing out that all manufacturers' plans aren't yet final. However, following figures are adduced for situations paralleling the 4 vhf categories above -- in powers, in heights and in programming facilities:

(1) Cities under 50,000 -- $136,500, $160,500, $220,500. If 300-ft. guyed tower is used, add $15,000; if self-supporting tower, add $27,500.

(2) Cities 50,000-250,000 -- $160,500, $187,500, $249,750.

(3) Cities 250,000-1,000,000 -- $176,000, $213,500, $308,250. Last figure includes remote truck without camera.

(4) Cities over 1,000,000 -- $251,000, $298,500, $439,750. Last figure includes truck with camera.

In last 3 groups, add $31,500 for 500-ft. guyed tower or $70,000 for self-supporting structure.

No estimate for 200-kw uhf operation is given, since equipment and prices haven't yet shaken down in final form.

* * * *

Foregoing figures comprise nub of study. In addition, there are detailed breakdowns of component parts of a station, illustrations of various transmitter-antenna combinations for achieving same ERP, maps of network facilities, table of transmission-line losses, graph of tower costs, graph of receiver production, etc.

With NPA in mind, McNaughten lists copper and steel requirements for transmission lines and towers of various sizes.

To derive average equipment prices, McNaughten took "packages" offered by various manufacturers, broke them down, added them up again -- since each has its own way of pricing and "lumping" equipment.

Probably most important thing to remember in using the NARTB study is fact few people are thinking in terms of minimum power. Very few are asking for as little as 1, 2 or even 10 kw in ERP.

* * * *

Outlook for station equipment at freeze's end isn't bad (Vol. 7:11,16,34). But NPA desires more exact picture, has called transmitter manufacturers to Dec. 19 conference in Washington. NPA Electronics Div. chief Edmund T. Morris will supply estimate of 1952 materials availability, get industry reports on equipment on hand, productive capacity, labor supply, defense contracts.

WILL THEY LOOK-&-LISTEN, 7-9 a.m.? Not so many months ago, there were doubts whether daytime TV could be put over -- yet afternoon time sells nicely on most stations now, and even some (late) morning time.

Still, there's many a skeptical eye on NBC-TV v.p. Pat Weaver's latest and most ambitious network telecasting project -- Mon.-thru-Fri. 7-to-9 a.m. show titled "Today" that starts Jan. 14 and promises all-things-to-all: live & film news, including pickups from world capitals, even facsimiles of front pages of same morning's newspapers around country flashed on screen; up-to-minute theatrical & book reviews, with interviews with principals; and of course plenty of hit recordings, with stars as guests.

It's a super-news-plus-disc-jockey show designed "to change the listening habits of the nation." Or as the ebullient Mr. Weaver envisions its larger aspects: "We want the public to be well-informed, to be amused, to be lightened in spirit and in heart, and to be reinforced in inner resolution through knowledge. 'Today' will do this by weaving a pattern of sound & picture that can be utilized by the majority of the American people."

Background of show, which Dave Garroway should be able to m.c. neatly out of his wealth of background as a radio newscaster and disc jockey, let alone his TV

experience, will be 2 large clocks showing EST & CST at all times to viewers on the 36 or more TV stations NBC-TV hopes to line up for its "noble experiment".

Most TV stations don't sign on as early as 7 a.m., few even at 9 a.m., so part of NBC's chore is to sell them on idea -- to say nothing of prodigious task of selling sponsors. If there's full lineup of stations, cost runs about $7000 per 15-minute segment, including flat $650 talent charge; 10-minute segments will also be sold, with 5 minutes every half hour left for local sponsorship.

Not being publicized, but obvious aim, is effort to wean away portion of radio's big early-morning news-disc jockey-spot announcement audience -- via simple device of programming "Today" so that it's listenable without necessity of rising out of bed or abandoning shaving mirror or kitchen stove to look at the TV set. But Garroway may be expected every once in a while, for sake of his sponsors at least, to adjure his audience to "come have a look at this".

Telecasting Notes: Network rate raises are known to be contemplated, but *Advertising Age* is first to report "probability" that WCBS-TV, New York, will boost base hourly rate from $4000 to between $4500 & $4700. Reference is to network rate; local rate of WCBS-TV went to $3750 last Sept. 1 from $3250 last Jan. 1, from $2500 as of Sept. 1, 1950 . . . Decision on NBC-TV network rate rise is expected momentarily, covering 52 interconnected stations, to be justified by nearly 2,000,000 added sets-in-use since last increase of July 1. NBC Research's count then was 13,088,600 (Vol. 7:28); as of Nov. 1, it was 14,555,800 (Vol. 7:46); as of Jan. 1, it's certain to go well over 15,000,000 . . . Whichever increases rates first, CBS & NBC New York key station rates expected to be identical . . . On the AM front, NBC apparently is determined to go ahead with its "basic economic study" plan, whereby radio affiliate rates are reappraised—each to be told its status after Jan. 1, effective July 1. This in face of 72-22 vote against new rate formula at recent Boca Raton convention . . . CBS-Radio has promulgated new "selective facilities plan," effective Jan. 1, 1952, whereby advertiser is offered any combination of affiliates for 15 min. or longer on 13-week cycles, provided (a) advertiser's program is made available to entire CBS radio network, and (b) show can be sponsored by another non-competitive advertiser on "unused" stations without payment to original sponsor . . . "Must reading" for TV-radio commercial staffs: 64-p. "Special Broadcasting Section" of Dec. 10 *Advertising Age*—chockful of excellent reference data on TV and radio, success stories, news, etc. . . . Dean Martin & Jerry Lewis reported to have enjoyed NBC-TV audience of 28,960,000 Nov. 4, whereas their average film plays to around 20,000,000; American Research Bureau says their audience is largest for any regularly scheduled program, giving Milton Berle higher rating but fewer viewers-per-set . . . With Radio Televisao Paulista, Sao Paulo, Brazil, now testing 10-midnight daily, planning formal inauguration Dec. 24, still another Brazilian TV project is reported under way by firm called Radio Record, said to have contracted with GE for equipment, including 24 cameras . . . CBS-TV leases for one year, with options, Hollywood's Earl Carroll's Theater which features 2 revolving stages . . . West Point chapel recipient of donation of organ from NBC . . . Bob Trout, lately with NBC, rejoins CBS Jan. 1 under long-term contract . . . Norsk Swedish Co., Stockholm, has formed Scandinavian-American TV, to market for TV sponsorship (reported price $200,000) exclusive movies of Winter Olympics in Oslo, Feb. 14-25, with hint that Scandinavian Airlines might be willing to go along as co-sponsor.

Katz Agency, TV-radio station reps, has published 1952 edition of its now-standard *Calendar of Expiration Dates*, showing at glance the expiration date of any 13, 26, 39 or 52-week schedule. It's available on request; address 488 Madison Ave., N. Y.

Personal Notes: William S. Paley, CBS chairman, won't be able to wind up duties as chairman of President's Materials Policy Commission before early spring, when report on survey of nation's raw materials resources should be ready; now dividing his time between Washington and New York, he returns then to CBS fulltime, bringing back with him William Ackerman, on leave from CBS to be Commission secretary . . . Joseph A. McDonald, ex-ABC v.p., new treasurer of NBC, reporting to Joseph V. Heffernan, financial v.p. . . . Wm. H. Fineshriber Jr., program v.p., promoted to Mutual executive v.p. . . . William A. Wood, State Dept. chief of Radio, TV & Visual Media, appointed director of CBS-TV news & public affairs, Washington . . . James I. Meyerson, ex-KOME, Tulsa, new mgr. of KOB & KOB-TV, Albuquerque, succeeding Phil Hoffman, now with KECA-TV, Hollywood . . . George R. Dunham, Eastern sales mgr., CBS-TV spot sales, named gen. sales mgr., WCBS-TV, New York . . . J. R. McKenna leaves staff of Millard Garrison, Washington consulting engineer, to join Motorola's research labs in Phoenix, headed by Joseph Chambers, onetime partner of Garrison's . . . Garo Ray, consulting engineer, has sold his stockholdings in WNHC-TV, New Haven, taken on added business called Cine-Video Productions Inc., Hilltop Drive, Stratford, Conn., producing TV and industrial films . . . Robert Alter, Federal, supervising installation and tests of 5-kw transmitter of new Radio Televisao Paulista, Sao Paulo, Brazil (Vol. 7:42, 48) . . . Robert J. Winburn, ex-Dow, Lohnes & Albertson, has opened own law offices in Kass Bldg., Washington . . . Charles Dilcher promoted to Chicago mgr., John Blair & Co.; Harry B. Simmons, ex-Raymer, named head of Detroit office . . . Max Lerner, ex-Legal Aid Society, joins TV division of ABC legal dept. under acting gen. attorney Geraldine B. Zorbaugh; James A. Stabile, ex-William Morris Agency, also joins legal staff . . . H. W. Risser, head of NBC Chicago scenic construction, named mgr. of TV staging services, succeeding Norman Grant, transferred to New York as art director . . . Leonore Silvian, ex-ABC magazine editor, named TV-radio editor of *Look Magazine* . . . Norman G. Gort named TV-radio director on Chesterfield account, Cunningham & Walsh . . . Karl Schullinger promoted to mgr. of TV-radio production, Young & Rubicam, under Nat Wolff; Elizabeth Hart named casting director . . .Edward E. Benham promoted to chief engineer, KTTV, Los Angeles.

Newly named U.S. Senator Fred A. Seaton, 42, appointed to succeed late GOP floor leader Senator Wherry of Nebraska, is third Senator owning radio stations. He's publisher of *Hastings* (Neb.) *Daily Tribune*, operating local KHAS, and with his family also owns KGGF, Coffeyville, Kan.; KMAN, Manhattan, Kan., and various other Midwest newspaper and printing enterprises. Other station owners are Senators Kerr (D-Okla.) and Lyndon Johnson (D-Tex.).

NEW TYPE OF TV BOOSTER station was injected into all the recent talk of satellites, boosters, community antennas, etc.—lately given impetus by Comr. Sterling's speech (Vol. 7:44, 48)—in form of application from WSM-TV, Nashville. Experimental proposal is likely to command sharp Commission attention, though fruition may take years.

WSM-TV asks permission to test concept of John H. (Jack) DeWitt Jr., noted engineer now president of station, who would supervise experiments. He proposes that 5-watt receiving-transmitting station be set up in Lawrenceburg, Tenn., 67 miles from WSM-TV, to rebroadcast WSM-TV's full program schedule on same frequency as main station—Channel 4 (66-72 mc).

Key to operation is fact booster's signals would be vertically polarized, thus minimizing interference with WSM-TV's horizontally polarized emissions. Aim of tests is to determine whether main station's signal maintains polarity at great distances. DeWitt says he's encouraged by measurements to date.

Booster would radiate 10-20 watts ERP, directionally, and cover some 7000 people within 3 miles of site. Nearest co-channel TV stations are in Birmingham, 122 miles, and Memphis, 153 miles. Satellite equipment costs $5288; operation would be unattended.

Whole purpose, says DeWitt, is to "provide more efficient channel utilization." He points out that allocation studies by Bureau of Standards' Kenneth Norton and FCC's Harry Fine show that TV stations can give interference-free service to maximum of only 12% of given area, under optimum power-height-separation conditions.

DeWitt has discussed proposal with Commission people who are intrigued with idea. They concede that if such boosters can raise channel efficiency significantly, FCC must authorize them. But they point to "terrific administrative problems" such as: "Who will own and operate boosters?" Reason FCC is obligated to encourage experiment is that booster would use no new spectrum.

"DeWitt is way ahead of his time," said one Commission official. "He's that kind of a guy."

BLASTING NCAA grid TV "experiment" as unnecessary and dangerous, RTMA sports committee urged colleges to study TV's value in promoting attendance and building goodwill. Analysis by N. W. Ayer v.p. C. L. Jordan, mailed by RTMA this week to college presidents, quotes NCAA's own research as showing "1950 gate receipts for colleges in TV areas were 3.9% above the so-called pre-TV years of 1947-48." Report said attendance at U of Pennsylvania games dropped 17.7%, or average of 8165 per game, from 1950 to 1951—despite fact that Penn televised its games last year and participated in NCAA's control plan this year.

Jordan's analysis said controlled TV destroys freedom of individual schools to televise their own schedules in their home towns, favors big schools at expense of smaller ones, courts bad public relations, "probable court action."

Eastern College Athletic Assn., biggest regional group in NCAA, voted Dec. 14 in favor of continuing controlled TV, after tabling Penn proposal to permit unrestricted live televising by member colleges. Resolution, adopted by big voice vote, prohibits any one of ECAA's 91 member schools from entering into any TV contract pending action by NCAA at Cincinnati next month. Big Ten and Pacific Coast Conferences were expected to follow suit, but whole issue of controlled TV may be academic if Govt. wins anti-trust case against National Football League (Vol. 7:41).

West Coast schools released report saying attendance at games increased 13.6% over 1950 in controlled TV areas, but conceded that rise of Stanford and UCLA as grid powers in TV areas had more effect than TV restrictions.

Station Accounts: AT&T Long Lines Dept. sponsoring *Spirit of Christmas*, half-hour film relating "The Nativity" and "Night Before Christmas," with Mabel Beaton Marionettes, on 80 TV stations in 66 cities, thru Cunningham & Walsh, N. Y. . . . Universal Pictures, announcing expanded budget for "greatest promotional effort" in its history, includes "use of TV for point-of-sale showmanship" . . . Best Foods to sponsor 5-min. film series titled *The Private Lives of Cliff Norton*, starring comic on old Dave Garroway show; feature will continue for Procter & Gamble on WBKB, Chicago, but about 30 other markets are planned for Best Foods thru Benton & Bowles . . . Yellow Cab Co., Philadelphia, sponsoring weekly afternoon variety show titled *Yellow Cab Time* on WFIL-TV, thru Al Paul Lefton Co. . . . Block Drug Co. (Ammident tooth paste) sponsoring *Dick Tracy* on WABD, N. Y., Fri. 7:30-8, thru Cecil & Presbrey, N. Y. . . . Knudsen Creamery Co. of California buys *The Weather*, daily 6:55-7 p.m. forecasts, on KTTV, Los Angeles, thru Heintz & Co., Los Angeles . . . Winston Stores (TVs-radios-appliances) sponsoring *Calling All Women*, audience-participation quiz, Mon.-Wed.-Fri. 2-2:30 p.m. on WPIX, New York . . . Southern Biscuit Co. (cookies & crackers) sponsoring *Cartoon Party*, drawings and stories by artist Pauline Comonar, Sat. 11-11:15 a.m. on WPTZ, Philadelphia, starting Jan. 5 thru Lindsey & Co., Richmond, Va. . . . Among other advertisers reported using or preparing to use TV: M. Hohner Inc. (harmonicas), thru Bobley Co. Inc., N. Y.; Chambers & Robinson (Texas Tavern canned Mexican dinners), thru Ley & Livingston, San Francisco; Lindsay Ripe Olive Co., thru Mogge-Privett Inc., Los Angeles; Marlon Confections Co. (Teens & TV candies), thru Scheck Adv. Agency, Newark (WABD); Cone Export & Commission Co. (cotton textiles), thru Robert Winternitz Adv., N. Y.; Keebler Weil Baking Co., Div. of United Biscuit Co. of America (Town House cookies), thru McKee & Albright Inc., Philadelphia.

Network Accounts: Heavy run of cigarette advertising on TV is pointed up in third quarterly *Rorabaugh TV Report* showing 20 brands using the medium—7 sponsoring 10 shows on CBS-TV, 5 sponsoring 6 on NBC-TV, two 2 on DuMont, one 1 on ABC-TV. In all, 11 of the 20 used network, 4 exclusively; 7 used both network and spot; one used 4 network shows, 2 used 3 each, 2 used 2 each, 6 used one. Spot users: Camel, Cavalier, Chesterfield, Encore, Kool, Lord, Lucky Strike, Marlboro, Old Gold, Pall Mall, Parliament, Raleigh, Sano, Spud, Viceroy . . . Camel starts *Pantomime Quiz* Jan. 2 on NBC-TV, Wed. 10:30-11, thru Wm. Esty Co., N. Y. . . . U. S. Steel, using TV for first time, joins list of Christmas day one-shot sponsors with Sir Ralph Richardson in *A Christmas Carol* on NBC-TV, Tue. 9-9:30, thru BBDO, N. Y. . . . Pontiac reported readying sponsorship of 10:45-11 portion of *Original Amateur Hour* being vacated by Old Gold on NBC-TV, Tue. 10-11 . . . Arthur Murray Inc. (dancing) moves *Arthur Murray Party* Jan. 6 from alt. Wed. to weekly on ABC-TV, Sun. 9-9:30 . . . Gruen starts *Gruen Playhouse* Jan. 17 on DuMont, alt. Thu., 9-9:30 . . . M & M Ltd. (candy), Jan. 6 starts *M & M Candy Carnival* on CBS-TV, Sun. 12:30-1 p.m., originating from WCAU-TV, Philadelphia, thru Wm. Esty Co., N. Y.

U. S. Supreme Court ruled 7-0 this week that *Lorain* (O.) *Journal* violated anti-trust laws in "forcing advertisers to boycott a competing radio station." Only newspaper in town, it refused to accept ads from merchants who advertised on WEOL, and Dept. of Justice brought action. Govt. has similar action pending against *Mansfield* (O.) *News-Journal*, same ownership, in Cleveland Federal court. FCC has denied applications from both newspapers for radio stations.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
December 15, 1951

APPARENT TRENDS IN PRICES AND TUBES: Increased prices of TV sets are betokened by fact bellwether RCA has notified distributors of approximate 5% hike in list on its four 21-in. models, effective with Dec. 24 deliveries. Tax and 90-day warranty are included. Increase was forced by higher manufacturing costs, it was stated.

Coming just before new models are shown by RCA and others at January furniture marts in Chicago, action would seem to presage higher-scaled prices on all new sets -- though there's still heavy enough wholesale-retail inventory of most present models, brand-name and otherwise, to preclude likelihood of across-board increases.

Though consumer demand has steadied, inventories cut, those shortages of brand merchandise forecast for end of year probably won't materialize -- not until pipelines are further cleared and materials bite really becomes acute. Now they're saying the tough going will come in second quarter 1952.

Market currently is described as "spotty" by several of largest set makers, who admit they're none too happy about sluggishness of demand in a few metropolitan areas. But by and large they say trade is quite healthy.

* * * *

Models upped by RCA: Suffolk (21T176), mahogany & walnut, list increased from $425 to $450, oak from $445 to $470; Donley (21T177), mahogany & walnut, from $450 to $475, oak $470 to $495; Rockingham (21T178), mahogany & walnut, from $475 to $495, no oak; Clarendon (21T179), mahogany, walnut & maple, $495 to $525. All these models came out last August.

Line's five 17-in. consoles are unchanged at $350 to $380, nor were 17-in. metal table at $280 or wood at $300 changed. Only 3 or 4 new models will be shown at January Furniture Mart, no new combinations.

* * * *

Aside from prices, if there's any other trend indicated it's toward speedy acceptance of cylindrical-face picture tube (Vol. 7:46). They're really taking hold, says Dr. Allen B. DuMont, really minimize reflections from room lights. Practically all 17 & 21-in. tubes being shipped by DuMont are this type. Sylvania is also making them, though in limited quantity, and Philco has been trying them out. It's likely to be major item next year. RCA has no cylindricals, is still stressing 21-in.

Increasing demand for 24-in. rounds is also noteworthy, with tube-makers saying more and more set makers are ordering it. But some set people think it's too large, also say its price and that of set must come down to level of 20 & 21-in. to win big merchandise push. Now luxury item, very likely it will come "down to earth" by next summer, appealing to consumers ready to replace old 16, 17 & 21-in. models.

* * * *

There were no RTMA production-inventory statistics this week, due to inability of accountants Haskins & Sells to meet usual deadline.

METALS SUPPLY—WORSE BEFORE BETTER: Further cutbacks in materials for TV-radio and other civilian goods in second quarter on top of first quarter's steep cuts -- and probably an additional slice in third quarter.

That's what's in the cards, said top govt. mobilization aides this week.

Military production will chew up more metal in second quarter than planners anticipated -- and the pinch will last considerably longer than originally planned because of expanded aircraft and atomic programs, as we noted last week (Vol. 7:49).

TV-radio industry will chafe under materials squeeze in first quarter. Its supply of steel will be cut to 50% of base period use (first half 1950), copper wire 40%, aluminum 35% (Vol. 7:46). For comparison, consider these figures:

Maximum of 1,000,000 TV sets can be produced first quarter, govt. experts

think. This compares with some 2,200,000 in first quarter of 1950 and an estimated 1,375,000 in current fourth quarter 1951. You can expect to see output shrink to 900,000 or less in second quarter -- on basis of these newly revealed facts:

Aluminum, originally expected to begin easing in mid-1952, will be tightest in last 3 quarters of 1952. Steel, which was to have passed shortage climax first quarter, will be scarcest during second, with some improvement in third and fourth. No copper relief is in sight. These predictions are from DPA-NPA chief Fleischmann.

New jet-plane program will sharpen the crisis in nickel -- not one of the 3 "controlled materials," but vital to TV-radio-electronics and alloy steel production. A high DPA official says it now appears there'll be hardly enough for the aircraft production program alone. But all mobilization officials, from Charles Wilson down, insist they won't snuff out civilian production, and NPA has assured industry some nickel will be shaken loose for TV-radio tubes and components.

Another thorn in side of "non-essential" production is NPA's new program to expedite production of military components. New policy is to use special directives liberally as form of super-priority to assure that no materials bottlenecks stand in way of military component production. Extra materials shunted to component makers will, in effect, be taken from rations of civilian manufacturers.

Topics & Trends of TV Trade: More and more distributor meetings are being scheduled to coincide with Chicago furniture marts, Jan. 7-18. Besides previously reported Admiral convention in Drake Hotel Jan. 3-5, Philco in Palmer House Jan. 4-5, Westinghouse indicated this week it would hold meetings Jan. 14, CBS-Columbia Jan. 4, DuMont Jan. 5-6 (in its Palmolive Bldg. offices)—and many more are expected to fix dates. All will show at American Furniture Mart; others, notably GE, Crosley, Magnavox, at the Merchandise Mart.

RCA's "3 or 4" new models were shown its field men at Atlantic City meetings this week; it holds no conventions, though does show at Chicago. There's nothing spectacular about them, it was said . . . Philco's convention and Admiral's, they say, will accent white goods . . . DuMont has entire new line of 9 TV models, all 17 & 21-in. but one 17-in. using new cylindrical face tube . . . CBS-Columbia has new line coming up for first showing at Furniture Mart . . . Sylvania holds series of regional meetings, starting with Midwest distributors meeting in Hot Springs, Jan. 4-5 . . . Hoffman Radio plans distributor conference Jan. 2-8 in Huntington Hotel, Pasadena, though San Francisco's Western Merchandise Mart dates are Feb. 4-8.

* * * *

No "roll-down" of TV-radio price ceilings is being considered, say OPS officials, denying current rumors. Even though most TVs are selling well below ceilings, they point out, OPS is pledged not to freeze abnormally "depressed" prices. After manufacturers have been surveyed, TV-radio will get new tailored price regulation (Vol. 7:43) —not expected before February.

October picture-tube sales showed big increase over September, RTMA reports. Total was 455,636 valued at $9,388,382, compared with 294,951 in September; 97% were rectangular 16-in. or larger. First 10 months' total was 3,601,809 valued at $88,241,336, compared with 5,934,391 in same 1950 period.

Phillips of Holland reported entering international record field (other than U. S.), making deal with Columbia Records which is parting company with EMI of England—presaging battle in still 78-dominated foreign countries between Columbia's LPs and RCA's 45s.

Admiral-Norge deal (Vol. 7:48-49) reported off in word received at Norge Chicago distributors convention Dec. 14. No official announcement was forthcoming from either company, however.

Trade Personals: William J. Halligan Jr., radio sales mgr., and Kenneth C. Prince, gen. counsel, elected to board of Hallicrafters . . . A. A. Wilkes, ex-Canadian Federation of Farm Equipment Dealers, succeeds Frank Quartermaine as secretary-mgr. of Canadian Assn. of Radio & Appliance Dealers, Toronto . . . Kent Burton, ex-RCA, named mgr. of manufacturing of new Westinghouse electronic tube div. . . . Warren E. Albright promoted to gen. plant mgr., RCA Victor home instrument dept.; John B. Davidson named mgr. of dept.'s newly created purchasing div. . . . Gus W. Wallin, ex-Motorola, joins Webster-Chicago as engineering v.p. . . . Thomas Brusk, ex-Tele King, named director of distributor sales for Starrett, sales director Herbert Frank and private-label sales mgr. George Smith resigning Jan. 1—Mr. Frank to join Jewel Radio, Mr. Smith Philharmonic Radio . . . John H. Riddell, ex-Admiral, named mgr. of market research dept., Capehart-Farnsworth . . . George J. Beier, ex-Philco Distributors of Chicago, named Scott-Meck merchandising mgr. . . . John L. Lyon, ex-Admiral distributor, Los Angeles, named gen. sales mgr., Kaye-Halbert; Ed Altshuler promoted to marketing director; Spencer Glaspell, ex-Packard-Bell, named gen. mgr., Kaye-Halbert National Service Corp. . . . Jack Gaertner named new sales mgr., Emerson-New Jersey Inc. . . . Fred Gusler, RCA regional communications sales mgr. in Kansas City, shifts to same post in Chicago . . . Rear Admiral T. A. Solberg, USN (ret.) named general consultant to Arma Corp., Brooklyn electronics manufacturer . . . Albert J. Lubin, ex-deputy director of public information, DPA-NPA, named director of public information, Small Defense Plants Administration, under Telford Taylor . . . Bert Rice named mgr. of DuMont's new New York factory distributorship, succeeding Rowland Guildford, transferred to factory sales . . . Ben Loewy, ex-production mgr., Columbia Records, named president of Audiograph Studios Inc., TV filming & sound recording.

Landlord has every right to keep tenants from using roof for TV antennas, according to Dec. 14 decision of Brooklyn Supreme Court Justice Murray Hearn. Ruling nullifies opinion of State Rent Administrator Joseph D. McGoldrick, who had held that use of roof was an "essential service" which landlords were obliged to provide.

FM promotion campaign scheduled by RTMA-NARTB in 3 test areas (Vol. 7:46) will start in North Carolina Jan. 21, continue for month; in Wisconsin Feb. 4; District of Columbia March 1.

Mobilization Notes: Current spot shortages of some receiving tube types aren't direct result of materials shortages, but of tubemakers' scheduling and capacity limitations. So NPA told parts distributors Dec. 10 after survey of wholesalers and tube manufacturers.

Distributors didn't agree on which specific tube types were scarce, but they did concur that shortages were concentrated among various metal and loktal types; also among the "dogs"—rarely used and obsolete types. Manufacturers agree demand for loktal and metal tubes is greater than supply, but they say these shortages are dictated by production scheduling and military orders. They add that while materials haven't been limiting factor in output of these tubes, metal shortages might develop if additional units are put into production of metal and high-nickel-consuming loktal tubes.

While NPA officials feel spot tube shortages are here for the duration, they say they don't see this situation as forerunner of general tube shortage.

National Electronic Distributors Assn. survey shows wire cable is still hard-to-get item, but previously reported shortages of TV antennas and test equipment (Vol. 7:43) appear to be easing. Separate NPA survey found distributors concerned about supply of TV twin-lead wire, panel meters and telephone-type relays.

NPA told distributors new amendment to CMP Reg. 5 (maintenance, repair & operating supplies) will raise limitation on minor capital additions from $750 to $1000 a quarter. New separate MRO quota will be established for installation of equipment, and will permit purchase of installation materials in any quarter up to 10% of quarterly MRO quota or $1000, whichever is greater. In effect, it will allow small users of controlled materials $3000 worth of MRO materials per quarter—$1000 each for actual MRO, minor capital additions and installation. Another new regulation will make it mandatory to use ratings on orders for MRO copper materials.

* * * *

Govt.-aided expansion of electronics industry totaled $152,000,000 as of Nov. 1, on basis of certificates of necessity issued by DPA and NSRB for rapid tax amortization. This is increase of $17,000,000 over $135,000,000 authorized as of July 31 (Vol. 7:36). Some 54% of total, or $82,000,000, was for end equipment facilities (principally fire control equipment, guided missiles, VT fuses), 30% or $46,000,000 for tubes, 14% or $21,000,000 for components (resistors, capacitors, transformers, etc.), 2% or $3,000,000 for miscellaneous parts.

NPA has allotted 4620 tons of structural steel for expansion of electronics-communications productive facilities in first quarter 1952. This is 97.8% of the 4722 tons requested for this purpose. Certificates of necessity approved by DPA Nov. 17-23 for expanded electronic and related production facilities (5-year amortization on 65% of project cost except as noted): P. R. Hoffman Co., Carlisle, Pa., electronics, $227,150; Servomechanisms Inc., Westbury, N. Y., $185,000; Technology Instrument Corp., Acton, Mass., electronics, $150,000; H. G. Machine & Tool Co., Long Island City, N. Y., electronic equipment, $6446 (80%).

* * * *

Supply of copper for wire and brass mills should improve slightly in first quarter 1952, NPA told wire & cable industry Dec. 11—yet civilian industries will receive far less copper because military demands are steadily increasing (Vol. 7:43-44, 46). During fourth quarter 1951, wire mills were allotted 167,700 tons of copper, brass mills 151,760. NPA estimates these will be the allotments for 1952: Wire mills—first quarter 180,000 tons, second 173,000, third 179,000, fourth 179,000. Brass mills—first quarter 165,000, second 163,000, third 166,000, fourth 166,000.

Satisfaction with way defense electronics work is being spread among smaller concerns was expressed by A. D. Plamondon, Indiana Steel Products Co., and Glen McDaniel, RTMA president, following 10-day tour in an Air Force plane as chairman and secretary, respectively, of Air Force's committee on small business. They returned to Washington Dec. 11 with other committee members: Louis Ruthenberg, chairman, Servel Inc.; Howard Williams, v.p., Washington Mills Abrasives Co. and president of the Small Business Assn.; Kennard Weddell, chief of Air Force Office of Small Business. They were accompanied by Lt. Col. Goodman Griffin, executive officer of Undersecretary R. L. Gilpatrick, visiting plants of Bendix Radio, Hughes Aircraft, Boeing-Wichita, Lockheed, North American Aviation, Douglas, Weber Aircraft, Consolidated Vultee, Texas Engineering. Tour resumes in January with visits to Republic and Wright plants, after which committee will render report.

Selenium was placed under allocation by NPA Dec. 10. New order M-91 specifies that everyone using more than a pound a month must apply to Govt. for monthly allotment. Order also limits inventories to normal 30-day supply and specifies that use of selenium be held to "practical minimum." Selenium's principal electronic use is in rectifiers. Used in voltage-doubler circuits, selenium rectifiers eliminate need for power transformers in TV sets and are used by many TV manufacturers.

Manufacturers who have difficulty placing authorized controlled materials orders with producers of steel, copper or aluminum will be aided under new procedure of NPA Metals & Minerals Bureau. Application for assistance should be made on new NPA Form 148, available at Commerce Dept. field offices.

Golden anniversary of first transatlantic radio reception was observed Dec. 12. The 25-year-old Guglielmo Marconi had set up a 25-kw transmitter in Poldhu, Cornwall, sailed for St. Johns, Newfoundland, 2000 mi. away, where he picked up "S" in Morse code, and marked "Sigs. at 12:30" in his diary. Transmitter was over 100 times as powerful as any previously built, constructed under eye of Prof. J. A. Fleming. First transmitting antenna array erected, twenty 200-ft. masts, was destroyed by gale a few days after completion. Fan-shaped array suspended between two 150-ft. masts was final setup. First receiving antenna was supported by balloon which blew away; second was kite which was also carried away. Another kite held.

Zenith's $50,000 went "down the drain," if company paid that fee to get films for Phonevision tests (Vol. 7:49). So testified Attorney General McGrath this week, explaining to House Ways and Means subcommittee investigating tax frauds that Justice Dept. had prodded film producers, by anti-trust hint, into giving Zenith the films—without any urging from James P. Finnegan, who got the fee. Finnegan is former St. Louis Collector of Internal Revenue under indictment for bribery. What effect to-do will have on Skiatron's efforts to get films for similar tests of its Subscriber-Vision system of subscription TV, is anyone's guess. *Variety* says survey of major producers shows they believe Justice Dept. won't bother them any more.

President Truman this week signed order (No. 10312) delegating to FCC authority to control electromagnetic radiations under new amendment to Communications Act (Vol. 7:38, 41). Order safeguards stations by prohibiting FCC from: (1) Controlling program content. (2) Taking over or using stations or removing their equipment. (3) Acting without concurrence of Defense Secretary and NSRB chairman. Order also provides that stations be restored to normal operations as soon as possible after interruption for security purposes.

Financial & Trade Notes: Industrial profits receded for the third successive quarter this year, in contrast to last year's consistently upward climb, reports *New York Times*. Even with improved fourth-quarter results, *Times* says earnings for all 1951 will shrink further when final tally of taxes is made.

Combined net income of 510 companies in 60 different manufacturing divisions are totaled as $4,357,650,379 after taxes for first 3 quarters, down 10% from the $4,839,550,379 for same 1950 period. Radio-TV-records are listed as one of the divisions, 9 companies reporting $46,212,000 profits, down 43% from $81,437,000 for same 9 months of 1950. Eight electrical supplies & equipment companies reported $139,781,000, down 18% from $170,686,000. Nine home appliance & machine firms reported $19,010,000, down 37% from $30,029,000.

Taxes were principal pinch in profit picture, absorbing average of 62% operating income (compared with 44% year ago), and "will continue as a major obstacle in recording better returns." Curtailed earnings were also affected by rising operating costs, lower profit margins, material shortages and smaller inventory profits than in 1950. Large inventories were another contributing factor, reflecting consumer indifference to buying.

* * * *

Although Allen B. DuMont Laboratories Inc. showed net loss of $319,547 for 40 weeks ended Oct. 7 (Vol. 7:46), it will earn profit of about $500,000 for full year, said president Allen B. DuMont to Assn. of Customers Brokers Dec. 12. In 1950, net profits were $6,900,788—this year's drop being attributed to TV inventory losses and shift to defense work. Firm has $68,000,000 in defense contracts on the books, Dr. DuMont said, with real peak in defense work expected in spring of 1952. He estimated this year's volume at about $52,000,000, as against $76,000,000 last year; next year the volume should go to $100,000,000 to $125,000,000, of which about $47,000,000 will be commercial sales (TVs, transmitters, tubes, etc.).

FCC's new-station freeze was called major deterrent to TV industry profits, but Dr. DuMont said he expects ban to be lifted by February or March. His company owns 3 stations (in New York, Washington, Pittsburgh), has applications pending for Cincinnati and Cleveland. He revealed that the 3 stations are carried on DuMont books at $1,500,000 and that offers for them totaling $16,000,000 have been turned down.

* * * *

Hazeltine, formed in 1924 as research and patent-holding firm, now a major factor in electronics development and production, will top its 1950 net profit of $1,428,431 ($4.08 a share) despite bigger tax bite, said president Jack Binns to *Wall Street Journal* Dec. 13. Company doesn't issue quarterly reports. Most of its output now is for Govt., including $6,000,000 electronic weather control system for Civil Aeronautics Administration. Because of large capital requirements, Mr. Binns indicated dividend isn't likely to be increased; it has been 25¢ first 3 quarters, $1 at year-end.

Bound and Indexed

We're planning to index and bind, between embossed book covers, in limited quantity, all 1951 issues of the *Television Digest* Newsletters plus the year's Supplements and TV Factbooks. This volume of 52 Newsletters, Supplements, Factbooks and Index will provide a handy and handsome permanent reference. Orders will be taken only until Jan. 5. Price, $25 per volume.

BRITISH FILM MAKERS are invading U. S. films-for-TV market with 30-minute features made especially for American home screens, writes correspondent Mitchell Gordon in London dispatch to *Wall Street Journal* Dec. 10. British product is now being tested on East Coast stations, and producers are "rushing plans for more than a score of half-hour celluloid mysteries and musicals tailored especially for U. S. TV entertainment," says Gordon. He adds British films can be priced at least 25% below Hollywood product because of lower labor and production costs. Currently, series of 3 mysteries, *The Eyes*, from Film Producers Guild Ltd., is making rounds of Eastern U. S. stations; Craft Films Ltd. plans release soon of new film based on ballet *Giselle;* coming from G.H.W. Productions is Biblical film, to be timed for Christmas season.

Next fall, says Gordon, at least 26 British-made films will be available to American TV stations. Included will be 13 Scotland Yard movies by Monarch Studios Ltd. They'll be shown first as shorts in U. S. theatres next summer, then released to TV. Grand National Pictures Ltd. plans mystery series for fall. These additional British studios are listed as entering or planning to enter TV film production: Renown Pictures Corp., Exclusive Films Ltd., Associated British Picture Corp.

———■———

Combined theatre-TV interests oppose proposal to classify theatre TV as an "industrial radio service" and assign it to present industrial frequencies on shared basis with other industries—but they're asking FCC to include issue in theatre-TV hearings, scheduled to begin Feb. 25. Petition, due to be filed next week by Motion Picture Assn. of America, Theatre Owners of America and National Exhibitors Theatre-TV Committee, is considerably less enthusiastic about idea than one filed Sept. 11 by 20th Century-Fox (Vol. 7:36). "Theatre TV," says petition, "can best serve the public interest if, and only if, it is granted an assignment of exclusive frequencies." Any allocation of shared frequencies to theatre-TV industry "would be, at most, a decision of expediency," say petitioners, explaining that as theatre-TV service expanded new problems would "arise each day and multiply as time goes by."

Not much hope for private TV stations in Canada soon was held out by chairman of Canadian Broadcasting Corp., A. D. Dunton, testifying this week before House of Commissions committee. CBC won't authorize any, he said, until CBC itself is ready to offer "national service," and its own first 2 stations—in Toronto and Montreal—won't be ready until "summer of 1952." Plan is to link them with U. S. networks via Buffalo, then build in Ottawa, Quebec, Winnipeg, Vancouver. Cost of each station is estimated at $1,000,000. Meanwhile, private TV applicants are still chafing to get going but apparently hopelessly caught up in the bureaucratic web. At least 9 bids are known to be in "secret" CBC files (Vol. 7:35).

Mexico's "Mr. Radio," Emilio Azcarraga, preparing to dedicate his $3,000,000 new "Televicentro" late this month, and TV-radio rival Romulo O'Farrill, are subjects of article titled "TV in Mexico" in Dec. 17 *Newsweek*. Country's biggest movie theatre owner, Azcarraga is putting lots of eggs in TV basket, thinks TV set ownership will rise from present 10,000 to 60,000 by end of 1952. Unworried lest this cut into movie attendance, he's quoted as saying that if it does "we'll put new seats into the theatres—foam-rubber ones—then air conditioning. And if that doesn't do the trick, why, we'll give every customer a lollipop. You watch; they'll come."

Permission to field-test compatible color over its WHAM-TV, Rochester, was requested of FCC this week by Stromberg-Carlson. Already making such tests, using NTSC specifications (Supplement No. 75) are: RCA, DuMont, Hazeltine, Crosley, GE, Philco, Zenith.

LIST of "naughty words" and phrases removed from draft of code at last October's Chicago meeting of NARTB TV members (Vol. 7:42) was designated last week by TV board as an "unprinted" appendix to code (Vol. 7:49), available for guidance of code Review Board members and telecasters. NARTB points out that list is not all-inclusive, but is merely intended as "guide". Most of words were taken from Motion Picture Assn. of America's movie code. Here is full wording of the section deleted from code and now used as guide:

"No approval shall be given to the use of words and phrases including, but not limited to, the following: Alley cat (applied to a woman); bat or broad (applied to a woman); Bronx cheer (the sound); chippie; cocotte; God; Lord; Jesus Christ (unless used reverently); cripes; fanny; fairy (in a vulgar sense); finger (the); fire, cries of; Gawd; goose (in a vulgar sense); 'hold your hat' or 'hats'; hot (applied to a woman); 'in your hat'; madam (relating to prostitution); nance; nerts; nuts (except when meaning crazy); pansy; razzberry (the sound); slut (applied to a woman); S.O.B.; son-of-a-; tart; toilet gags; tom cat (applied to a man); traveling salesman and farmer's daughter jokes; whore; damn; hell (excepting where use of said last 2 words shall be essential and required for portrayal, in proper historical context, of any scene or dialogue based upon historical fact or folklore, or for the presentation in proper literary context of a Biblical, or other religious, quotation, or a quotation from a literary work provided that no such use shall be permitted which is intrinsically objectionable or offends good taste)."

MORE ADVICE on handling applications after freeze was handed FCC this week. Joint Committee on Educational TV disagreed with recommendation of Federal Communications Bar Assn. that all applications, vhf & uhf, be thrown into single hearing in each city where applicants outnumber available channels (Vol. 7:48).

"Adoption of the Bar Assn.'s proposal," JCET stated, "would guarantee as a practical matter that no uhf grants could be made in any city of substantial size until the consolidated competitive hearing was concluded. Since such hearings may well take 2 or more years after the lifting of the 'freeze' and another year or so would be required for construction, the JCET believes that to delay the development of uhf service at the outset may well deliver it a blow from which it may never recover."

JCET also pondered those cities in which educational station may be only TV outlet or only vhf station for some time, came up with suggestion that such stations carry commercial programs until commercial stations' signals penetrate such areas. JCET lists 14 cities where FCC proposes to give educators only available TV channel, 17 more where schools would get only vhf channel in town.

* * * *

Commission this week repeated its "no" to those hearing parties asking oral hearing or argument. It went to considerable legal length in opinion and order (Public Notice 51-1216) giving its reasons to Philadelphia's Daily News TV Co., Philadelphia's WIP, Oakland's KROW, Milwaukee's WFOX. FCC stated that law doesn't require oral presentation; that parties' contentions can be handled adequately by written comments; that "the procedure of written presentations . . . is a recognition that the great public interest in an early nationwide TV service, which is by no means at odds with the numerous private interests represented before us, will not be served by needlessly paralyzing procedural hurdles."

Two more New York-Washington TV network circuits, via Philadelphia and Baltimore, are provided for in application to construct new 9-station microwave relay, at cost of $2,480,000, filed with FCC this week by AT&T.

First instance of 2 rival local radio stations joining to form corporation to apply for one TV outlet came to FCC attention this week, with filing of Channel 6 application by Red River Valley Television Corp., Fargo, N. D. Equal stockholders are KFGO, ABC outlet in Fargo, N. D., and KVOX, MBS affiliate in Moorhead, Minn., just across Red River. WDAY, Fargo NBC outlet, recently applied for Channel 6 also. City also has Channel 13 tentatively assigned, plus 2 uhf. Only other application this week was from KARK, Little Rock, Ark. (NBC), for Channel 4. Application of Grace C. & C. W. Rogers, Carbondale, Ill., seeking uhf channel No. 34 *(TV Addenda 13-U)*, was returned because it failed to stipulate antenna specifications. Total applications pending now number 466, of which 23 are for uhf. [For details about foregoing applications see *TV Addenda 13-V* herewith; for listing of all applicants to date, see *TV Factbook No. 13* with all Addenda to date. Consolidated list of all applications will be published in *TV Factbook No. 14*, due off presses about Jan. 15, 1952.]

Suit to force United Artists to sell certain pictures to TV was brought in Los Angeles Federal Court this week by independent producers James & George Nasser. Test case raises issue whether TV has become "commercial practice" under terms of contract reading that, in event TV became a commercial practice, distributor would sell pictures on TV market or permit producers to do so. Bank of America joined in procedure, having attached assets of Nassers in bankruptcy proceeding in July. Pictures involved are: *Don't Trust Your Husband*, with Fred MacMurray & Madeleine Carroll; *Kiss for Corliss*, Shirley Temple & Wm. Bendix; *Cover Up*, Wm. Bendix; *Without Honor*, Laraine Day & Dana Clark.

TV-radio coverage of major league baseball received another blow this week as N. Y. Giants became third club to turn down game-of-the-day or any similar national radio broadcasts in 1952. Yankees and Pittsburgh Pirates had previously abandoned network broadcasts. Giants will continue home TV coverage over WPIX, home radio broadcasts over WMCA. Trend is expected to continue in other big league cities, with St. Louis Cardinals reported next in line, following minor league chief George M. Trautman's Dec. 5 plea to protect minors (Vol. 7:49). Giant president Horace Stoneham said his club plans to form small subsidiary radio network for territory adjacent to N. Y. area.

Louis G. Caldwell, 60, prominent Washington radio attorney and first general counsel of original Federal Radio Commission, 1928-29, died of a heart ailment Dec. 11 at his home. He was Washington resident partner for 22 years of Kirkland, Fleming, Green, Martin & Ellis, Chicago law firm representing *Chicago Tribune* among many other interests. He was a graduate and trustee of Amherst College, law graduate of Northwestern U, won Croix de Guerre while serving with French Foreign Legion during World War I. Survivors are his mother, daughter, 3 grandchildren, divorced wife. Both FCC and FCC Bar Assn. adopted resolutions paying tribute to Mr. Caldwell's pioneering contributions to radio regulation.

Copies of the TV Code

Each full-service subscriber to *Television Digest*, with our last issue, received one copy of full text of finally-adopted NARTB Code of Practices for Television Broadcasters (Supplement No. 76). Extra copies are available to subscribers at $1 each, or 50¢ per copy in quantities of 20 or more.

December 22, 1951

In this Issue:
NPA Tough on First-Quarter Building, *page 1.*
After the TV Freeze—The Deluge, *page 2.*
Forecasting Future Can Be Fatal, *page 2.*
Sets-in Use Go Over 15,000,000 as of Dec. 1, *page 6.*
'Merry Christmas' in Trade Figures, *page 6.*
Topics & Trends and Mobilization Notes, *pages 8-9.*

NPA TOUGH ON FIRST-QUARTER BUILDING: NPA will allot no materials to begin new large-scale TV-radio station construction or alteration projects in first quarter 1952.

Materials will be available only for station projects which are more than 19% completed or which require not more than 25 tons of steel, 2000 lbs. of copper, 1000 lbs. of aluminum during first 3 months of new year.

New policy won't conflict with post-freeze TV station construction, since even if FCC adheres to its schedule, no new grants are expected before mid-1952 at earliest. Best NPA estimates indicate building materials should be somewhat more plentiful in second half of 1952.

In second quarter 1952, new set of criteria will be used to judge broadcast construction applications. TV-radio stations were reclassified as "industrial" projects late in October (Vol. 7:43), too late to change their status for first-quarter allotments. But in second quarter, materials for broadcast stations will be doled out by NPA Industrial Expansion Div., which handles industrial building, rather than Construction Controls Div., which handles commercial construction.

Industrial Expansion Div. allots bigger share of materials than Construction Controls Div., and uses "essentiality" scale as criterion for allotments. It's too early to tell whether broadcasters will fare better or worse under this arrangement.

First quarter's no-new-construction policy applies across-the-board to all civilian construction classified as "commercial". But broadcasters get an advantage over commercial projects even in first quarter, since they're permitted to self-authorize materials orders which don't require more than 25 tons of steel, 2000 lbs. copper, 1000 lbs. aluminum per quarter. Commercial self-authorization limit is 2 tons of steel, 200 lbs. of copper, no aluminum. Under self-authorization procedure, builder may write own priority and allotment tickets without applying to NPA.

So far as TV is concerned, first-quarter policy means postponing or scaling down of big plans by existing stations for enlarged studio space or new towers.

Because of the new self-authorization limits for broadcast stations, more small TV-radio station construction and alteration jobs probably will be undertaken in first quarter than were in fourth, despite NPA's tough policy on applications.

Self-authorization can provide enough materials to build modest new radio stations and take care of most moderate-size alterations.

But the bigger jobs -- those which depend on NPA allotments for materials -- just won't be begun in first quarter, and probably not in second. On list of about two-thirds of its construction actions for first 3 months of 1952, NPA tallied only 3 TV-radio projects as approved, and all these jobs already are well under way.

NPA denied 15 station construction applications, almost all of them on the grounds construction wasn't far enough along. During fourth quarter, 16 TV-radio projects were okayed, 7 denied (Vol. 7:37-40) -- but some were smaller jobs now exempt from filing applications with NPA.

For list of NPA allotments, denials, etc., see article on p. 3.

Copyright 1951 by Radio News Bureau

AFTER THE TV FREEZE—THE DELUGE: You're going to see so many applications filed for new TV stations, once FCC formally thaws the freeze in early 1952, that it's hard to see how any communities of appreciable size (maybe some even as small as 50-75,000) can get grants out of hand -- that is, without going through competitive hearings.

Though 80 grants or so by July 1, in very small markets, were regarded as possibility by FCC's Curtis Plummer (Vol. 7:44), industry generally considers figure much too high. A slight chance of achieving that many lies in separate handling of uhf -- cutting uhf loose from vhf in cities allocated both. FCC gives no inkling of such procedural plans, if it has any.

Short of calling together the plethora of applicants for any one community, suggesting they go into huddle and come up with no more applications than channels available, FCC faces an apparently endless task of holding the required competitive hearings with present paucity of examiners and small staff.

Whether Commission will urge such joining of rival local forces, we simply don't know yet -- but it's logical, and it's one way to circumvent long and costly hearings. And the lawyers say there's ample legal precedent in customary pre-trial conferences, agreements, stipulations, even court decisions.

Whatever FCC, lawyers & engineers do, fact is that right now they're preparing for veritable rush of new applications -- probably number equal to or more than the 470 already on file (for complete list see TV Factbook No. 13 & weekly Addenda to date). Those 470 represent an accumulation of only 170 since freeze was imposed Sept. 30, 1948, when there were some 300 applications pending, exactly 87 CPs outstanding, only 37 stations in operation (Vol. 4:40).

FCC had asked applicants to hold off filing until end of freeze, stressing then -- and repeating since -- that old applications have no priority rights, that it will promulgate "filing period" at end of freeze (60 days seems the accepted figure now) in which new applications may be filed and old ones brought up to date.

Symptoms of forthcoming "wave rush" are already apparent in the increasing number of applications filed in recent weeks (see TV Addenda 13-T, 13-U & 13-V in particular). In compiling a consolidated list of TV Applications Pending for our TV Directory No. 14, due off the presses in January, we find more than 50 new applications were filed since TV Factbook No. 13 of July 15, 1951.

Another factor conducing to forthcoming heavy filings, and probable bitterly fought hearings, is fact fewer and fewer of the 108 existing stations will be up for sale at prices anybody is willing to pay.

Tax situation is such, according to industry attorneys, that profitability of stations, lush as it may appear at moment, simply doesn't justify asking prices. "Suppose a station is netting $1,000,000 before taxes now," asks one lawyer, "what happens in a few years when the pie is sliced by 500 stations instead of 100? Sure, the pie will get bigger, but how much bigger can it get?" His conclusion:

"If I thought I had a fair chance in a hearing, I'd far prefer to get my station that way. Why, I think it's even cheaper to get a uhf and sweat out 4-5 years of losses rather than lay out the kind of dough stations are bringing."

FORECASTING FUTURE CAN BE FATAL: Lucky for the industry that FCC, back in September 1948, didn't also freeze construction of stations for which construction permits had already been issued. Indeed, it actually "pushed" some CP holders into building on pain of losing their CPs. In case of one laggard CP holder, in trouble with FCC on another score, it literally forced him to build-or-quit -- and a common joke around FCC was that this constituted real "punishment" since the radio operator was manifestly loath to embark on so costly and risky an enterprise as TV and really was agreeing to do so primarily because he thought it would please the Commission.

In those days, not much more than 3 years ago, FCC was literally "begging" enterprisers to apply and build, and it was quite an occasion when somebody really got on the air. When freeze was imposed, it was regarded entirely as a temporary technical expedient; no less than the FCC chairman lost 4 consecutive friendly wagers over next year or so about its imminent lifting, and nobody dreamed that the color imbroglio would arise to prolong it by several years.

There were 87 CPs on FCC's books at time of freeze, yet only 71 went ahead -- 16 giving up their CPs for one reason or other, main reason being fear of "losing shirts" in the then very unprofitable business. Only 37 stations were on the air.

Those 16 were particularly unlucky, as things turned out, though most made their own voluntary choices -- simply dropped CPs despite such "glowing" predictions as this one from the then NBC president Niles Trammel at Sun Valley convention of affiliates: "Approximately 11,500,000 TV receivers...by 1953" (Vol. 4:39). And this forecast by parent RCA: that 935,000 TV sets would be made and sold by end of 1948, 1,600,000 more in 1949, 2,400,000 in 1950, 3,200,000 in 1951, 4,000,000 in 1952.

How far short their predictions fell is now history; actually, by end of 1948 there were well over 1,000,000 TVs in use; by end of 1949, well over 3,500,000; end of 1950, about 11,000,000; end of 1951, more than 15,000,000.

* * * *

Who were the hapless 16 who wouldn't plunge? It must be said that 4 gave up through force of circumstance: KARO-TV, Riverside, Cal., because FCC eliminated Channel No. 1; WJAX-TV, Jacksonville, city-owned, which got into financing snafu; KRTV, Minneapolis Star & Tribune (Cowles), due to tangle over interlocking stockholders with also-granted WTCN-TV; WRTB, Raytheon Mfg. Co., Waltham, Mass. (Boston), hesitating to proceed with construction, then unable to secure authority to sell.

The dozen others who held the precious franchises, yet feared to venture: E.F. Peffer's KGDM-TV, Stockton, Cal.; Jacksonville Journal's WJHP-TV (Perry Newspapers); WPDQ-TV, Jacksonville; WEEK-TV, Peoria, Ill.; WMBD-TV, Peoria; New Orleans Times-Picayune's WTPS-TV; Maison Blanche's WRTV, New Orleans (operating pioneer AM station WSMB in partnership with Paramount); WAGE-TV, Syracuse (Wm. T. Lane, mgr., now mgr. of Atlanta's WLTV); Portland Oregonian's KTVU -- all radio station operators. And these non-radio operators: WSEE, St. Petersburg, granted to company headed by dept. store tycoon Robert R. Guthrie; WTVL, Utica Observer-Dispatch (Gannett); WUTV, Indianapolis, granted to Wm. Block dept. store.

FIRST-QUARTER MATERIALS were allotted by NPA for these 3 continuing telecasting projects (see story page 1):

(1) CBS's $5,330,000 "Television City" studios on site of Gilmore Stadium in Los Angeles. Project also received allotment in fourth quarter (Vol. 7:40).

(2) WCAU & WCAU-TV studios in Lower Merion Township, Pa. Suburban building, now 60% complete, will cost $2,740,000, was allotted 35 tons of steel, 15,500 lbs. copper for first 3 months of 1952.

(3) DuMont's new $1,750,000 studio building at 205 E. 67th St., New York, 23% completed. It got allotment of 149 tons of steel for first quarter, tentative o.k. for 96 tons in second quarter, 25 tons in third. DuMont request for 10,000 lbs. of copper was denied.

Four applications to remodel existing structures for use as NBC studios in Manhattan and Brooklyn were listed by NPA as exempt—meaning it wasn't necessary to have filed them in first place, since materials needed may be self-authorized.

Three of the applications were submitted by NBC itself, covering alterations to cost $92,000 (TV), $30,000 (radio) and $8500 (TV). Fourth was from Anco Enterprises Inc., which will lease TV studios at 214 W. 42nd St. to NBC after completion of alterations, expected to cost $21,000.

Six other NBC-TV studio remodeling jobs drew denials, on grounds they were new jobs on which construction wasn't sufficiently under way: (1) Colonial Theatre, 62nd St. & Broadway, owned by RKO Theatres, alterations 2% complete as of Oct. 1, to have cost $135,000. (2) Three Radio City studios, to have cost $90,000, $85,000 and $75,000, not started yet. (3) Studios at Avenue M & E. 14th St., Brooklyn, $115,000, no start. (4) Hollywood studios, scheduled to cost $67,000, no start.

ABC, which received fourth-quarter allotment to build $600,000 TV-radio studios at 273 Golden Gate Ave., San Francisco, was turned down for first quarter on same project because there was "no evidence" construction had started.

Other TV turndowns: WNBF-TV, Binghamton, office and TV studios, $300,000, rejected because construction hadn't started; WTMJ-TV, Milwaukee, tower, $307,936, no start; Desert TV Co., Las Vegas TV applicant, station to cost $173,000, no start.

WHUM, Reading, Pa., AM station which received fourth-quarter allocation of 46 tons of steel for experimental uhf tower (Vol. 7:37-38) got turndown on application for first-quarter materials. Its request for experimental uhf grant had been rejected by FCC early this month anyhow (Vol. 7:49).

Radio-station rejections: WHEC, Rochester, $419,023; WBT, Charlotte, addition, $145,515; WFAH, Alliance, O., towers, $50,000; WLFH (CP), Little Falls, N. Y., $11,000.

One community antenna project was approved, another rejected. Telephone Service Co. of Wyoming Valley, Wilkes-Barre, Pa., was granted 7000 lbs. copper for $75,000 project, 90% complete. Application of Mathews Inc., Carlisle Borough, Pa., was rejected although project is 60% finished. NPA said construction was begun last August "without authorization from us."

Community antennas are "receiving stations"—not broadcasting stations—in NPA's book, and thus don't come under the more liberal self-certification procedure which applies to TV-radio stations.

Joseph J. Weed elected president of National Assn. of Radio & TV Station Representatives, succeeding Robert Meeker. Other officers: Eugene Katz, v.p.; Adam J. Young Jr., secy.; William H. Weldon, Blair-TV Inc., treas. Directors are Joseph F. Timlin, Branham Co.; Russell Woodward, Free & Peters; Mr. Meeker.

Network Accounts: Motorola is employing DuMont Network for first showing of its new 1952 line of TV sets, sponsoring 33-station hookup carrying Shrine charity's annual East-West all-star pro football game from San Francisco Sat., Dec. 29, from 4:30 p.m. EST, thru Ruthrauff & Ryan . . . General Tire & Rubber Co. sponsors 4:15-4:30 EST Ted Husing Show on DuMont, just preceding Dec. 29 East-West game, thru D'Arcy Adv., N. Y. . . . Miller Brewing Co. (High Life beer) Dec. 23 is to sponsor Cleveland Browns-Los Angeles Rams national pro football championship from Los Angeles on DuMont, Sun. 4 p.m. EST, thru Mathiesson & Associates, Milwaukee . . . General Foods (Jell-O, Swans Down, Birdseye frozen foods) will sponsor Wed. & Fri. segments of *Bert Parks Show* starting Jan. 14 when it moves from NBC-TV to CBS-TV, Mon.-Wed.-Fri. 3:30-4, thru Young & Rubicam, N. Y. . . . General Foods (Swans Down cake mixes, instant Maxwell House coffee) Jan. 6 begins *Claudia: The Story of a Marriage* on NBC-TV, Sun. 6:30-7, thru Young & Rubicam for Swans Down, Benton & Bowles for Maxwell House . . . R. J. Reynolds Tobacco Co. (Camel cigarettes) Jan. 2 starts *Pantomime Quiz* on NBC-TV, Wed. 10:30-11, thru Wm. Esty Co., N. Y. . . . C. H. Masland & Sons (rugs, carpets) starts alt. week sponsorship Jan. 25 of *Tales of Tomorrow* on ABC-TV, Fri. 9:30-10, thru Anderson & Cairns, N. Y. . . . Hall Brothers (Hallmark greeting cards) Jan. 6 starts *Sarah Churchill Show* on NBC-TV, Sun. 3:30-4, thru Foote, Cone & Belding, Chicago . . . O-Cedar Corp. (waxes, polishes, mops) Jan. 7 starts sponsorship of Mon. 2:15-2:30 segment of *Garry Moore Show* on CBS-TV, Mon.-thru-Fri. 1:30-2:30, thru Young & Rubicam, Chicago . . . Serutan Co. (Serutan, Geritol) Jan. 1 starts *Battle of the Ages* on DuMont, Tue. 9-9:30, thru Franklin Bruck Adv. Co., N. Y. . . . U. S. Rubber Co. buys time vacated by Chesterfield's *Sound Off Time* on NBC-TV, Sun. 7-7:30 for *Abbott & Costello*, starting date unannounced . . . Ronson Art Metal Works (lighters) Jan. 10 moves *Star of the Family* from Sun. 6:30-7 to alt. Thu. 8-8:30 on CBS-TV . . . Colgate-Palmolive-Peet Co. reported sponsoring *Big Payoff*, quiz show, starting Dec. 31 on NBC-TV, Mon.-thru-Fri. 3-3:30 . . . Riggio Tobacco Corp. (Regent cigarettes) Jan. 6 replaces *Leave It to the Girls* with *Cameo Theatre* on NBC-TV, Sun. 10:30-11, thru Brooke, Smith, French & Dorrance, N. Y.

Station Accounts: Split-sponsorship trend already manifest on networks may be extending to stations. Example: Horn & Hardart, New York, to cut costs, drops second half of high-rated *Children's Hour*, Sun. 10:30-11 a.m. on WNBT, and segment is picked up from Jan. 20 by Hoffman Beverage Co. . . . Three sponsors using *Spade Cooley Show* on KTLA, Los Angeles, starting Jan. 5: Chesterfield, first 15 min.; Minute Maid, second; American Home Products, next half hour. It may be relayed also to San Francisco . . . Lo-Calory Food Co. (BDX reducing aid) buys *Mary Kay's* sign-off chatter after midnight on WNBT, thru Roy S. Durstine Inc. . . . Gold Arrow Trading Co., Los Angeles (profit-sharing stamps) to test TV on KNXT, Los Angeles, extend if successful, thru Walter McCreery Inc., Beverly Hills . . . Agua Caliente race track sponsoring *Tom Harmon* sports segment of *CBS-TV News* on KNXT, Los Angeles, Sun.-thru-Fri. 10-10:30 p.m., thru Roche-Eckhoff, L. A. . . . Seven realtors join to sponsor *Homes for Sale*, films being shot each week by station, on WBNS-TV, Columbus, Sun. 4:15-4:30 . . . Adam Scheidt Brewing Co. sponsoring *Exit '51* and *Sports Highlights of '51*, combined for full hour, on both WPTZ & WFIL-TV, Philadelphia, Dec. 28 & 31, thru Ward Wheelock; the INS-Telenews shows also sold to KMTV, WAAM, WNAC-TV, KGO-TV, KTTV for local sponsorships . . . Among other advertisers reported using or preparing to use TV: U. S. Air Conditioning Corp. (window air conditioner), thru Alfred Colle Co., Minneapolis; Carpenter-Morton Co. (household & industrial paints), thru John C. Dowd Inc., Boston; Mason & Mason Inc. (Mason's root beer), thru Irving J. Rosenbloom Adv., Chicago; Campbell Cereal Co. (Malt-O-Meal cereal), thru Campbell-Mithun Inc., Minneapolis (WNBQ); Southern California Gas Co. (natural gas), thru McCann-Erickson, Los Angeles (KNXT); Casco Products Corp. (automotive accessories), thru Norman D. Waters & Associates, N. Y.

Personal Notes: Edward Cooper on Jan. 2 takes over as head of TV Dept. for Motion Picture Assn. of America (Vol. 7:48); he has been staff director of Senate Majority Policy Committee under Sen. McFarland since January, was communications assistant to Senate Interstate & Foreign Commerce Committee since 1939 . . . Sam Cook Digges, CBS-TV Spot Sales Midwest sales mgr., becomes Eastern sales mgr. as of Jan. 1, replacing George R. Dunham Jr., now WCBS-TV gen. sales mgr.; Mac Lean Chandler is promoted to Midwest sales mgr., his staff adding Theodore Shaker, ex-Katz Agency . . . David Sutton, ex-CBS-TV sales chief, joining Music Corp. of America as TV executive . . . Scott Donahue Jr. promoted to TV sales mgr., Morris S. Kellner to AM sales mgr., Margaret Alcott to TV-radio service mgr., Katz Agency, all reporting to v.p. George W. Brett, now holding title of director of radio & TV sales policy . . . Donald G. Buck promoted to regional mgr., ABC-TV stations dept.; Malcolm (Bud) Laing named mgr. of ABC-TV station clearance dept., succeeding Buck . . . Jack Hetherington, ex-Gardner Adv., named mgr. of St. Louis Office, Adams Young rep firm . . . Henry I. Christal to head new radio station rep firm bearing his name, with offices at 300 Park Ave., N. Y.; Chicago office, 333 N. Michigan Ave., will be headed by James Thompson, ex-O. L. Taylor Co. . . . William T. Crago, ex-ABC, named TV-radio director, Leonard Shane Agency, Los Angeles . . . Robert McNell, ex-Biow, now TV-radio director, Earl Bothwell Inc. . . . Angus W. Mackintosh, ex-TV-radio director, Ward Wheelock, named sales director, Mack Goodson-Bill Todman Productions . . . Roger Bowman named TV-radio director, Turner & Dyson, N. Y. . . . George H. Sandifer has resigned as NBC Washington controller to become TV-radio director, U. S. Chamber of Commerce; Arthur Hamilton, NBC accountant in N. Y., is successor.

Republicans have named McIntire Faries, Los Angeles lawyer, as chairman of TV-movies subcommittee, and Ohio Rep. Clarence J. Brown as chairman of press-radio subcommittee for next year's convention. Democrats won't appoint counterparts; jobs will be handled by publicity staff. TV-radio sponsorship of both conventions is considered definite (Vol. 7:46); agreement with networks on "code" for handling telecasts, which awaits "clarification of minor details," is expected in 2-3 weeks. Both parties say "sizable" portion of national budgets will go to TV-radio, to be split about 50-50 between the 2 media. Democrats expect to announce selection of ad agency in January, GOP after convention. Both parties are preparing TV-radio handbooks for candidates.

Eventual harmony between TV and motion pictures is expected by veteran producer Hal Roach Sr. in Dec. 12 *Daily Variety*. He predicts: (1) 75% of film stars will come from TV. (2) Studios will substitute TV films for B productions to develop talent, absorb excess of stars not working. (3) TV will help solve show business unemployment since it requires "5 times as many people" as in movies. Roach, now heavily in TV film production, advises majors to produce 10-min. "teaser" TV films to build up stars.

EIDOPHOR-CBS COLOR theatre-TV proponents appear to have new ally—color-conscious Sen. Edwin Johnson (D-Colo.), chairman of Interstate & Foreign Commerce Committee—in their efforts to persuade NPA to lift ban on manufacture of equipment (Vol. 7:47). At time general color ban was imposed, Johnson said he thought that there was something "phony" but that he didn't intend to do anything about it (Vol. 7:43).

Now he says that he wants more information, that he's "confused" about NPA's action, that "I'm specially interested in the Swiss thing—the Eidophor system; I want to know why production can't go ahead." He doesn't have any immediate plans for investigation or hearings, but says: "I don't know what the committee might want to do. No one has complained to me about this; I'm just keeping my own eyes open." He hasn't conferred with Defense Mobilizer Wilson.

All-industry theatre group (MPAA, TOA, et al) has directed counsel to prepare arguments against ban; lawyers expect to file protest in couple weeks.

Skiatron expects to conduct press-public demonstrations of its "Ultrasonic" theatre-TV gear in few weeks. President Arthur Levey says optical system has just been redesigned by Rochester U's Prof. Brian O'Brien, now gives 5 times previous brightness. System is mechanical, employs carbon arc. Equipment is "easily adaptable to CBS color system," according to Levey, who adds, "We have a method for the compatible system, too." He says company will enter appearance in FCC theatre-TV hearing due to start Feb. 25.

RCA this week announced that more than 50 theatres are now equipped with its PT-100 gear, 34 of these since early fall. This rate of increase, says M. F. Bennett, theatre equipment sales manager, "justifies forecasts made some time ago that theatres capable of seating approximately 200,000 would be equipped by early 1952."

———■———

Skiatron's quest for film fare to test its Subscriber-Vision system of pay-as-you-look TV this week took form of letters to 8 major producers, asking them to indicate, by Jan. 15, which recent pictures they'll supply. Presumably, Skiatron will ask Justice Dept. for help if films aren't forthcoming. Skiatron president Arthur Levey says he hasn't slightest fear Justice Dept. will get cold feet because of recent Zenith-Finnegan disclosure (Vol. 7:49-50). Company's new counsel is James M. Landis, substituting for Telford Taylor. Landis recently took over Gen. Taylor's legal chores for Joint Committee on Educational TV (Vol. 7:47).

Some 200,000 doctors have seen Smith, Kline & French color TV demonstrations (CBS equipment) at 28 medical meetings over last 2½ years, says article in Dec. 15 *Journal of The American Medical Assn.* titled "Color Television as a New Medical Teaching Aid" written by Dr. Kendall A. Elson and G. Frederick Roll. Bright future for medium is forecast.

TV and movies are compatible under certain conditions, according to Dr. Ernest Dichter, psychological consultant to advertisers. In recent study, he concludes that TV viewers often stay home rather than risk going to poor movie; that TV-set owner isn't theatre's "lost audience"—movie industry itself failing to keep pace with TV viewer's change of psychological attitude toward entertainment.

Screen Actors Guild (AFL) announced Dec. 4 it had signed union shop collective-bargaining agreements with these 13 TV film producers: Aladdin, B-M-D, C.G.S, D.N.S, Desilu, Des Moines Enterprises, Fidelity-Vogue, Raymond R. Morgan Co., Primrose, Screen-Televideo, TV Productions, Edmund J. Tingley Productions, Westminster.

Cuba's Goar Mestre, operating Circuito CMQ out of Havana, also CMQ-TV on Channel 6 there, reports satellite station CMJL-TV, Camaguey, already operating on irregular schedule, using Channel 6, DuMont equipment, 2-kw visual ERP, 1-kw aural, antenna 325-ft. above average terrain. Also projected by Mestre interests, as part of TV chain plan, are 3 more outlets: CMKU-TV, Santiago, Channel 2, GE equipment, 16-kw visual, 8-kw aural, antenna 1760-ft. above sea level; CMHQ-TV, Santa Clara, Channel 5, GE equipment, 18-kw visual, 9-kw aural, antenna height 1020-ft. above sea level, 700-ft. above average terrain; and station in Matanzas, call letter unassigned, Channel 9, DuMont equipment, 3-kw visual, 1.5-kw aural, 760-ft. above sea level. Chief engineer Ventura Montes is supervising construction.

Senator Wm. Benton's willingness to sell his Muzak Inc., which has already closed down Elizabethtown, Ky., plant and sold W. 46th St. New York studios to RCA, is linked by *Variety* with antagonism of broadcasters toward his recent bill to establish advisory committee on TV-radio programming (Vol. 7:22), which they vigorously oppose. Muzak subsidiary is Associated Program Service, one of oldest transcription libraries, headed by ex-BAB chief and onetime CBS executive Maurice Mitchell, now being offered in parts instead of as full catalog. *Variety* says Muzak asking price is between $2,000,000 & $3,000,000 though Benton once reportedly turned down $4,500,000.

Televised Congressional hearings were assailed by New York State Bar Assn. civil rights committee as a form of "third degree" for witnesses. Committee recommended bar group go on record as favoring: (1) Banning of TV, radio, photos, movies of Congressional or executive hearings while any witness is testifying, except at public hearings on pending legislation. (2) TV, radio and photo apparatus at hearings on pending legislation be as inconspicuous as possible. (3) No telecasts or broadcasts of hearings be commercially sponsored. Committee said no "sound constitutional basis" had been found for assertion that TV cameras have legal rights to record hearings.

Mass teaching potential of TV is treated in new study available from Commerce Dept. Office of Technical Services (Document PB 105 493, 75¢). Report, second in series titled *Training by TV* (Vol. 7:36), details finding of study by Army, Navy and Fordham U in which 3000 Army reservists were given 8 weekly lessons via 10-city TV "network." Stations participating: WNAC-TV, Boston; WCBS-TV, New York; WCAU-TV, Philadelphia; WMAR-TV, Baltimore; WOIC (now WTOP-TV), Washington; WHEN, Syracuse; WEWS, Cleveland; WJBK-TV, Detroit; WBNS-TV, Columbus; WKRC-TV, Cincinnati.

How TV is affecting 2 different sports—in opposite ways—is related in 2 "survey" stories in recent issues of *Wall Street Journal.* Nov. 24 article treats hockey, says attendance in U. S. is down 15-20% from 1947-48 season, whereas most games in TV-less Canada still attract overflow crowds. "The biggest part of the answer seems to be TV," article concludes. However, Madison Square Garden president Gen. John Kirkpatrick is quoted as feeling that in long run TV might create greater attendance. Gen. Kirkpatrick reveals that TV-radio rights to Garden events now bring in more revenue (15% of gross) than does hockey (10-12%, down from 18%). *Journal's* Nov. 26 story gives TV heavy credit for upswing in attendance at wrestling matches—to tune of 9% hike in attendance, 11% gain in gate receipts over year ago. TV stations and sponsors are paying more for wrestling matches, too. Says story: "In 1946, a promoter usually got $200-$400 for the right to televise one of his wrestling shows. Currently, a promoter can get up to $1500, [and for network shows] promoters [usually] receive more than $20,000."

Count of TV Sets-in-Use by Cities

As of December 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps, as established by NBC Research.

AFTER ADDING 620,400 for November, NBC Research's monthly sets-in-use "census" as of Dec. 1 comes to 15,176,200—indicating that, in view of heavy December sales, figure will be closer to 16,000,000 than 15,000,000 when New Year begins. Higher rate of increase again reflected such developments as transcontinental interconnections (San Francisco showing 30,000 gain in month, Los Angeles 20,000); third station in Atlanta (which gained 14,000 in month); extended fringe coverage due to higher powers and more sensitive receivers (New York area gained 90,000, Chicago 40,000, Philadelphia 30,000, Boston 24,000, St. Louis 21,000). November over-all increase was best for year, comparing with 552,300 in October (Vol. 7:47), 447,500 in September (Vol. 7:43), 284,300 in August (Vol. 7:35). Following is the Dec. 1 count (consult individual stations for their estimates of number of families within respective services ranges):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	71,000
Atlanta	3	148,000
Baltimore	3	350,000
Binghamton	1	47,200
Birmingham	2	81,100
Bloomington, Ind.	1	18,000
Boston	2	833,000
Buffalo	1	241,000
Charlotte	1	106,000
Chicago	4	1,060,000
Cincinnati	3	300,000
Cleveland	3	548,000
Columbus	3	183,000
Davenport-Rock Island	2	80,500
Dayton	2	162,000
Detroit	3	575,000
Erie	1	57,000
Grand Rapids	1	80,000
Greensboro	1	75,000
Huntington	1	62,500
Indianapolis	1	182,000
Jacksonville	1	46,000
Johnstown	1	127,000
Kalamazoo	1	63,000
Kansas City	1	170,000
Lancaster	1	123,000
Lansing	1	70,000
Los Angeles	7	1,065,000
Louisville	2	118,000
Memphis	1	109,000
Milwaukee	1	294,000
Minneapolis-St. Paul	2	289,000
Nashville	1	48,300
New Haven	1	212,000
New York	7	2,720,000
Norfolk	1	91,200
Omaha	2	104,000
Philadelphia	3	970,000
Pittsburgh	1	350,000
Providence	1	180,000
Richmond	1	98,800
Rochester	1	98,100
Salt Lake City	2	64,600
San Diego	1	110,000
San Francisco	3	298,000
Schenectady	1	187,000
St. Louis	1	348,000
Syracuse	2	153,000
Toledo	1	137,000
Utica	1	60,000
Washington	4	312,000
Wilmington	1	87,400
Total Interconnected	95	14,363,700
Non-Interconnected Cities		
Albuquerque	1	12,100
Brownsville (Matamoros, Mexico)	1*	10,200
Dallas	2	145,000
Fort Worth	1	
Houston	1	108,000
Miami	1	80,000
New Orleans	1	72,600
Oklahoma City	1	92,300
Phoenix	1	38,900
San Antonio	2	58,900
Seattle	1	117,000
Tulsa	1	77,500
Total Non-Interconnected	14	812,500
Total Interconnected and Non Interconnected	109	15,176,200

* Preliminary estimate, U. S. sets only.

Note: TV sets sold in Canada totaled 67,648 up to Oct. 31, 1951, according to Canadian RTMA (Vol. 7:48). Since Canada has no stations of its own and nearly all of these sets are in border areas, they add appreciably to audiences of stations in nearby U.S. cities.

Good filmed TV programs may eventually pay for themselves through re-use . . . and even "build up a reserve to pay for [sponsor's] advertising in perpetuity," says Dec. 5 *Variety*, citing these examples: (1) Procter & Gamble, which is paying $735,000 for 43 *Fireside Theatre* films, produced by Frank Wisbar, has received offer of $430,000 plus 40% of revenue for re-runs of the films. (2) Bing Crosby Enterprises, which produced *Fireside* series last year and sold 44 films to P&G for $350,000 but retained residual rights, is releasing series again this year under title of *Royal Playhouse*, has recouped all but $200,000 of its original $750,000 investment in the films. It's pointed out end of FCC station freeze will open vast new territory to films produced especially for TV and already shown in present TV areas.

BY ELECTION DAY, next November, there will be about 18,000,000 TV sets in use in the United States —reaching potential audience of more than 60,000,000 persons—"exceeding the total population when Grover Cleveland campaigned for the presidency in 1884." Authority is RCA's Gen. David Sarnoff.

Already, more than 15,000,000 sets are in use, according to latest count (see next column)—and year-end statements of manufacturers thus far indicate they think 1952 output and sales should approximate if not equal this year's. That means something like 5,000,000, so that end of 1952 may well show 20,000,000 sets in use in very nearly that many American homes.

Another noteworthy estimate by the RCA-NBC top-kick in year-end statement: "Based on the financial results of the first 10 months, the 1951 time billings of the 4 TV networks and 109 stations [including one on Mexican border] should reach at least $250,000,000. This year, for first time, TV surpassed network radio in revenues."

Radio moved forward, too—added some 12,000,000 new sets that were sold during 1951, its Golden Anniversary year if measured from time of Marconi's first transatlantic wireless signal in 1901. Radios in use now total about 100,000,000; radio homes, about 43,000,000; autos with radios, 24,000,000—these served by 2400 AM and 680 FM stations.

And anomalous as it may seem, phono record business went up 15% in 1951.

Pocket wireless microphone-transmitter, particularly useful for TV performers, has drawn interest of CBS-TV, and ABC-TV, according to inventor Robert Stephens who demonstrated device to FCC Dec. 18. Microphone and 2-tube FM transmitter weigh 3 oz., fit into breast pocket; 5-oz. power supply fits into coat or trouser pocket, is good for 3 hours. Unit is FM, 50 mc, has 125-ft. range. Temporary use of 50 mc may be authorized by FCC, but rule-making is necessary for permanent allocation. Units are being made by Stephens Mfg. Corp., 8538 Warner Dr., Culver City, Cal.; distributor is RYB Inc., 251 S. Robertson Blvd., Beverly Hills, Cal. RYB representative Eddie Yuhl reports that Signal Corps has tested 3 units in Korea for 6 months, ordered more. Company counsel is W. Ervin James, formerly assistant to ex-Comr. Clifford J. Durr.

Helicopter measurements of WJZ-TV's antenna pattern from Empire State Bldg. (Vol. 7:47) showed deviation from circularity, according to ABC engineering v.p. Frank Marx, so his engineers reoriented and rephased elements to correct distortion. Marx says theoretical calculations by RCA, antenna's manufacturer, didn't hold up in actual operation. Currently, engineers are trying to determine whether conventional on-the-ground measurements show better pattern than indicated by helicopter recordings and how the two may be correlated. Included in program are helicopter measurements of WSB-TV, Atlanta. Marx has passed his findings and correction techniques along to RCA and other Empire State occupants: WABD, WCBS-TV, WPIX, WNBT.

Bound and Indexed

We're planning to index and bind, between embossed book covers, in limited quantity, all 1951 issues of the *Television Digest* Newsletters plus the year's Supplements and TV Factbooks. This volume of 52 Newsletters, Supplements, Factbooks and Index will provide a handy and handsome permanent reference. Orders will be taken only until Jan. 5. Price, $25 per volume.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
December 22, 1951

'MERRY CHRISTMAS' IN TRADE FIGURES: Two more statistical weeks to go for year -- and the industry's TV output total has not only gone well over 5,000,000 already but factory inventories have been worked down to 222,229 from mid-summer peak of nearly 770,000. The 222,229 wouldn't be much more than one week's output by 1950 and early 1951 standards; runs good 2 weeks by fourth-quarter 1951 standard.

That inventory should go down still more before New Year -- not only at the factories but at wholesale & retail levels -- is manifest from generally favorable reports around the trade. Said Dec. 21 New York Times: "Many retail dealers all over the country have increased their dollar sales volume for TV receivers in the last 4 weeks as much as 100%, store spokesmen reported yesterday."

Persistent price promotion and substantial assistance in the last week from holiday gift buying were given as reasons. But one store executive noted that gain isn't as impressive as seems, at first blush, because there was "beat-the-tax" buying rush for several weeks prior to Nov. 1, 1950 when 10% excise tax went into effect; then from Nov. 1 to end of 1950, there was a retail slump.

But any increase over any period in 1950 is regarded as welcome in a trade that suffered such serious summer and autumn doldrums this year.

* * * *

Its auditors having missed usual deadline last week, RTMA this week gave out figures for 2 weeks ending Dec. 7 & 14. Output for Dec. 7 week was 109,468 sets (4841 private label), inventory went down about 14,000 to 241,641. Output for week ending Dec. 14 was 117,047 (5100 private), inventory then went to 222,229. For the first 11 weeks of fourth quarter, output figure comes to 1,200,580 (subject to revision)--which, added to first 9 months' 3,970,857, gives 5,171,437 and 2 weeks to go.

Radio output for Dec. 7 week was 206,581 units (80,483 private label) and inventory was 297,471; radios turned out were 129,501 home sets, 17,280 portables, 59,800 auto. For week ending Dec. 14, radio output was 200,869 (73,055 private) and inventory was 287,016; sets were 124,208 home, 19,815 portable, 56,846 auto.

Thus radios for 11 of the 13 weeks of fourth quarter equalled 2,259,636 -- which, added to first 9 months' 10,077,478, total 12,337,114 and 2 weeks to go.

Trade Personals: William S. Schmidt, on leave from Monongahela Power Co., Fairmont, W. Va., named to NPA electrical equipment div. to direct priority system for supplying industry, military & Atomic Energy Commission with electrical components . . . **Louis J. Collins** promoted from Chicago sales mgr. to gen. sales mgr., Capehart-Farnsworth, succeeding **E. Patrick Toal**, resigned . . . **Robert E. Lee**, GE tube dept. finance mgr., Schenectady, named asst. mgr. of CR tube operations, Syracuse, succeeded by **Randolph M. Duncan** . . . **H. A. Gumz**, Webster-Chicago production mgr., elevated to v.p. in charge of all govt. orders . . . **James Dales**, ex-Motorola and Belmont, named chief TV-radio engineer, Hoffman Radio . . . **Saul Decker** promoted to chief TV engineer, CBS-Columbia Inc. . . . **Wm. W. Paul** elected v.p., Radio Condenser Co., Camden, N. J., continuing as secy.-treas. . . . **Claire Chamberlain** promoted to buyer of TVs, radios, musical instruments and related items for Spiegel Inc. mail-order div. . . . **Hollis D. Bradbury** appointed national mgr. of film recording sales, RCA engineering products dept., succeeded as Eastern mgr. by **Everett Miller** . . . **Herbert Frank**, who resigned recently as Starrett sales director to join Jewel Radio, now reported remaining with Starrett as sales v.p.; **Frank D. Langstroth**, Starrett president, and **Bernard Hecht**, gen. mgr., resigning as of Jan. 1, **Jack Krieger** becoming executive v.p. . . . **William F. Cassedy Jr.**, ex-Kearfott Mfg. Co. gen. mgr., elected president of Aircraft Radio Corp.

* * * *

TV DX-ing pays off businesswise in Longmont, Colo., despite fact nearest stations are in Omaha, 500 miles away, according to appliance store owner Howard McKee. December *Radio & Television News* reports how store is cashing in on publicity and getting to be known as *the* TV store in Longmont in preparation for day when TV comes to area. McKee and technician Lawrence Pickerell have logged 24 stations, all low band, including those in Los Angeles, San Francisco, Atlanta, Charlotte, Greensboro. Best and most consistent signal is that from Houston's KPRC-TV. Among oddities noted is fact that best signal was achieved in 1950 by pointing antenna at 14,000-ft. mountain, but peak didn't help in 1951. Once, unusually good picture came when antenna was directed at cloud.

Novel experimental license on 32,000 mc, highest frequency yet authorized by FCC, was recently granted to Video Corp. of America, New York private-label TV receiver manufacturer, to test radar-like device for recording vehicle speeds. Grant specifies A-O (no modulation) emission, .02 watts, employing QK-290 klystron. Device measures phase difference of outgoing and reflected waves.

Topics & Trends of TV Trade: GE's Dr. W. R. G. Baker, who plays it by slide-rule, leans heavily on researchers for market data, knows the Washington score better than most manufacturers, says in year-end statement that "public demand for TV receivers in 1952 will be substantially the same as that which existed in 1951." As for radios, he thinks materials restrictions will reduce their 1952 sales volume to 6,000,000, down 27% from the 8,200,000 home & portable units expected to be sold in 1951.

"It is true," Dr. Baker's statement says, "that the [1951] sales of TV receivers in some of the large and older TV markets such as Boston, New York, Philadelphia, Washington, Chicago and Los Angeles were substantially less than in 1950, and that the trend may extend through 1952. We believe, however, that consumer demand in these older markets in '52 should hold up to the 1951 level as a result of obsolescence of small-size picture receivers, elimination of the confusion in the minds of the buying public concerning color TV, increased sale in the fringe areas due to the more sensitive type of receiver now available and the possibilities of increased transmitter power which may be effective for at least a portion of 1952.

"Officials of the NPA have indicated that the metals which will be made available to the TV industry in 1952 will allow the manufacture of 3,500,000 to 4,000,000 TV receivers. The industry estimates about 4,300,000. These quantities compare with approximately 7,500,000 in 1950 and 5,300,000 estimated for 1951.

"Estimates of industry production and retail sales for the last 2 months of 1951 indicate, with expected seasonal increased buying for Christmas, that only normal inventories of all makes of TV receivers will be on hand at the end of 1951 at manufacturing, distributor and dealer levels."

GE has stopped production of 17-in. sets to concentrate on expanding 20-in. line, executive v.p. Roy W. Johnson told New York press conference this week. He said 20-in. sets are now on allocation, but admitted "selling 17-in. receivers at present is a problem." He added that production of 17-in. probably won't be resumed until May. At same conference, GE president Ralph Cordiner predicted all GE consumer goods—with possible exception of TV—will be on allocation by May. And he made this rather surprising forecast: GE hopes to produce in 1952 three-quarters of the appliances it made this year, despite shortages. He said substitution and conservation of materials will account for high output; total would be only 50% of 1951 "without use of these alternate materials." He said GE's fourth-quarter production of consumer goods is 40% below levels of year ago; without conservation it would be 60% off. Some 20-25% of company's total billings are currently for defense, and defense business will reach 30-35% next year and "level off there," said Mr. Cordiner.

* * * *

Trade-practice rules for TV-radio industry (Vol. 7:39) took another step forward this week when All-Industry Committee on Trade Practice Rules met in Washington, approved most of rules it will recommend to Federal Trade Commission. Next is final committee session about Jan. 17, then third and final FTC public hearings, probably in February. Attending meeting: Louis B. Calamaras, National Electronic Distributors Assn., chairman; Glen McDaniel & Ray Donaldson, RTMA; Mort F. Farr, National Appliance & Radio Dealers Assn.; Edwin A. Dempsey, National TV Dealers Assn.; James R. Oberly, Admiral; Fred Walker, dealer in Alexandria and Arlington, Va.; Douglas Day & Robert E. McLaughlin, DuMont; Clifford J. Hunt, Stromberg-Carlson; Ray Saxon & Will Osterling, RCA; Max Balcom & Jack Harvey, Sylvania; Henry Weaver, Philco.

Admiral-Norge deal is "99% off," Norge president George P. F. Smith is said to be telling Norge distributors. Reports have it he's informing them: (1) Disclosure of negotiations by Admiral to buy Norge Div. from Borg-Warner (Vol. 7:48) was unpopular with Norge personnel and distributors who want to see Norge continue as autonomous organization. (2) Admiral and Norge drifted apart over "details," and it's doubtful whether they'll get together again. (3) Borg-Warner has been negotiating with other "blue-chip TV names, including RCA, Sylvania, Motorola." (4) Price of Norge was $15,000,000, to include about $6,000,000 worth of Norge's finished or convertible inventory. (5) Group of independent investors headed by Smith & Sampson, Chicago Norge distributor, is seeking to buy Norge, with Norge president Smith's blessing. Efforts to reach principals for statements were unavailing.

TV-radio distributors accepting chairmanships of RTMA Distributor TV Sports Committees are: Stanley Glasser, president, Sea Coast Appliance Distributors, Inc., Miami; John G. Gaines, John G. Gaines & Co., Inc., Kansas City; Allen S. Lasky, v.p., Mayflower Sales Co., St. Louis; Emanuel Zerega, president, Zerega Distributing Co., Seattle. Committees form phase of 12-point program by RTMA Sports Broadcasting Committee, headed by RCA's J. B. Elliott, aimed at boosting public attendance at 1952 sports events (Vol. 7:47).

TV "$1 sales" hearing by Federal Trade Commission on charge against Electrical Center, Washington retailer (Vol. 7:45), was canceled this week pending "negotiated settlement" between firm and FTC, according to FTC. Dealer was accused of falsely stating that any purchase of TV, radio or appliance at regular price entitled customer to buy another article "of same kind and value" for $1.

* * * *

Merchandising Notes: "If all installment buying ceased and consumer spending was suddenly placed on a cash basis, the national economy would probably stagger into a complete collapse," said RCA Victor distribution v.p. Robert A. Seidel, speaking Dec. 19 before Columbia U seminar on consumer-credit management; theme was that mass production means mass sales, which are impossible without extensive consumer credit . . . Admiral introducing new 17-in. TV-radio-phono (37-M) as mid-winter promotional item, to list at $450 in walnut & mahogany . . . Stromberg-Carlson offering 2 new 24-in. consoles, full doors—"Newcastle," $725, "Cathay," $795, including tax . . . Westinghouse buying out Danforth Co., its Pittsburgh distributor, to be operated as own distribution agency.

Trade Miscellany: Freed Radio hearing under bankruptcy laws (Vol. 7:10) now set for Jan. 10, when firm will file proposed new operations plan . . . Raytheon leases one-story, 50,000-sq. ft. building in Waltham, where 400 more workers will be employed starting in May . . . Contract for community TV antenna system in Hancock, Md., has been awarded Electric & Telephone Construction Co., Philadelphia . . . Tel-O-Tube Corp. of America, CR tube maker, purchases Video Industry Products Co., Paterson, N. J., making TV & CR test equipment, which moves into new 10,000-sq. ft. plant at 159 Marshall St., Paterson.

An aid to makers of TV picture tubes, fluorescent lamps, etc., is Navy's new 40-p. *Survey of the Theoretical Aspects of the Luminescence of Inorganic Crystalline Solids* (PB 102 597). It's available at $1 from Office of Technical Services, Dept. of Commerce, Washington, D. C.

Hundreds of electronic and electrical patents owned by Govt. have been made available to American industry for free use. Total of 2339 available patents are listed in booklet, *Govt.-Owned Inventions for Free Use*, for sale at $1 by Supt. of Documents, Washington.

Mobilization Notes: German and Italian electronic components are available in sufficient quantity and quality to help relieve predicted shortages of American-made parts. Electronics Production Board chairman Edmund T. Morris Jr. and Lt. Col. Carl B. Lindstrandt, of Defense Dept.'s Electronic Production Resources Agency, reached that conclusion after visiting 12 European manufacturers, 7 in Western Germany and 5 at Milan, Italy. Among points made in report this week on October trip:

(1) "The importation of up to 500,000 German selenium rectifiers, using Swedish selenium, would help to avert an impending shortage of rectifiers needed by several important defense-supporting and civilian industries, and the home radio-TV receiver industry."

(2) While precision wire-wound resistor facilities are available in Europe, "production at present is extremely small due to lack of orders."

(3) Carbon resistors are available "in considerable quantities."

(4) Approximately 40 lbs. per month of fine enameled resistance wire is available.

(5) At least 2 potentiometer manufacturers are capable of producing precision variable resistors in quantity.

(6) "Most of the companies have both technical and production facilities equivalent to comparable companies in this country and several are carrying on interesting technical developments."

Technical details about foreign manufacturers and their products are available from NPA Electronics Div.

* * * *

Limiting factors in transmitter production—not only TV, but AM & FM and all other types—are delays in delivery of components and lack of engineering and technical personnel. That was consensus of 9 transmitter makers who met with NPA for first time Dec. 19. Allotments of controlled materials haven't held up manufacture of transmitters and related military projects as much as shortage of components, they said. Unanimously, the manufacturers agreed scarcest item is Mu-metal, high nickel content alloy used as shielding. Hardest-to-get components include relays, nickel-bearing transformer laminations, small electric motors, mica and gas capacitors, crystals, meters, coils and special tubes for military work. Manufacturers agreed most serious manpower headaches resulted from shortage of senior engineers, layout draftsmen, technicians (testers or troubleshooters), wiremen, toolmakers, machinists. J. Bernard Joseph of NPA Electronics Div. presided at meeting attended by:

R. H. Hollister, Collins Radio; Lester H. Carr, Continental Electronics, Washington, D. C.; C. E. Williams, DuMont; E. Labin, Federal Telecommunications Labs; Parker S. Gates, Gates Radio; Frank P. Barnes, GE; T. A. Smith, RCA; William Zillger, Standard Electronic Co., Newark; C. W. Miller, Westinghouse.

* * * *

Electronics Miscellany: Victoreen Instrument Co., Cleveland, as of Dec. 29 acquires all stock of Pioneer Electronics Corp., Salem, Mass., Pioneer to operate as subsidiary; Cyrus W. Haller, onetime Sylvania executive, now Pioneer president, elected president of Victoreen, succeeding Winfield Kendrick, retired . . . Robertshaw-Fulton Controls Co. buys out Fielden Instrument Corp., Philadelphia industrial electronics measurement equipment, which will be operated as subsidiary . . . Electronic Instruments Inc., Brooklyn (Harry R. Ashley, president), has purchased 6-story, 30,000-sq. ft. plant at 84 Withers St., Brooklyn to house offices and factory . . . Chatham Electronics Corp. to build 100,000-sq. ft. one-story plant on 17-acre tract at Route 10 & Okner Blvd., Livington, N. J.

Metals forecast for 1952: DPA says defense and defense-related production and construction will take more than 40% of nation's supply of carbon steel, 60% of copper and aluminum. And these other developments this week provide clues to metals situation in coming year:

Nickel, for which defense requirements next year exceed total supply, will probably be most critical electronic material by end of 1952. But Dr. John F. Thompson, chairman of International Nickel Co., forecasts 30% increase in nickel supply by 1954 over pre-Korea level, due to expansion by established producers and opening of new mines. International Materials Conference announced U. S. will get slightly more of the free world's tungsten, a little less molydenum during first quarter 1952 than current fourth quarter 1951.

At least 7,000,000 lbs. of aluminum will be lost as result of walkout this week at Reynolds' Troutdale, Ore. plant, NPA officials estimate. Cadmium producers, distributors and consumers urged NPA to relax order M-19, which controls use of the metal. Producers said they have 2-month supply on hand and defense demands haven't been as heavy as anticipated.

* * * *

TV servicemen got long-sought materials relief this week when CMP Regulation 7 (maintenance, repair & operating supplies) was amended to give them priority on materials needed for installations. Installers of all "domestic appliances" are included in regulation, which permits them to use their MRO quotas for installation materials (antenna lead-in wire, etc.). At same time, NPA amended CMP Regulation 5 to permit manufacturers to obtain materials for installation of equipment in existing buildings on priority basis. Order establishes separate minimum quarterly quotas of $1000 each for MRO supplies, minor capital additions and installations.

Bottleneck-breaking regulation issued by NPA Dec. 19 is expected to be big help to defense electronic manufacturers and laboratories. New Direction 4 to Regulation 2 permits manufacturers of tubes and resistors to arrange delivery of small rated (priority) orders without regard to chronological receipt of orders. Only type order that can't be bumped by small order under new regulation is one carrying DX super-priority rating. Size of orders coming under Direction 4 is tightly limited. For example, no manufacturer is permitted to ship more than 50 tubes of any one type to any one customer in a month.

———■———

Dividends: Motorola, quarterly 62½¢ and extra of 37½¢ both payable Jan. 15 to stockholders of record Dec. 28; Allied Electric Products (Sheldon), 11¼¢ payable Dec. 28 to holders Dec. 17; Canadian Admiral, 15¢ payable Dec. 29 to holders Dec. 17; IT&T, 20¢ payable Jan. 23 to holders Dec. 21; Technicolor, 50¢ payable Dec. 27 to holders Dec. 19; Reeves-Ely, 10¢ payable Dec. 28 to holders Dec. 14; Packard-Bell, 25¢ payable Jan. 25 to holders Jan. 10; Emerson, 25¢ payable Jan. 15 to holders Jan. 4.

International Resistance Co. holds stockholders' meeting Jan. 9 to vote on proposed increase in authorized common shares from 1,097,225 to 1,500,000. With 1,067,163 shares now outstanding, company plans to sell 250,000 more through F. Eberstadt & Co. and Zuckerman, Smith & Co., proceeds to be used for additional working capital and product development.

M. H. Cogan, president of Symphonic Radio & Electronic Corp., Boston, has sold controlling interest to New York group headed by Max Zimmer & Al Jacobs, Apex Electronics, and including Sidney Joffee, Pathe.

Electrical & Musical Industrial Ltd., London (EMI) reports net income of £838,122 for fiscal year ended June 30 vs. £456,666 for preceding fiscal year.

Telecasting Notes: NARTB's new TV code seal (Vol. 7:49), to be displayed by member stations conforming with newly promulgated *Code of Practices for Telecasters* (Supplement No. 76), due to be ready for distribution in early January, probably will be flashed on screens regularly by networks and stations as part of their identification signals . . . NBC-TV's 7-9 a.m. show *Today*, starting Jan. 14 (Vol. 7:50), actually will keep m.c. Dave Garroway and staff going 3 hours each weekday morning, for there will be repeat hour for piping to Central Time Zone so that it can hew to same 7-9 a.m. look-or-listen habit patterns contemplated by v.p. Pat Weaver . . . Added promotion gimmick for show is fact it will be staged in so-called "Studio of Tomorrow" in RCA Exhibition Hall, facing on 49th St., so that morning passersby can have a look—though city ordinances prohibit outdoor loud-speakers . . . Pittsburgh's WDTV, DuMont-owned, which as only station in one of top markets in country picks and chooses what it wants from the networks, now carries Milton Berle's *Texaco Star Theatre* alternate Tuesdays only, having cleared every other week for half hour of *Frank Sinatra Show* (Ekco Products, CBS-TV) and for Saturday Evening Post's *Keep Posted* (DuMont) . . . Sam Goldwyn, who has said he thinks film houses of future must compete on "qualitative" basis against "quantitative TV," and who hasn't released any of his oldies to TV yet, did relent to this extent for *Salute to Samuel Goldwyn* carried this week on KNXT, Hollywood: he appeared personally to introduce scenes culled from his films *Dodsworth, Pride of the Yankees, Best Years of Our Lives, Wuthering Heights* and, latest, *I Want You* . . . First unit of NBC's huge new TV housing project, on 50-acre tract adjoining Warner Bros. studios in Burbank, will be 2 studios, each seating 500, covering about 5 acres, costing some $2,000,000; groundbreaking is due soon after New Year's, occupancy expected by next Oct. 1 . . . ABC fashioning dozen studios for AM out of old warehouse adjoining its TV Center on West 66th St., preparatory to moving out of RCA Bldg. in March when lease expires and NBC takes over all or most of its present space . . . Civil Defense Administration is distributing kinescopes of its 7-installment *Survival* series to all TV stations; series portrays effect of atomic bomb on cities, was shown on NBC-TV last summer . . . Tommy Henrich, another ex-New York Yankee great, joins Joe DiMaggio in TV sportscasting by signing of long-term WJZ-TV contract to share 11:10-11:20 p.m. Mon.-Tues.-Thur.-Fri. show with Russ Hodges, sponsor Sun Oil; DiMaggio will handle pre- and post-game shows for Yankees.

NBC is raising local rates of 3 of its 5 owned-&-managed TV stations as of Jan. 1: KNBH, Los Angeles, from $1250 to $1500 per Class A hour, from $200 to $300 per 1-minute or 20-seconds; WNBK, Cleveland, from $750 to $900 & $150 to $175; WNBW, Washington, from $550 to $650 & $120 to $135. Also planned are local rate increases for WNBT, New York, now $3750 an hour, and WNBQ, Chicago, now $1500—but these are as yet undetermined and not due until next Feb. 15.

Extra Copies of TV Factbook No. 14

Our semi-annual *TV Factbook No. 14* will be off the presses shortly after Jan. 15, 1952—containing directories and basic reference data about stations & networks (including rate schedules), manufacturers, program suppliers, FCC and others concerned with TV. One copy goes to each full-service subscriber. Extra copies will be available to subscribers at $2.50; if you place pre-print orders for quantities of 20 or more (i.e., before Jan. 7, 1952) we'll supply them at $1 per copy.

THE FCC, Chairman Coy & Comr. Jones particularly, have been eyeing askance the trends in network-station fiscal relations lately—notably NBC's plan to readjust radio rate structure and payments to radio affiliates. Commission has instructed its legal and economic staffs to have a look, apparently suspecting deliberate attempt to depress AM for sake of TV.

However bitter toward one another competitively, it's axiomatic that none of the networks and very few stations want any govt. agency to meddle in their contractual relationship—a field definitely outside FCC's legal scope.

It's good guess that, faced with the prodigiously important job of ending its self-created and self-protracted TV freeze, to say nothing of staff shortage and the heavy pressures of the coming political year, this "probe" will merely create lots of work and annoyance, win some publicity, then simply go the way of FCC's famous "network equalization" plan of latter 1950 (Vol. 6:40 et seq).

That one proposed changing network rules to limit the number of hours TV stations in certain areas might take from any single network. It died on the vine, favored not even by the networks it was designed to help.

CBS-TV Division joins NARTB-TV this week, bringing with it wholly-owned stations WCBS-TV, New York, and KNXT, Hollywood. Part-owned (45%) station WTOP-TV, Washington, doesn't belong. Total TV membership now includes 76 stations (out of total of 108) and 3 networks. As network member, CBS-TV is entitled to directorship, presumably to be assumed by its president Jack Van Volkenburg. Parent company left old NAB several years ago in disagreement with policies, hasn't yet returned its radio network or stations. NARTB reports increase in radio memberships also—14 new ones this week bringing total to 1324—958 AM, 366 FM.

Nominations for 1951 duPont TV-radio awards for "outstanding public service" were invited this week (closing date Jan. 31) by O. W. Riegel, curator of duPont Foundation, Washington & Lee U, Lexington, Va. Winners in 3 categories—large station, small station, commentator—will get $1000 each. Awards committee: Dr. Francis P. Gaines, president of Washington & Lee U, chairman; Mrs. Jessie Ball duPont (who established awards in 1942); B. M. McKelway, editor of *Washington Star;* Hadley Cantril, director of Princeton's Office of Public Research; Mrs. Hiram C. Houghton, president of General Federation of Women's Clubs.

Applications filed with FCC this week boosted total to 470. Ohio State U filed for non-commercial station in Columbus on Channel No. 12; KWTX, Waco, Tex., No. 11; WROL, Knoxville, Tenn., No. 6; KFOR, Lincoln, Neb., No. 10; KWWL, Waterloo, Ia., No. 7. Also filed but returned as incomplete, was request from Cache Valley Bcstg. Co. for No. 2 in Logan, Utah. [For further details, see *TV Addenda 13-W* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Grand total of 1497 filings in FCC's famed "paper" TV allocations hearing was received by final deadline date of Dec. 17. Though commissioners have been satisfied with staff's work to date (Vol. 7:49) and though big corps of engineers, attorneys, accountants and economists are doing almost nothing but "freeze" work, target date of Feb. 1 for final decision appears tough one to meet. Much depends on whether Commission continues to accept staff's recommendations with little change.

RCA offers new "special effects amplifier" to accomplish fades, dissolves, superpositions, wipes, insertions, etc., "at microsecond speed," expects it to supersede optical and mechanical techniques.

1952 OUTLOOK FOR TV & ALLIED ARTS: We didn't do so badly in this space exactly a year ago, when we forecast a "cloudy" New Year that promised:

"(a) Prolonged national emergency, with diminishing TV-radio output as the industry swings over to defense production." In 1952, the industry's main preoccupation will continue to be electronics for defense.

"(b) Prolonged station freeze, with its prolongation of monopolies of the now-profitable telecasting facilities." In early 1952, freeze should be lifted -- but that doesn't mean more stations immediately, or even soon. (See below.)

"(c) Prolonged arguments about color TV, now a chimera without even the proverbial Chinaman's chance of emerging commercially during the emergency." That forecast for 1951, obvious then and even more obvious now, stands for 1952, too; everybody would prefer to forget the great color fiasco of 1951.

Looking a bit more closely into what 1952 promises, this is a summary of the best thinking of Television Digest's editorial staff:

* * * *

FREEZE: Final decision by March 1. First grant about June 1, total number of new stations authorized to be 25-50 for year, mostly uhf, because eager competition for scarce and valuable channels means many, many hearings. Very few of these stations to be on the air by year's end.

TELECASTING BUSINESS: To continue "terrific" for the 108 franchise holders, many enjoying freeze-created monopolies. Telecasting time sales of 1951, totaling some $250,000,000 (about half network), to be exceeded by far in 1952 due to higher rates stemming from increased audience and greater acceptance of medium. Rough guess is that another $250,000,000 was spent in 1951 on TV talent, production & facilities -- programs -- and it's a cinch that bill won't go down in 1952.

SET OUTPUT & TRADE TRENDS: NPA estimates 3,500,000 TVs. Manufacturers' consensus approaches 4,500,000. Best forecast is probably somewhere between the two -- but considerable new conservation measures will be necessary to achieve 4,000,000. Optimism of set makers isn't unnatural when you consider that they turned out about 5,300,000 TVs in 1951, as against forecasts of around 4,000,000 this time last year. Tube sizes are settling down to 17 & 21-in.; some 24-in. and a few 27 & 30-in. will sell in 1952. Trade should continue good at all levels, the servicing business especially so, with sales about equalling 1951's by reason of inventory carryovers.

MATERIALS SHORTAGES: Copper, aluminum and nickel to continue very scarce through 1952, with tightest pinch on civilian production in third quarter -- despite earlier govt. assurances that materials pinch would ease early in year. Military take of metals will force new second-quarter cut, probably 10%, in copper & aluminum for TV-radio and other "more essential" consumer durables, then another smaller cut in third quarter.

* * * *

That's the larger picture. Getting down to some of the important specifics in the telecasting and related fields, as seen from the Washington vantage:

Copyright 1951 by Radio News Bureau

Theatre TV: FCC hearing to be postponed from Feb. 25 for one or 2 months. Final decision near year's end. Much to-do all year about system vs. system, color vs. monochrome, etc., while number of installations (now about 60) mushroom to point where theatres become consistent factor as bidders against home TV for major events, still mostly sports.

Subscription TV: FCC too preoccupied all year with other more pressing matters, particularly problems flowing from "thaw" of freeze. It's unlikely to go into subject deeply. If there is hearing, decisions on basic principle involved in giving blessing to pay-as-you-look system, and on choice of system, are entirely unlikely by year's end.

Color: No Commission action at all, because of NPA ban on manufacture of color receivers. Lifting of ban unlikely for duration. NTSC to say it's ready with perfected compatible system any time FCC is prepared to consider it.

Network Service: AT&T to extend facilities to 8 more cities, mostly in second half 1952, namely: Oklahoma City, Tulsa, Fort Worth, Dallas, San Antonio, Houston, New Orleans, Miami. Only 4 stations to remain outside networks' scope -- in Albuquerque, Phoenix, Seattle, Matamoros, Mex.-Brownsville, Tex. Most, if not all extensions, to be completed by November elections.

Educational Channels: Few schools will apply for them, even though FCC's final decision will set aside flock of channels much as originally proposed. A few more schools will vie with commercial aspirants for regular channels.

Boosters & Satellite Stations: FCC to authorize only very limited experimentation with this effort to widen coverage of existing TV outlets. Consideration as commercial service unlikely during 1952, perhaps longer.

ABC-United Paramount Theatres Merger: Probably will go through after long hearings (due to start Jan. 15) and lots of legal byplay over charges of "stifled competition" and a rehash of Dept. of Justice's old Paramount anti-trust decree.

Station Construction: Structural steel shortage won't ease noticeably in 1952, as mobilizers originally forecast. Result is NPA will make few if any special materials allotments for construction of new stations, TV or other. Construction will be slowed, but not halted -- builders getting very little materials aid in addition to amounts of metals they're permitted to self-certify each quarter (now 25 tons of steel, 2000 lbs. of copper, 1000 lbs. of aluminum; Vol. 7:51). A few stations may get on air using such very small amounts of metals -- simply through the addition of TV equipment to existing AM tower and buildings.

The FCC: One, 2 or 3 new faces before year is out, probably even more if Democrats lose November elections. Chairman Coy makes no bones about intention of quitting soon, meaning probably as soon as he can after freeze-lift order in spring. Several members can retire with benefits any time they wish, may elect to do so. Only term expiring is that of Comr. Hyde (Republican) next June 30. Comr. Hennock surely won't stick if GOP comes in; her unhappy experience with Senate Judiciary Committee, which wouldn't approve her judgeship appointment, may have repercussions in Congress -- especially with GOP seizing on every chance to discredit Democrats.

* * * *

Political year inevitably means squeezes upon FCC, particularly in light of the largess it can hand out in the way of TV channels now valued in millions; but in light of bad reputation it earned during color imbroglio and Hennock hearings, in light of current Washington scandals, it can be assumed Commission, however constituted, will renew efforts to keep itself aloof from politics and above reproach. At least, that would seem to be better part of simple prudence and plain common sense.

TV-AM-FM STATIONS AS OF JAN. 1, 1952: New Year carries TV freeze into 40th month, and likely to go full 4 years before any more stations are on the air. Old year saw only one new station go into operation -- Atlanta's WLTV (Vol. 7:39), the 108th and last authorized by FCC.

There were a few more among our Latin American neighbors, but only one held meaning for U.S. viewers -- XELD-TV, Matamoros, Mexico, just across Rio Grande from Brownsville, Tex., with audience mostly on our side of border and drawing revenues primarily from American sponsors.

For all practical purposes, therefore, year ends with 109 stations whose signals are within range of some 27,500,000 U.S. families (about 62% of the nation's total) already using some 15,500,000 TV sets. That doesn't include Canada & Mexico.

Detailed data on all these stations, plus list of the 473 applications for new stations pending before FCC, plus present & proposed allocation tables, digests of station rate cards, tabulations of sets-in-use by areas with market data, TV-radio production figures, directories of TV manufacturers, program syndicates, etc. -- all will be included in our TV Factbook No. 14, which goes into mails to all our full TV service subscribers shortly after Jan. 15, 1952. [Extra copies, $2.50.]

* * * *

Our 1952 AM-FM Directory, ready about same time and made available to full subscribers [extra copies $7.50], brings to light these facts about growth of radio:

(a) AM station authorizations totaled 2410 at end of 1951 (2306 licensees, 104 CPs), only 59 more than the 2199 licensees, 152 CP holders at end of 1950. This indicates rate of increase in number of radio stations is at long last slowing down. End of 1950 compared with 2246 total at end of 1949; 2131, end of 1948; 1961, end of 1947; 1579, end of 1946; 1056, end of 1945.

(b) Applications for new AM stations were up to 290 at end of 1951 from 259 end of 1950, but applications for new facilities were down to 172 from 224. Dropped during year were 13 licenses, 20 CPs.

(c) AM stations in other major North American countries didn't change much -- Canada now has 173 (vs. 162 last year), Mexico 298 (276), Cuba 104 (104).

(c) FM grantees totaled 654 at year's end, 640 of them on air. At end of 1950, total was 706, of which 672 were on air. There were 38 FM licenses dropped in 1951, and 28 CPs turned in. FM applications virtually ceased coming in, only 7 now pending. Same trend was apparent at this time last year when only 8 were pending.

RATES ON THE RISE—NETWORK & LOCAL: TV network and station rates are going up again -- despite self-expressed fears in the industry that time-&-talent costs are forcing TV advertising so high that it could price itself out of business (Vol. 7:49). Radio rates pale by comparison, actually are trending downward.

NBC-TV's new rate card, effective Jan. 1, 1952, quotes new Class A time on its affiliates (6-11 p.m.; Sat. & Sun. 1-11 p.m.) at $25 to $500 per hour more than did its preceding rate card of July 1, 1951 -- for an average increase of 9%.

Reasons cited for hikes: more sets-in-use, lower cost-per-thousand viewers.

A sort of 6-month cycle of rate-raising over last few years has kept pace with TV's meteoric rise to well over 15,000,000 sets-in-use (Vol. 7:51). Whither networks lead, the stations follow -- though local rate cards are at lower levels.

How local rates are climbing, too, is clearly manifest as we digest rate cards of all outlets (109 of them, including Matamoros-Brownsville) for next edition of our semi-annual TV Factbook (No. 14) due off presses around Jan. 15. The station that hasn't hiked local rates during last 6 months or so is exception; for typical current examples, see item about NBC-owned stations' new rate cards (Vol. 7:51).

* * * *

New NBC-TV rate card shows basic hookup of 41 stations -- "available only as a group" -- plus others that can be added if advertiser desires and if time can be cleared. For Class A hour, it costs advertiser $39,975, whereas the 36 stations on old basic network cost $31,150. All 52 interconnected stations cost $44,700.

The new basic stations added are WNHC-TV, New Haven, at base rate of $900; WOOD-TV, Grand Rapids, $500; KDYL-TV, Salt Lake City, $375; KRON-TV, San Francisco, $1000; KNBH, Los Angeles, $2050.

Heading basic list is network's own WNBT, New York, whose $4000 up to $4500 is highest of all the increases. Philadelphia's WPTZ goes from $1900 to $2100 and Chicago's WNBQ from $2000 to $2200. Most other hikes are smaller, e.g., St. Louis' KSD-TV from $1100 to $1250, Kansas City's WDAF-TV from $700 to $800. (For complete listing of all new NBC-TV station rates, see next page).

Closest rival CBS-TV hasn't yet announced increases, but its rate card has been undergoing gradual overhaul and new one probably will be forthcoming soon, too

-- especially since it serves many of same stations as NBC-TV. Its New York WCBS-TV is still listed at $4000 (as is ABC's WJZ-TV); but Chicago affiliate WBKB is currently quoted at $2000 as against $1600 six months ago; WJBK-TV, Detroit, $1500 vs. $1000; WCAU-TV, Philadelphia, $2000 vs. $1600, etc. ABC-TV is now certain to up rates, too, as will DuMont.

All new network rates are subject to 6-month period of grace. For 5-6 p.m. Mon.-thru-Fri., the networks charge 75% of Class A rates; for all other times, 50%. New NBC rate card introduces new frequency discount formula, designed to encourage year-round use of medium. The 26-week discount is eliminated and there's slight reduction in 39-week (depending on size of period) -- but 52-week contracts get 10% added discount, so that scale now ranges from 15% for once-weekly 15-minute user up to 25% for user of 5 half-hours weekly.

NEW NBC-TV network rates, which go into effect Jan. 1, involve increases in network charges for its 41-station basic hookup to the following base hourly rates (Class A time); for previous rates, see *TV Factbook 13:*

WNBT, New York, $4500; WBZ-TV, Boston, $1750; WNHC-TV, New Haven, $900; WJAR-TV, Providence, $800; WRGB, Schenectady, $825; WKTV, Utica, $400; WSYR-TV, Syracuse, $700; WPTZ, Philadelphia, $2100; WDEL-TV, Wilmington, $525; WBAL-TV, Baltimore. $1100; WNBW, Washington, $975; WTVR, Richmond, $500; WTAR-TV, Norfolk, $500; WGAL-TV, Lancaster, $625; WJAC-TV, Johnstown, $625; WNBK, Cleveland, $1425; WBEN-TV, Buffalo, $1000; WHAM-TV, Rochester, $650; WSPD-TV, Toledo, $725; WWJ-TV, Detroit, $1525; WJIM-TV, Lansing, $475; WOOD-TV, Grand Rapids, $500; WLW-T, Cincinnati, $975; WLW-D, Dayton, $675; WLW-C, Columbus, $725; WSAZ-TV, Huntington, $425; WNBQ, Chicago, $2200; WTMJ, Milwaukee, $1075; KSD-TV, St. Louis, $1225; WMCT, Memphis, $625; WSB-TV, Atlanta, $625; WBRC-TV, Birmingham, $425; WAVE-TV, Louisville, $575; WSM-TV, Nashville, $375; WOC-TV, Davenport, $450; KSTP-TV, Minneapolis, $900; WOW-TV, Omaha, $550; WDAF-TV, Kansas City, $800; KDYL-TV, Salt Lake City, $375; KNBH, Los Angeles, $2050; KRON-TV, San Francisco, $1000.

For interconnected stations individually available, NBC-TV quotes following base rates: WDTV, Pittsburgh, $900; WICU, Erie, $550; WTTV, Bloomington, $200; WKZO-TV, Kalamazoo, $500; WFMY-TV, Greensboro, $450 (effective Feb. 1); WBTV, Charlotte, $500; WMBR-TV, Jacksonville, $400; WFBM-TV, Indianapolis, $800; WNBF-TV, Binghamton, $400 (Jan. 15); WOI-TV, Ames, $400; KFMB-TV, San Diego, $550.

For non-interconnected stations available via film or kine-recordings: WTVJ, Miami, $600; WDSU-TV, New Orleans, $525; KOTV, Tulsa, $500; WKY-TV, Oklahoma City, $600; WFAA-TV, Dallas & WBAP-TV, Fort Worth, $750 (individually at $475); KPRC-TV, Houston, $600; WOAI-TV, San Antonio, $400; XELD-TV, Matamoros, $250; KOB-TV, Albuquerque, $200; KPHO-TV, Phoenix, $300; KING-TV, Seattle, $650 (Feb. 1).

Seven women in TV-radio have been given first annual *McCall's* awards for outstanding community service: Elizabeth E. Marshall, Chicago Board of Education (top award for programs on WBEZ, WIND and WJJD); Kit Fox, WLW, Cincinnati; Sister Mary St. Clara, WKBB, Dubuque, Ia.; Edythe J. Mesrand, WOR, New York; Bee Baxter, KSOO, Sioux Falls, S. D.; Helen Faith Keane, WABD, New York; Dorothy Gordon, WQXR, New York.

The $100,000 sale of WCOL (AM & FM), Columbus, to Secretary of Commerce Charles Sawyer and family (owners of WING, Dayton, and WIZE, Springfield) was approved by FCC this week, Comr. Jones dissenting but issuing no opinion.

Personal Notes: Edward Kletter, ex-president of Product Advertising Corp. and v.p. of United Cigar-Whelan Stores Corp., appointed head of DuMont Network's merchandising & business development dept., newly set up to create and administer merchandising and point-of-sales promotion for sponsors . . . A. A. (Abe) Schechter rejoins NBC Jan. 1 as a general executive for TV, resigning as v.p. of Crowell-Collier Publishing Co. He left NBC in 1942 to join Army, was news & special events v.p. of Mutual after return. First NBC-TV chore will be supervision of 7-9 a.m. Dave Garroway show *Today* . . . Robert B. Hanna Jr., of GE's WRGB, WGY & WGFM, promoted to mgr. of GE's newly established broadcasting stations dept. . . . George W. Clark has resigned as Chicago mgr., John E. Pearson Co., to set up own rep firm to be known as George W. Clark Inc., 333 N. Michigan Ave., Chicago . . . Fred Brokaw has returned to Paul H. Raymer Co. as executive v.p. for radio, headquartering at N. Y. office . . . Harold Fellows, NARTB president, named chairman of new Commission on Mass Communications formed by National Conference of Christians & Jews . . . Donald W. Thornburgh, president of WCAU & WCAU-TV, Philadelphia, one of 8 radio-advertising executives cited by Big Brothers of America for public-service awards . . . Rodney Erickson, TV-radio mgr., Young & Rubicam, appointed chairman of national TV committee of 1952 Heart Fund drive headed by Bruce Barton; Thomas M. McDonnell, radio director, Foote, Cone & Belding, heads radio committee . . . Dr. Franklin Dunham, chief of radio & TV for U. S. Office of Education, awarded 1951 Award of the School Broadcast Conference "for meritorious service to educational radio and television" . . . Robert B. Hoag, ex-gen. sales mgr., KXNT, Los Angeles, transferred to CBS-TV Spot Sales, N. Y. . . . Fred Albin, recording engineer of KECA-TV, Los Angeles, elected president of Society of Television Engineers . . . Donald K. deNeuf succeeds Michael R. Hanna as gen. mgr. of Rural Radio Network to enable Mr. Hanna to devote fulltime to managership of WHCU, Ithaca, N. Y. . . . Robert L. Coe, ex-mgr. of KSD-TV & WPIX, appointed mgr., DuMont station relations dept., under direction Elmore B. Lyford . . . Warren Jennings, onetime WLW Eastern sales mgr., promoted to ABC-radio national spot sales mgr. . . . Dwight E. Rorer leaves Washington law firm of Dow, Lohnes & Albertson Jan. 1 to set up practice at 530 Washington Bldg., phone Republic 0727, continuing as member of Grant, Exselsen & Rorer, New York firm dealing primarily in inter-American corporate work . . . Bernard Koteen on Jan. 1 establishes own Washington practice at 536 Wyatt Bldg., phone Metropolitan 5711, leaving Cohn & Marks.

Duplication of magnetic tape at rate of 9 half-hour copies in 11 minutes is claim made for new machine developed by L. S. Toogood Recording Co., 221 N. LaSalle St., Chicago, and Rawdon Smith Associates Inc., 1710 Rhode Island Ave. NW, Washington.

Station Accounts: Marshall Field, big Chicago dept. store, dropping its thrice-weekly *Uncle Mistletoe* puppet show for children in favor of *Pace of Chicago*, starting Jan. 10, Thu. 9:30-10 p.m. on WBKB, said to be most elaborate and most expensive TV production yet put on locally. Show will be devoted to Chicago and its people, with "Editor Caleb" tying its segments together, including orchestra, dramatic vignettes, name stars, chorus, etc.; it uses 25-30 people, is budgeted at $5000-$10,000 per week, written by Douglas Johnson, author of *Hawkins Falls* and some of *Studs' Place* stories . . . **California Machinists Non-Partisan Political League**, offshoot of AFL's International Assn. of Machinists, Jan. 11 starts 52-week series titled *Without Fear*, devoted to public affairs and good citizenship, on KTTV, Los Angeles, Fri. 8:30-9 p.m.; kine-recordings will then be placed on KFMB-TV, San Diego, Mon. 10-10:30 p.m., and KGO-TV, San Francisco, Tue. 9:30-10 p.m., thru Leonard Shane Agency, L. A. . . . **Marlon Confections Corp.**, thru Zlowe Co., New York, becomes second quarter-hour sponsor of *Roller Derby* on WCBS-TV, New York, starting Jan. 5, Sat. 4-5 p.m.; first sponsor signed was **Philip Morris**, thru Biow Co. . . . **Landers, Frary & Clark**, whose Universal appliances line now includes "Jet 99" vacuum cleaner, will introduce that item with $1,000,000 national ad campaign, plus cooperative advertising, starting in March and including TV-radio, thru Goold & Tierney Inc., N. Y. . . . **Insurance Co. of North America** sponsored company choir Dec. 24, 9:30-10 a.m. for second year on WPTZ, Philadelphia, thru N. W. Ayer . . . **Minneapolis Brewing Co.** (Golden Grain Beer) quitting long-standing *Friendly Fred* disc show on WCCO to go on TV . . . **National Peanut Council**, Washington, furnishing dealer aids for National Peanut Week, Feb. 3-9, with TV-radio included in plans . . . Among other advertisers reported using or preparing to use TV: **Pacific Citrus Products Co.** (Hawaiian Punch), thru Atherton Adv., Los Angeles (KNXT); **Mentholatum Co.** (cold remedy), thru J. Walter Thompson Co., N. Y. (KNXT); **F. Schumacher & Co.** (Glosheen, Etruscan cloth), thru Lawrence Boles Hicks Inc., N. Y.; **Regina Cigar Co. Inc.** (Hillcrest, Sobo cigars), thru Gresh & Kramer Adv., Philadelphia; **Swift Homes Inc.** (factory-built homes), direct; **Marble Institute of America**, thru Moore & Beckham Inc., Greenwich, Conn.; **James Lees & Sons** (carpets & knitting yarns), thru D'Arcy.

Network Accounts: TV's ability to draw new sponsors is indicated in CBS-TV year-end statement pointing out that of 55 companies placing new business with network during year these 39 were newcomers to the network: American Home Products, duPont, General Cigar, Schick, Aluminum Corp., Ekco Products, Johnson & Johnson, Pearson Pharmacal, Susquehanna Waist Co., Waring Products, Schlitz, Best Foods, Burkart Mfg. Co., Ronson, Standard Brands, Bonafide Mills, Blatz, Hudson Pulp & Paper, National Dairy Products, Brown Shoe, Quaker Oats, Atlantis Sales, Lehn & Fink, Coro Inc., Consider H. Willett Inc., Hall Brothers, Curtis Circulation Co., Falstaff Brewing Corp., Goodall Fabrics, Grove Laboratories, Kenwill Corp., Landers, Frary & Clark Inc., Marlene's, Newsweek, Norwich Pharmacal, Paas Dye Works, Time Inc., Wamsutta Mills, Lambert Pharmacal . . . **Bristol-Myers Co.** (Vitalis, Ipana, Mum, Sal Hepatica) Jan. 13 moves *Break the Bank* from NBC-TV to CBS-TV, Sun. 9:30-10, thru Doherty, Clifford & Shenfield, N. Y.

American Tobacco Co. cancellation of some $1,000,000 worth of spots on NBC-TV, CBS-TV & ABC-TV (all immediately gobbled up by waiting sponsors) explained as due to (1) Lucky Strike's declining position among the name brands, and (2) company's plans to spend more TV budget on new *Meet the Champ* show, amateur servicemens' boxing bouts, due to start Jan. 3 on ABC-TV, Thu. 9:30.

Network TV-Radio Billings

November 1951 and January-November 1951

(For October report, see *Television Digest*, Vol. 7:48)

NETWORK TV BILLINGS will go well over $125,000,000 for 1951, judging from 11-month total of $113,834,346 reported by Publishers Information Bureau. November TV billings were slightly under October's, according to monthly tabulation and somewhat under network radio billings for November, though both NBC and CBS now show network TV billings in excess of network radio. NBC-TV & CBS-TV dropped from November peaks, however, ABC-TV and DuMont showing slight increases.

TV's big upsurge, radio's slight downsurge, are indicated by fact $113,834,346 billings for TV's first 11 months compare with $33,900,910 for same 1950 period; $160,099,546 billings for radio's first 11 months compare with $167,685,906 for same 1950 period. Detailed PIB figures:

NETWORK TELEVISION

	November 1951	November 1950	Jan.-Nov. 1951	Jan.-Nov. 1950
NBC	$ 6,555,205	$ 3,070,010	$ 52,670,473	$ 17,910,935
CBS	4,605,506	2,215,744	37,734,476	10,659,929
ABC	1,911,243	1,243,549	16,605,766	5,330,046
DuMont	847,373	*	6,823,631	*
Total	$13,919,327	$ 6,529,303	$113,834,346	$ 33,900,910

NETWORK RADIO

CBS	$ 5,257,454	$ 6,455,478	$ 63,506,265	$ 64,200,179

July	2,267,674	4,387,193	1,347,841	3,728,687	11,731,395
Aug.	2,210,352	4,440,261	1,329,375	3,808,906	11,788,894
Sept.	2,165,971	4,645,527	1,324,061	3,713,235	11,848,794
Oct.	3,158,714	5,615,723	1,759,468	4,414,200	14,948,105
Nov.	3,220,760	5,257,454	1,583,291	4,315,646	14,377,151
Total	$30,408,627	$63,506,265	$16,203,944	$49,980,710	$160,099,546

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by PIB on basis of one-time network rates, or before frequency or cash discounts. Therefore, in terms of dollars actually paid to networks they may be inflated by as much as 40%. Figures are accepted by networks themselves, however, and by the industry generally, as satifactory index of comparisons and trends.

———■———

Canadian Broadcasting Corp. gets grant of $4,750,000 to cover current deficit, plus appropriation of $6,250,000 a year for next 4 years, under budget approved by Parliament. This income augments the nearly $6,000,000 derived annually from $2.50 radio-set tax and about $2,000,000 from CBC commercial time sales—presumably will also hasten completion of CBC's now-building Toronto & Montreal TV outlets, now promised by "mid-summer."

NO SHORT-TERM predictions from NBC president Joseph H. McConnell in his year-end statement; rather, he prefers to make them for the long range, and this he opines is prospect for 1955:

(a) Enough new TV stations on the air so that "Milton Berle may very well reach Broken Bow, Okla."; (b) 28,000,000 American homes with TV sets, accommodating audience of 84,000,000, or more than half the population; (c) 4100 TV-equipped theatres, serving 4,300,000 viewers; (d) total national advertising budget of $8 billion, of which $1 billion will go to TV; (e) compatible color TV, backed by solid support of TV industry.

As if to footnote McConnell statement, NBC-TV sales research mgr. Robert W. McFadyen, speaking this week before Boston meeting of American Marketing Assn., said American advertisers are already spending at rate of $450,000,000 annually on TV advertising; that 75 of the 100 largest national advertisers are sponsoring network TV, Procter & Gamble alone spending more than $10,000,000 this year; that TVs are owned by at least 51% of families in 25 top markets and by one out of every 3 homes in U. S.; and that average TV family's income is $4490 vs. non-TV family's $3846.

No worrier about impact of TV, *Broadcasting Magazine*, authoritative spokesman of the radio broadcasting industry, says AM stations in both TV and non-TV markets expect their total billings to increase in 1952 and forecasts, on basis of own survey, that average increase for all AM next year will be 12.65%. In non-TV markets, it says, AM stations expect local billings to go up average of 12.79%, national spot up 13.7%, network down 6.82%. In TV markets, AM stations expect local billings to go up average of 15%, national spot up 9.55%, network down 5.6%. *Broadcasting* reports most advertisers will maintain and some will expand 1952 radio budgets, with "only slight evidence of declining spending in radio"; of agencies surveyed, 58% will increase radio spending, 29% stick to 1951 levels, 13% cut back somewhat. "Economy and size" is radio's great competitive pitch, says periodical, which estimates 1951 network TV billings will come to $129,000,000, or about 185% higher than 1950, and that average TV station will do 50% more business in 1952 than 1951.

Doleful tale of network radio slump is related by radio editor George Rosen in Dec. 26 *Variety*, reporting networks "make no bones over the fact that they're something more than distressed over their inability to lure fresh sponsorship coin." Currently, a renewal of network radio show, says Rosen, "is almost a cause for jubilation" and attempts to peddle new shows or bring in new clients are "adding up to zero" despite many formulas and merchandising schemes. Recalling that NBC is on record as expecting to lose $1,000,000 on radio in 1952, while it undertakes to revamp radio's economic pattern to meet inroads of TV, editor Rosen relates: "But the fact remains that NBC, like CBS, ABC and the others, is alarmed over the failure of the agencies and the advertisers to respond to their gimmicked-up sales merchandising patterns."

School work is generally unaffected by TV, according to survey conducted by Xavier U, Cincinnati, under grant by Crosley Broadcasting Corp. Study conducted among nearly 1000 Cincinnati children emphasized, however, that bad viewing habits could hurt school achievement. Other conclusions: (1) "poorer TV habits, lower IQs, lower parental control and poorer school achievement tend to be found in the same child"; (2) more time was spent watching TV than in school (30 hours vs. 25 weekly); (3) most popular show was Milton Berle, westerns next; (4) mystery-crime programs were liked best by lower-IQ children.

Telecasting Notes: NBC-TV scored smash hit among viewers who are opera lovers with Christmas Eve presentation, under sponsorship of Hallmark greeting cards, of first opera written expressly for TV—Gian-Carlo Menotti's *Amahl and the Night Visitors* (in English). Carried on 35 stations, kinescoped for others, it won acclaim of music and TV-radio critics, probably will get repeat performance, though next in Samuel Chotzinoff's *NBC Television Opera Theatre* series is Tchaikovsky's *Pique Dame*, Thu., Jan. 3, 11-midnight, which like first 2 in series will be sustaining . . . *New York Times* music critic Olin Downes went overboard for Christmas show, wrote: "It may be said at once that if nothing else had been accomplished by this work, TV, operatically speaking, has come of age. [It] must be considered as a historic event in the rapidly evolving art of TV" . . . Sen. Wm. Benton's Muzak Inc. (Vol. 7:51), through subsidiary Associated Program Service, radio transcription library headed by Maurice B. Mitchell, is contemplating entry into TV-film field, starting with syndication of Encyclopedia Britannica Films, also a division of Muzak and specializing in 16mm educational features . . . TV camera "looked in" on Dec. 22 parley of food handlers' union, employers and State conciliators in what KTTV, Los Angeles, claims is first telecast in which general public could "sit in" on labor negotiations to head off threatened strike; station gave it full Sat. 9-10 p.m. period . . . Schlitz will have *Autobiography of Grandma Moses* as feature of its *Playhouse of Stars* on CBS-TV Feb. 29, or only 2 days after Harpers publishes book; Helen Hayes will star, sponsor paying $2500 for TV rights . . . U. S. Olympic Committee has obtained exclusive rights for TV films of 1952 Olympics in Helsinki, Finland, is offering them for sale to highest bidder, plans also to sell TV-radio rights to Los Angeles tryouts in June and thereby gain part of $850,000 budget needed to send them to games . . . CBS gave Xmas bonus of week's pay to staff not covered by union contracts; NBC handed out 5% to all earning $7500 or less . . . H-R Representatives Inc., already handling WNAC-TV, Boston, appointed national rep for Yankee Network and its radio stations . . . Katz Agency takes over representation of KEYL, San Antonio, now Storer-owned, as of Feb. 1, 1952.

National Association of Amusement Parks, Pools & Beaches considering this plan, attributed to Westinghouse sales promotion manager Fred S. McCarthy, whereby they can draw people out of homes next summer: "TV theaters" to be installed in parks, consisting of 24-in. receiver, 40-50 seats, setup to be installed and serviced at $2700. Idea is to get people to patronize parks, catch their favorite TV shows or get acquainted with TV if they don't have sets; also, to permit parents to rest-and-look while moppets enjoy the other attractions.

To avoid excessive eye fatigue, TV receiver should be placed either at or slightly below eye level and children should be kept at least 6 ft. away, Dr. Abraham S. Walfish, TV committee chairman, told New York State Optometric Assn. recently. He also reported that when children sit too close to TV screen there is tendency to develop nearsightedness, or where defects already exist, "they become more manifest." He repeated assurances of other eye specialists, however, that TV does not cause eye defects.

New "ultra low loss" uhf coaxial transmission line is described in 5-page technical article by O. O. Fiet in RCA's Sept.-Oct. *Broadcast News*. He uses graphs, formulas, etc., to define performance of MI-19089 line (3⅛-in.), says experiments with 6⅛-in. line have been encouraging. Earlier this year (Vol. 7:18), FCC was so concerned about losses in long uhf lines (70%-80% for 1200 ft. at 890 mc) that it asked all transmission line manufacturers what can be done about it.

Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755
Trade Report
December 29, 1951

TV TRADE FACTORS AT YEAR'S END: Few believe that the Crosley & Magnavox price cuts this week and lower prices quoted by Motorola on its new line (see Topics & Trends) betoken general trend. Nor are many people in the trade much surprised that predicted end-of-year set shortages didn't materialize.

General industry feeling is that prices have firmed since fall-winter trade pulled down mid-summer inventories from dangerous peaks, and that changes, if any, will be upward in view of rising costs of materials and labor. Some items may be reduced due to engineering refinements and conservation methods -- but general opinion is that these will be exceptions.

As for set shortages, depletion of inventories hasn't been so great as to make it hard to get sets for customers yet, though some manufacturers claim certain models are in consistently short supply and a few big ones say they're selling every set they can turn out.

The 1952 shortage picture, if any, depends on: (a) size of inventory in all pipelines as New Year begins, which can only be guessed at this writing but which, on basis of end-of-October figures (Vol. 7:49), isn't likely to go much below the 1,000,000 mark; (b) production rate permitted by govt. materials controls during the New Year--nobody expecting 1952 can come up to this year's apparent total 5,300,000; (c) continued popular demand for receivers, with outlook good in light of much-improved programs and further extensions of network service in latter 1952.

* * * *

No RTMA weekly production figures were released this week, so output totals of 5,171,437 TVs and 12,337,114 radios for 50 weeks up to Dec. 14 are latest on tap (Vol. 7:51) -- expected to come to near round 5,300,000 & 13,000,000 when count for last 2 weeks is made available. Year-end statements from trade tycoons were notable for their unusual caution this season, very few of them offering much more than reviews and rehashes of 1951 accomplishments.

From Research Institute of America's executive policy letter, we think the following paragraphs are worth quoting because of the unusual care with which this group (Leo Cherne, Leon Henderson, et al) tackles economic questions:

"Consumer buying," it reports after noting that "less gadgets and more guns more quickly" will underlie all govt. policy relating to civilian output, "is likely to run about 4% over last year. Retail sales could easily jump 8-10% if price resistance declines. And that may happen as new shortages become visible this spring ...and as consumer expectation of lower prices shifts to an acceptance of high tags ...'No sense waiting any more...might as well buy now.'

"The firming of many prices in durable lines, including TV, may have this effect even before shortages appear at retail levels.

"An obvious caution for retailers is that comparisons with 1951 will be misleading because of the distorted pattern this year."

MANY OFF FOR CHICAGO MARTS, JAN. 7-18: About usual number of TV-radio manufacturers will display their wares, some of them new, at Chicago's big winter furniture markets, Jan. 7-18. And usual number of concurrent conventions and private hotel and display room showings will be held during and around those dates -- notably Admiral's at the Drake, Jan. 3-5, Philco's at Palmer House, Jan. 4-5.

Big American Furniture Mart on Lake Shore Drive lists 13 TV-radio producers who have reserved space among the scores of housefurnishings manufacturers, namely: Admiral, Arvin, Belmont (Raytheon), Bendix, DuMont, Hallicrafters, Jackson Industries, Motorola, Olympic, Philco, RCA Victor, Sparton, Westinghouse.

At the Merchandise Mart, these will display: General Electric, Magnavox, Crosley, Capehart-Farnsworth, Murphy Radio Ltd., Telequip. Besides other Chicago

showings previously reported, Tele-tone announces display in Blackstone Hotel, starting Jan. 7; Hallicrafters in Drake, Jan. 10-12; National Electronics Mfg. Co., with new 'Natalie Kalmus' line, at 520 No. Dearborn St.; Meck, 1020 No. Rush St.

Western Winter Market in San Francisco has been set for Feb. 4-8, with TV and radio much in evidence among the scores of merchandisers planning to display.

Topics & Trends of TV Trade: Never one to underestimate, or to hide the industry's lights under the proverbial bushel, veteran editor O. H. Caldwell arrives at staggering total of $4,918,500,000 as "annual bill of U. S. for radio-TV." In January *Tele-Tech*, he figures it this way: 1951 sale of 5,600,000 TV receivers at retail, $2.1 billion; 13,500,000 radios at retail, $675,000,000; electricity, batteries, etc., to operate 119,000,000 radio & TV receivers, $400,000,000; 186,000,000 phonograph records at retail, $200,000,000; sale of time by broadcasters, $565,000,000; talent costs, $150,000,000. To this are added these sums for servicing & installation: 84,000,000 replacement receiving tubes, $141,000,000; 750,000 replacement TV picture tubes, $37,500,000; TV-radio component parts, antennas, accessories, $300,000,000; labor, $350,000,000.

U. S. homes with radios, according to Dr. Caldwell, total 45,850,000; secondary sets in such homes, 30,400,000; sets in business places, institutions, etc., 6,000,000; auto radios, 21,000,000; TV sets, 15,750,000—total 119,000,000 as compared to 99,000,000 in all rest of world.

During 1951, some 19,000,000 radio batteries were sold for $50,000,000 retail, according to *Tele-Tech;* 175,000 home recorders (wire, tape, disc) for $31,500,000; 4,000,000 phonographs, no value stated.

Investment in all the world's 218 million radio & TV sets is calculated at phenomenal total of $10 billion; in broadcasting stations, $175,000,000; in commercial communications stations, $100,000,000. Some 1600 TV, radio and parts manufacturers are said to represent total investment of $200,000,000, enjoying annual gross revenue of $3 billion, and employing 275,000 persons on annual payroll of $550,000,000. Distributors, dealers, etc., were said to have investment of $500,000,000, do gross of $3 billion, employ 200,000 on payroll of $650,000,000.

And Dr. Caldwell sees 1952 output of the industry reaching peak of $5.5 billion, made up of $4 billion military, $1.5 billion civilian products—whereas 1944-45 final war year output was $4.6 billion, including that of plants not normally engaged in radio manufacture.

* * * *

TV manufacturers can't force customers to pay more for warranties on new sets, even if warranty covers longer period. OBS chief counsel Harold Leventhal issued this interpretation at week's end. Interpretation says that manufacturers who extend the period of compulsory warranties, and then charge more for the warranty than they did during Dec. 19-Jan. 25, 1951 base period, violate General Ceiling Price Regulation. But OPS says manufacturers can offer longer warranties at higher cost if they give customers the choice of buying the longer warranty or doing without it. A manufacturer, said Mr. Leventhal, can't require customers to buy longer warranty at higher price even if he reduces the price of the set by the amount of the increase or more.

Admiral-Norge negotiations have been terminated "because of failure to reach satisfactory agreements," Borg-Warner Corp. announced at week's end (Vol. 7:48, 51). Borg-Warner presumably still is anxious to divest itself of Norge Div. and it's anticipated there'll be talks with other TV manufacturers looking toward sale of the big appliance firm.

RTMA moved Dec. 29 into enlarged quarters in Washington's new Wyatt Bldg., 14th St. & New York Ave. NW; new phone number: National 3902.

Motorola's new 19-set line, introduced during Dec. 29 sponsorship of East-West pro football game on DuMont (Vol. 7:51), runs $30-$125 under previous line, features "revolutionary simplified chassis" with fewer tubes and other components, "area selector switch" for fringe reception, provision for addition of uhf. Line starts with 14-in. portable and 17-in. plastic table at $200 (prices rounded out). Other 17-in. are wood table at $220, blonde $240; walnut open-face console $250, mahogany $260, blonde $280; combination $400, blonde $430. The 20-in. are two leatherette tables at $250, wood $280, blonde $300; open console $300, blonde $320; half-door console $340, blonde $360; combination $575, blonde $600.

Crosley reduced prices as of Dec. 26 on 10 consoles, cuts ranging from $20 to $60 on basis of Sept. 12 prices, actually $140 to $190 on basis of originally posted prices. Two 16-in. rounds were cut from $280 to $230 & $300 to $250, respectively; two 16-in. rectangulars, from $320 to $260 & $340 to $280; four 17-in. rectangulars, from $290 to $270, $310 to $290, $350 to $320 & $370 to $340; three 20-in. rectangulars, 2 models from $380 to $350 & one from $400 to $370.

Magnavox reduced seven 20-in. consoles by $24.50 to $40 on Dec. 26, also extended its June-December guarantee on prices to run to April 1. Cuts were made to meet competition, and included *Chippendale, Modern Theatre & Berkley* models reduced from $450 to $395; *Hepplewhite,* from $419.50 to $395; *Shoreham,* from $395 to $369.50; *Cosmopolitan* in mahogany, from $359.50 to $319.50; *Cosmopolitan* in oak, from $369.50 to $329.50.

Merchandising Notes: Latest Regulation W amendment provides that maximum loan for purchase of TV set shall be no more than specified percentage (unchanged at 85%) of cash price and never more than that percentage of ceiling price . . . **Sylvania** district distributors' meetings scheduled as follows: Jan. 4-5, Arlington Hotel, Hot Springs, Ark.; Jan. 8-9, Greenbrier, White Sulphur Springs, W. Va.; Jan. 12-13, Roosevelt Hotel, New Orleans; Jan. 17-18, Shadow Mountain Lodge, Palm Springs, Cal. . . . **Arvin closed down** Columbus, Ind., plant Dec. 21 for Christmas holidays and inventory-taking, resumes production Jan. 7; district sales managers held meeting at plant Dec. 27-28 . . . **"Philco TV Film Commercial Clip Service"**, now being offered to distributors for local advertising on TV, comprises "makeup books" of film openings, closings, animations etc., will be issued regularly at $60 per issue.

Exclusive-dealer TV-appliance franchise policy, common in radio-appliance industry before war, has been started again by Crosley. Firm will offer special promotional and merchandising aids to dealers, and guarantee against indiscriminate granting of franchises. Lloyd Dopkins, gen. mgr. of Crosley Distributing Corp., says company isn't seeking new dealers but is concentrating on inducing present retailers to drop other lines.

Eight-transmitter mobile communications center for civil defense, housed in 23x8-ft. truck, was delivered to City of Philadelphia this week by RCA. Unit has 10-kw power supply, public address system, connections for phone and power lines, 16 phones, facilities to communicate with police, firemen, amateurs, planes, TV & radio stations.

Trade Personals: Dr. Ralph Bown, Bell Laboratories director of research, ex-IRE president and holder of its Medal of Honor, named v.p. in charge of research of Bell Labs; William H. Doherty named director of research in electrical communications; Dr. H. T. Friis, director of research in high frequency & electronics; Dr. James B. Fisk, director of research in physical sciences . . . Douglas Y. Smith promoted to mgr. of sales operations, RCA tube dept., Earl M. Wood, mgr. of manufacturing, succeeding him as Lancaster plant mgr. . . . William M. Lana, ex-Air Force engineering officer, named head of new office of Sprague Electric Co. at 3 E. Second St., Dayton, O. . . . Walter Ostman, Philco division mgr. at San Francisco, named gen. mgr. of its newly established factory distributor branch in Los Angeles, succeeded in San Francisco by Harper Dowell . . . William F. Carolan, ex-E. B. Lathan Co., New York electrical distributors, named gen. sales mgr. of RCA Victor's newly created air conditioning dept. in Camden . . . William W. Paul, treasurer, elected v.p., Radio Condenser Co. . . . Charles G. Gilman, ex-Allied Screw Machine Co., new controller of Radio Craftsmen Inc., Chicago . . . Lawrence LeKashman now v.p., Electro-Voice Inc., Buchanan, Mich. . . . Ernest Marx, DuMont gen. sales mgr., returned Dec. 28 from 5-week trip to line up distributors in Latin America.

Copper, nickel, cobalt, tin, lead, zinc—these metals are in tighter supply today than they were 2 months ago; level of supply of most other raw materials appears to have stabilized, at least for time being. That's crux of DPA's fourth bi-monthly *List of Basic Materials & Alternates*, issued Dec. 28. Publication comments: "Among the nonferrous metals, copper continues to be the most critical, with little relief expected . . . Cadmium shortage, however, is easing . . . Steel production has reached new heights. [But] during the next 3 or 4 months steel will face its most serious scrap shortage in history. Only greatly stepped-up scrap collections can prevent a serious loss of steel production." Materials list can be obtained from Commerce Dept. field offices.

Appointment of Clay P. Bedford as military production czar, and naming of William L. Campbell as DPA deputy administrator for production, are steps in small-scale reorganization of mobilization program to meet Congressional criticism (Vol. 7:48). Mr. Bedford, executive v.p. of Kaiser-Frazer, becomes special asst. to the Secy. of Defense with title of Expediter of Military Production. He previously served as deputy DPA administrator. His successor, Mr. Campbell, is v.p. of Food Machinery & Chemical Corp., San Jose, Cal. Mr. Bedford has been prominently mentioned as successor to DPA-NPA chief Manly Fleischmann, who has announced he intends to leave Govt. next spring.

* * * *

One small branch of electronics industry which felt no 1951 trade slump is group of manufacturers making high-fidelity home radio-phono components, reports Dec. 26 *Wall Street Journal*. Dealers in custom sound systems report 1951 sales double those of 1950, which in turn were well above previous years, says article. It lists these high-quality-amplifier manufacturers as enjoying unprecedented demand for their products: Brook Electronics Inc., Elizabeth, N. J.; McIntosh Laboratory Inc., Binghamton, N. Y.; Altec Lansing Corp., Beverly Hills, Cal.; Bell Sound Systems Inc., Columbus, O.; David Bogen Co., New York; Waveforms Inc., New York; Radio Craftsmen Inc., Chicago; Hermon Hosmer Scott Inc., Cambridge, Mass.; Newcomb Audio Products Co., Hollywood, Cal.

Plans for FM promotion (Vol. 7:46,50) in North Carolina, agreed upon in manufacturer-broadcaster meeting Dec. 27 in Charlotte, include: (1) Manufacturers' preparation of dealer displays, spot announcements, press releases, direct mail campaign. (2) Broadcasters' offer of 10 or more free industry spots daily per station, free mention of local dealers' FM demonstrations, special programming, promotional newspaper ads. Campaign starts Jan. 21; promotion in Wisconsin begins Feb. 4, in District of Columbia March 1. *New York Times* TV-radio editor Jack Gould devoted Dec. 28 column to FM, noted varied FM fare in New York, ventured: "With TV set sales having subsided in recent months, apparently there is at least an even chance of the FM field enjoying more attention."

Some 50,000 color sets with Lawrence tri-color tubes could be made annually by Chromatic TV Labs, says Paul Raibourn, v.p. of Paramount Pictures, which is 50% owner of Chromatic. "What we can't understand," he says, "is why NPA's color order differs so much from what was agreed upon during the conference with Wilson. It looks like they're trying to keep color sets off the market, rather than trying to save materials. We'd like to make some sets and see how they go." He reports that Chromatic has turned out several versions of tube—"none perfect yet"—could get into mass production in 3 months if given NPA go-ahead.

Among 50 American scientists of last half-century, selected by *Popular Mechanics* for its Golden Anniversary January issue, are these contributors to TV-radio: Edwin H. Armstrong, Lee deForest, Vladimir Zworykin. Also included are such contributors to electronic theory and allied fields as Irving Langmuir, Ernest O. Lawrence, Robert A. Millikan, Nicola Tesla. Issue includes article "Dawn of the Electronic Age" by deForest who sketches growth of electronics, ventures transistor may supplement but never supplant vacuum tube, decries such developments as transit radio, castigates FCC for approving field-sequential color, peers into a future of electronic home heating, electronic plant-growth stimulation, etc.

TV transmissions via light waves, instead of electromagnetic, should be ready for point-to-point use in 2 years, home reception in 5—according to Dr. Allen B. DuMont, with whom light-wave idea has been a favorite project for years. In recent interview with AP's Wayne Oliver, he ventured that "Photovision" stations could be built for $2000-$5000 and serve 4-5 mile radius, using light beams penetrating clouds and fog. Receivers for light reception would take about half number of parts in present sets, he said. "It's only recently that I've been confident that we'll have Photovision," Dr. DuMont observed.

New director of naval communications is Rear Admiral William B. Ammon, who was deputy director before assuming command of a Pacific destroyer flotilla early this year. Admiral Ammon succeeds acting director Capt. W. B. Goulett who has served in post since Sept. 1, when Rear Admiral John R. Redman left to direct communications-electronics for Joint Chiefs of Staff (Vol. 7:34).

Bound and Indexed

We're planning to index and bind, between embossed book covers, in limited quantity, all 1951 issues of the *Television Digest* Newsletters plus the year's Supplements and TV Factbooks. This volume of 52 Newsletters, Supplements, Factbooks and Index will provide a handy and handsome permanent reference. Orders will be taken only until Jan. 5. Price, $25 per volume.

SPONSORSHIP of political conventions, election night returns and 13-week pre-election "get-out-the-vote" series—possibly largest single sale ever made by a network to a sponsor—was announced at week's end by Westinghouse and CBS. Entire TV-radio package will cost Westinghouse some $3,000,000, including promotion, was placed through Ketchum, McLeod & Grove, Pittsburgh.

While both political parties insist they have made no "definite" decisions on sponsorship of their nominating conventions, CBS says both Democratic and GOP National Committees have approved Westinghouse deal, and neither party will receive any fee. Details and time clearances are yet to be worked out, but CBS hopes to clear time on 50 TV stations for the political series.

Other TV networks haven't announced presidential campaign plans yet, but it's assumed all 4 will cover conventions—probably with their own sponsors. Westinghouse-CBS elections plans include:

(1) Coverage of July 7 GOP and July 21 Democratic conventions in Chicago's International Amphitheatre, with convention floor proceedings simulcast, human interest angles and sidelights handled separately for TV & radio. Minimum of 20 hours coverage is planned for each convention, using CBS staff of 200, including such top names as Edward R. Murrow, Lowell Thomas, Robert Trout, Douglas Edwards, Don Hollenbeck, etc. Background programs will be presented over TV & radio Sunday evening preceding conventions.

(2) Non-partisan political series giving equal time to candidates and speakers from both major parties, beginning in August and ending election eve. Programs will probably be weekly half-hour simulcasts.

(3) Election night returns Nov. 4 from 9 p.m. until trend is evident.

One of heaviest users of TV, Westinghouse sponsors high-budgeted *Studio One* on CBS-TV at estimated annual cost of $2,300,000 (Vol. 7:20) and this fall presented NCAA college football schedule on NBC-TV at about $2,000,000 (Vol. 7:36)—both figures including promotion.

TV's impact on movie attendance is on wane, will continue to decline during 1952 and as long as materials shortages hamstring receiver production. That's forecast by Paul Raibourn, Paramount Pictures v.p. and head of its KTLA, Los Angeles, in Dec. 26 *Film Daily* interview. He reasons that it's the novelty effect of a new TV in the home that hurts film attendance worst; after novelty wears off, set owners go back to the movies. With drastically curtailed set production, there'll be far fewer new TV homes. At same time, he adds, Hollywood studios will get more revenue from TV as production of films for TV becomes "more and more of a factor."

Three applications filed with FCC this week brought total pending to 473, of which 26 are uhf. Single uhf was from KWCO, Chickasha, Okla., for Channel No. 25 in Oklahoma City, while vhf requests came from KWWL, Waterloo, Ia., No. 7, and KVOL, Lafayette, La., No. 6. KVOL is 50% owned by publisher Morgan Murphy *(Daily Advertiser)*, who is already in for several other cities in which he has radio-newspaper interests. [For further details, see *TV Addenda 13-X* herewith; for listing of all applicants to date, see *TV Factbook No. 13* and Addenda to date.]

Now the "walkie-pushie"—a man-propelled mobile camera devised for Rose Bowl game by Jack Burrell, engineer for KNBH, Los Angeles. Camera is mounted on 4x6-ft. 3-wheel platform; power comes from 20 automobile batteries, produces signal receivable up to half mile. Big advantage is fact camera can be moved about field, unhampered by cables.

For "clear cut" test of Telemeter (coin-box) system of subscription TV, Paramount Pictures Corp.'s 50%-owned International Telemeter Corp. has asked Palm Springs, Cal. city council for permission to install $100,000 community-antenna system to pick up signals of all Los Angeles stations. Paramount v.p. Paul Raibourn says idea is to get an "isolated test without confusion and publicity." He doesn't disclose how experiment would be conducted—whether or where signal would be scrambled, what programs would be used, how much viewers would pay for what programs, etc. Speculation is that signal could be scrambled at Palm Springs receiving site, thus avoiding interruption to programs of Paramount's KTLA, Los Angeles, during regular viewing hours needed for tests. Paramount this week answered competitor Skiatron's request for late-run films to test Subscriber-Vision (Vol. 7:51) by saying Skiatron will get same treatment as Zenith did with its Phonevision tests (Vol. 6:22) as soon as it requests and gets FCC permission for home tests, and as soon as details of proposed experiment are clearly spelled out. Says Raibourn: "We're like FCC was when it authorized the Zenith tests. We don't want any impression given that we're endorsing the system."

Lashing National Football League's restrictions on TV-radio broadcasts of pro grid games as "patently illegal behavior," Justice Dept. attorneys filed brief in Philadelphia Federal Court Dec. 24, asking that NFL's motion to dismiss govt.'s injunction suit be denied (Vol. 7:41, 48-49). NFL's motion contended: (1) Pro football is not trade or commerce within meaning of Sherman Anti-trust Act. (2) TV-radio limitations don't deprive public of anything except seeing game on day of play, since game can be seen later on film and heard on recorded broadcasts. (3) Limited broadcasting isn't unreasonable restraint, since it's imposed only 12 days each year to protect goodwill and franchise of each club. Justice Dept. argued that NFL's TV-radio restrictions are "division of markets or territories" and "illegal per se." Federal Judge Allan K. Grim fixed Jan. 8 as date for argument on briefs.

Theatre-TV proponents are "one happy family" again. Twentieth-Century-Fox Dec. 26 filed reply with FCC endorsing joint comments of Motion Picture Assn., Theatre Owners of America and National Exhibitors Theatre-TV Committee in which they made it clear they want exclusive frequencies for theatre TV, are interested in shared industrial frequencies only as last resort (Vol. 7:50). Joint comments, filed Dec. 17, came in reply to Sept. 11 petition by 20th Century-Fox (Vol. 7:36) which enthusiastically advanced idea of joint use of industrial frequencies for theatre TV.

Paramount hearing will open Jan. 15 (Vol. 7:47) but recess until Feb. 4 after DuMont testimony—FCC and parties agreeing they need more time. Case involves, among other things, ABC-United Paramount Theatres merger and proposed $6,000,000 sale to CBS of UPT's WBKB, Chicago (Vol. 7:21).

Extra Copies of TV Factbook No. 14

Our semi-annual *TV Factbook No. 14* will be off the presses shortly after Jan. 15, 1952—containing directories and basic reference data about stations & networks (including rate schedules), manufacturers, program suppliers, FCC and others concerned with TV. One copy goes to each full-service subscriber. Extra copies will be available to subscribers at $2.50; if you place pre-print orders for quantities of 20 or more (i.e., before Jan. 7, 1952) we'll supply them at $1 per copy.
